In your contest with these powerful corporations you will need every argument available, and I need not say to you any more than this: Bring out from them a true statement as to tonnage of great lines that are controlled by powerful and friendly interests and secure accurate data (I can not get it) as to percentage on values of commodities that are carried in tremendously large quantities, or rich fabrics and other articles that are likely to be very much undercharged and always have been enriching shippers.

Tobacco and cigars, liquors, beer, wines, etc., are a line that can pay a liberal carriage rate and ought to. Fish, potatoes, grain, flour, fruit, etc., should not be very highly rated.

Yours, truly,

A. W. LYMAN.

—

BALTIMORE, MD., *December 10, 1913.*

MY DEAR MR. BRANDEIS:

As counsel for the shippers, it is your promise to ascertain where the enemy is weak and gather up the penetrable places that appear in their armor.

To-day I noticed in one of the yards not so used ordinarily several special "dairy products" cars of the Pennsylvania Railroad, marked "Adams Express Co." I immediately surprised myself by conclusions of this sort: Adams Express Co. is being hard hit by parcel post and its best friend, possibly copartner, is playing into its hands by giving it some of its most profitable business and allowing it to reap the biggest share of proceeds—precicely what is done on the eastern shore of Maryland and Virginia. Butter from Illinois and Wisconsin, worth about $10,000 per carload, probably costs about $100 a car, or 1 per cent of its value.

If the Pennsylvania gets 40 per cent of the $100 and Adams gets 60 per cent, a poor showing can be made, but big profits assured if the Pennsylvania owns control.

A carload of plug tobacco is worth say $10,000; 1 per cent pays its carriage between large cities. This is in line with the other commodities I mentioned recently being underrated, while cheap food supplies are overrated.

Yours, truly,

A. W. LYMAN.

—

BALTIMORE, MD., *November 12, 1913.*

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

Mr. JOHN H. MARBLE, Commissioner: There is evidently no effort being spared to prejudge the case of the railroads, soon to be tried be-

fore your commission, as to the 5 per cent horizontal advance in rates asked for. Is this advance necessary? May I be allowed to urge the views that are certainly held by many that the applicants be first required to show that present rates upon all freight carried are suitably and equitably adjusted?

Do the railroad companies now charge more than a fair compensation on the necessaries of life compared with what they assess the luxuries and less required commodities they carry? Can a carload of tea, coffee, tobacco, cigarettes, beer, liquor, proprietary medicines, Emerson dope ("Bromo Seltzer"), etc., be transported at a lower cost than corn, wheat, coal, oil, flour, eggs, fish, garden truck, meat, etc.

If these and kindred commodities were rated as justice and equity would seem to demand, and charges per 100 pounds or carload rates were on a basis that considered values carried, the collections actually made by the carriers might be far in excess of the seemingly small percentage of increase demanded and big dividends earned. Let the Steel Trust, the packing houses, the coal barons, the Coca Cola men, the brewing interests, tobacco men, the woolen manufacturer, and the cotton planter pay advances. The sugar, etc., and coffee man, wholesale grocers be called upon to pay a higher rate. Let the railroad companies save the $1,000,000 a day now misspent, according to Brandeis. Let them dispose of their unprofitable real estate and cut the corners in other directions than a direct tax on the consumers of the country. Then the people will "come into their own."

Yours, most truly,

A. W. LYMAN.

—

BALTIMORE, MD., *February 20, 1914.*

Mr. LOUIS D. BRANDEIS,
Washington, D. C.

MY DEAR SIR: I am handing you a report of an interview with Mr. Daniel Willard, which, of course, explains itself.

You are showing proof that the carriers by cutting out barnacles and eliminating favoritism many millions can be saved by carriers.

Now let a series of advances in rates be made on meats, oil, coal, steel and iron, clothing, teas and coffees, sugar, tobacco, grain, cotton, canned goods, and other high values (per carload) on lumber; automobiles and all commodities that are now carried for a very low rate commensurate with value; then upon articles of common use that carriers now charge very high rates, from 15 to 50 per cent of value, let these be cut down to a fair and reasonable sum. I will cite, for instance: Fish carried 300 miles at $2.25 a barrel; carriers charge is fully 50 per cent of market price. Potatoes carried same distance, some 4,500,000 barrels, rate 30 cents per barrel, or 15 per cent of selling price. Fertilizer is carried in bags of 200 pounds for $2.50 a ton from Baltimore; compare with potatoes. Rate on fertilizer should be raised; rate on potatoes should be decreased. Investigate conditions on the peninsula of Maryland and there will be found very interesting conditions that will help the Interstate Commerce Commission to form an intelligent, correct opinion as to how the tollers of land and sea are exploited by Pennsylvania Railroad Co. and Adams Express.

Yours, very truly,

A. W. LYMAN.

—

NEW YORK, *February 10, 1914.*

LOUIS D. BRANDEIS,
Washington, D. C.

DEAR SIR: I am safe in saying that one-half of the people in this country derive their maintenance from transportation and its closely allied connections. This fact means that the bulk of the money that is constantly moving all over the United States, shifting here and there, bringing prosperity and work to the people, is transportation money earned in the transportation business and its connections.

Water transportation has been the foremost factor in the upbuilding of our wonderful country. It has furnished every lead that the railroads and corporations have taken up and used and changed these once correct methods into corrupt and crooked methods which they are now using and pursuing, and the severe fact is evident to me that it will take a number of years and a great many laws to separate and terminate these evils.

In fact there is a question in my mind that if the railroads are granted the 5 per cent increase on their transportations and are allowed to retain their water carriers' docks, etc., they will then have such a death grip on all of the transportation in the United States that no law conceived by man to dislodge them would annoy or interfere with them in any way.

(Why is this loss true? Let us see.)

They are at the present time so firmly intrenched, countersunk (the heads of the proposition know this well) into such a great number of the different business propositions of the country, all of them closely allied together (for example, the moneyed man of to-day can name you off-hand every corporation or business in the country, how much money they have, etc.), that corrupt as we believe and know them to be when they have taken the funds (earnings) of their respective railroads, and the corporations have raised the price of the staple, and both have used these funds for other purposes foreign to railroading in the one case and producing more cheaply and better in the other. The railroads ask for a raise in rates from the people—Government—that they have misbehaved before and made suffer, because of their inordinate desire to shut off and remove everybody and everything not directly connected with themselves just now, they ask for this advance right in the teeth of the two facts; first, they have been convicted of wrongdoing; second, every other line of business has a downward tendency and the country is in a bad business condition it is unthinkable that any set of men could be so arrogant, disrespectful, and overbearing. But they know just where and how they stand; they are all powerful and supreme in command (believe me). It is the first time in the history of the United States of America that any one proposition was greater than the Government of the United States, and I firmly believe that if this 5 per cent raise is granted the railroads and corporations (those last that are on the inside) will be greater than the Government of the United States (by stealth of course), but greater just the same. Why, they then will be pardoned, subsidized, handed an enormous sum of money to increase their lawbreaking methods as before. They will purchase steamship companies, build new steamships, buy water fronts and docks, build storehouses for storage, buy coastwise barges and seagoing tugs, inland passenger steamers, every carrier on the Great Lakes that they do not already own, in fact, every boat line that competes with them in anyway, shape, or manner, without there is a definite and radical law forbidding this passed at once.

But return the railroads back to railroading only, return all corporations back to the output of their staple only, steamships back to the steamship business only, allow each company to use their money and brains into their isolated business only, allow all subsidiaries to return to the hands and channels they were filched from, and America will be free again, and not until then.

There can be no large business (independent) started in the Americas to-day and be successful, also endure.

The transportation monopoly would not allow it to endure.

Yours, very truly,

W. E. STREETER.

—

BALTIMORE, MD., *January 10, 1914.*

JAS. W. CARMALT,
Attorney, Office of Jas. S. Harlan, Commissioner.

MY DEAR SIR: I have your favor of the 9th instant, and beg to state that I am not "about to file a complaint" as to any other commodity carried by rail except fish, as no steps have been taken for such action by me on other goods. I wanted to show to Mr. Brandeis as well as the commission that a necessary food supply, such as potatoes and fish, were being carried by the railroad companies at a cost quite disproportionate to their value, taxing these prime articles of food for the poor at from 30 per cent to 50 per cent of their value in market. The latest Government statistics attainable show that the production of approximately 300,000,000 bushels of potatoes in the United States cost nearly 30 per cent of their value to ship, while the cost attending shipping of fish in barrels from the peninsula of Maryland and Virginia is attended with a tax for freight of about 50 per cent of their selling value. I believe that a relatively fair freight tariff upon commodities that were and now are carried for less than 1 per cent and up to, say, 5 per cent of their value, would work out for the railroads a perfectly legitimate and acceptable increase to their treasuries without injury to anyone. That a marked decrease in tariff on such articles as are now overtaxed would stimulate such industries as those referred to and many others. Potato growers come out with very meager profits, as shown on the farm, not in reports. Fishermen of our coast are not allowed by the railroads, express companies, and commission men to make a dollar over and above a meager living and maintaining their very modest and inexpensive plants.

Let fish receive a reduced tariff of 50 per cent and potatoes a reduced rate of 25 per cent, and the one industry will be helped to the extent of $100,000 annually on the peninsula alone, while a rate reduced from 45 cents to 30 cents on potatoes would release $225,000 a year to the one locality referred to and do no harm to carriers.

Yours, most truly,

A. W. LYMAN.

—

BALTIMORE, MD., *January 17, 1914.*

Mr. LOUIS D. BRANDEIS,
Washington, D. C.

MY DEAR SIR: Can not some way be devised to prevent these "cutting up of melons" that dissipate so much of the assets of railroad corporations? The public are not benefited by these distributions of needless accumulations.

Indeed, they are the ones who furnish the funds with which the corporations appear to be so well supplied whenever "extra" dividends are declared. Can you favor me with any information as to the situation that now holds in regard to the 5 per cent advance freight question and the time when the Interstate Commerce Commission will give its decision. I sincerely regret that data concerning fish and potatoes were not requested, as the latter commodity reaches a total of some 300,000,000 bushels, equal to freight charges of $30,000,000 or more, when considered as one of the most exorbitantly rated and inexpensively carried articles.

Yours, very truly,

A. W. LYMAN.

—

BALTIMORE, MD., *January 3, 1913.*

Mr. G. B. MCGINTY,
Secretary Interstate Commerce Commission.

DEAR SIR: Will you kindly pardon me for further putting you to the trouble of questioning the railroad companies' officials upon one very important commodity, i. e., oil and other products put out by Standard Oil Co. and others in similar lines, so as to bring out the salient points that affect materially revenues of our leading railroad companies' rates, rebates covered or exposed, furnishing tank cars and stations along certain lines of railway?

It is an open question among very large users of oil, gasoline, and by-products whether prohibitory low rates are not somehow still enjoyed by that most notorious corporation and its allies throughout the country. You will, I am sure, credit me with a good motive in mentioning this omission that so vitally concerns the consuming population of this country.

There is a fine young gentleman, of high grade, here, long in the service of the Baltimore & Ohio Railroad, who has requested me to mention his name to you, as he is not very well known among leading citizens. He would make a most excellent expert worker along with Mr. Prouty in his arduous labor about to be entered upon—the valuation of railroads; has stood up well in a number of technical examinations, and is admirably fitted for expert work—sober, intelligent, and capable, with the make-up of a capital and trusty official. If you can mention this young man to Mr. Prouty I shall be greatly obliged.

Respectfully,

A. W. LYMAN.

—

BALTIMORE, MD., *January 2, 1913.*

LOUIS D. BRANDEIS, Esq.,
Washington, D. C.

DEAR SIR: I have requested Mr. McGinty to send out to the railroad officials a supplementary sheet inquiring of them as to certain very large shipments of commodities from the Eastern Shore peninsula, such as potatoes, 4,000,000 barrels a season; tomatoes in baskets and crates and canned, up into the millions of cases, omitted from "Group B" questions; fish and oysters, $6,000,000 to $10,000,000 value; freights, 40 per cent. The Pennsylvania Railroad Co. does not relish any probe that exposes to the public their revenue from that section, and at this particular time there is a great need of exposing inadequate facilities, exorbitant tariff rates, and reprehensible methods that seem to be characteristic of that oppressed section of three States, i. e., Delaware, Maryland, and Virginia, and found nowhere else. I am pressing upon the attention of Secretary Houston the locating of a "regional

bank" in the central part of this "garden spot" to break up the chain of the masters of finance, industry, agriculture, and fisheries which are holding that section enslaved.

Yours, truly,

A. W. LYMAN.

Congressman COVINGTON will corroborate.

—

BALTIMORE, MD., *January 1, 1914.*

Mr. G. B. MCGINTY,
Secretary, Washington, D. C.

DEAR SIR: I am indebted to you for the copy of the circular of questions served to the carriers on Saturday, and beg to call your attention to the omission of two very important commodities left out of "Group B, revenues and the conservation thereof."

Potatoes, which form a very large total in New Jersey, Maryland, and Virginia, as well as in Maine. Some 5,000,000 or 6,000,000 barrels worth in market at a rough estimate $10,000,000 to $15,000,000, the usual tariff on which would call for $1,500,000; and oysters, fish, and other sea food, wholly carried in the eastern section of the United States, possibly amounting to as great a value; and fertilizer, calling for the use of some 3,000 freight cars on our Maryland and Virginia peninsula alone.

How could those most important commodities have been left out, while many less used and less needed articles are given space? Can not a special circular letter calling upon the railroad companies for specific answers be issued and mailed at once for the other commodities named, such as corn, oats, wheat, flour, hay, feed, dressed meats, other meats, packing house products, etc.?

Pardon me, my dear sir, if I say that commodities requiring approximately 15,000 freight cars, carrying $15,000,000 to $30,000,000 value annually and largely in one part of the country, ought to be included in "Group B," and subject to the same requirements as to data your commission is seeking from the carriers of the country. Particularly when rates charged by the carriers call for a very much larger per centage of value than most of the articles noted in said group. Discrimination. In the special commodity carrying roads, inclusive of Adams Express, participating with the Pennsylvania Railroad Co. and its subsidiary lines, the percentage on fish, which carriage calls for is 50 per cent. In dressed meats, not over 2½ or 3 per cent; in grain, a very small per cent; in flour about 15 per cent; sugar, about 2½ or 3 per cent; tobacco, less than 1 per cent.

Will you kindly seek information from Mr. Brandeis on these points, as I have furnished him with more articles on which very trifling costs are charged—upon the most profitable commodities—clothing, fabrics, tobacco, shirts, shoes, beer, liquors, dairy products, canned goods, etc.

Very truly, yours,

A. W. LYMAN.

P. S.—Justice to all classes should be meted out, my dear sir, and such interests as I name would not be injured if made to pay double present rates, or 50 per cent more and release the excessive toll charged such commodities as fish, potatoes, etc.

A. W. L.

—

ENORMOUS PROFITS.

Fifty thousand tons of fertilizer (equals 3,000 carloads). Value, $1,750,000. Freight, $125,000. Seven per cent.

SCARCELY PAYS THE GROWER.

Fifty thousand tons of potatoes (equals 3,000 carloads). Value, $1,000,000. Freight, $150,000. Fifteen per cent.

NO PROFIT—BARE LIVING.

Fifty thousand tons of fish (equals 3,000 carloads). Value, $2,250,000. Express freight, $1,125,000. Fifty per cent.

This is worthy serious attention from the commission, surely.

Greater discrepancy in other commodities and larger profits in some.

—

BALTIMORE, MD., *October 1, 1913.*

Hon. JNO. H. MARBLE,
Washington, D. C.

DEAR SIR: It is stated in the papers that President Willard will ask for the good offices of the Interstate Commerce Commission in his attempt to secure a general advance on freight rates not proven a necessity. Some time since a thoroughly competent man, Louis D. Brandeis, made the statement that the railroads of the United States were wasting a million of dollars daily in loose or inefficient management. It is known to many that excessive rates are levied upon commodities that enter into daily use by the people. It is known that excessively low rates apply to the manufactured goods that sell for a large profit in open market. It is known that the railroad company of which Mr. Willard is president owns very large amounts of nonproductive real estate which, if sold and turned into cash, would enable the company to bring up the earning capacity of the road to a much better figure and increase value of stock. If lumber is shipped at a rate that is away below its real value; if coal, iron, steel, oil, fertilizer, and other commodities are shipped at rates which form a much lower ratio of transportation expense than other things, let a change be made that shall assess a more just and equitable charge on such goods and other articles or classes of merchandise, and readjust prices on fish, for instance, that to your own positive knowledge is assessed at more than double a fair rate. Suppose, my dear sir, before listening to the pleadings of great railroad officials you request from them a list of commodities that pay 50 to 75 per cent of their market value for transportation and those that do not pay over 1, 2, or 3 per cent of their value.

A carload of cotton, for instance, may bring $3,000 in New York. A carload of fish $450 to $700. Thirty-three and one-third per cent of the value of the latter is charged from near-by States to New York. If a similar sum were exacted for cotton requiring equal space, care, and service, cotton would pay $1,000 per carload. Does it pay that much? If coal is charged $100 per carload to New England points, this rate is about 30 per cent of its value.

If steel billets or wire is carried the same distance for about one-third the cost of coal, the percentage of cost will be found not to exceed 3 per cent or 5 per cent of value. Coal is essential to the average family. Steel billets, wire, and other classes of products, upon which millionaires are reaping untold profits, should pay very much greater rates; or, in other words, the inudstries allied to these manufactures can afford to pay much more. Then we could see the rank and file of the people getting a more just and proper return for their labor, never excessive, and often falling short of a living wage. Government's first duty is to those who are helpless and unable to contend for their God-given rights.

Corporations, long having enjoyed the favor and protection of Government, are abundantly able to protect and care for their owners.

Force the railroads to take stringent measures for their salvation, but don't make presents to them from the people.

A. W. LYMAN.

—

NEW YORK, *February 27, 1914.*

LOUIS D. BRANDEIS,
Washington, D. C.

DEAR SIR: Attached please find a clipping from to-day's New York World. I have reasons to believe the New York Central Railroad have no property in the State of New Jersey.

This being the case, it does not look just right in its entirety. If it is incorrect the ones most concerned should know and be protected.

Yours, very truly,

W. E. STREETER.

AUTHORIZES NEW YORK CENTRAL ISSUE—COMMISSION IN NEW JERSEY ALLOWS ROAD $70,000,000 BONDS.

TRENTON, N. J., *February 26.*

The New York Central & Hudson River Railroad Co. was authorized to-day by the public utilities commission of this State to issue $70,000,000 of refunding and improvement mortgage bonds at 4½ per cent, the issue to be for the purpose of refunding outstanding notes which mature during 1914, one of the issues being for $70,000,000 and the notes maturing March 1.

The total amount of outstanding notes to be refunded by this bond issue is $69,662,000.

The New York Central owns much property in New Jersey, hence the necessity for the commission's order.

—

BALTIMORE, MD., *December 27, 1913.*

Mr. LOUIS D. BRANDEIS,
Washington, D. C.

DEAR SIR: I hand you a rather "breezy" comment on the situation in which the railroad companies find themselves, owing to their own misdoings in the past.

There may be a point in this rather sharp (?) criticism of "our friend the enemy." One point should be thoroughly investigated. It is no doubt true that the daily receipts of all railroads go into favored banks, trust companies, and other channels without interest. Let the funds be distributed in more banks and trust companies and not in those only in which officials are concerned.

Yours, very truly,

A. W. LYMAN.

THE ANTIRAILROAD SIDE PRESENTED IN A BREEZY MANNER BY A FARMER, WHO WOULD VISIT THE SINS OF FORMER WRONGDOERS UPON THE PRESENT MANAGEMENT AND UPON THE COUNTRY.

To the EDITOR OF THE SUN.

SIR: Your "leader" in to-day's issue suggests the following: The really big issue between the people and the railroads over the demanded increase in rates now under advisement with the Interstate Commerce Commission reaches deeply into questions vitally important in the economic and industrial future of the Republic. The plea for haste, "promptness," immediate decision in favor of the petitioners, with subsequent reductions if conditions justify, on the ground that the petitioners should not be placed in an impossible position pending delay, is like hanging the accused before trial and, if it be found that a mistake was made, making it up with his family afterwards.

Is it not open to surmise that the "position," possible or "impossible," in which the railroads find themselves is of their own making? Is it not open to presumption that in the widest view they are in precisely the same position as other enterprises, aside from incidents in their history due to their own conduct?

Further, is it not due to them that the general conditions of the business community are as they are more largely than to any other specific influence?

They even more than the gigantic trusts have used and absorbed the fluid, wealth, credits of the people. Their original investments are a far lower percentage of ostensible present values than any other business ventures of the country.

It was Carnegie who said, years ago, before the last spasm of inflation took place, even before the manufacturing of railroad securities became a recognized industry, that the railroads of the country were capitalized at more than twice their actual value. He said it at a time when the tariff and transportation interests were at loggerheads and threatening to give honest men their dues as a result, and just before Morgan harmonized and unified these hostile elements by the interlocking director.

Wall Street is already drooling at the mouth over the rich slices in prospect with permission given to increase rates; has already capitalized the "5 per cent" to recover at one stroke the shrinkage of many months—the fiat of government to transfer 5 per cent out of one man's pocket into another man's purse. The buying power of the people, which is the basis of all business, must await the sequence of events in their natural order.

Hard times? Yes; for gamblers, for makers of paper wealth based on a power to exploit—for dealers in wind—for all who are trying to do big business on other people's property, and for all who depend on such for employment and wages.

Save the railroads! Sure; just as they "saved" the "street" over Tennessee Coal & Iron. There are railroads that certainly "need" something, say the Frisco, New Haven, Rock Island, Alton, Wabash, even the Pacifics—Northern, Central, Union, and Southern. If so, let them go to the organized gangs that have plundered them, their stockholders, patrons, and the General Government for a long generation. Names are unnecessary. The general public is fairly well acquainted with the epoch-making knaveries in the history of these chevaliers d'industrie.

One suggestion should be considered in any finding to be made on the rate question. Where a railroad is capitalized at $80,000 per mile and is assessed in the States through which it runs at $20,000, which should be taken as the basis of rates? Should a railroad be allowed to capitalize its franchise value, given to it by the public, and then turn around and say to the public, "Having made us vastly rich you must now support us in a state befitting our grandeur"?

Fifty years ago the landowner of the South controlled public policy in its every expression. Now the landowner and all below him in the industrial scale are the silent and dependent helots of a railroad satrapy.

"Promptness," of course; end the uncertainty, sure; tell them to quit blubbering and go to work just as all the rest of us have to do and quit whining to the people they have been preposterously abused for permission to put a new cracker on their lash.

WESTERN STARR.

WESTOVER, MD., *December 24.*

NEW YORK, *February 28, 1914.*

LOUIS D. BRANDEIS,
Washington, D. C.

DEAR SIR: The Pennsylvania Railroad owns or controls an immense coal terminal and docks at South Amboy, N. J., the Lehigh Valley has the same at Perth Amboy, N. J., the Philadelphia & Reading at Port Reading, N. J., and the Baltimore & Ohio at St. George, Staten Island.

Each railroad has a fleet of towing machines engaged in towing the coal-laden barges to New York Harbor. The railroads have a well-devised scheme (a trust detail) that an individual-owned barge can not be towed to these terminals by any but a railroad-owned tug. If an individual-owned tug and barge owner tows his own barge to these terminals the respective railroad deducts from the freight money of the barge, the exact amount of money the railroad tug would receive if the railroad tug towed the barge. The same scheme applies to the towing of the cargo in the barge. The railroad collects this money without rendering a service, and if the independent owner insists, he can not get any more coal at that terminal, which forces him out of the business.

Why should a corporation be allowed to operate in a manner to shut out competition in a free country? This monopoly has driven the independent towing and barge capital out of the business by making rules and employing methods that the United States Government and States ignore and are ignorant of also. The railroads and corporations act exact, rule, and perform to the end that they run no risk to lose money in any business they undertake and operate. All of said items are illegal, and will endure after the big questions are disposed of if not taken care of at the present time.

All of the above items are practiced while the independent is combating his equal competitor in the regular way. Along comes this favored and lawbreaking monopoly, with its insidious methods and lawbreaking and ruins both of the independents like a thief under a cloak of respectability and great names (so-called), and sad as it may seem, if the independent was put on his oath he could not tell what ruined him.

The railroads have all this transportation and the cost of the coal figured down to a fraction. There is not an iota of a chance for any new business men or methods or new brains in this line of business. New capital and men are blocked at every point. Anyone that contends with the railroad or corporation is ruined and thrown out indiscriminately, and the corporation judges do the rest on the telephone or at the summer resorts, and the poor get poorer and the rich richer.

All this has a deadening effect on business and the masses, takes that wonderful energy from our people that has made America so marvelous in the past, takes away and breaks that spirit of independence that was so very great in our forefathers; in short, it is suppressing the intelligence and acumen and go-aheadness of the rising American and those that declare to be good Americans. There can be only one result—socialism—which can become rampant in one night, and no one that understands existing conditions would be surprised. Every line of business in the United States must be opened, and opened wide, for any and all who desire to embark in it; opened wide for newcomers and new capital, new life and new blood. The more radical the methods employed to accomplish this end the greater the prosperity of the country will be from the restored confidence.

It is useless to look for relief to the classes that are promoting the railroads and corporations. Their egoism is closed on both ends and in the middle, and forever sealed with ignorance and environment. The man or men that rescue the Americans from this now existing condition will rank with the greatest men the country has produced.

Yours, very truly,

W. E. STREETER.

BALTIMORE, MD.

JUSTICE AND EQUITY

In railroad rates would seem to require a closer study and a far greater degree of discrimination than has been given to the subject. Favor has been shown in many ways to great interests that have not needed low tariff to enable them to maintain a high earning power.

A drain upon the resources of all trunk lines has been made in providing equipment and maintaining trackage in a large degree for the benefit of interests that dominate and furnish by far the largest volume of business to the carriers. The portion of expense and the cost of maintenance of a railroad and the interest charges for funds used to a great extent in meeting demands unceasing and urgent for rolling stock, repairs, and constant renewals should be largely charged to that class of commodity which is and always will be the largest tonnage factor. In the case of meat, suppose 100 cars in use daily carrying this necessary food to the larger cities of the country—a very low estimate; another hundred cars carrying beer, liquors, tobacco, cigars, etc. (very many more cars are used), while not over one-tenth are carrying potatoes and fish. Does not one's reason and judgment teach him that 80 per cent larger cost in operation is chargeable to the class of commodity using the most rolling stock and representing the largest value in the markets?

Demand that those commodities which consume by far the largest portion of motive power, clerical and executive force, depreciation cost, etc., should bear the larger percentage of carriage cost, and such commodities as use comparatively few of the cars that form the total number in use be charged accordingly. This is readjustment. If a car carrying 20 tons of butter from central Illinois to New York contains $15,000 worth, and the railroad company having charge of same receives about one-half of 1 per cent for its service and all wear and tear, renewal charges, etc., while the carrying of a carload of potatoes about one-third the distance, such cargo having a value of not more than one-thirtieth of the carload of butter carried, yet costing 40 per cent of the market value of the cargo. Can we not see the inequality and glaringly discriminatory rate which is laid upon a cheap and quite unprofitable commodity carried one-third the distance yet charged a tariff rate enormously inequitable to shippers. Let such a situation be reversed, in a measure, and butter charged at least as much again, or more, relieving the potato producer of about one-half the present rate charged him. Take fish from the points of shipment to New York, a distance of less than 300 miles. A charge of $2.25 per barrel, even in carload lots, produces for the carriers $400. The value of the cargo not exceeding $750, the percentage to value reaches about 55 per cent (200 barrels carry 40,000 pounds of fish). Distance carried not over one-third of the butter and requiring not over one-fourth the time in transit and much less operating cost. Yet fish is charged more than the value at point of shipment. Why? President Rea, answer. Again relieve this very cheap article of food from the enormously excessive rate charged and save this business from depression and loss, putting the additional sum on the butter, etc., to make good and adding 5 per cent to that received, 40,000 pounds of butter, at 37½ cents, or $15,000 value would be assessed approximately fairly the rebate on the fish, say $200 ($1 per barrel), and added to the one-half of 1 per cent charged as stated. This would compel the carload of butter to be charged $275 for carriage of 1,000 miles; 5 per cent added—$13.75—would call for $288.50 as the tariff on 40,000 pounds, a trifle over seven-tenths of 1 cent per pound—a trifle for the dairy interests.

For four or five days use of car; for refrigerating service and operating; for wear and tear of rolling stock; for maintenance of track, repairs, etc.; for clerical and executive cost; depreciation; interest on investment—all only $721 a day.

Is my position tenable, or can the railroad people deny its fairness?

A. W. LYMAN,
A novice in railroad figures.

BALTIMORE, MD., *March 8, 1914.*

LOUIS D. BRANDEIS, Esq.,
Washington, D. C.

DEAR SIR: It has occurred to me that a certain phase of railroad charges (failure to charge, it really means) has not been touched on.

The cost of maintenance of special cars for fast freight, long distance traffic, and the (probably) low rate charged the shippers of commodities that are of high cost, perishable, and otherwise.

If the favored shippers were grouped into classes, or a class, it would be of interest to compare the rates charged. Small shippers (less than carload), and the well-known shippers (by carload). Would not the fact be brought out that the less able pay a larger portion of the able shippers?

Dividends, largely augumented by high rates to the large majority of shippers, compared with no profits on large interests.

Much greater costs of maintenance, wear and tear, repairs, etc., apply to the large number of special (costly) cars by the use of which shippers are favored, than to the regular old-time and much-battered cars relegated to the "less than carload" clientele. If a decided increase be allowed to the railroad people on high-cost commodities, and in cases where notably high tariff is laid on low-cost commodities, the railroad and express companies can more than recoup themselves.

Let the Standard Oil, Steel, and other notoriously undercharged interests be raised to a proper level and fish, truck, etc., be lowered.

Yours, truly,

A. W. LYMAN.

Mr. LOUIS D. BRANDEIS,
Washington, D. C.

MY DEAR SIR: I am handing you a few suggestions to show the great possibilities that lie in the putting forward of an argument for basing rates of carriers, more upon value of commodities carried.

Taking off from charges for fish (an outrageous tariff) and adding to coal and potatoes would leave one class of our producers better off. Another class so slightly affected as to not reduce income .08 cents a barrel. The "coal barons" are well able to stand a 33⅓ per cent increase (the anthracite people).

Briefly stated—

Fifty-ton cars coal would be $33.33⅓ higher or 66⅔ cents a ton.

Seventeen-ton car of potatoes would call for $13.20 a car, or 8 cents a bushel increase only.

Seventeen-ton car of fish would call for $110 less, a perfectly reasonable sum.

The potatoes would yield railroad $160,000 on total shipments of 2,000,000 barrels. The fish amount would get $110,000 more, leaving railroad $50,000 annually. So the farmers of this section would be able to transfer to the fisherman the loss heretofore borne by the latter and the railroad be not a loser.

I inclose a letter to the Secretary of the Interstate Commerce Commission, which, had he lived, Mr. John H. Marble would have received.

May I ask that you see that he receives this letter, after you have perused it.

Very truly, yours,

A. W. LYMAN,
Baltimore office, 5¼ North Calvert Street.

I am quite sure, for instance, that net income from freight receipts on the Maryland & Virginia Peninsula would show a tremendous advance over the same service in New England and the Middle West, upon similar classes, or, I may say, upon kinds of freight covered by the term "food supplies."

New England shippers of fish pay for delivery in New York City approximately 75 cents a barrel, Peninsula shippers, $2.25 a barrel, consequently the Maryland and Virginia fishing industry must stand $1.50 a barrel loss, as compared with New England, a sum much larger than is now received by the former, after expenses are deducted.

This is a fair plea.

A. W. LYMAN.

BALTIMORE, MD., *March 8, 1914.*

LOUIS D. BRANDEIS:

I am just informed by the head of a fishing company at Wachapreague, Va. (shipping point Keller, Va.), that an advance in rates from there to New York has been made, as of February 26, 1914, of 40 cents a barrel as compared with 1913, and 65 cents a barrel as compared with 1912; that these arbitrary advances are made from no apparent cause other than a desire to punish the shippers for an effort to secure a rebate from an already very excessive rate and discredit me. I have no knowledge that these rates have been applied to Norfolk shippers, who have enjoyed a 40 cents per 100-pound rate for the past year or more, a distinct and most unjust discrimination.

This outrageous act should have weight with the commission in the consideration of the 5 per cent advance. This advance means the payment of 60 per cent of the average market value to carriers.

Keller, Va., to New York, $1.18 per 100, gross weight, $2.70 a barrel, average value $4.50; Philadelphia, 90 cents per 100, gross weight, $2.05 a barrel, average value, $4.50; Baltimore, 90 cents per 100, gross weight, $2.05 a barrel, average weight, $4.50.

A. W. LYMAN.

NEW YORK, *March 31, 1914.*

LOUIS D. BRANDEIS,
Washington, D. C.

DEAR SIR: Every item of corruption, large and small, that has been practiced by the railroads and corporations of the United States had its birth and inception within the waterways of the United States and the oceans connecting the countries, and the ships, tugs, barges, and schooners that ply on same.

The railroads and corporations of the United States have illegally taken these waterways and carriers and placed them as a weight on the one side of the scales that balances the well-being of the people of the United States, their living, and pursuit of happiness. They have monopolized the right of people to get enough to eat and wear and a place to live, through the one element that controls the current money of the people, which is transportation.

Transportation is the power that moves the country, and it is centered entirely within the railroads and overpowered by the railroads of the country.

They have done and caused to be done everything that was necessary to give them absolute domination over the inland waters of the country; every ship, every boat, and canal boat is on the one side of the scale, and balances and brings even every rate the railroads issue, which the shipper must pay or retire from business forthwith. Every morsel of food that moves in the United States is rated three times higher than it should be rightfully, and this overcharge is shunted to a favored corporation in the free service they enjoy.

Therein lies the secret of the high cost of living (positively).

Your commission has one cure for this terrible state of affairs; any other procedure would be of no avail, for there are ways to offset and defeat every safeguard you might devise, except the absolute divorcing of the railroads and corporations from these water carriers, docks, bulkheads, storage warehouses, and piers.

Do this and the railroads will carry passengers and serve them correctly; they will cease to corrupt the lawmakers and cease to be the Government of the United States covertly.

Yours, very truly,

W. E. STREETER.

—

BALTIMORE, MD., *March 24, 1914.*

Mr. LOUIS D. BRANDEIS,
Washington, D. C.

DEAR SIR: Very great stress is laid upon the wrong (?) inflicted upon carriers by continued delay in granting their demands for the increased rates—5 per cent. May I suggest that you try one experiment direct and ascertain how true it is that they are barred out in efforts to obtain funds from those who have money to loan?

I have before me a statement of the New York Life Insurance Co., showing on December 31 railroad bonds earning 4.27 per cent interest, amounting to $311,947,214.47 out of a total of $76,850,703.40 assets.

The Mutual Life carries, supposedly, a larger amount in similar securities—$346,675,670.59 out of a total of $607,057,044.50. A total of approximately $1,370,000,000 assets, of which railroad securities form $658,625,000, or 50 per cent.

I would suggest that a formal letter addressed to the respective presidents of these companies, also to W. A. Day, of the Equitable Life, requesting their position on this subject be written: Will the refusal of the Government to grant the 5 per cent increase cause these great financial institutions to refuse further reasonable demands upon them for loans or require a higher average rate of interest?

A powerful factor in moving these great receivers of money—some $300,000,000 annually from all sources—will be the fact that their tremendous holdings will be imperiled or made less valuable if they should all assume an attitude of disaccommodation, simply because of a position on the part of the Interstate Commerce Commission to decline the advance. One more thing, sir, and I am through: Would not the voluntary action of carriers in carrying out recommendations of the Interstate Commerce Commission as to cutting out favorites among shippers—$33,000,000 savings—eliminating private-car perquisities and the institution of other economies, favorably act upon all railroad bonds, stocks, etc., so as to enable loans to be more readily secured and at lower rates?

Finally a voluntary reduction of the more lavishly distributed salaries now and always paid, something after the order of one of our Baltimore financiers recently—Mr. John T. Stone, of the Maryland Casualty Co., who compelled the directors to reduce his $36,000 to $30,000 for 1914.

Action like unto this would certainly show to a skeptical business world that these worthy gentlemen of the railroad circle really want economy.

Yours, A. W. LYMAN.

Suppose the United States Government were to offer a loan or loans to the carriers at 3 per cent that would cover all real needs for the next 5 or 10 years, stipulating only that the class of expenditure be approved by the Interstate Commerce Commission. This would save 1¼ per cent annually and keep down rates that otherwise would or could be raised to 6 or 7 per cent.

I would certainly feel that almost anything would be preferable to granting this 5 per cent or any increase.

A. W. L.

—

KEYSTONE EMERY MILLS,
Frankford, Philadelphia, Pa., April 6, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: Before putting into effect the advance in class and commodity freight rates, effective April 15 and May 1, applying in the official classification territory, covering all points east of the Indiana-Illinois State line, north of the Ohio and Potomac Rivers, and also the proposed advance in rates to Quincy, Ill., on the same basis as the upper Mississippi River crossing rates instead of the St. Louis, Mo., basis, we trust you will give the shippers a full and ample opportunity to be heard.

Surely this is a common right of any shipper and one which should not be denied any, and in justice to all concerned we are confident that you will grant a hearing to whatever shippers wish to be heard on the subject.

Yours, very truly,

KEYSTONE EMERY MILLS,
By A. E. CLIFF, *Secretary.*

THE C. H. LOVEJOY CHAPLET CO.,
Cambridge, N. Y., April 6, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: We protest, on the ground against further proposed advances becoming effective, until such time as shippers have been heard.

Yours, very truly,

THE C. H. LOVEJOY CHAPLET CO.
C. H. LOVEJOY.

—

WOODBINE, KANS., *April 7, 1914.*

Hon. G. B. MCGINTY.

DEAR SIR: In regard to the advancement of freight rates, if the Interstate Commerce Commission are of the belief that the carriers should be granted an advance in rates after hearing all of the testimony offered on the part of the receivers and shippers of freight throughout the country, then the only fair thing to do is to grant the advance on all classes and commodities instead of adding a charge of $2 a car for setting them, for if this becomes effective it means a practical slap at economy.

Yours, truly,

WESTRUP & KOHLER LUMBER CO.

—

BALTIMORE, MD., *April 8, 1914.*

Mr. LOUIS D. BRANDEIS,
Washington, D. C.

MY DEAR SIR: If you feel disposed at any time to censure me for my expression of opinion as regards the railroad claim for increased rates why I shall not take it amiss should you say so. It has occurred to me that there are larger drains upon railroads from those interests which own their own cars—the coal and coke companies, the special lines, the drawing room and parlor coach companies, the refrigerator car companies, fruit companies, etc. If all these lines that get rich off the railroads were to be bought in by the various companies which operate them at a loss the income resulting from them would run up into the millions.

The terminal station built upon railroad property seem to be wholly without risk of loss, and largely operated for gain to individuals.

I am certain that such sources of profit might well be classed as among special privileges.

The Baltimore & Ohio Railroad Co. daily run long trains of steel cars loaded with anthracite coal past a tract of land near this city. Each car marked 100,000 pounds and marked New England Coal & Coke Co. They are dumped into vessels at the trestles, which cost the railroad company nearly a million dollars, into which structures not 1 penny of the coal and coke company has been put.

The Consolidation Coal Co. also possesses similar privileges, and it must be a source of loss to the railroad company and decided gain to the private corporations that have their exclusive use for the cheap handling of coal.

I believe the great ore docks on the Lakes and all those conveniences built for the powerful corporations benefiting by them ought to pay largely increased rates.

Yours, truly, A. W. LYMAN.

—

BALTIMORE, MD., *April 9, 1914.*

Mr. GEORGE B. MCGINTY,
Washington, D. C.

DEAR SIR: May I request from you a copy of the testimony given by truck growers on March 4 last in the 5 per cent advance hearing? I noted Mr. Bond requested that some copies be reserved for his use, so presume you can furnish me the same.

I learn from my Wachapreague, Va., clients that Adams & Co. made a most unwarranted advance in rates on fish shortly before the season opened up. No 5 per cent, but 25 to 33⅓ per cent without any ceremony whatever. Is this legal on the part of any carrier?

Yours, very truly,

A. W. LYMAN.

—

NEW YORK, *April 10, 1914.*

LOUIS D. BRANDEIS,
Washington, D. C.

DEAR SIR: The status of the group of eastern railroads that ask for higher rates is to-day as follows: The railroad proper is losing money. Their subsidiaries always have lost money and have been carried by the railroad. The position to-day is the subsidiaries are eating up the railroads very fast.

Instead of laying off the men employed on the railroad they should have laid off their boats that are lying idle and the men that do the clerical work for these boats that are idle but under pay; also the men that man these boats that are idle; also their boats that are working and these men that man and work with the boats that are working get no pay from the particular freight they carry, because the railroads do this lighterage free of cost to the shipper.

The railroads are spending now hundreds of thousands of dollars on new boats, which is an absolute loss to the stockholders.

The railroads do not and can not systematize the railroads with the boats.

This is the whole and sole cause of their poverty.

Yours, very truly.

W. E. STREETER.

—

JUNE 27, 1913.

Mr. JOHN H. MARBLE,
Washington, D. C.

DEAR SIR: It seems an opportune time for the Interstate Commerce Commission to deal with the railroad companies upon a give-and-take basis. Let the corporations have their desired 5 per cent advance on such general lines of commodities as are really being carried at a lower rate than is reasonable, and in some cases where an unreasonbly low rate is received even a higher percentage, if laid upon goods classed as luxuries and upon which very large profits are enjoyed by manufacturers of same, such as iron and steel products, with oil, agricultural machinery, fertilizer, etc.; provided reductions will be assented to on food supplies raised on the farm, fish taken from the ocean, oysters,

and other sea food now excessively charged for and on which an advance of 5 per cent would mean to the producers a large portion of the meager sum left them after railroads and express charges are taken out and losses borne. It is my belief that this entire question has been raised by the railroad people to meet the proposed income tax, and that there will be an eagerness on the part of the corporations to allow concessions long asked for all over the United States and systematically refused if the commission will permit the requested advance.

But on no account a horizontal per cent, but a carefully planned and impartial schedule.

I would go so far as to suggest that the matter of official salaries be inquired into and perquisites of the ruling men. That the broad statement of Louis D. Brandeis that "a million a day" is wasted by extravagant administration, which if saved, or partly saved, would give the corporations seeking the 5 per cent raise—to come from the consumers of the United States—all they need to counteract wage advances, etc., etc. A sale of the unused real estate of the Baltimore & Ohio Railroad alone would turn into their treasury several millions.

Yours, most truly,

A. W. LYMAN.

—

JULY 9, 1913.

Hon. LOUIS D. BRANDEIS,
Washington, D. C.

DEAR SIR: I inclose you herewith my experience of about 25 years in the marine business in New York State and City, hoping it may help you to do good and clear the business atmosphere of our country.

I believe that every corporation that took its charter to operate a business, and every railroad that took its charter to operate a railroad, that now own docks for the use of their own craft, that was not a steamship company at its inception, is operating illegally, and that all such railroads and corporations should be forced to sell forthwith and absolutely all boats and docks and bulkheads of every nature pertaining to marine transportation. This because there is not one interstate marine railroad proposition that supports itself by one-half; nor is there one corporation marine proposition that supports itself by one-half. Therefore an enormous amount of money must be added to the rail rates in the railroad case, and an enormous amount of money added to the staple of the corporation to support the marine end of their business. There would be lifted from the two propositions a gigantic drain that would benefit the people of the country.

Yours, very truly,

W. E. STREETER.

—

NEW YORK, *July 9, 1913.*

Hon. LOUIS D. BRANDEIS,
Washington, D. C.

DEAR SIR: I herein claim that the railroads of this country are breaking its laws every day, hour, and minute that they operate or cause to be operated anything marine, such as docks, bulkheads, water fronts, ferry slips, etc., that they use to load any freight of any nature on marine craft of any kind owned by them, including passengers.

1. The prestige gained by the railroads from the individual or corporate shipper by their particular railroad railing their commodity forms an invisible and sure insertion into that particular shipper's inner business secrets that no outsider should know and which is sure death to competition. Information obtained through the railroads and exchanged to favored interests is the medium of the terribly close business lines now drawn and called trusts. The small business man can not obtain this current information.

2. Wherever the funds are taken from for the purchase of water fronts and docks they are a needless and useless expense to the railroad proper. The sum paid for the land under and above water and the actual building of the docks and the upkeep is enormous, with no income whatever in two-thirds of the instances, so this must also be carried by the rail rates.

3. Each railroad terminating in New York Harbor has floating equipment that cost from $1,000,000 to $5,000,000, of which the operation, depreciation, and upkeep run into gigantic figures each year, and it is a losing proposition standing alone by itself. Owing to the weird manipulation required to systematize the railroad transportation with the marine transportation, which is impossible, as the railroads are compelled to do an enormous amount of this for no pay whatever, owing to the competition offered by the legitimate transportation companies with low-costing plants and the experience to operate same. All this money is added to and filched from the rail rates.

4. In the 30 years just past the railroads have started from nothing in the transportation line to doing now three-quarters of all the transportation business in New York Harbor solely through the prestige of carrying this material on their rails, together with threats and intimidation, the holding back of shipments, and combining with every current element on hand or in sight to stifle the legitimate common carrier engaged in the transportation business. The marine end of the railroad could not exist at all if it were not for the rail end of the business. This in itself is illegal, for the reason of the great number of cases where the shipper is not charged for the water transportation (the favored ones), while those that are marked for retirement are charged heavily and retarded and held up. (Fair dealing is a joke.) In a great many cases the consignee has owned his own barges to transport his own shipments; the railroad would do this work for no charge until he was compelled to dispose of his barges to suit the railroad.

5. Every canal in the United States not owned by the State is owned by a railroad. In the first instance, the railroad contracts all the freight passing through that State, and if there are individual boat owners on that canal, recontract it to them at a much less rate than they receive for its transportation, or they carry this freight themselves, whichever best serves them, so they can stop the canal or let it run, as best serves their purpose. In the second instance they charge a toll sufficient to make the water transportation higher than the rail rates, thereby insuring to themselves a monopoly of the business, so they can divert it at will, so killing any city or harbor they choose when they choose, and building up any city or harbor they choose when they choose.

6. The railroads have combined on oceans, sounds, rivers, etc., to control every pound of freight East, West, North, and South, and have built expensive tugboats and barges that never pay for themselves, to enable them to control all freight of every nature from every port, large and small, in the United States for the express purpose of exterminating all and every other common carrier, and a general shipper pays for all this on his rail rates.

W. E. STREETER,
10 South Street, New York City.

SOUTHERN HARDWOOD TRAFFIC BUREAU,
Memphis, Tenn., October 31, 1913.

Mr. GEO. B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: For your information I am inclosing herewith copy of resolutions adopted by this association.

Respectfully, yours,

J. H. TOWNSHEND,
Secretary and Manager.

RESOLUTIONS PRESENTED BY SPECIAL COMMITTEE OF THE SOUTHERN HARDWOOD TRAFFIC BUREAU.

Whereas the railroads operating north of the Ohio River have filed with the Interstate Commerce Commission tariff naming 5 per cent increase on practically all freight rates, and such increase portends similar advances throughout the United States, based on the assumption that it is imperative that additional revenue be raised to meet their increased operating expenses and cost of labor, it seems proper for the Southern Hardwood Traffic Bureau, the largest lumber traffic organization in the United States, whose members handle in the aggregate over 80,000 cars of hardwood products annually, to express collectively its views on the subject, which is vitally connected with the success and prosperity of the lumber industry. It is a well-known fact that railroad rates of this country have not been constructed, as a rule, upon any scientific basis; traffic officials who have established these rates have generally done so without any special inquiry as to the total amount of revenue which ought to be produced, or as to the part of that burden which a particular commodity should bear, or discriminations between different localities, and we maintain that the rates charged on lumber are now higher and out of proportion with rates assessed on certain other commodities. Recognizing this fact, especially as regards rates on lumber and forest products, we maintain that existing inequalities should be eliminated through readjustment of freight rates on a scientific basis, making each class of freight and each commodity stand its proper proportionate rate, based on distance transported and the conditions governing the transportation. We also recognize the broad principle that carriers are entitled to a reasonable return on their investment above cost of operation and maintenance, and we believe that the necessity for readjustment in rates should not be permitted to prevent the carriers from increasing their revenues through change in present rates, provided there is an actual necessity for such increase: Therefore be it

Resolved, That the Southern Hardwood Traffic Bureau's attitude toward the 5 per cent horizontal increase in freight rates, as proposed, is not in opposition nor approval, but one of open-mindedness; that the question whether or not the carriers need the $42,000,000 of additional revenue, which they claim will be produced by this advance, more than the general public needs it, is, of course, a question which can only be determined by a scientific inquiry, such as we feel confident the Interstate Commerce Commission will make, and that we are willing to adopt its decision in the matter and to furnish to that important body such information as we can which will enable them to arrive at a just decision; be it further

Resolved, That we reserve the right to make protest against any inequalities in freight rates which now exist or which may arise affecting out interests; and be it further

Resolved, That a copy of these resolutions be sent to the secretary of the Interstate Commerce Commission for their information.

—

THE COMMERCIAL CLUB OF DULUTH,
Duluth, November 3, 1913.

Hon. E. E. CLARK,
Chairman Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: Herewith please find copy of resolution unanimously adopted at a meeting of this organization.

Very truly, yours,

H. V. EVA, *Secretary.*

—

Whereas the railroads operating in official classification territory are publishing and filing with the Interstate Commerce Commission tariffs carrying a general advance in all rates for the transportation of freight in said territory; and

Whereas the commission will proceed to a general inquiry into the reasonableness of such advances; and

Whereas owing to the fact that the rail and lake rates have been advanced three times since 1900 in an amount equal to approximately 11 per cent, resulting in many cases in a considerable loss of traffic to the rail and lake routes, due to the narrow spread between all-rail and lake rates; and

Whereas such advances were the result of the ownership and control of the package freight lines on the Great Lakes by parallel and competing railroads, and born of the desire of such railroads to divert traffic from the lakes to the all-rail routes at higher rates; and

Whereas the interests of the lake lines would seem to be best served by a reduction in the rail and lake rates, thus increasing the spread under all-rail rates, with a resultant increase in the traffic of the lake lines and the preservation to the public of the benefits of the cheap water transportation on the Great Lakes; and

Whereas there is no fixed relation between the all-rail and lake rates which should make it necessary to advance the latter, except such as has been prescribed and fixed by the railroad owners of the boat lines, with whom they are supposed to compete; and

Whereas the reasons advanced by the railroads in justification of the advance in all-rail rates do not apply to the rail and lake rates: Therefore be it

Resolved, By the Public Affairs Committee of the Commercial Club of Duluth, that it approves the plan of having the matter submitted to the Interstate Commerce Commission, that it may determine upon a showing of the facts whether or not such advances in all-rail rates are reasonable and warranted by actual conditions; be it further

Resolved, That a copy of these resolutions be forwarded to the Interstate Commerce Commission.

—

GREENWOOD, IND., *April 3, 1914.*

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: In connection with the arguments now being made before your honorable body by various railroads in behalf of an in-

crease in freight rates on the part of the railroads, as one of the many large packers of food products, which I sell and distribute in all parts of this country months in advance of the actual time of shipment, I desire to enter a protest against any advance in freight rates covering our products taking effect prior to the latter part of this present year or the 1st day of January, 1915, for the reason that should these rates be advanced before that time it would mean a tremendous loss to the manufacturers and distributors of food products throughout this entire country.

In most instances the manufacturer makes his selling price to the jobber or distributor based on the article in question delivered to destination or to the headquarters of the distributor. These prices have been based for this year on the present freight rates, and if this increase be applicable to food products shipped during this summer and fall, when the new pack is ready to be distributed, it is unfair to us, as our arrangements were all based on the present rates even as far back as last August, when we began to sell goods for delivery this July and August and of this present season's packing.

This loss would mean far more to the individual manufacturer, who is already suffering from keen competition and a reduced margin of profit, than it would to the railroad companies, who (if they followed out the suggestions as given in the reply of your honorable counsel a few days ago) by cutting down the favors of free warehouse storage, free labor in loading and unloading cars, and various other items of expense which the railroads have been supplying free of charge to favored shippers to secure business, as per the statement of your Mr. Brandeis, they would not have near the expense to charge up against the traffic end of it, and the present rates would probably prove sufficiently remunerative to show them a good margin of profit.

Personally, if it is demonstrated that the railroads need this advance, we will be glad to see them get it, but we want it given to them at such a time when it will not bring financial loss to the many who, in order to do business, must reckon months ahead, and by our having ample notice that these rates will be effective at a stated time in the future, so that we may give consideration to them in figuring on our next year's business, our industry will not be made to suffer.

Is it possible to give me some expression from your honorable commission regarding the probable date this increase would go into effect should it be decided to grant it? Would it be immediately or a sufficient length of time after your action to enable us to avoid a further loss?

Respectfully, GRAFTON JOHNSON.

—

NEW YORK, N. Y., *November 7, 1913.*

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: It is the understanding of members of this association that all carriers operating within what is known as official classification territory have filed with the commission, to become effective November 15, tariffs naming increased rates on ice carloads.

We find it impossible to obtain specific reference to such tariffs and are, therefore, unable to prepare and file formal protest against such advanced rates, but we must announce our opposition to such increases in the cost of transportation of ice becoming effective until by due hearing and investigation their reasonableness may be established.

It is, therefore, our desire and hope that the commission will upon its own initiative suspend the effective date of such tariffs naming increased rates on ice as may be filed with the commission to become effective November 15. In event of the tariffs being suspended, we will appreciate advice of the time and place of hearings that we may there appear and assume our share of whatever burden may rest upon shippers protesting the increased rates.

An acknowledgment of this communication, with any suggestions or information that the commission may consistently offer, will be appreciated by

Very truly, yours,

NATURAL ICE ASSOCIATION OF AMERICA,
By HAROLD W. COLE, *Secretary,*
By E. L. EWING, *Traffic Manager.*

—

STATE OF IOWA,
THE BOARD OF RAILROAD COMMISSIONERS,
Des Moines, May 17, 1913.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: This board has been informed that the railway companies operating in official classification territory have recently filed a petition with your honorable body asking the right to make a general advance in freight rates amounting to 5 per cent.

Representative commercial organizations in this State have asked this board to protest against said advance until the facts urged as justifying the same shall have been thoroughly investigated, and to take all the necessary steps looking toward the protection of the interests of Iowa shippers and consumers.

We find that the great bulk of our merchandise comes to Iowa from points east of Chicago. This is also true of a number of important commodities. We find that Iowa will be very largely affected by the said proposed advance.

At this time this commission does not take the position of opposing the said advance or of favoring the same, but does most urgently petition that an exhaustive investigation of the facts shall be made before any such proposal is given serious consideration. This commission will cooperate in said investigation on behalf of Iowa's interests.

In order to intelligently perform the duties required of us by law, this board respectfully requests that a copy of the petition of the said carriers shall be sent to it, and also notice of all future hearings relative to the matters therein contained. This commission will be represented at said hearings.

Respectfully, yours,

GEO. L. MCCAUGHAN, *Secretary.*

—

CHICAGO, *December 17, 1913.*

The INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: In the matter of the advance of rates by the railroads, now under investigation by your commission, we desire to submit the following for your consideration:

Following the former denial of an application by the railways for an advance in rates, the railroads leading out of this city, lengthened their schedule of time to the north, northwest, and western tributary markets from this city. For instance, the schedule of time from Chicago to Omaha and St. Paul has been for many years a second-morning delivery. This was lengthened to such an extent as to make it a third-morning delivery.

As this was practically prohibitive for the interchange of business on perishable commodities, the members of the trade entered a protest, assuming that the action was a retaliatory measure. It was claimed by the railroads, however, that it was a forced action by reason of the necessity of economy, and our protest was overruled and the slower schedule maintained.

The result has been that it has practically destroyed this branch of commerce on perishable commodities, such as fruits and vegetables.

The old schedule of time with the present standard equipment of refrigerator-car service was eminently satisfactory to the trade, and allowed a distribution from an oversupplied market and a relief of scarcity and higher values in the other markets and territory tributary to it. This valuable assistance to commerce and aid to both the producer and the consumer has been practically destroyed in the territory affected by this lengthened schedule.

Regardless of the cause of this action by the railroads, whether retaliatory or for economy, we submit the contention that it is entirely out of harmony with progress of the times. It is progressing backward. It creates a precedent, the serious effects of which would be enormous if followed in sequence. We claim it is un-American, out of sympathy with the progress of this Nation and detrimental to the interests of the public at large, and even to the best interests of the railroads themselves.

Irrespective of whether, in the wisdom of your honorable body, the advance in rates should be denied or granted, we ask that this particular schedule and service above referred to be changed to conform to the old and satisfactory one used, becoming mandatory in the event of the advanced rates being granted.

May we ask your earnest consideration of the above?

Respectfully, yours,

CHICAGO BUTTER & EGG BOARD,
By T. F. GALLAGHER,
Chairman Public-Service Committee.

—

BUFFALO CHAMBER OF COMMERCE,
February 24, 1914.

Mr. GEORGE B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: Replying to your circular letter of February 17 in the matter of general advance in freight rates in official classification territory:

The first paragraph of your letter intimates that the Buffalo Chamber of Commerce transmitted resolution to the commission in substance advocating a general advance in freight rates. I am attaching hereto copy of the resolution in question, which in fact does not advocate an advance in the freight rates.

We stated that we were in cordial sympathy with the purpose of granting railroads such rates as will permit them to properly operate and maintain their properties and pay a reasonable return on the money invested, and that we were in sympathy with the Interstate Commerce Commission in making a thorough investigation of the need of and justification for additional revenue, that body to determine from the facts the necessity of said proposed advance, and the reasonableness of the rates to be established thereby, consideration being given to certain localities where the rates are now excessive and unreasonable. The position of the Buffalo Chamber of Commerce is the same now as then, and we will, so far as we can practicably do so, in the short time allowed for answering the questions submitted, furnish you the information.

Answer to question 1: Approximately 1,600 concerns are represented in the Buffalo Chamber of Commerce.

Answer to question 2: So far as we are able to determine, there are 197 concerns which are connected with one or more railroads by private spur or siding. We are inclosing statement of the firms and industries located on the various roads operating in and out of Buffalo, some of which are not members of the Buffalo Chamber of Commerce, notation to this effect appearing on statement.

Answer to question 3: It is impossible to ascertain from our records the number of concerns which now actually enjoy ferry or trap car service, and in order to furnish this information it will be necessary to communicate with each of the concerns, which will require some considerable time before answers can be received, and, in our opinion, the time for the filing of this information with the commission, as of March 2, is entirely too short, and we therefore ask that further time be granted.

Very truly, yours,

RICHARD C. O'KEEFE,
General Secretary.

[Inclosure.]

Resolution adopted by the transportation committee of the Buffalo Chamber of Commerce at their meeting held December 9, 1913, in respect to the proposed general advance in freight rates in official classification territory as adopted.

Whereas carriers in official classification territory have filed petition with the Interstate Commerce Commission for rehearing in Docket No. 3400, in the matter of advance in rates, asking for general increase of 5 per cent in all freight rates, praying that the case may be reopened and further considered, owing to increased cost of operation of various kinds set out in their petition, the net return no longer being sufficient; and the commission being of the opinion, from a consideration of the allegations of that petition, that the need of and justification for additional revenue should be further examined by it at the present time; and

Whereas the commission thinks that such examination can be made more satisfactorily and more comprehensively in a general proceeding of investigation, instituted by the commission upon its own motion, than by a further consideration of this particular record, and further having denied the petition for a rehearing; and

Whereas the Buffalo Chamber of Commerce has given considerable thought to this subject respecting their attitude in the matter, which they recognize as of great importance to the members of the Buffalo Chamber of Commerce, the carriers as well as the public at large: Now, therefore, be it

Resolved, That the Buffalo Chamber of Commerce is in cordial sympathy with the purpose of granting railroads such rates as will permit them to properly operate and maintain their properties and pay a reasonable return on the money invested, and the committee is in

sympathy with the Interstate Commerce Commission in making a thorough investigation of the need of and justification for additional revenue, that body to determine from the facts the necessity for said proposed advance and the reasonableness of the rates to be established thereby, consideration being given to certain localities where the rates are now excessive and unreasonable.

—

DAY INDICATOR CO.,
Buffalo, N. Y., April 23, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

DEAR SIRS: I understand that the freight rates are to be advanced north of Ohio and the Potomac River, and would ask that the advance be postponed or delayed until you have given the shipper a hearing, as we certainly should be shown some consideration in this matter.

Yours, truly,

DAY INDICATOR CO.,
GEO. J. DAY, *Manager.*

—

ROANOKE, VA., *April 21, 1914.*

Mr. GEORGE B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: I beg to acknowledge receipt of your letters dated April 13, 1914, file No. 789028, and April 18, 1914, file No. 789586.

Am glad to note that my letter addressed to the President and the one to the Interstate Commerce Commission have been brought to the attention of the commission and will receive consideration.

Sincerely hope that the increase in freight rates will soon be settled, and that the Interstate Commerce Commission will see their way clear to allow the increase.

Very respectfully, A. RUSSOW, Jr.

—

BOSTON, MASS., *March 12, 1914.*

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: I have received a notice in regard to the matter of proposed 5 per cent increase in freight rates.

I am advising all my clients and other people who ask my advice not to buy railroad securities, and I am doing everything in my power to dissuade people from putting their money into railroad securities, for the reason that the Interstate Commerce Commission is not giving the investor a fair deal; and that, judged by its past actions, the investor can not expect a fair deal from the Interstate Commerce Commission. I am telling them this not in bitterness, but from experience.

I believe that the Interstate Commerce Commission is made up of absolutely honest men, but that the board is like the bear in a story I translated from the German when I was a student at the Massachusetts Institute of Technology.

A man had a bear for a friend. The man went to sleep and told the bear to keep the flies off of him. The bear did the best he could, but was particularly annoyed by a large bluebottle fly that persisted in lighting upon the man's head, although driven away time after time. At last the bear made up his mind that he would get that fly, and the next time the fly lit on the man's head the bear took a large stone and brought it down hard on the fly. He got the fly, but he crushed the man's head.

The Interstate Commerce Commission has got the railroads all right, but it is destroying business confidence in the whole country. Its failure to give the 5 per cent increase has already caused great suffering, and every day of delay causes more.

Respectfully, GILES TAINTOR.

—

UNITED STATES RADIATOR CORPORATION,
Detroit, Mich., March 19, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: This corporation is engaged in the manufacture of cast-iron radiators, boilers, and heating apparatus, operating plants at the following points:

Geneva, N. Y.; Dunkirk, N. Y.; West Newton, Pa.; Edwardsville, Ill.; Paola, Kans.

We also maintain branch warehouses with switch-track connection at the following points:

Boston, Mass.; Harrison, N. J.; Philadelphia, Pa.; Detroit, Mich.; Chicago, Ill.; Minneapolis, Minn; Omaha, Nebr.

We ship and receive in the aggregate several thousand carloads of freight annually.

When application was made by the carriers in the official classification territory for a flat increase of 5 per cent in freight rates in that part of the territory lying east of the Mississippi and north of the Ohio and Potomac Rivers, this corporation, along with other interested shippers, looked with a degree of favor on the proposition, believing that the carriers who have been laying before the public the facts and reasons for increases in revenue during the past threey ears, were acting in good faith and that some addition to the revenue was necessary. We estimated at that time that a 5 per cent increase in the territory mentioned would cost us in additional freight something less than $5,000 per year. This figure represents what we believe to be a fairly good estimate of the actual increase in freights to be paid directly by us. According to our plan of distribution, we allow out of our prices freight up to 30 cents per hundred pounds from any of our plants, which practically means delivery in official classification territory, so that this increase would be borne entirely by this corporation.

We are decidedly opposed, however, to the proposition advanced by your honorable body, as laid down in the decision in the Industrial Railways case, and further explained at the recent hearings held in Washington toward the allowing of carriers to make a separate charge for the spotting of cars at industrial private sidetracks.

We assumed, as before stated, that the carriers were acting in good faith in filing an application for an increase in revenues, which it has been estimated would net them about $25,000,000 annually. This belief was somewhat shaken by the eagerness with which the carriers' representatives took up the alternative as represented in the decision of your honorable body, realizing no doubt that it would be much better to make a play for a proposition that would return them over three times as much, even with a very moderate charge per car as against the 5 per cent application. It is our belief that the action of the carriers in thus abandoning their position as a petitioner for a modest increased revenue, and in taking the position of trying to grab everything in sight, whether right or wrong, has nullified the effect of their three years' campaign toward conciliating the hostile attitude against railroads which obtained in some sections of the country and in educating the general public to a knowledge of the justness and fairness of their position.

It has been a matter of much comment and sincere regret that this petition for increase in rates could not have been confined to what it was originally intended to cover and not switched off on to an angle which threatens to disrupt business relations and adjustments which have been a century in the making.

We are unequivocally opposed to permitting the carriers to make a separate charge for handling cars to and from private sidetracks on the broad grounds that the shipper's sidetrack is merely an extension of the carriers' terminal facilities, and it is to the carriers' economic advantage to have the industries so situated that they may be kept away from a concentrated congested district. The simplest conception of a common carrier would be the receipt of a shipment at its designated terminal, or receiving station at one point, to be transported to its designated terminal, or delivery station, at another point, having in mind the movement of one car or one train from one terminal and stopping at the other, but when the units of shipment are multiplied until they aggregate a great number of cars and trains it becomes an economic necessity for the carrier to provide classification yards so that certain cars may be so switched and arranged that the least possible time to complete delivery and unloading may be consumed. By no sound reasoning could the imposition of some additional charge for rearranging these cars in the classification yard and placing for delivery on team track or freight-house siding be justified.

Team-track delivery was suggested and provided for by the carriers themselves as a matter of efficiency and economy, and at first labor was furnished to unload and load shipments. Later this burden was transferred to the shipper and consignee.

The placing of a car on a private switch track is almost identical with team-track delivery, and the establishment of these sidings have always been considered simply as an extension of the carrier's terminal facilities, and thousands of industries have been persuaded to locate at this or that point upon the carrier's terminal upon the theory that no matter what the distance from assembling or distributing yards, the flat terminal rate would apply and was justified by the rate itself as well as by the fact that the switching involved would not in any case exceed the cost of receipt or delivery at the carrier's designated terminal.

Cities and communities have been built up by the operation of industries thus established, and in the competition of one city or locality against another it has always been recognized that the competition, as far as rates were concerned, applied from the whole of the city or locality involved. To provide a separate charge would establish a circle within a circle, as each city or locality would then be divided into competitive zones, one against the other, according to the distance from terminal and the switching charges involved in reaching any particular carrier's tracks or yards. That this equality should be preserved between different points has been recognized by your honorable body in a great many decisions. We call to mind I. & S. Docket No. 264, Fabrication in Transit, in which it is stated that "rather than permit a variance in the charge for the stoppage in transit at the many fabricating points, the additional expense incident to the service, if not at present adequately covered, may be reflected in the general level of rates on the articles which enjoy the service."

This decision was handed down on January 12, 1914, just a few days previous to the decision in the Industrial Railways' Case, and in suggesting the imposition of a separate charge for spotting an entirely new line of thought at variance with the paragraph above quoted seems to have been employed. I believe it must be conceded that the rates which now obtain in this as well as other territories in this country were designed to include all services which carriers perform incident to transportation, and to say now that transportation begins here and ends there is simply taking some arbitrary rule or measure in which any one of several could be employed, one with as much effect as the other.

Would it not be as logical to say that the rates did not include clerical expense of billing and accounting, which is an overhead, but is absolutely necessary in the business of transportation?

Some stress also seems to have been laid upon the fact that a small shipper is discriminated against by reason of the fact of a larger shipper having private sidetrack. It is an inherent business principle that the larger the quantity the lower the price, and we can not see how your honorably body can ever hope for a successful conclusion to any undertaking looking toward the absolute equalization of the condition of a man who buys or sells one carload of freight a year with the man or concern who buys and sells thousands of cars. The very fact of receiving and shipping a large quantity of freight means that it becomes an economic necessity in the handling of this business to provide some other method than by horse and wagon, and not concentrate the handling of the business at one particular spot or terminal. We believe it would be immediately conceded that should the carriers on this account be compelled to provide their own terminal facilities for the handling of all freight that they could never obtain money enough to buy the grounds or property which would be necessary.

If this theory of discrimination is to have any weight, there seems to be no point at which it could be stopped, as reasoning would carry it out almost to any extreme if the ideas as advanced were established as a premises. For instance, five shippers of freight in New York City would ship to five consignees at Chicago 10,000 pounds each. At the same time one shipper in New York would ship to one consignee in Chicago 50,000 pounds of the same commodity. The 10,000-pound lots could and possibly would be loaded into one car at the carrier's freight station, and it is possible to have the one car containing five different lots of 10,000 pounds each, and the car containing the one consignment of 50,000 pounds traveling in the same train coupled together from New York to Chicago, but the small shippers or the small consignees pay a less carload rate of freight on the same quantity of the same commodity and under practically the same transportation conditions as against the shipper or consignee who pays a carload rate on his consignment of 50,000 pounds. Is not the smaller shipper discriminated against in being obliged to pay practically twice as much freight on his shipment as was the man who bought in larger quantities?

This example, of course, is somewhat extreme, but would not be if the discrimination idea of the large fellow against the small fellow were carried out to any considerable degree. Our conception of the idea of discrimination would be that all shippers of practically the same class should not be discriminated one against the other, but that the man or concern who does business enough to justify the building of a sidetrack is not being favored by that fact against the smaller dealer, who takes delivery and ships his freight at a team track or freight house.

At our West Newton (Pa.) plant, which is located in a very small town, we load every day one or more trap cars of freight from our warehouse directly into cars. These cars are then switched out and taken by regular scheduled train up to Pittsburgh and transferred into through cars for various points. If this method were not employed, or a charge were laid on which would equal the cost of teaming to freight depot, it would be a hardship on both the shipper and the railroad company and nobody would be benefited. If we delivered these shipments at the Baltimore & Ohio freight depot at West Newton, Pa., it would mean that Baltimore & Ohio would have to employ additional help at their freight station to handle these shipments. The cost of switching the car out to the main line is insignificant in comparison.

At Geneva, N. Y., we are located on the New York Central tracks. At this point we do not take any advantage of trap-car service, owing to the fact that our plant layout is such that we can not do so. We are therefore obliged to team all our less carload shipments to the freight depot. It would certainly be an advantage to us and to the New York Central Railroad if these shipments could be loaded into a car at our plant and hauled up to Rochester, N. Y., which is a large distributing point.

At Edwardsville, Ill., we are located on the Litchfield & Madison Railroad, which is almost strictly a coal-carrying road and at Edwardsville maintains no freight station or freight handlers. We load our less carload freight into a car, and it is hauled either to St. Louis or Mount Olive, Ill., for transfer. If a charge were imposed for handling these cars it would mean an additional expense to us, which would not be justified, or if we refused to pay it and elected to make delivery to their station it would mean that the Litchfield & Madison would have to erect a freight shed and hire somebody to handle the freight.

To sum up, we can not see where in any way carriers are justified in the providing additional charges for the placing of loaded or empty cars on a private sidetrack. We believe the best interests of the shipping public on this account will be served if your honorable body can reach the conclusion that the thing to decide is whether or not the carriers are entitled to a 5 per cent horizontal increase in freight rates in this territory, and decide that question on the merits of the case presented.

Yours, very truly,

CHARLES P. HACKETT, *Traffic Manager.*

—

ST. LOUIS, *April 11, 1914.*

Mr. E. E. CLARK,
Interstate Commerce Commission, Washington, D. C.

MY DEAR MR. CLARK: This will acknowledge your very frank and much-appreciated letter of April 4, answering mine of the 2d with reference to the rate situation.

I sent you the editorial from the St. Louis Times for the purpose of getting just such a candid expression, and I want to thank you for taking the time to write me so fully and expressively.

I wish to have the privilege of writing you fully in answer to your letter, but in the meantime I believe you will be pleased to read the quotation below, which is taken from the letter of a friend of mine who is one of the heads of a great eastern daily. I wrote to him, as well as many others, on the same matter referred to in my letter to you, and the editorial which this gentleman sent me and which I am inclosing herewith is one of the results of this little campaign of education.

I thought you would be pleased to have it called to your attention, if you have not already seen it, and at your convenience I should be pleased to know your thoughts regarding this editorial.

In sending the editorial, the gentleman says:

"I am just in receipt of your letter inclosing clipping from the St. Louis Times anent the present railroad situation, and I have referred the same to our editorial department.

"I hope you have read the editorial in our paper, copy of which I am sending you, and which handles the situation in pretty good shape. What is needed is that everyone interested in the proposition be actuated only by an honest desire for the good of all. When this time comes there will be no such wrangling as is going on at present not only in the railroad field but in other industrial quarters. Were men and nations honest, wouldn't this old world be really a heaven for us all?

"I know the world is getting better and that these present wranglings are only signs of the times in the breaking away of the clouds of discord and mistrust. I know the rate question will be settled aright and within a very short time."

Yours, very sincerely,

CLARENCE H. HOWARD.

—

This was left out of letter.—C. H. H.

BOSTON, MASS., *April 6, 1914.*

FAIR PLAY AND THE RATE QUESTION.

Developments of the last few days in connection with the railroad hearing before the Interstate Commerce Commission make it clear that there are great classes of people in the United States who believe not only that freight rates should be increased but that the commission should go out of its way to put the increase through with speed. Great men of the railroad world have told the commission, in effect, that rates would have to be raised quickly or they would not be responsible for what might happen to the general business of the country. Shippers have come into the newspapers with resolutions or interviews regretting that the commission has not been able to decide this important question without so much hesitation. At the same time some of the greatest railroad systems, with apparent summariness, have dropped out of their employ a number of thousands of employees. Also in notice are significant cartoons, one of which pictures the Interstate Commerce Commission as a gigantic snail, blocking the path of a fast railroad train labeled "Business progress."

We do not know any reason why all these things may not have come out at this time naturally. Yet there is about their precipitation into public consciousness something cumulative, a certain timeliness, such as in other instances has been evident where artifice has been employed to produce a carefully planned effect. They certainly tend to create a public sentiment in favor of raising railroad rates, just as they tend to push the commission toward that kind of a decision. For this reason it becomes highly important, we think, that all who read this class of news at this time should weigh each item with care, and with a view to determine whether its origin is in natural conditions or in some effort that involves calculation and artifice.

In connection with this sudden dropping of thousands of railroad employees we can not help wondering what is the nature of an organization that can get rid of so many hands in the fashion indicated by the newspaper accounts and still continue as a going business. And our wonderment is increased when we recall that for many months the great railroads have allowed themselves to be reported as using every means in their power to economize on operating expenses, since it is not so much gross earnings as net that have undergone diminution. If we are to believe that they economized as much as they could in those earlier months, it is difficult to understand the sudden opportunity for such retrenchment, just now while the rate question is up. We can find no figures showing any corresponding slump in general business preceding this recent curtailment, whatever figures may be available now that the curtailment has taken place. Neither can we find any reasonable explanation in general business for the flood of elaborated news of operative reductions and related information that is rolling up against the desks of those newspaper editors who handle financial and business matters.

If those newspapers that are virtually controlled by organized business are being systematically used to develop a sense of pressure in this rate situation that would not otherwise be acute, then the same care is necessary at this time that would be taken anywhere and at any time to guard against what is known as a stampede. It is not always easy for ordinary newspaper readers to discover when an item of print has something behind it other than the desire to convey information; and when many great newspapers of the country are suddenly found to be printing items that are essentially prejudicial to an issue that is nominally open, there is need for special care if a reader is not to allow himself to be swept on to a wrong conclusion. Many well-informed newspaper readers, it may be remembered, agreed that the Spanish-American war could have been avoided if the newspapers had refrained from jingoism.

So if there is now on foot any attempt to sway public sentiment unduly or by artifice on the rate question, this is the time of times when the Interstate Commerce Commission deserves popular support. In the gradual advance toward effective public supervision of the great railroad systems in the United States, the time has come when that little group of public servants at Washington is required to withstand great pressure in the effort to exercise fairly the wide powers with which the public has intrusted them. The railroads have an opportunity to bring great influences to bear on the situation through their highly organized control of industry. Whether or not they are taking advantage of this opportunity, there is, we believe, all the more reason why public sentiment should stand unwaveringly behind the commissioners who are at this moment the Nation's reliance to see that no undue influences shall prevail and that the far-reaching decision as to railroad rates shall be neither stampeded nor deliberated unfairly but adjudicated with due regard for the truth and the rights of all.

—

ST. LOUIS, *April 11, 1914.*

Hon. E. E. CLARK,
Interstate Commerce Commission, Washington, D. C.

MY DEAR MR. CLARK: Referring again to your good letter of April 4, in answer to mine inclosing an editorial from the St. Louis Times:

I have read your letter several times and have found it interesting and helpful. You, of course, understood my honesty of purpose in writing you as I did, and that no criticism of your honorable commission was in the least intended.

It has always been my opinion that the formation of the Interstate Commerce Commission has met a great need, for a fair and impartial tribunal which gives a hearing to both sides is able to enforce right conditions much more effectively than can either of the parties. The commissioners, as far back as I can recall, have been splendid, able, and conscientious men, who have earnestly and sincerely endeavored to mete out justice to all parties. When I referred to the necessity for purest justice I most assuredly meant justice to the Interstate Commerce Commission as well as the railroads, shippers, and the general public, for according to the greatest Teacher we have ever known whatever helps one must help all, and justice can not properly be designated as such where any degree of partiality is shown.

In this connection permit me to say that it was most gratifying to a great many to see Mr. Joseph W. Folk appointed as chief counsel to the commission. I feel that he is not only capable of filling the position to which he has been appointed, but he is a man who could acquit himself with great credit in any position within the gift of the Government, because of his ability and his unquestioned honesty of purpose and truth of character, and also his freedom from prejudice. Justice and prejudice can not be reconciled. I believe I voice the opinion of thousands of people, particularly in the West, when I say that no one could have been selected who could more honestly, conscientiously, and justly handle the matters in connection with that important office than Mr. Folk.

I am very glad to have your frank expressions, because the subjects now under consideration, and their effect upon business, are of great interest to me, not only as a public-spirited citizen, but as the head of a great manufacturing concern employing 3,000 men, and, I might also add, as a large shipper. We have established very gratifying relations with our men, have made our plant as safe as possible, have created the best working conditions, and have done a great deal to bring our men to the highest degree of skill and efficiency, and we have engendered a spirit of good-fellowship in our entire organization. Therefore we naturally feel very close to these men, and it is very distressing to us to see business declining to such an extent that we may be compelled to lay off quite a number of our men. This is the humane side of the proposition, and looking at the subject from a broad standpoint, and fully realizing that there have been abuses and irregularities in railroad matters in the past (which, however, have been almost entirely eliminated), does it seem reasonable or just that the entire railroad and industrial world should be made to suffer for the past wrongs of a few?

You are aware that wages have been steadily increasing for many years, and this is especially true of the railroads as well as all industries. The public has required the railroads to furnish luxurious service and equipment, faster trains, the adoption of numerous safety appliances, etc., and all these things are no doubt very desirable and proper; but their enforcement should be accompanied, it would seem, with some compensating increase in revenue. However, it seems that the railroads' revenues have remained stationary, and in many instances have been reduced. The hardships also placed upon the railroads by conflicting legislation of various States emphasizes the desirability of Federal regulation.

In view of all the circumstances, it is the sincere hope of shippers, business men, and the general public that some means may be found by which the question of increased rates for the railroads can be

promptly decided, either one way or the other, for any certainty seems preferable to the prevailing uncertainty and suspense, which is a great detriment to all business, and is affecting directly and indirectly every man, woman, and child in the United States. The tariff question has been disposed of, the currency bill has been passed, we have prospects of splendid crops, and there is every indication that a prompt and effective settlement of the rate question would cause a wave of general prosperity. This would furnish employment for the unemployed, and our duty to our fellow man is of much greater importance than the settlement of details and technicalities.

In my earnest endeavor to get all the information possible regarding this important subject I have, from time to time, obtained the views of many people of different vocations—large shippers, bankers, professional men, railroad men, members of the judiciary, legislators, newspaper men, etc.—and have accumulated expressions which would seem to indicate the views of the general public, and for your information I inclose extracts from some of these letters.

The facts you mention as to the nature of the commission's work are appreciated, and I have always understood that the commission is considered a judicial body. I hardly believe the thinking public reads the ordinary newspaper article, editorial or otherwise, without allowing for misstatements due to misinformation or a lack of knowledge of the true conditions, and I really do not think that any considerable portion of our population credits the insinuation that the commission is prejudiced against the claims of the railroads. It would seem, however, that the wide publicity given these matters is very desirable, for when they are finally settled the public will be assured of the fact that every phase of the subject has been considered, and all sides given a thorough hearing.

I note the last paragraph of your letter which says in effect that you welcome the views of those interested, but that if the commission decided questions before it according to any pressure that might be brought to bear, or to avoid criticisms or abuse, it would be composed of men entirely unfit to serve in that capacity. This is very pleasing, and I most heartily agree with these sentiments, and having these ideals before them the commission can not fail to decide the momentous questions before it in the fairest and most impartial manner.

Your writing me so earnestly is very much appreciated, and, as you say you welcome the views of those who are interested, it gives me great pleasure to send you this letter with its inclosure, which I trust may be of some service to you, and which in turn necessarily means a service to the public.

Sincerely and appreciatively, yours,

CLARENCE H. HOWARD.

[Extracts from letters on the railroad situation, with reference to the request for increased freight rates.]

APRIL, 1914.

It is to be hoped that the Interstate Commerce Commission will take early action in this matter, which is one of great importance and interest to the country as a whole.

Unless granted, I fear the consequences will be serious, not only to the roads, but to the public at large. The commission is responsive to public opinion, and if satisfied, that favorable action would be generally supported by the public at large, would probably grant the prayer of the roads. The press of the country can render the roads and the public no greater service than by keeping up the publication of editorials, which will satisfy the commission that the pending application is receiving genuine public support.

It seems that a favorable decision would be the one momentous factor toward a resumption of prosperity.

It appears to me that opposition to the haphazzard regulation of large interests is becoming more and more pronounced. Some of our decisions illustrate a remarkable conflict between the desire for economical management on the one hand and fear of approving organization on the other. Commerce will have to pay the price during the transition period, but, to repeat, criticism of this policy is becoming very pronounced.

The increasing tendency in the public press toward expressions of this character is a most hopeful indication of a better understanding and better conditions in the future.

The rate problem should be settled by the commission, as they are the kind of men contemplated by the law; well versed in transportation matters, and thereby better fitted to judge of the merits of a case presented than some highbrow well versed in the law. My opinion is that railways should be empowered to make an increase in freight rates, to enable them to provide for the growing needs of the country and pay a reasonable return on the investment. While it is true that the stocks have in most cases been inflated, to the profit of the few, nevertheless the securities are now in the hands of innocent parties who had the right to think that the laws would safeguard the public in the issuance of the stocks and bonds of the corporations.

When you get an expression from any of the commission it is along the line of Mr. Clark's views, and Mr. Prouty, in fact, is more outspoken than Mr. Clark at times. All of this shows they are having a little different viewpoint now from what they had before, and with knowledge as to the exact situation they are becoming exercised for fear that the development will be so stinted by reason of lack of funds that the whole country will greatly suffer.

It appears that the business men of the country are changing their views upon the subject of railroads, and we are all hoping that this will extend to the masses of the people who do the voting. Like all other questions of this kind, publicity is helping it.

If Uncle Sam himself would treat the railroads fairly in the matter of "railroad-mail pay," this item alone would help out considerably. There appears to be a growing sentiment among shippers that the railroads should be allowed increased rates in order to take care of their increased expenses caused in a large measure by legislative regulations, as well as by the increased cost of labor and material. I am glad to see that you may be counted among that number.

There is no doubt in my mind that the thinking press of the country is growing more and more to understand the real conditions surrounding the railroads, and are taking the view that the railroads are entitled to proper compensation for service rendered, the same as any other public servant or manufacturer. It has always been my belief that more good comes from setting the example rather than preaching. It is further my opinion that the men as a whole, who are managing railroad property are coming more and more every day to realize this fact, and it is bearing fruit.

We are all very much interested to know if we are going to be allowed to base our rates the same as the manufacturers—in accordance with the present prices of labor and material.

There seems to have been a direct change of heart on the part of a great many people in connection with the railroad situation, and the old habit of damning the railroads is gradually being overcome through the fact that, I believe, the people are beginning to understand that the railroads have not followed the "to hell with the public" policy outlined by one of their forefathers.

The commission seems rather slow to act in this matter, and if we are to get the increase, it seems too bad that general business stimulation, which would immediately follow, should be so long held in check.

I have an abiding faith in right prevailing in the end, and the case in question will not be an exception, the great trouble in the meantime being in the effort of the railroads to make both ends meet, which, without question, means curtailment in expense, which is burdensome to some extent on the shipper, and, in turn, on general business.

When the commission acts in the matter of increase in freight rates applied for by the eastern roads, it will, I am sure, greatly relieve from further embarrassment the present situation.

The fact of the matter is that, much as the railroads are in need of the advance for which they have asked, the country itself requires this tonic even to a greater extent, and I can not see how the Interstate Commerce Commission can well decline to grant it.

While I am naturally an optimist, I can not but believe unless this 5 per cent increase granted there will result great hardship for a great number of the people of our Nation. The denying of this increased freight rate and the agitation regarding removal of grade crossings and better equipment in the form of all-steel cars, the burden of hauling the parcel post, for which the railroads to date have received little or no additional revenue, and the attitude of our legislatures and Representatives in Washington is such that the railroads are facing a condition that will be hard to overcome unless something happens in the very near future.

There is unquestionably a large feeling that the Interstate Commerce Commission ought to do something in the nature of relief for the railroads, and I hope that the final results will be such as ought to be produced and for the benefit of the country.

It seems to me that the great American public, which as a matter of fact in the long run lines up on the side of the square deal, is beginning to recognize that hostility to the railroads is being worked overtime and that the movement, politically and economically, has gone about far enough. I look for a better condition of affairs soon, although I fear it may take a long time to undo the harm already done.

I think the views of the country have changed a great deal and are more favorably inclined to the railroads' desire for an advance in rates.

All indicate an appreciation of the need of an increased compensation to the railroad companies, and it seems to me that public sentiment has practically crystallized in favor of the increase now under consideration by the commission.

There is no question in my mind but what the railroads have got to have an opportunity of taking care of themselves, devoting a little of their time to the operation and to the development of industries along the line, and they must be paid for it.

The railroad properties are the subject of attack from many sides and with unjust discrimination and unjust legislation by States, and it behooves every thinking man to do his best to start and do his level best to turn this tide of thought.

It seems to me that it would be good business judgment and good policy right now to move in this matter, even if it means to "risk doing a little harm to accomplish a great good."

The transportation business relatively will no doubt change from time to time like any other, and it would seem that there should be some elasticity to the prices which are charged for transportation, the same as there is for steel, lumber, or any other merchandise. Rates authorized now may be found in years to come to be too high or still too low. It is in order for the authority regulating railroads to ascertain what the rate should be, and it hardly seems fair to deny the plea of the railroads for such a length of time without responsibilty or obligation to make good the serious loss which may result from such delay.

There should be a general awakening of the people to their interests in the proposition.

A general awakening of this kind on the part of those who influence legislation will without a doubt bring about a period of development and reasonable prosperity for the railroads and those who are dependent upon the railroads for their own welfare.

The press is beginning to realize that, as arteries of commerce, the healthy growth of industry is depending upon the health and development of the railroads.

—

The thinking press of the country is for fair play to the railroads, which, without any argument, means prosperity for the country at large.

—

It seems too bad that there should be so much delay in giving the eastern roads what they are really entitled to. It would look as though it were an unnecessary delay.

—

The sentiment of the people of this country will prevail eventually, but just how long we will have to wait is hard to tell and is the problem which keeps us all guessing.

—

I have noticed in the past that the commission seems to be very prompt in its decisions for rate reductions but whenever an increase is asked for, action seems to be suspended for apparently an indefinite period.

—

There is no doubt but that public sentiment is in favor of an increase in rates and this same public sentiment should also be helpful in the matter of favorably influencing drastic and unnecessary legislation affecting the income and outgo of the railroads of this country.

—

I can not help feeling that the decision this time will be favorable; in any event, I shall continue to hope so.

—

I am quite certain that freight rates must be increased and that quickly, else the entire railroad structure will get into disrepute. We have with us to-day the beginning of the decay of the entire system; it is not the railroads so much as the American people who will suffer; the railroads will gradually sink into insolvency.

—

As you know, it is impossible for a railroad company to do any financing at this time. There is so much agitation going on in Washington that people of means are afraid to do anything. Whether we may expect any improvement or not in the near future is hard to tell. It looks to me as though we were going to have a lot of idle people all over the country, which is a very distressing thing.

—

The railroads are bringing to this country 1,000,000 emigrants every year, and they are going into the large cities, and the demand for food produce is increasing as the population increases in our cities. On account of the railroads having insufficient funds to extend their lines into new territory, and also on account of the credit of the railroads running down through numerous Federal and State bills which costs the railroads money to put into effect our credit is very low, and it is therefore difficult to get money to put into railroad-extension work, and it is not right that this should be, for it takes anywhere from 10 to 20 years to get returns from the new railroads built out in Wyoming and Idaho and territory in that direction, and the railroads are not earning enough to do it.

Therefore the necessity of the Interstate Commerce Commission giving encouragement to the railroads at this time rather than otherwise.

—

The general idea that money invested in railway stocks is not entitled to as full consideration as money invested in bonds has already injured the credit of railways to such an extent that future demands for capital to create necessary facilities will not be forthcoming at any price.

—

If every business man would take an interest in this matter it would not be difficult to bring about such a change in conditions as would permit of the railroads increasing their net revenue to a point which would justify the making of many new improvements in the way of additional equipment and added facilities for handling the constantly increasing commerce of the country.

—

The railroad problem is certainly a big one, and one that affects the whole country, but there are some good men working on it, and perhaps the higher freight rates are a part of the solution.

—

Every cent that the railroads earn goes right out for material and labor; in other words, it goes back into the hands of the public.

—

The necessary increase in railroad rates to enable the railroads to perform their functions satisfactorily to their patrons and to their owners would be very little indeed and would scarcely be felt by any producer or consumer. Such an increase, however, would enable the railroads to get the necessary capital to expand in their facilities, which they would make, they would greatly add to the general business of the country and be the means of creating an optimistic feeling throughout. I believe that public sentiment is changing for the better toward the railroads, and that it is only a question of time until those in authority will see and act upon the necessity of remunerative rates for the railroads. I think they are beginning to realize that this is a matter of paramount importance to the success of business and to the safety of life and limb of those who travel.

—

COMMISSIONER CLARK AND THE RATE CASE.

A letter from E. E. Clark, member of the Interstate Commerce Commission, and chairman in the last year, has been received by A. A. Housman & Co., members of the New York Stock Exchange, in response to a market letter out by the firm under date of March 30 last.

In its letter the firm wrote emphatically of the desperate situation of the railroads, produced by their inability to control their costs, their service, or the selling power of their product. Reference was made to the requested advance in freight rates as the only alternative to bankruptcy or selling out to the Government.

Commissioner Clark, whose letter to the firm was written without its solicitation, declared that no member of the commission is insensible to the great responsibility that rests upon him in connection with the proposed general increase in freight rates, but points out that its powers demand a full hearing on every request for a freight-rate increase. He adds: "Whatever the transportation charges are, the consumers have to paw them, and we think that the consumers' interests are not to be entirely lost sight of. I have never felt and do not now feel that one or two black sheep in a flock make the entire flock black. I do not condemn all railroad financing or all railroad managements because some of their financing and some of their management is both indefensible and inexcusable, any more than I condemn the Christian religion because occasionally a bad man is found in the clergyman's coat. The duty rests upon the commission to properly investigate the reasonableness and necessity for the increases, and the question of reasonableness is not at all a one-sided question."

—

HARPER & TURNER,
Philadelphia, April 13, 1914.

Mr. E. E. CLARK,
Chairman Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: Permit me to extend my congratulations on the abstract of the letter which you have written Messrs A. A. Housman & Co., and which abstract appeared on the telegraphic News Bureau ticker to-day. I say what I do because it is a humanizing letter.

Many years ago it was my good fortune to come in contact with you when I was on a newspaper staff and you were here for some time in connection with Lehigh Valley Railroad troubles. I remember with great pleasure your uniform courtesy at that time, and it is a pleasure to me to write to you now.

It is not the business of any citizen to offer suggestions that seem designed to contribute to a matter which is the subject of testimony. I am not writing from an investment banker's point of view. This might tact with manufacturers and shippers, as they constitute a great part of his clientele. The attitude of some of those with whom we come in intimate contact is one of deep depression. The whole situation seems to be psychological. Whether or not the rate increase is a just proposition, it has entered the minds of large numbers of business men that it actually is the greatest obstacle to business resumption. In voicing their comments they fret over what they deem delay in the decision, although they recognize that it is a momentous case.

A particular point raised is that the delays and reasons given that hearings had to be given on other subjects, conveyed the impression that the Interstate Commerce Commission did not realize that the business world was awaiting this decision. So long as it is fixed so strongly in the minds of men who have to pay the freight that the railroads must have relief just so long business will be delayed in picking up.

I do not believe anyone capable of passing judgment upon this question who has not devoted the thorough study to it that the commission has, and while a proposition to increase rates may seem economically wrong, nevertheless the fixed fact remains that a large part of the business world which we happen to see believes that the rate question is the great thing that is now oppressing business, and they are hoping and praying that in one way or another it will be gotten out of the road speedily.

Pardon me for venturing to write to you so freely, but I was so much gratified when I saw that you did not hesitate to speak frankly publicly that I felt impelled to write.

I am very truly, yours,
ALBERT E. TURNER.

—

KINGSTON, WIS., *April 2, 1914.*

CHAIRMAN INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

DEAR SIR: I just read in the Chicago Record-Herald that your honorable commission is about to decide if there shall be a 5 per cent increase in rail fairs. Now, I wrote you before I am in favor of giving eastern and western railroads 5 per cent increase. Now, let our junior Senator kick. I have been in the business of merchandise 44 years, and I believe in live and let live. The railroads must have some help. Everything costs more, why not give the railroads what they ask so there will be more railroads built. Officials of the St. Paul told me they will not build another mile of road in Wisconsin. So the people see. We must lay the blame to our Senator, LA FOLLETTE. He has done more harm to our State than good, and oblige,

Yours, truly,
H. VOLKMANN.

—

WABASH RAILROAD,
Chicago, May 12, 1913.

Hon. E. E. CLARK,
Chairman Interstate Commerce Commission,
Washington, D. C.

MY DEAR MR. CLARK: You may be interested in knowing that I have just come from a conference with prominent shippers in the Association of Commerce of Chicago on the subject of the proposed 5 per cent rate advance in official classification territory. I feel encouraged by the attitude taken by these shippers, and it looks now as though we would get no serious opposition from this quarter. The commission will, I hope, be willing to hear and decide the case on the general question of a moderate horizontal advance within the next 60 days, because, even with a favorable decision, it would take us at least three months more to prepare the tariffs.

There is nothing more important in front of us to-day.

In connection with the general railroad question I take the liberty of inclosing a copy of an address before the Economic Club, in New York, on April 29. This was in connection with a discussion at which Mr. Brown, Mr. Garretson, Mr. Bush, Prof. Ripley, and myself spoke.

Yours, very truly,
F. A. DELANO.

—

THE BALTIMORE & OHIO RAILROAD CO.,
On line, May 9, 1913.

Hon. E. E. CLARK,
Chairman Interstate Commerce Commission,
Washington, D. C.

MY DEAR MR. CLARK: I learned from Mr. Clyde Brown before leaving New York this morning of his talk with you on the telephone a day or so since concerning a conference at which time the carriers might file their request for reopening of case known as No. 3400. He said also that you expressed the fear that the commission might not be able to set a date for hearing before their annual adjournment.

I really hope the commission may find it possible to give us a hearing before it adjourns, although I appreciate fully that the time for that

purpose is limited. While the general question of reopening the case has been under consideration for some months, the necessity for additional revenue did not appear so pressing until after the recent flood disasters in the Middle West, and but for the large losses in net revenue, growing out of that condition, I suppose the request for rehearing would not have been made until after the summer vacation.

It did seem highly important to some of us, however, and to none more so than to myself, that we ought not to defer longer the making of our application, and while I have no desire to argue our case out of court, I am most anxious that we may have opportunity to present it as soon as it may be convenient and possible, in court, because if the commission should find that the railroads this time had proved their case and should grant the increase, it would then, as you know, take three or four months to prepare the tariffs and make the increased rates effective. In other words, no matter how well or promptly the case is handled, it will at least be five or six months, if not longer, before any relief can come from increased rates.

I trust you will appreciate the spirit in which this letter is written. I do not wish to seem insistent or to urge upon the commission any course which to them seems ill advised. It has occurred to me, however, that it might be possible to arrange, by concurrence of both parties, to defer some other case that may now be pending until after the summer vacation, and in that manner find time for what seems to me to be the most important case of all.

Very truly, yours,

D. WILLARD.

—

THE SOUTH BROOKLYN SAVINGS INSTITUTION,
Brooklyn, N. Y., April 7, 1914.

Mr. G. B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: I have received your favor of March 27, in which you inform me that the President has forwarded to you my letter of March 20.

We are much disturbed to learn by advices from Washington that the question of allowing the railroads to increase freight charges has been deferred for 30 days.

We are not speculators in railroad bonds and not one of our trustees is in any way connected with railroads. We have simply invested a portion of the savings of our depositors—the laboring class—who are providing against the wants of old age.

We feel that conditions are very acute, and trust that your body will not defer action too long.

Respectfully, yours,

WILLIAM J. COOMBS, *President.*

—

THE H. M. BICKFORD CO.,
Boston, April 6, 1914.

Hon. EDGAR E. CLARK,
Chairman Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: I beg to acknowledge receipt of your courteous letter of April 1 in reply to mine of March 30, in the matter of the eastern freight rate increase.

I do not wish to take up your time by continuing a correspondence in an argumentative way, because I am thoroughly aware that the commission is trying to settle this matter equitably to all, but there is one paragraph in your letter about which I would like to set you right. I refer to the paragraph which reads:

"We are not unaware of the propaganda which has been pursued to press us from as many quarters as possible to grant this increase."

If you supposed for a moment that I have been asked by any interested parties to write a letter to you, my letter would lose its entire effect. I wish to state without qualifications of any kind, that I was not requested by any person, organization, or representative of any interested parties to write as I did, but that it was entirely on my own initiative and because I personally felt that you could not be entirely conversant with the conditions which obtained in this section and still further delay a decision on this question.

It seemed to me when I wrote, and it seems to me now, that we are on the very verge of an industrial or business panic and that you held the remedy in your hand if you would apply it.

I did not intend to state that I thought a decision from your commission favorable to the railroads was the only way in which this impending trouble could be averted. I personally think that a decision unfavorable to the railroads would be vastly better than the uncertainty occasioned by a continued delay.

Please excuse me for trespassing further upon your time.

Very respectfully,

FRANK B. WITHERBEE.

—

MASSACHUSETTS MUTUAL LIFE INSURANCE CO.,
Springfield, Mass., June 20, 1913.

Mr. ALFRED HOLMEAD,
Acting Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: Your esteemed favor of the 12th to hand.

It seems obvious that the commission will grant the railroads' request for hearing, and in view of the present conditions, the sooner it is done the better.

The members of the commission are in better position to judge the merits of the question than any outsider. But it seems significant that public opinion has veered clean around in favor of the railroads.

One thing is certain—if any advance is to be made, the sooner action is taken the better, for in spite of the best efforts of leading business men, conditions are daily growing worse, although this country should now be enjoying a period of great prosperity.

Yours, very truly,

WM. BOSWELL.

—

THE 100 PER CENT RAIL JOINT CO.,
Philadelphia, October 30, 1913.

Hon. E. E. CLARK,
Chairman Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: Referring to my letter of the 23d and your acknowledgment of the 24th instant, I inclose herewith an editorial comment on your remarks of the 28th instant. The commendation of this editorial is from such a substantial source that I think it must prove gratifying to you.

I know that often in the pursuit of justice you must act without reference to the prospect of popular approval, but that does not detract in the least from the fact that when there is such substantial approval of your attitude on vital matters you must feel a little surer that you are headed in the right direction.

Yours, very truly,

W. PATON THOMAS, *President.*

[The Evening Bulletin (Philadelphia), October 29, 1913.]

SOUND RAILROAD ECONOMY.

The declaration by Chairman Clark, of the Interstate Commerce Commission, yesterday that ideal transportation conditions could not be expected on the railroads of the United States without an increase in rates was not more significant than his subsequent remark that "even if it be true that the present financial condition of transportation agencies is due to reckless, improvident, or even dishonest financing in the past, it would be a mistake to undertake to correct it by a policy of reprisal." The sooner that principle is recognized in the public as well as the official attitude of the Nation toward the railroad problem the sooner there will be reached an adequate and satisfying solution.

There is an unwritten but fixed law of limitations which must be recognized in all problems of this nature. Some things which have been done can not be undone. Eggs can not be unscrambled. The status quo can not always be restored, nor is it always possible to determine responsibility for wrongs which have been done and to reach the guilty parties with the arm of the law unless innocent are made to suffer as well. Undoubtedly there have been gross wrongs in the financial manipulation of railroad properties in the past. Deserving of punishment as the responsible factors in these manipulations may be, the essential thing is to prevent the repetition of these practices and to get good service out of the railroads in the future. It is folly to cripple an essential public service in order that past offenses may be punished. Admitting that money has been wasted, that capital has been inflated, and that rates paid by the people which should have gone into the maintenance and development of railroad property in the past have been diverted into the pockets of promoters and manipulators, that fact does not answer the actual need of money for operating and maintenance expenses at the present time.

The railroad problem must be taken out of the past and studied in its present and future phases if it is to be settled rightly.

—

NIAGARA, N. C., *November 1, 1913.*

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: Have you ever, in considering the possible advance in freight rates as requested by the railroads, looked for a substitute?

Why not allow the railroads to advance the carload rates 15 per cent in place of the small-shipment rates? This would accomplish the same results and would not increase prices to the consumer or small shipper.

You may think that carload rates benefit the small purchaser indirectly, but if you will investigate I think you will find that all wholesalers and jobbers who buy in carload lots in making their prices add small-lot rates and put the extra profit into their pockets. That can be found by comparing prices at different points as quoted in the price lists.

Very truly,

O. H. GORDON,
Niagara, Moore County, N. C.

—

THE H. M. BICKFORD CO.,
Boston, March 30, 1914.

Hon. EDGAR E. CLARK,
Chairman Interstate Commerce Commission,
Washington, D. C.

SIR: The writer is located at some distance from Washington and not at all in touch with politics in general, but is, however, intimately associated with business men in this section of the country in various lines, and therefore in a position to appreciate what apparently your commission does not realize, namely, that the delay in reaching a decision upon the eastern freight-rate question is rapidly bringing about such a business condition in this section of the country as to seriously threaten the interests of thousands of business men and millions of dollars of their invested capital.

Without discussion of the merits of the question as to whether or not the railroads are entitled to the advance in freight rates for which they ask, and fully appreciating the necessity for the most careful consideration of all the arguments which have been presented to the commission, and appreciating as well the necessity for the hearings which have been held for many months, nevertheless I believe that further delay must result in vastly more injury than benefit.

Surely during all these months that the commission have been considering this question they must have gained all the essential facts upon which to base their decision, and the business men and the railroads themselves now, I believe, have a right to expect a verdict and to receive it promptly.

This is the opinion of a great number of business men with whom I have talked. There is not one dissenting opinion; not a single exception.

Therefore, I believe, as do these others who are far enough from the scene of the actual discussion to have a broad and comprehensive view of the whole situation that the responsibility for what must occur in the event of further delay is squarely up to the commission and that they will be held to account for the disaster which is surely approaching and which even now it may be too late to avert.

It is unnecessary to point out—it is conceded—that the railroads are the largest factors in the business world. Their prosperity is necessary to general prosperity, and if they must sink with the gradually increased load of operating expense, it is fair that they should know it, and it is fair that the entirely innocent business community should have the change to determine its policy in that event.

The plan apparently adopted by the commission of continuing the hearings before the board, of further consideration, and, I suppose, discussion of this great question will surely result very soon in a business condition for which there will be no remedy whatever.

Very respectfully,

F. B. WITHERBEE.

—

FORT WORTH, TEX., *March 5, 1914.*

Mr. EDGAR E. CLARK, *Washington, D. C.*

DEAR SIR: I am taking the liberty of mailing you under separate cover copy of an article written by the president of this company, Hon.

George W. Armstrong, which is self-explanatory. This article appeared in every daily newspaper in the State, and is the third of a series which we hope in the end will accomplish a great good. I doubt if there is any other individual in the Southwest who creates more tonnage of freight than does Mr. Armstrong.

Yours, very truly,

TEXAS ROLLING MILL CO.,
Per BARNEY SMITH, *General Manager.*

—

CENTRALIA, WASH., *February 6, 1914.*

EDGAR E. CLARK,
Chairman Interstate Commerce Commission,
Washington, D. C.:

Your decision on railroad rate advance is awaited with great interest and anxiety. Many important improvements are being delayed pending settlement of this matter, and we believe that a decision on the question of rate advance will have a tendency to restore confidence and increase business activity. In dealing with this matter we sincerely hope that you will consider its relation to the commercial and industrial prosperity of the Nation.

CENTRALIA COMMERCIAL CLUB.

—

BUFFALO, N. Y., *January 2, 1914.*

Hon. G. B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: Inclosed I am handing you a copy of resolution adopted by the transportation committee of the elevator owners and the transportation committee of the Corn Exchange of Buffalo, representing pratically 95 per cent of the grain trade of the city of Buffalo, which I would thank you to file as an expression of our views on the general rate case.

Yours, very truly, G. E. PIERCE.

—

BUFFALO, N. Y., *January 2, 1914.*

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: Resolution adopted by the transportation committee of the Corn Exchange and the elevator owners of Buffalo at their meeting held December 17, 1913, in respect to the proposed general advance in freight rates in official classification territory.

Whereas carriers in official-classification territory have filed petition with the Interstate Commerce Commission for rehearing in docket No. 3400, in the matter of advance in rates asking for general increase of 5 per cent on all freight rates, praying that the case may be reopened and further considered, owing to increased cost of operation of various kinds set out in their petition, the net return no longer being sufficient; and the commission being of the opinion, from a consideration of the allegations of that petition, the need of, and justification for additional revenue should be further examined by it at the present time; and

Whereas the commission thinks that such examination can be made more satisfactorily and more comprehensively in a general proceeding of investigation, instituted by the commission upon its own motion, than by a further consideration of this particular record, and further have denied the petition for a rehearing; and

Whereas the above committees have given considerable thought to this subject, respecting their attitude in the matter which they recognize as of great importance to the grain trade in general, the carriers as well as the public at large: Now, therefore be it

Resolved, First, that the committees are in sympathy with the purpose of granting such rates as will permit railroads to operate and maintain their properties so that adequate service may be given to the shipping public and at the same time pay a reasonable return on the money invested, after a thorough investigation by the Interstate Commerce Commission of the need of, and justification for, additional revenue, that body to determine from the facts the necessity for said proposed advance, and the reasonableness of the rates to be established thereby, consideration being given to certain localities where the rates are now excessive and unreasonable.

Resolved, Second, that the committee especially invites the commission's attention (1) to the fact that the movement toward higher transportation charges in official classification territory has in the past fallen to an undue and unreasonable extent upon the rail-and-lake rates. If, for the sake of argument, we concede the claim of carriers that increased cost of operation, taxes, etc., justified some increase in the all-rail interstate rates, we respectfully submit that such claim can not and does not apply to the rail-and-lake rates, which have been advanced since 1900, from and to Buffalo, approximately 14 per cent without any change in the all-rail rates, which fact not only precludes the claim that a fixed relation exists between the all-rail and lake-and-rail rates that requires them to be simultaneously changed, but establishes the further fact that traffic moving under these rates has already contributed in full measure to any reasonable advance; (2) that the present rates on ex-lake grain for export from Buffalo to New York, Boston, Philadelphia, and Baltimore (known as the "at-and-east rates") on basis of 5½ cents per bushel of 60 pounds to New York, with the usual port differentials to Boston, Philadelphia, and Baltimore, are excessive and unreasonable, having been advanced 100 per cent during the past 14 years.

We, therefore, are irrevocably opposed to any advance in the present rail-and-lake rates, and the ex-lake grain rates applying at-and-east and local grain rates from Buffalo, N. Y.

GEO. PIERCE,
Chairman Transportation Committee of the Elevator Owners,
Chairman Transportation Committee of the Corn Exchange of Buffalo.

—

ST. LOUIS, *April 24, 1914.*

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

HONORED SIRS: If you will pardon the liberty a humble citizen of this Republic takes in addressing you, why not let "Jones, who pays the freight"—otherwise the principal shippers of this country—decide the question as to the 5 per cent increase to be paid to the railroads? Take a "straw vote" of every large shipper in every city in this country and let the "majority decide." This can be accomplished within a week and will relieve the tension mightily.

Very truly and respectfully,

JOHN J. MILLER.

PHILADELPHIA, PA., *April 25, 1914.*

Mr. GEORGE B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: Inclosed herewith you will please find letter under date of the 18th instant received from one of our largest consumers of limestone, the Worth Bros. Co., of Coatesville, Pa. The letter will explain itself, and it is only one of many of like kind from our various customers complaining of the deplorable condition of their business.

My business necessarily requires that I be on the road much of my time, and I come into contact with a large number of manufacturers and men who do things and get results and make the wheels of industry move, and without exception every one of them, to be on the safe side, is interested in seeing the railway companies of the country get the 5-cent advance asked for, to start to moving the wheels of manufacture that are now standing still, as a whole, over almost the entire country, and to give employment to the needy.

I trust you will use your best efforts to bring about at an early date a decision either one way or the other. As matters now stand, any delay is to be much regretted.

Personally I could cite you more than a dozen cases as familiar to me as our own, but I dare say you have the same information on your desk. Six or eight months ago we were employing more than 300 men, exclusive of the heads of the departments. To-day we have less than 100, and the outlook for May is very discouraging to say the least. You will agree with me that I have said enough upon the subject, and "A word to the wise is sufficient."

I would thank you for the return of the inclosed letter at your earliest convenience. Would also say, for your information, that I inclosed this letter to his honor President Wilson, and have just received its return.

Very respectfully, yours, WALTER T. BRADLEY.

—

COATESVILLE, PA., *April 18, 1914.*

WALTER T. BRADLEY,
Philadelphia, Pa.

GENTLEMEN: Owing to the extremely bad business conditions, and the present gloomy outlook in the business world, and the abundance of labor, which could be had to-day very materially lower than some time ago, we would now beg to inquire how much lower price you will now be able to name on limestone, such as we have been obtaining from you for our blast furnace.

Awaiting your reply by early mail, we remain,

Very truly, yours,

WORTH BROS. CO.,
L. T. WOGLE.

ROANOKE, VA., *April 8, 1914.*

Hon. WOODROW WILSON,
President of the United States,
White House, Washington, D. C.

SIR: I have taken the liberty to address these lines to you, and asking you to please use your good influence in behalf of a 5 per cent increase in freight rates now pending before the Interstate Commerce Commission.

Am a clerk employed in a railway office, and I fear that if the railroads do not get the 5 per cent increase, many a poor railway clerk will lose his position or his small salary will be reduced.

Sincerely hope you will give me some encouragement in this matter. I am,

Respectfully, A. RUSSOW, Jr.

EXHIBIT I.

SHIPPERS ATTEMPT TO INFLUENCE THE INTERSTATE COMMERCE COMMISSION IN THE MATTER OF FREE SERVICES GIVEN SHIPPERS BY THE RAILROADS.

Several hundred communications were received from shippers who were the recipients of free services from the railroads when it was rumored that the commission would forbid such favors in the future. These letters show that many of the same people who favored the rate increase were strongly opposed to charges for spotting, free lighterage, and similar free services.

NATIONAL SLACK COOPERAGE MANUFACTURERS' ASSOCIATION,
St. Louis, Mo., March 11, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: Referring to the investigation being made at this time by the commission in case Docket No. 4181 relative to the matter of service heretofore furnished by the railroads in connection with the spotting of cars on so-called private sidings, the National Slack Cooperage Manufacturers' Association would like to be placed on record as opposing any charge being assessed by the railroads for the placing or spotting of cars unless there is a corresponding reduction in the rates now in effect.

It is but fair to assume that when establishing rates full consideration was given by the carriers to the terminal services involved, which include spotting of cars, it being hardly conceivable that the railroads would overlook such an important factor.

It would seem that discriminations, if there be any, could be eradicated by means other than the imposition of a uniform or graduated charge for spotting cars, which would be in addition to the published rates.

If the object of the present investigation is to arrive at ways and means of increasing the revenues of the carriers and results in a charge being imposed for spotting cars, we would respectfully submit the possibility of a condition being created which would discriminate against the shippers who are compelled to use private side-track facilities, because it is the duty of the railroads to furnish terminal facilities, and if for their convenience, as well as that of the shippers, a so-called private siding is constructed, the same service should be provided, including spotting of cars, as is furnished users of so-called public team tracks. Furthermore, it is the opinion of the National Slack Cooperage Manufacturers' Association that even if discrimination results from

prevailing conditions, such discrimination is not undue nor prejudicial to shippers who use public team tracks and who, on account of the very nature of their business, would not be in a position to avail themselves of private side-track facilities even were they offered. It can fairly be stated that the imposition of a specific charge for spotting cars would have the effect of discouraging the use of private sidings and in consequence further burden public team tracks, which are in many instances inadequate at the present time.

Respectfully,

R. L. DE LONG,
Chairman Freight Committee.

—

THE NATIONAL INDUSTRIAL TRAFFIC LEAGUE,
Kansas City, Mo., March 19, 1914.

Hon. JAMES S. HARLAN,
Commissioner, Interstate Commerce Commission,
Washington, D. C.

MY DEAR MR. COMMISSIONER: The commission has announced, in the "car-spotting" inquiry now being conducted in connection with the Eastern Advance Rate case, that final hearings thereon will be on the 12th and 13th of March, brief and statements to be filed by March 24, and oral argument on March 30 and 31.

Other dates are fixed, or to be fixed, for concluding hearings on other so-called special-service features.

This organization has always taken a pardonable pride in supporting the fairness of the Interstate Commerce Commission, our experience having been, on the whole, that the commission would never act on any matter without the most complete investigation and giving all interests full opportunity to present all the facts. The commission has never before refused to set hearings in such sections of the country, and at such times as would be most convenient and least expensive to that part of the interested public.

This was particularly true in the Advanced Rate case of 1910 and in the Classification case which followed soon after, in the latter case even going so far as to set hearings as far away from Washington as the Pacific coast.

Neither of these cases were of as vital importance to the general shipping public as the one now referred to, and yet the commission has thus far refused to set any hearing on this subject outside of Washington, and has proceeded with a degree of haste that, to put it mildly and with the utmost respect to the commission, seems unwarranted.

It is the view of this league that the proposal to charge for "car spotting" is revolutionary, and, if adopted, will deprive the public of a part of transportation now guaranteed under the law which your body is appointed to administer; that, however, is the business of our counsel now appearing before you.

The purpose of this communication is to point out to you as a member of the commission that if "car spotting" should be established as a special service, either by a specific order or by a recommendation of the commission, which would have all the effect of a specific order, it would apply in all territories of the United States and would result in depriving a vast number of shippers of this right without having had any chance whatever of having been heard on the subject, and, it might be said, to deprive them of property without due process of law.

I am not unmindful of the extreme pressure that is perhaps being brought to bear on your body and perhaps on the administration to dispose of the Advance Rate case, but above and beyond the importance of that is the right of the public to its day in court, and if this part of that question—which is injected and not the main issue—is to be decided in the very short time now allotted and without any public investigation outside of Washington, there will be a hue and cry raised that can not be put down.

I realize and appreciate that the commission should not be influenced by public clamor whenever it is proceeding in a manner that contemplates full and complete hearings that give all their opportunity to be heard, but it does not seem to our organization that that is being accomplished here.

Therefore, under the instructions of the organization, I am appealing to you as an individual member of the commission to exert your influence toward the end of having hearings in all parts of the country, and after due notice of such a public character that all may be informed and public announcement made to that effect promptly, and also that the commission will not conclude this matter until the completion of such hearings.

This action by the commission will have a decidedly quieting effect on commerce generally and will establish a renewed confidence in your body.

The public has been taught to rely on the one fact that your body does not act without having all the facts, but to proceed as at present announced will destroy this reliance.

The attitude of the league on this subject is of record in the proceedings, but for your personal information I inclose a copy of our resolution thereon, in addition to which a circular letter on the subject is being addressed to our members, a copy of which I have instructed be sent you direct.

I will appreciate your careful consideration of this matter, and earnestly hope that in its wisdom the commission will conclude to pursue the usual course of public hearing in all parts of the country involved for the reasons set forth.

The importance of the subject is my only excuse for the length of this communication.

In the sincere belief that the commission will so act in the matter as to justify a continuation of that confidence it has always commanded, I beg to remain,

Respectfully, H. G. WILSON, *President.*

Resolution adopted at a special meeting of the National Industrial Traffic League, Washington, D. C., February 25, 1914:

Whereas on February 12, 1914, the National Industrial Traffic League, through its executive committee, resolved that a petition be made to the Interstate Commerce Commission for "such reasonable time and opportunity as may be necessary for the shipping interests to lay before the commission all of the facts and circumstances pertaining to" the spotting of cars, ferry, and trap-car service, lighterage and drayage, and other similar services, and reconsignments and diversions in transit; and

Whereas on February 19 announcement was made by the commission that further hearings would be had on February 27 and 28 on said subjects, with oral argument thereon March 16 and 17; and, under such arrangement, interested shippers have had and will have no adequate opportunity to present all pertinent facts and circumstances to the commission; and

Whereas the questions raised are of great magnitude and importance, involving the proposed imposition of millions of dollars of switching and terminal charges, a departure from universal and long-standing practices, and a revolution in terminal traffic conditions not confined to official classification territory; and

Whereas the determination of these questions necessitates an examination of questions of cost to the carriers of the various services, cost to the shippers of the terminal services performed by them for the carriers, cost and value of the sidetracks and other terminal facilities furnished both by shippers and carriers, the value of the said services to shippers, the adequacy or inadequacy of existing terminal facilities and efficient operation thereof, and all the conditions and circumstances existing throughout the United States, and particularly in official classification territory; and

Whereas a determination of such questions can only be had after extended investigation, with full hearings at various points convenient to carriers and the shipping public: Now, therefore, be it

Resolved, That the National Industrial Traffic League respectfully petition the commission to defer any final consideration or determination of the said questions until after an extended investigation can be had, with a full opportunity to all shippers and interested parties to present all pertinent facts and circumstances at public hearings to be had at convenient times and places, after adequate notice.

THE NATIONAL INDUSTRIAL TRAFFIC LEAGUE,
H. G. WILSON, *President.*

Attest:

O. F. BELL, *Secretary-Treasurer.*

—

ILLINOIS MANUFACTURERS' ASSOCIATION,
Chicago, March 19, 1914.

JAMES S. HARLAN,
Chairman Interstate Commerce Commission,
Washington, D. C.:

Reported here and in New York commission has tentatively approved spotting tariffs of 5½ cents per ton, with a minimum charge of $2 a car, effective April 1, notwithstanding further hearings are to be held later. Information to this effect has been disseminated by the trunk-line association. Please let us know if this is correct.

JOHN M. GLENN.

—

GLONINGER & CO.,
Pittsburgh, Pa., March 11, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: We desire to file a protest against the proposed charge by common carriers for spotting or placing of loaded or empty cars on individual sidings.

The charge for spotting cars will be a serious handicap to us in our business and to all other manufacturers of face, fire, and paving brick, as all manufacturers in this line with whom we are acquainted are situated practically as we are; many of them not so advantageously equipped.

We are manufacturers of brick used for facing of buildings. Our works are located at Vanport, Beaver County, Pa., on the C. & P. division of the Pennsylvania Co.

We have two sidings—one about 400 feet long, owned and maintained by the railroad company; one about 800 feet long, owned and maintained by ourselves.

The capacity of our works is about 700 carloads of brick per year.

We receive regularly about 4 carloads of coal per week, or about 200 per year. The coal is all received on the siding owned by the railroad company and about 95 per cent of our brick are shipped from the siding owned by ourselves.

The cost of spotting cars is very small and is now included in the freight charged on shipments. There is absolutely no advantage gained by any manufacturer in our line over any other by the present practice of spotting cars. In case a charge for spotting is imposed, it will be impossible for most manufacturers of brick to avoid paying whatever charge the railroad companies are permitted to make, as such works, as a rule, are so located that it is practically impossible to haul brick by wagon or otherwise and load them in cars on public-team tracks.

The switching of cars at our works occasions very little, if any, expense to the railroad company over and above what it would cost the company to place cars on or take them from public-team tracks. The cost of spotting, as already stated, is included in the freight rates, which are already higher than they should be. If a charge for spotting of cars is fixed at $2 per car, and is collected at both ends of the haul for short-haul movements, the addition to our present freight rate on short hauls will be equal to from 20 to 30 per cent. The present rate from our works to Pittsburgh, about 30 miles, is 65 cents per ton; minimum carload, 50,000 pounds. When our works were first established the rate over the same route was 50 cents per ton and the minimum carload 30,000 pounds. We are satisfied that at the present time it does not cost the railroad company as much to haul a 50,000-pound load from Vanport to Pittsburgh as it did to haul a 30,000-pound load over the same route when the rate of 50 cents was considered ample compensation for the service.

In the event that the railroad companies are permitted to make charge for spotting cars, it should only apply when cars are placed on schedule time.

At our plant switching is done once every 24 hours—sometimes before 7 o'clock in the morning; other times not until late in the afternoon. If we are diligent and load all the cars furnished before the scheduled hour for switching, and the pick-up or drag train does not reach our works until late in the afternoon, the gang of men we have for loading must be given some unprofitable work to keep them occupied until a new supply of empty cars is placed or they must remain idle.

If a charge for spotting cars is permitted, the railroad company should clean all cars before placing them or shippers should be paid for removing refuse and dirt from cars furnished. We now clean cars without compensation.

We own and maintain the siding on which we load 95 per cent of our product. The railroad company owns the siding on which we receive our coal. The majority of brick manufacturers have but one siding. Where a brick works is served by but one siding there is always more shifting to be done in placing cars than is necessary at our works. Where all the business of a works is on one siding there are often cars of coal partially unloaded at the time empties for loading brick are to be placed. Such coal cars must be taken out and shifted to another

track temporarily, the empties placed where wanted, and the coal replaced. Sometimes many shifts are required to do this on account of coal cars being sandwiched between cars being loaded with brick. The same is also true of loading cars that have been partially loaded with brick. They often have to be shifted in and out in order to place the coal where wanted. The siding on which our coal is received also serves our neighbors, the Vanport Brick Co. This siding is owned by the railroad company. Our works are located between the open end of siding and the works of the Vanport Brick Co. Often, after our coal is placed, when our men are unloading the cars, the railroad company, in order to do switching for the Vanport Brick Co., take our cars of coal from this siding, place them on the main track, inaccessible to us, until switching is finished and the cars replaced in their original location. During this time our coal wheelers are idle. If a charge for spotting such cars is put into effect, they should not be disturbed after being placed, or we should be allowed compensation for lost time.

This outline of the situation at one small manufacturing plant will, we think, indicate to your honorable commission that it will be practically impossible to devise any scheme for a fixed charge for spotting cars that will be fair to all manufacturers.

If it is decided to allow a charge for spotting cars, the charge should be fixed according to the service performed, and each case should be decided on its individual merits. This is impracticable.

Yours, respectfully,

GLONINGER & CO.,
By J. H. GLONINGER, *Proprietor.*

—

MARCH 17, 1914.

GLONINGER & Co.,
1507 Arrott Building, Pittsburgh, Pa.

GENTLEMEN: This will acknowledge the receipt of your letter of the 11th instant, in regard to the commission's investigation in the matter of increases in freight rates.

Your letter will be called to the attention of the commission and filed with the record in that proceeding.

Respectfully,

_____, *Secretary.*

—

NATIONAL BRICK CO.,
Chicago, March 11, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: Acknowledging receipt of your circular letter of the 5th instant, regarding hearings bearing on "spotting service" at plants having private sidings, beg to advice that we certainly feel that such a charge would be a very unjust burden to place upon the shipper, plus the freight rate covering the loaded movement of the car from such plant to destination.

What inducement is there for an industry to provide land and private track facilities for handling its business if the furnishing of same entails an expense above that which would obtain if the business were handled on a public team track of a common carrier, and were there no private sidings (which are maintained without expense to the carriers so far as first cost and upkeep is concerned) would not the carriers have to entail a very heavy expense to furnish public team track facilities for all business now handled on private sidings? We certainly feel that the carriers have all the best of the proposition where private sidings are furnished and the slight additional distances traveled by engines to place cars at plants on private sidings is too small to mention, as compared to the expense the carriers would be put to were they compelled to furnish the facilities to take care of all of the business now done by them on private sidings.

We wish you to understand that our argument against a charge for spotting cars is against such a charge for the first placement of the cars at point of loading and does not in any manner apply as an argument against a charge being made by the carriers when they move a partly loaded car or a fully loaded car from one point in a plant (after the car has been spotted for loading or unloading) to another point in the plant, to finish loading or unloading. For such service we believe the carriers should be entitled to a reasonable charge.

Further, the contracts demanded by the carriers with all industries having private sidings grant the carriers the use of such private sidings for their own business whenever such sidings are not in full use of the industry to which they belong and if a charge is to be made by the carriers for making the first spotting of a loaded car or an empty car on the private sidings of such industries, would it not be also as fair and just for the carriers to pay the industries having private sidings a reasonable charge for all of the cars they place upon such sidings for their own use or benefit, or for the storing of empty cars for which they do not have room in their own yards, or for the unloading of freight or the loading of freight for parties other than the party who paid the cost for and in whose name the private siding stands?

We certainly feel that it would be unfair to assess an industry a charge for the service referred to when the carrier would not be compelled to reimburse the industry on an equal basis for all cars, other than those for the industry, placed upon said siding by the carriers for their sole benefit.

Yours, truly,

NATIONAL BRICK CO.,
By SHANK.

—

CHAMBER OF COMMERCE OF NORFOLK,
Norfolk, Va., March 11, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: I beg to hand you herewith copy of resolutions passed by shippers and receivers (using private sidings) in the meeting held in the office of the Chamber of Commerce of Norfolk, Va., on March 10, 1914.

We beg your careful consideration of our plea.

Yours, respectfully,

CHAMBER OF COMMERCE OF NORFOLK,
W. A. COX, *Traffic Manager.*

Resolutions adopted at special meeting of shippers and receivers using private sidings.

Whereas there are 262 firms and individuals located at Norfolk and its environs (within switching limits) who are interested in the matter of the 5 per cent advance by transportation lines in the official classification territory; and

Whereas a meeting was held on this date of those interested specially in the feature pertaining to proposed charge for "spotting of cars"; and

Whereas at said meeting the subject was thoroughly discussed; and

Whereas it was the opinion of those interested that any additional charge for the service of "spotting" cars would be at variance with the theory that the rates as published contemplate transportation movement from point of shipment to final destination: Now, therefore, be it

Resolved, That the users and owners of private sidings within Norfolk switching limits are unalterably opposed to the assessment of any arbitrary charge for the "spotting" of cars, and indorse most heartily the efforts of the National Industrial Traffic League in opposition thereto; and be it further

Resolved, That a copy of these resolutions be presented to the honorable the Interstate Commerce Commission, Washington, D. C., asking their due consideration thereof.

CHAMBER OF COMMERCE OF NORFOLK,
W. A. COX, *Traffic Manager.*

Attested by:

C. F. BURROUGHS,
Chairman Freight Traffic Committee.

—

SMITH, KLINE & FRENCH CO.,
Philadelphia, March 11, 1914.

The INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

DEAR SIRS: We are informed that there may be some opposition to your issuing an order that railroads shall charge for services on private sidings. We, ourselves, have a private siding which is of the greatest value to us, extending about 300 feet along the side of one of our storehouses. In our opinion, however, any service on a private siding should be charged extra by the carrier, otherwise the carrier must be reimbursed by a general tax.

We therefore write to urge that a charge shall be made by the carriers for all services without any exception whatever on private sidings, such charge to be proportionate to the service performed.

Any exception to the rule will permit favoritism.

Respectfully,

SMITH, KLINE & FRENCH CO.,
HARRY B. FRENCH, *President.*

—

CUYLER & MOHLER,
Baltimore, March 11, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: The apparent tendency toward fixed charges for lighterage, "spotting" cars, and delivery on switches appears to us as class legislation, for where such service is rendered it is usually because the beneficiaries are located too far from general terminals to avail themselves thereof, as only a limited number of establishments can be located near to such terminals, and consequently the present system of free lighterage within established limitations, as well as the practice of dropping off cars on sidings, switches, and sidetracks facilitates commercial interests in large cities without entailing much, if any, additional expense to the railroad carriers; also except for such deliveries it would be necessary to have far larger terminals, and even then, because of the congestion, the railroads would be put to greater expense than they are now under established conditions.

We sincerely hope that your honorable body will give these facts, and others not herein cited, due consideration and will not impose upon the business of the country any extra charges because of the features herein referred to. We believe the general business interests of the larger cities, and even of the country generally, would prefer to see the railroads granted the 5 per cent increase in rates they have been after rather than to have extras like those herein mentioned imposed upon them.

Very respectfully, CUYLER & MOHLER.

—

CLYMER BRICK & FIRE CLAY CO.,
Clymer, Pa., March 11, 1914.

The INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: In the matter of proposed 5 per cent increase in freight rates, we desire to enter our protest against any charge being made by the railroad companies for the alleged service of placing or spotting cars for loading or unloading on shippers' siding. This charge will operate against shippers who are limited to short hauls by reason of heavy commodities—such as brick, stone, etc.—and in favor of long hauls where the freight rates are higher. It is presumed that the charge would be made at each end of the haul and would therefore be equivalent to a considerable increase in freight. For instance, if the spotting charge were $2 at each end of the haul this would be $4 per car, and if this car should carry 25 tons at a rate of $1 per ton the spotting charges would be equivalent to an increase of 16 per cent on the present freight rate. It would be better for the short-haul shipper to grant the carriers an advance of 5 per cent straight rather than to discriminate in this way against the heavy commodity with the short haul.

Yours, very respectfully, CLYMER BRICK & FIRE CLAY CO.,
G. W. LENKERD, *Secretary.*

—

OLD COLONY BROKEN STONE & CONCRETE CO.,
Quincy, Mass., March 11, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: With reference to a charge for "spotting" cars, which we understand you are now giving consideration, beg to state that any charge, however small, would be a great burden to our business.

The commodity tariff, I. C. C. No. F 765, applying to crushed stone is considerably higher than the tariff on either the Boston & Maine or Boston & Albany Railroads on the same commodity, the minimum rate on the Boston & Maine being 40 cents per gross ton and the New Haven minimum being 50 cents per net ton.

If "spotting" cars applies to the service of placing cars on our siding and on placing cars for delivery at destination, a charge of $2 per car would be equivalent to an increase of 33⅓ per cent on the minimum tariff for a carload of 24 tons. Such an increase would deprive us of a large part of our business.

We own our sidetrack, in which we have some $2,500 invested, and it is maintained at our expense.

We suggest for your consideration that the rates of the several railroads in this territory be equalized, and that the value of our commodity be considered in establishing a charge by the railroad for service on a private siding.

Yours, respectfully, EUGENE R. ATWOOD, *Treasurer.*

—

CHICAGO, ILL., *March 11, 1914.*

Hon. E. E. CLARK,
Chairman Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: We are advised that the railroads, acting under the suggestion of your commission, are about to publish tariffs which will specify a charge of 7½ cents per ton, with a minimum of $2 per car for spotting cars for loading and unloading on switches and spurs built to manufacturing plants, etc. We believe that such a charge would be unjust and also extremely burdensome in some cases.

In the first place, this charge if allowed will be for a service similar to the placing of cars on team tracks, for which no charge is contemplated. For the most part, fire-brick plants, including our own, are located in isolated localities to which no team track is accessible. This is true for the reason that very large tonnages are handled by plants in this industry and incoming freight charges are avoided as far as possible by the location of the plants. The nature of the service performed by the railroad is identical with that performed for team-track shippers and receivers, viz, the mere placing of cars for loading and unloading and their removal when loaded or empty. The quantity of tonnage delivered by each plant, even the smallest, is far in excess of that received by the railroads at their team tracks in small towns where team tracks are located. The tonnage received by the railroads from the fire-brick manufacturers on their sidings is steady and large. To make this additional charge would be to discriminate in favor of team-track users. Some fire-brick manufacturers, including ourselves, own their own tracks. To deprive this class of this service would be to take away from them all return on the investment. This seems to us manifestly unjust. The service extended to us and others in this business is not comparable to the service extended to large industrial corporations, where there is a shifting of cars constantly, either empty, loaded, or partly loaded.

This charge would seriously disturb present competitive conditions in this industry. A large number of manufacturers have built their factories believing that the present charges would be permanent, and they could not by the exercise of reasonable foresight have seen otherwise. Some plants have all of their raw materials including coal adjacent to their works, and this material is transported by themselves at a cost not to exceed the unloading and rehandling costs of other plants who depend on railroad service for their supply of raw material; another class depends partly on the railroads for their supply, while another class depends entirely on the railroads for their supply. The latter class consists mostly of manufacturers who have built in small towns adjacent to the clay fields to secure the benefit of a better labor market. As between the extreme classes, i. e., those receiving no raw material by rail and those receiving all of their raw material by rail the burden on the latter class is extremely heavy, with varying degrees of burden in proportion to the tonnage received by each by rail. To state a specific case of two manufacturers, one receiving all and the other none of his raw stock by rail, and supposing the daily output of each to be 30,000 bricks, the first manufacturer would be at a disadvantage of $25 per day for the spotting item alone, as against his more fortunate competitor. This would mean 4 per cent to 5 per cent of his gross sales, and approximately an annual sum equalling 10 per cent of the capital invested. These extreme cases are not rare but are common.

If the railroads are denied their rate advances, every effort will be made by them to extend their charges in every possible direction, and placing a maximum charge on every alleged service. The small, independent manufacturers are especially vulnerable to this kind of attack, and we are confidently looking to your honorable commission to give us whatever protection is just and necessary.

Yours, respectfully,

THE PYRO CLAY PRODUCTS CO.,
Per WM. G. GRIFFITHS,
Secretary, Oak Hill, Ohio.

—

M. D. VALENTINE & BRO. CO.,
FIRE BRICK AND FURNACE BLOCKS,
Woodbridge, N. J., March 11, 1914.

Hon. E. E. CLARK,
Chairman Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: The M. D. Valentine & Bro. Co., of Woodbridge, N. J., has in official classification territory 10 sidings. These sidings are used for loading outgoing freight and unloading inbound material.

We have no motive power of our own, and the railroad company charges us demurrage and for any extra service performed on these sidings. The only service performed by the railroad company is putting cars in and taking them out; that is, placing them in position to be loaded or unloaded.

At both of our plants the railroad companies use our sidings for drilling purposes for their own convenience, and at our works at Valentines, N. J., very often store their cars on portions of the sidings.

All the repairs necessary to these sidings—and the railroad companies are very particular to keep their sidings in conditions—are paid for by our company.

We consider it would be unjust and discriminatory to make any charge for spotting cars on these spur tracks, and wish to enter our protest.

The cost to the railroads for the services performed on these spur tracks is no greater than that performed for the general public in spotting cars for loading and unloading at the main freight station.

The spur tracks represent the most economical method that can be devised for handling freight that the railroads secure in this way.

The time that the railroad companies spend in handling the cars on our sidings is very little, and the time is entirely at their convenience.

Our company shipped during our fiscal year 1913 approximately 50,000 tons of clay and clay products.

Should we be compelled to make shipments from the main station, it would require considerable more work to the railroad company to handle a great many small shipments that we make in less-than-carload lots, where at the present time we can very often hold up a number of small shipments and make them up a way car on our own siding.

We have made an estimate, and as near as we can figure, should the charge for spotting cars on private sidings become operative, it would cost us approximately 75 cents a thousand on our fire brick.

Very truly, yours,

M. D. VALENTINE & BRO. CO.,
By F. R. VALENTINE, *Treasurer.*

—

BRIGHTON FIRE BRICK CO.,
New Brighton, Pa., March 11, 1914.

Hon. E. E. CLARK,
Chairman Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: The Brighton Fire Brick Co. has one 410-foot siding, which is an ordinary spur track from the Blockhouse Run branch of the P. F. W. & C. R. W., located at New Brighton, Pa., and is used for both inbound and outbound material.

We consider it unjust and discriminatory to make any further charges for spotting cars on this siding, inasmuch as the work is all done by the P. F. W. & C. R. W. motive power, and the work consists merely in pulling out the loaded cars of material and placing empty cars for loading on our siding, a less service than that performed on most public sidings. The cost, therefore, to the railroad is absolutely no more than on public sidings, and we know of no better way that the railroads could get our tonnage, approximately 80,000 tons per year, than the method now in force, as on account of the kind of material shipped and on account of the isolated position of our plant it would be impossible for them to get it at a public loading station.

The service on our siding could not be more simple, and the time of making this service is in the hands of the railroad company; our convenience is not consulted.

We therefore consider any further charges outside of those now in force very unjust and discriminatory, and protest against any such an allowance.

Very respectfully, yours,

BRIGHTON FIRE BRICK CO.,
T. W. D. ADDENBROOK, *Manager.*

—

HAYES RUN FIRE BRICK CO.,
Orviston, Pa., March 11, 1914.

Hon. E. E. CLARK, *Washington, D. C.*

DEAR SIR: We understand the railroads are considering making a charge for the service of placing cars on or taking cars off of private sidings.

We have one siding here at Orviston, from the New York Central, which is 1,150 feet long and which has a branch spur of 350 feet. We consider it would be entirely unfair and discriminating to make any charge for placing cars and taking them off of a siding of this nature. The only work done on our siding by the railroad company is putting the cars on and taking them off; that is, that material shipped in can be unloaded and the outbound material loaded.

Our plant is located at Orviston, at which point there is no public siding, and our siding is used by the public; and even if there would be a public siding, a commodity of such large tonnage of brick could not be handled satisfactorily without a private siding. A commodity like brick, when so much tonnage must be handled to secure a profit, a charge for spotting cars or placing cars on the siding and taking them off would be a most serious handicap to our business. Therefore we protest most strongly against any charge of the railroad for placing cars on private sidings and taking them out.

Yours, very truly,

HAYES RUN FIRE BRICK CO.,
C. W. KELLER, *Manager.*

—

THE NATIONAL INDUSTRIAL TRAFFIC LEAGUE,
Chicago, Ill., March 11, 1914.

Hon. B. H. MEYER,
Commissioner Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: At the request of our president I send you herewith copy of circular letter addressed to the membership of this organization in connection with the investigation as to spotting of cars.

Very truly, yours,

D. P. CHINDBLOM, *Assistant Secretary.*

THE NATIONAL INDUSTRIAL TRAFFIC LEAGUE,
Chicago, Ill., March 10, 1914.

To Members:

In the investigation of the proposed advance in rates in official classification territory now being conducted by the Interstate Commerce Commission the following questions have been presented, viz:

"Are the revenues of the carriers sufficient?"

"If not, how may they be supplemented?"

This has resulted in an inquiry by the commission as to whether or not the carriers are now performing any services free for which they should be compensated.

Special investigations are now being conducted by the commission in connection with the above questions to determine whether switching, placing, or delivering cars for loading and unloading on industry side tracks, privately owned or railroad owned, is a special service of this kind for which the carriers shall make a charge in addition to the freight rate.

These investigations also include the propriety of a charge against the shipper for trap or ferry car service and for certain other alleged special services such as reconsignments and diversions in transit.

The theory advanced by the attorney for the commission is that the term "transportation" should include only the road haul and the service to and from public team tracks and to and from public freight depots.

Heretofore the freight rate has included compensation for all services from the point of loading to the point of unloading regardless of whether the tracks or other facilities at terminals were railroad owned or privately owned, and has also included the trap or ferry car service.

The private side track and the trap or ferry car were encouraged and developed by the carriers to supplement their inadequate terminal facilities, or to enable carriers to participate in traffic otherwise inaccessible to them, and have lessened their investment and the cost of handling the traffic.

The league is unanimously of the opinion that "transportation" includes all of the railroad service and tracks and facilities devoted to the hauling of freight traffic, and that the published freight rates now include and always have included full compensation for these services. A departure from this long-established practice, requiring the carrier to add to the present freight rate a separate charge for receipt and delivery of freight, will deprive the shipper of the value of his investment in terminal facilities and transfer it to the carrier.

It is needless to emphasize the fact that if the charging for these so-called special services is established as a principle in official classification territory it will inevitably be applied in all sections of the country.

The league has employed counsel and will, within the limited time at its disposal, protect your interests as far as possible. The commission has, however, fixed March 24 as the final date for receiving statements and briefs upon this matter, these to be followed by oral arguments by counsel before the entire commission on March 30 and 31.

Believing that it is of the utmost importance that sufficient time shall be given for the investigation, the league urgently recommends that all shippers acquaint the members of the Interstate Commerce Commission with their views on these questions, and, either individually or through their commercial organizations, petition the commission to refrain from definitely and finally concluding this matter until such time as a full hearing, after due and adequate notice and with respect to the territory in which the shippers are located, has been given.

Immediate action should be taken, as the time now provided is unusually short.

Very truly, yours,

H. G. WILSON, *President.*

O. F. BELL, *Secretary-Treasurer.*

NATIONAL WHOLESALE LUMBER DEALERS' ASSOCIATION,
New York City, March 11, 1914.

Hon. JAMES S. HARLAN,
Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: I herewith submit a resolution in reference to the "spotting of cars" which was adopted by this association at its twenty-second annual convention, held at Buffalo, N. Y., March 4 and 5. I would ask on behalf of this association, which is organized under the laws of the State of New York, that this resolution be afforded careful consideration by the commission and the lumbermen given an opportunity to be fully heard on the subject.

Yours, respectfully,

W. S. PHIPPEN,
Traffic Manager.

Resolution adopted by the National Wholesale Lumber Dealers' Association, in annual convention assembled, at Buffalo, N. Y., March 5, 1914.

Whereas the Interstate Commerce Commission having given notice of its intention to consider the advisability of the railroads making some charge in addition to freight rates for special services performed on behalf of shippers who have private tracks; and

Whereas lumber moving in carloads is a very desirable commodity for the railroads to handle, being loaded by the shipper and unloaded by the consignee, thereby relieving the carriers of labor cost and the maintenance of warehouse facilities; and

Whereas shippers and consignees having sidetracks, having stood the expense of the installation of same; and

Whereas the use of such private tracks increases the facilities of the railroads by relieving the congestion which would otherwise occur at terminals and public-team tracks and reduces the demurrage charges and railroad per diem charges by more promptly returning the cars to the railroad service than can possibly be done where lumber is to be hauled to or from public team tracks:

Resolved, That the National Wholesale Lumber Dealers' Association, with a membership of over 400 wholesale lumber dealers and manufacturers, in convention assembled, petitions the Interstate Commerce Commission that no additional charges be granted the railroads for spotting lumber cars on such private tracks until after such private-track owners and shippers may be fully heard in defense of the present custom.

NATIONAL WHOLESALE LUMBER DEALERS' ASSOCIATION,
Per E. F. PERRY, *Secretary.*
W. S. PHIPPEN, *Traffic Manager.*

BUFFALO, N. Y., *March 5, 1914.*

NATIONAL WHOLESALE LUMBER DEALERS' ASSOCIATION,
New York City, March 11, 1914.

Hon. JAMES S. HARLAN,
Interstate Commerce Commission, Washington, D. C.

DEAR SIR: I herewith inclose a resolution in reference to the proposed advance of 5 per cent in freight rates which was adopted by this association at its twenty-second annual convention held in Buffalo, N. Y., March 4 and 5, and would request that it be given due consideration.

Yours, respectfully,

W. S. PHIPPEN, *Traffic Manager.*

Resolution adopted by the National Wholesale Lumber Dealers' Association in annual convention assembled at Buffalo, N. Y., March 5, 1914:

Whereas the railroads in official classification territory are asking the Interstate Commerce Commission for an increase of 5 per cent in freight rates, urgently claiming the need of same; and

Whereas the members of this association are interested in a large way in the right and prompt adjustment of this claim: Therefore be it

Resolved, That we join in asking the commission to render at as early a date as possible its decision in the matter in the interest of the railroads, the lumber shippers, and the commerce of the country in general.

NATIONAL WHOLESALE LUMBER DEALERS' ASSOCIATION,
Per E. F. PERRY, *Secretary,*
W. S. PHIPPEN, *Traffic Manager.*

BUFFALO, N. Y., *March 5, 1914.*

MARCH, 11, 1914.

LOUIS D. BRANDEIS, Esq., *Washington, D. C.*

DEAR SIR: I hire five teams hauling my freight. I have been reading the testimony of traffic managers at Washington; so has my shipping clerk, who formerly worked for a railroad.

It is claimed that trap cars are loaded for the railroads by shippers, thus saving labor. My teams back into my shipping door, and I pay all the expense of loading my own wagons. I pay for the use of my wagons. I pay for the property where these wagons are loaded. I pay to maintain the alley abutting my property. I pay for the use of wagon and driver to take freight from my place of business to the freight house. I pay for time of wagon and man while waiting at the freight house to get to door to be unloaded, and when I ask my driver why he is delayed he says only 3 doors out of 20 were open and that there were two men trucking freight from each door; the balance of the men were unloading trap and tunnel cars, and that the men tell him this business comes all mixed up in cars and they must unload most of it before they can check it. Sometimes three cases for one man are in three different cars, and every day a lot of freight comes in these cars that they can not take, which must be returned free in a car to the shipper.

Now, when a trap car is loaded at a shipper's warehouse by his men he is through. The railroad furnishes car 48 hours, if necessary, to shipper. The railroad pays men to take charge of this car and haul it to the freight house for unloading. After car arrives at freight house the railroad performs every service on this freight. It does on mine with the exception that I send driver to help unload wagon. Trap-car shipper sends no one to help unload car. If goods are damaged between my plant and freight house, I get bad-order receipt. If goods are damaged in trap car on way to depot, railroad pays damage claim. If my team is held one hour at freight depot, I pay for delay. If trap car is held one or two hours, the shipper is under no expense for lost time.

The men from the Chicago Association of Commerce, who have special privileges, are about 2 per cent of the membership, and you are really representing 98 per cent of members and hundreds of small shippers who can not afford to hire high-priced traffic men who must show a profit or lose out, no matter who pays.

The universal-station plan is a scheme to put the burden of sorting and distributing freight on the railroads. The shippers of Chicago have less cause for complaint than any in the world. Every part of the city—north, south, west—have trunk-line facilities on both east and west roads. The tunnel is not a good commercial proposition and was built originally for a telephone conduit and later drifted into freight business through the influence of some big shippers who had business enough to force the railroads into absorbing their delivery charge. The same influence opened up central manufacturing district and offered free switching in and out via Chicago Junction Railway. The Midland Warehouse handles mixed cars for small charge, because the railroads absorb expense in and out.

The big houses here who have trap-car privileges also have branch mail stations to cancel stamps, but they must haul their parcel post and mail down to post office. United States absorbs nothing. This is as it should be. If I am paying expense of hauling to railroad, so should all my competitors. If they devise a plan cheaper, well and good; but our carriers should not haul for nothing. To me it is a case of common honesty. I can not understand how men in this age can sit on the witness chair and tell a body of intelligent men that they are doing work for railroads when they do load a mixed car, even for a junction point; the railroad must haul it from their plant, anyway.

The lighterage is just arranged to help the big fellows. The freight-house service is bad because the railroads will not hire men. They cut down on the poor devil who gets 20 cents an hour and take one hour to do work I would do in 15 minutes.

There are all sorts of real estate speculators working on plans to duplicate the central manufacturing district, and if these things continue the commission will have 50 applications for universal station privileges in Chicago. Every warehouse on the railroad tracks is a source of extra expense to the railroad on trap cars. Full carloads for big industries taking carload rate is entitled to some different consideration.

Put all merchants on L. C. L. business on the same basis. Nothing else is honest.

Yours, very respectfully,

A SHIPPER.

Interstate Commerce Commission, Docket No. 5860. In the matter of the propriety of imposing a charge for spotting cars on the private sidetracks of industries.

The American Window Glass Co., upon receipt of the circular dated at Washington, March 5, 1914, desires to urge upon the honorable Interstate Commerce Commission the broad scope of the matter that is before them, and ask that they give the same most careful consideration, as it is believed by the said company that if the commission makes an order or ruling that will justify the all-rail carriers in publishing tariffs demanding payment for the spotting of all inbound and outbound cars, the result will be so disastrous that the commission will be compelled to retreat, and the further they pursue the matter, insisting that these charges be collected, the more they will be compelled to withdraw.

It has always been the understanding of this company, and we presume of all companies, that charges for all spotting or switching performed by the carriers was included in the rate. Never to our

knowledge was there any other understanding in existence, until brought to our attention by the inadequate notice of the hearing during February 27 and 28, 1914.

We wish to further call the commission's attention to the fact that when cars are placed on private sidings, these sidings are not patrolled by the carriers, but the responsibility instead is placed upon the shipper or the receiver, whereas if the material were unloaded or loaded from the sidetrack or station of a carrier, this responsibility would rest with the carrier. So far as we have been able to learn, your commission has not taken into consideration the cost of loading and unloading cars so placed. It will be realized that were all of this material hauled to the freight station, the carrier would be compelled to load the material, and this would mean an expense as great, if not greater, than could be offset by the 5 per cent increase, which is now before the commission.

Furthermore, the commission has not taken into consideration the fact that private sidings are maintained by the industry for whose use they were constructed, and in nearly every instance, so far as this company is concerned, the American Window Glass Co. has paid for the majority of the sidetracks now in their plants, and it has also devolved upon this company to pay for the maintenance of sidings located at our plants that are owned by the carriers.

Upon estimating conservatively, we find that we have on an average per day 28 inbound cars and 25 outbound cars, or approximately 53 cars per day, that would require spotting, and no matter what figure not to be exceeded would be named by the commission, it can be readily seen the amount paid during one year for the service of spotting cars would run into thousands of dollars. Especially would this be true if the figure were to be fixed at $2 per car, the regular switching charge, or 50 per cent of this figure.

Those who have been closely in touch with industries having private tracks find that the same are of very great benefit to the carrier, not only as a matter of convenience, but, as well, relief of certain responsibilities. As stated before, it has always been the understanding between carriers and shippers, so far as we know, that the service of spotting cars was included in the rate, and we are satisfied these were the views taken by the carriers; otherwise, it is hardly reasonable to suppose that they would solicit industries to locate along their lines and install these private sidetracks to their plants at cost if it would not be of convenience to them.

We, therefore, trust the honorable Interstate Commerce Commission will go over this matter with great care, as they surely realize the gravity of the situation, and, in the end, refrain from making any order or ruling that will permit carriers to file tariffs quoting assessments for the service of so-called spotting of cars on private sidetracks.

AMERICAN WINDOW GLASS CO.,
WM. T. LOWE,
General Freight Agent.

—

WASHINGTON, D. C., *March 12, 1914.*

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: The attached resolution was passed by the chamber of Huntington, W. Va., February 28, 1914. Supplementing this resolution, we beg leave to state that the proposed charge of $2.50 per car for spotting cars for loading or unloading on private sidings would cost the shippers of Huntington approximately $5,350 per month. According to close estimate there are received at Huntington per month approximately 780 cars, and in the same period 1,360 cars forwarded that are handled to and from private sidings.

Inasmuch as a private siding, in a way, takes the place of like amount of trackage that would be required on public-delivery tracks owned by the railway company, and by placing cars on the private sidings relieves what would in a great many instances cause congestion on public-delivery tracks on account of lack of trackage facilities sufficient to take care of all the traffic were there no private sidings, it seems eminently unjust to impose a charge of $2.50 per car or any additional charge whatever upon the shipper having a private siding. It is our understanding that the freight rates include the terminal charges on inbound and outbound freight. In some cases, where railway yards are congested, the railway company frequently use private sidings for storage purposes, on account of lack of room on their own tracks to take care of the business promptly.

It is further our opinion that private sidings are a part of the terminal facilities of a railway company, as much so as public delivery tracks, and we therefore respectfully protest against any additional charge being assessed against shippers for spotting cars for the reasons stated.

Respectfully submitted.

HUNTINGTON CHAMBER OF COMMERCE,
Per C. S. SNOW, *Vice President.*

FEBRUARY 28, 1914.

To the honorable Commissioners of the Interstate Railway Commission, Washington, D. C.:

Responding to your circular of February 19, inviting an expression of opinion on the part of the shippers to the propriety of a charge by carriers for certain special services that are now performed by them without charge, in addition to the published rate, this chamber of commerce is already on record as favoring the application of the railroads for 5 per cent advance in the tariff rates, and is heartily so; but we desire, with equal emphasis, to enter our protest against the charge proposed to be made for placing cars for loading or unloading on sidings serving industries; in other words, "spotting cars."

The justice of our protest, we believe, rests upon the following facts:

Such sidetracks are for the most part located on ground owned or leased by the industries which they serve and not by the railroads, and in this way the trackage room and facilities of railroads are materially increased, the mileage of such tracks in almost all cities being far in excess of the regular sidetracks owned by the companies, and without them it would be impossible to handle terminal business. In many cases such sidetracks have been put in at the expense of shippers, who have been reimbursed only in part by the railroads.

In the second place, from an efficiency standpoint, we do not believe that these private sidetracks impose any additional burden upon the railroads; but on the other hand, they do afford them actual relief, and that when cars are placed on such sidetracks it is the duty of the railroad to so place them that they may be handled by the shippers, the shipper, of course, to use all available space on such siding for the loading and unloading of cars.

We have two roads—the Chesapeake & Ohio, with 53 private sidings, and the Baltimore & Ohio, with 41 private sidings. The yard room on both roads is exceedingly limited, and private sidetracks is the only practical relief to shippers, and we protest against penalizing them for providing these additional facilities.

For the same reasons, we likewise protest against the proposed charge for trap-car service. As a matter of fact, the Chesapeake & Ohio road has in the past urged shippers here to use this service where it was practical to do so, as a means of relief at their depots or loading platform. As these two questions are the only ones which affect Huntington shippers materially, we make no comment on the other five.

Respectfully,

HUNTINGTON CHAMBER OF COMMERCE,
H. A. ZELLER, *President.*

—

Before the Interstate Commerce Commission. Revenue of rail carriers in official classification territory. Docket No. 5860. Rate increases in official classification territory. I. & S. Docket No. 333. Protest of International Harvester Corporation to proposed advance in freight rates on export agricultural implements, as included in the official classification.

THE INTERSTATE COMMERCE COMMISSION:

Now comes the International Harvester Corporation, a corporation engaged in the manufacture and shipment for export of agricultural implements (as included in the official classification), and with agencies for the distribution and sale thereof located and established at numerous points in foreign countries, and protests against the proposed increase in the rates for the transportation of said freight from points within the United States to ports of transshipment, as set forth and contained in the tariffs of the several railroad companies, respondents in the above-entitled proceedings, and the participating and concurring carriers therein, which said tariffs were duly filed with this commission, effective November 15, 1913, but by order of the commission, in I. & S. Docket No. 333, were suspended until March 12, 1914, and thereafter for a further period of six months, pending a hearing by this commission concerning the propriety of said rates, to which said tariffs on file with this commission reference is hereby expressly made.

And the International Harvester Corporation avers that the said rates, which the respondent carriers propose to establish by said tariffs, are unjust and unreasonable, and are increases over the rates which were in effect at the time of the publication of the said tariffs; and, as its reasons for its said objection and protest to the proposed increases in said rates, as set forth in said tariffs, it respectfully represents:

(1) That the export traffic of said respondent carriers, when handled in such quantities as in the case of agricultural implements aforesaid, is a very desirable and remunerative traffic for said carriers. It moves in solid volume, and the loading of implements for export per car is materially heavier than the loading for domestic shipments. The average load for export is 35,000 pounds, as against an average of about 25,000 pounds for domestic. This has increased the earnings per car mile on export shipments of implements very materially. While the rate on domestic shipments of implements, Chicago to New York, is 30 cents per hundred and 25 cents per hundred on export (with a like differential to other Atlantic ports), yet the revenue from the export shipments considerably exceeds that from domestic, as the export cars load over one-third heavier than domestic and produce one-fifth more revenue per car than do the domestic shipments.

(2) Export shipments on implements during the period in which they move, from December to May in each year, are offered to the carriers in such volume as to enable them in many instances to move in trainload lots of from 25 to 40 cars per train, or to complete light train loadings with this tonnage, thereby reducing train-mile expense and increasing train-mile earnings.

(3) The revenue per net ton-mile on this traffic will run about 5.5 mills, as against from 3.8 to 4.6 mills on many other commodities shipped for export for equal or less distances; and the net car-mile revenue on said traffic will run from 9 cents to 14 cents, as against from 6 cents to 9 cents on many other commodities.

(4) Owing to the hazards of steamship transportation and delivery in foreign countries, it is necessary to completely box or crate these goods for export. On an average this crating amounts to 26 per cent of the total weight of the shipment, and on the basis of the export rate this percentage of increase in the charges is being paid primarily for the protection of the freight while beyond the borders of the United States, but incidentally is a material protection in the movement of the freight by rail to the seaboard.

(5) The hazard of the rail transportation from inland factories to seaboard is exceedingly small, and for the year 1913 the loss and damage claims of this company did not exceed one-fifth of 1 per cent of the total revenues of the carriers on said traffic.

(6) In addition to the foregoing transportation reasons against the proposed increase in the rates on agricultural implements for export there are many commercial and trade reasons why said rate should not be increased, affecting a sound public policy which should be considered by this commission. By the development of this export traffic it has been possible for the factories engaged in the manufacture of agricultural implements—and the articles enumerated thereunder in the official classification—to run at capacity throughout the year, thereby giving employment to thousands of American mechanics during periods of the year when otherwise these factories would be closed down or running light, and these men without employment. In promoting its said business in foreign fields this company is engaged in sharp competition with foreign manufacturers of similar goods. For example, there are in Great Britain at least 50 manufacturers of such goods, in Germany at least 25, and in France about 12. This competition the company is obliged to meet in order to market its products abroad, despite the additional expense involved in transporting its goods to foreign markets, which constitutes a great added burden in the cost of selling its goods abroad, and at present rates the price of these goods to the foreign consumer exceeds the price to the American farmer. In addition to this

expense, preliminary to the delivery of the goods at foreign destinations, there are in many instances landing charges, such as at Liverpool, for example, a lighterage charge of 55 cents per 2,240 pounds; in addition to this there are heavy import duties, as follows: On harvester machines, France, $1.05 on net weight; Germany, 43 cents on gross weight; on mowers, Russia, $1.08 net weight; on binding twine, France and Germany, 88 cents, all per 100 pounds. These additional charges are a handicap which this company is compelled to carry in order to market its products in the foreign markets, and any material increase in the rates for the general transportation of these products from the inland factories in the United States to the seaboard serves only to increase this burden.

(7) On the basis of the amount of freight charges paid the railroads for this company's exports during the commercial year ending October 31, 1913., said proposed 5 per cent increase would amount to approximately $45,000.

In addition to the conclusive reasons above set forth herein why the proposed increase or any increase in the rates on agricultural implements for export should not be permitted by this commission to become effective, it is respectfully submitted that the present rates on said implements for export yield an adequate, satisfactory, and remunerative return to the carriers participating therein, and that the respondents herein have not shown, nor can they show, that any increase in this particular rate is justified or warranted by any of the facts or circumstances relied upon or advanced by them in their general case now pending before this commission; and, as a practical matter, it is respectfully submitted that the present proceeding, involving as it does the increase of all rates applying in a certain territory and based upon the respondents' plea for additional revenue to meet a general increased cost of operation, necessarily presents for the consideration of the commission entirely different issues from those upon which this objector, under the law, has a right to have the justification of this particular increased rate tried and determined.

Wherefore International Harvester Corporation prays that this commission will consider this complaint and protest against the proposed increased rates or any increase in the rates on agricultural implements for export, as set forth in the tariffs filed as aforesaid, and will enter an order herein commanding the respondents to continue in effect the said rates as the same existed immediately prior to the filing of said tariffs.

But should this commission, in its final determination of the issues in the present proceeding, fail to enter such an order, or should it permit said proposed increased rates or any increase in the rates on agicultural implements for export to go into effect, this objector hereby reserves the right hereafter to file its formal complaint against said proposed increased rates or any increase in said rates on agricultural implements for export, and in accordance with the provisions of section 15 of the act to regulate commerce, as amended, asks that in a hearing involving said increased rates on agricultural implements for export the burden of proof to show that the increased rates are just and reasonable shall be upon the carriers.

Dated at Chicago, Ill., the 11th day of March, A. D. 1914.

INTERNATIONAL HARVESTER CORPORATION,
By GEORGE A. RANNEY, *Secretary.*

EDGAR A. BANCROFT,
SAMUEL D. SNOW,
Counsel for objector,
606 South Michigan Avenue, Chicago, Ill.

—

WASHINGTON, D. C., *March 16, 1914.*

Hon. JAMES S. HARLAN,
Interstate Commerce Commissioner, Washington, D. C.

DEAR SIR: I inclose herewith the protest of the International Harvester Corporation to the proposed advance in freight rates on agricultural implements, and articles listed in the official classification thereunder, for export. Will you kindly see that this protest is made a part of the record in I. and S. docket No. 333, and oblige,

Very respectfully, yours,

SAMUEL D. SNOW,
Attorney for International Harvester Corporation,
Harvester Building, Chicago, Ill.

—

RICHMOND, VA., *March 16, 1914.*

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: We are informed that the Interstate Commerce Commission has under advisement the propriety of allowing the railroads to make an extra charge over and above the regular published rates for the following service, viz:

(1) For handling trap or ferry cars.

(2) For placing cars for loading or unloading on private sidings.

Feeling that an extra charge on the part of the carriers for services of this kind would be very unjust, we are taking the liberty of writing to enter a protest against such a charge being allowed by the commission.

For the purposes of this argument the shipping public can be divided into two classes—(1) those who have private sidings and (2) those who use the tracks and terminal facilities furnished by the railroads. In our opinion, an imposition of an extra charge against the shippers of the former class would be a gross discrimination as compared with those of the latter class. The former have invested a large amount of capital in railroad tracks and in land on which these tracks have been constructed, with the result that the railroads themselves have escaped the necessity of a correspondingly large investment of capital. It is nothing more than right and proper, therefore, that these sidetracks and facilities should be used by the railroads without extra charge, it being very much more economical to the carriers to switch cars to and from these private sidings than to purchase and furnish to the public the additional terminal facilities that would be necessary were it not for the existence of these private sidings.

We trust, therefore, it will be the pleasure of the commission to decide without hesitation that no extra charge of this kind should be made, except, possibly, in some few instances where the conditions are extraordinary.

Yours, very truly,

MONTAGUE MANUFACTURING CO.,
By C. E. HUGHES, *Secretary.*

MONARCH HYDRATED LIME,
Carey, Ohio, March 16, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: We wish to voice our protest against the proposition you are now considering of allowing railroads to make a switching charge of $2 per car for all cars spotted to private sidings for loading or unloading.

This is manifestly unfair to a manufacturing concern like this company that manufactures a low-priced, heavy commodity, for instance, crushed stone. The average selling price fo a carload of crushed stone is $20; your switching charge would be 10 per cent of the value of the product. The margin of profit is not large enough for the manufacturer to stand this loss himself, and therefore he must raise his selling price to his customer, which eventually throws the burden onto the ultimate consumer.

Our present freight rates to points to which we ship stone will average 40 cents per ton, or $16 per 40-ton car. An additional charge of $2 on this car would be equivalent to a raise of 12½ per cent in freight rate, and the railroads have asked for a raise of only 5 per cent.

Why should you refuse them a raise of 5 per cent on some commodities and then authorize them to collect a charge from us equivalent to a 12½ per cent raise on our commodity? This would be discrimination with a vengeance.

We think that after giving this matter due consideration you will decided that the plan proposed would be highly unfair.

Yours, very truly,

THE NATIONAL LIME & STONE CO.,
C. G. SPENCER, *Secretary-Treasurer.*

—

WELLS-ABBOTT-NIEMAN CO., MILLERS,
Schuyler, Nebr., March 16, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: The railroads are, we understand, asking permission of you to make a charge for spotting or switching cars to warehouses or mills for loading, and they make the claim that the transportation rate does not and never has included any compensation for such services, and that it has always been furnished free.

The stand taken by them, if they mean to apply this claim to all cases of switching, is erroneous, and it would be more to the point if the shipper were to demand that the carrier load the freight into his car and that the carrier cooper or put in good condition his car, many of which are not in good condition to carry the goods for which they are furnished.

Steamboat lines do not require the shipper to load or stow away the freight on board their vessel. The shipper has only to deliver it at the vessel's side. If his warehouse is on the dock the steamship company receives the goods there and loads it at its own expense, or if the warehouse is not on the dock the shipper delivers it alongside the vessel and the steamship company loads at its expense.

To make a charge for switching or spotting cars in ordinary cases would be as unreasonable as for a dray line to make a charge for running their trucks from the stable to the point where the goods are to be received in addition to the usual transportation charge.

Furthermore, there is another case where the transportation line—that is, the dray line—does the loading at its own expense, but in case of railroads the shipper does that as well as putting the cars in condition at the shipper's expense, so that the railroad company may have less to pay for goods damaged in transit.

Another reason why it would be unfair and unreasonable for the railroads to exact a charge for switching or spotting cars in ordinary conditions is that on these sidetracks is the only logical or possible place where the railroads might have their cars loaded. It would be out of the question to have it done on their main tracks, and therefore they are put onto sidetracks to be loaded, because the railroads could not conveniently conduct their business if the cars were loaded on the main track; and so they build sidetracks, and yet they propose to ask the shippers to pay them for taking the cars off of their main track and setting them onto the sidetracks. In short, they ask the shippers to pay the cost of a service which is for the convenience and necessity of the railroad companies, besides which they wish the shippers to continue repairing the railroad companies' cars at their own expense.

What we have said here is not intended to apply where an unusual or extensive or long switching service is rendered by the railroad company.

Sincerely,

WELLS-ABBOTT-NIEMAN CO.,
C. ABBOTT, *President.*

—

THE GLOBE SOAP CO.,
Cincinnati, Ohio, March 16, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: We are in receipt of your advice dated March 5, 1914, giving notice that written statements or briefs confined to the so-called "spotting service" will be accepted prior to March 24.

While the period between the hearings on February 12 to 14 and 27 did not afford us much time for preparation, still we did gather such data as we could and testified on March 2, giving all the facts at our command with regard to our situation and those of our neighbors at St. Bernard and Ivorydale.

We now desire, in addition to the facts stated in our testimony, to submit the following statement of our views in the premises, including our reasons therefor:

Counsel for the commission stated, in substance, in his introductory remarks at the hearing under dockets No. 5860 and No. 333 on February 12, that this free switching secured by a small number of large shippers, while a large number of small shippers have to pay drayage, constitutes a condition of discrimination against the large number of small shippers, and the commission refers to this switching in the Industrial Railways case, No. 4181, as a "gratuitous switching service."

We respectfully beg to submit that the spotting of cars on private tracks is not a free or gratuitous service and does not constitute a discrimination against the shipper or consignee who drays his freight. "Free and gratuitous" mean, quoting Webster, something "given without an equivalent or recompense," and perhaps the common definition would be "getting something for nothing."

As stated in our testimony, our factory is located in St. Bernard, a suburb of Cincinnati, and is situated, together with eight other firms, on a tract of land called the Ross estate, all of whom are served by a joint switching engine. The Ross estate consisted originally of a quarter section (163.33 acres); deducting for public easements for turnpikes and Miami & Erie Canal leaves net about 140 acres, and we desire at this time to ask permission to correct our previous testimony, in which we referred to this tract as about 75 acres.

We filed in our testimony a statement covering a period of nine days, showing the cost and time per car in switching and spotting at our plant, the total average time per car being 5 minutes 25 seconds, of which about two-thirds consists of sorting out the cars to be spotted from those to be weighed (for which weighing we pay an extra charge), the actual time consumed in spotting being about one-third of the average of 5 minutes 25 seconds. We now desire to give the commission the benefit of our records covering the interim from the first statement to date, and attach a statement, marked "Exhibit A," showing this information. This statement shows the average time per car since first statement of 5 minutes 9 seconds, and the average for the whole period from February 16 to March 14 of 5 minutes 14 seconds, an actual cost to the carriers of 30½ cents per car; but as the cuts of cars are broken up on our tracks and cars for the scale track or other points separated, work that is usually done in breaking up yards is being done on our tracks, because the N. & W. have no breaking-up yards of their own at Ivorydale or St. Bernard, the proportion of time of breaking up being conservatively estimated at two-thirds, leaving the real net time consumed in spotting 1 minute 45 seconds per car, or a cost of 10½ cents per car.

In return for the one and three-fourths minutes per car service mentioned above we render to the carriers what are in effect certain services in that they are saved the expense of providing certain facilities and of performing certain duties which they are required by law to do, and these facilities, if they could be reduced by some dollar-and-cents rule, save the carriers thousands where they spend hundreds of dollars in spotting. We mention a few, viz:

A car destined to a private track can and usually is placed on same upon arrival at destination. As a rule, such shippers are on a weekly credit list, and immediate delivery can be made, thus reducing per diem charges and releasing equipment quicker; again, many shippers reload what empties they make, saving switching and per diem and putting the car immediately back into service again. On the other hand, cars for team-track delivery are usually delayed for same cause; where there are several deliveries in a town it is often held for orders; when billing is delayed it must wait; in case of insufficient team-track facilities it must wait, and in cases of congestion it always does; and in all these cases it must be switched into a so-called "hold yard." But this is the easy part. Getting the car out is where the expense comes in. The writer has known cases in his railroad experience where 40 to 50 cars had to be switched to get out 1 or 2 cars. Then, again, there is the yard office work of checking these hold cars daily, keeping a record of them, and recarding them to the team track, to which should be added the risk of damage, theft, and fire, as the railroad underwrites all these when it keeps the car in its possession.

We relieve the carriers of the expense of furnishing reasonable and adequate facilities for the delivery and receipt of freight, which is one of their duties under the law, but the amount invested in private tracks is no criterion. To this should be added the price of valuable land, with space for teams between tracks, for the carriers would be required to buy land adjoining some street or public highway. Then, again, there would be the cost of keeping up the roadway between cars and salaries of additional delivery clerks and watchmen to police the yards.

In cases of cars unloaded on team tracks, the carriers are required to clean out the cars and often respot them before they can be loaded, while on private sidings this labor is performed by the shipper often without moving the car. On team tracks the yard clerk must seal and card the cars. We perform the service, furnishing our own seals.

In cases of blockades and congestions private tracks are literally a boon to the carriers. Our lead is a straight track and will hold 45 cars nicely. Time after time our business has been seriously delayed by one railroad appropriating our lead for storing cars. This is a common practice of carriers, here at least, four or five parties having mentioned similar cases recently. We gave a number of specific cases of this in our testimony.

The above are some of the services we render the carriers. The only return we receive is a switching service, costing in our case ——— per average car. Therefore we maintain that the service received is not a free or gratuitous one, as it is not given without equivalent or recompense. Our plant is an ordinary one, operated in the ordinary way, except, perhaps, for the joint engine, and is typical of many others here and elsewhere. The matter of joint switching in terminals is entirely in the hands of the carriers. Certainly the shippers should not be penalized if they elect to operate separately where unification of terminals is possible.

During the teamsters' strike in Cincinnati last summer and fall the private tracks saved Cincinnati from a famine. The strikers were ugly and many riots, with probable bloodshed and loss of life, were avoided by those private tracks by enabling the factories to continue operation, thus keeping thousands regularly employed and out of mischief, to say nothing of the privations their families would have suffered.

Counsel for the commission in cross-examination of witnesses at the recent hearing put to each one, with the exception of ourselves and one or two others, these two questions, in substance, viz:

First. Of what value is this service of spotting cars to your concern?

Second. If it should be decided that the railroads need more revenue, should such revenue be derived by a general increase of 5 per cent in all rates or by assessing a charge for spotting and similar services?

We desire to request the privilege of answering those questions now as the opportunity was not afforded us at the hearing.

First. The switching service of placing cars on our tracks is unquestionably of great value to us, so great we could not get along without it or the railroads and do a business of any magnitude. A tank car of soap stock en route from El Paso, Tex., would be switched approximately one-half of a mile on our tracks before placing, and the exact value of this service to us is exactly the same as the transportation service over any other particular half mile you may choose to select out of the 2,000-odd miles between El Paso, Tex., and St. Bernard, Ohio, and not one cent more or less.

Permit us to explain the basis for our statement above. Commercial customs practically prohibit the purchase of the bulk of our raw materials, such as cottonseed products, tallow, greases, etc., except in tank cars. A carrier is required by law to place a car somewhere where it will be possible for the consignee to unload it, and as the carriers do not provide facilities (i. e., pipe connections and live steam) on any public team tracks we are compelled to furnish such facilities at our expense, and it is primarily for this reason that all soap and candle factories, oil refineries, and other industries receiving or shipping material in tank cars are literally compelled to construct and maintain private tracks. As to whether it would be cheaper to dray such portion of our traffic as could be handled on a team track or to pay a spotting charge is an unanswerable question, for the simple reason there are no team tracks. Of the five railroads reaching St. Bernard and Ivorydale there are only approximately 40 car lengths of team tracks, which would only hold one day's business of any one of many shippers in that vicinity. We are, therefore, again compelled to provide these facilities for the carriers.

We contend that shippers may lawfully reap the benefit of any investment they may be able to make, even if smaller shippers can not afford or do not elect to do so, and that the value of such facilities purchased are of no concern to the carriers, to their competitors, or, in fact, to any one. The act to regulate commerce does not provide that rates shall be based upon their relative value to any shipper or group of shippers, if it did the whole structure of rates in the United States would have to be reconstructed to-morrow.

We respectfully beg to submit that the question of the relative value of these services may not be consistently investigated or considered by the commission in connection with this case, which is, as we understand it, an investigation to determine the amount (i. e., cost of service) that the carriers are supposed to be wasting in furnishing "free or gratuitous services" to a small number of large shippers; this question having risen in connection with their request for a 5 per cent increase, and the commission, and very properly so, desires light on the question as to whether they are properly conserving all of their present enormous income. In this particular instance, however, we contend that you have touched a situation that proves to be a great saving to the carriers instead of an expense, and instead of being a discrimination to the large number of small shippers is quite the reverse; in fact, an advantage to them.

As to the second question. We can not quite stretch our imagination to a point necessary to seriously consider the necessity of increasing the present income of the carriers by a general increase in freight rates, and while in our own particular case a nominal spotting charge or the actual cost might be cheaper for us, such a course would put the burden entirely upon the shoulders of "a small number of large shippers," who have already saved the carriers millions of dollars by the facilities they furnish; and such a course, we contend, would be a grave injustice and discrimination, devoid of all equity, and in effect would penalize the shippers who have assisted the carriers.

Private sidings constitute no discrimination against small shippers, as terminals would be badly congested if such provision was not made to take care of large industries; and as to the expense, the testimony in your hearings has tended to show that the cost of placing cars on team tracks was greater than on private tracks.

A charge for spotting would bring revenue only to the large roads, while the smaller ones, which it is claimed are particularly in need of money, would derive no revenue from this source. It is also problematical how much revenue would be derived in this way. If some shippers elected to furnish their own motive power there would be no revenue, and would not such a condition tend to create another discrimination against shippers who had to pay a spotting charge?

The rates for the transportation of freight have always been understood to cover the entire transportation service, and the cost of spotting, whether on private or railroad owned tracks or on public team tracks, should be treated as any other terminal charge and be deducted before prorating or absorbed. The private tracks are not a new institution. They were in existence before most of the present rates were established, and the present rates were made with due consideration to the cost of all terminal expenses, of which this service is only a small part.

In conclusion, we submit that a charge for spotting should not be made, nor should the spotting service be eliminated. If any of the present rates are not remunerative enough to cover all terminal expenses, including the spotting, then such rates should be increased; but even then the increase should be made only after a full and proper investigation of the facts and conditions surrounding each case, and not by a general horizontal increase that would only further complicate any inequalities that exist to-day.

We respectfully beg to suggest, in addition to our own views stated above, that our shippers of raw material and our customers, located in southern and western territory, are equally interested in this matter, for your decision must inevitably apply to the whole country, and as such territories have not had an opportunity to be heard at all, and many shippers in official classification territory have not had sufficient time to properly present their cases, we petition your honorable commission not to decide this great question upon the totally inadequate hearings that have been granted, and finally concluding this matter only after a full hearing, with due and adequate notice to all shippers in all territories.

Yours, very truly,

THE GLOBE SOAP CO.,

NOTE.—Time consumed in weighing cars is deducted because a separate charge is made for this service.
General average time of 241 cars switched, 5 minutes 25 seconds per car, at $3.50 per hour, equals 31½ cents per car.
General average time of 423 cars switched, 5 minutes 9 seconds per car, at $3.50 per hour, equals 30 cents per car.
General average time of switching 664 cars, Feb. 16 to Mar. 14, inclusive, 5 minutes 14 seconds per car, at $3.50 per hour, equals 30½ cents per car.

MARQUETTE CEMENT MANUFACTURING CO.,
Chicago, March 4, 1914.

Hon. LOUIS FITZHENRY,
House of Representatives, Washington, D. C.

DEAR SIR: The Interstate Commerce Commission, in connection with their investigation of the Advanced Rate Case, where the eastern railroads are asking for a 5 per cent advance in freight rates, has developed the idea that the railroads can not place cars to industrial sidings for loading or unloading by industrial concerns without making a charge over and above the published rate, which heretofore has covered this service.

In giving consideration to this opinion expressed by the commission, some of the railroads have already begun publishing tariffs making a charge of 7½ cents per ton, with a minimum of $2 per car over and above the rate for public delivery. The present rates published by the the railroads have included the service of placing cars to industrial tracks at point of origin as well as destination. This is a practice that has been in effect for a long time and has always been considered proper, because undoubtedly the carriers in making their rates have included in the rate the cost of placing cars to industrial tracks.

All industries, as well as the railroads, in recent years have had to submit to an increase in the cost of equipment, materials, and labor. The railroads have not been permitted in many instances to advance their rates proportionately, but this suggestion of the commission seems discriminatory in that the burden will fall upon the industries, who are a great deal less in number than the general public, who will be affected by a general advance in all rates of 5 per cent.

It is a question if the shipper and the receiver can stand an increase of the character proposed. Both the shipper and receiver are affected, if they happen to have a siding. In the aggregate, the burden on the industrials will be greater than the 5 per cent advance asked for by the carriers. As an example, if a 50-ton car is shipped from one industry to another industry, and giving the carrier a return of $30 per car under present rates, the increase under the new plan would amount to 25 per cent. The switching charge at point of origin at 7½ cents per ton figures $3.75. The same charge would apply at destination, making a total increase on this shipment of $7.50, which is a 25 per cent increase over the present rate.

We feel that if the carriers can show the necessity of advancing their rates, the advance should be general, applying to one and all alike, and that the industries of this country should not be further discriminated against by the imposition of these additional switching charges, which will disturb conditions to an extent perhaps not thought of.

We earnestly urge that you oppose this plan, and your action in doing so will protect the industries of your State, as well as those of other States. You understand if the rates are advanced generally 5 per cent, the industries pay this advance the same as others, which seems to us to be the only equitable plan of advancing freight rates.

Thanking you kindly in advance for your consideration, we beg to remain.

Respectfully, yours,

GEO. WILLIAMS,
Sales Manager.

—

THE C. F. SAUER CO.,
Richmond, Va., March 16, 1914.

The INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: Referring to the railroad companies in the above petition, we are opposed to any arbitrary move taken by the railroad companies regarding private sidings, and we believe, further, that taking the city of Richmond, if the railroad companies were to close the private sidings owned by the various manufacturers of the city of Richmond, which cost these manufacturers considerable money to keep up, maintain, and pay taxes on, these same railroads would have to invest several million dollars of their own to handle the business in the city of Richmond.

We believe, further, that this same condition prevails practically in every city in the United States, and we think that any arbitrary charge for services of these tracks would cost the railroads considerably more money in the long run than it is now costing them.

We do not like to tell the Interstate Commerce Commission what is the trouble with the railroads. We believe that the gentlemen handling the railroads know their business, but this increased capital is growing faster than the country; and if they now want to add more terminals by forcing the disuse of private terminals, it will cost them considerable more capital, and later they will want more freight rates than we now have to pay, and we are opposed to it.

We have, at considerable expense, put in our tracks with the expectation of reaping the benefit of it, and we do not feel that the railroad companies have any right to confiscate or make these tracks useless or expensive to us at this date.

Yours, very truly,

THE C. F. SAUER CO.

THE CHARLES BOLDT CO.,
Cincinnati, Ohio, March 16, 1914.

Mr. GEORGE B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: We wish to place before the Interstate Commerce Commission our protest of their final action at this time in the so-called free service being extended shippers having private siding. We feel that further and more full hearing should be given this matter, for our own investigation has shown us that the transportation lines are put to a far greater expense in maintenance of team tracks than is involved in private siding. A private siding is usually the property of the shipper who employs it, and no burden is placed upon the transportation line for its maintenance.

Furthermore to assess a terminal charge over and above the rate haul will tear down the structure upon which the great American shipping has been built, and would create chaos for a long time to come, and would probably result in loss of desirable territory to certain shippers.

The present arrangement is an equitable one, the terminal charges being included in the rate haul, and this feature is still recognized by transportation companies in adjusting rates, we knowing this from recent experience we had in our efforts to secure adjustment of rates applying between local points on the line in question, we calling to their attention the difference in their local rates and their portion of the through rate, and they stating that the difference was to cover the terminal charges at the originating and delivering points. Furthermore, there is no rule by which a just terminal charge could be provided for.

In looking into what would be a proper terminal charge at this point, at our plant we have found that the actual "spotting charge" of cars averages 10 cents per car; that the average charge of drilling and classifying cars for convenient placing averages from 10 cents to 14 cents per car; a total charge of drilling, classifying, and "spotting" was in no instance greater than 24 cents per car. A like service for our neighbor might entail a greater or less charge, and for either one of us to bear the burden of the other would be absolutely unfair.

The only way to increase the earnings of the transportation lines is an equitable adjustment of the rates.

Yours, truly,

THE CHARLES BOLDT CO.,
L. L. SHINOS, *Traffic Manager.*

—

THE JOBBERS & MERCHANTS' ASSOCIATION,
Springfield, Mo., March 16, 1914.

Hon. G. B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: I hand you herewith copy of resolution adopted by this association in regard to investigation by the commission of the practices of carriers in regard to spotting cars, trap-and-ferry-car service, reconsignment, diversion, etc.

I wish to most earnestly protest against the commission taking any hasty action in regard to this matter, as it is one of grave importance as to demand the most careful consideration at the hands of the commission before any action is taken, which, in my estimation, would revolutionize the shipping and transportation conditions of the entire country.

Transportation has been conducted under the rules and practices of the carriers now in effect for a great many years, and to make such sweeping changes as contemplated would be disastrous to the shipping public in the extreme. Many of the facilities used by the carriers have been provided by the shippers at their expense, and if the carriers are to be permitted to make an additional charge for such services it would result in confiscation of the property of the individual to the carrier and would mean that owners of privately constructed tracks and other facilities would be forced to permit the carriers to use their property and pay them for doing so. This would mean confiscation of property without due process of law.

To change conditions and practices which have been in effect for years at a moment's notice, and which said charges are now and always have been included in the transportation charge, would demoralize transportation conditions as they effect the shippers and consignee.

I most respectfully urge that the commission give the full consideration to this matter to which it is entitled by reason of its importance and that no hasty action be taken, and that a thorough and comprehensive investigation of all the features involved in these practices be made by the commission before action of any kind is taken.

Very respectfully,

S. C. BATES, *Traffic Manager.*

Resolution.

Be it resolved, That our traffic manager be, and is hereby, authorized and directed to protest to the Interstate Commerce Commission against the conclusion of the investigation of the practices of carriers in spotting cars for loading and unloading, trap-and-ferry-car service, diversions, and reconsignments until a complete investigation by the commission has been made.

Be it further resolved, That charges for such service are now and always have been included in the transportation charge, and to change these conditions would revolutionize transportation to the disadvantage and detriment of the shipper and consignee. In many instances the facilities have been provided by the individual and relieve the carrier of congested terminals and greatly facilitate the handling of their business.

To make the charges contemplated would mean confiscation of the property of the individual without due process of law by reason of their being deprived of the uses and advantages of facilities made and provided at their expense, which, under the proposed plan of charging for spotting cars, would be used by the carriers and the shipper and consignee forced to pay to the carrier a charge for using their own property.

Be it further resolved, That we believe it to be to the best interests of the carriers and the shipping public alike that no hasty action be taken in this matter and that a complete and thorough investigation of the practices involved be made and that all interested parties be given an opportunity to be heard in the matter.

The above and foregoing resolution was adopted at a meeting of the Jobbers & Merchants' Association held on Monday, March 16, 1914.

Attest:

ARCH MCGREGOR, *President.*
S. C. BATES, *Secretary.*

CLEVELAND DIAMOND FIRE BRICK WORKS,
Cleveland, Ohio, March 16, 1914.

Hon. E. E. CLARK,
Chairman Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: Referring to the question of charges for spotting cars on private sidings, we wish to register a most respectful but vigorous protect, as in considering our industry it would be both unjust and discriminatory, as it would eventually bring about a segregation of the refractory interests to points where all materials entering into the manufacture of our products could be obtained at one place, thereby depriving the carriers of a valuable source of revenue and working an inestimable hardship on those not so situated.

There are a large number of the plants in our industry that are situated at the base of their supplies, but on the other hand, a very large proportion, as in our case, assemble their materials at a given point, for one reason or another, and it would prove a great hardship to them.

Two-thirds of the aggregate tonnage in and out of plants which assemble their materials, consists of incoming supplies, which revenue would to a large extent be eventually lost to the carriers.

The services performed by the carriers in placing cars on private sidings is of the simplest nature, and the cost no greater than placing on a public team track or other general loading places, and represents the most economical method of handling large tonnages, and we can not see where there would be any discrimination claimed by so doing.

Respectfully, yours,

KNAUFF & ESTERBROOK,
C. C. ESTERBROOK.

—

TENNANT & HOYT CO.,
Lake City, Minn., March 16, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: We are advised that you are making a special investigation for determining whether switching, placing, or delivering cars for loading and unloading on industry tracks, privately owned or railroad owned is a special service, and one for which the carrier should make a charge additionally to the regular freight rate, as the term transportation should include only the road haul and the service to and from public team tracks, and to and from public freight depots. It is our opinion that transportation includes all the railroad service and track facilities devoted to hauling the freight traffic, and the public freight charges has included compensation for their services.

We hope that no definite action is taken on this subject until a full hearing has been given as this is a big question and would effect all parts of the country, and should be given very careful thought before any decided action is taken.

Yours, very truly,

TENNANT & HOYT CO.,
By R. A. HOYT, *Vice President.*

—

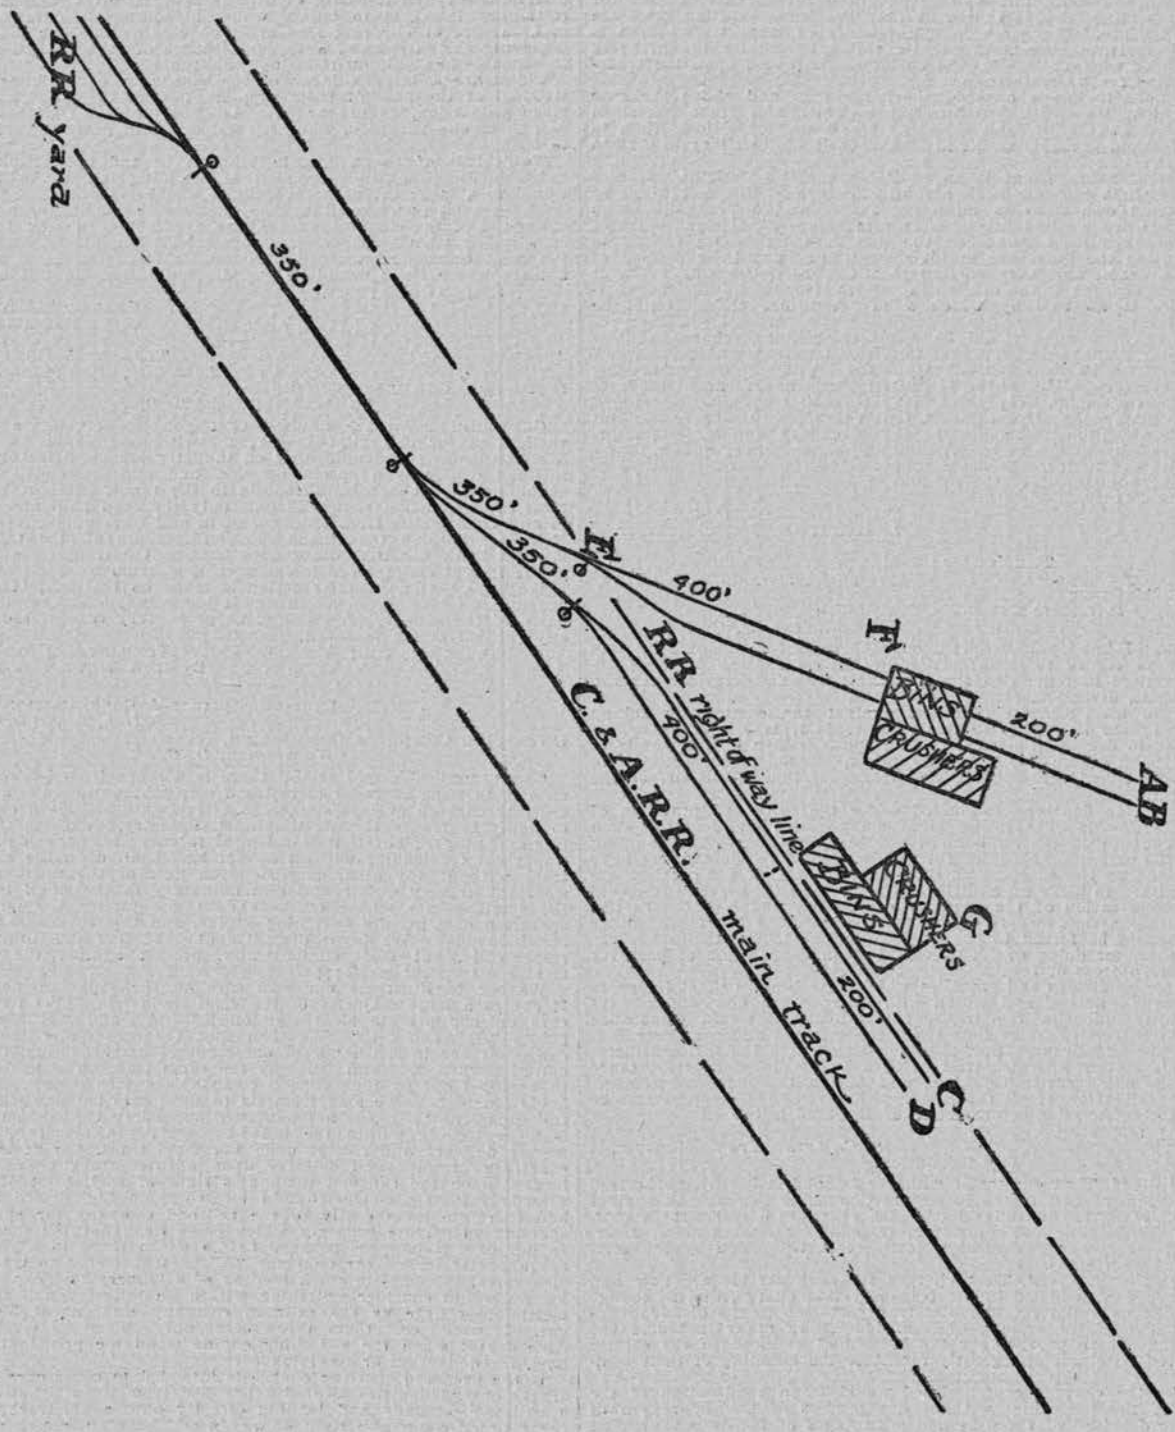
RELIANCE QUARRY & CONSTRUCTION CO.,
Alton, Ill., March 10, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: We understand there is a proposition before your commission to issue an order to railroad corporations to make a charge for spotting cars on private sidetracks. If the proposed order is intended to apply to free switching within an industry, we think it eminently fair and proper; but if it is intended to cover the mere delivery of an empty car for loading and its receipt loaded all upon the same private track without any other movement on part of the railroad company, we think it very unfair and discriminatory to the small industry, all the small plants whose business does not justify the purchase and operation of a private switching engine, and this covers 95 per cent of our industries. We favor discontinuance of free switching; we most respectfully, but most emphatically, protest against the issue of a rigid spotting charge for private sidetracks.

We beg to illustrate our own case on the sketch attached hereto. It covers a large majority of the small industries. We receive empty cars on our private sidetracks marked "A" and "B" between the points "E" and "F." We then spot the cars under the bins with car-mover bar in the hands of our loader. After loading, the cars are moved toward "A" and "B" by the same man. The loaded cars are then pulled out by the railroad company's switch engine. Each track holds four cars. We load from six to eight cars per day when running full capacity, which has not happened once since the last panic. There is no switching within the industry, barring a few rare exceptions, merely delivery and receipt upon the same track, the same movement exactly as receipt and delivery upon a team track or any sidetrack located upon the railroad company's right of way, most of which are already intensely congested and located upon high-priced real estate, and therefore more costly to the railroad company for spotting than spotting on private property which costs them nothing for occupancy. In our case it happens perhaps half a dozen times in a year that we ask a partly loaded car on track "A" be transferred to track "B," or vice versa, to complete quick loading of a "hurry-up" car. This service we would consider switching within an industry and subject to a legitimate charge by the railroad company—say, about 50 cents per car. It would cost them a few cents only; the work would never be done except when the switching engine is on the private tracks, anyhow, for delivering or receiving cars.

If the proposed spotting charge is intended to cover cars for private tracks only, industries located a few feet from the right-of-way line of a railroad company and loading directly onto a sidetrack located on the railroad company's right of way would have an immense advantage over other industries located a little farther away. It would amount to a fine private monopoly for the first-named industries, but it would cost the railroad company just as much to do their spotting as it would to do it for industries located like ours. In our case we could circumvent such a rule by relocating the plant at "G," but the cost of spotting would be exactly the same as now; there would be no difference in distance from the main track, or number of movements, to the present location or to such a new one, but the cost to us of such a relocation would be prohibitive and we would be obliged to abandon the industry unless we could unload the proposed private-track spotting charge onto the consumer.



In considering this matter the value of the load should not be overlooked. A straight spotting charge per ton for a carload of leather—worth about $10,000 per carload—and moving from the private track

of a tannery about once a week could carry the charge in the sales price without injury; but four to eight carloads crushed stone per day—worth about $20 per car—could not bear the charge without destroying the industry. At 5 cents per ton, such a charge would be 10 per cent of the gross value of the carload of crushed stone and only one-fiftieth of 1 per cent of the gross value of the leather.

After you have given this matter due consideration, we trust that you will see the justice of our plea, and most respectfully request that you do not establish a spotting charge on cars for private sidetracks located upon grounds adjacent to a railroad right of way if the movements involved are covered by the delivery of an empty car for loading and its receipt loaded, or vice versa, upon the same private sidetrack.

Very respectfully, yours,

RELIANCE QUARRY & CONSTRUCTION CO.,
E. A. HERMANN, *President.*

GEO. S. GOOD FIRE BRICK CO.,
Patton, Pa., March 10, 1914.

HON. E. E. CLARK,
Chairman Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: The proposed charge for spotting cars on private sidings is to our mind most unjust and discriminatory.

In our case we have at our small plant, with a capacity of only 40,000 bricks per day, constructed sidings, the aggregate length of which is nearly 4,000 feet, at a cost of approximately $20,000, and these sidings relieve the railroad company of an expenditure of something approaching the cost to us, so that they might handle the freight that we can offer them on the same basis as they would handle it for the general public.

In other words, if we did not construct our private sidings, we take it that the railroad companies would be obliged to do so in order to handle the freight that we would offer them, and it is no more work from any point of view for the railroads to place the cars on our sidings than it would be to place a car for any other shipper on the public sidings at or near the same point.

Quite the contrary in making a charge for this situation, it has always appeared to us that we were being discriminated against, for the reason that we were obliged to build and maintain our own side tracks for shipping and receiving our freight, whilst the general public had side tracks constructed by the railroads on which to receive and ship their commodities.

There is no additional work required on our siding, other than putting in empties and taking out loads, or vice versa, and in a very great many instances when a loaded car is placed on our siding it is not touched by the railroad people until it is taken out loaded with goods of our manufacture.

The interest charge alone on the cost of our sidings will equal $1.50 per car, and when the maintenance and depreciation are added to this

it makes at least a cost of $2 per car to us to keep these sidings into our property, the greater part of which charge would fall upon the railroads if we handed our freight to them as the general public does.

We fail to see a single argument in favor of allowing the railroads to charge for placing cars on private sidings under conditions such as we have, and we believe that this is typical of the very large majority of small manufacturers throughout the country.

Yours, very truly,

GEORGE S. GOOD FIRE BRICK CO.,
GEO. E. PRINDILLE, *General Manager.*

—

FRANK B. POPE, FIRE BRICK AND CLAY,
Pittsburgh, Pa., March 10, 1914.

Hon. E. E. CLARK,
Chairman Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: The undersigned, Frank B. Pope, operating as the Sligo Fire Brick Co., at Sligo, Pa., and as the Mayport Clay Co., at New Mayville, Pa., produces at the latter point raw fire clay shipped to and used at his Sligo, Pa., works in the manufacture of fire brick.

The two points above mentioned are located on the lines of the Pennsylvania Railroad; the two sidings are the property of the railroad company, and in conjunction with service to the writer are used for the accommodation of local traffic. The service to us consists in the placing of cars for loading and unloading only, such work being done at the convenience of the railroad and at such time as regular shifting crews are performing the same work for accommodation of said local traffic.

The enforcement of this spotting charge would mean to us that same would have to be paid three times before our finished product is disposed of; that is, in the loading of raw material at New Mayville, unloading of same at Sligo, and reloading of finished product at Sligo. In dollars and cents it would mean 87 cents per thousand brick, and to our natural Pittsburgh market, with present freight rate of $3.50 per thousand brick, the increased freight would be 40.3 per cent.

We believe such a charge to be unjust and discriminatory, and herewith protest against same.

All of which is respectfully submitted.

Yours, very truly,

FRANK B. POPE.

—

PENNSYLVANIA FIRE BRICK CO.,
Beech Creek, Pa., March 10, 1914.

Hon. E. E. CLARK,
Chairman Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: In reference to proposed spotting charges per Interstate Commerce Commission Docket 5860, I. & S. Docket 333, we submit the following information concerning our operation which, in our opinion, shows it would be unjust and discriminating to make any charge for spotting cars on our siding or spur tracks:

Our plant is located at Beech Creek, Clinton County, Pa., and our mines at Forge Run, Pa. Siding at the mines is 200 feet long, and the aggregate length of those at plant is 2,765 feet. No motive power owned by our company is used on these sidings, and, furthermore, said sidings were paid for by us. We are compelled to pay demurrage, and any extra service performed on these sidings by the railroad company is charged to us. The only service performed without extra charge is placing cars in position to be loaded or unloaded, and taking out the daily shipments.

The cost of this service is no greater than the cost of the same service formed for the general public in the spotting of cars for loading or unloading freight at team tracks or other central loading stations.

The average number of loaded cars in and out per month at our plant is 225, and the proposed spotting charge would increase our costs approximately $12,000 or $15,000 annually. Any charge of such a nature is unjust. No other method is as economical for the railroad for handling large tonnage quickly, and besides, the service on these sidings being of the simplest kind, the time of shifting and the details of the service given are entirely at the convenience of the railroad. Further, it is a decided discrimination between conditions surrounding our operation and those who are so situated that their raw material enters plant without being compelled to resort to the use of a common carrier.

If the railroads can give the general public their necessary requirements without adding a spotting charge for said service, there certainly can not be any sane reason for the railroads to make an unjust and discriminatory charge against industrial plants as proposed, and we respectfully request that same be not allowed.

We desire to be placed on record as protesting against this unjust charge.

Very truly, yours,

PENNSYLVANIA FIRE BRICK CO.,
J. P. WYNN, *General Manager.*

—

SHARON FIRE BRICK CO.,
Sharon, Pa., March 10, 1914.

Hon. E. E. CLARK,
Chairman Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: Sharon Fire Brick Co., Sharon, Pa., has in official-classification territory three sidings. These sidings are ordinary spur tracks used for unloading inbound material and loading outbound crude and manufactured products—lengths as follows: One 2,000 feet long, but is used by railroad company as storage track also; one 500 feet long, and one 800 feet long.

The Sharon Fire Brick Co. does not use any motive power of its own on these sidings, demurrage is paid, and any extra switching is charged to us. The railroad company merely places the cars in position for loading and unloading.

We think that it would be unjust and very unfair to make charges for spotting cars on these tracks. As we ship in all our raw material, we would have to pay two charges, first, for loading at our clay mine or tipple, and then for unloading the same material, without counting another charge for the finished material. You can see what a large item this would be to this company. If the charge were 7½ cents per ton, it would cost us extra, over and above what it costs us now, 22½ cents per ton; and, also, it takes much more than a ton of raw material to make a ton of finished material. It would be such a burden to us that I doubt whether we could remain in business or not; in fact, it is a very serious doubt in my mind.

The cost to the railroads for the services performed on these sidings is no greater than the cost of the services performed for the general public in the spotting of cars for loading or unloading freight at team tracks or other central loading places.

We have gone to large expense to put in these spur sidings, and then to have the railroads charge us extra for loading and unloading material seems to us very unfair.

Very respectfully, yours,

SHARON FIRE BRICK CO.,
W. G. ROSE, *Secretary.*

—

ELK FIRE BRICK CO.,
St. Marys, Pa., March 10, 1914.

Hon. E. E. CLARK,
Chairman Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: The Elk Fire Brick Co., with its general offices in St. Marys, Pa., has in official classification territory two spur sidings, one at St. Marys, Pa., and the other at Daguscahonda, Elk County, Pa.

Length and location: The one at St. Marys, Pa., is 3,000 feet in length, and the greatest distance any part of same is from main tracks of Pennsylvania Railroad Co. is 100 feet; the one at Daguscahonda, Pa., is 2,000 feet in length, and the greatest distance any part of same is from main tracks of Pennsylvania Railroad is 150 feet. The total length of these two sidings aggregates 5,000 feet.

Purpose: These are equipped by us for the convenience of the Pennsylvania Railroad Co. to deliver shipments to us of coal, sand, lumber, clay, and other raw materials for unloading, and for their further convenience to place empty cars for us to load our material, which we offer them for transportation.

Construction: (a) These sidings are constructed on our own property and strictly in accordance with the specifications of the Pennsylvania Railroad Co. We, however, at our own expense, graded and surfaced same, furnished all the material for construction, such as ties, rails, bolts, splices, etc., and we further paid the Pennsylvania Railroad Co. for all labor they expended in placing this material and preparing the siding for operation.

(b) The cost of these sidings represent an investment to us of $10,000.

Maintenance: (a) We furnished all material and labor for the proper maintenance of these sidings and are held responsible for such maintenance by the Pennsylvania Railroad Co.

(b) We maintain these at our own expense, the annual cost of which is $500, on an average.

Operation: On these sidings no motive power owned by the company is used, but the switching engines of the Pennsylvania Railroad Co. enter these sidings once each working day, pull the loaded cars, and refill the siding with empty cars, but very seldom "spot" them at the actual point where loading is done, as these sidings are built on gravity, so cars can be moved by our own men.

Demurrage and extra service: We pay demurrage on the average agreement plan where such occurs to cars on our sidings, and we pay extra for the moving of a car from one part of the siding to the other, or for any extra service performed by the railroads.

Results: Therefore it is evident that our construction and maintenance of these sidings save the Pennsylvania Railroad Co. by the use of our sidings annually as follows:

Interest on investment	$600
Maintenance	500
Depreciation	1,000
Total	2,100

This represents over 4 cents per net ton on our shipments of 50,000 tons per annum, which is the average for the past three years.

We respectfully submit that the item above mentioned would be an additional burden on the Pennsylvania Railroad Co. if public sidings were used to handle the same shipments. In that case the transportation company would be obliged to stand the entire expense without any additional revenue.

The cost to the railroad of the services performed is no greater than the cost of the services performed for the general public in the spotting of cars for loading or unloading freight at team tracks or other central loading places.

Our situation is typical of the clay-product industries of the United States, which industries, according to statistics of the United States Government, shipped 47,000,000 tons of freight by rail in 1912.

We consider it would be unjust and discriminatory to make any charge for spotting cars on our spur tracks, in view of the facts stated above. In fact, we feel that if any difference is to be made we feel that we should be paid for the saving these sidings effect to the transportation companies.

These spur tracks represent the most economical method that can be devised for handling the large tonnage of freight that the railroads secure in this way; the service on these sidings is of the simplest kind. The time of the shifting or handling is in the hands of the railroads in the vast majority of cases, and the details of the services are entirely at the convenience of the railroads.

If the railroads are, therefore, performing the services that are necessary to handle their traffic in the most economical way possible by means of these spur tracks, and they are also giving the general public their necessary requirements in the most economical way, there certainly can not be any depletion of the railroads' revenues, nor can there be any discrimination claimed.

We are prepared to furnish such other data as you may request, but we wish to go on record as saying we feel that such charges would be unfair to us and discriminatory. We receive and dispatch from these sidings approximately 3,000 cars per annum, and the net revenue accruing to the railroads from this traffic is between $100,000 and $125,000 per year, whereas an additional charge of $2 per car would mean a net loss to us of approximately $6,000 per annum.

We shall thank you to give this matter your consideration and sincerely hope that no such ruling will be made.

Yours, very truly,

J. D. RAMSAY, *President.*

CHICAGO, ILL., *March 10, 1914.*

JAMES S. HARLAN,
Chairman Interstate Commerce Commission,
Washington, D. C.:

Reported here and in New York commission has tentatively approved spotting tariffs of 5½ cents per ton, with a minimum charge of $2 a car, effective April 1, notwithstanding further hearings are to be held later. Information to this effect has been disseminated by the Trunk Line Association. Please let us know if this is correct.

JOHN M. GLENN.

—

MARCH 10, 1914.

JOHN M. GLENN,
Secretary Illinois Manufacturers' Association,
76 West Monroe Street, Chicago, Ill.:

Your wire date to Commissioner Harlan. The matter of spotting charge on the ordinary private siding has been set down for further hearing March 12 and for argument March 30 and 31. It may be that the charge which you cite has reference to the service on plant railways beyond the point of interchange, the free performance of which was condemned by the commission in the Industrial Railways case.

SECRETARY.

—

THE MANUFACTURERS' ASSOCIATION OF JAMESTOWN, N. Y.,
March 10, 1914.

CHAIRMAN INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

DEAR SIR: There seems to be a disposition on the part of your commission, or of the railroad companies, to break in on a custom which has prevailed for many, many years, which is to make a charge for what you call "spotting cars" on a switch to permit of loading and unloading miscellaneous shipments, which are then taken to the freight station and distributed to the different consignees.

We believe that this commission should take into consideration that this custom, existing so long, has become a part of the system of shipping. There are many manufacturers who have built their own switches and some have paid for half of the cost of the switches, and which are really a part of the railroad because the railroad uses them continually for storage. Many factories have located outside of the congestion in cities on account of the decreased cost of land and to get onto the railroad track on purpose to enable them to load cars, as above described, as well as full cars of lumber, coal, etc.

In this city there are many factories located 2 to 3 miles from the freight station, and we believe this condition exists largely in other cities. This would be a tremendous hardship and cost to the manufacturers, which would eventually be put onto the consumer, who, we believe, are as much entitled to preference as the railroad companies.

Recently the manufacturers throughout the country have very considerately taken action in the matter on increased freight rates, and we believe generally have considered it necessary and have lent their efforts in the railroads behalf. This would be a very poor return should we be compelled to pay ferriage on cars loaded at the factory.

Operators at the freight stations say that it is much better for them to have these cars come in loaded from the factories and more economical for the railroad than to have them unloaded by teams.

The manufacturers' association of this city wish to ask you to consider this matter with the utmost consideration for those who are now situated—and there are many of them—as described above, and on whom it will entail a hardship if they are compelled to cart their product to the station or pay the ferriage charge.

Respectfully, yours,

J. M. HIMEBAUGH,
President of the Manufacturers' Association of Jamestown, N. Y.

—

THE TATTERSALL CO.,
Trenton, N. J., March 10, 1914.

The INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: In the public press, trade papers, and bulletins we see discussed the possibility of your commission recommending a charge for delivery of cars on private sidings, this in connection with the application made by the railroads for an increased rate of freight.

We know your body will give the most careful consideration to this innovation, and might we call to your attention our point of objection?

We conduct several retail yards for the handling of coal and mason-builders' supplies. We own our own land, trestles, and buildings, and paid the railroads for the laying of and the purchase price of rails, ties, etc. We are at a decided disadvantage now because we own our own facilities, due entirely to the railroad companies leasing these same kind of facilities to very many of our competitors under a system of rental that we are sure yields no return on investment—in fact, scarcely pays for repairs.

We are informed that we own the only coal yard of any size on the main line of the Reading road between Philadelphia and Bound Brook not owned by the railroad company. In this city, on the Pennsylvania Railroad, there are perhaps 30 coal yards, and there isn't a single one large enough to be really called a retail dealer not owned by the railroad company, and we venture the assertion the railroad companies do not collect sufficient rental to cover the actual expense of maintenance.

So the dealer who owns is already at a disadvantage—never name those who unload their cars in yards maintained by the railroad company at great expense, and for which service the dealer or consignee doesn't pay a nickel—so for goodness sake don't add another burden to the retailer, who has bought and built his own facilities with his own money.

Yours, respectfully,

THE TATTERSALL CO.,
JAMES C. TATTERSALL.

—

NEW YORK, *March 10, 1914.*

The INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: According to the inclosed clipping, from this morning's New York Times, I note that Mr. Thorne, of Iowa, states that the increase of the eastern railroads from 1890 to 1912 in capital stock was 92 per cent and in dividends 359 per cent. Did he bring out the average rate of dividends on the entire capital stock of the eastern railroads in 1890 and the average rate of dividends paid on the entire capitalization in 1912; and, if so, does the average rate show an increase in proportion to the increase in capitalization, and what ratio did the average rates of 1890 bear to those of 1912?

He states further that the dividends of 1913 were $12,000,000 greater than those of 1910. How much greater was the capitalization of 1913 than that of 1910?

It seems to me that a member of a State railroad commission should not take the position of opposing an increase in rates. His true position is of a judicial character. Any stand taken one way or the other is manifestly unfair.

Yours, truly,

WM. B. NEERGAARD.

From 1890 to 1912 the eastern railroads, Mr. Thorne asserted, showed these increases:

"In trackage, 53 per cent; in capital stock, 92 per cent, and dividends, 359 per cent." The dividends in 1912 exceeded those of any prior year, he said.

"They were $12,000,000 greater in 1913 than in 1910 when the eastern railroads began the agitation for the 5 per cent increase," he continued. "And this statement alone should prove conclusively that there is no real need for an increase in the freight rates."

Mr. Thorne's argument was that the accounts of eastern railroads dealing with maintenance and way were enhanced by all the carriers, beginning with 1910, out of all proportion to what would seem to be a normal business increase. He cited the accounts of many roads, and asked the commission whether they did not believe that the accounting was technically wrong, and had been made so to influence them in their decision on the proposed freight rates?

—

BERNET, CRAFT & KAUFFMAN MILLING CO.,
St. Louis, Mo., March 10, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

DEAR SIRS: We have your circular of March 5 stating the hearing in the spotting case assigned for March 16 has been deferred to March 24.

For the following reasons this firm desires to go on record as being opposed to any charge being made for the spotting service.

For many years freight was loaded and unloaded at the expense of the transportation lines. It is now loaded and unloaded at the expense of the industries, shippers, and receivers of freight. We maintain that it is now unfair that the shippers should be called upon to pay the railroads for backing their vehicles up to the doors of the shippers to be loaded or for spotting the cars for the receivers to be unloaded.

In cases where the industries have participated in rate benefits through so-called private lines, we have nothing to say as to the remedy, but must respectfully and emphatically protest that because of the abuses in such cases transportation lines are not justified in punishing the shippers on spurs or switch tracks, which are owned and controlled exclusively by the railroad corporations who receive all the revenue from the carriage of the freight.

We therefore protest against the proposed rate.

Very respectfully,

BERNET, CRAFT & KAUFFMAN MILLING CO.,
F. E. KAUFFMAN, *President.*

—

J. B. COVER & CO.,
Lowell, Mass., March 10, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: I referred to badly managed railroads in my letter to you under date of February 17, 1914.

It is bad management to pay Mr. Maurice McDonald $50,000 a year—about $137 a day—for being president of the Boston & Maine and Maine Central Railroads.

It is bad management for the railroads to continue to hold valuable real estate that they dropped the use of when they gobbled the competing lines. I herewith submit the assessor's valuation of three different lots of real estate in this city that I know of, and there is no question but that it is the same all along their lines.

Compel the railroads to confine their business to transportation as per their charters. Cut out their landlord and real-estate holdings. Cut salaries of the officials in half instead of allowing them to plunder their defenseless patrons; and in regard to your so-called car spotting beg to say that we are located on a short spur track together with about 20 other merchants. Said spur almost joins onto a freight yard that has no trucking facilities. Our train in made up in said yard, and all cars distributed at one switching once a day and the empty train pulled out the next. If same cars were switched in a mixed train in their freight yards, many of the cars would not be unloaded the following day and would have to be reswitched again and many times the next following day, sometimes the third and fourth, while if the same cars are placed on the spurs, all this extra switching in the freight yards is eliminated; besides this the spurs are terminals, and thus relieve the freight yards from congestion.

The land under the spur track, on which about 20 of the merchants referred to are located, is owned by the abuttors, many of whom are the merchants referred to.

Respectfully submitted.

J. B. COVER.

A. D. RUNYON,
Millington, N. J., March 10, 1914.

The INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: It has recently come to my attention that your commission is holding hearings with the railroad company regarding charging sidings for placing or spotting cars thereon. I would like to enter a protest against any such method being introduced on the ground that I think it will be unfair to the dealers handling freight. Receivers taking their freight from the public freight yard would have an advantage over persons having their private siding. It does not seem to me at all fair. I also think that a person receiving freight should be credited for unloading a car promptly, say, the day it arrives, thus releasing the car for the railroad company's use at once. He is invariably charged demurrage for the use of the car when not unloaded in 48 hours. It seems to me the rule should work both ways.

I would be pleased to hear from you regarding these matters, and greatly oblige,

Yours, very truly, A. D. RUNYON.

—

THE JOSEPH M. SMITH CO.,
Madison, N. J., March 10, 1914.

The INTERSTATE COMMERCE COMMISSION.

GENTLEMEN: As a business firm, with a railroad siding and handling hundreds of cars of coal, lumber, cement, and other building materials each year, we wish to protest against the proposed charges by the railroad companies for placing cars on our siding as being both unjust and unfair.

We unload all of our material direct from cars to our sheds and storehouses without any cartage by teams, and thereby save both time and expense by unloading more promptly and in one-quarter the time than from our freight yard, which is a quarter of a mile away.

We claim this is a great saving to the railroad company, as quite often the freight yard is congested with cars, and it would be impossible for our teams to get anywhere near the cars wanted, and especially in the case of coal, where it is now dumped over the bins and unloaded in five minutes' time.

This would be a great hardship and an unjust charge, and we hope and pray that your honorable body will not grant them this concession.

Respectfully,

THE JOSEPH M. SMITH CO.,
By A. P. SMITH, *Secretary.*

—

NATIONAL SEWING MACHINE CO.,
Belvidere, Ill., March 10, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: In this city we have about one-half mile of private track connected with the Chicago & North Western Railway, and for more than 20 years past it has been the custom for the railway company to each day spot cars for loading and unloading.

The cars we load contain l. c. l. shipments of sewing machines, washing machines, and castings, and on an average we load daily about two such cars for our local transfer, two for the Chicago Wood Street station, and about one every other day for Chicago State Street station.

The incoming cars of l. c. l. merchandise so spotted average about one car a day.

We understand that you contemplate insisting on railroad companies charging for spotting such cars. To do this would work a great hardship on us, and if we refused to pay for such service and deliver the outgoing shipments at our local station it would certainly be a hardship on the railway, for the reason that at present they have no equipment suitable for handling such business, and as existing arrangements make the handling of this traffic cheaper for all parties concerned, we trust that you will not put into effect any rule of this kind that would be so detrimental to our interests.

Yours, truly,

NATIONAL SEWING MACHINE CO.,
JOHN W. ELDREDGE.

—

SMITH & DOVE MANUFACTURING CO.,
Andover, Mass., March 10, 1914.

CHAIRMAN INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

DEAR SIR: In connection with your hearing to be held on the 12th in regard to switching and spotting cars on spur tracks we beg to call your attention to two phases of the matter which occur to us as having an important bearing.

First, it does not seem to us that there should be any charge made for merely switching a car or cars onto a private sidetrack where the railroad is not called upon to place cars at particular positions and where it is relieved of providing trackage room in its own yards by reason of the maintenance of a private track or tracks on the part of the corporation. The cars must be switched somewhere, and it costs no more for the railroad to switch them inside of the controlling switch of a private siding than into a particular track in its own yards.

Second, the rule at present in operation on the Boston & Maine Railroad whereby a charge is made for placing on a private siding a car containing less than 6,000 pounds of freight often results in the unloading through the freight house of such a smaller amount of freight and the then placing of the identical car to be loaded on the consignee's private siding. This means more work and more expense for the railroad and should be provided for in some way.

Yours, very truly,

SMITH & DOVE MANUFACTURING CO.,
GEO. F. SMITH, *President.*

—

LA FAYETTE CHAMBER OF COMMERCE,
La Fayette, Ind., March 10, 1913.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: Answering your inquiry of February 17, which was delayed pending the further advice of your later letter, will state:

1. There are 300 business concerns represented by 500 members of our association.

2. Thirty of these concerns are connected with one or more railroads by a private spur or siding.

3. None of these concerns enjoy trap-car or ferry-car service.

Very truly, yours,

LA FAYETTE CHAMBER OF COMMERCE,
ALBERT V. WEIGEL, *Secretary.*

—

EVENS & HOWARD FIRE BRICK CO.,
St. Louis, March 10, 1914.

Hon. E. E. CLARK,
Chairman Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: With reference to the proposed charge for spotting cars on private sidings, Interstate Commerce Commission docket No. 5860. I. and S. docket 333:

The Evens & Howard Fire Brick Co., of St. Louis, have three sidings from 1,000 to 2,500 feet long for the loading and unloading of inbound and outbound freight, shipping over the railroads approximately 250,000 tons in and out during the year. On these sidings we have no private motive power, and demurrage and extra service is charged in all cases by the railroad companies for any service performed.

We consider it unjust discrimination to make a special charge for spotting cars where this charge is practically confined to those owning or operating private siding tracks while the general public, for whom the same service is rendered in exactly the same manner, is immune from this charge on account of using general team tracks. It is usually unnecessary to place cars at any particular point on our team tracks and is only necessary to run a cut of cars on the siding for loading, making the service of the simplest kind, and in most cases entirely at the convenience of the railroad company.

From the fact that the railroad companies have succeeded in getting numerous interests to locate on their lines through certain representations as regards handling their business, it certainly appears to us that the proposed car-spotting charge is entirely unjustified, and one that discriminates against the owners of private sidings.

We certainly hope no action will be taken on this matter without thorough investigation, and hope that those interested will be allowed to present their case to the commission.

Very truly, yours,

EVENS & HOWARD FIRE BRICK CO.,
R. S. RHOADS, *General Sales Manager.*

—

A. J. HAWS & SONS (LTD.),
Johnstown, Pa., March 10, 1914.

Hon. E. E. CLARK,
Chairman Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: A. J. Haws & Sons (Ltd.), with its general office in Johnstown, Pa., has in its Johnstown plants six sidings, being 200 feet to 600 feet in length. These sidings are ordinary spur tracks and are used for unloading inbound material and loading outbound finished products.

On these sidings no motive power owned by the company is used, and any demurrage is always paid when due, and any extra service performed on these sidings by the railroad company is charged to us. The only service they perform is placing the cars on the sidings for unloading raw material and for the loading of the finished product.

Our situation is identical with most all the clay plants of the United States, which is a very large industry, and we believe shipped last year almost 50,000,000 tons of freight.

We consider it would be unjust and unfair to our company to make any charge for spotting cars on these spur tracks. This is work that has always been performed by the railroad company and we believe they should continue to do so.

The cost of the railroads in doing this work is no greater than the cost of service performed for the general public in the placing of cars to be unloaded at team tracks or warehouses. In addition, the first cost of these sidings and their maintenance are borne by our company, and the railroad companies are relieved to this extent both in the cost of their equipment and their operating expenses.

These spur tracks represent the only economical method of operating our plant and the time required in placing cars for loading and unloading. Hence, we claim any charge for doing this service is unfair and unjust. Since the railroads have always performed this service for the different smaller plants, we believe that any charge they would be allowed to make for spotting cars would be entirely unfair and unjust.

Yours, very truly,

A. J. HAWS & SONS (LTD.),
JAS. P. THOMAS, *General Manager.*

—

THE BOARD OF TRADE,
Portsmouth, Ohio, March 10, 1914.

Mr. GEO. B. MCGINTY,
Interstate Commerce Commission, Washington, D. C.

DEAR SIR: We wish to respectfully protest against a proposed charge of $2 per car for what is known as "spotting" cars, or loading or unloading on sidings serving industries.

We would respectfully protest against a charge of $2 per car, or a charge of any other amount, being generally applied to such usual and customary service upon the part of the railroads.

This protest is not intended to include switching upon industrial railroads, nor to include handling of large volumes of business by the locomotives of the common-carrier roads when such work should obviously be done by the private locomotives of a corporation.

Yours, truly,

TRANSPORTATION COMMITTEE, BOARD OF TRADE,
L. C. TURLEY, *Chairman.*

—

RISING & NELSON SLATE CO.,
West Pawlet, Vt., March 14, 1914.

J. T. MARCHAND,
Attorney, Washington, D. C.

DEAR SIR: I understand that there is some agitation between the commission and the railroads relative to private switches—that the railroads are endeavoring to have a charge of $1 made for placing cars on private switches. This ruling, I feel, would work an injustice to a great many people, as, without question, practically all sidings, except-

ing those in use at terminals where agents are located, would be considered as private switches.

We have numerous switches here on this branch that are located between stations and are maintained by the railroad, which, for an illustration, the one known as 154, at Warren's switch, required a new dock. In all probability there is more material loaded on this switch than any other switch on the branch, but the railroad at the time of the discussion termed it as a private switch. Owing to the limited loading room on the switch here at West Pawlet, and the congested condition as to teams and space, last year we built a switch off one of the company's switches on the main line, I should say, from four to six hundred feet, and have gone to considerable expense as to building a concrete dock and a small railroad to draw our slate on. It is a matter of benefit to the railroad in our having this private switch; and should the commission charge, as is being agitated, $1 for placing each car on the same, it would work out a great hardship and injustice.

I will be very frank to say that, as far as the slate business is concerned, we have about all the business can stand in freight rates, as they are averaging to get better than 33⅓ per cent of the value for hauling same, besides what they get for hauling coal and other material used in the manufacture of same.

Please let me know what position this matter is in, as to the $1 charge for placing cars on private switches.

Very truly, yours, THOS. S. NELSON.

P. S.—The private switch we had put in here at West Pawlet is within the yard limit of the station.

—

NEW ENGLAND PAPER & PULP TRAFFIC ASSOCIATION,
Boston, Mass., March 14, 1914.

Hon. J. S. HARLAN,
Commissioner, Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: I respectfully bring to your personal notice a statement, copy of which is inclosed herewith, which I read into the record of the proceedings in I. C. C. Docket 5860, before Special Examiner Gerry, at the New Willard, at the close of the morning session of Friday, March 13. This statement and the request it embodies praying the commission to informally act in this matter of book-paper rates to bring about, if possible, an upward rather than a downward readjustment of this badly mixed schedule, is wholly in line with my testimony on paper rates at the hearing before Mr. Gerry, February 18, and in line with my letter to Mr. Brandeis, February 27.

Assuming, as I do, based upon my numerous talks with their traffic officers, the correct attitude of the Pennsylvania Railroad in the final showdown, I will state to you my belief that the only absolute bar against a prompt check in of tariffs putting book paper eastbound and westbound upon identical commodity description and rate basis, is the attitude of the Buffalo, Rochester & Pitsburgh Railway in refusing to mark up Johnsonburg, Pa., from Buffalo sixth to Rochester sixth.

As to the undoubted indifference of railroad officers to the dangers of the paper-rate situation following complaint from ourselves, Mr. Campbell and Mr. Dairymple did have a conference at Baltimore, January 29, with Messrs. Randolph and Dixon, and I think Mr. Daly, on this subject. I think it is not improper to quote the replies made to me by two railroad officers, both, it so happens, of the Pennsylvania Railroad, to my urgent solicitation that the big railroads compel an immediate reconstruction of book-paper rates upward. Freight Traffic Manager Robert C. Wright answered me by the illustration that a man who had been greatly annoyed by a boil on his leg, had ceased to note that affliction when a major operation of amputation was now being performed upon him. General Solicitor George Stuart Patterson replied to my suggestion that the Pennsylvania and the Erie exercise compulsion on the Buffalo, Rochester & Pittsburgh, with the retort "and draw indictments on ourselves for violation of the Sherman law." Traffic managers F. Laban and James Webster have both said to me that the book-paper rate situation was at the present moment clean beyond the power of the railroads to correct. I happened last night to meet on the street in New York Vice President E. S. Keeley, of the St. Paul road, who has immense interest in the transportation of paper and is an expert on these rates. Mr. Keeley was greatly interested in hearing of the statement I had read into Docket 5860, and said in effect that it was only by cooperative effort between the railroads, the manufacturers, and the commission, that the paper-rate situation could be saved from serious collapse.

I earnestly hope that you may deem that the good offices of the commission can be extended to an inquiry into the east and west bound book-paper rate structure, which is our immediate interest, and upon which we must act by formal complaint prior to April 1, according to the situation as it exists to-day.

Asking your pardon for the necessary length of this letter, copy of which I take the liberty of sending to Mr. Brandeis, I am, with great respect,

Very truly, yours, C. H. TIFFANY,
Secretary and Traffic Manager.

—

EDWARD W. WOOLMAN,
Philadelphia, Pa., March 14, 1914.

Judge JAMES HARLAN,
Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: Inasmuch as the Pennsylvania Railroad Co. has filed Tariff I. C. C. 4478 with you for a 5 per cent advance in the freight rates on milk and cream consigned to Jersey City, N. J., and as the railroads leading into Philadelphia have increased their rates since 1907 as much as 76 per cent in some cases, we hereby protest against any further advance in milk and cream freight rates.

Although this proposed advance is not now asked for Philadelphia shipments, we are afraid that if the Jersey City advance is allowed it will be a short time only until Philadelphia is affected.

Prior to July 1, 1907, the rate on the Philadelphia division of the Pennsylvania Railroad per distance of 60 miles was 15 cents for 40 quarts or 100-pound can of milk, and the same rate was charged on the haul on the Wilmington & Northern with movement south to Wilmington and north on the Baltimore & Ohio to Philadelphia.

On July 1, 1907, a liquid-measure law passed by the State of Pennsylvania went into effect, and the railroads automatically took advantage of this change; a hundred pounds of milk then was charged as 46 quarts of milk, instead of 40 quarts, making a 15 per cent advance in the rate.

In April, 1911, the Pennsylvania Railroad installed iced refrigerator cars, increasing the rates an additional 15 per cent, claiming that the refrigeration of the cars required this advance in the rates. In 1912 the Baltimore & Ohio and the Philadelphia & Reading Railroad followed with the iced refrigerated cars and a 20 per cent advance in rates.

In May, 1912, the Pennsylvania Railroad issued new tariffs, making new shipping zones, which resulted in a further increase on the Philadelphia division to 26½ cents per hundred pounds or 46 quarts in the zone of 50 to 65 miles to Philadelphia. Thus the rate for 100 pounds of milk was increased from 15 cents in June, 1907, to 26½ cents in May, 1912, a total increase of over 76 per cent, the additional service rendered being iced refrigerated cars.

To Philadelphia the Pennsylvania Railroad Co. divides the haul of 100 miles into three zones instead of two zones to Jersey City and New York.

Milk is purchased both by Philadelphia and New York dealers in the same locality in the States of New York, Pennsylvania, and New Jersey.

We believe the present tariff is ample for the service rendered.

Yours, truly,

PHILADELPHIA MILK EXCHANGE,
HENRY N. WOOLMAN, *President.*

—

THE BIG BROTHERS AND THE BIG SISTERS,
Milwaukee, Wis., March 14, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

DEAR SIRS: Is your commission acquainted with the fact that the various railroad companies of the country have a set of subcompanies sapping the life of the principal companies, securing for the railroad officials who form these subcompanies fat incomes and often great fortunes, while the stockholders of the railroad companies often have to be contented with a 6 or 7 per cent income from their investments?

They do—that is, their officers have a frame up of that character, along lines similar to the infamous old Credit Mobilier of early Union Pacific history. Recently I was employed by one of the great railroad companies at the headquarters and found that there is a car-wheel graft, a railroad-tie graft, a printing graft, and that the main company dare not buy supplies of any kind except of the grafting subcompanies. This system, of course, can not but act unfavorably upon the earning power of the stock, making their reports of earnings false, while the cream of the money earned by the road being milked goes into the pockets of the dishonest officials.

Yours, very sincerely, L. B. RING.

—

AMERICAN GLASS WORKS (INC.),
Richmond, Va., March 14, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

Under Docket 5360, I. & S. Docket 333.

GENTLEMEN: In reference to the above petition of the railroad companies, while we are interested in the whole of the proposal, we are most particularly interested in proposal No. 2, "Placing cars for loading or unloading on sidings serving industries," noted by you as "spotting cars."

We are of the opinion that this is a very arbitrary move, and we can not see whether either the railroad companies or the shippers will be benefited by this. For instance, we are a glass manufactory, and we ship a good number of solid carloads every year. Now, it would cost the railroad company a great deal more, should we deliver these goods to the depot, to load the cars than it does by their placing a car on our siding and we load it ourselves. Then, again, in the event of our having to haul all received freight from the depot, it would cost the railroad company quite as much, if not more, to provide unloading accommodation as it would to place the car on our siding.

To be brief, we feel confident that this change from the present conditions would not benefit the railroad companies, neither would it benefit the shippers. In fact, it would mean extra expense to both.

We therefore ask your honorable commission not to change the present conditions in regard to the placing of cars for loading and unloading on private sidings.

We beg to remain,

Yours, very truly,

AMERICAN GLASS WORKS (INC.).

—

JOHN PRITZLAFF HARDWARE CO.,
Milwaukee, Wis., March 14, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: We have been informed that your honorable commission is considering the advisability of allowing railroad companies to charge for "spotting" cars on private sidetracks.

While it is true that some private sidetracks are far distant from the main tracks of the railroads, and the spotting of the cars is on that account an expense to the railroad, this is not true in all cases, and in particular to our case.

We desire to enter a protest against this contemplated charge for the spotting of cars on our sidetracks for the following reasons, and trust you will see the justice of our contention:

First. Our sidetracks adjoin the main line of the Chicago, Milwaukee & St. Paul Railroad Co., and from the point of interchange to where our cars are spotted it is no farther than to one of the railroad company's regular team tracks. Therefore it can not cost the railroad company more to spot the cars on our tracks than on their own.

Second. In order to derive the benefit of a private sidetrack we gave up valuable ground and part of a seven-story building.

Third. As the ground occupied by the sidetracks is owned by us we pay the real-estate taxes on same.

Fourth. We paid for the laying of the track and maintain it at our expense.

The railroad company, therefore, is under no expense for wear and tear on track as it would were the tracks their own, nor for service other than it performs in placing cars on public delivery or team tracks.

Yours, truly, JOHN PRITZLAFF HARDWARE CO.,
FRED C. PRITZLAFF, *President.*

ZANESVILLE, OHIO, *March 14, 1914.*

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: Regarding the rate-advance case to come before you March 16 and 17, in which, we understand, the railroads are seeking a change from the free service of "spotting" cars to shippers owning a private spur track to a charge of up to $2.50 per car for "spotting," you may be interested to hear from the manufacturers of Zanesville, Ohio.

The Employers' Association of Zanesville, comprising the largest manufacturers, after careful consideration, feel that to allow the railroads such a charge would be placing a burden on the manufacturer, heavy and hard to operate under.

There have been revised classifications increasing our tariff rates. Every additional charge increases the cost of manufacture. To operate successfully, that workmen may be cared for at good wages; that plants may be kept up and made comfortable and safe for employees; that stockholders, to many of whom reduction in dividends would be greatly felt, may not be deprived of the income of their savings and investment, the operating charges of manufacturing must not increase. The manufacturer can not long stand such strains. Already conditions are manifest in our country that militate against the investment of money that will be hampered and taxed and charged to keep down its earning capacity. If it continues either the manufacturer is compelled to discontinue in self-defense or attempt to increase the cost of his product. If successful in the latter, on the consumer—the public—finally rests the burden, and we are worse off than before.

Another reason against such a spotting charge is that it discriminates. Many plants are so situated that the public track is available for their loading and unloading. They play upon this advantage to their customers, and it soon is an important factor.

Give the railroads this, and it is the old story over; something more will be demanded.

We believe they are not entitled to such a charge. Their business does not require it, and if such were the case some more equitable means of spreading the cost on all would be in order.

We therefore feel that this expression may be added light on this subject to you, and that your wisdom and earnest endeavor in behalf of justice and right may reach a decision in which all the manufacturers will feel consideration has been shown them as well as the railroads.

Very truly, yours,

THE EMPLOYERS' ASSOCIATION,
M. H. THOMPSON, *Secretary.*

E. BAILEY & SONS (INC.),
Patchogue, N. Y., March 14, 1914.

CHAIRMAN INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

DEAR SIR: We have been advised that your commission has under consideration a proposition to allow the railroads to make charge for spotting cars upon private sidings.

We are not thoroughly familiar with this proposition as it is being considered, but if we have been rightly informed we feel that this would be a very great injustice to those maintaining private sidings.

We maintain such private spurs at three points; namely, Patchogue, Islip, and Sayville, on the Long Island Railroad, which sidings were constructed at our own expense and are a great convenience to the Long Island Railroad, relieving their sidings of the congestion which would exist were our shipments loaded and unloaded on sidings belonging to the railroad company at the above points.

On the other hand, parties doing but very little business with the railroad, and having comparatively few cars placed, if such cars are placed on the railroad company's sidings, understand that no charge would be made.

We think that if your commission is going to allow the railroads to increase their revenues it should be done in a broad manner, which will not discriminate and which will place all shippers and consignees upon the same basis.

We have every confidence in your board, and know they will act in a manner which will be to the best interests of the public, but thought it would be proper for us to write with reference to this matter.

Yours, truly,

E. BAILEY & SONS.

A. LESCHEN & SONS ROPE CO.,
St. Louis, March 14, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: We wish to make protest with your honorable body in the matter of free service performed by the carriers in the placing and spotting of cars on private sidings, which is now being considered by you and for which the railroad companies are now intending to make a charge.

We are located on the West Belt Line of the St. Louis Merchants' Bridge Terminal Railway Co., in the city of St. Louis, State of Missouri, and enjoy a private siding in connection with the aforesaid company.

We wish to submit the following: We have no objection to the 5 per cent increase in freight rates which the carriers in official-classification territory have requested and whose tariffs have been suspended by your honorable body until hearing and arguments can be presented and you decide as to the justification of same.

If, however, the carriers will be permitted to charge for spotting cars on private team tracks the increase would be borne only by shippers of heavy commodities and who have located on private sidings near a railroad track, upon the assurance of the railroad company that the switching and spotting of cars would be performed for them free of charge; and with this understanding in view their present location was selected, which, in many cases, caused them other inconveniences, in order to obtain the convenience the railroad company had offered to them when making their selection of location of their industries.

It is our contention that the charges for switching and spotting cars on our siding is figured in the through rate. The Chicago and New York rate is made up by allowing 6 cents terminal charges, namely, 3 cents at each end added to the charge for the mileage between the two points.

We further contend that it does not cost the carriers any more to spot car on our siding than it costs them to spot one on the team tracks of the Terminal Railroad Co., located in the different sections of this city. Further, when the carriers have a car placed on the team tracks of the Terminal Railroad Association in any part of the city, this charge is absorbed by the delivering carrier and is taken out of the through rate.

We are compelled to pay for the private track and must also pay for the maintenance of same. If all industries maintaining private sidings were to take delivery of their shipments and load their cars on public team tracks, carriers would be compelled to enlarge their team-track facilities, which would be a very heavy expense imposed upon them; and, further, it would reduce their available rolling equipment, as it very often occurs there is a congestion of freight en route and the carriers will offer from three to four times as many cars in one day as we usually receive; and if we were compelled to take delivery of such volume of tonnage from a team track, same could not be accomplished within the same time as under the present arrangement of the private siding, for it could readily be seen that we could not have on hand surplus equipment of drayage to handle such an increased volume and we could not at all times hire such facilities to cope with the situation, as such drayage facilities are not always available at any price. On the other hand, under the present arrangement when these congestions occur and the volume of tonnage is placed on our siding, same is handled almost as rapidly as the regular volume, for we can shift the labor forces in such a manner as to unload these cars and release equipment in the allotted free time.

There is a very large number of business establishments that can not consistently locate near a railroad to enjoy the private siding, as their business will not permit them to locate on the outskirts of the city or near a railroad, as they must be located within the business section of the town, hence they are compelled to dray their shipments.

Hoping that you will give this due consideration, we beg to remain,

Yours, truly,

A. LESCHEN & SONS ROPE CO.,
W. C. HENNING,
Secretary and Treasurer.
A. J. KOKE, *Traffic Manager.*

THE CONCORDIA MILLING CO.,
Concordia, Kans., March 14, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: Relative to the proposed new charges by the railroad, for spotting cars, etc., we feel that such a step would be a great injustice to the shippers' rights.

It has been customary, every since the railroad began doing business in this country, for them to pick up and spot loads on straight competitive stuff.

It is our understanding, however, that on noncompetitive stuff they have made a switching charge unless located on their tracks.

We feel that the present arrangement should continue.

Yours, truly,

THE CONCORDIA MILLING CO.,
C. E. CURRAN.

ARMSTRONG PAINT & VARNISH WORKS,
Chicago, March 14, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: In common with many manufacturers, we are greatly interested in the outcome of your decision as to the advance in freight rates.

There is one point about this entire controversy which we do not think has been brought up, at least not to our knowledge, and it is along the lines that we believe your honorable body is working, viz:

To work out economies for the railroads, which will effect them savings. After all, a saving is just as good as an increase in income.

This idea we have is that you ought to take action along some lines that would greatly restrict the outrageous charges that the Pullman Co. saddle onto the railroads and the consumer. Perhaps if the consumer continued to pay their exorbitant berth rates, they could be induced to cut their mileage charges to the railroad in half.

In common with a great many million citizens of this great country of ours, we have always looked on the Pullman Co. as being a very successful and flourishing type of parasite, and if there is any justice in that view, everybody concerned would welcome your grappling with it, and with a firm hand.

Yours, very truly,

ARMSTRONG PAINT & VARNISH WORKS,
E. R. ARMSTRONG.

THE MERCHANTS' FREIGHT BUREAU,
Little Rock, Ark., March 14, 1914.

Mr. GEORGE B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: I have your circular letter of March 5 relative to the proposed increase of 5 per cent in freight rates in the eastern territory, as well as the matter concerning the spotting of cars.

We have already filed objection to any allowance to the carriers for placing cars to sidetracks and inddustries for loading or unloading at Little Rock, as such a rule would put some of our manufacturers out of business.

Conditions at Pittsburgh, Chicago, New York, and other large centers are entirely dissimilar; however, I assume that an increase in the revenue of the railroads by permitting a charge of this kind will be a burden wherever it is applied, as it will mean an extra expense for any manufacturer or wholesale merchants and other shippers who receive and forward carload freight, and incidentally a large increase in the revenue of the carriers.

I can not be present at the hearing in Washington on March 28, but will file a brief offering our objections to this proposed measure.

Yours, truly,

——— ———, *Traffic Manager.*

HIMMELBERGER-HARRISON LUMBER CO.,
Cape Girardeau, Mo., March 14, 1914.

Mr. G. B. MCGINTY, *Washington, D. C.*

DEAR SIR: Thank you for the advice of March 7, that tariffs mentioned in our letter of the 24th ultimo have been suspended until September 12 of this year.

At any time that a hearing is held on the rate to New Orleans, that was advanced by this tariff, we would like the opportunity of appearing

before the commission and stating how adversely such an advance would affect us.

You ask for a statement in writing concerning our views of the proposed 5 per cent advance, and probably the best summary of the situation we can give you is a copy of our letter to the American Lumberman when this matter was first being advocated by the railroads. It is our firm belief that some comprehensive system of pooling cars in connection with an arrangement for direct routing and for the proper valuation of physical properties would make unnecessary any advance of freight rates on a flat basis. Economies of operation will bring proper revenue if the railroads are run on lines similar to those that regulate the operation of private businesses. Any other plan but a thorough reformation of the business methods of railroads will be only of temporary benefit, and we do not think that the commission is established to put into effect makeshift methods.

We have a sincere admiration for the commission, and believe that it is a just body, seeking the truth in transportation affairs, with the idea that once the truth is known the remedy can be applied, and that this remedy will be enduring instead of being built upon the shifting sands of expediency.

Yours, truly,

HIMMELBERGER-HARRISON LUMBER CO.,
C. L. H.

GENERAL CHEMICAL CO.,
New York, March 14, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

DEAR SIRS: Referring to your investigation of the question whether carriers should be additionally compensated for spur-track service, we are informed that you have fixed March 24 next as the last date on which statements and briefs in this connection will be received from those interested.

At this moment we can only say that our investments in sidings at our plants have been made in expectation and consideration of the continuance of the past and present uniform practice as regards spur-track service. The question arises, how the owners are to be reimbursed for the property and plant given over to these uses if the carriers are to receive additional compensation for service mentioned.

The importance to us of this question appears from the appended list of our works having spur tracks.

We therefore respectfully request that you refrain from concluding the matter until we have had reasonable opportunity to present our views after fair notice with respect to the territory involved.

Respectfully, yours,

GENERAL CHEMICAL CO.,
JAS. L. MORGAN,
Vice President and Secretary.

LACLEDE-CHRISTY CLAY PRODUCTS CO.,
St. Louis, March 14, 1914.

Hon. E. E. CLARK,
Chairman Interstate Commerce Commission,
Washington, D. C.

Subject: Interstate Commerce Commission docket 5860, I. & S. docket 333, with reference to charges for spotting cars on private siding.

DEAR SIR: This company has eight sidings within official classification territory, varying in length as follows: Three from 230 to 400 feet; two from 420 to 600 feet; one from 650 to 850 feet; one from 900 feet to 1,300 feet; one from 1,350 to 5,000 feet.

The latter being an industrial siding built by the railroad company at our expense and on our property and deeded to the railroad company.

These sidings are used for unloading and loading inbound and outbound raw materials and manufactured products.

No motive power owned by the company is used on these sidings. Demurrage is paid, and any extra or special service rendered on the part of the railroad is charged to us. The only service performed by the railroad on these sidings is putting the cars on and taking them off and placing them in position for loading and unloading.

These sidings are all located within the switching limits of the city of St. Louis, with the exception of two located in isolated spots on the outskirts of the city.

Conditions similar to ours are typical of all the clay-working industries of the United States. In 1912, according to statistics of the United States Government, the clay-working industries shipped over the railroads 47,000,000 tons of freight, of which this company shipped 129,000 tons of the total amount.

We would consider the making of any charge for spotting cars on these spurs unjust and discriminatory.

The service performed and the cost to the railroads for handling cars on these sidings or spur tracks is no greater than that rendered the general public for setting of cars at team tracks or other central loading places for loading or unloading freight.

The service on these sidings or spur tracks is of the simplest nature, and for handling the large tonnage of freight the railroad companies receive in this way, it represents the most economical method of handling freight. The railroads use their own pleasure as to the time of handling and shifting cars on these sidings, and in nearly all cases the details of the service are performed at the railroad companies' convenience.

If these sidings or spur tracks afford the railroads the most economical way possible necessary to handling their traffic, they are only rendering the general public their necessary requirements in the most economical way. No discrimination can be claimed, and there certainly can be no depletion of the railroad's revenue.

Therefore, in view of the railroads receiving their full revenue for their various line hauls on all freight inbound or outbound, there is no justice in imposing any additional charge for spotting cars on these sidings or spur tracks.

We, therefore, urge strongly against the allowance by the Interstate Commerce Commission for the spotting of cars on private sidings or spur tracks.

Yours, very truly,

LACLEDE-CHRISTY CLAY PRODUCTS CO.,
J. L. GREEN, *President.*

CITY OF MARTINSBURG,
EXECUTIVE DEPARTMENT,
Martinsburg, W. Va., March —, 1914.

Mr. GEORGE B. MCGINTY,
Washington, D. C.

MY DEAR SIR: Attached you will find clipping from one of our local papers. Referring to this clipping and your questions, I have no doubt that the board of trade, through its secretary, has answered the questions. Four or five members of the board of trade have private sidings, but none of them are used for loading less than carloads. Less than carloads is loaded through the companies' local warehouses. Now, if you will pardon the intrusion, I would call your attention to coal rates to this city. From Schuylkill Haven, Tamaqua, Pine Grove, Shamokin, Pa., and other contiguous points, the rate to this city is $2.20, while I note by testimony adduced before the commission, the Chicago rate is $2. The Baltimore & Ohio charge from Cumberland, Md., to this point (78 miles) $1.30 per ton and to Baltimore (178 miles) $1.40 per ton. The railroads ask for a 5 per cent increase, making the rates $2.32 and $1.36 per ton. We think these rates, if adopted, are excessive, and I am writing this at the instance of a number of citizens of this city, who would respectfully ask that the commission investigate these rates. We want to pay what is fair, equitable, and just, but we do not want to be discriminated against with the short haul. I thank you for your consideration.

Yours, truly,

D. H. STUCKEY.

Reference: Any bank in the city.

[Inclosure.]

BOARD OF TRADE TO FURNISH DATA—INTERSTATE COMMERCE COMMISSION ASKS FOR CERTAIN INFORMATION REGARDING LOCAL SHIPPERS.

The Martinsburg Board of Trade is in receipt of a letter from George B. McGinty, secretary of the Interstate Commerce Commission, in which Secretary McGinty acknowledges the receipt of the board's resolution indorsing the proposed 5 per cent freight-rate advance asked by the railroads of the East.

Secretary McGinty states that the commission is now engaged in a broad investigation involving certain propositions, and in relation to which they ask the following information:

1. How many business concerns are represented in your association?
2. How many of these concerns are connected with one or more railroads by a private spur or siding?
3. How many of these concerns now actually enjoy the privilege of loading less-than-carload shipments at their own factories, for reloading elsewhere, or similar service on inbound less-than-carload freight?

This matter will be immediately taken up by the board of trade and the required data forwarded to the commerce commission.

NATIONAL IMPLEMENT & VEHICLE ASSOCIATION
OF THE UNITED STATES OF AMERICA,
Chicago, March 13, 1914.

CHARLES C. MCCHORD, Esq.,
Member Interstate Commerce Commission,
Washington, D. C.

SIR: This association, representing as it does the manufacturers and distributors of the greater part of the country's output of farm-operating equipment, and thereby being the receivers of a great volume of incoming materials and outbound finished products, is greatly interested and concerned in the issues involved in connection with the proposed assessment of charges for the switching, placing, or delivering of cars for loading or unloading on industry side tracks and for other similar service.

The commission has announced that all statements and briefs in this case must be filed by March 24, and that oral argument by counsel will be heard by the entire commission on March 30 and 31. This allows of entirely insufficient time for the preparation of such statements and briefs by these interested shippers, and it will not enable them to present their contentions and views fairly and completely before the commission in the time allotted.

This association desires to urge, therefore, that you consider the gravity of the situation from the shippers' standpoint and that you and your associates of the Interstate Commerce Commission refrain from definitely and finally concluding this matter until such time as all interests have had reasonable notice in which to present their cases.

Yours, truly,

E. W. MCCULLOUGH.

THE UNITED STEEL CO.,
Canton, Ohio, March 13, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: Under date of March 5 we mailed you a clipping from the American Metal Market, dated March 2.

From this clipping we understand that shippers having private siding are preparing, as requested by the Interstate Commerce Commission, to answer certain questions as per list sent them by the commission. This list of questions has not been furnished us, and we are very much interested in this question of spotting cars. Will you kindly mail us the blanks referred to, and oblige,

Yours, truly,

THE UNITED STEEL CO.,
R. B. ROBINSON,
Traffic Manager.

—

THE JAQUI CO.,
Morristown, N. J., March 13, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: We learn that it is proposed by the railroads, with the sanction of your commission, to charge $3 per car for spotting cars on private switches. We wish to protest most strenuously against the allowance of any such charge to be promulgated. In the first place, we can not see that it costs the railroad any more to place cars on a private switch than it does on a working track in a public yard maintained by the railroad for that purpose, in addition to which the expense to the railroad of maintaining such yard not only amounts to considerable, but were it not for the maintenance of private switches by concerns doing business along the various lines the public yards of a railroad of a necessity would be obliged to be considerably larger than those now maintained at a very large additional cost to the railroad.

The majority of the private switches are on land owned by the concerns who are operating these switches and maintained by these parties, while the tracks in the yards are not only maintained by the railroads but they are obliged to pay taxes for the same and on property occupied by them. Furthermore we believe that such a charge would be discrimination against the party owning private switches, as the individual doing business from public tracks would not only have the advantage of not being obliged to maintain a large plant and heavy office expense but would have an additional advantage over the man with the private switch of $3 per car on every car of merchandise which he purchases before any other expense was thought of.

If it is absolutely necessary for the railroads to obtain a greater revenue than they are now obtaining, we have no particular objection, nor have any of the merchants of Morristown and vicinity with whom we have talked, providing it is not a discriminating rate affecting a certain class of receivers only and letting the rest off scot free.

We believe that the permission of this charge will net the railroads a far greater rate than the 5 per cent additional which they propose to add to their present rates, and this is particularly so in the case of short hauls. One place which we know of in particular would be put to an expense of $15,000 per year more by the $3 per car switching charge than it would by having 5 per cent added to the present tariff, and we believe that a charge which is not graduated according to the length of the haul is unjust, as such a fixed charge would add a greater percentage to said short hauls than it would to long ones.

We inclose a letter from Mr. N. Drake, of Newark, expressing his views of this matter, and we sincerely trust that your commission will not permit any such tariff to be issued. We would like to know the result of the hearing before your commission on Thursday, March 12, and if no decision was arrived at, and there are to be any further hearings on this question, we would like to be notified, so that a representation from this city, with authority to express the views of these freight handlers, may be heard in their behalf.

Very truly, yours,

THE JAQUI CO.,
E. A. CARPENTER, *Treasurer.*

—

N. DRAKE,
Newark, N. J., March 12, 1914.

THE JAQUI CO., *Morristown, N. J.*

DEAR SIR: In reply to yours of March 10, will say that, while I will be unable to go to the hearing at Washington, I think that it would be an imposition for the railroad to charge us for spotting or siding cars on our private switches. In the first place, it has cost us considerable money to locate along a railroad. The railroad charged us for putting in the sidings, and, certainly, if we pay for the ground and pay for putting in the siding, we should be entitled to have our cars put on the switches without an extra charge, as it will only relieve congestion in the yards and will furnish the railroad with much more track or yard facilities.

You are perfectly at liberty to use this letter if you choose.

Yours, respectfully,

N. DRAKE, *President.*

—

POTOMAC FIRE BRICK CO.,
Piedmont, W. Va., March 13, 1914.

Hon. E. E. CLARK,
Chairman Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: Referring to the question of spotting cars on private sidings, we think the whole matter is covered by a letter of Harbison Walker Refractories Co., which we take the liberty of repeating and attaching to this.

POTOMAC FIRE BRICK CO.,
JOHN A. CALDWELL, *President.*

P. S.—We might add that this siding is largely used by the Baltimore & Ohio Railroad for other purposes than ours, although we built it and maintain it.

[Copy of Harbison-Walker's letter dated February 24, 1914.]

Hon. E. E. CLARK,
Chairman Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: Subject: Referring to the question of charges for spotting cars on private sidings. Interstate Commerce Commission Docket 5860, I. & S. Docket 333.

Harbison-Walker Refractories Co., with its general offices in Pittsburgh, Pa., has in official classification territory approximately 70 sidings. These are ordinary spur tracks used for unloading inbound materials and loading outbound manufactured products, and vary in length as follows: Forty-four of them range from 190 feet to 950 feet, 21 from 1,000 feet to 1,850 feet, and 4 from 2,200 feet to 2,350 feet. There is one approximately 2 miles long, on which, however, there are five operations of our own, one mill and four tipples. This siding is also used by the general public.

On these sidings no motive power owned by the company is used; demurrage is paid and any extra service performed on these sidings by the railroad is always charged to us. The only service performed on these sidings by the railroad is putting the cars on and taking them off; i. e., placing them in position to be loaded or unloaded.

In several cases three roads use these sidings and in other cases two roads. These sidings are, in most part, located in small towns and villages and most of them in isolated spots.

Our situation is typical of the clay-product industries of the United States. These industries, according to statistics of the United States Government, shipped over the railroads about 47,000,000 tons of freight in 1912; of this amount our company shipped 800,000 tons.

We consider it would be unjust and discriminatory to make any charge for spotting cars on these spur tracks.

The cost to the railroads of the service performed on these spur tracks is no greater than the cost of the services performed for the general public in the spotting of cars for loading or unloading freight at team tracks or other central loading places.

These spur tracks represent the most economical method that can be devised for handling the large tonnage of freight that the railroads secure in this way; the service on these sidings is of the railroads in the vast majority of cases and the details of the service are entirely at the convenience of the railroads.

If, therefore, the railroads are performing the services that are necessary to handle their traffic in the most economical way possible by means of these spur tracks and they are also giving the general public their necessary requirements in the most economical way, there certainly can not be any depletion of the railroads' revenues, nor can there be any discrimination claimed.

The writer will be at the future hearings covering this question, and if so desired will read this statement.

Respectfully, yours,

HARBISON-WALKER REFRACTORIES CO.,
A. B. EWER, *General Freight Agent.*

—

RIDGWAY BRICK CO.,
Ridgway, Pa., March 13, 1914.

SECRETARY INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

DEAR SIR: We have noted the proposed increase in freight rates which the railroads hope to get by making a charge of 7½ cents a ton, or a minimum charge of $2 per car, for the spotting of cars.

There seems to be such a great difference in opinion as to what the term "spotting" means that we are accepting it in its broadest sense, and this would include the placing of a car on our siding at a point where we can either load it or unload it, as the case may be.

The condition at our brick plant is the same as that at almost every brick plant in the country, and that is we have our own siding for the purpose of loading and unloading material, and in connection with this an investigation would show that there is hardly a brick plant in the country but that loads brick at the plant, and for this reason there would be no discrimination between a manufacturer who has a siding and any other manufacturer of brick, as we do not believe you will find any other manufacturer without the siding.

It is true also that in nearly all instances face-brick plants are located at points where there is little, if any, congestion; and such being the case, it costs no more to place a car for loading or unloading on the siding of the brick plant than it would on a team-track siding in the railroad yards.

In our case, if we were to load on a team track belonging to the railroad company, we would have to haul at least 1 mile. In our busy season we load from 4 to 6 cars per day, and the team track available for loading in this yard will hold 8 cars. The average daily loading of cars by the plants of this town is from 16 to 20 cars, and this plainly shows that if we were to abandon our private siding by reason of a spotting charge the railroad would have to invest in the purchase of new land, the building of sidings, and the construction of roadways to the same to take care of the traffic which is now handled on private sidings. Having done this, it would cost them just as much to switch on their own sidings as it does to place cars on a private siding, and they would be out of pocket the difference between the maintenance cost of the sidings and the interest on the investment.

Should the question of extra haul come into this charge of spotting, it will be found that in a great many instances the railroad hauls loaded cars a less distance in placing on the siding of the consignee than they would haul the same car if placed on a team track. In connection with this it is well to note that on coal and similar material the last 500 feet of haul is worth no more than any other like haul from the loading points to the consignee's unloading point, and a 7½-cent per ton charge is out of all reason.

In our particular instance the siding is on the railroad company's land, said land not being a part of the original right of way, but was bought for a merely nominal sum to protect other rights of the railroad company; the railroad company constructed the siding, but we have paid for the same and given the railroad company a bill of sale for it. If the railroad company is to be allowed to charge for the spotting of cars—by this we mean the exact placing of cars on a siding such as ours—then we should be paid by the railroad company when they use our track, as is often the case, for the storage of crippled cars. It is a common practice with the railroad company at this point to cut a crippled car out of a through freight train and put the same on our siding. They may claim that they had a bill of sale for this siding and therefore we have nothing to say about it, but the one fact remains that it was our money that built the siding.

In the busy months we will have from 30 to 50 cars of coal per months, and possibly 4 cars of other material incoming. During this same time we will ship out from 100 to 150 cars. If the railroad company were to be allowed to charge us $2 per car for the placing of these cars on our siding for loading and unloading, as the case may be, we would pay them $350 to $400 per month for the service. The entire time taken by the switching crew to place the cars at exact points on our siding will not exceed 10 minutes per day over the time it would take if they were simply to kick the cars in. The switching crew understand thoroughly that the cars for loading must be put in first and the coal afterwards, so that with a proper arrangement of the cars when

coming to our siding, they usually pull out the empties and the loaded cars that are consigned out and then put in the empties, with the coal following, so that they have no extra switching movements. In the name of all that man could command, where would be the justice in allowing them to make a charge of $300 to $400 per month for this service?

In connection with all the above it should be borne in mind that brick rates generally have been so compiled by the railroad company that this cost of terminal work has been included, and we have so many inequalities to contend with at the present time that a further loading, as proposed, would almost break the camel's back.

We wish to enter our protest against this proposed charge, as it is uncalled for, unjust, and in many instances would establish discrimination, which we understand is just what the commission is now trying to dispense with. We will cite an instance: B has one siding on which all of his cars must be placed, whether same are to be loaded or unloaded, and for the placing of his coal or box cars for loading he is charged $2 per car. C, in the construction of his plant, has put in two sidings, on one of which incoming coal is placed for unloading, on the other of which box cars for loading are placed; as no particular point is designated, the railroad company kicks the cars in on the siding designated to receive them and no spotting charge is made. Assuming that each plant would handle 10 cars per day, B would have a charge of $20 to overcome in competing with the cost that C has to overcome, and on a plant making 40,000 brick per day, all other costs being equal, B would go into the market with a handicap of 50 cents per 1,000. This may not be discrimination as the commission understands it, but it certainly would be a rank injustice.

Assuming that a charge was permissible for spotting, then the railroad companies should be compelled to place a car at a point designated at such time as is convenient to the shipper. If they are to be allowed to charge us the price named for the placing of cars, we certainly would feel justified in demanding that these cars be placed at a time when we could load them and not at the convenience of the railroad company, as is now done. During the year just closed we have numerous instances where we have had to wait from two to six hours for cars, not because the railroad people did not have the cars, not because they did not have the engine and crew, but because it did not suit their convenience to serve us, while our neighbors just across the track from us, having the advantage of a connection with another railroad, can get their service at any time they ask for it. This may not be discrimination as the commission understands it, but it also is an injustice, as we see it.

As stated above, we object seriously to any charge such as that proposed by the railroad company being placed in force, and we wish to add our prayer to that of other manufacturers who are interested that this matter be given most careful consideration, and if it is investigated carefully at the various local points we are satisfied that the commission will not allow this increase in traffic charges, as that is what it will amount to.

Very truly, yours,

RIDGWAY BRICK CO.,
FRANCIS T. OWENS, *Treasurer.*

MERCHANTS COLD STORAGE & ICE MANUFACTURING CO.,
Richmond, Va., March 13, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: Regarding the free service of carriers, which has arisen in connection with the general advance in rates proposed by carriers under docket No. 5360, I. & S. No. 333.

Unless the railroads in Richmond had the private sidings, it would be impossible for them to handle the business. Instead of making a charge for spotting cars, the railroads should make concession to the owners of sidings, as we have to clean the cars and load them; whereas, if they had yard room and freight sheds enough to handle the business and the shipments passed through their depots, they would have to load and unload all cars, which would require more trackage, freight sheds, labor, and clerk hire.

It would not, in our opinion, be fair to the enterprises having sidings and doing work for the railroad to pay for the privilege of doing it.

The classification of most of the goods we handle, which go south, makes the rate on less carload shipments the same as on carload shipments. This is another reason why we claim that an allowance should be made when goods are loaded at private sidings.

We are forwarding this, our protest, and feel sure that the request of the railroads will not be granted.

Yours, truly

MERCHANTS COLD STORAGE & ICE MANUFACTURING CO.,
THOS. S. HERBERT, *Manager and Vice President.*

THE COCKLEY MILLING CO.,
Lexington, Ohio, March 13, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: We wish to file a protest with you in the most forceful language possible against the proposed charge by the railroads for spotting or placing cars for loading or unloading of merchandise. We are shippers of large quantities of flour, feed, grain, seeds, hay, etc., and such a charge would be a very great hardship as well as an injustice. We could give you many specific cases and will recite one. For instance, we have several grain elevators within a radius of 30 miles of our plant at Lexington, Ohio, and from which points we receive large quantities of grain.

If the proposed charge is allowed, a shipment of a car of wheat from the elevator at Bellville, 6 miles from Lexington, would entail the following charges: First, a possible charge of $2 per car for spotting the car at the Bellville elevator; to this would be added the freight from Bellville to Lexington of $12 per car, and when it arrives at Lexington there would be another charge of spotting at our plant of $2 per car. Instead of charging $12 per car, as is now the case, the charge would be $16 per car, or an increase of 33⅓ per cent.

We consider the proposal on the part of the railroad as preposterous, unreasonable, unjust, and we hope your honorable body will not see fit to countenance such a proposition on the part of the railroad. It should be remembered that the shipper is required to do all of the work pertaining to the loading of merchandise of nearly every description and the receiver is likewise required to perform the same duty, thus relieving the railroad from an immense amount of labor and expense.

Very truly,

THE COCKLEY MILLING CO.,
A. B. BEVERSTOCK, *President.*

M. J. GROVE LIME CO.,
Lime Kiln, Md., March 13, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

DEAR SIRS: We notice by the papers that there is considerable discussion, both pro and con, as to a possible charge for the spotting of cars, and we want to bring to your commission that our company, who handle from 5,000 to 8,000 cars per year, approve of a charge for the spotting of cars, and if this was carried out it would assist in relieving the stringent conditions as claimed by the railroad companies.

The present rates now in effect should not be advanced, but other methods should be pursued in adjusting the differences.

Any shipper receiving, at the hands of the railroad company, service over and above the natural conditions should be willing to assume the additional expense relating thereto.

Very truly,

M. J. GROVE LIME CO.,
E. A. GROVE.

WARREN BROS. CO.,
East Cambridge, Mass., March 13, 1914.

SECRETARY INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

DEAR SIR: In regard to matter of switching and spotting cars on private sidings, ferry car service, etc.

The undersigned respectfully petitions that the matter of advance rates in eastern territory be decided upon its own merits, and that the matter of free services, which has been unexpectedly included into this investigation, be made subject of separate and exhaustive investigation.

The shippers have been given at various times to understand that published rates properly included these various services, and it is our opinion, these being a fact, that if any discrimination at present does exist, the proper solution is not an assessment of an additional charge for these services.

It is needless for us to dwell upon the extreme importance and far-reaching effect of any radical upturn of existing adjustments.

Yours, very truly,

WARREN BROS. CO.,
E. SUTCLIFFE, *Traffic Manager.*

THE GOULDS MANUFACTURING CO.,
Seneca Falls, N. Y., March 13, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: We desire to add our individual emphasis to the petition of the National Industrial Traffic League presented to you a few days ago regarding free services performed by the railroad. We do not know that we can add anything to the record which has been brought out and which probably will be further emphasized during this hearing, except that our location in a small town instead of one of the larger centers does not change the relative relation of the industry to the railroad in a case of this kind. Our plant is the largest in this place and receives and ships probably as much as all the other industries put together. We have a large amount of money invested in sidetracks and a large trestle for raw material. The facilities at this station would not be sufficient to handle the business of the community if it were necessary to include our business with the other business, all of which is handled through the freight house and at team tracks. The railroad authorities admit that the operation of ferry car service to and from our plant saves them more than the cost of the service, as a large proportion of the outgoing shipments are not transferred from the ferry cars from our plant. The same is true of quite a large proportion of inbound shipments, the goods not being handled through the freight house, but delivered to the plant in the car received.

In investigating these services it should be borne in mind that instances of this kind, which effect a saving to the railroad of an amount equal or greater than the service performed, is certainly not free service. Your honorable body may make it possible for the railroad to increase their revenues by charging for such service, but we would respectfully call your attention to the fact that you are not helping the case of the whole body of shippers in eliminating discriminatory service. Instead of the local conditions working to the detriment of other shippers, or, as has been more commonly stated, the small shippers, the condition is just the reverse. We are not asking the small shipper to pay any of our freight charges, and do not believe that they are doing so. In investing thousands of dollars for the purpose of being in a position to take advantage of the services which have long been granted, we believe it is only fair to expect that such services should be continuous unless there is some discrimination shown.

It appeals to us that this investigation is of more importance to the shippers and railroads than the 5 per cent increase. The matter should be given very careful investigation and adequate time allowed to allow all concerns to be notified and given opportunity of presenting the facts.

Yours, truly,

THE GOULDS MANUFACTURING CO.,
L. J. STRONG.

CHICKASHA MILLING CO.,
Chickasha, Okla., March 13, 1914.

Mr. GEORGE B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: In the matter before the commission in regard to the requirement by the commission of charges to be made by railroads in official classification territory for the spotting of cars to industrial tracks, whether the tracks be railroad-owned switches or privately owned switches, we desire to state that we feel that we are interested in the outcome of this hearing, for while the matter in hand at the present time does not refer to railroads in territory in which we are situated, the effect of any decision in this matter will probably extend over the whole country.

It is our understanding that the final date for filing briefs in this matter is set for the 24th of March, and the 30th and 31st of March are set as the dates for hearing testimony in the matter.

This is a new proposition, the like of which has never been brought before the shipping public of the United States, and in our opinion the principle advocated is entirely wrong and unjust.

We feel that too short a time is allowed in this matter for the presentation of the facts, and we feel that shippers of the country should have an opportunity, after due consideration, to express their views in the matter. We hope the Interstate Commerce Commission will see fit to give further time to this matter, so that the views of

shippers all over the country can be expressed and arguments made in opposition to this proposal.

Yours, very truly,

CHICKASHA MILLING CO.,
M. E. HUMPHREY, *Secretary.*

WATERTOWN CHAMBER OF COMMERCE,
Watertown, N. Y., March 13, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: At a meeting of the board of directors of this organization held Thursday, March 12, the matter of the proposed charge to shippers and consignees for spotting cars and for service to private railroad sidings was considered, and the sentiment of the board was shown to be opposed to any such plan as an alternative to the proposed increase in freight rates.

It is the position of our board that such a charge for spotting cars and for service to private railroad sidings would prove a hardship to our industries; that such sidings are quite as beneficial to the railroad companies as to the manufacturers themselves. We also desire to point out that most of the sidings in our city were built and are maintained by the manufacturers and not by the railroad; and that the sidings relieve congestion in the freight yard, and thus greatly facilitate the freight service.

Yours, very truly,

WATERTOWN CHAMBER OF COMMERCE (Inc.),
F. H. LAMON, *Secretary.*

ST. LOUIS, MO., *March 13, 1914.*

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

In the matter of proposed 5 per cent increase in freight rates.

GENTLEMEN: We note that you will hold hearings and will accept statements and briefs filed before March 24 bearing on the question of service to private spur tracks.

There may be conditions under which an additional charge for switching service is justified, but we believe that an additional charge is not warranted in cases such as ours and requiring the service that we require.

We have a spur track from the Lesperance Street yard of the St. Louis, Iron Mountain & Southern Railway. This spur, as you will see from the attached tracing, serves several industries. The portion of the track assigned to our use was paid for by ourselves, and yet remains the property of the railroad and the railroad reserves the right to extend and use this track for other than our shipments.

We quote from an agreement between ourselves and the St. Louis, Iron Mountain & Southern Railway Co.:

"The second party (Monsanto Chemical Works) shall, without cost to the railway company, have city ordinance passed in the name of the railway company permitting construction, maintenance, and operation of the track" and, "the said second party shall pay all premiums on the bond required by the city under said ordinance."

"The railway company shall construct a spur track about 362 feet long to serve the chemical works of said second party, upon the terms and conditions contained in this agreement, for the purpose of receiving and delivering shipments made to or by second said party, and for use or extension by the railway company for any purpose which in the opinion of its general manager does not unreasonably interfere with the shipments of the second party.

"The railway company shall furnish the necessary crossing, planks, bumping-post rails, switching fixtures, spikes, etc., and perform the labor necessary to lay said track at the entire cost and expense of the second party, including the estimated cost of the grading, ties, and drains, to be furnished by the railway company, and the party of the second part shall at its own sole cost have the water meters and telephone poles that will interfere with the proposed new track moved so as to properly clear said track. The title to the said track, including all material entering into the construction thereof, shall at all times be and remain in the railway company."

We being within the switching limits of St. Louis, rates to or from St. Louis, which absorb switching, apply to or from our track.

The service performed by that railway company is to place cars on this track for loading or unloading, the understanding being that there will be one movement a day, whenever we have cars to deliver the railroad or the railroad has cars to deliver us. When the railroad has two or more cars to place on our track we do not demand that they spot each car separately, but all the cars are placed as switched, and any further movement is done by ourselves. Whenever we have carloads going out, we endeavor to use a car which has been placed on our track loaded, so that there is only one movement of this car for both transactions.

We are benefited by having carload freight placed on our track, as it is more convenient for us for unloading or loading. The railroad is also benefited. Cars placed on our track are, as a rule, loaded or unloaded the same day they are placed; whereas if placed on a team track and unloaded by wagon the car would be held probably two days, the full free time. The railroad being able to place our cars on our track does not have to provide room for these cars on team tracks in their yards. This helps to prevent congestion in these yards and also enables the road to do its team-track business with a smaller track space than would be the case if all carload business was placed on team tracks. Whether the railroad places a car on its team track or on our track, there is a switching movement involved and any extra expense there may be is compensated by the additional yard or track space furnished the railway, and entirely at our expense.

In addition to $85.58 paid by us for changing water meters, telephone and telegraph poles, etc., incidental to installing this track, we have paid the St. Louis, Iron Mountain & Southern Railway $985 with the idea that this installation would enable us to economize on our team hauling. It would now hardly be fair to exact a switching or other charge for placing cars on this track, unless it be provided that the railway company refund to us the amount we have expended for this track, and particularly as the title is and remains in the name of the railway company when the entire cost has been paid by us.

Mr. J. S. Devant, commissioner of the Memphis freight bureau, has stated that when franchises were granted the several railroads coming into Memphis, a provision was inserted that no switching charge ever should be exacted by the railroads of Memphis shippers who had built sidings to allow for local spottings. If this is true, any assessment of charges for a similar service in other localities would be a discrimination against the shippers and receivers of freight in those localities.

Respectfully submitted.

MONSANTO CHEMICAL WORKS,
W. R. PHEMISTU.

CANADIAN MILL & ELEVATOR CO.,
El Reno, Okla., March 13, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: In reference to the proposed charging for spotting of cars to privately owned sidetracks or other industrial tracks owned by the railroad company, we wish to say that it seems to us that there is no further service performed by the railroad in delivering cars to tracks at private industries than there would be if such shipments were delivered to public team tracks.

It is our opinion that should such a charge be assessed it would result in the termination of the use of private industrial sidetracks and compel the railroads to receive this freight either over the platform or on public sidetracks, where the railroad would have to furnish men to check it into and out of cars, and consequently would result in larger expense to the railroads than they now incur in handling such shipments.

We believe that the custom of loading carload shipments at private sidetracks is a benefit rather than a detriment to the railroad interests, and instead of causing them an additional expense, for which they should charge the shipper, we believe that the situation is the other way around, and that the railroads are saved thereby expenses that the shipper bears through investment in sidetrack facilities.

Yours, very truly,

CANADIAN MILL & ELEVATOR CO.,
H. DITTMER, *Manager.*

COMMERCIAL CLUB OF ABERDEEN,
Aberdeen, S. Dak., March 13, 1914.

SECRETARY INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

DEAR SIR: We are informed by the Chamber of Commerce of the United States of America, in the matter of the proposed charge for service, such as spotting cars, industrial tracks, trap cars, etc., by the railroads, that it is the desire of the Commerce Commission to hear directly from commercial organizations over the country who have an interest in this matter, giving the data as to the number of firms affected at a given point, number of industrial spur tracks, and approximately what their business aggregates.

I have therefore compiled the following data: Number of firms affected by such services in Aberdeen, 36; number of such firms having industrial or spur tracks to their places of business, 32; approximate number of cars spotted during the year, 2,800.

In almost every instance the shippers represented by this organization are opposed to the proposed charge, for the reason that they believe that the general tendency of freight rates in this entire section in comparison with other portions of the country, and especially the country east of here, are high. This charge would place an added burden upon shippers of this part of the country without giving them any advantage by removing the disadvantage in comparative freight rates which already exists.

Respectfully, yours,

H. O. COOLEY,
Secretary.

Have you tried the "Key to the Northwest"?

UNION DRAWN STEEL CO.,
Beaver Falls, Pa., March 13, 1914.

Hon. E. E. CLARK,
Chairman Interstate Commerce Commission, Washington, D. C.

HONORED SIR: The newspapers and traffic magazines are full of information these days about hearings had and to be heard before your honorable commission in the matter of making a charge by carriers in official classification territory for spotting cars for loading and unloading on private spurs and sidetracks, also for trap and ferry car service.

This matter, we understand, is to be heard in oral argument before the commission at Washington March 16 and 17. This matter of a spotting charge by carriers is one in which we are greatly interested with other shippers and receivers of freight in Beaver County, Pa. We have tried to ascertain just what is intended by the term "spotting cars"; one authority states this charge is intended to cover what is sometimes called intermill switching—i. e., a car is placed at one point in the mill, partly loaded or unloaded, and switched by railroad power to another point in the same mill to be made entirely empty or completed loading. We are now paying for this service. Another authority advises that charge would be made for original placement of loaded or empty cars at unloading or loading platforms, the railroad simply putting cars in the clear from main line.

Won't you kindly advise us at your earliest convenience what is meant by the term "spotting cars," so that we will be fully posted in the premises?

Yours, very truly,

UNION DRAWN STEEL CO.,
By A. W. BOYD, *Traffic Manager.*

NATIONAL IMPLEMENT & VEHICLE ASSOCIATION
OF THE UNITED STATES OF AMERICA,
Chicago, March 13, 1914.

EDGAR E. CLARK, Esq.,
Chairman Interstate Commerce Commission,
Washington, D. C.

SIR: This association, representing as it does the manufacturers and distributors of the greater part of the country's output of farm-operating equipment, and thereby being the receivers of a great volume of incoming materials and outbound finished products, is greatly interested and concerned in the issues involved in connection with the proposed assessment of charges for the switching, placing, or delivering of cars for loading or unloading on industry sidetracks, and for other similar service.

The commission has announced that all statements and briefs in this case must be filed by March 24 and that oral argument by counsel will be heard by the entire commission on March 30 and 31. This allows of

entirely insufficient time for the preparation of such statements and briefs by these interested shippers, and it will not enable them to present their contentions and views fairly and completely before the commission in the time allotted.

This association desires to urge, therefore, that you consider the gravity of the situation from the shippers' standpoint and that you and your associates of the Interstate Commerce Commission refrain from definitely and finally concluding this matter until such time as all interests have had reasonable notice in which to present their cases.

Yours, truly,

E. W. MCCULLOUGH.

—

SAVAGE MOUNTAIN FIRE BRICK CO.,
Frostburg, Md., March 13, 1914.

Referring to spotting of cars on private sidings.—Interstate Commerce Commission Docket 5860, I. and S. Docket 333.

Hon. E. E. CLARK,
Chairman Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: We wish to make a strong protest against this extra charge to us.

We built the siding at our own expense and the cost of maintaining same we bear also.

The Cumberland & Pennsylvania Railroad in our case is not put to as much trouble or expense as they are to many of the so-called public sidings.

If the amount suggested, 7½ cents per ton, be adopted on a cheap commodity like brick, it would handicap us against those who ship on public sidings.

Very truly, yours,

SAVAGE MOUNTAIN FIRE BRICK CO.,
JOHN A. CALDWELL, *Vice President.*

—

THE AMERICAN FACE BRICK ASSOCIATION,
Pittsburgh, Pa., March 12, 1914.

Relative to a proposed charge for the "spotting" of cars on private side tracks.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

DEAR SIRS: The members of this association, numbering at present 26 selected manufacturers of face brick, whose output will probably exceed 50 per cent of the product manufactured in official classification territory, are deeply concerned in your present consideration of the propriety for a charge for the so-called free service of "spotting."

The manufacture of face brick is to-day upon a bitterly competitive basis. The supply of raw material—clays—is so widely distributed throughout the country that competition in every branch of the brick business is yearly increasing. The cost of manufacture is likewise on the increase, notwithstanding the fact that the progressive brick manufacturer is a keen student of efficiency methods, and is striving night and day to cut down the manufacturing cost. On the other hand, the average price of face brick per thousand brick has declined from $12.97 in 1895 to $11.62 in 1912, these figures being quoted from reports issued by the United States Geological Survey. You will note that as face brick will average 6 pounds in weight, the approximate average price per ton on the basis of the above 1912 figures would be $3.87.

We do not feel that a charge for "spotting" in the instance of face building brick would be either reasonable or just. The business is confined almost wholly to the movement of heavily loaded cars of extremely low-valued material. On account of the extremely limited liability for damage, the heavy average loading of cars, and the more than satisfactory per car per mile revenue returns, which can be shown by the selection at random of almost any face-brick rate, the transportation of brick under the present scale of charges is a highly desirable traffic, and, we believe, is bearing its full share and probably a great deal more than its proportion of the general transportation burden.

The nature of the business of manufacturing face building brick is such as to dispel the theory that the users of sidings are enjoying a preference over that of the competition which has to dray or truck its product to the team tracks of the railroad. The manufacture and sale of face brick would be an entirely illogical venture without adequate transportation facilities, and, for this reason, an investigation would develop the fact that very few, if any, face brick are manufactured in official classification territory not having direct access or railroad loading facilities in the nature of private spurs or side tracks.

An investigation of the conditions in this industry would probably disclose the fact that the vast majority of private sidings have been installed entirely at the manufacturer's expense, and that he annually pays out varying amounts for repairs for the very facility by which the railroads are able to secure an enormous tonnage which they would be deprived of were such facilities nonexistent.

The time between the announcement of the investigation as to the propriety of a charge for "spotting" cars and the date of the hearing was entirely inadequate for this association to collect statistics to show the impracticability and injustice of permitting a charge in addition to the present published rates. For this reason this association did not enter an appearance at this hearing. We did not feel that in such a state of unpreparedness we would be able to do justice either to you, the railroads, or ourselves; but if a later opportunity should be offered to the shipping public to present sound facts and correct figures with regard to this subject, we would like to have your early advice regarding.

Considerable uncertainty in the attitude of our members is occasioned by our ignorance of exactly what your body defines as "spotting." If it is consistent, we would very greatly appreciate your favoring us with a precise definition of the term "spotting." We would like to inquire, also, whether the commission, in the event its permission is given to the railroads to make a charge for "spotting," would consider the suspension of particular spotting tariffs, in order to make an investigation as to whether any charge is proper for the services rendered, or, if a charge is justified, to consider the reasonableness of same.

Thanking you in advance for favoring this office with any information bearing on this subject, we are,

Yours, respectfully,

THE AMERICAN FACE BRICK ASSOCIATION,
R. D. T. HOLLOWELL, *Secretary-Treasurer.*

THE ROBINSON CLAY PRODUCT CO.,
Akron, Ohio, March 12, 1914.

Hon. E. E. CLARK,
Chairman Interstate Commerce Commission,
Washington, D. C.

Subject: Referring to the question of charges for spotting cars on private siding. Interstate Commerce Commission Docket 5860, I. & S. Docket 333.

DEAR SIR: In an opinion rendered February 3, in case 4606, 29 I. C. C., 428–438, entitled "Youngstown Sheet & Tube Co. et al. *v.* Pittsburgh & Lake Erie Railroad Co.," the commission held, that "Where for a long period of time rates have been the same, and no complaint has been made in reference thereto, the presumption obtains that they are reasonable."

This opinion, we believe, is a logical one in all cases where the action on the part of the carriers is such that the element of unlawful practice does not enter, as has seemed to be the case in a recent investigation.

As you well know, the practice of placing cars on private sidings has obtained since the advent of steam railroads in this country, no complaint having been made by the transportation companies, nor is it our understanding that they are making complaint at the present time. It is therefore reasonable to suppose that inasmuch as loaded and empty cars have always been placed by the carriers without charge, and that as it has always been understood that the line rate covered this service, the presumption should obtain that the practice is a reasonable one.

We have recently noted that statements have been made to the commission that rates published by the carriers do not include the cost of terminal service. It is our understanding that it is a matter of record that the New York to Chicago basis, upon which the rate structure in Central Freight Association territory is based, includes a certain percentage of the rate for terminal service on the part of the carrier. Such being the case, a spotting charge would result in a charge for service included in the line rate.

We appreciate that the intention of the commission is to prevent discrimination, if it is found to exist; the action being a laudable one, however, we believe that as your investigation proceeds you will appreciate the numerous possibilities for discrimination to occur if a charge for the service in question were allowed.

This company operates seven plants for the manufacture of clay products. At two of these factories the volume of business is such that we have provided switch engines for the placing of cars for loading and unloading. At the remaining five factories cars are placed by the carriers on tracks owned by us. A large amount of money has been expended by this company in the construction of terminal facilities and upkeep of same.

Under these conditions, if the spotting charge is allowed, we must actually pay the carriers a premium on all business handled, as the small shipper will receive free terminal service while the larger one pays for terminal service on terminals furnished at considerable expense, the result being that the manufacturer with owned sidings is penalized for such an expenditure, notwithstanding the fact that the construction of private sidings is of direct benefit to the carrier.

The cost of placing cars for loading or unloading at our various factories will not exceed the cost for placing cars on public team tracks owned by the carriers in this territory. Under the proposed method of making a charge for placement of cars, numerous discrepancies will occur on account of failure to charge for each placement, unless the clerical force of the carriers is largely augmented, a condition in all probability that will not be changed.

A decision that would permit of a charge for service in question would raise the point of equalization of manufacturing conditions. The commission held, we believe, in the case entitled "In the matter of allowances to short-line railways," that the railroad companies could not lawfully do anything whatever that would tend to equalize manufacturing conditions between various manufacturers, neither do we believe that the commission has such powers conferred upon them by statute.

Yours, truly,

THE ROBINSON CLAY PRODUCT CO.,
ALVIN HILL, *Traffic Manager.*

—

BLISH MILLING CO.,
Seymour, Ind., March 12, 1914.

The SECRETARY OF THE INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

DEAR SIR: With reference to contemplated charge of the railroads for "spotting" cars, we wish to point out that this switching of empty cars into private sidings for loading by manufacturers is really economy for the railroad. For instance, our own plant is located within a few yards of the freight depot. Should a charge for switching become effective, we shall deliver all of our product to the local freight depot, secure bill of lading thereon, and this new process of loading would be very much cheaper for us. At practically no cost to us we could deliver all of our flour to the depot and could dismiss from our own loading force seven or eight men now engaged in loading out cars. The railroad company would have to hire probably more than this many men to load our stuff after it was delivered at the depot.

If this side of the question has not been brought to your attention, we believe it is worth considering.

Yours, very truly,

BLISH MILLING CO.
E. BLISH THOMPSON, *Secretary.*

—

CHAMBER OF COMMERCE OF THE CITY OF MILWAUKEE,
March 12, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

In the Matter of Spotting Cars, etc.

GENTLEMEN: The members of this chamber of commerce are not willing to concede that the carriers are now performing services free for which they should be compensated.

It has always been understood that the freight rate has included compensation for all services from the point of loading to the point of unloading, regardless of whether the tracks or other facilities at terminals were railroad owned or privately owned.

So far as the grain received at Milwaukee is concerned, any new charge made in addition to the present line-haul freight rate would be charged against the grain and be at the expense of the producer.

In some instances, where millers or malters buy grain at other primary markets for shipment to Milwaukee, any additional charge for "spotting" of cars would be an expense to the manufacturer, and would have to be added to the cost of the manufactured article.

It hardly seems necessary at this time to review the situation with respect to the rates on grain to Milwaukee from points in Iowa, Minnesota, and South Dakota, which we feel are already too high without adding any further cost of transportation, and which subject is now in the hands of the commission for adjudication.

It is a well-known fact that bulk grain into or out of a primary market can not be handled on "team tracks." All elevators, flour mills, malting houses, etc., are necessarily located on sidetracks owned by the railway companies. In many instances the greater part of the expense of building such sidetracks was borne by the concern located on same. These sidetracks constitute a part of the railway companies' terminals. It would be a physical impossibility for the carriers to serve such industries from their team tracks.

To assess an extra charge for the loaded car from these industries at Milwaukee and then again at the final point of destination simply means the compounding of charges in addition to the line-haul freight rate, all of which would result in a general disturbance of commercial conditions and much higher cost of commodities to the consumer.

We respectfully urge that your honorable commission permit no additional charge for "spotting of cars" be assessed by the carriers.

Yours, respectfully,

GEO. A. SCHROEDER,
Manager Freight Bureau.

—

WOODWARD & SON,
Richmond, Va., March 12, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: We understand that the Interstate Commerce Commission is considering the advisability of allowing or requiring the railroads to make an extra charge:

(1) For trap or ferry car service.

(2) For spotting cars for loading or unloading on private sidings.

As we feel that such an extra charge would be very unjust and inequitable, we are writing to protest against such a charge being allowed or imposed, especially in the second case mentioned above. The fact that a large percentage of the outgoing and incoming carload freight is loaded and unloaded from private sidings is of inestimable benefit to the carriers, whose terminals would otherwise be so congested that it would be practically impossible for them to handle anything like the present volume of business without a large additional outlay of capital. In other words, while it is undoubtedly beneficial to the shippers who own private sidings to have the railroads spot cars on these sidings for loading and unloading, we feel that it is still more beneficial to the carriers themselves to have these conditions exist, and that the imposition of an extra charge for spotting cars on such sidings would be detrimental to the interests both of the shippers and carriers.

Yours, very truly.

WOODWARD & SON.

—

THE QUEEN'S RUN FIRE BRICK CO.,
Lock Haven, Pa., March 12, 1914.

Hon. E. E. CLARK,
Chairman Interstate Commerce Commission,
Washington, D. C.

Subject: Question of spotting charge on cars on private sidings. Interstate Commerce Commission Docket 5860, I. & S. Docket 333.

DEAR SIR: Although this company has received no official notification of the proposed spotting charge, we have learned through the press and otherwise that the matter has been up for discussion before your commission for some little time.

It has always been our understanding that the present freight rates in the official tariffs published by the various railroads included the so-called spotting charge at the place of loading as well as the placing on private or public siding at the point of unloading.

This company has a private siding at its tipple at Queens Run Station, Pa., measuring 1,170 feet, on which the cars are shunted by the Pennsylvania Railroad, the actual placing of the cars under the tipple being taken care of by our own men. At our works in Lock Haven, however, we have a private siding with a total trackage of 3,396 feet from the point where it branches from the main line of the Pennsylvania Railroad. The railroad not only places the cars on this siding, but spots the cars for loading in front of the various kilns and also places our loaded coal cars and loaded clay cars on the trestle for unloading.

On the average 327 loaded cars are handled in and out on both sidings per month, and at the proposed charge of 7½ cents net ton for spotting the service would aggregate about $13,000 per year. We, at the present time, enjoy a rate of 15 cents net ton on raw material from Queens Run Station to Lock Haven, and with the proposed spotting charge of 7½ cents ton at both ends you can readily see that this freight would be increased 100 per cent. The aggregate increase of $13,000 per year above referred to would mean $1.30 per 1,000 on a production to 10,000,000, and it would seem to us that such a charge on the part of the railroad company would be most unreasonable.

The rate of 15 cents per ton on raw material is equivalent to 5 cents per ton mile, and it is our understanding that the average revenue to the railroads is not over three-fourths cent per ton-mile, which would indicate that the rate of 15 cents would cover any spotting service that may have been rendered by the railroad company.

Our plant is located in a town of about 8,500 inhabitants, and there are many similar plants located in this locality which have their private sidings and which, it has always been our understanding, were established as the most economical method of handling such traffic by the railroad company. The nature of the product would prohibit its being carted to any public terminal, and if such a thing were possible, the railroad company does not afford proper local facilities for such a method.

It would seem to us that a spotting charge of any kind would be unjust and discriminatory against fire-brick manufacturers, because in some cases these private sidings have been established and maintained by the individual companies, and for no other purpose than the most economical handling of their product by themselves and the railroads handling the traffic.

We therefore most certainly object to any such increase; and we sincerely trust that the matter may be viewed from all points before any definite action is taken, as if such a charge is made it would be a great hardship to the manufacturers and consumers of fire brick and other other fire-clay products.

Trusting therefore that the matter may have your favorable consideration, and thanking you for your attention, we are,

Yours, very truly,

THE QUEEN'S RUN FIRE BRICK CO.,
GEO. H. DIACK, *Secretary-Treasurer.*

—

THE HOLLY SUGAR CO.,
Huntington Beach, Cal., March 16, 1914.

Mr. G. B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: Our attention has been called to hearings held before your honorable commission relative to possible propriety of carriers imposing charges in addition to the freight rate for the spotting of cars on private tracks.

We are uninformed as to the scope of your inquiry, or as to all the conditions under which tracks might be termed "private side tracks" within the meaning contemplated by the commission in its consideration of the subject, and in the formation of its opinion or possible rules relating thereto. However, it does occur to us that should the commission arrive at a conclusion that lines in official classification territory should make an extra and separate charge for placing cars on so-called "private side tracks" for loading or unloading, such a conclusion might carry with it the possibility of similar rules being promulgated later in western territory, either at the suggestion of the commission or with its approval. If the conclusions of the commission in this matter are fraught with the possibility mentioned, then we beg to submit that western shippers are interested equally with the shippers within official classification territory, in which case it seems to us that they should be afforded opportunity through public hearings at several points to lay before the commission evidence as to the conditions surrounding the operation of such tracks throughout the West.

Speaking for the beet-sugar industry, and taking this plant as an example, I beg to say that the carriers have never been given instructions to make certain switches at specified hours of the day, and that we have no intraplant switching, and consequently the occasion of publishing a charge therefor has not arisen. At our Colorado plants the Santa Fe publishes a charge for intraplant switching, but it is very seldom they move a load for us which does not move into the plant from an outside point, or move from the plant to an outside point.

Compensation for such service as spotting cars for sugar plants has always been included in the freight rate, as the necessity for such service was well known and thoroughly understood when rates were established from time to time, and the rates have contemplated the performance of the service. As a matter of fact, sugar beets, to the best of my knowledge, are always destined to a sugar plant, using what you might term "private side tracks." Sugar in carloads usually moves from a sugar plant. Therefore it can not reasonably be said that in fixing rates on beets and on sugar the services under consideration were not contemplated, as it is only in isolated cases, if at all, that either beets or sugar are handled in carloads without the necessity for such service. No discrimination between the receivers of beets and the shippers of sugar can be charged, as all require and all receive practically the same service. Conditions may vary somewhat, but I am under the impression they are substantially the same as to beet-sugar factories throughout the West.

If we are correct in anticipating that the far-reaching effects herein referred to might follow any possible ruling of the commission, or expression of an opinion by it on this subject as related to official classification territory, we respectfully urge that the matter be not determined until after a more extended investigation, including public hearings at convenient points in the West, of which we believe notice should be given far enough in advance to enable shippers to prepare accurate and comprehensive data to lay before your honorable commission.

Please advise us as promptly as possible of action taken, and oblige,

Yours, truly,

C. A. JOHNSON.

—

FORT SMITH TRAFFIC BUREAU,
Fort Smith, Ark., March 16, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

SIRS: The receivers and shippers of freight of Fort Smith, Ark., members of the Fort Smith Traffic Bureau, a voluntary association for their mutual benefit and protection protest to your honorable body against the hurried conclusion of the investigation of the practices of the carriers in official classification territory, in matter of placing cars for loading and unloading, use of trap-car service, diversion in transit, reconsignment, and other privileges under tariff authority, without full and complete investigation of conditions obtaining in other parts of the United States subject to your jurisdiction and direction.

Many industries, warehouses, places of business, etc., in this city, are served by tracks reaching thereto from the main lines of the different carriers. Some of these tracks have been built wholly at the expense of the carriers, and where the same extend beyond the confines of the right of way, the ground used has been supplied at the cost of the individual, firm, or corporation benefited, or in the case of the use of streets and alleys, by proper city ordinance. In other cases, the ground and a large portion of the expense of constructing the switch have been paid for by the shipper.

These facilities seem beneficial to the carrier as well as to the shipper, as they relieve the carriers' terminals of congestion and aid in a more economical receipt and delivery of freight than if handled through regular freight stations, or to and from team tracks located upon the recognized right of way proper of the carriers.

It is understood that the present investigation does not comprehend conditions outside of the official classification territory, at the same time, it is our opinion that should the carriers in that territory be permitted to charge for this service, the carriers in other territories would undertake to inflict traffic with similar burdens.

In view of the different conditions attending these services at the various principal shipping points of the country, we respectfully ask

that sufficient time be given for consideration of this question to inquire into the facts as they relate to the shipping business of this city.

Respectfully,

B. D. CRANE,
Chairman.
F. B. DUNLOP,
ED. BALLMAN,
Executive Committee.
C. D. MOWEN,
Commissioner

—

LANSING, *March 5, 1914.*

LANGELAND MANUFACTURING CO.,
Muskegon, Mich.

GENTLEMEN: We have your favor of the 3d instant stating that you are under the impression that the rates on the Michigan railroads are to be raised some time in the early part of March, etc., and ask us to advise you if this change of rates simply means a 5 per cent advance in all rates, both classified and commodity, or if they propose to place commodity rates under tariff rates, and advising that you are particularly interested in lumber.

In reply we beg to advise that in compliance with the request of the commission the railroad companies during 1912 and 1913 made an entire recheck of all class rates in this State for the purpose of harmonizing them and removing discrimination. This would naturally result in reductions in some instances and advances in others, the final result representing about an average advance of 5 per cent, although no particular percentage was agreed upon. The tariffs carrying these new rates were filed to become effective November 15 last. The carriers of their own accord and without authority or permission from this commission saw fit also to change their commodity rates, advancing some by the regular method and others by canceling the commodity rate and advancing it to the sixth class, which in most cases was the way they treated the rate on lumber.

Just about the time when these new class rates showing these advances were ready for publication, the railroads of the entire country made application to the Interstate Commerce Commission to be permitted to enjoy a 5 per cent horizontal advance in all rates. Therefore the Michigan roads included their recheck advance in connection with the tariffs carrying this 5 per cent advance, which made the tariffs both State and interstate. The Interstate Commerce Commission suspended the tariffs effective November 15 until March 12. This commission having authority to suspend the effective date of tariffs in this State only 45 days, made an arrangement with the carriers in this State to suspend the interstate portion of the tariffs in question concurrently with the suspension of the Interstate Commerce Commission of the same tariffs. These have, with the Interstate Commerce Commission and agreement of the commission, been again suspended until September 12 next.

However, it is not understood that these suspensions affect the lumber rates, and at a conference recently held before this commission in Lansing, particular reference was had to lumber rates, the larger portion of the lumber interests of the State being represented at such conference. The Michigan Central, Lake Shore & Michigan Southern, Grand Trunk, and Detroit & Mackinac having previously been permitted to cancel their rates which were under suspension, carrying decided advances, and issue new tariffs representing a straight 5 per cent advance over the old rates, and which being lower than the rate carried in the suspended tariffs, were received for filing. These become effective March 12, and upon request of some shippers will be suspended 45 days pending investigation and hearing. At this conference, the roads operating in the western part of the State, being unable to arrive at a satisfactory rate with shippers, advised the commission they would at once prepare and file their idea of what would represent a proper advance in lumber rates and if the same were not satisfactory to shippers that they could, by giving a reason therefor, request the commission to suspend the effective date of those tariffs 45 days pending investigation and hearing.

For your information we would state that none of the roads concerned in this agreement have as yet filed any tariffs to take the places of the tariffs suspended, and we are writing several of them on this date to determine what, if any, action has been or is supposed to be taken in the near future. We think if you will address a letter of inquiry to Mr. J. C. Knox, secretary of the Hardwood Lumber Dealers' Association, Cadillac, Mich., he will be able to keep you in touch with all the conditions from time to time.

Respectfully, yours,

MICHIGAN RAILROAD COMMISSION,
(Signed) By C. L. GLASGOW, *Commissioner.*

—

FORT WORTH FREIGHT BUREAU,
Fort Worth, Tex., March 16, 1914.

Mr. GEORGE B. MCGINTY,
Washington, D. C.

DEAR SIR: Will you please be kind enough to refer to the petition inclosed with my letter of March 14 and change the dates shown in the first two lines of paragraph 2 to read March 30 and 31 instead of March 16 and 17.

Your kindness in making this change in the petition will be appreciated.

Yours, truly, R. O. MCCORMACK.

—

ELGIN, ILL., *March 17, 1914.*

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: My experience.—I was an employee of the Prussian State Railway from 1863 to 1871. Everybody had to pay for every service rendered, the laborer traveling fourth class to the King (at that time) traveling first class; no special privileges—I liked that—no free baggage, no children free, even dogs had to have a dog ticket. When I had a day off every three weeks a free ticket (pass) was furnished me to go home and see my parents, but no other member of my family was entitled to a pass.

American railways have been privileged, passed, and overcapitalized to death.

In 1872 I came to America and went into the mercantile business and liked it better. Having been in the dry-goods business for 31 years my experience in freight shipments has been varied. Concerning efficiency, there is lots of room for improvement, in my humble opinion.

I remember a case when a shipment of ladies' skirts, per Chicago & North Western, was consigned to me. The case was miscarried; I had to pay for the goods; the Chicago & North Western Railway Co. gave no satisfaction. A few months later the case was found in some freight house. Rats had raised families in the box and the goods damaged, out of season, out of style. The local agent offered me a few dollars' damages, which I refused to take. I went to the claim office in Chicago; was received by some kind of a lawyer; this hireling served short notice on me, if I would not accept I could sue and probably would have a lawsuit for the rest of my days. Very well; I accepted, took the goods, pocketed the loss, and kept shy of the Chicago & North Western.

Efficiency again.—Two years ago my store burned down; I put up a new building, white terra cotta front, manufactured near Chicago, shipped to Elgin, 38 miles, per Chicago & North Western Railway Co. The store was rented at $325 a month, and I agreed to have it finished September 1, 1912. One carload of the terra cotta was lost in transit; finally found after some twenty-odd days on a sidetrack at West Chicago. We could not finish the front and windows; the store was finished at the end of September. I lost a month's rent; felt like swearing; still I kept out of a lawsuit, because $325 do not go very far in fighting a powerful corporation.

Still there are two sides to every question; railroads, stores, banks, farmers are blessed or cursed with careless employees and hundreds of other troubles. Attending the hearing at Washington, I should like to, but it is impossible for various reasons.

Very respectfully, yours,

FRED SAUER.

—

THE COLORADO MANUFACTURERS' ASSOCIATION,
Denver, Colo., March 17, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: Referring to hearings now before the commission in regard to charging for the spotting of cars on sidetracks, etc.

Inasmuch as this is one of the most important questions now before the commission and one in which the shippers throughout the entire country are very much interested, we would respectfully ask you to not hurry the ending of these hearings, but that you give time enough for each community which desires to do so an opportunity to be heard on this question before the commission.

Yours, truly,

F. W. MAXWELL, *Commissioner.*

—

THE WOODVILLE LIME & CEMENT CO.,
Toledo, Ohio, March 17, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: We wish to register our protest against the plan of charging shippers who have use of private tracks to their plants a spottage or shifting charge per car. The unfairness and injustice of this proposition to the shipper is manifest, and the plan certainly is not based upon any sound principle, but has the appearance of having been devised as a "way" out. If the railroad companies are entitled to more money for their service, we can not see why it should not be given in the way of increased rates so that this extra will be borne by the consumers in general instead of loaded onto some manufacturers who happen to come by definition within the scope of the plan. A fixed charge per car, regardless of value or form of contents, is strictly opposite to the present system, and if you argue that it costs the railroad companies as much to spot one car as another and the value does not enter in, why should this same plan not be adopted for the haul as well as the spottage? In our opinion the adoption of this plan would create more complications in all freight shipments.

We handle on an average 7,500 cars per year and we certainly can not afford to stand this charge ourselves, as our selling price to-day is practically what it was three years ago, and in that time there has been much increase in the manufacturing expense—labor, repair parts, and general expense. In our business our price is a factory price and the dealer pays the freight.

Yours, very truly,

THE WOODVILLE LIME & CEMENT CO.,
Per G. H. FAIST.

—

MAYFLOWER MILLS,
Fort Wayne, Ind., March 17, 1914.

Mr. GEORGE B. MCGINTY,
Secretary of Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: We are writing to urge a very thorough investigation of the talked-of charge for spotting cars on private sidings, if a move of this kind is contemplating.

In our case here, we are rendering the railroad a valuable service in loading the cars and move them on our siding with a car puller.

We have built our plant with a view of performing this service economically and do not believe it would be your purpose to waste this equipment and service which in the end, if taken away, would probably put us out of business.

Thanking you in advance for your consideration in this matter and trusting to hear from you, we remain,

Yours, very truly,

MAYFLOWER MILLS.

—

THE LEE LIME CO.,
Lee, Mass., March 17, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: We wish to enter our protest against the proposed charge for switching cars to private railroad sidings, as it would be a hardship to us and change present competitive conditions. Our competitors could load their cars at the railroad siding without having to pay any switching charges; and since we handle about 2,000 cars per year, this would be a very serious handicap to us. It would be impossible to pass this charge on to the consumer, as in the case of increased freight rates.

Furthermore, it does not seem fair to charge $2 for switching a car of lime, which amounts to in the neighborhood of $120, when you will switch a car of paper, which amounts to from $1,500 to $1,800, for the same price. This means discrimination against low-priced, heavy commodities, and is manifestly unfair on the face of it. Will you please

advise if there is a switching charge when a private engine is owned and operated to do the switching at any plant?

Very truly, yours,

THE LEE LIME CO.,
By M. H. DEELY.

—

JOHN D. OWENS & SON CO.,
Owens, Marion County, Ohio, March 17, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: We understand there is a move on your part to compel the railroad companies to make a switching charge for switching done on tracks located on private land. We are shippers of a large number of cars each year, and we wish to strenuously object to any proposition of this kind as a general one. It may be true there are cases where it would be advisable or considered fair or necessary that such an action should be taken. We personally do not, however, believe that it is possible to handle the railroad situation as a whole, but the only satisfactory way it can be handled is by sections, taking each railroad and each condition by itself. We personally feel that the larger responsibility for the railroads not making what they consider a fair profit or margin is up to themselves, inasmuch as that if they would handle the shipments promptly, save delays in cars, and make more mileage they would have no cause to ask for increased rates of any kind as a whole, and some sort of a plan that would penalize them for slow movement of freight would mean, in the end, more to their profit than any other plan. We remain,

Respectfully,

JOHN D. OWENS & SON CO.,
C. A. OWENS.

—

THE PFAU MANUFACTURING CO.,
Cincinnati, Ohio, March 17, 1914.

INTERSTATE COMMERCE COMMISSION,
Mr. GEO. B. MCGINTY, *Secretary, Washington, D. C.*

GENTLEMEN: The question of terminal charges on cars moved by the railroads on private sidings is the question before us to-day, principally Cincinnati, on account of being one of the first four of the large cities picked out for data concerning the propriety of charging for this service, also the amount to be charged.

We have always understood that the freight rate on shipments handled on private sidings included this terminal service. We, therefore, do not think it proper to assess an extra charge for this service. Inasmuch as this has been the universal practice, the rates have always applied on this service. That is one of the main reasons why factories have placed sidings upon their own property, to benefit by this advantage which the railroads offer. Inasmuch as one of the main reasons is that all the concerns having private sidings would handle their material through the freight houses as well as the team tracks, which now is the small shippers' point of receiving freight, there is not a railroad having facilities large enough to handle this volume of business with their present equipment, i. e., room, space in the open, as well as delivering freight houses.

We wish to make protest for charges of this caliber, and as we are a member of the Cincinnati Chamber of Commerce, who in turn are a member of the National Industrial Traffic League, we wish to back them up unanimously in their opinion that "transportation includes all the railroad service, tracks, and facilities devoted to the hauling of freight traffic and that the published freight rates now include and always have included full compensation for these services."

While we want to see the railroad companies prosper, which prosperity comes only through their revenues, principally on freight, we wish them to have sufficient capital to place good service and equipment at the shipping public's disposal, as well as terminals to handle freight in a manner to avoid delays, with reasonable delivery time, but we do object to assessing an extra charge for handling cars on private tracks to help make up this deficiency.

We trust that this with other protests will enable you to arrive at a definite conclusion, and, although the time is short, we hope that you will get full data to enable you to be governed thereby.

Very respectfully,

THE PFAU MANUFACTURING CO.,
Per J. KHAFMAN.

—

SHEPARD & MORSE LUMBER CO.,
Boston, Mass., March 17, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: We have heard that you have under consideration authorizing the railroads to make an extra charge for switching to private switches.

The only private switch we use in the United States is located at Burlington, Vt., and is right close to the railroad yard. As far as we can see, it is just so much clear gain to the railroad to put the cars onto our switch, thus taking up room on our land and not on their own, and it costs them practically nothing more to do this.

Of course, it would be a considerable inconvenience to us, as well as an additional expense, to have to put our lumber on teams and cart it into our yard. We do not understand why if we provide the switch the railroad should make an extra charge to set the cars on it, when they are simply saving the expense of a switch of their own.

Furthermore, this business coming into Burlington is a very material part of the business they get. It would be rank injustice to charge anything extra, and, besides, business conditions in Burlington at present do not warrant additional expenses of any kind. Considering the keen competition we get from Canada, where lumber is dressed at the originating point, we have the greatest difficulty in running our Burlington plant on a paying basis; in fact, the last few years it has not been running on a paying basis on the average, and we have been obliged to very heavily curtail our product there, at present only doing about half our former amount of business. Any further burdens on the business there very likely will drive the whole of the planing-mill business into Canada. It is fast going there, anyway; that is, most of the border mills are doing very little business, and there is a large increase in the amount of planing being done in Canada.

Of course, the Canadian mills make a very large saving in freight, as they dress off about one-fifth of the lumber in the ordinary operation of dressing and matching, whereas when lumber is sent in and stopped in transit to be dressed at Burlington this saving in freight is largely or altogether lost on account of the regulations which you have in force and the tariffs, which only allow about 80 per cent of the weight to be shipped out on through bills. Furthermore, in the case of the Burlington through bills if we can not ship out cars of exactly the same weight that came in we are always at a loss, as if they run overweight we are obliged to pay the local rate of freight, and if underweight we get no allowance.

You will see, therefore, that any additional cost or charge for setting cars on the tracks of the lumber mills will be a serious burden and, from the Burlington standpoint at least, entirely uncalled for, and would appear to be unreasonable and unwarranted.

No doubt there may be some other cases entirely different, where the railroad has to switch the cars a considerable distance and where it would be cheaper for the railroad to set it in their own yard, but in the case of Burlington it certainly would be more expensive to the railroads if they had to provide facilities for handling all the lumber cars in their own yards.

If there is any further information as to the situation there which you might require we would be pleased to furnish it.

Yours, very truly,

SHEPARD & MORSE LUMBER CO.,
T. H. SHEPARD, *Treasurer.*

—

NEW BERN COTTON OIL & FERTILIZER MILLS,
New Bern, N. C., March 17, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: We understand that you are considering the matter of allowing the railroads to tax industries for placing cars on private sidings at terminals, and we wish to enter our protest against such a charge, which we think would be very unjust. The cotton oil mills and fertilizer manufacturers are big shippers, and a tax of $2 per car for cars loaded or unloaded in their yards would be an expense that they should not be subjected to. We are of the opinion that the freight derived from products of our industries is as profitable to the railroad companies as any item they handle, as we load and unload the cars, and the railroads have only to furnish cars and haul them. We hope you will not allow the railroads to collect the shifting charge.

Yours, truly,

NEW BERN COTTON OIL & FERTILIZER MILLS,
C. L. IVES,
Treasurer and Manager.

—

THE POWHATAN LIME CO.,
Strasburg, Va., March 17, 1914.

CHAIRMAN INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

DEAR SIR: The pending investigation for the purpose of giving railroads adequate compensation for operating service has reached a point that menaces our industry with extinction. We refer to the contemplated charge of $2 per car for private switches.

We are manufacturing lime with a capacity of 10 carloads per day, and a fuel consumption approximately 1.6 cars per day. We have a by-product in rejected stone of 3 cars per day that we sell practically at cost. Should the $2 per car charge be applied to this movement we would be subject to a loss, when we run to full capacity of 14.6 cars, at $2 per car, or $29.20 per diem. At the present time we are not earning 6 per cent on the money invested, when taxes and upkeep are paid, consequently if this additional burden is imposed we will be forced out of business, which is equivalent to the confiscation of our property.

Low-priced heavy commodities will not bear a charge of this kind, and it can not be imposed without unreasonable discrimination in favor of higher-priced commodities. Take a carload of agricultural lime, which often sells at $3 per ton or less, and compare it with a carload of textile fabrics, or leather, or any of a hundred other products of high comparative value and work out the percentages.

It is manifestly unfair to select industries that produce in car lots and penalize them for having the courage and enterprise to risk their money in helping to solve the problems of high cost for the benefit of people generally. The railroads serve all, and all should bear a fair share of the cost of service.

Yours, very truly,

POWHATAN LIME CO.,
R. MCCOY,
Vice President and General Manager.

—

GLOBE KNITTING MILLS,
RAMBO & REGAR, INC.,
Norristown, Pa., March 17, 1914.

The INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: We wish to offer a protest against the proposed law to have the railroads make a charge for the switching and spotting of cars on private sidings.

It would seem to us that such a law would be unjust to those who have already gone to the expense of erecting and maintaining sidetracks, with the understanding that they should derive the benefit accruing from the most convenient and inexpensive way of handling freight. All shippers have an equal privilege in this matter, so that we can see no discrimination in favor of one over another, but it would certainly seem to us a step backward to make a law which would encourage old and expensive methods at a time when efficiency and economy are the uppermost points in the mind of the manufacturer.

Yours, respectfully,

RAMBO & REGAR, INCORPORATED,
Per H. K. R.

—

NEW YORK PRODUCE EXCHANGE,
BUREAU OF TRADE AND TRANSPORTATION,
New York, March 17, 1914.

Mr. GEO. B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: In reference to the 5 per cent rate advance case, it is our understanding that some testimony was introduced at a previous hearing in Washington regarding time allowed by carriers for storage on flour, both domestic and export, when billed to New York, lighterage free. It is our further understanding that the commission intended, or rather intends, to hold a hearing in New York in the near future,

in which testimony will be taken applying exclusively to New York's interests in connection with the above.

If such a date has been set will you be good enough to advise me of same, and if it has not been set will you please keep our name before you in such a manner that we may be promptly notified when a date is set.

We note from your circular dated March 11 that on March 28, at Washington, the commission will receive testimony regarding the storage of freight at terminals and loading and unloading carload freight. Does this apply specifically to New York, or does it mean all other terminals other than New York, having in mind the one hearing that is to be held here?

Yours, very truly,

BUREAU TRADE & TRANSPORTATION,
CHAS. J. AUSTIN, *Manager.*

—

THE TRAFFIC BUREAU,
SIOUX FALLS COMMERCIAL CLUB,
Sioux Falls, S. Dak., March 18, 1914.

Hon. E. E. CLARK,
Chairman Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: Referring to the question of "free terminal services" now being investigated by your honorable commission in connection with the eastern advance-rate case.

We understand March 24 has been fixed as the final date for filing briefs and statements. Not having been fully advised as to the progress of this case, we now find it impossible to present within the short time allowed any pertinent facts or to explain the particular circumstances of our interest in this feature of the case. If, however, the commission should decide to defer its final consideration and determination of this question for further investigation, we would appreciate the opportunity of presenting a brief statement of local conditions and the effect of supplementing the carriers' revenue by charging for the acceptance and delivery of freight to industries having privately controlled tracks.

The terminal facilities in the smaller cities of the West are radically different from those in the larger cities of the East and West. Industries are located almost without exception on tracks having one railroad connection. Freight handled by other lines must be through at least one and often two intermediate lines with a corresponding additional charge. These industries have been located without consideration of terminal delivery, by reason of the long existing practice of equalization and absorption by the competing carriers of such cost. If, however, this equalization is prohibited it is anticipated that serious results will follow.

Wherefore on behalf of the Sioux Falls shipping interests and at the instigation of this board of directors, I very respectfully ask that this honorable commission defer final action on the terminal feature of this case until a full hearing can be had, and, if consistent, this bureau be allowed to present a brief statement of its position.

Trusting that I may hear from you at your convenience, I beg to remain,

Most respectfully,

G. B. TUTHILL, *Chairman.*

—

CHAMBER OF COMMERCE,
Houston, Tex., March 18, 1914.

Mr. G. B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: At a special meeting of the traffic bureau of the Houston Chamber of Commerce held this day for the consideration of the question which is now before the Interstate Commerce Commission in the matter of establishing, if deemed proper, charges for the spotting of cars on private industry tracks, the attached resolution was passed and is respectfully handed you with request that it be presented to the commission for their consideration.

Yours, very truly,

J. W. WILKINSON, *Traffic Manager.*

[Inclosure.]

Whereas the Interstate Commerce Commission has raised the question as to the propriety of railroad companies spotting cars on private tracks of consignees without an extra charge therefor, and is now conducting an investigation with particular reference to the territory covered by eastern trunk lines; and

Whereas a decision by the commission declaring such extra charge to be proper will affect not alone eastern trunk line's territory, but apparently will involve interstate traffic all over the country; and

Whereas in our judgment the fact that present rates invariably include the cost of switching service is practically established by the manner in which rates are fixed, with an increasing ton-mile charge for short distances, for which there can be no reason, other than to take care of terminal expense, of which switching is obviously a part; and

Whereas acting under conditions and practices which have prevailed for years without question, providing for free delivery of cars at warehouses located on private industry tracks, vast sums have been invested in private terminal facilities with full expectation of receiving therefrom the benefits such facilities have in the past yielded, the proposed action by the commission would deprive these business enterprises of the benefits to obtain which large private investments were made and would make them an asset of the carriers instead of their owners: Therefore be it

Resolved, That the traffic bureau of the Chamber of Commerce of Houston, Tex., earnestly protests against any definite action by the Interstate Commerce Commission on this matter for any section of the country until ample opportunity has been given all those whose interests are affected to present facts and argument in favor of a continuance of the existing arrangements. Be it further

Resolved, That a copy of these resolutions be forwarded at once to the Interstate Commerce Commission with our earnest request that hearings on this subject be held in various parts of the country, so that the full facts may be developed before closing the case or rendering a decision.

J. W. WILKINSON, *Traffic Manager.*

HOUSTON, TEX., *March 18, 1914.*

LAGARDE LIME & STONE CO.,
Anniston, Ala., March 18, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: We understand that there is some discussion on making a charge in addition to the freight rate for handling cars on private siding.

We wish most emphatically to protest against any such move, as we believe this is unfair to shippers of lower-priced commodities shipped in large volume. For instance, a carload of lime, amounting to 12 tons in bulk, is sold at a maximum price at our works for $4.2; a carload of crushed limestone, amounting to 50 tons, has a market at approximately $30. To assess a charge of $2 per car on this, in addition to the freight, we believe is unjust, as a commodity which might at the same time be a luxury is taxed no more. Therefore we think that a flat rate per car is inconsistent, as various commodities have not the same relative value.

The burden of the advance would be borne by those who should least of all, and it appears to us that such a ruling would be working against the interest of the carload shipper who has a siding. We also believe that a ruling of this kind is quite in favor of high-priced commodities which could bear a proportional increase in the general freight-rate advance.

We trust that the commission will not pass favorably on any such proposition.

Very truly, yours,

BERNARD MCNULTY,
Vice President.

—

THE ALBANY CHAMBER OF COMMERCE,
Albany, Ga., March 18, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

DEAR SIRS: On behalf of the shippers of our territory we desire to enter our protest to you against permitting the railroads to charge for switching to industries having sidetracks.

We consider a charge for placing cars on private sidings as unreasonable and as a new departure in the matter of transportation. The cost of this service has always been considered as included in freight rates, and when we consider the great advantages to the railroads in being relieved of the necessity of providing their own terminals to handle the business, it would seem unfair for the roads to ask compensation for their service.

As we understand the proposition, it is to charge a minimum tax of $2, regardless of the class of freight and the distance. In view of these facts, we wish to file our protest with you.

Yours, very truly,

ALBANY CHAMBER OF COMMERCE,
By EUGENE B. ADAMS, *Secretary.*

—

[The Western Grain Dealers' Association (Inc.); the Western Grain Dealers' Mutual Fire Insurance Association (Inc.).]

DES MOINES, IOWA, *March 18, 1914.*

Mr. G. B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: We understand that the question of the carriers performing service for large shippers, such as spotting and switching cars, etc., is under consideration in connection with the hearing on the proposed 5 per cent rate advance.

Representing the interests of country grain shippers who operate elevators at country stations, located on the station sidetracks of the railroad companies, we desire to protest against any charge for switching and spotting empty or loaded cars in shipping or receiving grain from or to such country elevators, as there is certainly no special service performed in connection with such switching and spotting aside from what is necessary in the receiving and delivering of such cars of grain in transportation, all of which service is covered by the published tariff rate.

If such a charge is contemplated, we would respectfully ask you to advise, in order that we may offer testimony in opposition to such charge.

Will you kindly let me hear from you in reply, and oblige?

Very truly, yours,

GEO. A. WELLS, *Secretary.*

—

THE C. E. DE PUY CO.,
Pontiac, Mich., March 18, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: Relative to the proposed charge for spotting cars, we wish to enter our protest.

In our case, the Grand Trunk has for several years been charging us an annual rental and interest on value of rails in our siding. To now make a charge for spotting cars, we consider would be a rank injustice. It costs them no more to place a car on our siding than it would to run it on any other of their sidings and not as much as it would to put it at some particular door of their freight house.

A large part of our business is reconsignment traffic, and on this they get an average of about $7 per car, which we consider pays them pretty well for handling our cars, especially as they formerly were satisfied with $3 per car, which was a rate of their own making and was supposed to cover the cost of handling.

To make a charge for placing cars on private or individual sidings would, we believe, be a clear discrimination in favor of parties doing business without an investment, as they handle their goods through the freight house where no charge for spotting is made. We sincerely hope they may not be allowed to carry out their intentions.

Yours, truly,

THE C. E. DE PUY CO.

—

THE SECHLER & CO.,
Cincinnati, Ohio, March 18, 1914.

The INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: In the matter of an increased charge being made by railroads for placing and withdrawing cars from private tracks and sidings.

We beg to petition you that no action be made to change the present status until the most exhaustive investigation has proved the justification for a charge being made.

If no private tracks or sidings existed to-day, the railroads would be absolutely unable, through the congestion on their own tracks, to handle the freight.

In the cost to themselves of investment or rent, owners of private sidings and side tracks are paying a charge for terminal facilities at the present time. The mere suggestion that your committee is considering a change of the established order of things in this regard is tending further to unsettlement. Real estate values and rentals, where property is contiguous to the railroad, have as much right as any other kind of property, and to make a discriminating charge for placing cars on such side tracks and siding would depreciate the value of such real estate or rentals.

Where it can not be shown that the private side tracks and sidings are serving the purpose of a saving to the railroads, they should be subject to a charge, or if the railroads are performing any act for those having such facilities, which is more than the economy to the railroads above referred to, a charge should be made, but most distinctly no charge should be made where privately-owned sidings and side tracks are furnished the railroads as part of their terminal facilities.

Very truly,

THE SECHLER & CO.
C. W. SHIPLEY, *President.*

—

MILWAUKEE, *March 18, 1914.*

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: We wish to enter our protest against the contemplated plan of having the railroad companies make a charge for "spotting" service, as we are positive that in our case, where we are continually receiving heavy blocks of marble weighing from 6 to 20 tons, that it is economy for the railroad company to use our sidetrack, with our competent unloading facilities, rather than have our cars tied up on their team tracks by their incompetent unloading arrangements.

Our sidetrack is connected with the Milwaukee road's canal yards track system, and might almost be considered a part of it.

We desire to call your attention to the congested condition of the railroad team tracks in this city, the lack of space to increase them, and the wholly incompetent yard facilities, and the consequent delay that would certainly occur in loading and unloading cars if the charge referred to is enforced and manufacturers are compelled to adopt team track service, wholly or in part.

We think, too, that the investment in nearly a quarter of an acre of land covered by our sidetracks should be considered an offset for any service rendered by the railroad company in placing cars thereon. We feel very confident that the railroad company will concede, in our particular case at least, that the use of our sidetrack in handling the large blocks referred to is an economical convenience to them, and that they would prefer to continue its use under present conditions rather than make any charge that may become necessary under changed conditions.

We trust that you will be able to rule against the enforcement of the charge referred to.

Yours, very truly,

GRANT MARBLE CO.,
D. E. ROBERTS,
Secretary and Treasurer.

—

NORWOOD SASH & DOOR MANUFACTURING CO.,
Norwood, Ohio, March 18, 1914.

The INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: If you please, we would like to impose on your honorable body in that we wish to herewith register our objection to the proposed charge by railroads for the spotting or placing of cars for our use on our private sidetracks at our plant at Norwood, Ohio, as we feel this would be unjust, unreasonable, and imposing on us a burden, and we wish to ask that you not render a final decision on this question until such time as you have been able to thoroughly investigate the conditions prevailing in this territory.

I note the theory advanced is that the term "transportation" should include only the road haul and the service to and from public team tracks and public freight depots. If you please, we would like to ask if this would not be considered a discrimination in favor of the small shipper, or anyone who elected to draying their goods to and from the railroad depots?

We believe that the freight rates named by the transportation company from point of origin to destination includes pay for service rendered us in the placing of cars consigned to us on our private sidetracks, and do not think the additional charge should be imposed.

Another reason is that it is a fact that our railroads have not the facilities in team track and freight house to handle our business in and out. It is therefore reasonable for us to contend that our private tracks are a part of this railroad system, and that they are using same to facilitate the handling of their business in and out of this station given them by this company, thereby reducing their expenses in the provision of necessary facilities, as well as a reduction of property owned by them in the matter of taxation.

The conditions in this immediate neighborhood, and I am quite sure in all other large industrial centers, have compelled the manufacturers to locate at such places as they could find convenient to the main line of the railroad and provide thereon sidings in order to assist the transportation companies in the transporting of our different commodities to and from our plants. With us the railroad company also uses our private tracks as storage tracks on which to place cars consigned to other industries until such time as they are able to get them switched out and placed to such industries.

We do quite an extensive business (outbound), and the larger portion of same are less than carload shipments on which the railroads carry at least 50 per cent at a first-class rate and possibly 30 per cent at third-class rate, the remainder at fourth class. I have compiled a statement of our outbound less than carload shipments for five months (October to February, inclusive) which shows that we loaded 349 cars, at an average weight of 17,622 pounds per car, with an average revenue earned by the Baltimore & Ohio of $53.05 per car.

I have timed for a week the placing of cars covering this particular class of shipments. The week ending March 14 we loaded 28 cars, at a cost to the railroad company of 11⅝ cents per car to place these cars for our loading (at a rate of $36 per day for their crew). Taking the average revenue earned on this class of shipments of the five months mentioned at $53.05, and taking into consideration that the railroad does not furnish the help to load any of this, we can not help but feel that you will agree with us that the charge of 11⅝ cents per car should be born by the transportation company and included in their rates. We therefore conclude that we are not unreasonable in asking you to hold in abeyance your final decision on this question until such time as you have been able to thoroughly investigate all conditions.

Thanking you for your very kind consideration, we remain,

Most respectfully,

NORWOOD SASH & DOOR MFG. CO.,
B. H. STOCKMAN, *Traffic Manager.*

—

BROWN-WALES CO.,
Boston, March 18, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: Not being able to be present at the meetings held in reference to the petition of the railroads as to car spotting, we wish to enter our protest against any charge being made. We are not sure whether it would apply to our case.

We have a spur track into our building about 400 feet long, the building being located across the street from the New York, New Haven & Hartford Terminal. It already costs us quite a little additional to unload the cars, as we have to do it ourselves. Furthermore, the use of our track serves the railroad just so much storage room for the car while it is being unloaded. They only have to be shifted across the street—80 feet wide—into our building.

Under the above circumstances we think no charge should be permitted.

Yours, respectfully,

BROWN-WALES CO.,
WM. Q. WALES, *Treasurer.*

—

THE CHATFIELD & WOODS CO.,
Cincinnati, March 18, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

SIRS: In the investigation of the so-called "free service," now in progress before your honorable body, growing out of the general investigation upon the application of the common carriers in the "eastern rate advance" case, we submit the following as the grounds upon which are based our belief that the service for placing or "spotting" cars on private tracks and switches and for movement of so-called "trap" or "ferry" cars from tracks serving private industries to and from the freight houses of the carriers are not "free" services.

The system of commercial transactions in America has grown up upon the basic principle that the railroad freight rate covers the full service given by the carrier in furnishing the car, a proper placement for loading, the conveyance of the loaded car, and its terminal delivery; that this rate is a complete rate, which includes not only the charge for the haul, but the charge for the use of the terminals at both ends of the line. (18 I. C. C., 310.)

That the terminal service to or from a private track is only equivalent to and costs the carrier no more than a corresponding service to or from the freight houses or team tracks of the carriers, and that the rates should not be so constructed as to compel an extra charge for like service. (18 I. C. C., 310.)

That to impose such an additional charge would result in discrimination against the owners and users of private tracks, which would in effect penalize such private owners to the extent of any extra charge which might be assessed, resulting in the cessation of progress in the location and construction of private industries to the detriment of the commerce and best interests of the country at large.

That such private facilities are of distinct assistance and advantage to the carriers in handling the traffic and to the public in relieving condition of congestion, which without the aid of such facilities would result greatly to the detriment of shippers not equipped with such private tracks.

In view of these and many other arguments which have been advanced in the course of this hearing we submit that the great importance of this question to the entire country and the grave results which would result from a decision reached without a complete consideration of all the features involved and its bearing upon all branches of industry will fully justify more prolonged investigation than has yet been given.

We therefore strongly urge upon your honorable commission that final action be withheld until opportunities have been given for still further and fuller hearings, both from the shippers and carriers in the territories affected.

Respectfully,

THE CHATFIELD & WOODS CO.,
A. E. SINGLETON,
Traffic Manager.

—

THE MERCHANTS' FREIGHT BUREAU,
Little Rock, Ark., March 18, 1914.

The INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: Herewith I inclose a formal protest of the Merchants' Freight Bureau, signed by the chairman and board of trustees; also by the Chamber of Commerce and the Little Rock Board of Trade, all of Little Rock, against the proposed charge of $2 per car for spotting or placing of cars to and from tracks to industries in Little Rock, which we desire filed on behalf of these organizations in the hearing that is set for March 28 concerning this proposition.

Yours, truly,

A. R. BRAGG, *Traffic Manager.*

[Inclosure.]

THE MERCHANTS' FREIGHT BUREAU,
Little Rock, Ark., March 18, 1914.

Mr. A. R. BRAGG,
Traffic Manager, Merchants' Freight Bureau,
Little Rock, Ark.

DEAR SIR: We hereby approve of this letter and your protest to the Interstate Commerce Commission against any charge for spotting or placing cars to and from so-called private tracks.

The contemplated action on the part of the railroads appears to us to be unreasonable, unjust, and entirely uncalled for. Many of these tracks in Little Rock are constructed entirely or partly by the shippers who are located on such tracks. We consider it only a subterfuge to

increase the rates already in effect, which we authorize you to oppose in every instance.

Yours, truly,

Jas. J. Mandelbaum, chairman; W. W. Dickinson; T. F. Brush; Little Rock Board of Trade, by Geo. R. Brown, secretary; Geyer & Adams Co., by Adolph Geyer, vice president; Scott Mayer Commission Co., Max Mayer, president; Plunkett-Jarrell Grocery Co., by J. T. Jarrell.

We concur in the above protest.

CHAMBER OF COMMERCE,
By C. C. KIRKPATRICK, *Secretary.*

[Inclosure 2.]

THE MERCHANTS' FREIGHT BUREAU,
Little Rock, Ark., March 17, 1914.

To the Merchants' Freight Bureau's board of trustees:

GENTLEMEN: I desire to bring to your attention a case now pending before the Interstate Commerce Commission in the matter of a charge for spotting cars to industries located on both private tracks and tracks partly and wholly owned by the railroad, which is now being operated in all territory east of the Mississippi River.

It has been suggested that in order to increase the revenue of the railroads that a charge of $2 per car be made for placing loaded cars both to and from all private tracks and tracks to industries in addition to the regular freight rate. Commercial organizations and individual shippers throughout the country have united in a protest to the Interstate Commerce Commission against the undue haste being used in undertaking to conclude the "car spotting" hearings in connection with the eastern advanced rate case in so short a time without giving an opportunity for hearings and investigation in all parts of the United States.

If the carriers are given permission to make a separate charge for spotting cars in official classification territory, the same principle would unquestionably be applied in all territories. It is well known that the carriers in all parts of the country are preparing to file tariffs providing for a separate charge for spotting cars in addition to the freight rate. The railroads east of the Mississippi River have already made application to the commission for permission to file such tariffs on 10 days' notice, but this permission has been denied and tariffs will be filed on statutory notice. Although the commission has not expressed itself on this question, the inference of carriers is that the commission will permit this charge to be made. Car-spotting services have always been included in the freight rate, and certainly the public should not be deprived of it without a full investigation as guaranteed by the act to regulate commerce.

If the minimum car charge of $2 per car is established, it would mean an expense to the shippers of Little Rock, in addition to the present freight rates, approximately $150,000 annually. In other words, it will result in discriminations and confiscation of property, and, on the basis proposed, about 25 per cent increase in the railroads' freight earnings.

I am, therefore, filing this protest with the Interstate Commerce Commission, and ask that each of you sign individually, acting for the entire organization, that we are unalterably opposed to the addition of any charge being made over and above the freight rates for the performance of these services, which are and always have been included in the transportation service covered by the published rates.

The present practice of spotting cars relieves the congestion at railroad terminals; facilitates car movement and car efficiency. To add an aditional expense to the regular transportation charge as proposed would be confiscatory and discriminatory. The present rates include all terminal charges. In many instances the individuals or corporations have provided terminal facilities, which should have been provided by the carriers, and in many instances, where tracks are partly paid for by individuals or corporations or when wholly owned by the railroads, such tracks are as beneficial to the shipper as to the carrier, and to make a charge for placing a car on such tracks would be discriminatory to the shippers and benefit only the carriers by an increase in their revenue, which the rate charge should and does include.

The present investigation is in official classification territory—that is, east of the Mississippi River—but if the carriers succeed in their proposition to charge for spotting cars in that territory it will be immediately adopted in other territories.

Yours, truly,

A. R. BRAGG, *Traffic Manager.*

—

NORTH SIDE BOARD OF TRADE OF THE CITY OF NEW YORK,
Borough of the Bronx, March 18, 1914.

This is to certify that at a meeting of the North Side Board of Trade of the city of New York held this day the following resolution was adopted:

Whereas a proposition is now pending before the Interstate Commerce Commission authorizing railroad corporations to impose and collect additional charges or fees for the spotting or placing of freight cars upon private switches and sidings of all kinds: And be it therefore

Resolved, That this board most earnestly protests against the adoption and enforcement of this proposition for the following, among other reasons, viz:

1. Because these charges would be an additional and unnecessary burden placed upon the owners of such switches and sidings and would largely increase the expenses to be paid by consumers of all produce and freight brought into the Borough of the Bronx and consequently increase the cost of living and most seriously impair the commercial growth and prosperity of this section of our city.

2. Because the adoption and enforcement of this proposition by the Interstate Commerce Commission would be a most unjust discrimination against this borough and seriously impair and retard the construction and operation of an industrial or marginal freight railroad in the southerly and easterly portion of the Bronx contiguous to Long Island Sound, and especially designed to facilitate the reception and delivery of manufactured materials and merchandise of all kinds directly at factory doors at regular New York rates of freight.

3. Because railroad companies should not be permitted or directed by the Interstate Commerce Commission to impose this additional burden upon the owners of these private switches or sidings, which are constructed and kept in repair by the owners of the real estate and who are yearly assessed and taxed therefor by the State and city authorities as part of the land and improvements.

Resolved, That a copy of these resolutions, duly attested by the secretary of this North Side Board of Trade, be forwarded to the Interstate Commerce Commission.

[SEAL.] CHAS. E. REID,
Secretary, One hundred and thirty-seventh Street and Third Avenue, New York City.

—

[H. E. Wills, assistant grand chief engineer and national legislative representative of the Brotherhood of Locomotive Engineers.]

WASHINGTON, D. C., *March 18, 1914.*

Hon. E. E. CLARK,
Member Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: Some of our men are writing in to this office expressing a fear that the carrying out of the commission's recent suggestions in relation to the present practice by certain roads in connection with the spotting of cars for certain industrial plants will have the effect of throwing many of the members of the train-service organizations out of employment and cause a reduction in the wages of those who are kept on to do this work.

The industrial plants being allowed the car-spotting service, as a rule, pay a much lower wage to their engine crews than the railroad companies do; and these plants, it is said, are generally strongly opposed to the employment of members of labor organizations. If the suggestions of the commission have the effect of transferring this work from the railroad company to the industrial plant itself, it can readily be seen that our men will be injured thereby.

It seems to me this is a matter worthy of the consideration of the commission, and I would be pleased to be advised whether or not this phase of the question has been gone into by that body. Also, if you have any suggestions or comments to make in this connection, I shall be very glad to be given the benefit of the same.

With sincere regards, I am,

Very truly, yours,

H. E. WILLS,
Assistant Grand Chief Engineer and National Legislative Representative.

—

Before the Interstate Commerce Commission. I. C. C. I. & S. Docket No. 333. Petition of the Orange Commercial Club for postponement of hearing

The petition of the above petitioner respectfully shows:

I. That the Orange Commercial Club is an organization of the business interests of Orange, county of Orange, State of Texas, organized for the purpose of protecting the commercial and industrial interests thereof.

II. That this honorable commission has set for hearing on March 16 and 17 all facts and circumstances pertaining to the spotting of cars, ferry and trap-car service, lighterage and drayage and other similar services, also reconsignment and diversions in transit of all goods transported by railroad between various points in eastern territory, and that the principles involved in these matters will vitally affect the shipping interests of Orange, Tex., as well as those of the entire country; and further, that it is a practical impossibility for the shipping interests of Orange, Tex., and of the country, and for the railroads to intelligently prepare and present to this commission anything like reliable or specific information showing what the effect of adding a charge for the said terminal charges would be; and

III. That a departure from the long-established practice of including the terminal services in the freight rates, and requiring the carrier to make a separate charge for the receipt and delivery of freight will deprive the shipper of the value of his investment in terminal facilities and transfer it to the carrier.

IV. Wherefore this petitioner prays that this commission will postpone the hearing regarding these vital questions until a complete investigation shall have been had, with full opportunity extended to the shippers of Orange, Tex., and the country at large for presenting facts and circumstances in connection with this matter.

Respectfully submitted.

THE ORANGE COMMERCIAL CLUB,
E. W. ANDERSON, *Secretary.*

ORANGE, TEX., *March 18, 1914.*

—

CREAM CITY SASH & DOOR CO.,
Milwaukee, Wis., March 18, 1914.

The INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: We wish to enter our emphatic protest against the injustice of even suggesting a special charge for spotting cars on private sidings.

Our concern has several thousand dollars tied up in real estate investments that are being used by the railroads as private sidings to our plant. We are willing to admit freely that the service that the railroads render us is of material value. We also claim that the interest on the investment that we have here, that enables the railroad company to perform such service, more than offsets the value of this service.

The physical conditions of the city of Milwaukee are such that it would be practically impossible for the railroads here to furnish anything like adequate sidings for the loading of merchandise. We were hindered so much in our own individual case by this fact that we made this additional investment some three years ago, and any attempt to charge us for the spotting of cars on these sidings would be a distinct injustice that I am certain your commission will not countenance.

We might say, in a general way, that we believe that the railroad companies are entitled to an increase in their revenues and are in sympathy with this movement, but it should be general and not specific in its application—in other words, justice to all.

Yours, truly,

CREAM CITY SASH & DOOR CO.,
W. S. PADDOCK, *President.*

—

BALTIMORE FERTILIZER CO.,
Baltimore, March 18, 1914.

Washington, D. C.

GENTLEMEN: We desire to enter protest, especially against the proposed charge for placing cars on factory sidings that is being considered in connection with the railroad-rate case. We also protest against

the 5 per cent advance on fertilizer rates, which is already very profitable to railroads as a commodity and the class that they are considered, but the switching charge would be especially objectionable.

Yours, very truly,

BALTIMORE FERTILIZER CO.,
By H. S. ROOP, *President.*

—

PFEFFER MILLING CO.,
Lebanon, Ill., March 18, 1914.

Hon. E. E. CLARK,
Chairman Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: The secretary of the Millers' National Federation, of which we are members, has sent us information in regard to special investigations now being conducted by Interstate Commerce Commission to determine whether switching, placing, or delivery of cars for loading and unloading on industry sidetracks is a special service for which the carriers shall make a charge in addition to freight rate.

In reference to this will say our opinion is that an industry instead of being charged specially for this service should be paid for the service they render the railroad company. For instance, it costs the railroad people no more to spot a car on an industry sidetrack than it costs them to spot a car on so-called "team" track. As a rule, when an empty car is placed for loading on industry sidetrack it is promptly cleaned coopered up, and loaded, and, as a rule, this car is loaded and ready to move within 24 hours. In other words, it is ready to move before the free time commences on the car. We are sure an investigation will show that empty cars that are placed for loading on so-called team tracks are idle at least 24 hours longer, on an average, than cars that are placed on industry sidetrack for loading. In addition, when railroad equipment is scarce and a car comes loaded to industry sidetrack it is hurriedly unloaded and reloaded with outbound product. On the other hand, if a loaded car is placed on so-called team track it is very likely delivered to a party who is not interested in reloading the car, and no doubt, as a rule, takes advantage of the full 48 hours free time in which to unload the car. We are sure if this matter is investigated in a broad way it will be found that industry sidetracks are a source of profit to the railroad company rather than source of expense in comparison to the business that is handled on team tracks. Besides there is another feature to consider; that is, as a rule, product that is loaded in cars on industry sidetracks is loaded more carefully, consequently there is less claim for damage against the railroad for loss in transit or damage in transit than there is on product that is loaded in cars on team track. There is another feature to consider: If product is loaded into cars on team track the railroad is put to the expense of having an employee at the car to check in the product as it is put in the car, whereas on industry sidetrack the shipper accepts B/L, subject to shipper's load and count, and if the cars arrive at destination with seals unbroken the railroad is relieved of all liability as far as checking out the contents of the car is concerned. Another feature to consider is that employees that load cars on industry sidetracks become very familiar as to whether the cars will carry the contents to destination without damage, and by rejecting cars that are not fit to load, in that way save the railroad people a large amount of money in the way of claims for damages to goods in transit. We are sure that anyone that has practical experience in this matter of loading cars on industry sidetrack can come to only one conclusion, that the industry sidetracks saves for the railroad company and is a source of profit to the railroad company rather than a source of expense as compared to team-track loading and unloading.

The industry sidetracks contribute much to the efficiency of the railroad company toward handling the business that they must take care of. For this reason the railroad companies in large cities arrange wherever they can to place sidetracks in conjunction with large distributing houses in order to get the cooperation of the shipper in the way of loading or unloading merchandise. If the railroad people would be compelled to handle all the business that is offered them under the same conditions that they handle team-track business their service would break down completely. The efficiency and cooperation that the industry track contributes saves the railroad company and the business interests of the country from annihilation. There is only one side to this question, and that is in favor of sidetracks for the large shipper.

Yours, truly,

PFEFFER MILLING CO.,
C. J. PFEFFER,
Secretary and Treasurer, Pfeffer Milling Co.

—

NEWBERN CHAMBER OF COMMERCE,
Newbern, N. C., March 18, 1914.

SECRETARY INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

DEAR SIR: I have the honor to inclose you herewith a resolution adopted by our chamber at a meeting held on March 17, 1914, relative to the matter now pending before the commission to allow railroads to charge for placing cars on private sidings.

Very truly, yours,

GEO. GREEN, *Secretary.*

At a meeting of the chamber of commerce, held at the courthouse in the city of Newbern, N. C., on Tuesday, March 17, 1914, the following resolution was unanimously adopted, to wit:

Whereas the Chamber of Commerce of Newbern has received information that the question of authorizing railroad companies to charge for placing cars on private sidings is now before the Interstate Commerce Commission; and

Whereas it is believed that such charge would be unreasonable and a burden upon traffic: Now, therefore be it

Resolved, That the Interstate Commerce Commission be, and it is hereby, requested to refuse to grant to railroad companies the right to charge anything in addition to the usual freight charges for placing cars on private sidings.

Resolved further, That a copy of this resolution be forwarded by the secretary to the Interstate Commerce Commission.

C. L. IVES,
President Chamber of Commerce.

Attest:
GEO. GREEN, *Secretary.*

INDIANAPOLIS CHAMBER OF COMMERCE,
Indianapolis, Ind., March 18, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: We have the honor to submit the following for your consideration.

Very truly, yours,

INDIANAPOLIS CHAMBER OF COMMERCE,
L. H. LEWIS, *General Secretary.*

Whereas the Interstate Commerce Commission having instituted hearings concerning certain terminal services performed by carriers, particularly the switching of cars to and from private sidetracks for loading and unloading, also the handling of cars containing L. C. L. shipments from factories and warehouses to freight depots, called trap-car or ferry-car service; and

Whereas the view of the commission being that carriers are performing such services without receiving due compensation therefor, and that they may properly make an extra charge, in addition to the tariff rate, for setting cars on private sidetracks for loading and unloading, called "spotting," also assess extra charges to increase their compensation in connection with the trap-car service; and

Whereas the questions involved are of grave importance and far-reaching in effect as to the added burden of expense to be put upon shippers having large investments in plant and sidetracks, thus providing increased transportation facilities without cost to the carriers, and thereby relieving congestion at public team tracks and freight depots; and

Whereas the imposition of an extra charge for placing cars on private sidetracks would be revolutionary and disruptive of the long-established rule of transportation that the tariff rate stands for the movement from the point of loading to the consignee at destination for unloading, in the performance of which there is no free service rendered by the carrier; and

Whereas the carriers' rules governing trap-car service are ample to insure adequate revenue; and

Whereas the notice of these hearings being too short to afford interested parties reasonable time to prepare to meet the issue or opportunity to be heard: It is therefore

Resolved, That the Indianapolis Chamber of Commerce, on behalf of its many shippers and receivers interested, respectfully petition the Interstate Commerce Commission that final determination of these matters be deferred to admit of more extended investigation by public hearing in this city or other convenient places, on due notice, with opportunity for Indianapolis shippers to be heard.

INDIANAPOLIS CHAMBER OF COMMERCE,
O. D. HASKETT, *President.*

L. H. LEWIS,
General Secretary.

—

MARCH 21, 1914.

Mr. L. H. LEWIS,
General Secretary Indianapolis Chamber of Commerce,
Indianapolis, Ind.

DEAR SIR: This will acknowledge receipt of your letter of March 18 in regard to the commission's investigation in the matter of increases in freight rates.

Your letter will be brought to the attention of the commission and filed with the record in that proceeding.

Respectfully,

——— ———, *Secretary.*

—

THOMASVILLE STONE & LIME CO.,
Thomasville, Pa., March 18, 1914.

INTERSTATE COMMERCE COMMISSION.
Washington, D. C.

GENTLEMEN: We notice there is a proposal before your board to allow the railroad companies to charge $2 per car for spotting cars on private sidings.

As a corporation doing a small lime and stone business we wish to protest against this charge. We ship from 12 to 15 cars a day from our plant, and such a charge would mean $8,000 or $9,000 a year from us, whereas a shipper of a high-class commodity, who only ships a few cars a year, containing a much more valuable material than ours, would get off with a comparatively small charge. Large shippers will overcome this charge by doing their own shifting, and this puts the burden of the charge not only on small shippers but almost entirely on small shippers of a low-class commodity. From our knowledge of the stone and lime business we believe that such a charge would force most of the small quarries out of business, because their profit is so small they could not compete with the larger shippers who would be doing their own shifting.

If the railroad companies need the extra money, we hope you will allow them the increase in freights, so that the burden may be equally distributed among all shippers, and not placed entirely upon the small shippers of low-class commodities.

Yours, very truly,

THOMASVILLE STONE & LIME CO.,
J. C. GITTINGS, Jr., *General Manager.*

—

BUFFALO CHAMBER OF COMMERCE,
March 18, 1914.

Mr. GEORGE B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: At a meeting of the board of directors of the Buffalo Chamber of Commerce, under date of March 10, 1914, further consideration was given to the subject of advance in rates in official classification territory, particularly to the investigation now being made by the commission with reference to special services performed by the carriers on shipments without charge in addition to the rate, and, after careful deliberation, resolution was passed as per copy attached, which is now submitted to the commission for careful consideration.

Very truly, yours,

FRANK E. WILLIAMSON,
Traffic Commissioner.

Resolution adopted by the board of directors of the Buffalo Chamber of Commerce at meeting held March 10, 1914.

Whereas on February 12, 1914, the National Industrial Traffic League, through its executive committee, resolved that a petition be made to the Interstate Commerce Commission for "such reasonable time and opportunity as may be necessary for the shipping interests to lay before the commission all of the facts and circumstances pertaining to the spotting of cars, ferry and trap-car service, lighterage and drayage, and other similar services, and reconsignments and diversions in transit"; and

Whereas on February 19 announcement was made by the commission that further hearings would be had on February 27 and 28 on said subjects with oral arguments thereon March 16 and 17, and under such arrangement interested shippers have had and will have no adequate opportunity to present all pertinent facts and circumstances to the commission; and

Whereas the questions raised are of great magnitude and importance, involving the proposed imposition of millions of dollars of switching and terminal charges, a departure from universal and long-standing practices, and a revolution in terminal-traffic conditions not confined to official classification territory; and

Whereas the determination of these questions necessitates an examination of questions of cost to the carriers for the various services, cost to the shippers of the terminal services performed by them for the carriers, cost and value of the sidetracks and other terminal facilities furnished both by shippers and carriers, the value of the said services to shippers, the adequacy or inadequacy of existing terminal facilities and efficient operation thereof, and all the conditions and circumstances existing throughout the United States and particularly in official classification territory; and

Whereas a determination of such questions can only be had after extended investigation, with full hearings at various points convenient to carriers and the shipping public: Now, therefore, be it

Resolved, That the Buffalo Chamber of Commerce respectfully petition the commission to defer any final consideration or determination of the said questions until after an extended investigation can be had, with full opportunity to all shippers and interested parties to present all pertinent facts and circumstances at public hearings, to be had at convenient times and places after adequate notice.

—

MERCHANTS & MANUFACTURERS' ASSOCIATION OF MILWAUKEE,
Milwaukee, March 18, 1914.

INTERSTATE COMMERCE COMMISSION.
Washington, D. C.

GENTLEMEN: In the matter of proposed 5 per cent increase in freight rates we desire to enter our protest against the propriety of a charge by carriers in addition to the rate for the spotting of cars on private or industrial tracks.

We believe transportation companies should be remunerated for special services, but do not consider that placing of cars on industry tracks for loading or unloading is special service.

Business has been built up and solicited on basis of private sidetrack facilities, which facilities are of equal importance to railroad and shipper.

It is a well-established principle that custom makes law, and which applies in particular to transportation, in that a carrier pursuing a certain custom with the shippers establishes a precedent and assumes an obligation that it is compelled to continue. This is a case in point. As before stated, business has been built up and solicited on basis of private sidetrack facilities, on the theory that to encourage the development of such private sidetracks was to facilitate transportation, relieve the congestion at public terminals, and, as a matter of fact, always considered as a terminal facility of the railroad, with the additional and very important factor they are generally built on property *owned and* furnished by the shipper, paid for by him and maintained at his expense.

It would seem under these conditions that the cost, which, we understand, is always the determining factor, is much less for placing a car on a private sidetrack than on a public or delivery team track.

Your honorable commission would also seem to hold this view in "Associated Jobbers of Los Angeles *v.* A. T. & S. F. Ry Co., 18 I. C. C., 310," and "Pacific Coast Jobbers and Manufacturers' Association *v.* Southern Pacific Co. et al., 18 I. C. C., 333."

We quote as follows from this decision:

"1. Charge of $2.50 per car exacted for delivering and receiving carload freight to and from industries located upon spurs and sidetracks within carriers' switching limits, found unlawful when such carload freight is moving incidentally to a system-line haul; charge found not unlawful when such carload freight is moving incidentally to a foreign line haul.

"2. The spurs and sidetracks which connect industries with a carriers' rails within switching limits found to constitute a portion of the carriers' terminal facilities.

"3. The delivery of a car upon an industrial siding found to be a substitute for delivery upon public team tracks, and, no additional service being involved, can not be made the basis for an additional charge.

"In this country the railroads have recognized by universal custom that it is but fair, where their team tracks are not used, to give delivery without extra charge at an industry track as equivalent service, although where the shipper provides tracks, land, and facilities the mere switching furnished by the carrier is in many cases by no means equivalent in cost to the expense attaching to delivery upon its own tracks.

"First, that the industrial track upon which the service was rendered was a terminal facility of the railroad and not a plant facility of the industry to which it led; and second, that the service for which the charge was made was the same service as that which was performed by the carrier in delivering freight at its depot or team tracks. * * *"

It seems manifestly unfair and discriminatory to exact a penalty from a shipper who furnishes terminal facilities at his own expense, and, in accordance with your own opinion as given above lessens the terminal expense to the carrier, as against a shipper who sees fit to utilize the terminal facilities of the carrier.

Sections 1797–1822, chapter 362, 1905, Wisconsin laws affecting the regulation of railroads provides:

"It shall be unlawful for any railroad to demand, charge, collect, or receive from any person, firm, or corporation a less compensation for the transportation of property or for any service rendered or to be rendered by said railroad, in consideration of said person, firm, or corporation furnishing any part of the facilities incident thereto. * * *"

Conversely, no greater charge could be made on intrastate traffic under this provision.

In view of the well-known fact that the lack of proper terminals at trade centers is a serious problem for our railroads to solve at present and for the future it would seem as if every effort should be made to encourage the private or industrial sidetrack by keeping them on a parity with the public or delivery team track, as it certainly furnishes terminal facilities to the carrier without expense.

It is frankly admitted, and it can not be denied, a private or industrial track is a necessary adjunct to the industry served, and it could not and would not dispense with it as it cheapens the cost of operation; it also, as is shown, performs the same service for the carrier.

In other words, the private or industrial track reduces the cost of service to both carrier and shipper.

This being a fact, why, then, should the carrier make an additional profit out of a terminal facility it does not furnish and for which the services rendered cost less than the same service on its own terminal?

This proposed charge seems to be based on a new theory—the value of the service to the shipper—and not on the cost to the carrier or in line with the axiom, "Necessity knows no law," takes advantage of the necessity of the industry having a private sidetrack, but ignores the fact that the carrier derives a corresponding benefit from this "private necessity" and much more than it does from its "public necessity," the public, or delivery team track.

In conclusion, it seems to us, to now charge for this spotting service is a step backward and not forward.

The physical valuation of railroads now under way by your honorable commission is to determine the valuation upon which earnings will be permitted.

There is no chance for dispute, as that fact is well known and admitted in advance, that the value for fixing the cost in placing cars at a private or industrial track in which the carriers have no investment and do not even keep in repair, must necessarily be much less than on public delivery or team tracks which they own, maintain, and on which they are taxed.

Yours, very truly,

A. W. CAMPBELL,
Traffic Secretary.

WICHITA BUSINESS ASSOCIATION,
Wichita, Kans., March 18, 1914.

Mr. GEORGE B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: The shippers in Wichita are greatly interested in the "car spotting" hearings in connection with the Eastern Advanced Rate case now before the commission, and they view with grave apprehension the efforts of the eastern carriers to establish separate charges for spotting cars, trap car service, etc.

At the meeting of the traffic bureau of the Wichita Business Association to-day the following resolutions were unanimously adopted:

"*Resolved*, That our tariff commissioner be, and he is hereby, instructed to emphatically and vigorously protest to the Interstate Commerce Commission against the proposed summary conclusion of the investigation of the practices of carriers in spotting cars for loading and unloading and the use of trap car service, diversion in transit, reconsignment, and other so-called free services, without a complete and comprehensive investigation by the commission in the territory affected; and be it further

"*Resolved*, That we are unalterably opposed to the addition of any charges being made over and above the existing freight rates for the performance of these services, which are and always have been included in the published rate. We believe that the present practice of spotting cars and the use of trap and ferry cars relieve the congestion on railroad terminals and facilitates car movement, facilitates car efficiency, and has provided railroad facilities at the expense of the individual and to the relief of the carrier, and to make these services separate from transportation, as proposed, would be revolutionary, confiscatory, and discriminatory, because:

"First. It is revolutionary, in that present through rates include in all cases all terminal charges to carriers' own terminal, and in almost all cases to the connecting line terminal;

"Second. It is confiscatory, because the individual has provided terminal facilities which should have been provided by the carriers, and, under the law, where the shipper furnishes the facility he is entitled to a reasonable compensation therefor, and to exclude this service from transportation would be confiscation of the private investment in side tracks and would greatly increase the cost of transportation; and

"Third. It is discriminatory, because the addition of a uniform service charge to all terminal services would mean a higher percentage of increase in the freight cost for the short haul and lower rate than for a longer haul and higher rate, and this discrimination would be unjust and unlawful and would result in a confusion, and, in some cases, in destruction of business."

It is our understanding that the present movement has resulted from certain alleged abuses in official classification territory. If abuses were found, they should, of course, be corrected; but we do not believe that the commerce of the country should be burdened with the charges proposed by the eastern carriers. At any rate, this principle should not be established until the commission has made a thorough investigation of the conditions in all territories.

The transit system of rates is used extensively in this territory, and the proposed charge for spotting cars, etc., would amount to confiscation of the property used for milling purposes. Furthermore, the situation with respect to industrial lines is quite different in this territory from that in official classification territory.

In view of all these facts, we respectfully urge the commission to withhold its approval from the system of charges proposed by the eastern lines.

Yours, very truly, MARTIN E. CASTO,
Traffic Commissioner.

—

ARMOUR FERTILIZER WORKS,
Chicago, March 18, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: Commercial fertilizers are shipped for spring and fall planting, and mostly in car lots. The less than car lot movement is small, and fertilizers can not be shipped in mixed cars with many commodities.

The total movement of supplies and ingredients to fertilizer-manufacturing plants and manufactured fertilizer shipped to trade is between twelve and thirteen million tons, or some 550,000 to 600,000 carloads, per annum. Finished fertilizer tonnage is between 6,500,000 and 7,000,000 tons, not considering cotton seed, cottonseed meal, manures, and other forms of fertility used by agriculturists for manuring purposes.

About 80 per cent of the total fertilizer consumption is for spring crops and 70 per cent of the total yearly use is in the South under cotton, corn, and tobacco. The spring shipping season starts about January 15 and is practically ended by May 1. It is a rush movement and suffers from car shortages. Many plants ship 50 cars a day average during this period.

Commercial fertilizer factories cover large ground space and, owing to the nature of the business, are located on the outskirts of or away from populous centers. Such plants are invariably connected by switch tracks with railroads. Shipments from individual plants are heavy and it is impossible to make shipments in the short shipping seasons by other than tracks alongside plants. Team track or ordinary railroad terminal facilities are not suitable for the conduct of the business, and the tonnage could not be handled other than by industrial tracks.

Fertilizers and fertilizer materials are admitted into all countries free of duty on the ground that a duty charge would be a tax on fertility and against public policy.

The greater portion of the fertilizer consumed in the United States is outside of eastern-classification territory, where an increase in rates is being considered.

Using a Georgia basing point, and taking 10 points each in Alabama, Tennessee, and South Carolina in the center of the large fertilizer-consuming territory, the freight rate assessed against commercial fertilizer averages 6 cents per ton mile.

Taking a number of points within Georgia on intrastate movement, the rate runs from 3½ to 4 cents per ton mile.

These rates have been from the beginning of the industry continuously constructed upon a basis of including therein the cost to the carrier of spotting the cars within the industry where they are to be unloaded or loaded and taking the cars when unloaded or loaded from said points to the main line.

Phosphate-rock mines are all located on industrial tracks. They could not successfully compete without track facilities. The same is true of iron pyrites, sulphuric acid, and other fertilizer component mines and plants.

Keeping these points in mind, it appears to us the suggested car-spotting charge as applied to the fertilizer industry is not desirable and against public policy for the following reasons:

First. There is no discrimination between manufacturers, as all plants have track facilities.

Second. Although the charge is for a service, it increases the transportation cost of fertilizer in greater proportion than that of higher cost commodities, and is in effect discriminating and unjust.

Third. That the freight assessed against fertilizer-ingredient assembly and finished fertilizer distribubtion in the territory of largest consumption is already sufficiently high for the railroads to perform the necessary spotting without extra charge. That said rates are per se and relatively high enough to include and do include the cost of such spotting service incidental to delivery and receipt of cars on industry tracks, and have been so understood by the carriers, and the public to include the same, and that carriers' tariffs have provided for the receipt and delivery of cars on private sidetracks of industries located adjacent to main and branch lines of carriers and the expense of such service is included in and covered by the published rate of freight.

Fertilizer tonnage, aside from direct earnings on freight handled, brings to transportation companies greater return tonnage and heavier earnings than any other traffic they handle. These come from increased crops, surer crops, higher grade crops, decreased-cost crops, larger buying power on the part of the planter, and greater prosperity in the towns.

Fourth. That in the case of phosphate rock, coal, iron pyrites, sulphuric acid, fertilizer ingredients, etc., shipped in from mines or factory to commercial fertilizer plants for manufacture and distribution, each ton of material would pay a spotting charge at point of original shipment, then when unloaded at the fertilizer-manufacturing plant, again when shipped out as manufactured fertilizer to the farmer, and again, in many cases, when spotted on the track of the small town agent delivering fertilizer to the planter. Surely this is compounding a financial injury to an innocent consumer endeavoring to reduce his cost to grow farm products.

Fifth. That the fertilizer industry has largely at its own expense constructed track connection with the railroads, and that it is entitled to compensation in terminal switching for such investment and addition to transportation facilities, especially as all fertilizer plants have switch tracks and no advantage is gained by one manufacturer over another by such tracks.

Sixth. That anything which unnecessarily adds to the cost of preparation and distribution of soil fertility increases crop-growing cost and is against public policy.

In our own case the suggested charge would assume large proportions, as our total movement runs between 50,000 and 55,000 cars per annum.

The fertilizer business of this country is in its infancy. It more than doubles every 10 years. Fully 25 per cent of the cost of fertilizer is freight on ingredients and manufactured product. Is it wise to add to this transportation cost? We think not.

Respectfully, yours,

ARMOUR FERTILIZER WORKS,
CHARLES H. MACDOWELL,
President.

—

H. DITTLINGER ROLLER MILLS CO.,
New Braunfels, Tex., March 18, 1914.

The INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

HONORABLE COMMISSIONERS: Our attention has been called to a change that is proposed, by which the railroads can collect a charge for delivering cars on private sidetracks, and have no doubt that this proposed ruling is meeting with the vigorous protest that is deserved by the shippers.

Our plant is located on a spur or sidetrack of the Missouri, Kansas & Texas Railway, the construction of which did not cost the Katy a penny, but cost of constructions defrayed by a bonus, of which our firm paid about 75 to 80 per cent, and the balance was subscribed by the citizenship of our town. Our storage elevators are located this side of the track, as well as our loading platform, to which all the cars are spotted; and we contend that, especially in the matter of grain, delivery is not complete until the cars are spotted there at the elevator, where unloading can be effected.

We get one service or switch per day by the Missouri, Kansas & Texas, when our empties for loading are spotted, also wheat spotted for unloading, and our loads are taken out. During the day we do a good part of our own switching with our car puller and pinch bars.

Further, this sidetrack, or switch, on which we operate, is frequently used by the Missouri, Kansas & Texas for storing of cars, and also is frequently in use when they are doing switching service at the station.

Furthermore, much care must be exercised in the cleaning of the equipment and proper loading of the flour and feedstuff, so that products reach destination in good condition. This service is performed entirely by the shipper, as is also the unloading of the grain, after the cars are spotted at the elevator. The railroads usually find their equipments in better condition after it leaves our loading platform than when the same were delivered to us.

This matter is of vital importance to our industry, and we firmly believe that after you have given due consideration to the shippers' side you will agree with us that no charge should be assessed for the spotting of cars, either for unloading or loading at industries located on private tracks.

Yours, very truly, H. DITTLINGER ROLLER MILLS CO.,
R. MAGENFUTZ, *Secretary.*

—

MARCH 18, 1914.

Whereas a proposition is now pending before the Interstate Commerce Commission authorizing railroad corporations to impose and collect additional charges or fees for the spotting or placing of freight cars upon private switches and sidings of all kinds: And be it therefore

Resolved, That this board most earnestly protests against the adoption and enforcement of this proposition for the following among other reasons, viz:

(1) Because these charges would be an additional and unnecessary burden placed upon the owners of such switches and sidings and would largely increase the expenses to be paid by consumers of all produce and freight brought into the Borough of The Bronx and consequently increase the cost of living and most seriously impair the commercial growth and prosperity of this section of our city.

(2) Because the adoption and enforcement of this proposition by the Interstate Commerce Commission would be a most unjust discrimination against this borough and seriously impair and retard the construction and operation of an industrial or marginal freight railroad in the southerly and easterly portion of the Bronx contiguous to Long Island Sound, and especially designed to facilitate the reception and delivery of manufactured materials and merchandise of all kinds directly at factory doors at regular New York rates of freight.

(3) Because railroad companies should not be permitted or directed by the Interstate Commerce Commission to impose this additional burden upon the owners of these private switches or sidings which are constructed and kept in repair by the owners of the real estate, and who are yearly assessed and taxed therefor by the State and city authorities as part of the land and improvements.

Resolved, That a copy of these resolutions, duly attested by the secretary of this North Side Board of Trade, be forwarded to the Interstate Commerce Commission.

WILLIAM W. NILES, *President.*

CHARLES E. REID, *Secretary.*

SHERIDAN COMMERCIAL CLUB,
Sheridan, Wyo., March 18, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: It has come to the notice of this organization that your commission is investigating the question of alleged special service rendered to shippers by carriers relative to spotting cars, etc., and to a proposed advance in rates in official classification territory.

Heretofore the freight rate has included compensation for all services from the point of loading to the point of unloading regardless of whether the tracks were railroad owner or private property, and the private sidetrack was encouraged and developed by the carriers to supplement their inadequate terminal facilities or to enable carriers to participate in traffic otherwise inaccessible to them, and have lessened their investment and the cost of handling the traffic.

We are of the opinion that "transportation" includes all railroad service and tracks and facilities devoted to the hauling of freight traffic, and that the published freight rates now include, and have always included full compensation for these services. To depart from this long-established practice, requiring the carrier to add to the present freight rate a separate charge for receipt and delivery of freight, will deprive the shipper of the value of his investment in terminal facilities and transfer it to the carrier.

As we understand that your commission has set March 24 as the final date for receiving statements and briefs upon this matter, we hereby petition the commission to refrain from definitely and finally concluding this matter until such time as a full hearing, after due and adequate notice and with respect to the territory in which the shippers are located, has been given.

Very truly, yours, H. E. FRYBERGER, *President.*
M. STEELE, *Secretary.*

WESTERN FRUIT JOBBERS' ASSOCIATION OF AMERICA,
Denver, Colo., March 19, 1914.

Mr. G. B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: We are attaching hereto protest against proposed charge for spotting cars on private and industrial tracks.

We trust that this protest will be given consideration by the honorable commission.

Very truly, yours,

WESTERN FRUIT JOBBERS' ASSOCIATION OF AMERICA,
W. D. TIDWELL, *Secretary.*

[Inclosure.]

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.:

Protest against proposed charge for spotting cars on private and industrial tracks.

This organization, the Western Fruit Jobbers' Association of America, is duly incorporated under the laws of the State of Colorado and has for its principal object the upbuilding of the fruit and produce industry of the United States.

We, the said association, in behalf of the members who are growers, shippers, receivers, and distributors of fruit and produce, located in 126 of the principal markets in that territory including and extending from Detroit, Mich., to Los Angeles, Cal.; New Orleans, La., to Portland, Oreg.; and Louisville, Ky., to San Francisco, Cal., respectfully, but most earnestly and vigorously, protest against the proposed or suggested charge for spotting cars on private and industrial tracks, in so far as it may be applied to the fruit and produce industry in the United States, as it would be discriminatory, unjust, and unreasonable, and for the following reasons:

First. The rates on perishable freight, fruits and vegetables, as made up at the present time include in addition to the line haul the service of spotting cars for loading and unloading, liability while in transit, fast schedules, prompt handling at terminals, and all switching service, unless otherwise provided in the published tariffs on file with the commission.

Second. Shippers and receivers of fruits and vegetables throughout this country have constructed private tracks at large expense. Perishable food products must in their very nature be handled with care and promptness. The construction and use of these private tracks relieve congestion at terminals, facilitates quick loading and unloading, and is in reality a great saving to transportation companies.

Team-track property in every city is now hard to obtain and is very expensive; cars can be placed on private tracks as a rule much quicker and at less cost than to team tracks that are usually congested.

Private and industrial tracks used for unloading fruits and vegetables are and should be considered terminals.

Third. At the present time in practically all terminals and at stations on various lines the switching charges on fruits and vegetables are absorbed by the carriers enjoying the road haul when shipment originates at competitive points. This absorption of switching charges is taken care of in the making of through rates.

If there is to be a separate charge for switching and spotting service, then we must ask and will expect the through rate on fruits and vegetables to be materially reduced and a new system of rate making on these commodities be introduced.

To support and explain our objections and protests as above outlined, we would call the attention of the commission to the following facts:

FRUIT AND VEGETABLE INDUSTRY.

In the development of the fruit and vegetable industry in our country, many millions of dollars have been invested by transportation companies or carriers and our members, who will be hereinafter designated as "distributors."

The industry, so far as interstate business on domestic fruits and vegetables is considered, is just entering its fortieth year and may well be regarded as the baby industry of the United States. It has never asked or received special privileges from any source, but on the other hand it has required long hours, tremendous work, and short profits to bring it to its present volume and importance.

Freight rates are fixed, but the production and consumption, the supply and demand, the cost and selling of perishables is ever uncertain and changing. Freight charges are paid irrespective of market conditions, without regard to profit or loss to owners.

It is a benefit to the entire country, as well as to carriers, to permit and make it possible for every producer to reach the widest possible range of markets that can be opened to them by the railways with which they are served.

As an illustration, let us look at the raisin industry of California, which was started about the year 1876. At that time the supply of raisins for the United States came principally from Spain.

During the first year of California's venture, only 70,000 pounds of raisins were shipped East, while over 1,000,000 pounds of Spanish raisins were moved from eastern points westward. To encourage the industry, and we can safely say from a selfish or business motive—a rate much lower was made on eastbound than applied on westbound shipments. Yet within the short space of 15 years the California business grew to nearly 40,000,000 pounds, and the rate was justified.

The movement in the year 1912 was 190,000,000 pounds and the success of the raisin industry created a market for fresh or green grapes.

In 1912 the movement of green grapes amounted to 6,357 cars, and the deciduous fruit crop of California alone in the same year was in excess of 13,000 cars, the citrus crop of 1911–12 in excess of 40,000 cars.

In the beginning of this industry the railroads offered a rate on prospective business, the producer and distributor invested capital and brains and took all the chances.

What is said of the raisin and other fruit industry of California, applies to the entire fruit and vegetable industry, but we will cite another case—the cantaloupe industry.

This business is created by the wholesale distributor, who, in many cases, advances the grower the funds to pay land rent, purchase seed, meet living expenses while crops mature and for farm labor and harvesting. Without this assistance the business would not be produced for the railroads.

The transportation companies do not furnish facilities at the point of production for loading cars, but the distributor pays for a sidetrack, builds his own platforms and sheds, performs all the functions of loading, leaving nothing for the transportation company to do except to ice the cars and bill them out, the icing service being most amply paid for.

The distributor takes the chances—he may make a profit or may take a loss. The transportation company has a fixed charge based upon a profit and can not lose, provided the traffic is created for them.

These conditions apply in every State in the Union. Go where you will, north, east, south, or west, and you will find that in every producing section loading platforms, sheds, and warehouses are furnished by the shipper; and in every city and town the distributor aims to furnish every facility to the transportation company for the speedy unloading of these products.

Transportation companies do not load or unload carlots of fruits and produce, they do not store them—but expedited service is, or should be given. Small local shipments from producer to market are being discontinued, and our National Government is urging the assembling of these into carlots.

Without exception, there isn't an industry conducted in this country wherein cooperation between producer, carrier, and distributor is as essential to success as in the fruit and produce industry.

When we consider the millions of dollars invested in loading and unloading stations, tracks, and other facilities for prompt movement of perishables, and realize that these millions of dollars are furnished by consignor and consignee, it must be agreed that this industry has saved millions to the carrier and created millions of revenue for them.

As we travel over this vast and fertile country and see the millions of fruit trees that are being planted, and yet to bear, the thousands of acres of virgin soil that is being planted in order that our people located in towns and cities may be supplied with fresh vegetables, we are awakened to the importance—yes, the very necessity of transportation facilities that will give not only wide distribution, but the most efficient and speedy delivery. To do this, the carrier must, and is assisted in every possible way.

This association and its individual members are proud of the part they have played in building up the transportation facilities of our country, and the assistance given to the carriers in making the industry so large and profitable to the people of our country.

This is not a time to retard development, but it is our imperative duty to continue to advance the industry with every modern convenience.

RATES.

It is claimed by some that a freight rate is made only to cover cost of transporting from one given point to another. This idea is absurd, in so far as the rates on fruits and vegetables are regarded, and we would cite the commission to Interstate Commerce Commission Docket 5207, wherein it is admited by the carriers that the charge of $17.50 per car for loading and switching charges at Galveston on bananas is absorbed by carriers handling traffic, and is covered by the published through rates, and the same condition and principle applies at all points of origin.

It must be admitted that in making rates for the movement of perishables, fruit and vegetables, the transportation company takes into consideration the anticipated tonnage, cost of placing cars for loading, service given in getting commodities safely and quickly to the consuming market, placing cars advantageously at destination so that they may be unloaded promptly, and ever having a view of revenue and profit to the transportation company; yet, they can assess only such charge as the commodity will stand, in order that its sale to the ultimate consumer will not retard shipments.

We must also remember that the basic principle of rate making includes terminal charges, as well as regular line haul.

PRIVATE OR INDUSTRIAL TRACKS.

To facilitate the prompt handling of perishables, many transportation companies owning property within cities have leased on terms required and approved by the commission, building sites to distributors of fruits and vegetables. These distributors have erected valuable warehouses and expended large sums for improvements which enhance the value of the railroad property.

Be it remembered also that in many instances the distributor, at great cost, has purchased valuable trackage property, erected convenient buildings, and entered into a contract with the carrier or carriers whose track or tracks abut upon said property for prompt and efficient service.

The usual contract entered into by and between the distributor and carrier states that the distributor will grant, free of charge to the carrier, the necessary right of way for tracks—said right of way often being very valuable—and will pay cost of construction, and yet tracks shall be and are under full control of the carrier; and further, the carrier reserves the right to use these tracks for shipment or delivery of any freight which they—the carrier—may desire, which is by order of the commission.

In reality, the control of this private track passes to the carrier, yet these contracts usually specify that the carrier is released from liability after a car is placed upon said private track, and until a loaded car is actually switched to the main line it does not assume responsibility. These tracks are directly under the supervision of the commission, just as are the main lines, whether used or necessary in the transportation or delivery of property.

The inducements offered to these distributors are of mutual benefit; cars can be spotted by transportation companies on these private tracks with dispatch and the congestion at terminals relieved.

It would be manifestly a discrimination, unjust, and unreasonable to require the distributors to pay any sum, however small, for the privilege of loading or unloading their cars from tracks constructed under these conditions, and in many cases it would be in violation of contract.

Ample facilities for unloading perishables at team tracks could be required of all carriers, but the cost of obtaining property and maintenance of same would be much heavier than the present system and a burden to transportation companies in many ways, as well as to distributors.

MOVEMENT.

The movement of fruits and vegetables is perhaps the largest volume of interstate business of the transportation lines, and we believe that the average haul is longer than on any other commodities.

Factories and mills are built in various parts of our country to supply local demands. Nature governs the production of fruits and vegetables, and the season of production in every section is limited, but the demand covers a period of 12 months in the year; therefore as one crop in one section is exhausted we move supplies from another section, in order that the consumers in every section may be supplied. Fruits and vegetables are no longer luxuries, but are necessary articles of food in daily life.

On account of their perishable character, the utmost flexibility of rules is necessary to expedite loading and unloading in order to protect both product and the industry.

CONCLUSION.

The underlying principle of the law is to forbid discriminations, unreasonable rules, and unjust demands.

As an administrative body, the commission can not and will not stop at the surface of a transportation problem, but must reach the actual situation and examine into conditions, necessities, and requirements, not from one viewpoint only but from all, in order that justice may prevail and industry be promoted.

The question at issue can not be considered from one angle only; neither can it apply to any limited territory, as every section of our country must and will be effected.

The interests of the general public, the grower, shipper, distributor, transportation company, and the consumer would be seriously injured if perishables—fruits and vegetables—are not given every facility for prompt handling.

Let us emphasize most forcibly the importance of and saving to transportation companies through the services performed and facilities furnished by both consignor and consignee in loading and unloading fruits and vegetables.

We submit for your consideration the foregoing facts, and believe that restrictive rules can not safely be applied to all commodities. Fruits, vegetables, and perishable food products should have careful and special consideration.

The magnitude of the traffic and the possibility of enormous damage to the industry, and consequent curtailing of carriers' earnings, with attendant burden placed upon the consumer by what might appear as trifling charges is a most serious subject.

To impose additional charges for spotting cars would be discriminating, unjust, and unreasonable, and we respectfully urge the honorable commission not to disturb the present conditions as pertains to the fruit and produce industry.

Respectfully submitted.

THE WESTERN FRUIT JOBBERS' ASSN. OF AMERICA,
W. D. TIDWELL, *Secretary.*

—

LOS ALAMITOS SUGAR CO.,
Los Angeles, Cal., March 19, 1914.

Mr. G. B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: I have been following accounts of hearing before your honorable commission regarding the possibility of carriers making special charges, in addition to the freight rate, for spotting cars on private tracks. I do not know how broad your inquiry is, or all conditions under which tracks might be termed private sidetracks. However, it seems that, should the commission arrive at the conclusion that lines in official classification territory should make an extra special charge for placing cars on so-called sidetracks for loading or unloading, that it might carry with it the possibility of similar rules being made later for western territory. If the conclusions of the commission have this possibility, it seems to us that western shippers are interested, in which case we should have an opportunity to set before the commission evidence as to the conditions surrounding the operation of such tracks in the West. Taking our own plant as an illustration, I want to state that carriers have never been given instructions to make certain switches at certain hours, and that we have no interplant switching, consequently the occasion of publishing a charge for such service has never arisen. Compensation for the service of spotting cars for sugar plants has always been included in the freight rate, as the necessity for this service was well known and fully understood when, from time to time, rates were established, and the rates that have been established have contemplated performance of this service.

Sugar beets are always destined, so far as I know, to a sugar plant using what might be called a private sidetrack. Carloads of sugar invariably move from a sugar plant, and therefore it can not fairly be said that in fixing rates on sugar and on beets the services mentioned were not contemplated, because it would be only in some isolated case, if ever, that either beets or sugar are handled in carloads without the necessity for such services. There can be no discrimination between the shippers of sugar and the receivers of beets, as all require practically the same service. So far as I know, practically the same condition that exists at our plant exists throughout all the sugar factories in the West. If we are correct in feeling that the far-reaching effects referred to may follow any ruling of the commission, as related to official classification territory, we would respectfully ask that determination of the matter be deferred until after a more extended investigation, and we believe that notice should be given far enough in advance of public hearings at various points throughout the West to allow the western shippers to prepare full and accurate data to lay before your honorable commission.

Please advise us at your earliest convenience of action taken and oblige.

Yours, truly, HENRY C. LEE, *Manager.*

—

MILWAUKEE, WIS., *March 19, 1914.*

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: With reference to the matter coming up before the commission in regard to the charging by the transportation companies for the spotting of cars, we can not see how the transportation companies will be benefited by such tariffs being put into effect. To have such tariffs go into effect would work great hardship on shippers, on the transportation companies, and on the consumers, who in the end pay the freight bill.

If the shippers were compelled to pay for spotting cars, they would load a great many less cars and would haul their wares to the transportation companies' freight houses or team tracks instead.

The transportation companies would then have to have better facilities for handling freight at their freight houses. They would have to have larger freight houses, more of them, more team tracks than they now have; in fact, they would be compelled to enlarge their terminal facilities to such an extent that the increased earnings from spotting cars would be more than eaten up by the interest and upkeep of the additional expense for the increased terminal facilities. Not only that, but they would have to have a great many more men at work in their freight houses loading and unloading cars at all times. They would receive a great many more claims for damage than they now do on account of improper packing of cars, as they would be compelled, if this tariff was put into effect, to load a great many cars that the shipper now loads. In fact, in the end, as we have stated above, a great hardship would be worked all around and no one would reap any benefit.

It seems more just to us to charge the transportation companies for loading cars after they are put in on our siding as it would for them to charge us for placing these cars. In some of our cars we use lumber as bracing. Why should we not charge them for this dunnage? They reap the benefit from the use of same as much, if not more, than ourselves, because our goods arrive in good condition and there are less damage claims to pay.

Why, then, should we not be entitled to imbursement for this lumber? There is as much in this argument as there is in the argument that if the switching or spotting service is worth anything to the shipper he should pay for it.

Last, but not least, in the end the consumer would pay all the additional freight charges, making the cost of living that much higher. If we are compelled to pay several dollars for the placing of empty cars, the same amount for the taking away of loaded cars, the consignee of our shipment being compelled to duplicate the same, by the time the goods reach the ultimate consumer they would cost him that much more than they do now, as it is the consumer, after all, who pays all the freight.

We have studied this matter very carefully and must submit that we can not come to any other conclusion than that this is a veiled attempt to increase the earnings of the transportation companies without having it appear that the rates have been raised, while, in effect, it is enlarging the charges for transportation. We think, in all justice to the people of this country and even to the transportation companies themselves, that such a tariff should not be allowed to go into effect.

We therefore most respectfully ask that your honorable commission prohibit this.

Yours, very truly,

A. J. LINDEMANN & HOVERSON CO.,
A. T. FROH.

—

WESTMINSTER, MD., *March 19, 1914.*

THE INTERSTATE COMMERCE COMMISSION.

DEAR SIRS: The attention of this, the Westminster Fertilizer Co., has been called to the proposed change of freights on cars of fertilizers, which, in our opinion, will work a serious hardship to our business.

We, by reason thereof, very respectfully submit our protest thereto for the following reasons:

First. It is proposed to impose the same charges on cars without reference to tonnage thereof, so that a 20-ton car would bear the same charge as one of double the capacity. The inequality and consequent unfairness of such a tax is manifest.

The proposed charge of $4 per car—that is, $2 at each end—means an addition of just that much on each car of goods without reference to quantity in car. Contracts on spring of all delivery of goods have been made on the basis of $1.25 per ton from this station. Now, to undertake a charge such as the proposed rate contemplates will result in serious trouble and great inconvenience, and will operate against the successful management of our business.

We feel that a rate not exceeding $1.30 per ton between this station and Baltimore would be fair, equitable, and just, and an encouragement to our trade and our patrons.

For this and other reasons we respectfully protest against the tax.

Very truly, yours,

WESTMINSTER FERTILIZER CO.,
By A. H. HUBER, *Manager.*
FARMERS FERTILIZER & FEED CO.,
By E. M. BISH, *Manager.*

—

MILWAUKEE TANNERS' FREIGHT BUREAU,
Milwaukee, Wis., March 19, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: In the matter of the 5 per cent proposed increase in freight rates and circular by the commission dated Washington, March 5, 1914, I submit attached statement of freight forwarded and received tonnage in carload lots (does not include L. C. L. tonnage) of Pfister & Vogel Leather Co., who operate five tanneries—four in Milwaukee and adjacent thereto and one in Cheboygan, Mich.—for the tanning of sole leather exclusively.

All these plants are served by industry sidings; in no case are there team tracks of the carriers adjacent of convenient access or of any

feasibility, in consideration of the fact that the carriers could not, with their present limited public team-track facilities, effect delivery on such team tracks of the number of cars received and forwarded by this firm.

The industry tracks of the several tanneries are:

Menomonie tannery, 2,005 feet, Chicago & St. Paul Railway, exclusively costing the firm about $1,348.

Bayview tannery, 6,649 feet, Chicago, Milwaukee & St. Paul Railway, Chicago & North Western Railway, Grand Trunk Railway, costing the firm about $504.

Island tannery, 1,267 feet, Chicago, Milwaukee & St. Paul Railway exclusively. Real estate and tracks (which were then on the property) were purchased jointly and I am unable at this time to separate the cost of the tracks from the real estate value, but can secure the information if desired.

South Milwaukee tannery, 830 feet, costing $5,808, Chicago & North Western Railway exclusively.

Cheboygan, Mich., 2,700 feet. No approximate expense in dollars can be arrived at. Part land, labor, and material furnished by the firm and the Michigan Central Railroad, with various stipulations and agreements, which can be furnished if desired. The Detroit & Mackinac extended a track to the plant several years ago, under what understanding or agreements I am unable to state at this time, but can advise if necessary.

It can be seen that there is no relative comparison of cost of the several tracks at the different plants, ranging from a track built by the carriers to that at the South Milwaukee plant, costing the firm a large sum.

In some cases the tracks are on the land of the carriers, and in others the tracks are on the land belonging to the firm, and again the tracks are on land partly owned by the carriers and partly owned by the firm. The distance of the switching movement varies from one-car length, at the Menomonie tannery, to the longest of 830 feet, at the South Milwaukee tannery.

The attached statement shows a total of 6,336 cars were forwarded and received by this firm, and if charged at a flat rate per car of $2 would cost this firm $12,672.

I estimate a 5 per cent increase in the freight rate on the total tonnage of this firm (less than carload included) moving in official classification territory, would be 5 per cent of $250,000 annual freight expenditure, or $12,500; therefore but little difference exists between the cost of spotting 6,336 cars, at $2 per car, or a 5 per cent increase in the freight rates on tonnage in official classification territory.

If a 5 per cent increase was granted by the commission on traffic from and to all points, there would be a material difference.

Respectfully,

A. B. CASWELL, *Manager.*

Statement of carload freight forwarded and received by Pfister & Vogel Leather Co. from March 1, 1913, to March 1, 1914, Milwaukee tanneries.

LAWRENCEBURG, IND., *March 19, 1914.*

The INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

DEAR SIRS: The Lawrenceburg Roller Mills Co., whose principal place of business is at Lawrenceburg, Ind., are manufacturers of wheat flour and feed, drawing their supplies of raw material (approximately 1,500 cars annually) principally from the States of Indiana, Illinois, and Missouri and shipping the outbound products (approximately 3,000 cars annually) to points in C. F. A. trunk line and southeastern territory.

There are numerous reasons why we, as one of the thousands of shippers who will be affected, would protest against the proposed switching or spotting charge, a few of the more important of which are:

From the very beginning of railway transportation in the United States to the present day it has been the understanding of the industrial world and the theory on which the railroads themselves established rates that the schedules as published by them should be and have been adjusted sufficiently high to permit them to include cost of industry or team-track switching at both ends of transportation without extra charge.

Other branches of transportation serving the general public have likewise followed practically the same plan as the railroads. Our mail is collected at our door and delivered to its final destination at one charge; no extras added. The telegraph and express companies can be cited as other examples.

That the manner and method of collecting fares and rates for so long a period has not been disturbed must command recognition for its admirable efficiency. The precedent of including cost of industrial switching in the through rate having been once established and so considered among the master minds of our country, including some of your most honorable body, as properly included therein, has really become an unwritten law under which the railroads as well as the shippers have been governed for many years. There is no question but that this custom was so firmly impressed in the minds of the writers of the "act to regulate commerce" that no doubt can exist regarding the interpretation of their intention where it is specified in the sixth section of the act that railroads shall file tariffs covering charges for terminal, storage account, icing, etc. It was not their intention that the extra charges referred to be construed as including the ordinary delivery at an industrial switch track, but cover charges for extra services rendered by the carrier other than direct transportation between shippers. In support of our contention that the industrial switch is equally a convenience and a necessity for the railroads as well as the shippers, would cite reference to your decision in the case of the Association Jobbers of Los Angeles *v.* Atchison, Topeka & Santa Fe Railway Co., opinion No. 1251, which in part reads as follows:

"The spurs and sidetracks which connect industries with a carrier's rails within switching limits found to constitute a portion of the carrier's terminal facilites.

"The delivery of a car upon an industrial siding found to be a substitute for delivery upon public-team tracks, and, no additional service being involved, can not be made the basis for an additional charge."

The shippers in most cases have contributed largely to the construction of their switch tracks, having surrendered title to the property covered by same, for which the railroad, it being understood, would grant switching service without extra compensation therefor. Frequently these tracks are used by the carriers for the loading and unloading of freight consigned to or from parties other than those that were directly financially interested in the construction of such tracks. In fact, a large percentage of switch tracks considered private, in so far as they were constructed partially at the expense of private capital, have become virtually team tracks where freight for other favorably located industries may be loaded or unloaded. It is apparent, therefore, that industry switch-track delivery in general practice require no greater amount of time, labor, or expense than the ordinary team-track delivery, and that without the former the carriers would be utterly incapable to handle even the volume of traffic which ordinarily should be switched to the team track. Large industries have been induced to relocate their plants by the industrial bureaus of the railroads interested, in many cases the principal inducement offered being greater switching facilities. Millions of dollars have been invested in this manner without even the thought of the possibility of such investments being appropriated at any time.

The proposed charge for industrial switching or spotting on a per car basis we would protest as being inequitable and contrary to all pre-

cedents, rules, and basic principles of rate making or a basis for charge for transportation. The charge for transportation (rates) in any case between any two points must primarily be based on:

(1) Mileage.
(2) Cost of transportation.
(3) Competition.
(4) Value of commodity transported.
(5) Volume of commodity transported.

The first two items, in so far as concerns a switching charge, can be definitely computed and, as we have previously stated, have been and should be, included in the through rate.

Competition compels economic and industrial equalization in all its phases, and commerce in all branches must at times absorb inequalities in a small way to meet this force. Competition among the railroads during the past decade (rates having been equalized) has been, and will be, more pronounced in the future to give more exacting service, for which, together with other causes for increased cost of transportation, they may require additional revenue, but the method of obtaining such should be reckoned from an economic standpoint based on the proper fundamentals and not arbitrarily established. Innumerable changes and improvements for service and convenience have been made by the railroads traceable to competition, for which no extra charge has been made heretofore, but rather absorbed and considered as a part of the rates and fares collected. To disturb precedent, stifle competition, and arbitrarily tack on an additional charge in the case of industrial switching must naturally result in other extra charges for minor services performed, which have heretofore been considered included in the one charge paid for service rendered.

The industrial world, generally speaking, a few cases excepted, is disposed to look upon the railroads' request for 5 per cent increase in rates with no disfavor, providing the advance is made applicable from and to all points in the proper proportion in order to preserve their present equilibrium, under which large industries have been advantageously located and expanded.

If the railroads are justly entitled to additional revenue, the assessment, if one is to be made, should be on the beneficiaries in general and not as a tax on any proportion thereof. The proposed switching charge will be a direct discriminatory tax on low-rate commodities, such as all grains, including corn, wheat, rye, oats, and their products, salt and sugar, coal, coke, lumber, etc., including many of the ordinary necessities of life, the total tonnage of which aggregates approximately 60 to 70 per cent of the total transported by the railroads of the United States. Their value per hundredweight is many times (varying in individual cases) less than the value of higher-rate commodities, the carrier's risk consequently being proportionately reduced. These commodities are recognized as being marketed on a more closely competitive basis than other commodities taking higher rates.

A switching charge of $2 per car in our own business would approximately amount to 15 per cent increase in rates, and, in many instances, the switching charge would figure fully 1,000 per cent higher relatively than the "5 per cent increase" which is being asked for by the carriers. In milling-in-transit we are already compelled to pay an extra charge of one-half cent per hundredweight, minimum $3 per car, which, we maintain, fully compensates the carrier for the extra switching service performed. In fact, but it has no direct bearing on the subject at issue, the most severe competition we have to meet is from mills located in the southeastern territory, where no extra charge is made for the milling-in-transit privilege.

Summarizing, would state:

That the expense of industrial switching has been included in through rates for so many years and has become a custom of no small importance under which large investments have been made, which would be seriously impaired were a separate and distinct charge made for delivering cars on private sidings.

That the railroads consider the industry switch track a great asset, not only as a dependable source of tonnage, creating revenue, but as an additional facility with which to handle their constantly increasing volume of tonnage.

That the expense of delivery to industry switch track is not greater than to the ordinary team track.

That the industrial switching charge, as a substitute for the "5 per cent increase," will not collect the additional revenue on an equitable basis, but operate as a discrimination against low-value, low-rate, large-volume commodities as compared to commodities of higher value, higher rate, and smaller volume.

That the provisions of the act to regulate commerce, having been written and adopted when the long-established custom of including industrial switching in the through rates was being practiced, it should be understood that no such radical diversion from the methods of charging for transportation were contemplated.

That it is of utmost importance that the subject in question be given a most thorough investigation before definite action is taken, and to this end we would urge that the shippers be granted additional time than has been designated, in order to give them further opportunity to present their case.

Respectfully, yours,

LAWRENCEBURG ROLLER MILLS CO.
F. HUTCHINSON.

COLORADO MILLING & ELEVATOR CO.,
Denver, Colo., March 19, 1914.

CHAIRMAN INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

DEAR SIR: We desire to register with you our objection to the proposed plan of allowing railroads to impose a minimum charge of $2 per car for spotting cars at industries located on privately owned or railroad owned tracks which are not public service tracks. Such a rule would be revolutionary in its effect and a discrimination against thousands of industries. We respectfully urge that action upon it be deferred until abundant opportunity be afforded interested parties to set before you all facts in relation thereto. We hold that charges shown in present railway tariffs cover all terminal and transit services; also that an industry located on a private track is already at a disadvantage over one located on a public service track because they have a larger fixed investment. They facilitate the business of the railway companies and do it at their own expense. We can show our contention best by illustration.

Several years ago we became interested in a corporation formed for the purpose of building a 500-barrel mill and 80,000-bushel grain elevator at Twin Falls, Idaho. The Oregon Short Line Railroad Co. could not furnish a proper location on their public service track. We therefore purchased a site, and in order to get a sidetrack to it, we bought property at a cost of $4,300. Then we paid almost $1,000 for the construction of the track. The railroad company only contributed the iron; we paid for ties, grading, labor, etc. After doing all this we entered into a contract with the Oregon Short Line whereby they are permitted to use this sidetrack for their own purposes whenever they can do so without causing us serious inconvenience, and as a matter of fact, they have used it extensively. It does not cost the Oregon Short Line as much to do the switching to this mill over this private track as it would if the mill was located on a public service track; yet if we properly understand the proposed charge for spotting cars, if such a rule was to-day in effect on the Oregon Short Line, we would be obliged to pay at least $2 per car extra for every car set to the mill either for loading or unloading. We believe you will agree that such an additional charge would be unjust. If we were compelled to pay it, it would practically mean that the railroad company had been granted extra compensation without performing extra service; also that our property had been turned over to them free.

We could multiply illustrations indefinitely, but we believe it is unnecessary. We again most earnestly urge that action on this subject be suspended until there has been allowed ample time for full investigation.

Very truly, yours,

H. E. JOHNSON,
Assistant General Manager.

CADILLAC, MICH., *March 19, 1914.*

THE INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: The Michigan Hardwood Manufacturers' Association, consisting of about 75 firms of sawmill men of Michigan, as shown by the attached list, was represented at the hearing in docket No. 5860, in Washington, D. C., February 27-28, where the proposed spotting of cars charge was discussed, by its secretary, J. C. Knox, but as he was unable to remain over to the adjourned hearing on Monday, March 2, he was advised by Mr. Brandeis to present the views of his members in writing. Therefore, we desire to make the following statements:

Lumber as handled by all of our members is strictly a carload commodity, fully one-half of it moving in open cars, usually loaded to near the carrying capacity of the equipment used, at high rates as compared with other commodities similarly handled and furnishes a constant volume of tonnage to the railroads. Each of the industries is located on or adjacent to one or more railroads, and the railroad sidetracks, usually not of great length, extend into the yards and property of the shipper, and in many cases the shipper has given up very valuable property for the use of these tracks and furnished at least some part of the cost of their construction, by furnishing ties, grading, and other equipment.

Many of our members have their logs hauled in trainloads from sidetracks in the timber to the sawmill, where the timber is manufactured, the log haul ranging from a few miles to 100 to 250 miles, for which a specific rate is charged from point of shipment to destination.

It is customary and has been the practice of the carriers to place these cars on such sidings for loading or unloading and this service has always been included as a part of the through rate. Many of our members located in the larger cities have given up valuable property for the use of the railroad tracks. We realize that this is mutually advantageous to both the railroad and the shipper, but if the railroad was compelled to buy property adjacent to the mill of the shipper for said track purposes, it would cost them a large amount. These tracks save warehouse and team expense to the carrier and the switching is done as quickly on the tracks in the yards of the carriers as could possibly be done at the carrier's warehouse or team tracks and at no greater expense.

We wish to state that it is our view that no charge should be made for what is called the spotting of cars at the tracks of the shipper, as we consider that the railroads when making the rates contemplated they are covering this very important part of the work.

This association has gone on record as in favor of a 5 per cent advance in freight charges, providing this 5 per cent is equally distributed and covers its competitors in other territory outside of the official classification territory. The shippers in the lower peninsula of Michigan being located at the northwestern edge of the official classification territory come in sharp competition with manufacturers in the upper peninsula of Michigan, also in Wisconsin and Illinois located in western classification territory, where no advance in rates to the west has been contemplated, although the railroads serving the territory described at the request of the official-classification railroads, filed their tariffs for a 5 per cent advance covering Central Freight Association and trunk line territory.

On account of the railroads cutting off various commodity rates, both State and interstate, and filing no commodity tariffs at a 5 per cent advance, thus throwing the commodity rate on a classification basis, this association has been compelled to enter complaint with the Michigan railroad commission at Lansing and the Interstate Commerce Commission at Washington, against advances in excess of 5 per cent, and we have recently been advised by the carriers that it is their intention to correct such discrepancies, making only an advance of approximately 5 per cent.

Many lumbermen feel that the present rates on lumber throughout the country are on a too high a basis at present as compared with other low commodity rates and there should be no advance whatever in lumber rates. Nevertheless, if after the commission's investigations, it is decided that the carriers are entitled to an advance in rates, the members of our association will not oppose such an advance, providing such advance was fully equalized.

The understanding that prevails among shippers and receivers of lumber is that present rates include something to cover the acceptance and delivery of shipments at terminals, especially in all official classification territory. Many important cases decided by the commission, since its creation by the act of 1887, have involved lumber rates and in such proceedings the carriers in defense of rates attacked, have filed thousands of pages of record with testimony about the terminal expense which they assume in connection with the rates; or, in other words, many rates attacked as being excessive, unreasonable, or otherwise in violation of the statute have been explained and defended by the carriers and frequently adjudicated by the commission as being predicated upon, not only the line haul but some extraordinary expense in connection with the acceptance or delivery of the traffic at the terminal.

Unless the commission should make a very thorough and complete investigation of all the circumstances and conditions at each terminal,

any charge for terminal service added to the present rate must be entirely arbitrary, and it does not seem that any substantial benefit or justice can be accomplished by such method. We fear that the establishment of such an arbitrary charge for terminal service in addition to present or future rates would amount to an admission that present rates included nothing but the line haul.

We appreciate that present transportation conditions imposed upon the country at large is a burden which must be lifted or lightened, but surely that burden need not entirely rest upon shippers or receivers of freight who load or unload on private sidetracks. Such shippers, we think, have contributed less to the burden of the carriers than have the shippers who demand and have received the freight house and public team track service in congested terminals, where the cost of maintenance and operation must be greatest.

To endeavor to meet the present necessities of the carriers by an arbitrary addition to present rates of any amount per car for terminal service would seem to not only completely destroy every existing theory and principle of the rate making, but to also be entirely opposed to the conservative policy which has so successfully guided the commission during all its existence. Should the commission, after careful investigation and a complete survey of terminal conditions at all important points, decide that the terminal charge and the line-haul charge must be segregated, the experience gained in arriving at that decision by such method would qualify the commission to prescribe the method by which such segregation should be accomplished, and we are inclined to believe that something of that character must be accomplished sooner or later. Should the commission make such an effort the members of this association would contribute all within their power to the success thereof, but, as we understand the present situation, we can not agree that anything of tangible or permanent benefit can be accomplished by penalizing sidetrack delivery with an arbitrary charge per car of any amount.

We are, however, unalterably opposed to the spotting charge, and it would work great hardship to the lumbermen of Michigan to be charged for placing and removing cars from what is known as private sidings.

Very respectfully,

MICHIGAN HARDWOOD MANUFACTURERS' ASSOCIATION.
CHAS. A. BIGELOW, *Vice President.*
JOHN C. KNOX, *Secretary.*

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: We respectfully desire to protest any charge being made for placing cars for loading, as we believe this will place a burden on both shippers and receivers.

We handle in the neighborhood of 500 cars per month, which are shipped to the adjoining States, and we as a shipper are in direct competition with coal docks in adjoining States. Were we to pay a spotting charge it would give docks located in the State where shipments billed to an advantage over a company shipping interstate.

We are in direct competition, shipping coal into Illinois, with the coal shippers of Illinois.

We are in direct competition in Minnesota with the dock industries at Duluth, who would not be required to pay a spotting charge on intrastate business.

We believe the railway rates for movement should be sufficiently high to care for service such as we now receive, consisting in the railway company putting a string of empties on our lead track and we handle them with a cable and our men in loading.

When the last car in the string is loaded the railway company's engine removes the string of loads and replaces it with a string of empties. The time required to do our work varies from 10 to 20 minutes, according to weather conditions.

We feel that an attempt to charge for placing of empties to load, as applied to us, would result in discriminations, disturbances of trade interests, and would tend to create a demand for the carriers to provide additional team tracks for loading and burden them, which in a congested terminal like Milwaukee they could ill afford to take on.

Yours, very truly,

THE YOUGHIOGHENY & OHIO COAL CO.,
J. L. MCMAHON, *Western Managar.*

—

MASTIC WALL BOARD & ROOFING CO.,
Cincinnati, Ohio, March 19, 1914.

SECRETARY INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

DEAR SIR: We desire to vigorously protest against the suggested charge by railroad lines against shippers for placing and spotting cars on industry tracks, in lieu of the proposed general increase in freight rates, to increase the revenue of transportation lines.

Action of this kind would throw the burden for increasing the revenue of the railway lines entirely upon shippers who have a lot of money invested in tracks, put in at the solicitation of the carriers, to conveniently handle their volume of tonnage.

Such industry tracks were put in at a heavy expense for real estate and cost of constructing said tracks, and freight rates included full compensation for placing cars on said industry tracks. A departure from this long-established practice would be entirely unfair to such shippers, depriving them of their investment in terminal facilities and transfer it to the carriers without compensation.

We understand the commission has fixed March 24 for the final date for receiving statements and briefs.

The National Industrial Traffic League and other industrial organizations have filed petitions with the commission to refrain from definitely and finally concluding this matter until such time when more thorough investigation can be made and after due and adequate notice with respect to territory in which shippers are located has been given, and we sincerely trust the commission will defer definite action and give the shippers an opportunity to further prepare and file their arguments.

Yours, truly,

C. H. DUYFER, *Secretary.*

—

RICHMOND, VA., *March 19, 1914.*

Mr. GEORGE B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: Referring to circular issued by the Interstate Commerce Commission, under date of March 11, advising hearings on the 5 per cent case, to be held March 28, 1914. It has been the policy of railroad companies for the past half century to encourage shippers to locate their plants and warehouses near their line of road so that they could put in private sidings to these factories and warehouses. This policy was not only adopted to secure business, but was also done with a view of economy and saving the railroad company expense in the loading and unloading of the freight. This matter has been thrashed out by the railroad people a great many times, and they have always reached the same conclusion, namely, that the loading and unloading of cars by the shippers and receivers was a saving to the railroad companies in clerk hire and labor rolls.

There is no doubt about it that the service performed by the shippers and receivers in handling freight more than compensates the railroad company for movement of cars to and from private sidings. We feel fully satisfied that when this matter has been gone through fully from its various angles it will be found that the railroad companies are the greatest beneficiaries under the private-track delivery system. This custom has been in vogue too long for any revolutionary measure to be adopted for its abrogation, and we think the best solution of the whole matter is to let it alone, and we hope this will prevail. Please make this part of the commission's file on this subject.

Yours, very truly,

WARNER MOORE & CO.,
J. S. POTTS.

—

VIRGINIA-CAROLINA CHEMICAL CO.,
THE SOUTHERN COTTON OIL CO.,
CHARLESTON (S. C.) MINING & MANUFACTURING CO.,
Richmond, Va., March 19, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: Referring to the several circular letters issued in the matter of proposed 5 per cent increase in freight rates, closing with circular letter dated March the 5th, canceling hearings assigned for March the 16th and 17th, and announcing that statements and briefs dealing with the question of spotting and placing cars will be accepted at any time prior to March the 24th, and oral argument heard on Monday and Tuesday, March the 30th and 31st.

As representative of the Virginia-Carolina Chemical Co. and the Southern Cotton Oil Co.—the former manufacturing fertilizer at 41 points in Southern States and at Cincinnati, Ohio, and the latter operating crude cottonseed-oil mills at 81 points in Southern States, and

with refineries at 8 of said points, and manufacturing plants at Savannah, New Orleans, Chicago, and Bayonne, N. J., handling tonnage in the aggregate practically 100,000 cars per annum.

I respectfully submit that the present freight-rates practice and custom of the carriers has heretofore included compensation for the entire transit service, from point of loading, at shipper's spur track or siding, to destination, consignee's spur or siding.

It is generally known that the location of industries and extension of sidetracks thereto at convenient points adjoining the carrier's right of way and in cities has been encouraged and solicited for years by industrial representatives of the common carriers and by officials of transportation lines, because of the revenue returns that would result from the operation of said industries. In fact, I think it will be conceded by all that the commerce of the United States could not have grown and developed to its present mammoth proportions without the service of these sidetrack delivery points. Congestion at terminals, particularly in the larger cities, has ofttimes been a serious menace, sometimes resulting in loss and damage claims, and always in expense to the carriers, due to delay of equipment and increased delivery expense. If the carriers had not expanded their facilities by creating these added points, new delivery and receiving freight stations, established without a capital investment for buildings and platforms and the upkeep thereof, what has been a menacing congestion at times would have practically amounted to a thorough blockade or would have required a very much increased investment by the carriers in additional land for team tracks and freight warehouse facilities.

I respectfully submit that a matter of such great importance to commerce in general is a question entitled to the most complete investigation, and this is to petition the commission to defer any final determination until after full opportunity can be extended to all shippers and interested parties at public hearings to be had at convenient times and places after adequate notice.

Respectfully submitted.

H. W. B. GLOVER, *Traffic Manager.*

—

RAINBOW FERTILIZER CO.,
Montgomery, Ala., March 19, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

SIRS: It is a cant saying that "Jones pays the freight"; it is also an axiom that "the consumer pays the freight."

The suggestion now being considered, or to be considered, by your honorable body, that the railroads be allowed a charge for switching their cars to industries having sidetracks and place this burden, in the case of fertilizers, upon the consumer, why, then, should we, the manufacturer, worry?

To induce the greatest consumption of fertilizers every effort has been made by the manufacturers of this article to deliver it to the consumer at the lowest possible cost. Fierce competition has succeeded in reducing the delivered cost of fertilizer to the consumer to such a low figure that profit to the manufacturer in these transactions has practically been wiped out. The recent published annual statements of the large fertilizer concerns confirm this.

Should your honorable body in your wisdom see fit to permit the railroads to charge for switching their cars, the cost must necessarily be added to the now prevailing prices for fertilizers. Those with a better turn for argument than the writer have told you that it is an unjust charge on the part of the railroads, no matter who in the end pay it, for the facilities afforded the railroads by the fertilizer plants in providing sidetracks for the empty cars, accepting or bearing the responsibility for the count of the contents of the cars, cost of loading, sealing them, and delivering these cars as a single packet to the railroads, is doing and performing gratuitously for them a service and responsibility that should be appreciated and paid for by the railroad, much less to be charged for by them.

Yours, respectfully,

W. A. GAYLE, *President.*

—

CHICKASHA, OKLA., *March 19, 1914.*

Hon. GEORGE B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: It has come to the attention of the Commercial Club of Chickasha that a proposition is under consideration for the railroads to charge for spotting cars on industry tracks. We understand that the proposal now made applies only to that territory known as official classification territory, but we feel that the whole country is interested in this matter on account of the likelihood of any action in the present case being extended later to other parts of the country.

We understand, also, that briefs in the present case must be filed by the 24th, according to an order made by the Interstate Commerce Commission, and that hearings are to be held on the 30th and 31st instants.

We deem this question to be of great importance to the welfare of the industrial public, and we consider that it would be proper to allow more time for the discussion of this matter.

We ask that the Interstate Commerce Commission set a later date for the hearing of this matter, so that the shipping public may have time and opportunity to present their side of this matter.

Yours, very truly,

CHICKASHA COMMERCIAL CLUB,
By B. M. JOHNSON, *President.*

—

SHERIDAN MANUFACTURERS' ASSOCIATION,
Sheridan Wyo., March 19, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: It has come to the notice of this organization that your commission is investigating the question of alleged special service rendered to shippers by carriers relative to spotting cars, etc., and to a proposed advance in rates in official classification territory.

Heretofore the freight rate has included compensation for all services from the point of loading to the point of unloading, regardless of whether the tracks were railroad owned or private property, and the private side track was encouraged and developed by the carriers to supplement their inadequate terminal facilities, or to enable carriers to participate in traffic otherwise inaccessible to them, and have lessened their investment and the cost of handling the traffic.

We are of the opinion that "transportation" includes all railroad service, and tracks and facilities devoted to the hauling of freight traffic, and that the published freight rates now include and have always included full compensation for these services. To depart from this long-established practice, requiring the carrier to add to the present freight rate a separate charge for receipt and delivery of freight, will deprive the shipper of the value of his investment in terminal facilities and transfer it to the carrier.

As we understand that your commission has set March 24 as the final date for receiving statements and briefs upon this matter, we hereby petition the commission to refrain from definitely and finally concluding this matter until such time as a full hearing, after due and adequate notice and with respect to the territory in which the shippers are located, has been given.

Very truly, yours,

J. E. SANDBORGH, *President.*

—

FOSTER PAVING BLOCK CO.,
Bradford, Pa., March 19, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: It is rumored that the railroads may be allowed to charge for spotting cars and that this charge would be against the shipper. We wish to enter our protest against this, inasmuch as it would be a very serious matter with the heavy shipper, and would be worse than the 5 per cent flat increase in freight rates. I would therefore earnestly request that your honorable commission consider this thing very seriously before allowing any charge of this kind.

Yours, truly,

FOSTER PAVING BLOCK CO.,
C. E. FOSTER, *General Manager.*

—

ST. LOUIS, *March 19, 1914.*

Hon. E. E. CLARK,
Chairman Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: Referring to question of spotting cars on private sidings, Interstate Commerce Commission special docket 5860, I. and S. docket 333.

The fire-brick department of the Mississippi Glass Co., with its general offices at St. Louis, Mo., has in the State of Missouri five sidings. They are the ordinary switches from the main trunk lines, used for unloading inbound material and loading outbound manufactured products, and vary in length—one about 425 feet long, three varying from 600 to 1,000 feet in length, and one 1,400 feet long. Besides these we receive a great deal of material from contractors loading on their sidings, which vary from 200 to 300 feet long; also on the sidings belonging to trunk lines. We have no motive power; service is performed by the railroads from which the spurs lead, and extra movements from point to point on said sidings are always charged for extra; demurrage is also charged.

Outside of the above, the only service by the railroad on our spurs is placing of cars for loading and unloading, and all of our tracks in the country towns are conveniently located at the stations, causing the local railroad crews no loss of time or inconvenience in going to and getting in and out of the same.

Our receipts and shipments are 100,000 tons annually. We find in looking over Government reports that the clay manufacturing industries of the United States ship upward of 47,000,000 tons of freight annually.

We would look upon it as an injustice and discriminatory for the railroads to make a charge for spotting cars on sidings. If the railroads were called upon to provide public facilities for the clay industries to ship their products it would mean a very heavy expenditure on their part for additional ground to accommodate tracks to take care of the shipments inbound and outbound, and no charge would be expected for spotting on public tracks. The cost of spotting cars on private tracks is no more than the same cost on public tracks.

That these sidings represent the most economical method of handling large tonnage of freight, there is no question; the cost of ground, construction, and maintenance is borne by the clay industries.

The service on private sidings is performed at times set by the railroad and always at their convenience. Finally, if the railroads are performing no more service on private sidings than they do on public sidings, and it has been shown that the immense tonnage handled on private sidings has been and is being done in an economical way for the railroads, there certainly can be no depletion of the railroads' revenue, nor any extra cost in handling this traffic. We therefore can not see the discrimination claimed.

Yours, very truly,

MISSISSIPPI GLASS CO.,
CHAS. W. PARKER,
Manager Fire Clay Department.

—

THE EMERY CANDLE CO.,
Cincinnati, March 19, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: With reference to the 5 per cent case, in connection with which the proposition to make a charge for spotting cars is being considered, we respectfully request to be placed on record as protesting against such a charge, or at least to ask you to consider the advisability of postponing action in this matter, in view of its importance, until such time after full investigation has been made.

Our plant is located at Ivorydale, on the Cincinnati, Hamilton & Dayton Railroad, where we maintain private sidetracks at our own expense. Ivorydale is located about 8 miles from Cincinnati, and at this point the Cincinnati, Hamilton & Dayton does not maintain team tracks, so that we are entirely dependent on their switching service for both carloads and less than carloads in moving our freight.

We might mention, in passing, that rates to and from Cincinnati apply to Ivorydale.

By long-established practice the freight rate is considered to cover the service of placing cars for unloading and empty cars for loading on our tracks, and, in our opinion, this custom should not be deviated from. If, as seems to be shown by the railroads, insufficient revenue is obtained from the rates now in effect, a proper remedy, in our judgment, is to make proper increases in the rates on such commodities as can stand the increases, which, we respectfully suggest, would be the only equitable way of adjusting the railroads' difficulties. The conditions differ so widely in one plant as compared with another, and conditions in some parts of the country are so different from other territories as to render the matter of determining the amount for spotting cars a complex problem. The cost of such service might be very much higher in some locations than in others, and a charge which might be just in one case would be a discrimination in another. In our case, for instance, we have kept a careful record of the time consumed during 10

days—that is to say, from March 3 to March 14—in delivering and taking out our freight. This record shows that of 123 cars handled during those 10 days the highest number handled in 1 day was 25, and the smallest number handled in 1 day was 3 cars. The total time consumed in handling these cars in our plant was found to be 645 minutes. Of the total number of cars mentioned—123—30 cars were placed on our scale to be weighed; and, allowing for this paid service an average of 5 minutes per car, the total time is reduced to 495 minutes, making an average of 4 minutes per car for switching and spotting.

According to information which we have obtained, the cost of maintaining a switch engine is $35 per day, or $3.50 per hour. At this rate it has cost only 23 cents per car for switching and placing. We believe it has been suggested by your counsel that a charge of from 50 cents to $1 per car be made.

It is our view that, as an offset for the services rendered by the railroads to parties having private sidetracks, the facilities thus offered by shippers should be taken into account. In all shipping centers of any consequence, it is safe to say, railroad terminals would be totally inadequate to take care of all the freight were it delivered to team tracks or freight depots of the carriers, and it must be admitted that the maintenance of private sidings by large shippers is a decided benefit to the railroads.

Consider, if you please, also the very large tonnage now handled in private tank cars. This privately owned tank-car equipment not only relieves the railroads from investing in and maintaining a vast amount of rolling stock, but the transportation of freight in tank cars is made possible only by the use of the private sidings of shippers and receivers. The railroads have no facilities whatever in their depots or on team tracks for the unloading of tank cars, and it is of course out of the question that material could be hauled to depots or team tracks of the carriers for loading into tank cars.

In conclusion, we desire to go on record as favoring a proper increase in freight rates in preference to a charge being made for spotting cars.

Yours, truly,

THE EMERY CANDLE CO.,
H. GRUESSER, *Secretary.*

—

ROCK GLEN, N. Y., *March 19, 1914.*

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: According to the press reports, you people have under consideration the charge for placing cars on the sidings to be loaded. There is always two sides to every question, and it is certainly unfair to have to pay for placing cars on the siding and we load the cars for the railroad. If this is going to be brought about, the railroad ought to be made to pay for loading the cars or load them.

In a majority of the cases the cars are not detained over 24 hours. This agitation that Mr. Brandeis is agitating is causing uncertainty and hesitation through the country, and should be stopped.

Yours, very truly,

ROCK GLEN SALT CO.,
F. M. RELYEA.

—

COFFEYVILLE, KANS., *March 19, 1914.*

Mr. G. B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: We have noted with much interest all of the developments in the above subject. In our opinion the very first fact that should be given consideration is the origin of the practice of carriers spotting cars on private tracks, either privately owned or railroad owned. We are inclined to the opinion that this practice originated with the carriers themselves, and, no doubt, an investigation of the past will reveal this state of affairs. Carriers have in the past encouraged the establishment of industries along their line of railway, and have offered to prospective investors and manufacturers seeking new locations convenient sites for the establishment of industries, together with private sidings into such industries, in order that in and out bound products could be handled conveniently, promptly, and with less expense than team-track service would require. In fact, to-day carriers almost without exception have industrial departments whose duties are, among other things, the locating of industries adjacent to their tracks.

Another feature to be considered is whether or not team-track delivery will guarantee to all receivers and forwarders of freight prompt service. This feature, we do not believe, is practical, and we doubt very seriously if there is a point of destination in the United States of only ordinary importance that team-track deliveries would take care of the business.

Aside from this it must be taken into consideration that there are numerous lines of industry in this country that from the very nature of the commodities handled demand delivery other than team tracks; for instance, the milling industry, the oil industry, the stone quarries, and other industries too numerous to mention.

So far as our business is concerned we know that it is absolutely impracticable to successfully operate our plants with team-track service, and you would perhaps agree with us that it is impossible to operate a milling industry if that industry could not secure advantage of deliveries other than public team tracks, and we do not believe that there is the slightest element of discrimination in the delivery of grain on private tracks, so far as this industry is concerned, for the reason that it is absolutely impossible to operate a mill and accept the delivery of grain on team track. In fact, we do not know of a milling institution in the country which operates in this manner. Therefore, so far as the milling industry is concerned, discrimination in a matter of private deliveries is eliminated.

And further, we are under the impression that the tracks on which our industry is located are not private tracks, in the strict meaning of the word, for we believe that if any shipper desired a shipment delivered on them for his convenience we would not be in position to deny the privilege.

From the information that we have been able to gather, this subject presented itself to the commission in connection with their investigation of the proposed advance of 5 per cent in the freight rates of the carriers operating in official classification territory, and the thought presented itself to the commission that if the revenues of the carriers were not sufficient for them to operate efficiently, that there was some other manner by which their revenues may be supplemented other than an advance in rates.

We urgently advocate efficient operation of the railroads in this country, and if the railroad representatives can submit sufficient proof to show that their revenues are not sufficient to meet all requirements of successful operation we are in favor of granting their request, and believe that revenues should be obtained in the manner that would offer the least resistance.

Obviously the same result will be realized, either by granting the carriers authority to advance their rates, or deny them this privilege and permit them to charge for spotting cars on tracks other than team tracks. Now, the question presents itself, Which of the two methods is the more practical? Can the industries of this country adjust themselves and continue their operations more successfully under a 5 per cent increase in freight rates, or is it more expedient to require them to discontinue receiving their freight on private tracks, unless the service of the carrier in placing their shipments on private tracks is paid for?

It occurs to us that the commisson should permit the increase of revenues, if this is necessary, in the manner that will offer the least resistance and in no way impair the service to industries, for it is very evident that if a charge is made for spotting cars on private tracks the shippers taking advantage of this delivery at the present time are going to provide themselves with equipment with which they can handle their own shipments from and to convenient points of interchange with the carriers that serve them.

This will necessitate enormous expenditures and bring about radical changes in conditions and necessarily impair the efficiency of the industry to serve their customers for a time at least, and if the desired result can be brought about by permitting an increase in rates, we believe that it would be more satisfactory to permit the carriers to increase rates to whatever extent it may be necessary, rather than compel them to increase revenues by charging for the spotting of cars on private tracks.

Of course there may be abuses and discriminations brought about by private deliveries in some lines of industry in various parts of the country, but these can no doubt be eradicated in a more satisfactory manner, for, as we have suggested before, there are some lines of industry in this country which, by the very nature of their business, require delivery on private tracks.

Therefore we trust that the commission will give very careful consideration to this proposition and also refrain from definitely and finally concluding this matter until such a time as a full hearing, after due and sufficient notice has been given to shippers and receivers of freight, in all parts of the country.

All lines of industry should be given ample opportunity to present their views and the commission should also investigate and determine whether or not those industries can conveniently operate their plants with team-track deliveries.

Yours, truly,

THE REA-PATTERSON MILLING CO.,
By W. M. CASEY.

—

ATHENS, GA., *March 19, 1914.*

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

DEAR SIRS: We respectfully protest against the proposed charge for placing cars on private sidings.

This company has provided itself with tracks at considerable expense, and loads over 1,000 cars out every year, and receives about the same number of cars in.

Our commodity—fertilizers—probably pays the railroads more than any other single commodity. Certainly this is the case in the Southern States. This charge would be a great handicap to our industry.

We understand that the proposal that has been submitted to you would make this charge on a carload of low-grade material or high-grade material. It seems to me that the rates on fertilizers are already excessively high, and this additional burden, we think, would be unjust.

The railroads in this city, and at other cities in Georgia, have recently, by authority of the State railroad commission, increased their switching charges, which has been a great tax upon us, and now if an additional charge is permitted it will be doubly hard.

The fertilizer industry has had two years that has brought many of them nearly to bankruptcy. We know one of the large companies that had to charge off a surplus of approximately $1,500,000, and created a deficit of approximately $1,500,000 in the operations of 12 months, ending July 1, 1913. This was a loss of $3,000,000. The earnings of our own company for the past two years have been extremely small.

Yours, very truly,

EMPIRE STATE CHEMICAL CO.,
By HARRY HODGSON,
Secretary and Treasurer.

—

CLEVELAND, OHIO, *March 19, 1914.*

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: The Pavers' Exchange of Cuyahoga County, Ohio, respectfully protest against any changes in the charges in addition to the present freight rate for the spotting or placing of cars on private sidings.

We believe that the charge for this service is rightly included in the freight rate, which should include all services from the loading point to the unloading point, whether the delivery is to privately owned sidings or public team track.

Public team tracks are comparatively few, and in the busy season are badly congested. The use of these team tracks is often impracticable and frequently impossible, making unnecessarily long hauls and delay to our work.

We believe that privately owned sidings are a necessity and a great benefit to the carriers as well as the shippers, and that owners of property adjoining railroads should be induced to construct and maintain private sidings, and their use be encouraged to relieve the congestion of public team tracks.

We further believe that an additional charge for spotting or placing of cars on private siding is unjust. At present we pay the owner of the siding $2 per car for trackage, and an additional charge for placing the car would create a hardship and be unjust.

For the above reasons we respectfully request that no hasty action be taken in this regard, but rather that a thorough investigation be made, and if a change in this present rate is found necessary same be not placed in force until due and adequate notice has been given shippers in respect to territories thus affected.

Respectfully submitted.

THE PAVERS' EXCHANGE,
CHESTER M. HARRIS, *Manager.*

OMAHA, NEBR., *March 19, 1914.*

Hon. E. E. CLARK,
Chairman Interstate Commerce Commission,
Washington, D. C.:

Omaha shippers generally are very much alarmed over prospect that car-spotting question is to be briefed and argued without further and more complete investigation of facts. In this position we are in substantial agreement with shipping and receiving interests of this entire section. We urge upon the commission propriety and necessity for full investigation, and ask that conclusion of presentation be deferred until such full investigation can be instituted and completed.

E. J. MCVANN.

—

FAIRMONT, W. VA., *March 19, 1914.*

Hon. E. E. CLARK,
Chairman Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: Referring to the question of charges for spotting cars on private siding, Interstate Commerce Commission docket No. 5860, the Hammond Fire Brick Co., with general offices located in Fairmont, W. Va., and plant located at Hammond, W. Va., ships all its material and receives all inbound material on a sidetrack connected with the Wheeling division of the Baltimore & Ohio. This siding is practically all on the right of way of the Baltimore & Ohio Railroad and is used by our company as well as the general public, and while the railroad company at times considers this a private siding, up to the present time we have not made a thorough investigation as to whether it belongs to us or the Baltimore & Ohio Railroad, as it was put in at this plant about 1858 or 1860. The only service performed on this siding by the railroad company is the placing of empty cars and taking out the loaded ones once a day at their convenience.

We think it would be unfair for the railroad company to charge us for placing loaded cars and empty cars on this siding, as the expense is no greater if as much as it is for placing cars on the regular railroad team track. If the railroad company were to charge us for placing cars on our siding, it would make the charge for transportation of our material to local points very expensive, as the local rate in this section averages about 4 cents per ton-mile, and we think in this case they are taking into consideration the cost of placing cars at the place of loading as well as at destination.

We hope you will give this matter due consideration, as we are inclined to think the present local freight rates are entirely too high as compared with long-distance hauls.

Yours, very truly,

HAMMOND FIRE BRICK CO.,
WILBUR GRAFFINS, *Secretary.*

—

BOSTON, *March 19, 1914.*

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: Why, for goodness sake, should the business interests directly, and the whole people indirectly, suffer for the past sins of the stock-jobbing banker directors who have marketed so many issues of stocks, bonds, and notes (ostensibly to assist the railroads, but in reality for the profits the sales from such issues yielded them) that these railroad corporations are unable to now care for the interest on and the redemption of these issues, to say nothing of the imperative physical needs of the roads themselves?

Why, to correct the conditions that have already not only injured the railroads but the innocent investor, why should a further injustice be done by advancing rates which in themselves are damaging to business and the consumer? There is a better way. The investing public have already suffered enough for the gross and flagrant sins of the avaricious banking interests involved, and for which the investor may never expect to be wholly recompensed; but to liberate from the heaviest burdens bearing down on the railroads, instead of raising rates in further injustice, let these superfluous issues of stocks, bonds, and notes be diminshed, even arbitrarily and compulsory by legislation, if necessary. If a railroad corporation is able to care for its physical needs, its interest and redemptions, with one-half the present issue of security liabilities outstanding, cut these liabilities by agreement or compulsion right in half or in thirds, or according to the shrinkage demanded; give holders one for each two parts owned, or one part for each three held at present, or whatever other ratio may serve the purpose. Is this not much better than the further issuance of security liability (a request the courts wisely refused the N. Y., N. H. & H. R. R. recently), better than advancing rates, better than receivership? If this suggestion is carried out the smaller amount of securities will advance in price, dividends may again be commenced at no distant day, and it will prove the best adjustment that can possibly be made for all concerned; and although these smaller holdings must at the very best show original investors some loss, is this not better than a total loss of the original holdings—an alternative that seems to me to be in more than one instance inevitable? This arrangement or restitution from those responsible for piling these crushing liabilities on the corporations are the only two just methods that can be conceived for the adjustment of present railroad corporate and financial conditions. Please give these suggestions your serious consideration for the sake of all concerned.

Yours, very respectfully,

CHESTER R. LAWRENCE.

—

APRIL 2, 1914.

Mr. GEORGE B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: In the matter of freight rate increase in official-classification territory, and in the matter of the proposed charge for spotting trap and ferry car service now before the commission, we beg leave, on behalf of ourselves as heavy shippers and receivers of freight, to file protest against these proposed charges, covering alleged free service, and to urge upon the commission the desirability of granting to the railroads their request for a horizontal increase in rates of 5 per cent, and we herewith summarize our views as follows:

1. Spotting is not a free service, but is an integral part of the entire transportation service, and the cost is included in the rate. If the freight rates for the entire service are now inadequate, this evil should be remedied not by setting up separate charges for terminal services, but by proper increases in the rates themselves.

2. Delivery and spotting on industrial or private tracks costs the carrier no more than delivery upon the team tracks, which latter delivery the carrier is obligated to make and for which no additional terminal charge is suggested.

3. The industrial spur is not a mere plant facility, but is of inestimable value to the carrier and to the shipping public at large, including the team-track shipper.

4. Delivery and spotting on industrial tracks does not constitute unjust discrimination against team-track shippers, and the latter class of shippers make no such complaint.

5. Spotting service for larger industries having several tracks and handling a large number of cars containing different kinds of commodities is relatively neither more expensive nor complex than the service rendered the smaller shipper.

6. If additional revenues are needed, it is manifestly unfair to attempt to assess a separate terminal charge on part or all of the carload and heavy or low-grade traffic, if, as claimed by prominent railroad officials such traffic is already paying, as compared with less than coarload and high-grade traffic, its full share, or more, of the transportation expense.

7. Additional revenues derived from spotting charge would accrue principally to the stronger and more prosperous roads.

8. If a spotting charge is allowed, discrimination will result between different classes of shippers using industrial spurs, and the revenues from the spotting charge will be much less than is now anticipated.

9. Protest is against a spotting charge for the initial placing of cars for loading or unloading. Second spotting or strictly intraplant movements should be and now are paid for.

We urge that this protest be brought to the attention of the commission promptly.

Yours, very respectfully,

THE COLUMBUS IRON & STEEL CO.

—

INDEPENDENT GRAIN & LUMBER CO.,
Mason City, Iowa, April 6, 1914.

Hon. C. B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: We wish to file our protest against any charge to be made by the railroads for switching cars to coal bins or to elevators. We do not think this is fair inasmuch as the coal dealer and the elevator owner furnishes the storage for the railroads. If the rates are not adequate for the railroads, they should advance all their rates so that all kinds of commodities are advanced proportionately and not single out the coal and grain dealers and add further charge to that branch of the business for switching charges to coal bins and elevators where the facilities are furnished by the shipper for warehousing and storing of the commodities to be shipped, such as grain or coal. We think the railroads are entitled to fair earnings on their capital, and if the rates are not adequate there should be some advance on their regular rates, but it should be on all kinds of commodities.

Yours, truly,

A. J. ZINGRE, *Secretary.*

—

LARIMORE, N. DAK., *April 6, 1914.*

Hon. C. B. MCGINTY, *Washington, D. C.*

DEAR SIR: I see that the Interstate Commerce Commission has up for consideration that advancement of rates on all classes and commodities of freight in tariffs filed by the carriers throughout the country.

It seems as though the tariffs paid now are excessively high to merchants and consumers in this part of the country; for instance, the rate on coal from Duluth, something like 340 miles, is on soft coal $2.20 per ton, and on hard coal $2.30.

And the proposed plan of charging 7½ cents per ton, or a minimum of $2 per car, for setting cars on a sidetrack, in excess of the freight charged, would be excessive and is a slap at economy and benefits only the strong lines. And I want to protest against the adoption of any plan charging for spotting cars, the service of which is already included in the freight rate which we pay.

Yours, truly,

O. H. PHILLIPS.

—

PLAINVILLE, KANS., *April 7, 1914.*

Hon. G. B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: We are advised there is a move on foot to place a charge of 7½ cents per hundred for spotting a car, and that this charge is over and above the regular rate charged.

Now, we are very much opposed to this charge for the reason it is misleading and does not appear as the true rate; for the reason that the switching or spotting charge adds to the cost, and if there must be an advance in rate, which this really amounts to, we want to see the rate advanced so that the total cost of the transportation will show on the face of the tariff.

In that way, when anyone gets the tariff or rate, they have the total charge, while otherwise they do not.

In other words, the rate we now have includes the switching charges and we do not see why there should be any change, and above all, we want the rate to continue to cover the switching charges, so that the tariff will show the total expense in making a shipment.

We thank you in advance for your consideration of the foregoing and will be pleased to go into the matter further if you so wish.

Yours,

THE PLAINVILLE MILL & ELEVATOR CO.

—

ATCHISON, KANS., *April 8, 1914.*

Hon. G. B. MCGINTY, *Washington, D. C.*

DEAR SIR: We notice the commission has up for consideration the advancement of rates, and that the carriers are making an effort to add an extra charge—the setting of cars on the side track, etc.

We wish to protest against any such charge being made, and wish you would use your influence to head off any such charge or advance as suggested by the carriers.

Thanking you in advance for the above favor,

Yours, truly,

ALEXANDER LUMBER CO.,
EFFINGHAM LUMBER CO.,
By ROBT. PINDER, *Secretary.*

KEARNEY, MO., *April 9, 1914.*

Hon. G. B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: We understand from reliable sources that there is now pending with the Interstate Commerce Commission an investigation whereupon the railroads wish an advancement in rates, also an extra charge of $2 per car for setting or switching a car to an elevator upon a siding of which the railroad has granted a lease upon for elevators, etc. If this be true, it seems to us that it would be an unnatural and uncalled for expense for a grain man to have to pay to get cars moved around to the proper places for unloading and loading purposes. We think we now have an excessive rate into Kansas City from this point. The ruling rate is 6 cents in car lots of wheat, and 11½ to St. Louis. We are 25 miles from Kansas City. We will further say that we protest against any further advancement in freights, if such a thing can be avoided.

Respectfully, yours.

HENDERSON MILLING CO.

—

BELPRE, KANS., *April 9, 1914.*

Hon. G. B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: It is our understanding that the railroads are asking for permission from the Interstate Commerce Commission to make a special charge for spotting cars for elevators, lumber companies, etc.; that this charge is to be 7½ cents per ton, with a minimum of $2 per car.

We feel that such action would be an imposition and an injustice to us, and if the rate for transportation is not high enough to sufficiently reimburse the carriers, we should much prefer that the raise be made in regular freight hauls rather than in switching charges.

Knowing that the commission will give this matter the attention and investigation it merits, we remain,

Yours, very truly,

THE FARMERS GRAIN CO.
D. GIBSON, *President.*
T. E. HARDY, *Secretary.*

—

HADDAM, KANS., *April 10, 1914.*

Hon. G. B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

I hereby wish to put my name down as being against any advance in freight or switching charges. In fact, about one-half of the time when you ask them to spot a car for you it is not done, but it goes on their reports as being spotted, and, of course, in that case they would collect the $2.

Very truly, yours,

RAY KENTON,
Agent Duff Grain Co.

—

MEXICO, MO., *April 10, 1914.*

Hon. G. B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

MY DEAR SIR: Knowing that there is a bill before your honorable body to consider the advancement of rates on all classes of commodities of freight in tariffs filed by the carriers throughout the country. Believing that the present freight rates on all classes of commodities are sufficiently high and adequate and any higher rates would be burdensome to the general public, we wish, therefore, to file with your honorable commission our protest against the adoption of any plan charging for spotting of cars, the service of which is already included in the freight rates which we pay.

Very sincerely and respectfully,

GUTHRIE & SON.

—

WASHINGTON, D. C., *April 11, 1914.*

Hon. JAMES S. HARLAN,
Chairman, and Members of the Interstate
Commerce Commission, Washington, D. C.

GENTLEMEN: Regarding the recent proposal that the railroads should add to the freight rates for spotting cars, or in other words, for terminal service, and without specific knowledge on my part of just what the proposal is, and supposing that the commission did have the subject under consideration, I beg to protest against any action upon the subject so far as the great stock markets and the handling of live stock and live-stock products, feed, and other products at the stock yards and markets for live stock throughout the West are concerned, except it be upon the fullest notice and fullest consideration. I do not mean to imply that the commission would pass upon the matter except after the fullest consideration and opportunity of those interested to be heard, but in some way the impression has gone out that the commission was about to do something in regard to a charge for spotting cars in connection with the eastern rate advance case, and many interests in the West fear that some precedent might be established which would not fit conditions in the West. It has been repeatedly considered by the commission that the through rates embraced the compensation for the terminal service in receiving and delivering traffic. It is peculiarly the case respecting live stock, live-stock products, the output of packing houses, feed, and supplies, with its handling on belt or terminal lines not located upon the trunk line tracks or side tracks as a rule. In a number of cases involving live-stock rates and the rates on live-stock products, the rates have been justified and fixed so as to embrace compensation for the entire service.

In the event the commission takes up the subject, we respectfully ask for the fullest investigation, and the adjustment of the rates in connection with terminal charges.

I will express the opinion that considering the long hauls on the traffic to which I have referred and the established usage, it would be unfortunate to attempt a readjustment on a basis of separating the compensation for terminal service from the rates.

Very respectfully,

S. H. COWAN.

WESTERN GRAIN DEALERS' ASSOCIATION,
Des Moines, Iowa, April 13, 1914.

Mr. G. B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: The Western Grain Dealers' Association, an organization representing country grain elevator operators and shippers in the States of Iowa, South Dakota, northern Nebraska, and southern Minnesota, at its annual convention held at Cedar Rapids, Iowa, April 9 and 10, adopted the following resolution that you are respectfully requested to place on file with the Interstate Commerce Commission, namely:

"Whereas an effort is being made by the railroad companies to obtain authority to make a charge for spotting and switching cars to points on side and industrial tracks for the purpose of loading such cars to be transported on their line of road and for unloading such cars that have been transported on such line of road;

"Whereas grain dealers engaged in the shipping of grain have provided, at their own expense, elevators, warehouses, and coal bins along the several lines of railroad for the purpose of assembling for shipment in car lots, grain and produce to be transported, which is largely for the convenience of the railroad companies and a saving of much expense to them, and which elevators, warehouses, and coal bins the railroad companies insist upon being built of sufficient capacity to handle the business and to provide storage during times of scarcity of cars: Therefore

"*Resolved*, That a charge for placing cars at grain elevators for the purpose of being loaded with grain from such elevator will be unjust and unreasonable; and

"*Resolved*, That the secretary is hereby directed to place this matter before the Interstate Commerce Commission and to urge the commission to deny the railroad companies such or any like request; and

"*Resolved*, That if the Interstate Commerce Commission shall find that the railroads are entitled to further compensation for handling freight, we respectfully request and urge the said commission to add such needed amount to the general rate rather than to permit a specific charge for the special service of placing cars for loading and unloading, because a specific charge against the grain dealer will be unjust and unfair."

GEO. A. WELLS, *Secretary.*

—

SANDUSKY, OHIO, *April 18, 1914.*

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: Our attention has been drawn to the fact that the railways of the country, in order to augment their revenues, have presented to your honorable body a proposition for your consideration and action which, if affirmatively decided, will allow them to make so-called "trap car" and "spotting" charges for services now rendered free of cost to shippers owning and maintaining their own sidings.

The flagrantly discriminating character of this proposal we believe warrants your positive disapproval, and together with thousands of other American manufacturers who have invested large amounts in providing themselves with their own switching facilities, we urge upon you the necessity of denying the railways the right to assess this additional tax upon us as against those who generally depend upon the free public deliveries provided by the railways at their own expense.

We recommend that the above is not the only reason for denying this request of the railways, but that there should be properly considered the matter of the advantages already accrued to them through the establishment and maintenance of these privately owned switches, in that they have distinctly been benefited practically free of cost in the matter of expanded terminals and relief of yard congestion.

If it is really necessary that the railways augment their earnings, let it be through a horizontal increase in freight rates, which, if allowed, would place the burden of such increase equally upon all shippers and thereby square with our ideas of fairness and justice.

We are unable to recommend to your honorable body what percentage in all equity this increase should be, if allowed at all, but shall rest in the sincere belief that through your wisdom this phase of the situation will be fairly decided at an early date.

Very respectfully, yours,

THE BAY VIEW FOUNDRY CO.,
E. L. MARSH, *Secretary-Treasurer.*

—

ST. LOUIS, MO., *March 24, 1914.*

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: With reference to the above subject now before the commission for consideration, we wish to lodge an earnest protest against the authorization by the commission of any such charge or charges for several reasons.

Aside from the fact that it will work a hardship on carload shippers (who furnish carriers with the larger portion of the total tonnage handled) we feel that this would lead ultimately to discriminations as between industries, affecting particularly grain and milling interests, who are forced to furnish their own facilities for the loading and unloading of bulk grain.

The natural result of such action—due to the heavy increase in l. c. l. freight which would inevitably follow—would be to force commercial interests to contend with crowded, congested, and inadequate terminal facilities.

The additional expense to carriers by reason of enlarged terminal and freight-house accommodations which would be necessary to care for the heavily increased volume of tonnage that carriers would be called upon to handle at freight houses and yards, which is now largely handled for them at industrial plants, together with the increases in force and in operating expenses which would naturally follow, would to a large extent destroy the value of a spotting or trap-car charge as a revenue producer.

What decrease might follow in the placing of cars on industrial tracks would be offset by the corresponding increase in the number of carloads placed on carriers' team tracks. It is doubtful whether the cost of the latter service would be appreciably less than the expense of the former.

The railroads prefer and encourage and, with the commission's approval, offer inducements through the medium of lower rates for shippers to deal in carload lots, and switching and spotting cars for such

carload business has always been recognized, and rightly so, as a transportation service paid for out of through rates for line haul. It remains a duty of the railroads, which they should not be permitted to evade, to keep carload shippers on a relatively fair working basis, affording them access to railroad terminals and freight houses with their product.

We therefore desire to go on record with an emphatic protest against this blow at carload shipping industries, which would be far less uniform and far more unjust than the proposed 5 per cent increase, which, aside from its merit (not under discussion here), would at least have the virtue of uniformity and fairness to all, an element which appears to be lacking in the charges proposed.

Respectfully, yours,

THE CORNO MILLS CO.

Dictated by H. H. Kennedy, traffic manager.

—

FREMONT, NEBR., *March 24, 1914.*

Hon. G. B. McGINTY,
Secretary Interstate Commerce Commission, Washington, D. C.

DEAR SIR: We understand that the Interstate Commerce Commission has up for consideration the advancement of rates on all classes and commodities of freight in tariffs filed by the carriers throughout the country.

We also understand that one method by which additional revenue is sought by the carriers is by the introduction of a tariff in which a charge of 7½ cents per ton, with a minimum of $2 per car, would be collected for setting cars on any sidetrack belonging to any coal or lumber company, grain elevators, etc.

We wish to protest with all the vigor possible against this method of increasing the revenue of the carriers. It would overturn all methods now prevailing or that ever have prevailed in the handling of carload freight. We think it unfair and unjust to discriminate against one class of shippers.

If in the judgment of the Interstate Commerce Commission, after hearing all the testimony offered on the part of receivers and shippers of freight throughout the country, it is right and proper to grant an advance in freights to the carriers, the fair way to do it is to grant an advance on all classes and commodities, such advance to be a part of the through rate and not covered under a terminal charge.

The spotting of a car, either for loading or unloading freight, comes within the proper duties of the railroad company and should be covered by their tariff rates. We assume that if the railroad is to make a charge for placing a car for unloading it will also make a charge for placing a car for loading. This means a charge at point of shipment and also at destination amounting in all to 15 cents a ton, and, in addition, it would lead to more or less wrangling and confusion. We believe this method of raising revenue very unwise.

Yours, truly,

CONSOLIDATED FUEL CO.,
By A. P. HOPKINS, *President.*

—

SIOUX CITY, IOWA, *March 24, 1914.*

Hon. G. B. McGINTY,
Secretary Interstate Commerce Commission, Washington, D. C.

DEAR SIR: We are advised that the railroads have prepared tariffs for filing with the Interstate Commerce Commission in which a charge of 7½ cents per ton, with a minimum of $2 a car, has been agreed upon.

We wish to protest against the adoption of any plan charging for the spotting of cars, and would suggest that if the commission are of the belief that the carriers should be granted an advance in rates, after hearing the testimony offered on the part of the receivers and shippers of freight throughout the country, then the fair thing to do is to grant the advance on all classes and commodities.

Yours, very truly,

S. CARLSON & SON,
By C. C. CARLSON.

—

WEIRTON, W. VA., *March 25, 1914.*

Hon. GEORGE B. McGINTY,
Secretary Interstate Commerce Commission, Washington, D. C.

DEAR SIR: We desire to enter our objection to the railroads being granted the privilege of making a charge for "spotting" or switching on private tracks, for which, we understand, they desire to ask a minimum of $2 per car.

To the multitude of smaller manufacturers who are not able to operate their own locomotives and switching crews such a charge would be a very serious burden, and it seems very unjust, in so far as the iron and steel business is concerned.

The rates on articles coming under iron and steel classification have been advanced so that the revenue per car is much greater than it is on the majority of other commodities.

The industry in which we are particularly interested—that is, tin plate—has been very adversely affected through the necessity of competing with foreign manufacturers, and we are now struggling in every way to reduce our operating costs so that we can properly compete with them and at the same time not affect our labor rates. Just at this time if we would have to absorb this charge for "spotting" it would be a very serious matter with ourselves and all other tin-plate manufacturers. Within the last year the rate to the Pacific coast on tin plate has advanced from 66.2 cents to 70 cents, notwithstanding the fact that the Pacific coast is one of the points where we have the most serious competition with foreign producers. If the railroads are entitled to some further remuneration, it would look to us more fair and equitable if some sort of a general advance be made and not simply transfer the burden from the railroads to the smaller industries, who are, by far, less able to carry it.

Feeling sure the matter will have your usual careful consideration, we are,

Very truly, yours,

PHILLIPS SHEET & TIN PLATE CO.,
E. T. WEIR, *President.*

—

NEW BRAUNFELS, TEX., *March 26, 1914.*

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

HONORABLE COMMISSIONERS: Recent newspaper articles pertaining to the latest move of the railroad companies in their endeavor to increase freight revenues have induced us to investigate this matter, and we are certain that our interests are in danger of being unjustly discriminated against. Therefore we ask you to kindly give this letter of protest your consideration.

The change we want to protest against is the proposed new scale of charges to be assessed by railroads for the service of switching and spotting freight cars at industries served by their lines. Should the railroads be permitted to put into effect this scheme, it would simply mean another unjust and discriminatory tax on the manufacturer, and it would be a charge that he could in no manner incorporate into his selling price.

In truth, the railroads are not entitled to even attempt to try and install this unjust tax on the revenue producers on their lines. We manufacturers are often put to a great expense to get spur tracks to our plants. We invariably have to furnish the right of way, do the grading, and, in many instances, are made to buy the ties and rails and pay for the laying of same before we can get the spur track into the plant. Should we then also have to pay the railroads to use the tracks for their convenience in handling the business they so earnestly solicit from us? True, the business most earnestly solicited is generally the competitive business, and heretofore the railroads have in general gracefully waived the switching and spotting charges on competitive business. Our State railroad commission has just recently entered an order which compels the railroads to absorb the switching charges on all cars spotted at industry tracks.

Are we to be penalized because we ship our products in carload lots and because we have made it convenient for the railroads to handle our business by building our plants so there will be no congestion, etc., because of inadequate handling room?

Now, regarding our own little business: During the year of 1913 we shipped a total of 3,175 carloads of crushed stone from our plant. These 3,175 cars represented a tonnage of 106,139 tons, or an average weight of 66,800 pounds per car. The carload minimum in our State is 50,000 pounds, and we are often furnished with cars with just this carrying capacity, and also often furnished with cars that will carry a maximum of 110,000 pounds. If the proposed change were put into effect it would naturally be to our interest to load all of our cars with 110,000 pounds, and in that manner pay a minimum for spotting and switching, as we feel sure this charge as contemplated intends to levy a certain amount per car and not so much per ton or hundred pounds. Would the railroads then furnish us with 110,000-pound capacity cars exclusively on request? Not much; they would be so swamped with orders for that capacity car that we would not see one per week.

Crushed stone is a commodity that sells for a very low price, and a switching and spotting charge of $1.25 at origin and $1.25 per car at destination on a 50,000-pound car would represent an advance in cost to us of 10 cents per ton, which amount is often as much as 20 per cent of the total revenue we get out of the stone. It would be most unreasonable to assess any additional charge on this low-priced commodity.

Another point we want to make is that we do not get but one car per day spotted for crushed stone loading. The balance of the cars we are to load are run out on our spur track above the crushing plant and when we have loaded the spotted car we have to drop the same into the clear below ourselves and pull the next car to the crusher. Now, no doubt, the railroad company would consider itself entitled to a switch and spot charge on every car we ship daily, whereas they really only spotted one car. We often load 20 cars per day; if they were able to put this through they would certainly derive a nice additional revenue at our expense.

Regarding the lime end of our business: During 1913 we shipped a total of 990 carloads of lime and the average carload weight was more than 24,000 pounds per car. The same switching applies for the lime plant as does for the stone crushing. It is all one operation, the lime-loading tracks merely being a continuation of the stone-loading tracks, and we have built our warehouses so that it is unnecessary to spot the cars at all; we can load them anywhere along the line as long as the railroad company will just run a line of empties in on our track.

Lime is also a commodity that brings little revenue per car and therefore a switching and spot charge at the plant will hurt more than a little bit. The switching charge would be at least 2 cents per barrel per car, and as the selling price is generally 50 cents per barrel f. o. b. our plant the proposed switching and spot charges would mean an addition of 4 per cent to our cost, and that is more than our present profit.

In our opinion the injustice in the demands of the railroads is that they want to increase their revenue at the expense of the manufacturer, which is against all fairness, as, with all due respect for the consumer, he is the one who should bear all the expenses, and if the railroads have to have more revenue it is the proper thing to get it by a general increase of earnings or rates and not by the shifting of the burden onto the shoulders of those who produce the business and thus also the revenue for the railroads. We contend that all charges for handling, transportation, use of equipment, etc., should be incorporated into a clear-cut and easily understood rate of freight and that all other service charges, etc., be eliminated. In this manner only will it be possible to put all on an even footing and charge to the consumer all handling from the manufacturing plant to his desired point of delivery.

We trust your honorable body will give this due consideration, and we shall be pleased to hear from you.

Very respectfully,

DITTLINGER LIME CO.,
H. DITTLINGER, *President.*

—

DES MOINES, IOWA, *March 26, 1914.*

Hon. G. B. McGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: Understanding that a request has been filed by the railroad companies with your commission for permission to make a minimum charge of $2 per car for setting same on any sidetrack belonging to any coal, lumber, or grain company, we desire to file our protest against such a procedure.

It seems to us an injustice that shippers should be compelled to pay for the setting of the cars, as we think that any rates that are made should cover such service, and we believe it would be better for the business interests generally if rates are made to cover all ordinary services rendered by the carriers. If the present rates are inadequate, we believe they should be raised, but we believe whatever they may be they should cover all ordinary services.

Yours, truly,

GREEN BAY LUMBER CO.,
By K. E. JEWETT, *Secretary.*

CARRINGTON, N. DAK., *March 27, 1914.*

Hon. G. B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.:

If, after hearing all the testimony, the Interstate Commerce Commission are of the opinion that the carriers are entitled to an advance on all commodities, it would seem that the only fair way would be to make it in an advance in freight rates. To collect this through a system of charges for spotting cars would mean a hardship to those doing business which makes the spotting of cars necessary, while all others would escape.

Yours, truly, T. H. COUSINS.

—

STEARNS CO.,
Fruitdale, S. Dak., March 27, 1914.

Mr. G. B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: We are informed that the railway companies have asked for an advance in the freight rates. If, after hearing all the evidence in this matter, you find an advance should be granted in the rates, we think it only fair and equitable that this advance should be on all classes of commodities. We wish to state that we are opposed to the adoption of any plan whereby the railroad companies will be allowed to charge for spotting of cars, the service of which is already included in the freight rate which we pay.

Yours, very truly, MELVIN B. STEARNS,
Secretary.

—

TRENTON, N. J., *March 27, 1914.*

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: We wish to go on record as being strongly opposed to the method proposed by your honorable commission to increase the revenue of railroad companies by having a charge made for car service accorded to owners of private sidings.

We ask you to please remember that these private sidings have been paid for and are being maintained at the expense of the owners and are not railroad property.

We ask you to please remember that the use of these private switches or tracks mean just as much economy to the railroad companies as to the owners of the tracks. The placing of cars on these private sidings relieves the sidetracks of the railroad companies both for storage of cars and shipping and delivering of freight contents. We venture to assert that the average cost to the railroad company of the loading and unloading of a carload of freight at the regular freight depot exceeds the expense to the railroad company of placing a carload of similar freight on a private siding.

Were the use of private sidings discontinued it would make necessary a great increase in the freight-handling facilities of all the railroad companies at their various stations. It would also mean that more time would be required in the loading and unloading of freight.

We respectfully ask, Why should the shipper who has gone to the expense of providing and maintaining a private siding be taxed for the benefit of either the railroad company or the receiver or shipper of freight using the terminal facilities of the railroad company? We respectfully suggest that nothing more than an ordinary logical sense of right and justice is required to answer our question in the affirmative. If the railroad companies are entitled to or deserving of some provision being made to insure increased revenue from the handling of freight, then we respectfully submit that a fair and equitable manner of increasing such revenue would be by a uniform increase of freight rates applicable to all shippers and receivers of freight alike.

We respectfully submit the foregoing for your consideration.

Very truly, yours,

THE ACME RUBBER MANUFACTURING CO.,
J. A. LAMBERT,
Treasurer and General Manager.

—

HOCKING VALLEY PRODUCTS CO.,
Columbus, Ohio, March 28, 1914.

Mr. GEORGE B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: With reference to the proposed 5 per cent advance in freight rates or charge for spotting cars on private tracks, we beg to state that in the operation of 20 small coal mines we are now losing money, and are dependent upon the operations of our face-brick plant at Greendale, Ohio, to make good the losses on coal; but while our present rates on both brick and coal are exceedingly high, of the two evils we would much prefer that there should be a horizontal advance of 5 per cent in rates than to be compelled to pay for spotting cars, which would be a double charge, since charge for this service at both ends is included in the freight.

Charge for spotting cars would work a hardship on the smaller factories or shippers, since they could not afford to maintain engine and crew, while larger concerns might afford such expense, and it would probably eventually put the smaller concerns out of business.

Therefore we are unalterably opposed to charges for spotting cars; but, if deemed necessary, we favor 5 per cent horizontal advance in freight rates.

Yours, very truly,

D. E. REAGAN, *President.*

—

MEDFORD, N. J., *March 28, 1914.*

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: We understand there is a proposition before you asking that the railroads be allowed to charge a drilling or spotting charge on private sidings.

This proposition we strongly oppose as being impartial to consignors. The argument, we understand, now is that the private siding owner has the advantage over the fellow who has to haul his goods from the public siding. This is his advantage, because he bought and paid for the right and is paying for the right every year in taxes and upkeeps, etc., while the other fellow has to pay for it in the expense of haulage. They are on equal footings now, and any other arrangements would upset this.

We can not urge you too strongly in this matter. If the railroads really need more money, give it to them on every freight and ticket charge. Let us all pay the bill. Do not handicap a few for the sake of evading an issue.

Trusting you to see this matter fairly, we are,

Yours, truly,

JOS. H. HAINES & SONS.

—

IOWA CITY, IOWA, *March 28, 1914.*

Hon. G. B. MCGINTY,
Secretary Interstate Commerce Commission, Washington, D. C.

DEAR SIR: We understand that the railroads have a proposition before you looking to the establishment of a tariff providing for 7½ cents per ton charge on all cars set on private sidetracks.

As we understand this matter, if such a tariff was put in force it would place the merchant who maintains a place of business at the mercy of the scalper who delivers his merchandise direct from the cars. A moment's consideration will convince you, I am very sure, of the unfairness of such a proposition.

We desire to enter an emphatic protest against such an arrangement.

If in your judgment the railroads are entitled to an advance in rates, would it not be fairer to levy it on all commodities in like proportion and not inflict a penalty on the man who maintains a place of business, and who as a matter of convenience uses a sidetrack?

We trust that the proposition will be turned down emphatically.

Yours, truly,

R. L. DUNLAP LUMBER CO.,
By DUNLAP.

—

MINNEAPOLIS, MINN., *March 30, 1914.*

Hon. G. B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: We simply wish to state that we should consider it very unjust and by no means within reason should any action be taken whereby a railroad company would be permitted to make a charge for spotting of cars on a sidetrack after they had been paid the regular rate of freight for the service of bringing such cars to point of destination, which service has always been understood and should be understood to cover the placing of the car where it could be unloaded.

Yours, very truly,

H. W. ROSS LUMBER CO.

—

MORRIS, MINN., *March 30, 1914.*

Hon. G. B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: As I am aware that the Interstate Commerce Commission has up for consideration the advancement of rates on all classes and commodities of freight in tariffs filed by the carriers throughout the country, I am also aware that the carriers have prepared tariffs for filing with the commission in which a charge is made of 7½ cents per ton or a minimum of $2 per car for setting loaded cars for any coal or lumber company and grain elevators, etc., on any sidetrack. Now, I protest against the adoption of any plan charging for spotting of cars to any coal or lumber company, grain elevators, etc.

Yours, truly,

H. VAN KEMPEN.

—

CARRINGTON, N. DAK., *March 30, 1914.*

Hon. G. B. MCGINTY,
Washington, D. C.

DEAR SIR: We as shippers and receivers of commodities do protest against the adoption of any plan charging for spotting cars, the service of which is already included in the freight rate which we pay. If the Interstate Commerce Commission is of the belief that an advance in rates should be granted, then the only fair thing to do is to grant the advance on all classes and commodities.

Yours, very truly,

HAMMER-HALVORSON-BEIER ELAVATOR CO.,
Per FRED BEIER, *Secretary-Treasurer.*

—

DUBUQUE, IOWA, *March 30, 1914.*

Hon. G. B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: It is our understanding that the Interstate Commerce Commission is considering recommending to the railroad companies that they asses the consignees to cover a switching charge for placing cars on sidetracks as required by the consignee for his unloading purposes; the suggested switching charge for this service to be, as we understand it, on a basis of 7½ cents per ton with a $2 per car minimum.

We desire to enter our protest against such a charge, as we believe that such a charge would work a very considerable hardship on the merchants and consumers in the small towns and rural communities, and also for the reason that we believe that a much fairer way for the railroad companies to receive renumeration for such service, if it is found that it is necessary that they should have renumeration for such service, that proper allowance should be made to cover such a charge in the regular published tariff rate in place of being collected in the way of a switching charge.

Yours, truly,

SPAHN & ROSE LUMBER CO.

—

NORTHWESTERN ELEVATOR CO.,
Minneapolis, Minn., March 30, 1914.

Hon. G. B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: The matter now before the Interstate Commerce Commission in regard to the advance of freight by the railroads and the question that has been injected into it of adding an additional charge if the advance in freight rates is not granted, for spotting cars destined to a terminal market at a rate of 7½ cents per ton, with a minimum charge of $2 per car, would seem to me to establish a charge absolutely contrary to the spirit of rate making and to inaugurate an era of confusion throughout the country. It would seem to me, and I presume that would be equally true of 95 per cent of people who have anything to do with traffic, either as a shipper or receiver, that the

original rate should be enough to take care of the placing so that commodities in car lots should be placed at point of destination at the industry to unload without extra charge, except the rate from shipping point to destination, as much so as that empty cars should be spotted at an industry by the road upon which that industry is located on the basis of the rate charged from that point to point of destination. I would certainly wish to place myself on record, not as being opposed to an increase in the freight rates, if that is found to be necessary, but absolutely opposed to tacking on any supplementary charge such as that contemplated.

Yours, truly,

C. A. MAGNUSON, *President.*

—

COLUMBIA, PA., *March 30, 1914.*

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: We understand that you have under consideration the question of authorizing the railroad companies to make charge for removing or placing cars on private tracks, and we sincerely trust that you will not put this into effect, as it is certainly unfair to manufacturers and others who happen to have private tracks. This may be fairly regarded as a tax and not as a legitimate traffic charge. We think that it would be far better to grant the railroads in the eastern tariff classification territory the advance in freight rates; this would treat everybody alike.

Very sincerely,

COLUMBIA MANUFACTURING CO.,
J. H. OSTERLEY, *President.*

—

NEW YORK, *March 30, 1914.*

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: We desire to place ourselves on record as being radically opposed to any ruling of the commission favoring a car "spotting" or placing charge of any kind or amount.

If the railroads need an increase of revenue and the commission so decides, it should distribute this burden proportionately on all shippers and receivers of freight instead of putting it on shippers of industries owning private tracks.

This appears to be class legislation, and is so manifestly discriminatory in favor of those doing business on team tracks and railroad piers that we are unalterably opposed to it, and we feel that every owner of a private track, large or small, will take the same position.

The commission must take into consideration the fact that private sidings are put in, in the majority of instances, reluctantly—as they are a great expense, and the shipper himself must personally pay for the same—for the reason that the railroad sidings are not of sufficient length and capacity to handle the freight which comes in and out of the town, so if we were to all do away with our sidings on account of the tax which it has been suggested that you propose to place on them, then the railroad of necessity would have to have miles of tracks to take care of the business which would have to be erected at their own expense. Our siding at our factory in Camden was one of these.

We suffered delays and inconveniences for some years through the railroad being unable to handle our small business on their siding, and then as a last recourse—in order to hold our trade at all—we were compelled to put in our own siding, at our own expense, and there is also a yearly maintenance cost on this.

We are in favor of a reasonable advance in freight rates. We will go so far as to state that we believe the railroads are entitled to it, and it is a very serious matter to the country at large not to give it to them, but we are not in favor of this class legislation such as we understand you propose as an alternative for the relief sought by the railroads by an advance of general freight rates.

Respectfully,

WILCKES MARTIN WILCKES CO.,
L. MARTIN, *Vice President.*

—

MINNEAPOLIS, MINN., *March 31, 1914.*

Hon. G. B. MCGINTY,
Secretary Interstate Commerce Commission, Washington, D. C.

DEAR SIR: We understand that there is now before your commission for consideration the advancement of freight rates on all classes and commodities. If your commission is of the opinion that the carriers are entitled to a raise in freight rates, then the only fair and right thing to do is to allow a reasonable advance.

We are informed that included in the tariffs before you is a charge of 7½ cents per 100 pounds, or a minimum charge of $2 per car for placing cars on any sidetrack belonging to any coal or lumber company, grain elevator, etc. We feel that to allow the carriers to assess such a charge would be unjust and unfair, and we are taking this opportunity of placing ourselves on record as being opposed to this.

Yours, respectfully,

WELLES-THOMPSON CO.,
By H. HYNDMAN.

—

ALBERT LEA, MINN., *March 31, 1914.*

Hon. G. B. MCGINTY,
Secretary Interstate Commerce Commission, Washington, D. C.

DEAR SIR: We are informed that your commission has up for consideration the advancement of rates on shipments of coal; also that railroads are asking for permission to make a charge of about $2 per car for spotting cars of coal and coke at destination. We, of course, understand that railroads should receive adequate rates to handle the traffic, but we do not believe that it is fair to allow railroad companies to charge for spotting cars of coal or coke at destination, nor do we believe that it would be fair to allow the railroad companies to advance the rates on coal alone. If it can be shown that freight rates are not adequate, then we feel that all the rates ought to be advanced rather than coal alone.

Yours, truly,

SPELTZ GRAIN & COAL CO.,
THEODORE SPELTZ, *President.*

—

PHILADELPHIA, *March 31, 1914.*

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: As a dealer in coal, who unloads over 5,000 cars per year, we wish to be placed on record as being radically opposed to any ruling of the commission favoring a car spotting or placing charge of any kind or any amount. It would simply be class legislation, giving the teamster who unloads off railroad company's siding the advantage over dealers like myself, who have our own sidings. We would much prefer an advance in freight rates. It would be more equitable.

Yours, very truly,

RICHARD MCALLISTER.

—

DANBURY, IOWA, *April 3, 1914.*

Hon. G. B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: We understand that the Interstate Commerce Commission has up for consideration the advancement of freight rates on all classes and commodities of freight in tariffs filed by the carriers throughout the country with the commission. "Are the present revenues of the carriers adequate? If not, how may they be supplemented?" We understand the carriers have prepared tariffs for filing with the commission in which a charge of 7½ cents per ton, with a minimum of $2 per car, has been agreed upon. This, of course, would mean that the minimum charge of $2 per car would be collected for setting cars on any sidetrack belonging to any coal or lumber company, even though the track did not belong to said company. This extra amount has heretofore been regarded as part of the rate, and if made effective it means a practical slap at economy and benefits only the strong lines.

We therefore ask if the Interstate Commerce Commission is of the belief that the carriers should be granted an advance in rates after hearing all the testimony offered on the part of the receivers and shippers of freight throughout the country. Then, we believe the only fair thing to do is to grant the advance on all classes of commodities, and we therefore protest against the adoption of any plan charging for spotting cars. The service is already included in the freight rate which we pay, and we hope that this will meet with your approval.

Yours, very truly,

MAPLE VALLEY LUMBER CO.,
P. C. KEITGES, *Manager and Secretary.*

—

COLUMBUS, OHIO, *April 3, 1914.*

The INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: As one of the largest shippers and receivers of freight in the city of Columbus, we beg leave to submit our views in connection with the question of "increase in freight rates or special charges" that is now before you for consideration.

We particularly refer to and enter a vigorous protest against the alternative proposition presented, that the public carriers be permitted to assess extra charges for what they term "special service," such as spotting cars, trap service, etc.

This, in our opinion, would be the most unreasonable, unsatisfactory, and unjust regulation that could possibly be established. It would be the cause of constant dissension and confliction between the shipper and receiver of freight, as the policy of paying an established rate has been so long in vogue that the addition of "special charges" over and above the tariff rate would create difficulty and confusion that would be almost impossible to overcome.

It would also react unfavorably on the consuming public, as applied to the manufacture of food produces, as there would be no permanent or consistent basis upon which to figure an established basis of cost, and which is possible under the plan of a fixed rate per 100 pounds, in the shipment of raw materials as well as the finished product.

If it is proven to the satisfaction of your honorable body that the public carriers are really entitled to an increase of revenue over and above what the present freight rates provide, we firmly believe that the plan of permitting a horizontal advance in freight charges would be far more satisfactory all around and appeal more favorably to the general sentiment of the public at large.

Respectfully submitted.

THE CAPITAL CITY DAIRY CO.,
M. LEO CORBETT, *Secretary.*

—

CHAMBER OF COMMERCE OF THE STATE OF NEW YORK,
New York, February 28, 1914.

Mr. GEORGE B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: Your letter of February 17, addressed to the Chamber of Commerce of the State of New York, and which refers to the fact that this chamber is advocating an advance in freight rates, makes a number of inquiries, has been received and carefully considered.

You ask how many business concerns are represented in the chamber. It is practically impossible for us to give a reply to this question, for the reason that membership in this chamber is by individuals only, but the character of its membership is such that a large number of the great manufacturing and industrial companies are represented in the membership by their presidents or other officials.

You ask how many of the business concerns represented in the chamber are connected with one or more railroads by a private spur or siding. You are, of course, aware that there is but one railroad entering directly Manhattan Island, namely, the New York Central; and therefore many of the large manufacturing concerns located in this city have no direct rail connection, although much of the freight is handled by car floats from New York to the various railroad terminals in New Jersey.

Although New York City is the largest manufacturing city in the country, it is distinguished from most other localities by the fact that its manufacturing concerns are widely diversified among a large number of different industries, and there is no one or two or three great preponderating manufactures. The largest manufacturing industry in New York, as you know, is that of men's and women's clothing.

Unquestionably the large manufacturing and industrial concerns who are represented in our membership, but whose manufacturing establishments are in other parts of the country, are connected with railroads by private spur or siding, but information as to these spurs and sidings you are undoubtedly obtaining from other sources than this chamber.

Yours, very truly,

SERENO S. PRATT, *Secretary.*

SANDWICH, ILL., *February 24, 1914.*

Hon. CHARLES A. PROUTY,
Chairman Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: It has come to our notice that the railroads of the country are petitioning your honorable body for a ruling under which they will be enabled to make a minimum charge of $2 per car for "spotting" cars and similar service, and that if your commission grants their prayer this charge will become a regular part of the tariff schedule.

If we are correctly informed, we wish to file an emphatic protest against action of this kind. We believe the granting of this request would impose a burden on shippers and increase revenues of the roads to an amount greater than the 5 per cent general freight rate advance which the railroads have been requesting, but instead of the burden falling upon all people it would, in our opinion, fall directly upon a comparatively few, namely, those large shippers whose business compels the use of switch tracks. These switch tracks are, as a rule, owned and maintained by the shipper, and in many cases, perhaps the majority; it does not cost the railroad much, if anything, more to locate or "spot" a car either for loading or unloading on the switch track of the shipper than it would to locate that car on a sidetrack owned and maintained by the railroad; and, further, it would be absolutely impossible for the railroads to handle the present volume of traffic without the use of the private switch tracks, which cost them nothing to install and maintain.

We are not opposed to a reasonable general increase in freight rates if the railroads can show that operating conditions justify them in making a demand for such increase, but we do wish to emphatically protest against an indirect advance which will fall directly upon the shoulders of a comparatively few shippers, and which must, in a large measure, be absorbed by these shippers and can not be added to the selling prices of their product.

We venture the hope that your honorable body will decide against this demand on the part of the railways.

Very respectfully, yours,

SANDWICH MANUFACTURING CO.,
E. C. MOSHER, *Assistant Secretary.*

—

CINCINNATI, *March 20, 1914.*

The INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: Referring to the additional charge for spotting cars on individual switches, which we note is to be decided by your honorable body March 24 to 31, we respectfully petition that no decision be reached without full and ample opportunity for consideration.

While not opposed to the general policy of giving the railroads additional revenue, we believe that charge for this service will result in penalizing manufacturers who have spent vast sums of money to improve their transportation facilities. Any increase to the railroad should come from all users of transportation in proportion to their use of that service, and not especially from those who by their own investments have contributed to reduce the costs to the railroad for the service rendered, as is the case where manufacturers load and unload their own cars.

Trusting therefore that full opportunity will be granted by your body to the shipping interests to present facts in support of the above, we remain,

Yours, very truly,

THE TRIUMPH ELECTRIC CO.,
J. C. HOBART, *President.*

—

BEAVER FALLS, PA., *March 21, 1914.*

Mr. GEORGE B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: We have your favor of the 16th instant, and thank you for your prompt reply. We note the commission has not defined what is meant by the term "spotting cars," and we are therefore somewhat in the dark as to this matter. If the term is meant to cover original placement of cars to be loaded or unloaded on private sidings or spur tracks, at loading or unloading platforms, tipples, bins, elevators, etc., we, the Manufacturers' Association of Beaver County by its transportation committee, are unalterably opposed to a spotting charge by carriers for such service. This service has always been included in the rate of freight paid and should be continued as such. If we for our own convenience, and for the convenience of the carriers as well, construct and maintain private sidings or spur tracks into our plants, we should not be penalized to the extent of a spotting charge over and above the regular rate of freight.

If the business now handled on private sidings or spur tracks be transferred to railroad platforms or team tracks, the carriers could not handle it with present facilities without serious delays and losses to the business interests of your petitioners.

If in the opinion of your honorable commission it is found necessary and reasonable to grant carriers in official classification territory additional revenue, we pray that this additional revenue be secured by means of a slight advance in freight rates where the burden will be more reasonably proportioned, rather than by the assessment of a "spotting charge" where it will fall on a few.

Very respectfully,

MANUFACTURERS' ASSOCIATION OF BEAVER COUNTY,
WM. B. TODD, *Secretary.*

—

CHICOPEE FALLS, MASS., *March 21, 1914.*

THE INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: With reference to the hearing now being held in regard to the "spotting" of cars on private or industrial sidetracks, the writer, in the interest of his company, desires to submit the following objections to any ruling that will impose a charge for such service that has not already been the practice of the roads in this territory to impose.

We are located exclusively on the Boston & Maine Railroad, on what is known as a branch or spur track, and we have two sidetracks, one of which is exclusively located on Boston & Maine right of way and the other about one-half on Boston & Maine right of way and the other half on our own property, the latter track being one to accommodate coal cars, which are placed on a trestle over a coal pocket built by ourselves on our own property. This coal pocket accommodates two cars at a time. The balance of this track is used for unloading carloads or ferry cars. The first track referred to, which is about 700 feet long, is used for unloading incoming carloads and ferry cars and loading outgoing carloads and ferry cars. We positively, with a very few exceptions, have no cars "spotted"; i. e., if we are to understand that "spotting" a car means the placing of the car in a certain place under certain conditions. The cars on both our sidetracks are placed, regardless of position, as near as possible as they arrive in the train line before broken up in the yard. They are, you might say, "kicked in to us," and they are taken out under identically the same circumstances.

The full carloads are placed on one of the two sidings, according to our instructions. The ferry cars are at least 70 per cent loaded by the carrier for their own convenience, and are made up at junction points of the Boston & Maine or other roads before reaching Chicopee Falls; i. e., the above applies to the incoming cars. Outgoing cars are loaded by ourselves, either in full carload or any quantities in excess of 6,000 pounds, under the tariffs provided by the Boston & Maine, and are so loaded as to run to a junction or transfer point on the Boston & Maine or beyond there to break bulk for distribution. This latter service is for the convenience of the common carrier, and is done with their request, knowledge, and consent.

We handle from 10 to 20 cars per day, which, with the exception of full carloads and our coal cars, are all loaded for the convenience of the common carrier. If there is any convenience or advantage to our company on incoming so-called "ferry or trap cars" it is only that we receive the freight earlier than we would have if we had to take same from the public warehouse. If there is any advantage on loading out ferry cars which reverts to this company it is the additional time gained in reaching a logical transfer point for final distribution rather than having it rehandled two or three times. Each of the above is of particular convenience and advantage to the common carrier in that it permits of an opportunity to "scientifically" handle their inward and outward bound business at the least possible cost of labor and loss in damage, and the quickest possible distribution of their incoming and outgoing tonnage.

The terminal facilities of Chicopee Falls are such as they have been here without any change, with possibly a few exceptions, for something like 20 years. Any changes which have been made, which has resulted in more yard or terminal facilities, have been made at the expense of the shippers and receivers of freight, with the possible exception of about 400 feet of the sidetrack which parallels our property, and which is exclusively on the Boston & Maine right of way. Of this track we paid the expense of grading, tieing, and railing about 600 feet, the Boston & Maine paying the balance and using said 400 feet for storage and other purposes exclusively their own. They have positively not paid 1 penny toward the increase in yard facilities that were not for their own advantage and convenience, that the writer knows of, within a period of 20 years in Chicopee Falls.

The amount of time used daily in switching our tracks does not, except in storm periods, approximate daily more than one hour.

There is one other set of private tracks in Chicopee Falls where the time taken would average no more. The balance of the time taken for switching in these yards is on public tracks and for the public warehouse deliveries and outward movement of loaded freight.

All ferry cars which we load ourselves for placement on our tracks are charged for at the rate of $2 per car, and we pay for this service anywhere from $10 to $26 and $30 a week. Also any cars which we load out which do not have over 6,000 pounds are charged for at the rate of $2 per car, and we pay same. So far as we know we do not get something for nothing on the Boston & Maine; in fact we, in our opinion, pay for a great many things that should be gratuitous.

If there is a charge put on each and every car placed upon our tracks by the Boston & Maine (we have no industrial service of our own), then we shall refuse to receive upon our tracks anything but carload freight and will insist upon the ferry cars being unloaded at the depot or freight house.

For your information, before this rule is placed in effect to apply in Chicopee Falls, we would advise that very careful inspection be made of this point, and you can soon realize that refusal of the shippers to accept cars on their private tracks and pay any charge whatever for same and the demand of shippers that the same be placed at the freight house and unloaded by the carrier would within 48 hours block this yard so that movement in and out under any "scientific" conditions would be impossible.

As the writer understands it, the Fisk Rubber Co. has paid for every improvement along its property; has paid for all renewals and repairs, and must continue so to do; pays for all unloading and loading on its platform, and must continue so to do; pays for all insurance against fire, theft, and pilferage, and must continue so to do; pays for all liability insurance against accident on these tracks, and must continue so to do; in fact, pays for everything but the air we breathe.

We release all loads, with few exceptions, within a period of 24 hours as empties, or all empties as loads within the same period, and generally about 40 per cent of the loads in to-day are empty and go out as loads again to-morrow, making the loading and unloading of a single car in each and every instance within a period of 24 hours; and we have many of these cars every day. In other words, where it is expected that a shipper will use 48 hours to unload a car and 48 hours more to load it, we are performing both operations within a period of 24 hours, which, if you will note carefully, is a very heavy per diem saving on the part of the Boston & Maine when it is considered that we are loading and unloading from 10 to 20 cars per day.

We do not hesitate to state that if the use of the tracks paralleling our property were discontinued and the incoming and outgoing business unloaded and loaded on the public tracks and at the freight house that the present terminal facilities of the Boston & Maine would fail completely to meet the demands. We have, all told, approximately 1,000 feet of track paralleling our property which is devoted exclusively to incoming and outgoing tonnage of the Fisk Rubber Co. alone; and approximately we ship and receive during the year more tonnage than all the rest of the manufacturing concerns in Chicopee Falls combined, with the exception of the Chicopee Manufacturing Co., a large cotton concern here, and our tonnage compared to theirs shows the Fisk Rubber Co.'s tonnage a great deal in excess of theirs. They have private sidetracks, and should they take the same position we intend to take, if this rule is established, you can readily see what position the Boston & Maine will be placed in.

Finally, to apply Mr. Brandeis's "scientific" railroading propositions to this situation means that if this charge is to be placed in effect it will violate all contracts which were written, and because of which the present tracks paralleling our property were installed and for which we paid. Therefore, if this violation is forced upon the Boston & Maine, adequate compensation for the loss must be forthcoming to the Fisk Rubber Co. In addition to this the Boston & Maine must either refund to us the amount of moneys expended for installa-

tion and maintenance of these tracks, take a lease from us for the use of the iren, or pay us for the amount of labor involved in loading and unloading all less-than-carload freight. There are three options, any one of which means an enormous expense to the Boston & Maine if applied to all industrial tracks.

We have studied carefully through every means at our command the transportation problem, especially that applying to the placing of cars on private sidetracks for unloading and loading and the switching of them from such tracks as empties or for forwarding, and we have come to the conclusion that you can not show any authority for the position being argued that the rate does not include placement and delivery at the shipper's or consignee's order, and we have also come to the conclusion that your commission having already ruled repeatedly that the above is the fact can not now consistently reverse itself. If your commission sees fit to reverse itself in this case, then there is absolutely no value whatever in any ruling that the commission has made, as it would simply be a matter of a political change in order to bring about an entirely different interpretation of all tariffs; i. e., it would mean simply that the present Democratic Congress could pass a bill annulling the present interstate commerce act and abolish the present Interstate Commerce Commission and immediately repass the same interstate commerce act and have an entirely new set of commissioners appointed with the understanding that the rulings of the new commission would correspond to Democratic dictation, and should the people at the next election choose a Republican or Progressive Congress, the same thing could be done over again. The rulings of the commission should always be such as a shipper or consignee or the general public could feel would stand without question until national statutes constitutionally declared make them void in law and in fact.

Finally, we wish to state that if your commission finds that the present revenue of the carriers asking for the 5 per cent increase is not sufficient to meet their requirements for the upkeeping of their property and dividends on their legitimate stock, then we feel that you should grant the 5 per cent increase without any further argument on the question and not upset the practice of the carriers for something like 40 years. In other words, there are those located on the Boston & Maine tracks who have received these privileges free of charge for a period exceeding 21 years, and have thereby become in possession of a prescriptive right to these privileges indefinitely; and under the law the carrier, not being able to discriminate in favor of one shipper or consignee as against another, is bound under the common law to continue its past methods except wherein such discontinuance will not create an unnecessary hardship or expense in contravention of the established principles which as a quasi public corporation it must render. We, therefore, suggest that any change such as suggested by Mr. Brandeis in regard to the "spotting" and "placing" of cars on private tracks is not "scientific railroading," nor is it cooperative, but will, on the contrary, bring about such conditions as will render the common carriers unable to meet the business requirements of the country. Our argument is intended only to cover such services as are rendered by the carrier free of charge without any spirit of favoritism, discrimination, or thought of gain, and free from any spirit of actual or implied illegal rebate.

Respectfully submitted.

THE FISK RUBBER CO.,
F. R. LYMAN, *Traffic Manager.*

—

YORK, PA., *March 31, 1914.*

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: We notice your commission suggested that a charge of $2 shall be made by the railroad companies for placing all cars on sidings. This will be a decided hardship upon us as we receive every day approximately five cars of freight, and we ship every day from two to three cars of material. Should this ruling go into effect our only hope would be to dispose of our property and move our business nearer the freight station, which would enable us to dray our products, as the present margin of profit in our line of businsss would be seriously affected by this ruling. On the other hand, we would not seriously object to the 5 per cent increase in the freight rates as this would not be as much of a hardship to us as the $2 "spotting" charge.

We might say, as a matter of interest to you, we have been in business over 100 years, and 60 years ago we ran 20 freight cars of our own between this point to New York and elsewhere; but owing to the laws on private cars, etc., we have junked our cars and discontinued shipping in this way. We sincerely hope that after reflection you will not impose this tax upon us. We might also say, our hardest competition at the present time is the commission man who rents a $15 office and has no expenses, except personal expenses, and who sells carloads and less-than-carloads of material direct from the factory to the merchant, or manufacturer, or consumer. If our cost of goods is going to be increased by a charge of $2 per carload this will put us in an even worse position than we are to-day.

Thanking you for your kind attention, we are,
Yours, very truly,

P. A. & S. SMALL CO.,
Per GEORGE SMALL.

—

PORTLAND CHAMBER OF COMMERCE,
Portland, Oreg., March 20, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: The opinion of the commission in docket 4181, the Industrial Railways case, and the published reports of the hearings now being held with respect to car spotting and other alleged free services by carriers, have been carefully read and studied.

Existing rates for transportation services include spotting of cars, etc., and should not be increased by adding a separate charge therefor.

Present practices of carriers relieve the congestion on railroad terminals and facilitate car movement, car efficiency is increased, and railroad facilities at the expense of the individual and to the relief of the carrier are provided. To separate the terminal and transportation services as proposed would be revolutionary, discriminatory, and confiscatory.

If the commission decides after considering the evidence before it that carriers are entitled to increased rates, that increase should be so made as not to place the burden on any particular class of traffic.

We realize that if the proposed plan, as a principle, is adopted in official classification territory it will be immediately adopted in all other territories.

We believe, therefore, that the settlement of this important question should not be unduly hastened, but that hearings should be held in various cities throughout the country so that shippers and others interested may fully present their views to the committee.

Yours, truly,

J. H. LOTHROP, *Manager.*

—

CEDAR RAPIDS, IOWA, *March 23, 1914.*

Hon. G. B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: As the Interstate Commerce Commission has up for consideration of advancement of rates on all classes of commodities, and as we are interested in retail coal business, we take the liberty to protest against the adoption of any advance in rates and charging for spotting of cars. It would harm the smaller retailers and may put some out of business.

Yours, very truly,

RIVERSIDE FUEL CO. (INC.),
JOHN TLUSTY, *President.*

—

BEAVER FALLS, PA., *March 23, 1914.*

Mr. GEORGE B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: If we understand the proposed charge for "spotting cars" it is to make a charge for picking up the car at the switch point and placing at the loading or unloading point, and a similar charge for picking up at loading point and carrying to switch point. We understand the amount suggested for this charge to be about $2 per car.

If our conception of this proposed ruling is correct, we wish to place ourselves on record as not favoring the "spotting-car" charge.

Our association represents a number of small industries who would have to absorb this as an additional cost charge, which could not be recovered through an advance in our prices. We estimate this advance on our crude materials would be about 2 per cent on the average cost of the material, and on the finished product of over 2 per cent on the average selling price, which, together, would add at least 3 per cent to our average costs.

The "spotting-car" charge at the loading point of our crude materials would without doubt be added to the price of such materials, which would make an additional charge to our costs, and has not been included in the above estimate of increased costs.

The small margin of profit in our industry can not stand this additional expense.

We do not include in these estimates the "spotting-car" charge at delivery points of our product, which would be an additional expense when absorbed by the shipper, when making f. o. b. delivery.

If, in the opinion of your honorable commission, it is found necessary and reasonable to grant the carriers additional revenue, we urge that this be secured by a slight advance in freight rates, where the burden will be distributed more reasonably than as an assessment for "spotting-car" charge, which would mostly fall upon the smaller industries, who depend upon the carrier to place their cars.

Respectfully,

TILE MANUFACTURERS' CREDIT ASSOCIATION,
F. W. WALKER, *Secretary.*

—

LEON, IOWA, *March 23, 1914.*

Hon. G. B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: We wish to register our protest against the order the railroad companies are asking your commission to make, relative the spotting of cars at 7½ cents per ton, or a minimum rate of $2 for setting a car on a switch, so it can be handled by the dealer. It seems to us it would be very unfair to authorize a rate like this, for the reason that only the shippers in carload lots would be helping the revenue of the railroad company.

If the commission finds that the revenue from freight is not enough to pay a proper per cent on the money invested, the only fair and honest way to increase the revenue would be to raise the rate on everything in proportion, and not put the whole burden on one class of shippers. However, we believe that more efficiency on the part of the common carriers would have the effect of increasing their revenue.

Yours, truly,

BIDDISON COAL & GRAIN CO.,
C. G. BIDDISON.

—

WAUBAY, S. DAK., *March 23, 1914.*

Hon. G. B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

We do not believe that the carriers should be granted the adoption of any plan charging for spotting cars at elevators and coal dealers, on sidetracks belonging to them, as the service is now included in the freight which we have to pay; furthermore, we do not see where it would benefit anyone but the strong lines. If the Interstate Commerce Commission believes that the carriers should be granted this advance in freight, then the only fair thing would be to grant the advance on all classes of freight and commodities.

Respectfully, yours,

FARMERS' GRAIN & FUEL CO.,
Per F. W. KUTIL, *Manager.*

—

HUBBARD, IOWA, *March 23, 1914.*

Hon. G. B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: I see where the carriers of freight have prepared tariffs for filing with the commission, in which a charge of 7½ cents per ton, with a minimum of $2 per car, for setting cars on any sidetrack belonging to any coal or lumber and grain company.

I must say that this charge is not fair. If the carriers must have an advance in freight (which I do not think necessary), then the only fair thing to do is to grant the advance on all classes and commodities. I therefore protest against the adoption of any plan charging for spotting of cars, the service of which is already included in the freight rate which we pay.

Yours, very truly,

PFUND LUMBER CO.,
B. P. GREENFIELD,
Manager.

—

HORACE, N. DAK., *March 24, 1914.*

MR. G. B. MCGINTY,
Secretary Interstate Commerce Commission,
Washington, D. C.

DEAR SIR: I wish to register my protest to the commission to allow the railroads to further advance the freight rates, and especially the allowance of $2 per car setting at its terminal. There seems to be no end to the raising in freight rates by the railroads. As it is to-day, we pay 30 cents more a ton on coal than Fargo, which is only 10 miles distant. Many years the farmers raise a light crop, and as a result make less, and in many instances lose money, but there is no such a thing as any reduction in freight to ease up matters.

In case the Government does not do something to curb the greed of the railroads the result will be socialism in practice in a very short time.

It looks to me as if most of the requests of the railroads for advances are granted by the commission. The writer was at Bowman, N. Dak., four years ago, and the Chicago rate and Minneapolis rate to Bowman were practically the same, while there was a difference of over 300 miles in distance. And will conclude by protesting against any advance in rates, as we are overburdened by too high rates already, and am confident that the commission will endeavor to do justice to the public as well as to the railroads.

Yours, respectfully,

C. FREDRICKSON.

—

EASTON, PA., *March 24, 1914.*

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: We understand that there is a proposition before your honorable body, whether advanced by the railroad companies or others we do not know, to authorize and permit the railroad companies to put a charge on all cars placed for loading and unloading on sidings owned by parties other than the railroad companies themselves. This proposition seems to us most unjust. From our observations at Easton we believe it is a benefit to the railroad companies to be able to place cars on private siding for either loading or unloading. It reduces the glut of cars in the railroad companies' yards, and they do not have to move and switch about such cars in order to remove cars that have been unloaded and to place loaded cars at certain points in their yards for unloading, as they are almost constantly doing. Again, the values of carloads of merchandise vary or differ very greatly. Taking our lime, which is a cheap commodity, as an example, and placing a switching charge upon it the same as on other commodities in carloads, many of which are worth in value from 20 to 50 times the value of the car of lime, would certainly be unjust. I do not believe the lime business is in such a prosperous condition that the business will stand it, certainly not in this section. The constant increase of minimum weights by the railroads hampers the business and makes it more expensive to handle them in the smaller towns and cities. If the railroads must have additional income, we would prefer to see a small advance in rates on merchandise in general as the most equitable and just to all concerned.

Very respectfully, yours,

EASTON LIME CO.,
Per PURCELL.

—

ROCKFORD MANUFACTURERS' & SHIPPERS' ASSOCIATION,
Rockford, Ill., February 28, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: We inclose herewith a resolution passed by the directors of the association at its recent meeting, which is self-explanatory, and trust that the matters and things involved therein will receive your most careful consideration.

Yours, very truly,

C. S. BATHER.

[Inclosure.]

Whereas the Interstate Commerce Commission have now under investigation the propriety of the proposed advance in freight rates between points in so-called official classification territory; and

Whereas in the said investigation the commission have propounded inquiries regarding so-called private-industry track service, including "spotting of cars" and "trap-car" service; and

Whereas the commission have raised the question of the propriety of imposing a charge for "spotting cars" and "trap-car" service aforesaid: Therefore be it

Resolved, That the Rockford Manufacturers' & Shippers' Association, representing, individually and collectively, the manufacturers and shipping interests of the city of Rockford, Ill., are opposed to and they do hereby protest against the proposal to permit the carriers to impose any extra charge or charges for "spotting of cars" or "trap-car" service aforesaid, for the following reasons, viz:

1. That "spotting cars" is and always has been considered delivery of the car and a legitimate part of the through transportation service.

2. That the cost of "spotting cars" is already included and should be included in the rates charged for the transportation of property from point of origin to destination thereof, which rates now include all terminal as well as other transportation expenses.

3. That if the service beyond the point of interchange between the rails of the carrier and the tracks of industries is a shipper's service; a part of the industrial operation of the plant, and not a service of transportation, as announced by the Interstate Commerce Commission in "Industrial Railways case" (29 I. C. C., 212), then and in that event such service is a local intrastate service exclusively within the jurisdiction and control of State authority.

4. That the "trap-car" and similar service of the carriers is a legitimate extension of their terminal facilities, open to all shippers who desire to avail themselves of the same, reciprocal among railroads and properly included within the through line charge, and

5. That the practice established by the carriers in the performance of this service should be maintained as at present.

And be it further

Resolved, That a copy of these resolutions be forwarded to the Interstate Commerce Commission as a means of voicing the vigorous protest of the Rockford manufacturers and shippers against the imposition of this proposed additional, unwarranted tax upon traffic.

ROCKFORD MANUFACTURERS' & SHIPPERS' ASSOCIATION,
By its directors—
P. A. PETERSON.
C. F. MANTINGHAM.
W. A. BROLIN.
T. F. HOPKINS.
C. S. BATHER.
A. T. BARNES.
T. D. REBER.
CHAS. ANDREWS, Jr.
A. S. BUHL.

—

CHICAGO, *February 23, 1914.*

THE SECRETARY INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

DEAR SIR: Referring to the decision handed down in the industrial railway case (No. 4181), being large shippers it appears to us that this "spotting" charge is an extremely unjust one, especially to those shippers who like ourselves have our own switches and sidetracks maintained at our own expense, and should a rule of this kind be put into effect it would be a discrimination, because there are many even larger shippers who do not maintain their own switch and sidetracks, and these charges would operate against those that did.

We do not wish to be understood to take a position against a general reasonable increase in rates such as has been advocated if properly used and which would affect all classes of shippers alike, but this service charge for "spotting" cars is an unjust charge, we think. We should like in this instance to have our letter filed as a protest and as evidence when this matter again comes before your commission, as we understand it will on the 27th or 28th.

Yours, very truly,

JOHN A. GAUGER & CO.

—

DETROIT, MICH., *February 26, 1914.*

THE SECRETARY INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: We learn that one of the matters coming before your commission is the question of charging for placing cars on private sidetracks.

There is more than one side to consider in this matter. From a shipper's standpoint, we claim that the railroad companies are ahead by placing the cars on private sidetracks. In the first place, it saves them money in not having to have additional tracks of their own and the additional buildings they would require, provided that all goods were carted to their warehouses. It also saves them money for trucking and rolling the goods from one part of the warehouse to another and the expense of loading the cars.

These expenses would be a great deal heavier than the expense they are put to in switching cars and placing them on a private sidetrack, and we very much doubt if the railroad companies would be in position and could afford the expense of providing facilities to take care of this business.

It costs the private sidetrack owners a lot of money in the investment. Had the railroad companies provided the same facilities the interest on the investment would be another large item.

We trust the commission will not saddle any additional expense on people who have been compelled already to invest their own private money on these tracks.

In regard to the advance in rates, we are in favor of giving the railroad companies sufficient rates so that they can get a fair return from their investment, keep up their equipment, and be in position to give good service. Good service is of more importance to a community than the few cents per hundred additional freight rate.

Very truly, yours,

PARKER, WEBB & CO.,
Per JAMES CRAIG, Jr., *President.*

—

CLEVELAND, OHIO, *February 26, 1914.*

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: As shippers we express our unqualified indorsement of the granting of the 5 per cent freight rate advance asked for by the railroads, and name our emphatic disapproval of and protest against the substitute plan of charging for "spotting," "setting" or shifting cars, which latter, to the shipper, is an indispensable convenience correlative with the primary broad idea of railroad service. We condemn the substitute plan as impracticable and one involving complexities and vicaria fraught with endless errors and contentions.

Yours, very truly,

THE DIAMOND PORTLAND CEMENT CO.,
Z. W. DAVIS, *President.*

—

CHICAGO MALLEABLE CASTINGS CO.,
West Pullman, Chicago, February 26, 1914.

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

DEAR SIRS: The commission's proposed spotting charge is raising a terrible howl in this vicinity.

I have no desire to go into lengthy correspondence, as no doubt you have been cited over 100 reasons why this extra burden should not become a law. It would seem to us that a reasonable horizontal increase of not more than 5 per cent should be granted the railroads, and then the "little fellow" would be satisfied that he is paying his share.

If the larger industries are compelled to pay this spotting charge, it will disturb the entire shipping world and will result, as usual, in people like ourselves getting soaked worse than ever.

We would like to see this matter cleaned up, so the wheels can turn and put some of our men who want to, but can not find, work enough to keep from starving.

Yours, truly,

J. T. LLEWELLYN, *Vice President.*

COSHOCTON, *February 24, 1914.*

The INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: We are informed that there is an intention on your part to have the railroads charge something like $2 per car for cars spotted in the factories. We herewith most emphatically wish to protest against such a charge, as same would simply be ruinous for us and we can not afford to spend $2 for every incoming car. We have a small sidetrack coming off the Wheeling & Lake Erie Railroad and the cars of raw material coming in are spotted every day, and if we should have to pay $2 per car that would mean an extra expense of something like $2,000 per year, which is certainly a big amount for a relatively small concern as we are; in fact, spotting charges as named above would practically amount almost to the 5 per cent freight increase which the railroads are trying to get from you and which you fortunately have so far denied them. We earnestly entreat you not to put into force such a rule, which would be ruinous for us. Would you kindly do us a favor and let us know whether there is anything in that rumor and whether or not this new rule is going to be applied.

Trusting to hear soon from you, we are,

Yours, very truly,

THE COSHOCTON GLASS CO.,
H. LIEWER, *President.*

ATLANTIC, IOWA, *March 23, 1914.*

Hon. G. B. MCGINTY,
Secretary Interstate Commerce Commission, Washington, D. C.

DEAR SIR: I see the Interstate Commerce Commission has up for consideration the advancement of rates on all classes and commodities of freight in tariffs filed by the carriers throughout the country.

Are the present revenues of the carriers adequate? Yes. The freight rate we pay is enough now to include spotting and sidetracking of any cars. Railroad service is not its best at any rate and we dealers have cars sidetracked for two weeks where we can't get them, and so it's my opinion that the rate is enough to include any extra charge. I protest against the adoption of any plan charging for spotting of cars, the service of which is already included in the freight rate which we pay.

Hoping this, with many others, will be considered in our favor, I am,

Yours, very truly,

ALBERT KUSKE.

During the delivery of Mr. LA FOLLETTE's speech,

The PRESIDING OFFICER (Mr. THOMAS in the chair). The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business, which will be stated.

The SECRETARY. A bill (H. R. 14385) to amend section 5 of an act to provide for the opening, maintenance, protection, and operation of the Panama Canal and the sanitation of the Canal Zone, approved August 24, 1912.

Mr. O'GORMAN. I ask unanimous consent that the canal bill be laid aside temporarily.

The PRESIDING OFFICER. There being no objection, the unfinished business will be temporarily laid aside. The Senator from Wisconsin will proceed.

After the conclusion of Mr. LA FOLLETTE's speech,

AGRICULTURAL APPROPRIATIONS.

Mr. GORE. As the junior Senator from New York [Mr. O'GORMAN] is not in the Chamber, I will state that I am requested by that Senator, who is in charge of the unfinished business, to renew the request that the unfinished business be agan temporarily laid aside, so that the Agricultural appropriation bill may be called up for consideration.

The PRESIDING OFFICER. If there be no objection to the request of the Senator from Oklahoma [Mr. GORE], the unfinished business will be temporarily laid aside. The Chair hears none.

Mr. MCCUMBER. Mr. President, I suggest——

The PRESIDING OFFICER. Does the Senator from Oklahoma yield to the Senator from North Dakota?

Mr. GORE. I presume the Senator from North Dakota desires to suggest the absence of a quorum.

Mr. MCCUMBER. If the Senator from Oklahoma has the floor, I will not ask him to yield.

Mr. GORE. I ask that the Agricultural appropriation bill may be laid before the Senate.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 13679) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1915.

The PRESIDING OFFICER. The pending question is on the modified amendment proposed by the junior Senator from Mississippi [Mr. VARDAMAN], which the Chair understands has been accepted by the chairman of the Committee on Agriculture and Forestry on behalf of the committee.

Mr. GORE. Mr. President, on the eve of adjourning yesterday I had decided to accept the last amendment tendered by the Senator from Mississippi [Mr. VARDAMAN] in order to perfect the pending amendment, and I trust that course will now be taken.

Mr. ASHURST. Mr. President——

The PRESIDING OFFICER. Does the Senator from Oklahoma yield to the Senator from Arizona?

Mr. GORE. I shall yield to the Senator from Arizona if he desires to address himself to this amendment.

Mr. ASHURST. I desire to address myself to this amendment.

Mr. GORE. I should like to ask the Senator does he desire to address himself to the amendment as it now stands or to the amendment after it shall have been perfected?

Mr. ASHURST. What little I have to say may be submitted now as well as three or four minutes later. Still, if the Senator from Oklahoma desires to perfect the amendment, I shall wait until he has done so.

Mr. GORE. I had rather perfect the amendment, so that the real amendment may be discussed.

Mr. ASHURST. Very well. I will secure recognition in a moment.

The PRESIDING OFFICER. The amendment as proposed to be perfected will be stated.

The SECRETARY. It is proposed to strike out of the amendment reported by the Committee on Agriculture and Forestry, at the bottom of page 20, all after the word "*Provided*," at the end of line 25, which is printed in italics, and in lieu thereof insert the following words:

That the entire expense of such service shall be defrayed from this appropriation, and such contributions as may be made by the States, counties, municipalities, and firms, farmers' associations, individuals, mercantile companies, and banking associations residing within said States wherein such work is to be done or service rendered.

Mr. GORE. Mr. President, I observe that the Secretary has read into the amendment the amendments tendered on the eve of adjourning yesterday. In this form the amendment is, of course, open to discussion, and I now yield the floor to the Senator from Arizona.

Mr. BRISTOW. Mr. President——

The VICE PRESIDENT. Does the Senator from Oklahoma yield to the Senator from Kansas?

Mr. BRISTOW. I wish to make an inquiry.

Mr. GORE. In just a moment.

Mr. BRISTOW. The amendment as reported by the committee is before the Senate, and, as I understand, the Senator from Mississippi [Mr. VARDAMAN] has offered an amendment to that as a substitute.

Mr. GORE. That is the parliamentary status of the matter.

Mr. BRISTOW. And the substitute permits contributions from private parties to the Government for the purpose of carrying on this agricultural work?

Mr. GORE. It permits contributions from certain private parties, individual farmers, and agricultural associations.

Mr. BRISTOW. The amendment as proposed by the committee forbids that.

Mr. GORE. The amendment as proposed by the committee does prevent that and would also prevent contributions by the States, counties, and municipalities. That is further than any member of the committee was disposed to go, I am sure.

Mr. BRISTOW. I want to understand the matter, because I do not believe that the Government ought to accept contributions for carrying on its work. I believe it is altogether proper for the Government to cooperate with counties or States——

Mr. VARDAMAN. Will the Senator permit me to interrupt him?

Mr. BRISTOW. In just a moment I will yield. I believe it proper for the Government to cooperate with counties or States in the carrying on of any public service, but I want an opportunity to vote against the Government accepting private contributions. So I must object to any amendment to the committee amendment being accepted without a vote being had upon it.

Mr. GORE. Mr. President——

Mr. ASHURST. Mr. President, I rather had a tacit understanding that I was to get recognition as soon as this amendment to the committee amendment was stated.

Mr. BRISTOW. My inquiry was simply to ascertain the parliamentary status, so that I would know just how to vote when the time came to vote.

Mr. GORE. I had intended to indicate a willingness to accept the substitute offered by the Senator from Mississippi [Mr. VARDAMAN], but, of course, in view of the suggestion of the Senator from Kansas [Mr. BRISTOW], I shall not attempt that course. So the substitute is pending for discussion and for amendment.

Mr. VARDAMAN. Mr. President, if the Senator from Arizona will yield for just a moment, with the consent of the chairman of the committee, I will say that I think, if the Senator from Kansas understood the proposed amendment to the committee amendment, he would not urge the objection which he has made to it.

The Senator from Kansas was doubtless here on yesterday when we discussed this question. The purpose of the committee's amendment was to prohibit the Government from working in partnership with the Rockefeller Endowment Association, or

whatever its name may be. In order to prevent that the language of the amendment precluded and prohibited the citizens of the States where the work is to be done and who are so vitally interested in the matter from contributing anything to this work for their own betterment. In some of the counties of Mississippi the National Government employs the man and pays a part of the salary, but the Government has not enough money to pay him the full salary, and so the citizens of the community, whose property is being protected and whose interests are being subserved and promoted, contribute enough to engage the service of a capable man for the entire year.

This work has gone on in Mississippi for the last year, and promises great results. To cut it off in this way will be a very serious injury and result detrimentally to the people of Mississippi and of other Southern States where this pest is being dealt with.

Mr. BRISTOW. Mr. President, I want to say to the Senator from Mississippi that I have no objection to the Government cooperating with the State of Mississippi or with any municipal, county, or State authority in the promotion of any public work. If there are private parties who want to contribute locally to help this work along, they can contribute to their State or county associations.

Mr. VARDAMAN. If the Senator will permit me, I will say that that is all that this amendment proposes to do.

Mr. BRISTOW. No; the Senator's amendment goes further than that. The Senator's amendment authorizes the Government to collect money subscriptions to carry on this work. That is what I object to. I say that the Government should raise its money in a public way by public taxation and spend it for public purposes, and not open subscription books for private parties to come in here and raise funds to help it carry on its business.

Mr. VARDAMAN. Mr. President, if the Senator will pardon me, the Government does not collect any money at all; it is collected by other people. The Government has nothing whatever to do with the collection of money. The people of the respective communities make up the money, and they simply go to the Government and say: "Here, let us help you help us." That is what they do; the Government has nothing in the world to do with raising this money; the Government does not make any suggestion to anybody to raise the money. The amendment proposed by me simply gives the people the privilege, if they see fit to do so, to raise the money and use it for their own benefit.

It is that character of cooperation which stimulates the spirit of self-help—self-reliance—and at the same time cultivates a patriotic regard for the Government and a correct understanding of its proper functions.

Mr. BRISTOW. Why should not the people in Mississippi contribute that money to their State direct and let the Government cooperate with the State in this public service?

Mr. VARDAMAN. There would be no objection at all to the Senator's suggestion if there were legislation which authorized the State to do that, but the Senator proposes by his objection to interrupt this system which is working now so very satisfactorily. There can not possibly be any harm come by permitting it to go on. Nobody in the cotton States is going to contribute to this fund with any sinister selfish motive or tainted money; the money is going to be contributed for the benefit of the farmers, of the cotton raisers, and for the benefit of the entire Nation, because if the pest is destroyed, which is sought to be destroyed by this legislation, it will add materially to the wealth of the entire Nation.

Mr. ASHURST. Mr. President, I see no objection to the amendment proposed by the Senator from Mississippi [Mr. VARDAMAN] to the amendment of the committee, but I believe it to be the duty of Congress to reject any and all donations, gifts, and bounties which may be offered by such men as Rockefeller or Andrew Carnegie. These men have exploited their country and accumulated vast wealth by devious means; but, worse than that, they have exploited the working people in a shameful and brutal way. One of these men—Andrew Carnegie—some twenty-odd years ago, indirectly caused the streets of Homestead to run red with the blood of workingmen.

Young Rockefeller recently testified that he would be willing to sink his entire investment in Colorado rather than yield to the demand of his employees that they be permitted to organize. This same Rockefeller, the beneficiary of organized millions of dollars, now declines to admit that labor is entitled to the poor boon of organizing itself. This same young Rockefeller has attempted to debauch an American Commonwealth, and the blood of innocent men, women, and children is on the hands of his barbarous agents, who have infested that State in the shape of armed and vicious gunmen, and who have in a cruel and cowardly manner hidden behind a specious pretense of martial law. I shall vote against the proposition that Carnegie, Rockefeller, or any other of their class shall be permitted to patronize this Government and thus indirectly obtain the approval of Congress.

When the lashings of an upbraiding conscience begin to sting some malefactors of great wealth, it appears to be quite the fashion for them to silence that monitor, lay on the flattering unction, and reconcile them to themselves by ostentatious gifts and bounties.

Instead of Congress indirectly approving of the conduct of Mr. Rockefeller by accepting his donation, it should pass a resolution reprobating and condemning in the most severe terms his inhuman treatment of some of his employees.

I shall now read from an editorial apropos of this subject from the New York World:

A MATTER OF PRINCIPLE.

Young Mr. Rockefeller repeats that the maintenance of certain labor conditions in Colorado is "a matter of principle which we could not concede or arbitrate."

To the feudal lords of mediæval Europe the attachment of the serf to the soil was a legal right and a matter of principle.

* * * * * * *

In England it was long a matter of principle that government should not restrict a woman's free right to crawl on hands and knees through low mine tunnels, dragging a carload of coal by a harness about her waist.

It is a matter of principle to some capitalists that parents shall be free to hire their little children to work long hours in shops.

That right of combination and organization, even if forced upon the unwilling, which Mr. Rockefeller would deny to workingmen, is defended by the lawyers of industrial monopoly as a matter of principle.

Mr. Rockefeller is correct in stating his "matter of principle." What he fails to note is that matters of principle are ever perishing in the development of human institutions. No matter of principle is big enough to stand out to the end against public necessity. For that matter, public necessity itself is a paramount matter of principle.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Mississippi [Mr. VARDAMAN] to the amendment reported by the committee.

Mr. OVERMAN. Mr. President, I desire to ask the chairman of the committee a question. I notice an increase in this appropriation of some $300,000. Is it understood by the committee that the increase is to take the place of the money furnished heretofore by Mr. Rockefeller, and that it is to be used in the same manner?

Mr. GORE. Yes, sir; that is the object of the increased appropriation of $250,000.

Mr. OVERMAN. And it is to be used in the same manner?

Mr. GORE. To be used in the same way, and for the same purposes and objects.

Mr. OVERMAN. Very well.

Mr. CUMMINS. Mr. President, I desire to ask the chairman of the committee a question looking to an amendment which I shall offer to this paragraph; possibly it ought to be under consideration before the amendment now before the Senate is voted upon, and I will take the opinion of the chairman of the committee upon that point. I intend to propose that after the words "cotton boll" and before the word "weevil" there be inserted the words "and Argentine corn," so that it will read:

For farmers' cooperative demonstrations and for the study and demonstration of the best methods of meeting the ravages of the cotton-boll and Argentine corn weevil, $628,240.

I can easily see that in considering the instrumentalities through which the money is to be expended we ought to have in mind the point I intend presently to make. I do not care to enter upon the argument of it now, unless the chairman of the committee would prefer that we take it up at this time and have the whole purpose of the appropriation settled before we decide whether outside people shall be permitted to contribute anything to the service.

Mr. GORE. Mr. President, I think the suggested amendment is not necessary. There is another provision in the bill, carrying an appropriation of $114,500, for the investigation of insects affecting cereal and forage crops. Under that appropriation the work suggested by the Senator would properly come, and I have no doubt that were he to make the suggestion to the department the work would be promptly taken up.

Mr. CUMMINS. I shall deal with that subject when we reach it; but I thought it only fair to advise the chairman now that I did intend to offer the amendment to which I have referred. I will, however, after having given that notice, not attempt to present the merits of the subject at this time.

Mr. GORE. Mr. President, I will say to the Senator that the appropriation to which I refer will be found on page 48. If the Senator thinks the language of the provision on that page ought to be expended or specific direction included for the investigation of the particular pest to which he refers, I shall be very glad to cooperate with him in securing the proper wording.

Mr. SMITH of South Carolina. Mr. President, before the vote is taken, I want to call attention to the amendment offered by the Senator from Mississippi, and also to direct the attention of Senators to the fact that in my State the farm-demonstration work has had most unexpected and wonderful results. The average yield per acre of corn in my State before they organized corn clubs and interested the younger agriculturists in such work, was about 11 bushels an acre, while, according to the statement of the commission of agriculture in that State, last year the average yield was 20 bushels per acre. I should like also to call the attention of the Senate to the fact that in my State one Jerry Moore, a youth, produced something over 200 bushels of corn on 1 acre of ground.

In addition to that they have what is known as tomato clubs. That is the popular name for them; but they are organized for the purpose of teaching the girls on the farms throughout the State how to preserve the different fruits and vegetables, in order to encourage home economics. I think it would be disastrous if in a cause which is conceded to be a righteous cause, and not for the purpose of advertising or extolling those who have accumulated their millions in an unworthy manner, outside sources were cut off from all participation in this kind of work. I do not believe we should go that far and cut off the different kinds of legitimate business from making contributions. In my State especially, where there is a clear line of demarcation possible between the merchants and bankers and the agricultural classes, nothing has contributed to such a general feeling of community interest as the action of the bankers, merchants, and different financiers in contributing to this work, looking toward the development of home economics in the manner to which I have referred, in canning, in producing home gardening, and cooperating with the family in producing their own garden supplies. The results of the efforts put forth have been marvelous in my State in every department of agriculture.

I think the amendment offered by the Senator from Mississippi is broad enough and that it eliminates the very elements which we wish to eliminate. I sincerely hope that nothing will be done to curtail this cooperative spirit between the various departments of our industrial life in the several States. It would be a mistake; it would be disastrous. There is one young lady in my State, a Miss Parratt, who is devoting her life to the work of developing the old idea of preparing food for home consumption in order to reduce the cost of living, of which we hear so much to-day, and her efforts have been wonderful in the benefit which has accrued to our people. I sincerely hope that this work will not be retarded and that the amount appropriated will not be curtailed, nor any contribution prevented which the citizens of the several States may desire to make.

Mr. JONES. Mr. President——

The VICE PRESIDENT. Does the Senator from South Carolina yield to the Senator from Washington?

Mr. SMITH of South Carolina. I do.

Mr. JONES. I want to ask the Senator if the kind of work which he has just been describing is the work that is done under this appropriation?

Mr. SMITH of South Carolina. Yes.

Mr. JONES. What has that to do with the boll weevil?

Mr. SMITH of South Carolina. That is the very point, and I am glad the Senator has called my attention to it. If the Senator will read the provision, he will see that it reads:

> For farmers' cooperative demonstrations and for the study and demonstration of the best methods of meeting the ravages of the cotton-boll weevil, $628,240.

Only a part of the appropriation will be used for the purpose of checking the ravages of the boll weevil.

Mr. JONES. As a matter of fact, is not all this money being used for the farm-demonstration work, and is it not true that the indirect effect upon the boll weevil comes necessarily because of that work?

Mr. SMITH of South Carolina. Oh, no.

Mr. JONES. What is the particular work intended to be provided for? I want to say to the Senator that I am not opposed to this appropriation.

Mr. SMITH of South Carolina. I understand that.

Mr. JONES. I am glad to have the appropriation made, but I have an idea in some way that the boll weevil is mentioned in the paragraph because it got in a good many years ago and is simply kept in now as a basis for the appropriation, when, as a matter of fact, we are not able to do very much with it. What I want to ask the Senator is what is directly done under this appropriation to eradicate the boll weevil?

Mr. SMITH of South Carolina. The Senator has asked that question in the spirit in which I shall answer it. It has been found that the boll weevil, possessing peculiar habits and not eating anything from the surface, can not on that account be poisoned by the ordinary methods of poisoning and spraying. The insect has a proboscis and sucks its pabulum from the inside of the little bloom on the inside of the fruit. Therefore we can not reach him. The only method by which to curtail his ravages is by demonstrating early varieties of cotton and showing how to circumvent him by the use of certain kinds of fertilizer, by the preparation of the ground, by getting the cotton in before he comes out of hibernation, and getting a certain amount of cotton "set," as they call it. It is a misnomer to call the insect a "boll weevil." It would be nearer the truth to call him a "cotton bloom weevil," in that he feeds largely on the little shape or the little flower just before it blooms. This farm demonstration work is to teach the farmers how to counteract the effect of the boll weevil by the cultivation of the earlier varieties of cotton and the proper preparation of the soil and also by winter plowing to get rid of the weevil while in hibernation.

Mr. JONES. How is that done? That is, the Government itself does not have somebody do it, does it? Does it send an individual?

Mr. SMITH of South Carolina. The Government sends an individual, who goes from place to place, or comes to a certain place and has the farmers meet him, in order that he may demonstrate on a given farm how by winter preparation——

Mr. JONES. That is, the owner of the farm acts under the direction of this Government agent?

Mr. SMITH of South Carolina. That is right, with his neighbors around him.

Mr. JONES. How long has that been carried on?

Mr. SMITH of South Carolina. It has been kept pari passu with the advent of the weevil; and really they are preparing the States that they know the weevil will inevitably invade.

Mr. JONES. Have not those demonstrations been made in practically all the territory that has been visited by the boll weevil under the appropriations we have made?

Mr. SMITH of South Carolina. I will say to the Senator that if he is familiar with the ordinary methods of the farmer, and his peculiar genius, he knows that as long as the weevil is not with him he has an idea that the ravages of the weevil have been exaggerted. When the weevil does get into his territory he finds that the matter has not been exaggerated. These demonstrators go in advance and along with the weevil to teach the farmer how best to overcome the demoralization that Senators indicated here yesterday afternoon is accomplished in this way.

I wish to say to the Senator that no one but those who are thoroughly familiar with the conditions can appreciate them. Here are farmers, one-horse or two-horse or three-horse farmers who make up in the aggregate the great bulk of those that produce our staple crops. They are the men who have not facilities for keeping in touch with the advance of scientific work, as the Senator and I perhaps would do on our farms. It is essential for the general welfare for these demonstrators to be on the ground, and to warn the small farmer beforehand, and to help him when the calamity comes.

Mr. JONES. Can the Senator tell me about how much of this appropriation from year to year is actually used for the boll-weevil demonstration work and not for general farm demonstration work?

Mr. SMITH of South Carolina. I would not pretend to say. If the Senator has appreciated what I have attempted to explain, he will see that without the imminence of the boll weevil and without his presence there are certain forms of the demonstration that would not be necessary, but they go hand in hand. Where the weevil is present it means absolute demoralization unless some method is suggested by those who have had experience with him by which the farmer can, in a measure, overcome the disastrous results of his presence.

Mr. JONES. The reason why I am asking these questions is that I notice in the paragraph just preceding this an appropriation of $400,000 for farm demonstration work, "to investigate and encourage the adoption of improved methods," and so forth. I take it that under the next paragraph we can use and do use a very large amount of that money for exactly the same purposes for which the money in the preceding paragraph is used.

Mr. SMITH of South Carolina. If the Senator will allow me, the $400,000 carried in the preceding paragraph is used in a geographical division of the country under Dr. Smith. That is the northern section, where the conditions of farming are radically different from those in the southern section, which is under Dr. Knapp.

Mr. JONES. That brings up a new point. There is nothing in these paragraphs, of course, that indicates any geographical division.

Mr. SMITH of South Carolina. No; but it is true, nevertheless.

Mr. JONES. As I understand now from the Senator, the expenditure of the money carried by the preceding paragraph is confined to the States of the northern section?

Mr. SMITH of South Carolina. Yes.

Mr. JONES. And I understand that all the money carried in this paragraph is expended in the Southern States, and is not used anywhere else?

Mr. SMITH of South Carolina. Yes; that is true.

Mr. VARDAMAN. Mr. President, if the Senator from South Carolina will permit me, it is used in the fight against the boll weevil. It does not fix his geographical residence. It is against the boll weevil, wherever he can be found.

Mr. JONES. I wish to suggest to the Senator from Mississippi that the first part of this paragraph is not confined to the boll weevil. The first part of it says, "For farmers' cooperative demonstrations." That is independent of the boll weevil.

Mr. SMITH of South Carolina. Yes.

Mr. JONES. That has nothing to do with it.

Mr. SMITH of South Carolina. "And for the study," and so forth.

Mr. JONES. Oh, yes; it may be used for that purpose or for the boll weevil.

Mr. SMITH of South Carolina. Oh, no; it is a coordinate conjunction. It means that it shall be used for the purpose of demonstrating how best to meet the ravages of the boll weevil and for farm demonstration work.

Mr. JONES. Do they not use a part of this money in the Southern States purely for farm demonstration work?

Mr. SMITH of South Carolina. Yes.

Mr. JONES. Independent of the boll weevil?

Mr. SMITH of South Carolina. Yes.

Mr. JONES. That is what I thought.

Mr. SMITH of South Carolina. That is true; and then this additional amount is to be used for the fight against the ravages of the boll weevil, which, as a matter of course, is of interest to every man here.

Mr. JONES. Why, to be sure.

Mr. SMITH of South Carolina. I doubt if there is a man on the floor of the Senate who has not on his person now the product of cotton.

Mr. JONES. I do not doubt that. I told the Senator a moment ago that I was in favor of that appropriation. What strikes me about it is that it is not just exactly the proper thing to have the amount divided in this way. It seems to me we ought to have an appropriation for farm-demonstration work and not have it divided by any geographical lines. Let the money be expended all over the country, and then let us have an appropriation for the boll-weevil work also. I will stand with the Senator in voting for any amount that he deems necessary to stop the fearful ravages of that insect.

Mr. SMITH of South Carolina. The Senator will understand that it is not so much sectional as it is climatic; that there is an absolute difference between the nature of agricultural work in one section and its nature in another.

Mr. JONES. Oh, I understand that; but it is all farm-demonstration work.

Mr. SMITH of South Carolina. It is all farm-demonstration work, yes; and the Agricultural Department, not under this administration but under the previous administration, divided this work——

Mr. JONES. Oh, I understand that.

Mr. SMITH of South Carolina. So that the demonstrator in one section, thoroughly familiar with local conditions, would do the work there, and the demonstrator in the other section would do the work there; and they made this division just as nature had already provided it.

Mr. WARREN. Mr. President, if the Senator will permit me right there, these matters came to be divided in this way: We formerly provided a direct appropriation for the boll weevil. We afterwards provided by appropriation in succeeding years for farm demonstration. In providing for these experiments it was found, as we got along with the boll weevil, that the way to treat it was to send out these men who understood the matter to show the farmers how to plant their cotton, in what season to plant it, and so forth.

Mr. SMITH of South Carolina. That is correct.

Mr. WARREN. They send a man to the cotton fields to show the farmers how to handle the boll weevil. He comes and oftentimes shows them how to raise corn and other products as well. That is the reason why farm-demonstration work is mentioned in both and why the two appropriations became separated in this way.

As to the geographical division, I am not quite certain that there is a geographical division; but, so far as the Northwest is concerned, the Secretary of Agriculture has expended money only in such States and such counties as would cooperate and, as a general thing, furnish as much money, if not more, than the United States has provided for each locality.

Mr. SMITH of South Carolina. That is correct.

Mr. WARREN. That, as I understand, is the reason why these two amounts are not together in one paragraph.

Mr. SMITH of South Carolina. That is correct.

Mr. McCUMBER. Mr. President, then do I understand that this $628,240 is to be used only for demonstration and for work on those farms on which cotton is raised?

Mr. SMITH of South Carolina. Oh, no, no.

Mr. McCUMBER. I want to find out whether that is correct.

Mr. SMITH of South Carolina. The Senator will understand that this money is used for farm-demonstration work generally and to demonstrate how diversification can overcome the ravages of the boll weevil.

Mr. McCUMBER. Yes; but the point——

Mr. SMITH of South Carolina. One part of the item has reference only to cotton where it is necessary to teach the farmers how best to run their farms in the presence of the boll weevil. The other has no reference to the boll weevil at all, but covers general farm-demonstration work.

Mr. McCUMBER. Yes; but the cooperative demonstrations are under the particular section which provides that the $628,240 is to be used exclusively in the cotton States and in the cotton sections.

Mr. SMITH of South Carolina. Yes.

Mr. McCUMBER. Now, is that correct?

Mr. RANSDELL. Mr. President, I do not think that is strictly correct. I know that in the State of Louisiana, in the parish of Terrebonne, there is one demonstrator who works under the farmers' cooperative demonstration work among the sugar planters. Many of them are gradually getting ready to give up sugar. They can not raise cotton in that parish, and so this demonstrator is encouraging them to bring in fine varieties of hogs and cattle. He lives among those people. He goes from farm to farm, from place to place, throughout that big parish, and he tells them that if they will turn their attention to raising hogs and cattle and grain and hay crops they may make as much or more money than they ever did before. He has aided them very much in that business, and they are quite hopeful of making a success of hogs and cattle and hay and things of that kind, to which they have paid very slight attention heretofore. He is one of the employees of the farmers' cooperative demonstration work.

They also work in my State in the rice section, where there is no cotton. They help the rice farmers with this cooperative demonstration method, which has proved so effective. They are not confined in their efforts to cotton. The main purpose of the work is to fight the cotton-boll weevil; but, incidentally, they have gone into the rice section and into the sugar section of Louisiana to help the rice growers and the sugar growers.

Let me give a little illustration of how these demonstrators work. There is a man named Watson who represents the Department of Agriculture in the parish of East Carroll, where I live. I have had letters from my manager in the last few days telling me about how Mr. Watson has been operating on my plantation and how very helpful and effective he is, especially with my colored tenants and laborers.

The colored people have a great deal of faith in Uncle Sam. My manager, Tom Estes, might tell them one thing, and they would pay little attention to him; but when Mr. Watson, the Government representative, tells them that the National Government believes that such-and-such methods will be very beneficial to them, they heed him; and he is very helpful. He will spend a day or two on my place and then go to the adjoining place, and so on all over that parish. He goes over two parishes, East Carroll and Madison, from farm to farm. He is a very active, energetic, intelligent man. I think he gets a salary of about $1,500. His work is magnificent and most helpful to my people. That is purely the cotton section, but he knows how to raise oats; and he says to people: "You used to buy your oats in the North and the West. That is foolish. You can make 50 or 60 bushels of oats to the acre with all ease on the Louisiana soil if you cultivate it properly. Why buy your oats in the West?" He shows them how to cultivate and harvest oats, and Louisiana is rapidly becoming a great oat section. Our granaries used to be in the West. They are now rapidly getting to be in Louisiana. He tells them: "Why, you used to buy all your corn in the North and West. Why do that? You can make good corn in Louisiana. Do not make

cotton out of the proceeds of which to buy corn, but make all your corn at home, and grind your own meal at home." He says:

A few years ago every train or boat that came into your parish brought a large quantity of hay. The lands in Louisiana are better for hay than those of almost any other State in the Union. Why buy your hay in the West? Raise it here.

He is giving them the best advice along all of those lines, and that is in order to make a success of farming in the presence of the boll weevil. Formerly they could make cotton and buy hay, oats, and corn. Now they can not do it in the presence of the boll weevil. The cotton must, to some extent, be a side issue.

Mr. LANE. Mr. President, I should like to ask the Senator one question. In the light of his explanation, it strikes me that the people in the West and in the North are being asked to furnish the people in the South the money with which to put themselves out of business. [Laughter.] They are going to use the money to raise all these things which they now buy of us. I do not see anything profitable in that kind of a trade.

Mr. RANSDELL. I thought the Senator was a patriot. I thought he would like to see all sections of the country prosper, and I thought he would like to buy cheap cotton. He uses a great deal of cotton in his business. I believe he is a doctor of medicine when he is at home, and I thought he would like to have plenty of cotton, and have it cheap.

Mr. McCUMBER. I wish to express to the Senator from Louisiana my gratification to find that even the colored people down South have more confidence in Government certification, and so forth, than they have in State officers. I am doubly gratified to see this gradual conversion of the Senator toward this army of Government employees under Federal employment, with the livery of the Federal Government upon them, invading his State and running over it, doing work that could have been done just as well by the State, and perhaps could have been done a great deal better by the State than it could be done by the Federal Government.

I notice, however, that the Senator, and quite a number of others just the same way, whenever it touches home and gets down to something in which they are interested are not afraid at all of the Federal Government reaching over the State lines wherever it will be beneficial, but if we ask that it shall reach over the State lines up in our own section of the country we are met with the claim that "you are pressing the Government functions over State rights and subverting the State to the General Government." [Laughter.]

Mr. President, the real question I was asking after all was to find out whether or not any portion of this $628,240 was used except in the sections where cotton is raised. I did not mean to imply by my question that it necessarily referred to the very fields in which cotton was being raised, for I assumed you could not raise cotton and at the same time demonstrate the same field as a fit place for the cultivation of something else.

What I wanted to get at, however, was whether or not the portion of this paragraph which reads "for farmers' cooperative demonstrations" covered any territory other than that in the section in which you raise cotton. In other words, is any of that money to be spent up in the corn fields of Iowa?

Mr. GORE. Mr. President, does the Senator wish to have that question answered now?

Mr. McCUMBER. Certainly.

Mr. GORE. I will say that the six hundred and odd thousand dollar appropriation applies to 15 Southern States, including Maryland, where I believe no cotton is produced. The evolution of this appropriation came about in this way: It was started on account of the unusual ravages of the boll weevil. A small appropriation was made with a view to studying the boll weevil and exterminating the pest if possible. The department soon found that it could discover no parasite and no other way to exterminate the boll weevil outright. Relief could be obtained only through cultural methods. Through those experiments and demonstrations so great a benefit was produced in the sections involved that it was extended throughout the entire South, the appropriation being correspondingly increased. So great advantage inured to the farmers of that section from this demonstration work that it was afterwards extended to the Northern States, and the item of $400,000 included in the bill just preceding this $600,000 appropriation is designed for use in the Northern States.

At this juncture I will answer the Senator's question, propounded on yesterday, by saying that the Bureau of Statistics of the Department of Agriculture estimated in 1909 that the losses resulting from the boll weevil aggregated $88,000,000. The Census Bureau has recently issued a statement to the effect that $500,000,000 have been lost on account of the ravages of the boll weevil since the advent of that insect. During the last four years seven counties in Mississippi have sustained a loss of more than $30,000,000. In 1909 the crop in the seven counties was 190,000 bales. Last year and the year before it was 30,000 bales.

As I say, this effort to combat and counteract these ravages led to the demonstration work. Its success in the South induced the department to extend its benefits to the North. That has been done. The bill also carries an appropriation of $50,000 for demonstration work on reclamation projects. It carries $114,000 to investigate and to prevent the ravages of insects affecting cereals. It carries $41,500 to study the habits of and to find ways and means to exterminate insects which prey upon truck crops, vegetables, sugar beets, and the like; $135,000 are appropriated in the bill to study improved methods of cultivating grains of various kinds and diseases affecting grains.

The bill carries appropriations which make it entirely universal, so far as the country is concerned. No section is neglected, no pest is overlooked; or, if so, any Senator will certainly be a benefactor who will call the attention of the committee to any service it can render in this connection.

Mr. LANE. Under that invitation I call attention to the fact that the bill overlooks the codling moth, the woolly aphis, the hop louse, and other pests that we have out in our part of the country, the products of which you say you are not going to patronize any more. The woolly aphis is just as hard to kill as the boll weevil. You can hold it under water for an hour, and it will pop up as dry as an agricultural report at the expiration of that time.

Mr. GORE. I will join the Senator in getting some kind of a submarine that will hold it down indefinitely, then.

Mr. LANE. It is as hard to exterminate as any other pest. The only way yet discovered to do it is to destroy the tree infested by it—to dig it up and burn it.

Mr. GORE. The bill carries an appropriation for the investigation of insects that affect the apple trees and other fruit trees of the Senator's own section. It is impartial. It is nonsectional.

Mr. McCUMBER. I think the Senator from Oklahoma is right. That is covered in the paragraph for the investigation and improvement of fruits and the methods of fruit growing, harvesting, and packing, storing, handling, and shipping. I suppose that would cover the matter of insects and the trees as the trees are growing and the fruit is being cultivated. I wish, however, to call the attention of the Senator to the fact that he has left out a very important matter, and that is an appropriation for studying the best method of burning brush on lands. [Laughter.]

Mr. WARREN. If the Senator will allow me, there is $58,000 appropriated on page 48 to investigate——

Mr. GORE. If we could send certain fire-eating Senators to that section, they might be of service in that connection.

Mr. WARREN. If the Senator will allow me to finish what I have to say to the chairman of the committee, I should like to say a word on the subject.

Mr. GORE. I yield to the Senator.

Mr. WARREN. There is $58,000 appropriated for the investigation of insects affecting deciduous fruits, orchards, vineyards, and nuts, besides the item that the Senator from North Dakota mentioned.

Mr. McLEAN. Mr. President——

Mr. GORE. I wish to add one other suggestion. It may not be uninteresting to the Senator from North Dakota to know that the bill carries an appropriation of $10,000 for the investigation of fibrous plants in connection with the agricultural college of the State of North Dakota. I mention that last, but not as of least importance.

Mr. McCUMBER. I noticed that. I think it should have been put in with this other matter of brush clearing.

The VICE PRESIDENT. Does the Senator from North Dakota yield to the Senator from Connecticut?

Mr. McCUMBER. In just one moment. I notice in all the paragraphs one particular subject is included in the appropriation, and it struck me as rather peculiar that when we got down to the paragraph relating to the boll weevil we work in two subjects under the particular paragraph that might be wholly unrelated to each other. I do not think it has been fully explained as yet why the two subjects should be considered together.

But I want to ask the Senator why he makes the claim that the $400,000 in the preceding paragraph is to be used in any particular section of the country. It does not say that it is to be used in any particular section of the country. If we were

to take it as it reads undoubtedly the Agricultural Department can use the $400,000 wherever it sees fit, and if it exhausts the $628,240 in the matter of the extinction of the boll weevil it can take a portion of the appropriation of $400,000 and use it for farmers' cooperative demonstrations in any State the Secretary sees fit. Does the Senator state to me that without any question the appropriation of $400,000 in the preceding paragraph is to be used in any particular number of States?

Mr. GORE. My information is that that is the course pursued by the department. As I said, this demonstration work originated in the South. It proved especially advantageous there, so much so as to recommend itself to the department, and they have been extending it to other sections of the country. The $400,000 is to be used for that purpose.

Mr. KENYON. Mr. President——

The VICE PRESIDENT. Does the Senator from North Dakota yield to the Senator from Iowa?

Mr. McCUMBER. I yield to the Senator.

Mr. KENYON. I wish to suggest to the Senator from North Dakota that if he will consult page 179 of the hearings before the Committee on Agriculture of the House he will find there a table furnished by Dr. Galloway, in which he gives the estimate of the amount that will be used during 1915 of the appropriation of $400,000 for farm-management demonstration work, said amount being $138,430.

Mr. McCUMBER. That is, of the appropriation of $400,000.

Mr. KENYON. Of the appropriation of $400,000. That is all there is to use, except the addition which the House made of about $35,000, making substantially $172,000 that there is to be used in the North in farm-demonstration work. The balance of the appropriation, I understand, is to be used anywhere in the country.

Mr. McCUMBER. Then we get about two hundred and sixty and odd thousand dollars out of the $400,000, provided in the paragraph on page 20, that is to be used in the southern section of the country, and in addition all the $628,240. Is that correct?

Mr. KENYON. My attention was diverted, but I will say to the Senator that the appropriation to be used in southern States is $628,240. That is for farm demonstration work. I am not objecting to that as far as I am concerned.

Mr. McCUMBER. No.

Mr. KENYON. But the division is not fair as between northern and southern States. It is to be used in 15 southern States, as the Senator from Oklahoma has suggested. In the preceding paragraph it is $400,000, presumably to be used for farm demonstration work in the northern States, but out of that is a very large sum to be used for administration for farm economics, for special farm-management studies, for farm-management field studies, and it is to be used anywhere in the United States. So there is in fact left for farm demonstration work in the north about $172,000. I am not objecting to the southern appropriation, but the $172,000 is all that is to be used in the north in farm demonstration work. That is not sufficient for the northern demonstration work.

Mr. McCUMBER. Mr. President, I want to say one word about the amendment of the Senator from Mississippi [Mr. VARDAMAN], which is offered as a substitute. The Senator from Oklahoma says that by adopting the substitute of the Senator from Mississippi we have eliminated any objection that we may have to the use of the Rockefeller fund or any other fund that may be subscribed. I want to say to both those Senators that that is not our objection. The objection that we have is that the books of the Treasury of the United States ought not be open for private subscriptions of any kind, that whatever is necessary for the conduct of the Government should be raised by a proper method of taxation.

If it is proper to enhance the amount in our Treasury by a private subscription from Mr. Rockefeller or from any institution or association for a specific purpose, it is equally appropriate to open books for a hundred or a thousand different purposes in which private capital may be combined with the money of the United States to carry on any project. Now, that we object to. We object to that kind of an association or partnership.

I have not yet received a reason from the Senator from Mississippi or the Senator from Oklahoma why private persons or associations in any State, if they wish to raise a fund to assist in that particular State in any kind of farm demonstration, may not be able to do so, running on their own account and operating under their own system and receiving any cooperation or instruction from the Department of Agriculture without having to be made a part of the Government arm or Government function.

Those who would vote against this substitute do not wish to be understood as saying that any people may not help in a State by subscribing either to the State or to the county, or that they may create a society of their own and work entirely independently; but I do submit that the objection which was made by me yesterday, and which is made by the Senator from Kansas today, is sound and the Government ought to be run wholly independent of any individual assistance or any individual cooperation.

Mr. WILLIAMS. Mr. President, a moment ago the Senator from North Dakota [Mr. MCCUMBER] said that the amendment offered by my colleague [Mr. VARDAMAN] was offered as a substitute. I do not so understand the parliamentary situation. I understand that the Senator from Oklahoma [Mr. GORE] withdrew the amendment which was offered by him, and that he then adopted the amendment offered by my colleague so that that amendment itself can now have an amendment offered to it as a substitute.

Mr. McCUMBER. Let me say to the Senator that that has not been adopted.

Mr. WILLIAMS. I should like to ask the Vice President whether I am right about the parliamentary situation or not.

Mr. McCUMBER. The Senator from Oklahoma suggested his willingness to accept the amendment of the Senator from Mississippi as a substitute, but I do not understand that it has been adopted by the Senate.

Mr. WILLIAMS. I did not say that it had. I am making a parliamentary inquiry as to what the actual situation is, and I made a statement of it as I understand it to be.

The VICE PRESIDENT. The Chair understands that the Senator from Oklahoma has not withdrawn the amendment proposed by the committee, but the Senator from Mississippi [Mr. VARDAMAN] has moved to amend the amendment of the committee.

Mr. WILLIAMS. That being the case, a motion to amend the amendment to the amendment would, of course, not be in order. I want to say a few words, Mr. President, about the situation as I understand it.

The VICE PRESIDENT. The Chair will state for the information of the senior Senator from Mississippi that the Chair is of the opinion that under Rule XVIII the Senator from Mississippi has a right to offer an amendment.

Mr. WILLIAMS. I have a right to offer a substitute to the amendment offered by my colleague?

The VICE PRESIDENT. Undoubtedly. The substitute is a separate question and may be voted on separately under Rule XVIII.

Mr. WILLIAMS. Then I want to do that.

There is lying before me a letter from the Secretary of Agriculture to the chairman of the Committee on Agriculture and Forestry, and in that letter the Secretary of Agriculture suggests a provision to cover this point. That provision seems to me to be more satisfactory than the pending amendment to the amendment, and it is substantially the provision which was offered by the chairman of the committee on yesterday. Indeed, they are identical, I believe.

Mr. GORE. Yes.

Mr. WILLIAMS. It was offered by the chairman of the committee yesterday and subsequently substantially, not technically, withdrawn. I want to offer it as a substitute for my colleague's amendment, with a modification which consists simply in inserting after the words "agricultural societies or associations" the words "or banking associations."

I will send the amendment to the desk in a few moments as I propose to offer it, but before I offer it I want to read the letter from the Secretary of Agriculture and the substitute suggested by him, so that Senators may be in possession of the actual situation. The Secretary says:

APRIL 30, 1914.

Hon. T. P. GORE,
Chairman Senate Committee on Agriculture and Forestry.

DEAR SENATOR GORE: I have been considering rather carefully the amendment made by the Senate committee to the paragraph providing for farmers' cooperative demonstration work, on page 20, line 25, of the Agricultural bill, which increases the appropriation to $628,240 and adds the following clause:

"*Provided*, That the entire expense of such service shall be defrayed from this appropriation and no contribution or endowment for said purpose shall be received or accepted from any individual, firm, company, or corporation."

That was the language as it appeared in the bill from the Senate Committee on Agriculture and Forestry when the bill was introduced in the Senate. The Secretary goes on:

I feel quite sure that the Senate committee did not have certain facts in mind when it inserted this proviso. The department has been cooperating with State, county, and municipal agencies, including State universities, colleges, and schools, as well as with farmers' organizations and other local agricultural bodies and individual farmers in

the South, and these agencies are contributing to the work nearly a half million dollars annually.

Nearly half a million dollars annually, Mr. President—very nearly as much as this entire proposed appropriation of $620,240.

You will agree—

Continues the Secretary—

that this disposition on the part of the communities to help themselves should be encouraged rather than discouraged. We should not be placed in a position where we can not cooperate with proper agencies. It would be unfortunate to lose this large local fund.

The proviso as it stands would have disastrous effects on the demonstration work. It would disrupt our machinery and render it largely ineffective and futile. The earnest and effective cooperation of the localities has been the most important factor in the situation.

I will pause to say, what you all know, that when a man cooperates by contributing of his own money he is much more apt to cooperate additionally by work and by attendance upon the lectures and work of the demonstrator. The Secretary continues:

Such cooperation has been secured from the beginning of the work. I am convinced that it is not the desire of your committee to prevent cooperation along the lines to which I have directed your attention, but rather to prevent cooperation with such corporations or organizations as the general education board or the Rosenwald foundation. In order to avoid all the difficulties and yet to secure absolutely what the committee has in mind, I would suggest that the item on page 20, line 25, be amended to read as follows:

"For farmers' cooperative demonstrations and for the study and demonstration of the best methods of meeting the ravages of the cotton-boll weevil, $628,240: *Provided*, That the expense of such service shall be defrayed from this appropriation and such funds as may be contributed by State, county, and municipal agencies, agricultural societies or associations, and individual farmers."

The amendment which I propose to offer as a substitute is precisely what I have read, except that after the words "agricultural societies or associations" I have inserted "or banking associations," and then would follow "and individual farmers." I have inserted "banking associations" because the bankers throughout the South have contributed very largely to help their neighbors who are farmers in stamping out this pest in so far as there has been any real stamping out at all. The result practically has been very disappointing. Little by little they are learning to cope with it. Out upon the prairies there is nothing for the boll weevil to hibernate under during the wintertime and thus in some parts of Texas they have substantially destroyed it; but when it has made its appearance in the rich Mississippi Valley country and in a good part of the timber belt of the South, where, when you plow down the grass completely on Monday and it rains on Tuesday it is up ready to plow down again by Thursday, and where therefore the boll weevel has sufficient of every sort of thing for hibernation during the winter, the practical results have not thus far been what we had hoped for.

I want to say in this connection that I look forward with more hope to the birds than to almost anything else. I agree with the Senator from Connecticut [Mr. McLEAN] upon that subject very largely. I have noticed that wherever a new flora or a new fauna are introduced into a country where they had not previously existed they are apt for a time to be very destructive pests. The English rabbit, for example, was introduced into Australia and the whole population had to turn out for years and fight the English rabbit. They built immense ditches, filled them with oil, drove the rabbits across, set fire to the oil—in short, did everything in the world, individually and publicly. The Australian colonies appropriated very large sums of money. I remember when the English sparrow first made his appearance in this country. A few years after he made it all the western farmers came to Congress—and I was then a member of the Agricultural Committee of the body at the other end of the Capitol—and wanted to get appropriations to meet that trouble. After awhile the English rabbit ceased to be a pest in Australia. A great many things learned that they could eat the English rabbit. The English rabbit found that certain parasites began to get upon him that hitherto he had not known. In other words, he met what life meets with everywhere—other life to keep it down. In the course of time other life learns how to attack it, and to minimize what menace there may be in its overmultiplication. The English sparrow here is not now bothering anybody very much, although it is a pretty pestiferous bird, especially early in the morning if he is near the window and you want to sleep.

My hope is that the boll weevil will find lesser bugs to infest it and that the native birds will learn to eat the boll weevil. I have some hope of it, because a few years ago they found very few boll weevils in the craws of the quail down in my country. Now, they find more. It is in the nature of all animals that they stand off and look askance at a strange animal until they get acquainted with him. Then after a while one species learns that another is good to eat, or a parasite of some sort learns that the body of the stranger is a good place wherever to go to hibernate or to find a place for his sustentation by sucking blood, or a nesting place to lay eggs, or something of that sort.

Thus far the work, with all the genius, all the activity and energy, all the intelligence of the Agricultural Department—although all these have been present in an almost superlative degree—has been disappointing in its results.

But I go on now reading this letter. The Secretary continues:

Under a clause such as I have indicated the department would be permitted to cooperate with all proper legitimate agencies, including States, agricultural clubs, schools, counties, farmers' associations and clubs, agricultural societies of all kinds, agricultural associations, and individual farmers.

If the amendment suggested by the Secretary of Agriculture is adopted with the modification which I have placed in it—the addition of the words "banking associations"—he might have added that he would have the cooperation of "the local financial strength of the cotton belt." The Secretary continues:

The department would not be permitted, however, under the clause which I have suggested to use the funds from banks, funds or passes from railroads—

With my modification they would be permitted to use the funds from local banks and banking associations, and I think that permission ought to be granted—

or funds received directly or indirectly from such organizations as the Rosenwald Foundation, the International Harvester Co., or the General Education Board. It would seem perfectly proper for the department to accept and use volunteer funds contributed by States, colleges, schools, and public agencies, such as farmers' clubs, and, in fact, the success of the work largely depends upon cooperation with such agencies.

Very truly, yours,

D. F. HOUSTON, *Secretary*.

Mr. President, I am of the opinion that the Senator from Oklahoma, the chairman of the Committee on Agriculture and Forestry, made a mistake when he expressed his willingness to have the amendment on page 2 of the letter I have just read, the amendment as suggested by the Department of Agriculture, sidetracked. The amendment proposed to be put in its place includes all "individuals," as well as all of these agencies, and it includes all "firms," with the limitation only that they shall be resident within the States of the cotton belt.

Mr. GORE. Mr. President, as I understand, the only difference between the amendment which the Senator now proposes and the pending amendment is the phrase "mercantile associations."

Mr. WILLIAMS. Oh, no; it is not.

Mr. GORE. I withdraw the amendment.

Mr. WILLIAMS. It is "individuals." The amendment which the Agricultural Committee offers reads "individual farmers" and the amendment before the Senate reads "individuals."

Mr. GORE. I did not catch the distinction.

Mr. WILLIAMS. I beg the Senator's pardon, I did not hear him.

Mr. GORE. I will not further interrupt the Senator now.

Mr. WILLIAMS. Very well. This is not a very large question, in my opinion; I do not much care about it one way or the other, except that I have a sincere sympathy with what was said a moment ago by the Senator from North Dakota [Mr. McCUMBER]. I have no objection—on the contrary, I am rather anxious—that those whom the Government is helping should help themselves; that they should help the Government to help themselves; but I have rather a jealousy of an outside influence, with no motive of self-interest, covering itself under a cloak of philanthrophy, perhaps for ulterior purposes. There is a vast difference between an individual farmer's contributing to save the industry in which he has his money and his life wrapped up and some great financial organization stepping in for purposes, good or bad, known for a certainty only to itself.

Mr. WEST. Mr. President, I should like to ask the Senator from Mississippi a question. Why are railroad interests excluded from making these contributions? I notice in my State they take a great deal of interest in the development of the country through which they pass.

Mr. WILLIAMS. Yes; and, by the way, in that connection, Mr. President, I want to say that some of the best demonstration and exhibition work that has been done in the South was done by the Southern Railway under the presidency of Mr. Finley, who died not very long ago; and I suppose that work will be continued under the presidency of Mr. Fairfax Harrison. That, however, is not done as a contribution to the Federal Government, I will say to the Senator from Georgia [Mr. WEST], and that work will go on. The railroads did it on their own initiative and on their own account, independently of the Government. They furnished their trains when farmers held their institutes for demonstration purposes, carrying perhaps a professor of the agricultural college along, and carrying a car that contained

exhibits of agricultural products. The men who went with it would take the things out of the car at a little village, show just what had been done, and say, "This corn was raised at the rate of 100 bushels to the acre on certain ground in a certain county." The railroads very frankly undertook the work in order to build up prosperity along the lines of the roads for the purpose of ultimately building themselves up as carriers of the products raised along their lines. I repeat, that work will, I hope, go on, and no one desires to interfere with it; but if a railroad were permitted to help pay the salaries of State or Federal officials, whether in demonstration or other work, that would be a totally different proposition. So if they were permitted to contribute to a Government salary fund for that purpose, it would be a totally different proposition, because there at once a danger would intrude itself, a possibility of danger at any rate, and that would be the influence and effect upon the popular mind, perhaps blinding it to the abuses and exploitations of the railroads because of gratitude for public contributions.

It is not well anywhere to have the people fed upon largesses, whether of corn, as they were in ancient Rome, or upon largesses of any other sort, for two reasons: First, it makes them lose their magnificent self-respect, and, in the second place, they are unconsciously bribed; they are, consciously or unconsciously, warped when they come to consider meting out exact and equal justice to the contributing party under the laws of the State or county. As I understand, that is the distinction in a case of this sort. I thought that the Senator from Virginia [Mr. MARTIN] on yesterday failed to make in words, though I think he feels, the distinction. To go down to the State of Virginia to devote great wealth to build up schools or to do other things for the public benefit is one thing, and I do not object to any man's money being taken for purposes of doing good—where his money is doing good—but I do object to any man becoming the *real* employer of public servants while these public servants are the *nominal* employees of the Nation, the State, or the county. It seems to me the distinction is obvious; at any rate, it is clear to my mind, whether I am right or wrong.

Now, to go back to the Mexican boll weevil. I was deflected from it for a moment. I hope this rule which I have referred to, and which I have illustrated by the history of the English rabbit in Australia and the English sparrow here, and which I might illustrate in a great many other ways by referring to a great many other pests that have come along in the course of time and have gradually proved to be innocuous, will begin to operate after a while upon the boll weevil. For that reason I think there ought to be not only the very utmost care in not extirpating such birds as are insectivorous, but that the Department of Agriculture ought, if possible, to find birds in other countries which eat hard-shelled insects feeding in the beginning upon the inside and not upon the outside of plants, like the Mexican boll weevil, and import them and turn them loose in the United States.

Thus far the department has helped immensely in a certain way; not that they have gotten rid of the boll weevil, but that they have taught the cotton farmers how they may to a certain extent outdistance him in the race to the goal of maturity; in other words, to raise a species of cotton of such early maturing character and by such cultural methods so hastening maturity that the boll is too hard, by the time great numbers of the boll weevil get upon the ground and begin every day and night to produce their kind, for much, or at any rate the maximum, harm to be done. You can not count the damage the weevil is doing by a mere comparison of bales of cotton produced before and after its advent, although that alone is enormous. For example, a few years ago I had a tenant who raised 125 bales of cotton which he sold at 27½ cents per pound. That was not sea-island cotton, of course, but long-staple upland cotton. I had another tenant at another time who sold some 50 bales of cotton at 32 cents while common cotton was selling at from 10 to 11 cents a pound. Long-staple cotton takes a long time to mature, and you can not raise it successfully with the boll weevil. Not only that, but this early maturing species of cotton being introduced for the purpose of outdistancing the boll weevil—outgrowing and outrunning him—is often even below the staple of the ordinary midland upland; and when that is worth x cents per pound, let us say, this new cotton will be worth x minus 1 or minus 1½ cents per pound.

I thought to utter these words because I do not want Senators to regard this from the standpoint of mere locality or section. There is nothing of more importance to the agricultural prosperity of the United States, outside of raising meat and bread, than the raising of cotton.

It is of importance to you of the North and West, and I will tell you why—and this I want to impress upon you. If I, for example, am forced out of the cotton business, I can raise as good corn as you can, and perhaps better. Some dozen boys in Mississippi, members of corn clubs, raised over 100 bushels of corn to the acre. I can raise as good oats as you can, or perhaps better; I can compete with you in raising hay, hogs, horses, mules, and cattle; I can compete with you in raising pretty nearly everything, except flax and barley and wheat; and when I do come into the market with those things, instead of raising the thing that is naturally adapted to my climate, I increase the supply of those things far beyond the normal increase, and, the demand not being increased abnormally at all, down goes the price of your product; your corn in the Middle West goes down; your hogs and your cattle and your meat go down; in other words, the more you can make me raise cotton the less of other things is it my interest to produce and the more will I buy from you the things which are adapted to your climate and soil; the better for you and the better for me.

It is no more wise agriculture to have a given farmer raise everything in the world than it is to have a country's fiscal laws fixed with the idea that it shall produce everything in the world. If a man can raise enough cotton upon an acre of land to buy 100 bushels of corn, which is what he can do when he raises a bale of cotton to the acre, at 10 cents a pound, and corn is worth 50 cents a bushel, then it is folly for him to throw that land out of cotton and go to raising corn, say, at the rate of 25 bushels to the acre—I told you a moment ago what the Mississippi soil could do in corn—but the average corn production of the State of Mississippi, if I remember correctly, is 19 bushels to the acre. If, however, our people are forced into growing corn as a main crop, we will raise 40 or 50 or 60 bushels to the acre; and, instead of buying it from you with cotton that we have raised much cheaper, we will compete with you in the corn markets of the world, or we will feed it to hogs and compete with you in the meat markets of the world, and we will both suffer, as producers, by lower prices for corn and meat, and you will in addition, as consumers, by higher prices for cotton. So much for that.

Now, Mr. President, I move as a substitute for the pending amendment to the amendment the amendment on page 2 of the letter sent by me to the desk, which I ask the Secretary to read to the Senate.

The SECRETARY. In lieu of the amendment offered by Mr. VARDAMAN to the amendment of the committee, Mr. WILLIAMS proposes the following:

Provided, That the expense of such service shall be defrayed from this appropriation and such funds as may be contributed by State, county, and municipal agencies, agricultural societies or associations, banking associations, and individual farmers.

Mr. VARDAMAN. Mr. President, I am very much interested in the perfection of this provision. I have no pride of authorship; I do not care anything about the amendment proposed by me, nor shall I insist upon its adoption, if a better amendment shall be offered. But I know what the people of the South need; I am familiar with their wants and their desires. The people of the State that I have the honor to represent in this Chamber are solicitous of amending the terms of this measure, and their interest alone shall guide me in the further consideration of this bill.

It is known to the people of the South particularly, and to others who have given this subject serious thought and consideration, that the money contributed or appropriated by the Federal Government is not half enough to carry on this work to a successful issue. That the Senate may understand the interest which is being taken in this matter, I have a few telegrams which I am going to read:

JACKSON, MISS., *April 20, 1914*.

Senator JAMES K. VARDAMAN,
Washington, D. C.:

Senate amendment on cooperative demonstration feature of Agricultural appropriation bill prevents State, county, or individuals from contributing; in Mississippi one-half of the fund is thus raised. Please use every effort to retain for our people this right; letter follows.

H. E. BLAKESLEE,
Commissioner of Agriculture for State of Mississippi.

That is from the commissioner of agriculture of Mississippi, a man who has given a great deal of thought and study to this question. He is a man of the highest character and fidelity to duty; has distinguished his career in the office he now holds. From the Business Men's Club at Tupelo, Miss., I have a letter which tells the same story. It says:

TUPELO, MISS., *April 22, 1914*.

Mr. JAMES K. VARDAMAN, *Senator*,
Washington, D. C.

DEAR SIR: I learn by the press that an amendment to the appropriation bill for demonstrating-farm work has been added that would prohibit any county, corporations, or individuals, contributing money to be used for supplementing this appropriation.

Our people are just waking up to the importance of this work, and are willing contributors to same, yet the small appropriation made by the Government is a great incentive to this movement, and I believe the wording of this amendment should be so changed as to make local contributions available.

Very respectfully,

BUSINESS MEN'S CLUB,
Per E. C. HINDS, *President.*

I have quite a number of other communications, Mr. President of the same tenor which I shall not read, but which I ask to have published in the RECORD along with my remarks.

The VICE PRESIDENT. Without objection, that may be done.

The communications referred to are as follows:

COLUMBUS, MISS., *April 28, 1914.*

Hon. JAMES K. VARDAMAN,
Washington, D. C.:

I understand the purpose of the amendment is to separate the work from the influence of malefactors of great wealth, but in doing so it will destroy the work in this State. For instance, Clay County pays her county demonstrator $1,500, of which the Government pays $500, the board of supervisors $600, and the people of West Point $400; Winston County the same, which is representative of all the work in this State. A literal construction of the amendment would stop all this and seriously cripple the movement all over the State. The amendment could be so worded that it would accomplish its purpose without rebuking the cooperation and support which the people of our State are giving the work.

THE DISPATCH.

—

THE PROGRESSIVE CLUB,
Clarksdale, Miss., April 28, 1914.

Hon. JAMES K. VARDAMAN,
United States Senate, Washington, D. C.

MY DEAR SENATOR: There is an amendment to the general agricultural bill now pending in the United States Senate which says:

"For farmers' cooperative demonstrations and for the study and demonstration of the best methods of meeting the ravages of the cotton-boll weevil, $628,240: *Provided*, That the entire expenses for such services shall be defrayed from this appropriation and no contribution or endowment for said purpose shall be received or accepted from any individual, firm, company, or corporation."

The Clarksdale Progressive Club views this with considerable consternation. We have only recently succeeded in securing the exclusive services of a farm-demonstration expert, who gives his entire time to Coahoma County. The major portion of his salary is paid by Coahoma County. If the above amendment passes it would exclude the Government from accepting any local financial cooperation of any kind whatever, and we would lose the services of our Government expert, which we have gone to much time, trouble, and expense to secure.

Of course I can speak for Coahoma County only, but I believe I am safe in saying that every county in the South similarly situated with us will take the same view of this matter.

Any aid which you may give us in this emergency will be greatly appreciated by this organization.

Very truly, yours,

RUFUS JONES, *Secretary.*

—

JACKSON, MISS., *April 21, 1914.*

Hon. JAMES K. VARDAMAN,
United States Senate, Washington, D. C.

DEAR SIR: Following up our telegram of yesterday, the amendment referred to is the one offered by the Senate committee to the general agricultural appropriation bill, and reads as follows:

"For farmers' cooperative demonstrations and for the study and demonstration of the best methods of meeting the ravages of the cotton-boll weevil, $628,240: *Provided*, That the entire expense of such service shall be defrayed from this appropriation and no contribution or endowment for said purpose shall be received or accepted from any individual, firm, company, or corporation."

We interpret this to mean that all cooperation with boards of trade, business men, and boards of supervisors will be cut off. You notice that the language says that the entire expenses of such service shall be defrayed from this appropriation.

As the Board of Trade of Jackson and the Board of Supervisors of Hinds County are paying three-fourths of the salary of the demonstration agent in Hinds County, the passage of this amendment will destroy our agents' work for this year. We consider the farmers' demonstration work a great agency for bringing back prosperity to our stricken section, and we feel that you can do Hinds County, Miss., and the whole South a great service by defeating this amendment.

With kindest regards and best wishes, we remain,

Very truly, yours,

JACKSON BOARD OF TRADE.
WALTER A. SCOTT, *President.*
JAMES B. LUSK, *Secretary.*

—

WEST POINT, MISS., *April 25, 1914.*

Senator JAMES K. VARDAMAN,
Washington, D. C.

DEAR SENATOR: Referring to my telegram to you from Jackson asking that you defeat amendment to farmers' demonstration appropriation. This is an important work in our State, and by allowing counties to assist in the work and getting some assistance from outside sources the department covers a greater territory and does better work than it otherwise could do. I inclose a clipping from Memphis Commercial which might be overlooked. Know you will look after the interest of Mississippi, and submit this for your consideration. You, being on the ground, can be best judge of way to handle this subject.

With kind personal regards, I am,

Your friend, ISHAM EVANS.

Mr. VARDAMAN. In so far as the amendment suggested by the Secretary of Agriculture goes it is all right, but when you limit the contributors to farmers and bankers or to banking associations you put the burden upon people in Mississippi who are the least able to carry it. The greater part of the money that will be contributed will come from the merchants, manufacturing companies, millmen, lawyers, doctors, by all the business people living in the community. If the farmers were able to carry on this work unaided it would not be necessary to call upon anybody else. This proposed legislation would be wholly unnecessary. The farmers of that country, and especially in that section where the boll weevil has been doing its disastrous work for the last five or six years, are the very ones who are not able to contribute to the fund, and it is an outrage that the more fortunate members of the communities should be denied the privilege of contributing to it. I submit, Mr. President, that anyone living within the State who will give for the patriotic purpose of exterminating this pest and helping the farmer who is carrying already an unbearable burden in this unequal fight ought to be permitted to contribute.

Personal ambitions to serve, partisan advantage to promote, or any other sort or variety of personalities have no place in the consideration of this measure.

There are some lumber companies in Mississippi that own large tracts of land. The timber has been cut off these lands and they are selling it to people who are coming there to build their homes. In order to make that land valuable these large enterprises are contributing money for the extermination of the boll weevil, or teaching a method or system of agriculture which will enable the people to get around and defeat the ravages of the weevil. Should these millmen be marked as the malefactors of great wealth, denied the privilege of promoting the interests of the State and the community in which they live? That is what will happen if the amendment proposed by the senior Senator from Mississippi shall be adopted.

I do not want to crucify Rockefeller; I do not want to use any of his tainted money, but I do not believe that the law should be so written that people within the State should be denied the privilege of contributing to this great work which means so much to the inhabitants of the afflicted section. I am perfectly willing to accept the amendment proposed by the Agricultural Department, if it shall be amended so as to permit all who should contribute to the fund to do so. My amendment covers it all. I think it should be adopted.

In order to bring the matter to an issue, Mr. President, I move to table the amendment offered by the senior Senator from Mississippi.

Mr. MARTIN of Virginia. Mr. President, I make the point of order against all of the amendment which follows the amount appropriated—namely, the proviso—that it is general legislation on an appropriation bill.

Mr. SMITH of Georgia. In other words, Mr. President, it is an affirmative piece of legislation limiting the right to use money in connection with this work. It amounts to general legislation; and, as I understand the Senator from Virginia, he makes the point that it can not be put on an appropriation bill over objection.

Mr. MARTIN of Virginia. It is more than a limitation. As the Senator says, it is a positive, affirmative provision that it shall not be used in connection with certain other moneys. It is plainly, in my judgment, a violation of the rule.

Mr. GORE. Mr. President, I think under the precedent recently established by the presiding officer this proviso is certainly not subject to a point of order. It is a clear limitation upon the money appropriated by this section of the bill; and under that precedent it is certainly in order.

I may say that if the Chair sustains the point of order, I shall conform the proviso to the ruling recently made by the Chair. I do not intend that this proviso shall go out on a point of order in this way.

Mr. CLARKE of Arkansas. Mr. President, ordinarily I should not undertake to defend every ruling I happened to make during my casual service in the chair, but the ruling that was made on the occasion to which the Senator from Oklahoma refers was made upon full consideration by me, and I am prepared to defend it, so far as my own vote and action are concerned. I do not think it has anything to do with the matter that is now presented to the Chair. In that case there was a proposal to increase the salary of the Assistant Secretary of Agriculture——

Mr. GORE. Mr. President——

The VICE PRESIDENT. Does the Senator from Arkansas yield to the Senator from Oklahoma?

Mr. CLARKE of Arkansas. I do.

Mr. GORE. The Senator from Arkansas is mistaken as to the precedent I had in mind.

Mr. CLARKE of Arkansas. I beg pardon, then.

Mr. GORE. It was the ruling of the presiding officer when the Post Office appropration bill was pending before the Senate. That is the precedent I had in mind.

Mr. CLARKE of Arkansas. While occupying the chair I had made a ruling that where a bill contained an appropriation it was competent for the Congress to prescribe the method in which it should be actually disbursed; but that rule has no application to the conditions here.

This provision does not undertake to say how this money shall be expended, except that it shall be devoted to a purpose of this kind. The limitation to which the present point of order is addressed denies to other people the right to contribute money for the same purpose. It has nothing whatever to do with the manner in which the money expended by the National Government shall be paid out. It goes beyond that, and creates affirmatively a rule of exclusion. If the point that it is general legislation is to be interposed, a case is made that justifies its application here.

The VICE PRESIDENT. The Chair has in mind the former ruling, and believes it states the ruling correctly. That was a limitation upon the use of the money appropriated, stating that it should be used only for certain specific purposes, or that it should be used for certain specific purposes; the Chair is not clear which.

In this case the Chair is of the opinion that, standing alone, the first part of the proviso—

That the entire expense of such service shall be defrayed from this appropriation—

would be clearly in order, and germane to the appropriation; but coupled with the statement—

and no contribution or endowment for said purpose shall be received or accepted from any individual, firm, company, or corporation—

the Chair believes it to be general legislation, and believes it is the purpose of the Committee on Agriculture and Forestry to announce as an affirmative statement of statutory law upon the part of the Congress of the United States that no individual, firm, company, or corporation shall make any contribution to be used for the purpose of farmers' cooperative demonstration work or for demonstrating the best methods of meeting the ravages of the cotton-boll weevil.

The Chair thinks this is not such a provision as was formerly ruled upon by the Chair. Taking it as a whole, the Chair believes that it is general legislation, and that the point of order is well taken.

Mr. GORE. Then I ask unanimous consent to disagree to the rest of the proviso.

The VICE PRESIDENT. The Chair thinks that would be included.

Mr. WILLIAMS. The point of order takes out the whole proviso.

Mr. GORE. I did not so understand the ruling of the Chair.

Mr. WILLIAMS. The Senator's point of order applied to the whole proviso; did it not?

Mr. MARTIN of Virginia. Yes.

Mr. GORE. Then I offer the following amendment:

Provided, That no part of this sum of $628,240 shall be used in connection with any money contributed or tendered by the General Education Board or any like organization.

I think that certainly is within the precedent hitherto established.

Mr. MARTIN of Virginia. I make the same point of order against that language.

The VICE PRESIDENT. The Chair will be compelled to overrule that point of order. The Chair thinks it is within the power of Congress to limit the way in which an appropriation shall be used, and has so ruled heretofore.

Mr. WILLIAMS. You might as well put in the Rosenthal matter while you are about it.

Mr. GORE. I said, "any like organization." I never heard of that concern before, but it sounds to me a good deal like the other.

Mr. MARTINE of New Jersey. It begins with an "R," anyhow. [Laughter.]

Mr. WARREN. I wish to ask the chairman of the committee if he expects to allow the appropriation which was raised from $378,240 to stand at $628,240?

Mr. GORE. I do; because undoubtedly the receipt of money from the General Education Board will be discontinued by the Department of Agriculture whether we insert the proviso or not. I may say to the Senator from Virginia that he will be defeating his own end if he should persevere in his opposition, because I feel certain that the Department of Agriculture will not continue to accept the $250,000 from the General Education Board even though this bill should remain silent on the subject. In order to carry out the purpose which he has in view—that is, not to discontinue this demonstration work—I hope the amendment I have offered will be adopted by the Senate.

Mr. KENYON. May we have the amendment stated?

The VICE PRESIDENT. The Secretary will state the amendment.

The SECRETARY. The Senator from Oklahoma [Mr. GORE] proposes to insert the following proviso:

Provided, That no part of this sum of $628,240 shall be used in connection with any money contributed or tendered by the General Education Board or any like organization.

Mr. NORRIS. Mr. President, I desire to inquire of the Chair whether in passing on the point of order that was made, and holding the amendment out of order, it did not follow that the amount included in the amendment also went out. It seems to me, if I understand the parliamentary situation, that the Senator from Oklahoma ought to have his amendment include striking out the $378,240 and inserting the amount which was part of the other amendment.

Mr. GORE. I do not think that is necessary at all. The proviso has no reference to the $628,240 as the amendment was originally pending here.

The VICE PRESIDENT. The point of order was raised as to the proviso, and not as to the amount, as the Chair understands.

Mr. GORE. And if the proviso had been stricken out on the point of order, without any other proviso being offered, the $628,240 would have remained in the bill.

Mr. NORRIS. If that be true, we have an amendment to vote on which ought to be acted on before the Senator's amendment is voted on. The change of the amount is necessarily an amendment.

Mr. GORE. That is true.

The VICE PRESIDENT. No; that is not true. The question is on the amendment as amended.

Mr. GORE. I rather think the point made by the Senator is well taken, because the Committee on Agriculture and Forestry reports that the amount appropriated by the House bill should be raised from $378,240 to $628,240.

The VICE PRESIDENT. The Committee on Agriculture and Forestry proposed an amendment to strike out $378,240 and insert $628,240 and a proviso. A point of order was made on the proviso, and sustained by the Chair. Thereupon the Senator from Oklahoma moved to amend by the insertion of the words which have been read, which of course is an amendment to the amendment of $628,240. The question is on the amendment to the amendment.

Mr. OLIVER. Mr. President, before the amendment is acted upon I wish to express my dissent from the whole amendment, including the addition to the amount.

I wish to say, as a Member of the Senate, that I do not want to be considered as consenting to the refusal upon the part of the Government to allow any citizen or any association to help in the operations of the Government with money or with any other kind of assistance that seems best to them. I wish to say, further, that in my opinion if the people of the section affected by this evil had not a liberal and paternal Government with an apparently exhaustless treasury to draw upon they would not be so quick to refuse the assistance tendered by the General Education Board.

I hope that upon the adoption of this amendment, proviso and all, there will be a call of the yeas and nays, so that those who are opposed to gratuitously voting $250,000 of the public money when it is not necessary will have an opportunity of expressing their opinion.

The VICE PRESIDENT. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

The VICE PRESIDENT. The question now is on agreeing to the amendment as amended.

Mr. OLIVER. On that I call for the yeas and nays.

The yeas and nays were not ordered.

The VICE PRESIDENT. The question is on agreeing to the amendment as amended.

The amendment as amended was agreed to.

Mr. TOWNSEND. May I ask what the amendment is?

The VICE PRESIDENT. The Secretary will state the amendment for the benefit of the Senator from Michigan. It has been adopted.

The SECRETARY. The amendment as amended reads as follows:

On page 20, line 25, after the words "cotton-boll weevil," strike out "$378,240" and insert "$628,240: *Provided*, That no part of this sum of $628,240 shall be used in connection with any money contributed or tendered by the general education board or any like organization."

Mr. OLIVER. I ask for a recount of the number seconding the call for the yeas and nays on the adoption of the amendment.

Mr. VARDAMAN. What is the question now?

The VICE PRESIDENT. There is not any question pending. The yeas and nays were called for, and the request was not seconded by one-fifth of the Members present.

Mr. VARDAMAN. That is all right.

The VICE PRESIDENT. The amendment has been adopted.

The SECRETARY. The next amendment passed over is, on page 23, line 4, "Purchase and distribution of valuable seeds," where the committee proposes to strike out all of the item as printed in the House bill.

EXECUTIVE SESSION.

Mr. SMITH of Georgia. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After seven minutes spent in executive session the doors were reopened, and (at 6 o'clock and 2 minutes p. m.) the Senate adjourned until to-morrow, Wednesday, May 6, 1914, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate May 5, 1914.

COLLECTORS OF INTERNAL REVENUE.

Julius F. Smietanka, of Chicago, Ill., to be collector of internal revenue for the first district of Illinois, in place of Samuel M. Fitch, superseded.

Edward D. McCabe, of Peoria, Ill., to be collector of internal revenue for the fifth district of Illinois, in place of Percival G. Rennick, superseded.

PROMOTIONS IN THE NAVY.

The following-named ensigns to be assistant naval constructors in the Navy from the 21st day of April, 1914:

Walter W. Webster.
Beirne S. Bullard.
Ernest L. Patch.

CONFIRMATIONS.

Executive nominations confirmed by the Senate May 5, 1914.

CONSULS.

J. Paul Jameson, at Antung, China.
Adolph A. Williamson, at Dalny, Manchuria.
Charles L. L. Williams, at Nanking, China.
Edwin L. Neville to be consul at Tansui, Taiwan.
Albert W. Pontius to be consul at Newchwang, China.
Willys R. Peck to be consul at Tsingtau, China.

FIRST ASSISTANT COMMISSIONER OF PATENTS.

James T. Newton to be First Assistant Commissioner of Patents.

ASSISTANT COMMISSIONER OF PATENTS.

Robert F. Whitehead to be Assistant Commissioner of Patents.

UNITED STATES ATTORNEY.

Stephen C. Perry to be United States attorney for the district of Maine.

UNITED STATES MARSHAL.

Henry Behrendt to be United States marshal, eastern district of Michigan.

POSTMASTERS.

GEORGIA.

E. D. Colson, Ocilla.

ILLINOIS.

Charles C. Clymore, Vienna.
P. B. Colwell, Wyoming.
Fred A. Ehringer, Washburn.
David McFadden, Milford.
Charles S. Murphy, Warren.
William Clyde Stewart, Kirkland.

OKLAHOMA.

William I. Bowen, Halleyville.

HOUSE OF REPRESENTATIVES.

TUESDAY, *May 5, 1914.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Behold, O God our Father, these Thy children, who wait upon the touch of Thy spirit to uphold, sustain, and guide them in the legislative acts of the hour. Touch their understanding, reason, conscience, will. Encourage right acts; discourage untoward contentions, that they may serve well the people whom they represent, have the approving conscience, and thus fulfill the law and the prophets. For Thine is the kingdom, and the power, and the glory forever. Amen.

The Journal of the proceedings of yesterday was read and approved.

ENROLLED BILL SIGNED.

Mr. ASHBROOK, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of the following title, when the Speaker signed the same:

H. R. 5993. An act authorizing the city of Montrose, Colo., to purchase certain public lands for public-park purposes.

ENROLLED BILL AND JOINT RESOLUTION PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. ASHBROOK, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States, for his approval, the following joint resolution and bill:

H. J. Res. 242. Joint resolution authorizing the Secretary of War and the Secretary of the Navy to loan equipment, for the purpose of instruction and training, to sanitary organizations of the American National Red Cross; and

H. R. 7951. An act to provide for cooperative agricultural extension work between the agricultural colleges in the several States receiving the benefits of an act of Congress approved July 2, 1862, and of acts supplementary thereto, and the United States Department of Agriculture.

NAVAL APPROPRIATION BILL.

Mr. PADGETT. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 14034, the naval appropriation bill.

The motion was agreed to.

The SPEAKER. The gentleman from Kentucky [Mr. JOHNSON] will take the chair.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 14034, the naval appropriation bill, with Mr. JOHNSON of Kentucky in the chair.

The CHAIRMAN. The Committee of the Whole House on the state of the Union will come to order for the consideration of the bill H. R. 14034, which the Clerk will report by title.

The Clerk read as follows:

A bill (H. R. 14034) making appropriations for the naval service for the fiscal year ending June 30, 1915, and for other purposes.

Mr. PADGETT. Mr. Chairman, last Friday there was an amendment offered, after line 5, page 33, which was passed over at the request of the gentleman from Illinois [Mr. MANN]. I wish to return to it.

Mr. MANN. I have no objection.

Mr. PADGETT. I will ask that that be reported and voted upon.

The CHAIRMAN. Without objection, the Clerk will report the amendment referred to.

The Clerk read as follows:

Amend, page 23, after line 5, by inserting as a separate paragraph the following:

"Naval station, Port Royal, S. C.: The Secretary of the Navy is hereby authorized to pay, from appropriations 'Contingent, Bureau of Yards and Docks,' for the fiscal year 1913, voucher in favor of the Vilter Manufacturing Co., for $4,937 for an ice-making and refrigerating plant for the naval disciplinary barracks, Port Royal, S. C., furnished by said company under contract dated April 23, 1913, with the Secretary of the Navy; and the accounting officers of the Treasury are hereby authorized and directed to allow in the accounts of Passed Assistant Paymaster D. W. Rose credit for payments amounting to $1,184 made by him to said company under contract dated November 5, 1913, from appropriations 'Contingent, Bureau of Yards and Docks,' for the fiscal year 1914, on account of said ice-making and refrigerating plant."

Mr. MADDEN. Mr. Chairman, I make a point of order against that. It is a claim, and it ought to go to the Committee on Claims.

The CHAIRMAN. A point of order is raised against the amendment.

Mr. PADGETT. I hope the gentleman from Illinois will reserve his point of order and let me explain it.

Mr. MADDEN. I will reserve it; yes.

The CHAIRMAN. The gentleman from Illinois [Mr. MADDEN] reserves the point of order.

Mr. PADGETT. I will say, Mr. Chairman, that this is out of the current appropriation, and the Secretary made the contract for this refrigerating plant at this place, and they have gone ahead with it. When the vouchers went in the Comptroller of the Treasury ruled that they could not be paid out of the fund, and this is to authorize the payment. We do not ask for any additional appropriation. It is simply to pass the vouchers. It does not carry any appropriation.

Mr. MADDEN. The Secretary of the Navy had not any right to make the contract until he had an appropriation, had he?

Mr. PADGETT. He had an appropriation and thought he had authority to make the contract out of the appropriation he had. It was a mistake as to whether or not he could make it out of the contingent appropriation.

Mr. MADDEN. Was it something that we had to have there?

Mr. PADGETT. Yes; an ice plant and refrigerating plant to take care of the enlisted men. This is not for an additional appropriation.

Mr. MADDEN. I have no disposition to embarrass the situation.

Mr. PADGETT. They want an authorization to make the payment under the contract which has already been let.

Mr. MADDEN. The only reason I rose at all, Mr. Chairman, is the fact that I believed the Secretary of the Navy had not any power to make the contract and that he exceeded his authority, and this would probably be a claim against the Government of the United States and ought to be sent to the Committee on Claims for consideration and allowance. But if the situation is such as to make it obvious that this ought to be done I am not going to object and do not make the point of order, Mr. Chairman.

The CHAIRMAN. Without objection, the point of order will be withdrawn.

There was no objection.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

Mr. PADGETT. Mr. Chairman, I ask unanimous consent to return to page 28, beginning with line 13, for the purpose of offering the provision that was contained in the original bill as reported with reference to the increase of the chaplains.

The CHAIRMAN. Is there objection?

Mr. STAFFORD. I object.

The CHAIRMAN. Objection is made by the gentleman from Wisconsin [Mr. STAFFORD]. The Clerk will read.

Mr. PADGETT. Mr. Chairman, I ask unanimous consent to return to page 38 for the purpose of offering an amendment, as a new paragraph, at the bottom of the page.

The CHAIRMAN. Is there objection?

Mr. MANN. Reserving the right to object, Mr. Chairman, let us know what it is.

Mr. PADGETT. Yes; I will state what it is and have it read for information.

The CHAIRMAN. Without objection, it will be read for information.

The Clerk read as follows:

At the bottom of page 38, as a separate paragraph, add the following:

"Toward the purchase and preparation of necessary sites, the purchase and erection of towers and buildings, and the purchase and installation of machinery and apparatus of high-power radio stations, to cost not to exceed $1,000,000, to be located as follows: One in the Isthmian Canal Zone, one on the California coast, one in the Hawaiian Islands, one in American Samoa, one on the Island of Guam, and one in the Philippine Islands, $400,000, to be available until expended."

The CHAIRMAN. Is there objection?

Mr. MANN. Reserving the right to object, I suppose the gentleman intends that it shall come in after line 24, page 38?

Mr. PADGETT. No. This is not the end of the bureau. The bureau continues on page 39 and following. This is in engineering, and a working appropriation. This would not be a part of that total. On page 39 the Steam Engineering Bureau continues.

Mr. MANN. The appropriation that is in the bill provides for the purchase of sites for radio stations.

Mr. PADGETT. That is shore stations here. That is not a part of the authorization made in 1912. There was an authorization in 1912, at a cost not to exceed $1,000,000, and carrying an appropriation of $400,000 for the establishment of the six radio stations named, beginning at the Isthmus, and one on the California coast, and then Hawaii, Samoa, Guam, and the Philippine Islands, and $400,000 was appropriated.

There was no appropriation in 1913. The department thought that the progress of the work would be such that they would not need it this year; but it has progressed more rapidly than they expected, and they sent in a supplemental estimate. I intended to offer it when we reached this, but overlooked it.

Mr. MANN. Are these stations all under construction now?

Mr. PADGETT. All, I believe, except the one in Guam. They think that perhaps with the development which is going on in radiography they can reach from Samoa to the Philippine Islands without the one at Guam.

Mr. MANN. How many of these stations are there?

Mr. PADGETT. Six.

Mr. MANN. They are to cost $1,000,000 altogether?

Mr. PADGETT. That is what is estimated. That is the authorization, and $400,000 has been appropriated heretofore.

Mr. MANN. Will they be able to complete the work with the $1,000,000?

Mr. PADGETT. They thought so.

Mr. MANN. Do they still think so.

Mr. PADGETT. That is what I understand from them; yes.

Mr. MADDEN. I make the point of order against that part of the paragraph which——

The CHAIRMAN. The Chair will state to the gentleman from Illinois that consent to return to the paragraph has not yet been given. Is there objection?

Mr. MADDEN. I reserve the right to object.

Mr. FOSTER. It seems to me there was a provision in the naval bill of two years ago——

Mr. PADGETT. In the bill of 1912.

Mr. FOSTER. In the bill of 1912 there was an authorization for this.

Mr. PADGETT. That is correct, and the limit was fixed at $1,000,000.

Mr. FOSTER. This is to provide the appropriation under that authorization?

Mr. PADGETT. Yes.

Mr. MURDOCK. How many wireless stations have we?

Mr. PADGETT. These stations belt the world. You may call them international stations. They reach from here to the Philippine Islands, and in connection with the telegraphic and cable facilities from there we will be able to communicate clear around the world. We have other stations at our different navy yards, but they are local.

Mr. MURDOCK. What is the station across the Potomac?

Mr. PADGETT. That is one of the international stations. That is a high-powered station. That is now in communication with the Eiffel Tower, in Paris.

Mr. MURDOCK. Does the gentleman know what that station costs?

Mr. PADGETT. I do not. That was not built under this authorization.

Mr. MURDOCK. What distinction does the gentleman make between high-power stations and others?

Mr. PADGETT. The high-power stations reach much farther in their communications. For instance, this high-power station over here at Arlington is in communication almost every night with the Eiffel Tower, in Paris, France. The low-powered stations reach out five or six hundred miles along the coast.

Mr. MURDOCK. Are these six proposed stations low-powered stations?

Mr. PADGETT. They are high-power stations. They have already been authorized, and they are in course of construction now, and this is just one of the appropriations to carry out that authorization. They were authorized in 1912, to cost not to exceed $1,000,000.

Mr. MURDOCK. Are we the only nation in the world which is putting this series of stations around the world?

Mr. PADGETT. I am not prepared to answer that. I do not know.

Mr. MURDOCK. Are those stations when constructed supposed to be absolutely for our use?

Mr. PADGETT. Yes; and under our control absolutely.

Mr. MURDOCK. The gentleman said this was a world series.

Mr. PADGETT. I mean in their scope of operations.

Mr. MURDOCK. Can we reach around the world with them after they are constructed?

Mr. PADGETT. I so understand; yes.

Mr. MURDOCK. I do not see how, if we merely go to the Philippines. What about the rest of the circuit of the world beyond that?

Mr. PADGETT. Guam and San Francisco and the Samoan Islands and the Philippine Islands would put us in communication with the continent of Asia. Here in Washington we are in communication with the Eiffel Tower in Paris, and there is

telegraphic and cable service from Paris to the east coast of Asia.

Mr. MURDOCK. But we would not be using our own apparatus wholly in going around the world.

Mr. PADGETT. With all these others. The Eiffel Tower would not be ours, but when we get to Samoa and the Philippine Islands we have taken the scope of the Pacific Ocean, and when we go across to Europe we have taken the scope of the Atlantic Ocean and could reach our shores.

Mr. MURDOCK. Does the gentleman know whether this station across the Potomac here is in actual use?

Mr. PADGETT. Oh, yes; it is in daily use.

Mr. MADDEN. Sure, it is.

Mr. PADGETT. They are using it now in correcting the longitude of the ocean and this country with reference to Europe, and they are in nightly communication with the Eiffel Tower in France.

Mr. MURDOCK. And it is in daily use?

Mr. PADGETT. Yes.

Mr. MURDOCK. I wish the gentleman could inform the House how much that station cost.

Mr. PADGETT. I will get it; but that was not built within this appropriation.

The CHAIRMAN. Is there objection to the request made by the gentleman to return to the paragraph indicated?

There was no objection.

The CHAIRMAN. The clerk will report the amendment.

The Clerk read as follows:

At the bottom of page 38 add as a separate paragraph the following——

Mr. PADGETT. Mr. Chairman, as it has just been read I ask that the further reading be dispensed with.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. MADDEN. Mr. Chairman, I reserve a point of order against that part of the paragraph which makes $400,000 immediately available.

Mr. PADGETT. No; it is not made immediately available, but it says, "to be available until expended." This is a public work, and it is necessary to make it available until expended.

Mr. MADDEN. Not to be immediately available?

Mr. PADGETT. No.

Mr. MADDEN. I should like to have the amendment read for information, Mr. Chairman.

The CHAIRMAN. The clerk will report the amendment.

The amendment was again read.

The CHAIRMAN. Without objection, the point of order is withdrawn.

There was no objection.

The amendment was agreed to.

The Clerk read as follows:

INCREASE OF THE NAVY.

That for the purpose of further increasing the Naval Establishment of the United States, the President is hereby authorized to have constructed two first-class battleships carrying as heavy armor and as powerful armament as any vessel of their class, to have the highest practicable speed and greatest desirable radius of action, and to cost, exclusive of armor and armament, not to exceed $7,800,000 each.

Mr. PADGETT. We have reached in the regular consideration of the bill the increase of the Navy, on page 53, and the first paragraph relates to the construction of battleships. I wish to submit a request for unanimous consent that there may be two hours' debate upon that paragraph and amendments which may be offered thereto, one hour of that to be controlled by the gentleman from Missouri [Mr. HENSLEY] and one hour by myself.

The CHAIRMAN. Is there objection?

Mr. CALDER. Reserving the right to object, will the gentleman include in that request any amendment that may be offered to this paragraph relative to building one of these ships in the navy yard?

Mr. PADGETT. No; that will be excluded.

Mr. CALDER. Will the gentleman see that I have five minutes out of that hour?

Mr. PADGETT. Yes.

Mr. WITHERSPOON. Reserving the right to object, I want to ask the gentleman if he will not agree to give our side 1 hour and 15 minutes. An hour has been allotted out to members of the committee, and the gentleman from Illinois [Mr. BUCHANAN] wants 10 minutes. I should like 5 minutes myself.

Mr. PADGETT. Mr. Chairman, I will agree to 1 hour and 10 minutes on a side.

The CHAIRMAN. Is there objection?

Mr. FOWLER. Mr. Chairman, reserving the right to object, I desire to ask the chairman of the committee if his request is broad enough to include all amendments to the paragraph?

Mr. PADGETT. It includes all amendments to the paragraph relating to battleships except the question of the construction of one in the navy yard.

Mr. FOWLER. I desire to offer an amendment to this paragraph as a limitation on the expenditure for the purpose of securing an investigation as to the price and quality of the armor and armament and other materials furnished the Government. I would like to know from the gentleman how much time can be devoted to this amendment.

Mr. PADGETT. This paragraph is exclusive of armor and armament. The gentleman could offer his amendment to a subsequent paragraph. This authorizes the construction of battleships, but expressly states that it is exclusive of armor and armament.

Mr. FOWLER. What provision in the bill provides for armor and armament?

Mr. PADGETT. On page 55 there is a provision relating to the purchase of armor and armament.

Mr. FOWLER. How much is appropriated in that provision?

Mr. PADGETT. Fourteen million eight hundred and seventy-seven thousand five hundred dollars.

The CHAIRMAN. Is there objection?

Mr. GOLDFOGLE. Reserving the right to object I want to ask the chairman of the committee whether his limit of debate contemplates taking in the discussion upon the propositions which will undoubtedly be offered to require the building of one battleship at a Government yard.

Mr. PADGETT. I just stated to the gentleman's colleague that it would not; that there would be an additional discussion on that amendment when it comes up.

The CHAIRMAN. The request of the gentleman from Tennessee is for unanimous consent that debate on this paragraph shall be limited to 2 hours and 20 minutes—1 hour and 10 minutes on each side; 1 hour and 10 minutes to be controlled by the gentleman from Missouri [Mr. HENSLEY] and 1 hour and 10 minutes by himself.

Mr. MANN. With leave to offer amendments.

Mr. PADGETT. With the right to anybody to offer amendment during that time, to be voted on after the conclusion of the debate.

Mr. MANN. The debate is not to cut off amendments?

Mr. PADGETT. No; they can offer amendments, and they will be debatable during the two hours and then voted upon after the debate is closed.

The CHAIRMAN. Is there objection?

There was no objection.

The CHAIRMAN. General debate is limited to 2 hours and 20 minutes, one half to be controlled by the gentleman from Missouri [Mr. HENSLEY] and the other half by the gentleman from Tennessee [Mr. PADGETT]. The Clerk will read the paragraph.

The Clerk read as follows:

INCREASE OF THE NAVY.

That for the purpose of further increasing the Naval Establishment of the United States, the President is hereby authorized to have constructed two first-class battleships carrying as heavy armor and as powerful armament as any vessel of their class, to have the highest practicable speed and greatest desirable radius of action, and to cost, exclusive of armor and armament, not to exceed $7,800,000 each.

Mr. WITHERSPOON rose.

Mr. MAHER. Mr. Chairman, I desire to offer an amendment to the paragraph.

The CHAIRMAN. The gentleman from New York is recognized.

Mr. HENSLEY. Mr. Chairman, I raise the point of order that the gentleman from Mississippi, a member of the committee, was on his feet.

The CHAIRMAN. The Chair did not see the gentleman from Mississippi, and the gentleman, being a member of the committee, is recognized. The Chair will recognize the gentleman from New York later.

Mr. WITHERSPOON. Mr. Chairman, I offer an amendment to strike out the paragraph.

The Clerk read as follows:

Amend, on page 53, by striking out the paragraph, lines 6 to 12, inclusive.

The CHAIRMAN. The Chair takes it for granted that these amendments will be presented and voted upon after the general debate.

Mr. BARTLETT. Mr. Chairman, a motion to strike out the paragraph can not be considered until the paragraph itself has been perfected, if there are any efforts to do that.

The CHAIRMAN. The Chair was just saying that he took it for granted that the amendments would be offered for in-

formation and considered pending, but not to be acted upon until after the expiration of the general debate.

Mr. MAHER. Mr. Chairman, now I offer my amendment.

Mr. MANN. I suggest to the gentleman from Tennessee that he ask unanimous consent that the amendments may be offered and considered pending.

Mr. PADGETT. Mr. Chairman, I ask unanimous consent that all amendments may be offered now and to be pending.

The CHAIRMAN. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

The CHAIRMAN. The Clerk will report the amendment of the gentleman from New York [Mr. MAHER].

The Clerk read as follows:

Page 53, line 12, after the word "each," insert the following: "At least one of the said battleships hereby authorized shall be built and constructed at a Government yard."

Mr. STAFFORD. Mr. Chairman, do I understand that the amendments are being read for information?

The CHAIRMAN. They are read for information and pending.

Mr. MANN. I reserve a point of order on the amendment offered by the gentleman from New York.

Mr. BUCHANAN of Illinois. Mr. Chairman, I have an amendment that I would like to have read and pending.

The Clerk read as follows:

Page 53, line 8, after the word "construct" strike out the word "two" and insert "one."

Mr. MOORE. Mr. Chairman, may I inquire before the gentleman from Tennessee begins his speech, whether there will be an opportunity for argument on the amendment offered by the gentleman from New York [Mr. MAHER] at the end of the 2 hours and 20 minutes' debate?

Mr. PADGETT. It was stated that there would be argument on that proposition after this was disposed of.

Mr. CALDER. After the two-battleship proposition is disposed of.

Mr. PADGETT. Mr. Chairman, I will yield 10 minutes to the gentleman from Georgia [Mr. TRIBBLE], a member of the committee.

Mr. TRIBBLE. Mr. Chairman, on May 24, 1912, I stated on the floor of this House:

I stand for a fighting Navy and an efficient Navy and a sea Navy, and not a land Navy. This bill carries too much money and nothing to show for it.

On February 24, 1913, I said again:

I believe in the policy of battleship construction sufficient for our country's defense. I believe we should keep abreast of the times and keep our Navy up to date. Put the old battleships in reserve and build new, up-to-date battleships.

I then undertook to show that the bill then before the House carried $15,000,000 more than it should. The bill now before the House shows my position then correct, as the bill with one battleship is $15,000,000 less.

The bill of 1912 provided for one battleship and six destroyers. The bill for 1913 carried an appropraition of $140,000,000. The present bill before this House carries an appropriation of $139,000,000. The bill for 1913 carried one battleship. This bill, which is less, provides for two battleships, thus enabling us to build two battleships with less money and providing amply for all expenses.

I stated in 1913 that the bill carried too much money and nothing to show for it, and that I approved of battleship construction. This bill carrying two battleships and less than the bill of 1913 I am going to support. [Applause.]

I have frequently advocated on the floor of this House a good Navy. I am one of the peace advocates, Mr. Chairman, and I stood here on the floor of this House and cast my vote to go into Mexico with tears in my eyes. I did not want to send our boys there, and I know that the President of the United States did not want to send our boys there, and I know that the Secretary of State did not want to send our boys there. President Wilson and Secretary Bryan have been the champions of peace in this country for 25 years, and yet these great apostles of peace have shed American blood on a foreign soil. The situation there is such that they could not help it.

I am here to say to you, Mr. Chairman and gentlemen of this House, that we are likely to become embroiled in war any time, and war comes at a time when we least expect it. My State has no navy yard; I have no personal interest to serve locally for my State by advocating an adequate Navy. My action is prompted by a patriotic desire to furnish protection in case of war to every American citizen, looking to the interest and the welfare of our common country. I also hope to avoid war in being prepared to defend the flag that floats over American citizens in all our possessions. I say to you, gentlemen, that the State of Georgia is patriotic, and I believe the citizens of my district desire me to vote for two battleships. Mr. Chairman, I say to you that the State of Georgia is patriotic, and I am prepared to prove that by the facts. When the Spanish-American War broke out the youths of my district and the youths of the State of Georgia enlisted, and volunteered side by side with the middle-aged and old, and went to the front. When that noble band was drafted out the records will show that Georgia stands second in the number of soldiers who went to the front in the defense of our country on foreign soil in Cuba. [Applause.] First of all came the State of Tennessee, and by the side of her stood Georgia, and I am proud of that record. Mr. Chairman, we can not avoid wars. The God of Heaven approves peace; it is noble, religious, and patriotic to work, talk, and strive for peace; but nations are composed of human beings, and we have not yet reached that high state of civilization when men have ceased to fight. Future generations will look back upon the Civil War period and wonder why it was that this war could not be avoided. We look back upon the records of that war and we are absolutely appalled. Twenty-eight thousand men on the Federal side fell at the Battle of Chancellorsville. I am not informed as to the number who fell on the Confederate side, but it was great—probably 20,000. You will be surprised to know that 559,328 men lost their lives in the Civil War on the Federal side—a half million of men. The number of Confederates is indefinite, but sufficient to say the loss was great. If we can avoid the horrible consequences of war by being prepared with an adequate Navy, I feel that my responsibility on the Naval Committee authorizes me to aid in giving the people such increase as the facts authorize. We do know the era of perpetual peace has not arrived, and therefore we must prepare for war. I have seen on this floor men who vote against an increase of the Navy stand here and call upon Members of this House to go to war with foreign countries. You have seen it, too.

I do not criticize them, Mr. Chairman, but peace advocates frequently bring on a war. It is not always the fighting men and the adequate-Navy men who are in favor of war and bring on war. We have our complications on the Pacific coast with oriental people. We have to deal with a race problem there, and I have seen men upon the floor of this House assert that this Government should drive out the Japanese and establish white supremacy. Now, Mr. Chairman, that is not so easy to do. When you begin to check the invasion of the Japanese peril you will need battleships and not speech making, and sometimes that kind of talk brings on war. Mr. Chairman, it takes three years to build a battleship. Suppose we stop building battleships; suppose we had stopped building battleships three or four years ago. Either one of several foreign nations could have driven us from the sea in short order in case such nation had questioned the Monroe doctrine when President Wilson sent the fleet to Mexico. Navies can not be bought from foreign countries when hostilities begin. Germany smarts under our application of the Monroe doctrine, because her citizens do the greater part of commercial business with Mexico, and Central and South America. The Germany Navy is superior to the American Navy, and, unless we keep building, Japan and France will both be superior to the American Navy in a very short while.

Where would we stand if we had quit building battleships six years ago? The policy up to two years ago has been to build two or three battleships each year. The last two years we have been building only one battleship. Gentlemen say that we have sufficient battleships now to meet any nation upon the seas except the British Empire. Suppose that is true; suppose we quit building battleships and we should become embroiled with foreign trouble three, four, or five years from now, how would our battleships compare with battleships of foreign countries who are continuing to build? It is absolutely preposterous to stand on the floor of this House and say that the battleships of 1898 can combat the battleships that are being built in 1914. Why, it is child's play. The *Oregon* was great and good in its day; it was a monster; it was the greatest vessel then built. The Navy of 1898 was adequate and sent the enemy to the bottom of the sea. The *Oregon*, then new, was the star performer; but, Mr. Chairman and gentlemen, the battleship *Oregon* would now be as impotent as an infant in the hands of a grown man placed at the mercy of a battleship of modern construction. [Applause.]

Mr. Chairman, in case of war a weak Navy would be wiped from the sea, the Panama Canal would be captured, the Philippine Islands would fall into the hands of the enemy, and our country be subject to invasion. How could we retake our possessions? We could not buy a navy. Our wealth would not help us to buy. So we would be forced to a humiliating settlement

or wait several years to build a Navy sufficient to drive away the foreign foe.

Mr. Chairman, as long as we have foreign possessions, maintain the Monroe doctrine, and continue to be a world power in commerce and trade, it seems to me we are forced to support an adequate Navy. Therefore, as we have only built two battleships in two years, I shall vote for two this year. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. TRIBBLE. I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Georgia asks unanimous consent to extend his remarks in the RECORD. Is there objection. [After a pause.] The Chair hears none.

Mr. HENSLEY. Mr. Chairman, I yield five minutes to the gentleman from Indiana [Mr. GRAY].

Mr. GRAY. Mr. Chairman, a few days ago, when I made the statement in this House that the completion of the Panama Canal would double the power and efficiency of the Navy, I was taken by surprise on having that statement refuted and the claim made that instead of the completion of the Panama Canal increasing our power it would in fact "increase our weakness." The Panama Canal was built under the authority of the War Department, and the military and naval experts supported that department on the grounds that it would be increasing our military and naval power. The War Department acted upon that assurance, the Congress acted upon that assurance, all public officials at that time acted upon that assurance, the President of the United States acted upon that assurance. Mr. Taft was Secretary of War a part of the time during the construction of the canal; he was President part of the time; and I want to quote him as one of the authorities, both as Secretary of War and as President, upon which I made my statement. In 1908, when Mr. Taft was Secretary of War, the head of the department under which the canal was constructed, and, I assume, speaking advisedly, he said, on July 28, 1908, in an address at Cincinnati, Ohio:

> It has created such an organization that in six years certainly, and probably in less, the Atlantic and Pacific will be united, to the everlasting benefit of the world's commerce, and the effectiveness of our Navy will be doubled.

Later, when President of the United States, and, speaking as President upon proper and official assurance gained while acting in the authority of two high offices, on October 5, 1909, in an address at Fairmount banquet, San Francisco, Cal., he said:

> But I want to call attention to the fact that if in two or three or five years we have a Panama Canal it in itself will double the efficiency of our Navy.

I think, Mr. Chairman, I was warranted in my statement that I made at that time. But I find there is a difference between then and now. Then the Panama Canal was to double our naval power and efficiency. Now it will "double our weakness." Then the Panama Canal was to be a great military asset, and now it is a great naval liability. Then the Panama Canal was to dispense with any further increase in the Navy. Now it is made the sole grounds for an imperative naval increase. There is a difference between then and now. The Navy was used at that time to promote the canal, and now the canal is used to further promote the increase of the Navy.

But, Mr. Chairman, this is certainly a day of revelations and surprises. Yesterday peace was only a dream and international agreement only a phantom. We are not only assured of possibilities of peace to-day by the advocates of a big Navy, but we are assured of the success of international agreement. They tell us the Panama Canal is in great danger from Great Britain, but the honorable Secretary of the Navy has told us, at page 627 of the committee hearings, that England could only send half of her Navy here; that she must keep the rest of it in the North Sea. But our friend from Alabama [Mr. HOBSON] goes still further and assures us that England would not fight us at all, or, using his exact language, "I do not contemplate our ever having a war with England." So we have a new assurance of peace, and certainly we will not have to increase our Navy to protect the canal from England. The Secretary of the Navy, speaking further, has told us that Germany could only send half of her Navy against the United States, as a part must be kept near her shores. But the gentleman from Alabama [Mr. HOBSON] says that Germany would secure an understanding with other nations not to fight her while she fought the United States, and then she would bring all her Navy here to destroy the canal. I would not advise any of our friends to hold their breath until Germany secured an agreement with powers friendly to the United States not to fight her while she destroyed our canal. If this is all these men have to offer, we are safe from England and Germany.

But, Mr. Chairman, there is still one more nation waiting to destroy the canal and against which a further increase of our Navy is urged, and that is Japan. The United States has 39 battleships. Japan has 19 and is 10,000 miles away. We have had no advice that Japan could be successful in securing by international agreement with Russia and China an understanding not to attack her while she was destroying our canal, and therefore we must assume that Japan could not withdraw more than one-half of her navy, or 10 battleships, for use in American waters. Now, Japan, if bent on destroying our canal, would come with her 10 ships 10,000 miles from her base of supplies and engage all our 39 ships at the canal, all our fortifications and coast defenses, against all our mines planted about the mouth and entrance to the canal, and against all our torpedo boats, and, plowing through and over and past them all, would enter and destroy the canal. This would indeed be serious if our friends were in earnest, but we must be charitable and treat it as a jest. [Applause.]

Mr. PADGETT. Mr. Chairman, I yield five minutes to the gentleman from Kansas [Mr. MURDOCK].

Mr. MURDOCK. Mr. Chairman, I have always stood for a large Navy, and my stand upon the question has been based on my belief in the needs of the country. But I have always had considerable sympathy with those Members of the House who from year to year have attacked our method of building our battleships and have protested particularly against the compulsion put upon Congress in the matter of monopoly's price for armor plate. In this connection, I want to pay a word of tribute to the present Secretary of the Navy, Mr. Daniels. He first attracted my attention to his personality and gained my esteem by a show of regard for the rights of enlisted men in the Navy. He further appealed to me, latterly, when he eliminated with a fine sense of equality the officers' wine mess. And, in my observation, from the beginning of his term he has made an unusual effort toward economy. During the hearings before the Naval Committee—I think it was in January—the present Secretary gave some rather remarkable testimony, and if I can get it in in my time I am going to read it into the RECORD, because it has not been done before. Mr. Daniels, in answering a question, said:

> In nearly everything we buy for the Navy—that is, the big items—the price has been fixed by monopoly.

And further along he said:

> I was in office but a short time when I was troubled because of the fact that we had no competition whenever we came to buy the very costly things needed in the Navy. The last Congress authorized the building of battleship *No. 39*, and when we advertised for bids the three companies that make armor plate made an identical bid. I requested the representatives of the companies to come to Washington, and told them that the law required them to make affidavit that they were not in any combination or in any agreement to keep up the price, and I asked them if they were advertent of that law. They said they were, and that they had not had any conference before making their identical bids. I told them that I was "from Missouri," and that when three companies, on contracts amounting to very large sums, made identical bids to a cent, that the burden of proof, to my mind, was on them to show that they had not either talked about it or that it was not a case of telepathy.
>
> I canceled all the bids and refused to award any contract, and told them that we must have competition. Well, the matter went on. We found that going into this battleship there were certain things—like bolts, turbine rotor drums, steel plates, angle irons, and some iron and steel materials—which were made by smaller companies that could not make armor plate. So we advertised, divided the material that was to go into the battleship, and in that way we secured competition on everything except armor plate. By reason of that competition we bought the specially treated steel for battleship *No. 39* for $378,261 less than we had paid for the specially treated steel for battleship *No. 34*.

While the department saved on this lesser material, however, the three companies which make armor plate held the Government up on armor plate. Afterwards the representatives of the three companies were called before the Secretary of the Navy, and finally one of them was awarded the contract on armor plate, but with the understanding that the company securing the contract could sublet the work. And the work was sublet to the two other companies. So the combination remained. So this great Government was held by the throat by this monopoly.

Now, here is a question that I would like to ask in all seriousness: The Secretary of the Navy sits at the same counsel table with the Attorney General of the United States. Here is a straight-out violation of the law; here is a combination in restraint of trade; here is a monopoly; here is a witness of high integrity, of entire credibility, who testifies that this is a monopoly; here is a great Government which is the victim of that monopoly; what is the matter with the Attorney General of the United States? [Applause.] Why does he sit silent and permit this Government to suffer this wrong? Why does he not get busy? I ask the question in a humble spirit of inquiry. I will get no answer from any source. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. HENSLEY. Mr. Chairman, I yield 25 minutes to the gentleman from Texas [Mr. HARDY].

Mr. HARDY. Mr. Chairman, in the position I assume now I am following the teaching of the great Democratic leaders we have followed for the last five or six years. In opposition to the two-battleship program I am following the leadership of CHAMP CLARK, JOHN SHARP WILLIAMS, and OSCAR UNDERWOOD, and, until recently, of the chairman of the Naval Affairs Committee, Mr. PADGETT.

But I desire to submit the reasons conclusive to my mind for my earnest opposition to the naval bill reported by the Naval Affairs Committee authorizing two more dreadnaughts.

First. These two warships begin a Democratic program which means for new battleships an initial increase in expenditure of about $34,000,000 for their construction, and the same amount for each of the remaining three years of this administration, making in all $136,000,000 for new dreadnaught construction alone, and when built each of these new ships will cost for maintenance $1,000,000 per annum, making altogether a maintenance increase of $8,000,000 per annum.

Should the present administration be so fortunate as to be continued in office eight years, and continue this two-dreadnaughts-per-year program, we would build in the eight years 16 new dreadnaughts. The cost of these big ships is mounting, and the cost of maintenance is mounting. With such a program we are heading toward two billions on the Navy in eight years.

Second. All parties agree that our present Navy is top heavy—that is, largely useless for want of colliers, submarines, torpedo boats, and other auxilliary craft, for which this bill properly carries many millions of dollars, and future bills must carry many more if our ships now built and building or hereafter authorized are to be available.

Third. It is undisputed that we now have more ships in our Navy than we can furnish with officers or men. I think we should at least let our battleship program halt till we catch up with it.

Fourth. There is a strongly controverted, all-important question, to wit, whether the future long-range naval gun will use the armor-piercing or the explosive shell. If the former, then the heaviest armor to resist the piercing shell is the greatest desideration. If the latter—that is, the explosive shell—shall prove effective at the longer range, then heavy armor is useless, perhaps even detrimental, since it would only retard the speed of the vessel and cause it to sink more quickly when its bottom or side was blown in from explosion against its side or under the water within 40 or 60 feet of it.

The experts are about evenly divided on the question, but the evidence, from experiments, seems to me to be with the explosive shells. Nobody, I think, really knows which side of this controversy is right; but it is sure that in future naval battles many dreadnaughts will be sunk by explosive shells, and it is probable that before the vessels we now authorize are afloat they will be more dangerous to their own crew than to an enemy, having the latest and longest range guns and explosive shells. In 10 years speed and lightness may be worth more than size and heavy armor, and these big ships only be fit for scrap.

Fifth. The explosive shell is not the only enemy of the big ship. Submarines and torpedo boats are coming more and more to the front, and if they only reasonably meet the belief and expectations of the ablest naval experts the big ship is doomed. Upon the fatal effectiveness of the submarine experts agree. England and Germany are spending more and more for the submarine. England is in the main building smaller ships and Germany is striving more for speed and lightness than for impenetrable armor. She seems to be turning to high-speed, thinly armored battle cruisers with long-range guns. The scientist and expert may go into the details and technicalities of the question. I have given its sum up in plain terms. But I will call attention to some extracts.

[From the Army and Navy Register, Washington, D. C., April 11, 1914.]

THE PASSING OF THE DREADNAUGHT.

[From London Truth.]

"The displacements of the latest British battleships," said Mr. Churchill in reply to a question put to him last week, "are considerably smaller than those of almost all the latest battleships constructing for foreign powers whose dimensions are published." This is true even of British ships already completed. It is still more of the very last ships ordered.

* * * * * * *

When the British admiralty suddenly halts, faces about, and starts retracing its steps, it is evident that something big is happening or is expected to happen.

* * * * * * *

The truth is that the development of submarine and aerial navigation and of wireless telegraphy, the enormous increase in the effective range of the torpedo, and the final victory of the gun over armor (which is now a pretty generally accepted fact) have impressed all who look ahead with the conviction that we are on the eve of a complete revolution in naval warfare, in which the battleship is not unlikely to disappear altogether. It is becoming more and more difficult to believe that the issue of any naval war will be determined in future by engagements between heavily armed ships on the surface of the sea. But I believe it to be the accepted doctrine in the best-informed naval circles that, as things are at present, no battleship dare venture into waters in which submarines are known to be lurking.

Against these craft a battleship is absolutely defenseless, unless when she is lying at anchor with torpedo nets out, and at the present moment no one can see how she ever is to be defended.

* * * * * * *

In the face of all this it is not necessary to inquire very closely what happened at last year's naval maneuvers. * * * We see that, immediately on top of this, the Admiralty have decided to reduce the size of their next batch of battleships and to build more powerful submarines, with a greater speed and an increased radius of action. We can draw our own conclusions. It is not merely that a new type of battleship is once more going to supersede the old, but that a new element is coming into naval warfare which threatens to supersede the battleship herself.

* * * * * * *

The same deadly weapon which would make it impracticable for a foreign power to dispatch an army to this country may make it a very risky business for us to send an army out of it; but even that may not be an unmixed evil. The next thing we can see for certain is *the unwisdom of spending any more money than we can possibly help upon battle fleets until we are better assured than we are at present that it will ever be possible for such craft to strike a blow against an enemy well provided with submarines.*

* * * * * * *

What a satire is all this upon the heated controversies and agitations that have raged round the problem of national defense during the last few years, upon all the squandering of money that they have led to, all the international rivalries and animosities! While the naval alarmists are still thinking in terms of dreadnaughts and drawing up their calculations of dreadnaughts afloat and unborn generations of dreadnaughts to come the brief day of the dreadnaught has begun to wane before our eyes. While military agitators are demonstrating on platforms and in the press our powerlessness to deal with the foreign foe when he lands our seamen have forged new weapons undreamed of by Drake or Nelson, which are already making the transport of a foreign army to the British coast an enterprise that no soldier in his senses would think of.

[From the Times, London, March 18, 1914.]

SUBMARINE PROGRAM.

(Extract from statement of Winston Churchill on the Navy estimates made in the House of Commons Mar. 17, 1914.)

The submarine program of the year is large enough, in view of our effective lead in this type of vessel, but further effort will be required in the near future on account of what is going on elsewhere; £1,150,000 is taken for submarines, and the house very properly does not desire to know how many craft will be built for that money. That would unduly reveal the design. We are increasingly convinced of the power of the submarine and the decisive part which this weapon, aided perhaps in some respect by the seaplane, may play in the naval warfare of the future. It is sufficient at the moment to say that the whole system of naval architecture and the methods of computing naval strength are brought under review by the evergrowing power, radius, and seaworthiness of the submarine and by the increasing range and accuracy of its fatal torpedoes.

Mr. Chairman, the whole testimony before the Naval Affairs Committee, I believe, corroborates and confirms every statement and conclusion I have just quoted, and I am through with this phase of the question, except to say that of course our great dreadnaughts will be effective against feeble, defenseless countries like Mexico; and if that is what our Navy is for, God pity us.

Sixth. We have had an earnest discussion about the cost of armor plate. The Secretary of the Navy is convinced and I think the gentleman from Tennessee is convinced that the trusts, in the matter of armor plate and equipment, have been holding up the Government. In every part of the equipment except the armor plate our present Secretary has been able to break into the combination and secure some competition, resulting in the saving of about $800,000 on two vessels; but on the armor plate there are but three firms of builders, and there is no competition. They make the Government pay all they can extort. They first asked $464 per ton, all bids being the same, and when the Secretary rejected all their bids they came down together to $450 per ton. The combination is world-wide. Under these conditions our Government experts and officials have been investigating the actual cost of making armor plate. The very able member of the committee, Mr. WITHERSPOON, tells us that the Government can itself make the armor at $279 per ton, while the chairman, Mr. PADGETT, brings in his proof to show that it would cost the Government to make it from $279 to $400 per ton, according to the size of the Government plant and the amount made per annum. If we had a plant to make 20,000 tons a year, and made that much, he says it would cost $279 per ton, while if we had a plant to make 10,000 tons per year, and made that much, it would cost $314 per ton, and if we had a plant to make 5,000 tons per year, and made that much, it would cost us $354 per ton.

Now, I am going to take the chairman's figures. Each battleship calls for about 8,000 tons of armor plate. If we must build two, that would call for 16,000 tons per year, and if we place its cost between that of the cost of the 10,000 and 20,000

ton plant, at, say, $300 per ton, we would save on those two ships $2,400,000. This is the best estimate our Government officials or the chairman [Mr. PADGETT], who all favor two battleships, can make. But the chairman says they are not certain about it. The Secretary of the Navy declared that he would only submit to the trust price because he felt compelled to, because we were in their power and must submit to be held up. The Secretary advised and the committee have provided in this bill for a still further investigation of this whole cost matter, and I am persuaded it will turn out like our investigation of powder cost when the Powder Trust held us up. I think it will turn out that the half has not been told. We built our powder plant and the trust powder price tumbled from 85 to 53 cents per pound, while the powder made in the Government plant costs less than 40 cents. Mr. Chairman, I do not like to be held up, and the fact that the robber—excuse the term—is patriotic does not make me like it any better. [Applause.]

Since we are now building five big ships, using the trust's armor plate, at the trust's prices, I for one wish to contract with them for no more; to build no more till we can build our own plant and make our own armor plate. By the time we can complete the five ships now authorized our plant will be ready to operate, and what we build then will not be induced by the persuasion and agitation of big corporations, whose profits prompt them to drive the world to bankruptcy in war preparations. Why, Mr. Chairman, the gentleman from Alabama [Mr. HOBSON] claims that the United States will win in this battleship fury by building until the other nations, not so rich as we, will be unable to build; that is, will be bankrupt. I want to make it so no man will be interested in making war tools and making war.

Seventh. Mr. Chairman, I have a better argument than I have made or am going to make or can make against this two-dreadnaught-battleship program. That better argument is the speech the gentleman from Tennessee [Mr. PADGETT] made in this House on March 31, 1910. I do not insert it, because it is already in the RECORD, and those who wish may read it. But I want to use Mr. PADGETT then against Mr. PADGETT now, not for the argument ad hominem but because he is now the bulwark of the two-battleship program.

Then he said:

Standing before you this afternoon and measuring my words with the facts before me—and in my judgment I can substantiate them and make them good—I say there is no necessity either from the standpoint of our domestic conditions or our international relations for the construction each year of two battleships. The construction of one battleship will not only maintain the efficiency and the adequacy of the American Navy, but it will add a proper increase to the development of the American Navy.

And he proceeded to make good with a splendid array of facts and arguments. He continued:

Now let me call your attention, if you please, to some tables. Japan and Russia have been held up before the country and before this Congress. I have taken the pains to analyze the situation with reference to them, and I have the documents here. Let us make a comparison between Japan and the United States first.

He then proceeded to make the comparison, giving the items of naval strength of each nation, and after a clear demonstration he concluded with this short sentence:

If we had our fleet divided and put one-half in the Pacific, we would have more there than Japan has.

Then he denounced the war scare as—

A nightmare to stimulate the growth of naval hysteria in this country in order to foster the propaganda that I believe is set afoot and maintained by the beneficiary interests in this country that profit out of the spending of thirty or forty million dollars a year out of the naval program of this country.

And he related this incident:

I will not call names, but one of the admirals came before our committee and asked that the doors might be closed, that the stenographers might be excluded, and that he might speak to the committee in executive session. This was some years ago, and he proceeded with bated breath to tell us of the nearness of impending disaster and conflict with Germany, and he dilated upon that question at length, and I sat and listened to it for quite a while, and after he had proceeded for some time I could not escape the temptation, and when I had the opportunity I said to him, "Admiral, do you think this will take place and they can catch us before we can get home?" [Laughter.]

Mr. WILSON of Illinois. What did he say?

Mr. PADGETT. He smiled.

Then he declared, by quoting from Mr. Fairbanks:

America is at peace with the world. There is nothing that can mar the peaceful relations of the United States to the other nations of the world except our own inconceivable folly.

Then Mr. PADGETT was not scared. Oh, that he were not scared now! Possibly our trouble with Mexico has scared him, but that trouble will be long past before the ships we authorize now can be built.

Then he made this statement:

Now I desire to invite your attention, if you please, to another phase of this question. We have at the present time 2,824 naval officers of all grades. We have an authorized enlistment of 42,000 enlisted men. You will find in the hearings of Capt. Usher, who appeared before the committee in behalf of the Bureau of Navigation, in answer to my question, a tabulated statement showing the number of men necessary and required to man our present complement of ships on a peace basis and on a war basis. On a peace basis it requires 3,652 officers and 60,902 men, or, if you please, a shortage of 828 officers and 18,902 men. On a war basis, to fit out and man the ships we now have, it would require 3,890 officers and 72,281 men.

And further on he said:

Now I want to call your attention to this fact, that Admiral Pillsbury, Chief of the Bureau of Navigation, in his annual report in 1908, said that it takes on an average six years to train a man-of-war's man; so that it takes twice as long to train and to qualify a man to operate the ship as it does to build the battleship.

In these statements he seems to me to have demonstrated that we have not the men or officers to make available the ships we now have, and could not get them in less than five or six years; then why build more?

But he continued, quoting from the Secretary of the Navy:

We are tying up the big cruisers, and transferring the men from the cruisers to the new battleships.

And quoting from President Roosevelt:

No fighting ship of the first class should ever be laid up save for necessary repairs.

And from Mr. Roosevelt further:

To put a new and untrained crew upon the most powerful battleship and send it out to meet a formidable enemy is not only to invite, but to insure, disaster and disgrace. If the officers and men are not thoroughly skilled in and have not been thoroughly trained to their duties, it would be far better to keep the ships in port during hostilities than to send them against a formidable opponent, for the result could only be that they would be either sunk or captured.

All this seemed to me then, and still seems, good cause for suspending dreadnaught building.

Surely, our Navy is far stronger now than Japan's. If it is not stronger, it is at least very close to that of Germany; and there is no war or rumor of war with either of those nations. There is no more likelihood of war with Germany that there was when the timid admiral asked Mr. PADGETT's committee to close its doors, so he could a tale unfold. Our Navy is stronger now than it ever has been. I am no more scared now than Mr. PADGETT was in 1910.

Then the gentleman showed our superiority over Germany as clearly as he did our superiority over Japan. I can not quote his whole speech, though it is worth quoting. Is it any wonder, then, that the gentleman from Missouri [Mr. HENSLEY] here the other day exclaimed, "I beseech the gentleman to tell me why he has changed." In reply the gentleman from Tennessee said:

Let me say, gentlemen, that the chairman has not changed his purposes or his ideas. In the preparation of this bill I had before me the same general purposes, wisely and judiciously, patriotically and honestly to administer the trust committed to me, bearing in mind the environments by which we were surrounded, the circumstances in which we were placed, and the developments that have taken place, to deal with the honor, the welfare, and the protection of the country, and a wise distribution of the people's money that I had in 1910.

It was a round mouthful of words, but was it more? He also said that he had voted to increase the post-office expense and he had voted for certain other increased expenditures which seemed to me to have no relation to the Navy. "Times change," he said, "and we change with them." Most profound. But does it satisfy? Does it answer any or all of his speech of 1910? Does it show where he was mistaken or wrong in 1910? He attacks Mr. WITHERSPOON's arguments, but he does not answer his own. The nearest specific attempt he makes is the following (see CONGRESSIONAL RECORD, Apr. 25, 1914, p. 7269):

My friend, Mr. HENSLEY, read a portion of my speech that I made in 1910. Let me read it:

"The Reichstag a few years ago fixed by law a definite program authorizing the construction of 16 battleships between 1907 and 1917. Up to the present time, of those 16 she has 8 building that constitute a part of her 30, so that in 1917, if she builds the other 8, she will have 38 battleships, and if we only build 1 a year from now until 1917, added to the 33 we have got, we will have 40 first-class battleships as against her 38."

What are the facts? I said conditions change and vary. At the present time, counting her battleships and dreadnaughts because they are simply different types of the same thing, and the battle cruisers and the *Worth* and the *Brandenburg* that have been eliminated from the fighting line, she has 48 to-day. What has the United States, including, if you please, the 3 that have been eliminated and they have been complaining about? We have 39—

That brief paragraph is substantially, it seems to me, the only answer he gives to Mr. HENSLEY's request for the reasons of his conversion—the only answer he now makes to his great speech of 1910. It seems to me remarkable. If, as he stated in 1910, Germany then had 22 battleships built and 8 building and now has 48 battleships, she must have completed and built in the 4 years intervening 26 battleships, or 6½ ships per year, while her program, as he then stated, was 16 ships in 10 years. Then he told us Germany would have 38 battleships in 1917; now he tells us she has 48 battleships in 1914. Which one of these speeches is correct? When did Germany change her program?

Has Germany or even England ever averaged 6½ battleships per annum for four years in succession?

In passing let me say that against Mr. PADGETT's urgent eloquence we built two battleships in 1910 and two in 1911, so we are two ships ahead of the program he then said would keep us ahead of Germany up to 1917.

Mr. Chairman, did Germany have any such program as stated by Mr. PADGETT in 1910? If so, has she changed it, and when, and how? Was he mistaken in 1910? Is he mistaken now? But supposing the chairman's present statement that Germany now has 48 and we 39 battleships, and the inference he leaves to be drawn that she is stronger than we in proportion as she has more battleships is correct. What difference would that have made to the gentleman in 1910? At that time "he was not afraid"; "the invader was not coming in his day or his children's day."

Then "nothing could mar our peace with other nations but our own inconceivable folly." (CONGRESSIONAL RECORD, 61st Cong., p. 4064.)

Then it was "better to develop homes than build battleships." (Ib., p. 4065.)

Then our Navy was topheavy, and he was urging fewer battleships and more colliers and necessary auxiliaries to make the ships we have effective. (Ib., p. 4063.)

Then we had only about two-thirds the men and officers to man our ships, and he said it took six years to train a man-of-war's man. (Ib., p. 4065.)

Then we were, he said, tying up numbers and numbers of our fighting ships for lack of men, and transferring the men to new battleships. (Ib., p. 4065.)

Then a battleship tied up went to ruin, and to put a new and untrained crew on a big ship was to invite disaster and disgrace. (Ib., p. 4065.)

Then shortage of men and officers made piling up battleships futile. (Ib., p. 4065.)

Then our earlier and smaller ships were not negligible in fighting value, and he quoted Dewey.

Then Germany's 20 battleships were far inferior to ours. (Ib., 4066.) Is not that what Mr. WITHERSPOON says now?

Then old ships with new machinery, and so forth, were good as new. (Ib., 4066.) Is not that WITHERSPOON speaking now?

Then he was at odds with HOBSON and at one with WITHERSPOON, and had a very similar argument with Mr. HOBSON that Mr. WITHERSPOON now has with Mr. PADGETT about the relative strength of the German and the United States Navies. (Ib., 4067.)

Then he asked, "When you go back to your voter, will you tell him * * * that we set apart $12,000,000 for construction and $1,000,000 to operate a battleship that is not needed from any point of view or under any just consideration?" (Ib., 4069.)

Then he declared, "I appeal to your judgment and your patriotism, and I ask you, Is it not time to call a halt in this mad hysteria of naval development and apply something toward the development and improvement of our country?" (Ib. 4168.)

Then Mr. HOBSON asked him, in substance, if his people would not make a sacrifice in the legitimate defense of our country and its vital interests; and he replied, "I would be glad to say to the gentleman that for the legitimate defense of the country the patriotism of these men would prompt them to make any sacrifice, but the gentleman cunningly states his proposition. I deny that this is a legitimate defense; it is an unnecessary and wasteful extravagance of the public money." Further on he adds, "I have stated and restated that one battleship was extravagant," and "that an excessive Navy built under the stimulus of agitation, fostered and encouraged by the beneficiaries of such a policy, is a menace to the peace of the world." (Ib., 4169.)

Does the brief paragraph I have quoted from the speech of the gentleman a few days ago answer all or any of his powerful argument of March 31, 1910? I believed that speech when I heard it was unanswerable. It has not been answered. I still believe it is unanswerable. I believe it showed that the building of one great battleship yearly was extravagant, and the building of two yearly was folly and futile waste of the public money.

Would that the gentleman from Tennessee would abandon the party of naval hysteria, supported by the interests that profit by the policy, and join with us in resisting this extravagance and futile waste of the public money.

In the name of our civilization, the growth of 6,000 years of human upward struggle; in the name of the human intellect, rising above brutal ferocity; in the name of our flag, which has stood for over a hundred years for all that has been highest in earth's history; in the name of altar, home, and country; in the name of labor, which has toiled through all the countless ages to bear the burden of all wars; in the name of womanhood, which has borne in silence and heartache and horror the sorrow and suffering and cruelty and shame of war's brutality; in the name of all war's victims, the stricken, outraged, and murdered innocents of all ages and nations; in the name of sisterhood and motherhood, of brotherhood and fatherhood; in the name of humanity; in the name of holy mercy, and of a just God who will not hold us guiltless of the shedding of blood; I protest against this bill. War for defense of our freedom, our fireside, our country—yes; with every dollar of our wealth, every drop of our blood—but this is not for defense; it is for mastery over sea and mastery over land, and our flag is turning into a symbol of power and domination, not of freedom, justice, and mercy. Its folds float over us, and it brings no visions or voices to our minds save of the fires of burning houses, the sinking of ships, the drumbeat and the smoke and din of battle, and the groans and cries of the wounded and dying, and bloodstained heroes only claim in death the honor of its sacred folds.

Let us change that. I would not have our flag always only wrapped around the form of him who lived by the sword or died by the sword. I would see it ofttimes wrapped around the coffined forms of those who went down into the raging sea in lifeboats or stood at the engine's throttle or dared the fury of flames to save life, the form of the moral hero who dared to do right when the world frowned and mocked. Yea, I would see it twined with the white pure cross of Christianity and wrapped around the form of the patient, tired mother who, after life's long, lean years of labor, of suffering, and of sacrifice, sleeps and rests at last. Amid the changing times and tides of life I would like to gaze on its stars and stripes and have them fade into scenes of heyday and joy and plenty, with mirth and music and song, the fruition of a sober and righteous nation.

I would have that flag a fit emblem for those who love home and happiness and mercy and hate iniquity and penury and whose passion is peace. [Loud applause.]

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. HARDY. I will ask leave, Mr. Chairman, to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Texas [Mr. HARDY] asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. PADGETT. Mr. Chairman, I yield five minutes to the gentleman from Ohio [Mr. FESS].

The CHAIRMAN. The gentleman from Ohio [Mr. FESS] is recognized for five minutes.

Mr. FESS. Mr. Chairman, there is no man on the floor of this House who has been more interested in the movement for peace than I have been. There is no one who has watched with greater interest the different activities identified with our own country on behalf of peace than I. I recall that in 1843 the first newspaper started in this country or any other country designedly intended to develop the spirit of peace was the American Citizen, established by Elihu Burritt, and it was through his agitation that the first international peace conference known in the history of the country or of any country was held, and our country was very prominent in it. It was in this conference that Burritt and the Tappans took an advanced position for peace.

That same movement still continues. Identified or associated with it is another movement, known as the Interparliamentary Union, in which our country has been and is now very active. Identified with the peace movement is still another movement which found its expression in the first Hague conference, where 26 nations, through their representatives, sat under the same roof in the interest of peace; and also the second Hague conference, in which 44 nations deliberated upon the question of finding a substitute for war. While I believe as much as any man in this Chamber that we ought to develop the spirit of peace, and while I know that the fruits of peace are superior to the fruits of war, yet I for one can see as our main function in the development of this public opinion in support of peace the directing of the public mind along lines of peaceful pursuits, not by ceasing to build for the preparation of a war that might come, but rather for the organization of this public opinion by associations that lead to such expressions as The Hague conference and the numerous other organizations designed to cultivate a conviction for world disarmament. Our country has had its very best expression of its conviction for peace in that latest proposition for the creation of an arbitral court of justice which was suggested by our Secretary of State and favorably considered by the second Hague conference. Before that time the far-reaching expression of peace on the part of our country

was suggested by our representative in the first Hague conference, Andrew D. White, which was made when the conference was about to adjourn without any decisive action. Through that suggestion we have The Hague tribunal of arbitration. It was given vital meaning when we induced Germany to submit the Venezuelan trouble to it. I want to state, as a believer in the movement for peace, that this country has an important function to perform. But, gentlemen, I raise this significant question: Is it our duty to stop the preparation for what may come, and is most likely to come when not prepared, at the very moment when our problems are being complicated, and when we are coming rapidly to be a world power? I mean just what I say. I will join any man on this floor to lead in the movement for disarmament; but it would be, in my judgment, suicide to disarm ourselves without disarmament on the part of Germany and of Great Britain and of Russia and of France. [Applause.]

I believe in disarmament, and as a Member of this House I will vote for a measure that looks to the disarmament of the nations, if the nations will join us; but I will not vote to disarm while all the world is voting to arm.

Our friend, the distinguished Member from Texas [Mr. HARDY], devoted nearly his entire time and argument against the distinguished chairman of this committee [Mr. PADGETT], because, as he alleged, he had changed his mind. I doubt whether the chairman has changed his mind. If he did, it was because conditions changed, which justify a change of mind. There is a different plan of armament in vogue in the world to-day from what it was five years ago. Germany has new plans of building, and other countries have new plans of building, and for us to watch these countries in this program for national defense and to sit quiet with little or no attention, and declare that God will take care of idiots and children and Americans is perfectly silly to me. [Applause.]

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. FESS. It seems to me that we ought to prepare for the emergency that probably will come if we are not prepared. If my friend indulges in criticism of the distinguished chairman because he spoke some time ago one way and speaks now in a different way, I will cite the gentleman to a distinguished case of a change of opinion.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. PADGETT. Mr. Chairman, I will yield to the gentleman five minutes more.

The CHAIRMAN. The gentleman from Ohio [Mr. FESS] is recognized for five minutes more.

Mr. FESS. Mr. Chairman, I was just about to say that when the President of this Nation, for whom I have great respect and whose ability I very highly regard—when he changed his views upon a question that stirred this Nation as few questions have stirred it, I did not find fault with the President for doing it, but rather commended him, not because I agreed with his opinion. That is his own business, and if he has a reason for changing he does not need to question what the American Congress would say about his change; and, if I do not mistake, my friend the Member from Texas also indorsed that change by voting with the President. When the President changed his "watchful waiting" policy we both voted with him. It is not a matter as to what was done 2 years ago or what was done 10 years ago. Our duty is to act in the present hour; it is what I shall do now. And I say to you, gentlemen, that while I believe we ought to move to the time when we can see universal peace, if possible, peace does not come by declining to prepare for war. Peace does not come because we can not fight. Peace comes when you can command it and not until that time. You will not change human nature by irresolution and inaction. The only way for us to insure the peace of the world is to concentrate the ability to command it in the peaceful nations of this earth, and you will not do it until you have accomplished that particular purpose.

Mr. CALLAWAY. Mr. Chairman, will the gentleman yield?

Mr. FESS. To-day we have the largest undefended coast line of any nation on the globe. I do not mean we are totally defenseless. To-day we are becoming the most marvelous sea power in our building for the future that the world knows, provided we but embrace the opportunities that are opening.

The CHAIRMAN. Does the gentleman yield?

Mr. FESS. I think I shall have to yield to my friend, but I suggest to him not to take up all of my time.

Mr. CALLAWAY. If having a great sea power keeps us out of war, of course that will do it, as we are comparatively greater than the nations we expect to get into war with. But how does the gentleman explain our difficulty with Mexico?

Mr. FESS. I am sorry the gentleman has asked that question. I think if a little better wisdom had been used, if our State Department would have employed some vigor of diplomacy, we would not be in it. [Applause on the Republican side.] I am sorry, I say, the gentleman asked that question.

Mr. CALLAWAY. The gentleman says that if we are prepared for war we will be able to command peace. Does the gentleman think that the bullies that go around the country commanding peace get more peace than the man who goes about in a more peaceful way?

Mr. FESS. I would say to my friend that he is assuming a position that I do not think is justified. In other words, my friend would say, "If we did not have any battleships, we would never have war." Why, the day was when there were no battleships, yet war was the rule instead of the exception. I want to remind my friend from Texas that from 1688 until 1815, a period of 127 years, 54 of those years were spent in actual fighting in 12 different wars between France and England. This is the famous contest for the supremacy of the sea, in which England won at last. In those 127 years there were 54 years of actual fighting. I refer to this as but one example of contest between two highly civilized powers. Then we did not have great armaments. Wars will cease in the proportion that we are able to compel them to cease, and the time is rapidly coming when we can not afford to go into war. I do not mean we should enter the world's rivalry in armament, but we must be able to police the seas. Would the gentleman—I will not put it in that way, for I do not want him to take up my time. This Nation is a little more than 100 years old, and yet in that brief period it has become one and three-quarters times wealthier than the next wealthiest nation on the globe. I do not think this Nation, which has reached this position of development in its rank among the nations, which is now leading out into larger spheres of influence, and which has become such a world power, ought to assume that there will never be any more trouble. I do not think it the part of wisdom for us to rely upon that. Our problems are complicating in the degree that we become a commercial power. We can not grow in power and influence without increasing our national responsibility, and it seems to me that if we command the Pacific, as we certainly will, and if we embrace our influence on the Atlantic, we must build up our commerce, our merchant marine, and at the same time be able to command the respect of the powers that are jealous of us—in a word, to maintain a position of peace. Otherwise I fear we are destined for war. I know my friends will laugh at, if not ridicule, the statement I am about to make. You may call it a paradox. I am a man of peace. I believe our greatest future is in the work of peace. I have been identified with these peace movements and have advocated the various activities in church, college, and in the press. I have not been much of a propagandist, but I have been interested and active in seeing a public opinion created to disarm the nations, but I have taken this position: You can not eliminate from human nature the heroic element, and you can not avoid the consequences of that fact. [Applause.]

I have little sympathy in the profession of certain propagandists that we must cease to sing patriotic songs to emphasize the meaning of the flag, because it instills a martial spirit.

The heroic in us is innate. The best we can do is to direct it in the channels of peaceful pursuit. But in that case it does not comport with the highest wisdom to either disarm or allow our armament to decay by nonaction, while our neighbors are continuing their naval programs.

We may not keep out of war. It may be forced upon us. Too often we find a fawning pretension for peace forcing us into situations where a struggle seems necessary for the sake of our national honor. There is no surer cause of war than a policy that convinces an enemy that we want peace at any price. Peace at any price leads to inevitable war or national humiliation. I repeat, the way to insure peace in the world is to concentrate the fighting ability in the hands of the peaceful nation. I shall therefore vote to build two battleships in the belief that I am doing it in the interest of peace rather than war.

Mr. PADGETT. I yield five minutes to the gentleman from California [Mr. J. R. KNOWLAND].

Mr. J. R. KNOWLAND. Mr. Chairman, in the light of recent events it may be illuminating to quote from some of the speeches delivered by those opposed to any increase of the Navy when the naval bill was before the House a year ago.

I want to quote first from the gentleman from Texas [Mr. DIES] who on February 22, 1913, used these words:

The cry is for armies and for navies, and I say that in the light of history there is not a scintilla in the history of the nations of the earth to justify a standing Army or a great Navy in this Republic. We are

separated from the politics of Europe by a great ocean. As long as we stay upon this hemisphere—ample it is indeed to support all of the children of the generations to come—and attend to our own business unless we are rushed into a war by loud-mouthed jingoes against the peace and security and happiness of this country we shall remain at peace.

I ask the gentleman, Who are the "loud-mouthed jingoes" who precipitated the trouble to the south of us? The gentleman also said:

Mr. Chairman, I challenge the historians of this House to point to a single nation that ever existed upon the earth that was completely fitted by geography to do without an Army and Navy to maintain free institutions except the United States.

France can not do it; she has got to have an army and navy. Germany can not do it. England can not do it. Japan can not do it. But God has placed us upon this continent, separated from the world by seas and impassable barriers of nature, and if we run to military seed, as every other republic has done in the past, if some general—some Diaz or Huerta—comes on horseback and finally this Republic goes down in the night of military despotism, as every republic in every age of the world has done, we will owe it to the fantastic Don Quixotes, who tax the people to fight windmills of their own imagination.

I think we have all become convinced that a navy is of great utility on certain occasions, as very strikingly illustrated by recent events.

On February 24 the gentleman from Arkansas [Mr. GOODWIN] used these words:

Mr. Chairman, I repel as abhorrent the thought of the possibility of war or continued heavy appropriations of the people's money to prosecute great wars when none are likely to follow.

The gentleman from Virginia [Mr. SAUNDERS], always so eloquent, said on February 26 of last year:

Secure in our solitary grandeur in the western world, like a mighty eagle in its eyrie, too just to make wanton war and too great to be lightly assailed, we may well aspire to be the arbiter of nations and by the inspiration of our example bring to pass the reign of perfect peace.

The Democratic leader [Mr. UNDERWOOD], then in favor of but one battleship, used these words—

Mr. HENSLEY. Will the gentleman yield right there?

Mr. J. R. KNOWLAND. I would like to yield to the gentleman.

Mr. HENSLEY. I will say that the gentleman maintains the same position to-day.

Mr. J. R. KNOWLAND. The gentleman from Alabama [Mr. UNDERWOOD] used these words:

Our own honesty and our own moral courage protect us against attacks, and if we want to go into the battle fields of the world and attack other people unjustly we are only pirates and national highwaymen. I hope that the proposition for the building of one battleship will be the proposition adopted by this House.

On February 26, 1913, the gentleman from Indiana [Mr. CLINE] said:

The mission of this Nation is to teach the world an example "of high-minded foreign policy." Let us throw the moral force of that example into every quarter of the world and stand for freedom and popular government. We are the world's teacher of national peace and personal liberty. We do not need great navies to eat out the substance of the people nor foreign allies to enforce a despotism against alien races. I would rather have the protection of the two great oceans of the world bordering on us than either the triple and quasi alliance of the great navies of Europe to guard the peace, happiness, and liberty of the people.

The gentleman from Alabama [Mr. BURNETT], on February 26, speaking upon the same subject, said:

Of whom are we afraid, and with whom do we anticipate war? Certainly not with Japan, a bankrupt nation, who could not borrow $100,000,000 if the life of the Empire depended on it. These cries of war have been raised by jingo politicians until we have ceased to be frightened by them. Let us talk peace and internal development a while and give the disappointed agitators for war a respite from their arduous labors.

I simply quote these remarks, uttered a little over one year ago, to impress upon this House and the country the fact that wars come unexpectedly. It is when we least expect trouble that we have always encountered it. [Applause.]

I have always favored an adequate Navy and I urge this policy as an advocate of peace. I believe that this Nation should join in all peace movements, but until there is a universal agreement it would be almost criminal for us to neglect our Navy. As a Member of Congress I do not propose to take that responsibility.

It is easy indeed in times of peace to dilate upon the remote possibility of war. When war comes the very men who oppose any increase of the Navy would be the first to criticize the Government if, through the inadequacy of our Naval Establishment, reverses were met with. We of the Pacific coast have always favored liberal appropriations for both the Army and Navy. We are cognizant of the great problems confronting us on that ocean. At the opening of the canal we desire that this Government shall have a fleet adequate to protect both coasts—a fleet large enough to divide into two units, one for each great ocean.

I shall vote for two battleships. I shall also vote that at least one of these ships be constructed at a Government yard. Since I have been a Member of this body I have fought consistently in favor of the policy of constructing a part of the Government ships in navy yards. It was a difficult and uphill fight at first, but the result has demonstrated the wisdom of the policy. We now have a yard on the Atlantic—the New York Navy Yard—and on the Pacific—the Mare Island Navy Yard—equipped for shipbuilding, and these yards have made good in the building of colliers and battleships. This policy has resulted in a reduction in the cost of ships by private shipbuilding concerns, in expediting construction, and in maintaining at the yards organizations of trained mechanics, essential in times of peace as in times of war. I hope there will be an amicable adjustment of our present difficulties to the south. We must be prepared, however, at all times for every emergency. As a Member of Congress I stand ready to support the President should a foreign foe confront us. When that time comes, and it is necessary for the Chief Executive to utilize the Army and Navy, I desire that he have at his command a force adequate to meet any situation. [Applause.]

Mr. PADGETT. I yield five minute to the gentlemen from Illinois [Mr. MADDEN].

Mr. MADDEN. Mr. Chairman, I am for peace, but would not hesitate to wage war if the Nation's honor is at stake. I would like to see the nations of the world on a permanent peace basis, and to that end would favor a plan having in view the discontinuance of warship building. But unless all the great powers agree upon such a program this Nation must continue to keep its Navy up to a proper state of efficiency. We can not afford to discontinue our naval program while other nations push theirs forward. Our Navy, both in ships and men, should be kept up to such a standard as will command the respect of the world and insure the protection of our interests on the Atlantic and Pacific Oceans. We can not allow our great coast line to go unprotected. We must be ready to meet any emergency. To be prepared for war is the best insurance for peace. While other nations continue to increase their navies this Nation can not abandon its means of defense. We would be properly chargeable with neglect of duty if we do not use every precaution for the defense of our rights, and for that reason I favor the construction of two battleships. I hope, however, the time will soon come when all the world will cease to talk war and enter into a compact for universal peace.

While on this subject I wish to say that I regret our trouble with Mexico, and I hope and pray that there will be no actual war between the United States and our sister Republic. Such a war is too horrible to contemplate. It will mean widows and orphans throughout both lands, maimed men, death, suffering, want, sorrow, and misery for a generation, bitter hatred where friendship and good feeling should prevail. It will cost the lives of thousands of our young men and the expenditure of untold treasure; result in the devastation of vast fertile areas, bringing starvation and want and suffering to innocent men, women, and children, and sorrow into every home in both Republics.

I would like to see peace and happiness and prosperity on every inch of American soil. I would like to see a feeling of friendship among the peoples of every American Republic. I would like to see the doctrine of liberty carried into every household. I would like to see the United States blaze the way to this end.

I would of course defend the Nation's flag and protect its rights in every land, on every sea. I would give every American citizen everywhere the protection of the flag and defend him in the exercise of his rights with all the power of the Government. I would hesitate to use the power of the Government to protect investments of American citizens in foreign nations. I would encourage thrift, industry, frugality, and patriotism at home and protect every citizen in his right to the enjoyment of the accumulations of his honest efforts here, but I do not think American citizens who take the risk of foreign investments have any right to complain if the Government to which they owe allegiance refuses to place the lives of its young men in jeopardy, fighting to preserve investments in other lands about which it has not been consulted.

The greed of American citizens who make investments in other lands should not be encouraged by the Government. Such citizens should be given to understand that the blood of our best youth will not be shed to settle their quarrels with business rivals. I would make it treason, punishable as such, for any person in the United States to engage in the business of financing, encouraging, or abetting war in another nation with a view to involving the United States. I would deny domicile in this country to any person so engaged, and I favor the enactment of laws to this end.

Mr. HENSLEY. Mr. Chairman, I yield 10 minutes to my colleague on the committee, Mr. BUCHANAN of Illinois.

Mr. BUCHANAN of Illinois. Mr. Chairman, I rise to protest against the useless expenditure of the public funds by au-

thorizing two battleships. I am in favor of an efficient Navy. I am in favor of preparing for our defense, but we now have a magnificient and an efficient Navy. In making this protest, Mr. Chairman, I am fully convinced that I am expressing the sentiment of a large majority of the wageworkers of our country. The working people of this age are not being deceived by the argument that these expenditures of money are for their benefit, except, of course, in those localities where navy yards may give a few men positions where they would not otherwise have employment. But if it is good policy for the Government to appropriate money to give men work, let us appropriate it for something that can be used.

I have not the time nor disposition and am not prepared to establish what I believe is true—that which was stated by my friend the gentleman from Texas in regard to the weapons of destruction on battleships. I feel fully convinced that inside of 10 years battleships that are now being constructed will be practically useless as far as their being used in war. Not only have we submarines to destroy them, but there are air craft, and it is not impossible that we will have wireless electricity that will be able to explode the magazines of these battleships at a long distance.

Therefore I am convinced that battleships which you now authorize to be built, by the time they are constructed, will be of no use. The labor people of this country whose sentiment is expressed through organized labor, are exercising their influence throughout the world for peace. You hear little said here except about building battleships, or the weapons of war; you hear little said about the men that must man the battleships and who ought to be counseled in some way or other as to whether we are or not to have war. Anyway, the labor movement of this country and of the world is exercising its influence to prevent war.

To bear out what I have said in regard to the labor people, I want to read a letter which I received from an organization in Danville. It is as follows:

DANVILLE, ILL., *February 28, 1914.*

Hon. FRANK BUCHANAN, M. C.,
Washington, D. C.

DEAR SIR: I notice by the papers that you voted in the negative on the two-battleship program.

Allow me to extend to you my heartiest congratulations for so doing, as that expresses the sentiments of the labor organizations in this community.

I have inclosed a copy of resolutions, which were passed by the Danville Trades and Labor Council, and unanimously indorsed by Vermilion Lodge 473, International Association of Machinists, which was in response to a circular letter sent out by Lodge 174, International Association of Machinists, Washington, D. C., requesting all local lodges to urge their respective Congressmen and Senators to support the two-battleship program.

Again thanking you for the support rendered in the interest of the working class as a whole, and assuring you that if the opportunity ever presents itself whereby we could give you any assistance we would be glad to do so, I am,

Yours, for anything that is to the interest of the working class,
[SEAL.] W. T. RIZER,
Recording Secretary Local 473, I. A. of M., Danville, Ill.

This is the resolution in response to the request:

INTERNATIONAL ASSOCIATION OF MACHINISTS,
VERMILION LODGE, NO. 473,
Danville, Ill., January 23, 1914.

Whereas the legislative committee, Columbia Lodge, No. 174, of the International Association of Machinists, has appealed to the Danville Trades and Labor Council and Local 473, International Association of Machinists, for moral support wherein they ask that we favor the construction of more battleships instead of lessening battleship construction, giving as a reason to obtain said support that at a time when work is becoming slack throughout the country it is unwise to aggravate the condition by adopting a policy of naval construction that will throw thousands of workingmen out of employment; and

Whereas we know that the construction of battleships are intended for war purposes, and that all the expenses of all the wars in all the world in all time have been paid with the results of productive labor, always resulting in the working class paying all the expenses of all wars; and

Whereas we realize that in war soldiers cease to produce wealth, and finally soldiers actually destroy wealth; and

Whereas we believe that war appropriations could be applied in a more beneficial way to society in general: for instance, the cost of the Civil War amounted to $31,521,815,230.60. This sum, if applied to another way, would pay for a $1,700 home and also for $400 worth of furniture for each house for a total population of 90,000,000 people, estimating 6 per family in each home. Or this sum would pay all the salaries of 25,000 school-teachers, at $625 per year, from the birth of Christ to the year 1909, and leave sufficient to establish 50 universities, each institution provided with $10,000,000 worth of buildings and equipment, and each institution provided also with a $10,000,000 endowment fund for running expenses; and

Whereas we believe the members of the aforesaid lodge are promoting war, even though they would have it appear to the contrary, by asking for increased construction of battleships; and

Whereas we believe that whoever would understand war must give special attention, first, to the economic interpretation of history; second, to the class struggle, considered historically and currently; and, third, to surplus value, produced by the workers, but legally escaping from their control to the capitalist class, as a result of the institution of private ownership and private control of the collectively used means of production: Therefore be it

Resolved by the Danville Trades and Labor Council and Vermilion Lodge, No. 473, International Association of Machinists, That we disapprove of the appeal made by the aforesaid Lodge No. 174, believing that occasional literary and oratorical snowballs ignorantly, gracefully, and grammatically tossed in the direction of hell (for war is hell) will have no effect on the general temperature of that warlike region; and be it further

Resolved, That the two inclosed petitions intended for to be sent to our Congressmen and Senators be left blank, and that a copy of these resolutions be sent to Lodge No. 174 and the monthly journal of the International Association of Machinists for publication.

DANVILLE TRADES AND LABOR COUNCIL,
JOHN F. DEMLOW,
P. R. CHRISTENSON,
GEO. W. BERRY.
Resolution Committee.

Adopted by Local No. 473, International Association of Machinists, January 26, 1914.

H. A. WISE, *President.*
W. T. RIZER, *Recording Secretary.*
EDWARD M. METHE,
PERCY MOLYNEAUX,
FRED WITTIG,
Resolution Committee.

Now, Mr. Chairman, that is evidence of what the members of organized labor are thinking at this time about war. I can produce many resolutions that have been passed throughout the country by the American Federation of Labor and of national organizations, bearing out the statement that this sentiment exists in all labor organizations. I have a letter from the Chicago Federation of Labor asking my influence to secure peace in Mexico. It is as follows:

CHICAGO, ILL., *April 22, 1914.*

HON. FRANK BUCHANAN, M. C.,
Washington, D. C.

DEAR SIR: At the regular meeting of the Chicago Federation of Labor, held Sunday, April 19, 1914, representing over 250,000 working men and women, resolutions were unanimously passed, as follows:

"Whereas the relations between the United States and Mexico are strained and war seems to threaten; and

"Whereas the commercial interests are doing their utmost to bring about intervention in Mexico which would be profitable to them, placing great wealth in their hands, fixing the attention of the American people upon Mexico, and taking it away from the industrial questions upon which the organization and life of labor depends; and

"Whereas the burden and suffering of war are always placed upon the working classes, while the glories and profits are never shared with them; and

"Whereas war with Mexico would develop military ideals which would submerge the constructive ideals for which organized labor stands; and

"Whereas intervention by America would not operate to give the lands of Mexico to the people of Mexico, but would result in untold sufferings to Americans, which would not help the workers of either nation: Therefore be it

"*Resolved,* That the Chicago Federation of Labor commends President Wilson for his efforts to restrain the greed of the commercial interests and to protect the American people from the horrors of war; and be it further

"*Resolved,* That we recommend that the President, the Cabinet, and the Members of Congress be urged to exhaust every possible means to prevent the United States from becoming involved in the struggle with Mexico; and be it further

"*Resolved,* That a copy of this resolution be forwarded to the President, the Secretary of State, and the Illinois Members of the House of Representatives and the Senate."

Respectfully submitted.

CHICAGO FEDERATION OF LABOR,
JOHN FITZPATRICK, *President.*
E. N. NOCKELS, *Secretary.*

It will cost more than $30,000,000 to construct two battleships. The wageworker must bear the burden of taxation to build and maintain them. We now have all the battleships that there is a possibility of there being a need for, therefore the authorization of these two battleships is a reckless waste of the public funds.

Mr. PADGETT. Mr. Chairman, I yield 15 minutes to the gentleman from Alabama [Mr. HOBSON].

Mr. HOBSON. Mr. Chairman, the world, as a rule, is controlled by moral and spiritual forces in the end, and the whole trend of human society, unless it is degenerating, is in the direction of the control of human affairs by principles in accord with the moral laws of the universe.

I feel that the United States is clearly the most advanced organization that has yet arisen in the history of the world undertaking to embody the moral laws in the Nation's activity. At Mobile President Wilson announced in effect—it is called the proclamation of Mobile—that the United States would never annex a foot of territory by conquest. I believe that even a superficial examination of historic incidents of this Nation's relations with the outside world will confirm the proposition I have laid down, that we are the foremost Nation in all the world to regulate our conduct by the moral law.

But that very fact puts upon us great responsibilities. We not only embody more than any other nation in our organic law and our statutes and principles underlying our institutions of the moral law, but we are the most potential instrumentality the world has even seen to promote and extend the

sphere of influence of the moral law amongst the nations of the world.

To me a nation, like an individual, has a beautiful and glorious responsibility of being an agent, sharing with the Almighty the execution of the great laws of evolution, the great laws underlying life and the universe.

The responsibility that America has upon her is to promote as rapidly as possible the reign of justice and right, liberty, free institutions, the rights of men—those conditions under which the men and women of the world could in the shortest time and most consecutively develop most in character. That responsibility is the greatest responsibility the Nation has. It is its contribution to the evolution and uplift of humanity, and it is that responsibility that ought to make us very thoughtful and earnest in deciding upon our relationship and what is beneath our relationship with the outside world. A corollary to President Wilson's proclamation of Mobile would be: America will never annex any territory in the Western Hemisphere by conquest, and neither shall any other nation. A corollary to her occupation of the Philippine Islands, with the underlying principle that we are there for their good and will in time give them self-government and retire ourselves, is that no other nation shall occupy the Philippines for purposes of oppression or even for purposes of ruling over those people against their consent. When we announce the Monroe doctrine, that the Western Hemisphere shall not be subject to the colonial policies of the Governments of Europe that are based on the principle of aggrandizement, each nation getting advantage in its own colony, and that instead of this there shall be the prinicple of equality of opportunity for all, we should add that we do not ask special privileges at the hands of any people in the Western Hemisphere, and neither shall we permit any other nation to demand special privileges. When we announce that we adhere to the open-door policy in China, to the principle of equality of opportunity there, we are morally under obligation to announce that no other nation shall despoil China for selfish advantage.

America occupies this position of leadership to extend the principles of equality of opportunity, justice, and fair play, a fair chance for all the sons of men in the world. This responsibility is very great, and when we come to analyze the process of expansion of the moral forces we will find this to be the case. It can come only with organization amongst men, ever widening, and the development of civilization causes the unit of organization to extend all of the time from the family to the clan, from the clan to the tribe, from the tribe to the nation, and ultimately there will be an organization of the nations of the world, a world government. Another thing that is involved is not merely the physical barriers between peoples, but the average standard of character already evolved, and the progress of the moral forces of the world can only keep pace with the average standard of character of the men of the world. When we come to investigate and analyze the average standard of character of the nations of the world, we see that we have not yet reached the point where they can get together and work out their differences according to the laws of justice and right. It is like being on the frontier, with a responsibility of preserving those conditions of order under which all of the civilizing and elevating forces can operate without interference. That is analogous to the position of America to-day. When we combine with this the appreciation that we have more property really exposed than all of the countries of the world combined, and that we have no army, then it is clear that if an enemy that has a great army gets control of the sea he can strike us on our mainland, in the Panama Canal; he can strike us in Porto Rico and Hawaii and in the Philippines, whereas if we get control of the sea, with the other nation having a big army, we can not harm the other nation, we can not strike her. Getting down to the last analysis it means that America in the Atlantic, which washes the shores of Europe and the Western Hemisphere, ought to have a navy at least the equal of any great military nation of Europe, and that in the Pacific, which washes the shores of Asia, of Alaska, of the Panama Canal, and of our outlying possessions, we ought to have a fleet as large as any military nation of Asia. That means we ought to have a fleet in the Atlantic as large as the navy of Germany and in the Pacific a fleet as large as the navy of Japan. That would mean this. A navy develops very rapidly.

If you are not up to date, you are outclassed. It is the most rapidly developing of all of the industries. Old ships should not be ranged and lumped in with the new. The revolution that brought in the dreadnaught class is the starting point for determining the strength of modern navies. Starting with that point, we have Germany authorizing about three and a half dreadnaughts a year, and by the dreadnaught I include the dreadnaught proper and the battleship cruiser, and we have Japan authorizing about one and a half a year. So, since 1907, America ought to have been authorizing about five battleships a year, and we have not done so. The naval estimates for new construction will show this is just about what has been taking place. We have been authorizing less than two, a little more than one and a half, when we ought to have been authorizing five. I know we have spent large sums of money, but Members ought to realize that those sums are not expended upon new construction. Our Navy is very expensive to maintain, and we have not yet adopted any definite policy to make it more economical. What we ought to do is to have a Navy up to date, and have a large reserve number of battleships out of commission.

Mr. DICKINSON. Mr. Chairman, will the gentleman yield?

Mr. HOBSON. Just one moment.

Mr. DICKINSON. It is just for a question. Do I understand the gentleman from Alabama to say that he is in favor of the United States maintaining a navy as large as the navy of Germany in the Atlantic, and a navy in the Pacific——

Mr. HOBSON. Oh, I will ask the gentleman to please hurry up—yes; that is what I have said.

Mr. DICKINSON. As large as the navy of Japan?

Mr. HOBSON. Yes.

Mr. DICKINSON. My recollection is that a few years ago when the gentleman spoke in my home town he advocated a Navy on the part of the United States as large as the combined navies of all of the European nations.

Mr. HOBSON. The gentleman is mistaken. If we want to start now a legitimate naval policy, this year would call for about five dreadnaughts. I believe that they ought to be divided into three types, and that three of them ought to be of the dreadnaught-proper class, and that two of them ought to be of the fast-dreadnaught or of the battleship-cruiser class.

And I am going to offer an amendment to that effect, a separate paragraph for fast dreadnaughts, and discuss that question. I am going to offer an amendment for some of these fast dreadnaughts of which we have none. But the proposition I want to impress upon the Members here is that our naval program to carry out our national policy is very simple. It does not require our initiative at all. It is simply that with the responsibility we have for the promotion of the moral forces of the universe, for our own self-preservation we ought to have this fleet on the Atlantic and this fleet on the Pacific, so that each year we can take the German law—the Germans have been farsighted enough to have their program follow a law for several years, through a number of years—we can take the German law and the amendments to that law—they are continually making amendments increasing the law—and we can find out what will be the expenditures for the next few years from Germany and the same from Japan and then fix our program equal to a combination of the two. [Applause.]

The CHAIRMAN (Mr. JOHNSON of South Carolina). The time of the gentleman has expired.

Mr. PADGETT. Mr. Chairman, I will ask the gentleman from Missouri [Mr. HENSLEY] to use the remainder of his time.

Mr. HENSLEY. Mr. Chairman, I yield 30 minutes to my colleague on the committee, Mr. WITHERSPOON, of Mississippi. [Applause.]

Mr. WITHERSPOON. Mr. Chairman, the facts with reference to the American Navy have been so fully discussed that it is not my purpose to attempt any repetition of the arguments in general debate. I do desire, however, to call the attention of the committee to two policies, on one or the other of which the administration of the American Navy must be conducted. These two policies are radically different in principle, in purpose, in results, in method, and in all moral qualities. One of these policies, which I will call the "battleship policy," seems to me to be founded on the principle, not that the power of the Navy is proportioned to the destructive force of the guns and the skill of the men in shooting, as Admiral Vreeland testified is the real test, but on the principle that its power is proportioned to the units in the fleet, and on the further principle that the construction of battleships affords large profits to capital and employment to labor. How much profit there is in the construction of a $36,000,000 naval program I do not know, but I feel absolutely certain that the profits are big enough to result in a dangerous combination between the plutocracy of our country and the devilish militarism which now controls the expenditures of 70 per cent of Federal taxes, and is rapidly substituting a plutocratic empire for the Union of our fathers. [Applause.] There are, however, a number of instances developed in this investigation which enable us to measure with some accuracy the amount of waste and graft with which this bill is loaded. The difference between $440 which we will be compelled to pay

for the armor plate of these two battleships and the real cost of the construction of the armor plate—$279—that difference, or $161 per ton, multiplied by 16,000, makes $2,570,000, which is the amount of the damnable graft that you are asked to vote into these two battleships.

Mr. SHERWOOD. Will the gentleman allow an interruption?

Mr. WITHERSPOON. I will allow—excuse me just a moment; I will answer you—I will allow the gentleman, and only the gentleman, to ask me one question, because I will not have time to answer questions.

Mr. SHERWOOD. The statement was made this morning on the floor—an intimation—that we needed more battleships on account of the coming Mexican War. Is it not true that the old battleship *Oregon*, which is about to be discarded, could whip the whole Mexican Navy on any sea or ocean in the world?

Mr. WITHERSPOON. Yes; a dozen like it put together. Now, another instance is powder. This bill carries an appropriation for about 7,000,000 pounds of powder that can never be used in time of peace nor in time of war, because if we had a war that lasted long enough to wear out every gun in the Navy we would not near get to the 7,000,000 pounds of powder for which you are asked to waste this money. There is another instance of graft and waste that characterizes the battleship policy. Take, for instance, the question of shells. We have been paying $274 apiece for our large projectiles. That is what the "good" trusts of America have been charging us for I do not know how many years.

Mr. SHERWOOD. Is that the 13-inch shell or the 12-inch shell?

Mr. WITHERSPOON. The 12 and 14 inch. Now, some time ago the department advertised for bids, and an English concern—Hadfield & Co.—knowing that we were being robbed on shells, bid $189 a shell and got the contract. The next contract that was let, these same American trusts, that had been charging us $274 apiece, discovered what the real worth of shells was and bid $165.

The difference between $274 and $165, or $109 apiece, gives you a sort of measure per shell of the waste and graft and dishonesty that is involved in the battleship policy of the American Government. When the first draft of this bill came before your committee it contained a provision for the establishment and an extension of our gun factory that was to cost $2,225,000. The Chief of the Bureau of Ordnance told us that we did not need any such extension for the ships that are now authorized, and that we did not need any such extension for the two battleships carried in this bill, and that we did not need it at all except for some remote battleships which might be built in the distant future, and the testimony was so overwhelming that that piece of graft was even knocked out of the bill by the subcommittee which reported it. I could go on and give you instance after instance, but that is the battleship policy. It is to collect huge sums of money from the people and pay it out in certain localities and to certain great concerns to produce profit to capital and employment to labor. Mr. Chairman, what time did I begin and how much time have I consumed?

The CHAIRMAN. The gentleman has consumed 10 minutes.

Mr. WITHERSPOON. Another thing I want to call attention to about this policy which I think throws some light upon the question whether it is right or wrong. Any policy that is right, just, and fair and honest I think seeks no support in misrepresentation and falsehood. This policy, as I have shown you, has been propagated by a slander of the American Navy, an attempt to stigmatize it as inferior in order to bolster up an unrighteous cause.

They indulge in comparisons with foreign navies and leave out 17 of our armored vessels, 32 of our big guns, and in every other way try to make you and the American people believe that we have an inefficient, obsolete Navy. That statement has, I submit, been demonstrated to be false, and no man has attempted on the floor of this House to show—and no man can successfully show—any truth in this charge against our Navy. What do you think of a policy that has to resort to misrepresentation and falsehood in order to bolster it up? Truth never goes hand in hand with graft, waste, and wrong, and one of the marks of a wrong policy is the resort to misrepresentation and deception.

But they say that this policy is inspired by patriotism; that the naval officers who advise it and the 17 naval statesmen on the Naval Affairs Committee who report it are all inspired by patriotism. For the sake of argument I am willing to concede that in them is centered all the love of country that exists around here, and for the sake of argument I am perfectly willing to admit that the gentleman from Missouri [Mr. HENSLEY] and the gentleman from Illinois [Mr. BUCHANAN] and the gentleman from Indiana [Mr. GRAY] and I are utterly devoid of patriotism. Concede all that, and I ask you what is the value of their patriotism when it results in a policy identically the same as the policy you would have if it were inspired by greed and avarice? Suppose you had a bill here written by a regular grafter, devoid of patriotism, and what sort of a bill do you think he would write? This bill carries $139,000,000. How many millions do you think a grafter would want it to carry? This bill provides for two battleships. How many battleships do you think men would write into it if they were controlled solely and exclusively by their self-interest? Why, when you authorize two battleships a year that results in the construction of six battleships all the time, because it takes three years to construct one.

Now, there are only six corporations in the United States that can build battleships, and when you authorize two a year you authorize enough to keep them all going all the time. [Applause.] How many do you think they would authorize if they had to write this bill? Would they authorize more than they could build, or would they authorize the same number that these 17 naval statesmen have authorized? This bill carries provision for 7,000,000 pounds of powder that we can never use. How many do you think the Powder Trust would write into the bill if it had the right to do so?

Another characteristic of this battleship policy is that it is cold, heartless, pitiless, merciless. It has no mercy and no pity for the great masses of the poor who have to pay for this waste and extravagance. It does not stop to consider that the mortgaged debt on the home of the poor farmer must be increased to gratify this vicious taste. It does not stop to consider that the poor laborer whose earnings are just enough to make both ends meet, every time he buys a pound of sugar or a sack of tobacco, or a garment to put on his back or that of his children, must contribute to this enormous waste. It is utterly deaf to his appeals for mercy. In all this bill there is not as much mercy for the laborer, there is not as much pity for the farmer, there is not as much sympathy for the masses of the poor as there is in the heart of a hungry cat for the helpless mouse upon which it leaps. [Applause.]

But I shall have to present this battleship policy to you, and if your conscience will help your stomachs, swallow it down. Let me call your attention to the other policy. The other policy aims wholly and exclusively at the improvement of the Navy, at the increase of its power and efficiency, and is utterly oblivious to all other considerations. We believe that this can be done in a number of different ways, and I want to give you just a few illustrations.

In the first place, all the naval officers and everybody agree on the proposition that the most important factor in the power of a navy is the men. More important than guns and ships are the men. We have had it beaten into us ever since I went on that committee that we have not officers enough to use the ships which we already have. One officer told us that it would take the academy 20 years to turn out enough officers for the ships that we have now. Why, then, do you want more ships? But not only the number of the men and officers on ships, but more important still than that is their skill in shooting. All this war preparation amounts to absolutely nothing unless you can hit the enemy's ship, and that is skill which can only be acquired by long practice. We now give our men 12 shots a year for each one of these guns. I believe that shooting a big gun on a battleship at an enemy 7 miles away requires more practice to be skillful than it does to shoot birds on the wing, and a man who did not shoot but 12 times a year in bird hunting would not kill one bird out of five hundred. The admirals have told you that they have tried it in the Marine Corps, and the target practice there, which is 300 shots a year for each man, has resulted in increasing the efficiency of that corps 1,000 per cent, and that one company there now is equal to five of a few years ago. Target practice will make a ship that can hit five times as often as the enemy's ship equal to just five of the enemy's ships, if they are equal in every other respect.

How much time have I, Mr. Chairman?

The CHAIRMAN. The gentleman has seven minutes remaining.

Mr. WITHERSPOON. Briefly, we have 78 big guns in our Navy that are 35 calibers long. I have shown you by the ballistic tables in this argument that to substitute 45-caliber guns for those 35 caliber would double their destructive force. And all of that could be done for about one-tenth of what it costs to build one battleship, and would increase the power and the efficiency of the Navy ten times as much as to add two more battleships to it.

I wish I had time to discuss a number of other questions affecting the good of the Navy which have never been investigated, because we spend all our time trying to squander the public funds. One thing, we have not a single navy yard on either coast to which a badly wounded battleship could ever get in time of war except at Puget Sound. If we had been studying the good of the Navy, we would have had that thing corrected; but we do not have time to do that. I could go on and show you a great many other things that have occurred to me. I could show you how we could increase the power and efficiency of the Navy at a small cost, and I honestly believe we could double its efficiency and power and still reduce this appropriation from $140,000,000 to $100,000,000, if we had an opportunity. But where the whole time is taken in driving toward these useless battleships, it paralyzes all efforts to improve the Navy. [Applause.]

Here are the two policies. They are so radically different, so antagonistic one to the other, having such different objects and purposes, that you can not blend them. The two can not go together. You must take the one or the other. You can not blend the moonbeam on the cloud with the shadow in the cave. You can not blend the tint upon the cheek of the flower with the filth in the gutter. You can not blend the smile of love with the frown of hate. And you can not blend the patriot's love for his country with the selfish greed of the grafter. [Loud applause.]

Neither can that courage, that patriotism, that self-sacrifice which has always covered the American Navy with glory ever be blended with the insatiable passion for gold and the impudent clamor for profits in more battleships. [Applause.] The two antagonistic forces can not long coexist in the same character, for the stronger force will overcome and subdue and finally expel the weaker from the heart. You must choose the one or the other. For my part, I have seen the slimy fingers of commercialism clutching the white throat of the American Navy, and I have done now all that I could do to break asunder its unholy grip.

My country, 'tis of thee,
Sweet land of liberty,
Of thee I sing.

[Prolonged applause.]

Mr. PADGETT. Mr. Chairman, I listened with much interest and pleasure to the gentleman who has just taken his seat. He uttered some very beautiful sentiments; among them one sentiment that appealed to all of us, that you could not blend patriotism with graft. I agree with the gentleman absolutely, and as there is no effort and no attempt to blend patriotism with graft, it was an academic statement.

It is equally true, Mr. Chairman, that the patriotism which is not practical, that patriotism that lies supine, that patriotism that is neglectful of the interests of the country, that patriotism that fails to look to the environment in which one's country is placed and allows the country to be placed in a condition where it is defenseless, becomes criminal. [Applause.]

The gentleman from Texas [Mr. HARDY], following the lead of the gentleman from Missouri [Mr. HENSLEY], paid me a distinguished tribute in quoting extensively from a speech I made in 1910. As I said in reply to the gentleman from Missouri [Mr. HENSLEY], I repeat now, that the same motives and the same purposes that moved me at that time I still cherish. But conditions change, and men change with them. Countries change. Our environments differ, and the man who would move his actions according to the environment of 1910 when dealing with problems in 1914 is a lightning-bug statesman. His headlight is toward the stern of the ship. [Laughter and applause.]

Mr. Chairman, let me call the attention of the committee to a few facts. In 1910 the American Navy, by all the authorities in the world, was classed as second in efficiency and in fighting power. In 1914 it is classed by every naval authority in the world as No. 3, much behind Germany.

In 1910, of which I was speaking, what were the conditions that had just preceded us? Great Britain had recently before that time reduced its appropriation for new construction from $66,000,000 a year to $57,000,000, and was contemplating a further reduction to $52,000,000 a year, and the expenditures of all the other naval powers outside of the United States showed no practical increase over previous years. During the next two years Great Britain further reduced its new construction to $44,000,000, instead of, as it had been, $66,000,000; Russia reduced hers from $20,000,000 to $19,000,000; France from $22,500,000 to $21,000,000; and the United States had reduced its from $43,000,000 to $24,000,000. I speak in round figures.

What are the facts now? In 1913 Great Britain raised its appropriation for new construction to $81,500,000, Russia raised hers to $59,000,000, Germany hers to $55,000,000, and France to $45,000,000; and for the fiscal year 1914–15 England has increased her appropriation for new construction to $89,412,000, Germany hers to $49,889,000, France to $53,531,500, Russia to $66,750,846, and the amount carried in this bill that gentlemen here characterize as "graft" is $36,000,000 for the new construction in the Navy.

Gentlemen should deal with facts. Theories are beautiful, but facts are what appeal to intelligent, thoughtful men. We are dealing with conditions. The gentleman referred to the unhappy relation existing at this time with the country immediately south of us. It has called to your attention and has emphasized the important part that the Navy would play in case of trouble. With the country south of us without a navy, if the Navy of the United States is so important and so essential, what would be the necessities and the demands upon the Navy if we had a similar trouble with one of the great naval powers of the world, and what part would our Navy play greater than it is playing now?

The gentleman said "Liberty," and that reminded me of the fact that Patrick Henry said upon one occasion, memorable in the history of this country, that "Eternal vigilance is the price of liberty." And I say here in this company to-day that ever preparedness is the preserver of liberty. [Applause.]

You can not speak of liberty in the abstract and say "Eternal vigilance is the price of liberty," except eternal vigilance adapts itself to existing environments and learns the lesson and teaches the principle that liberty is preserved by preparation. The gentleman from Mississippi [Mr. WITHERSPOON] spoke very beautifully and touchingly a moment ago about—

My country, 'tis of thee * * * I sing.

Ah, yes; all of us. But, my countrymen, I never want the time to come in the history of this country when the American people, like the people of Israel in the days of old, shall hang their harps on the willows and sing of the disasters and of the defeats of their country. [Applause.] I want us ever to sing the glory, the triumphs, and the power of our country, and never with harps hanging upon the willows to sing of the humiliation of our country. I want us ever to be ready, so that we can say to the world, "We stand upon high ground; we stand for manhood; we stand for womanhood; we love peace, and we shall have peace even if we shall have to command it."

No man can have peace, no country can have peace, as long as it is in a condition where it can be kicked and butted as every other nation in the world may see fit to do. We must maintain ourselves in condition to uphold the peace and the dignity of our country, and that is what your Committee on Naval Affairs has reported in here.

But gentlemen have come in here from time to time and used the word "grafters" and all sorts of words imputing and insinuating improper purposes and improper motives. It appears in the testimony, in the statement of the Secretary of the Navy, that he submitted this proposition of two battleships to the President of the United States before he submitted it to the Congress, and it met the personal and official approval of President Wilson, and was submitted to Congress in obedience to and in conformity with the approval of President Wilson.

Was that graft? Is the President particeps criminis in graft? Is the Secretary of the Navy, who, as the representative of the people of this country, has charge of the affairs of this great department, and who has shown by his acts, as well as by his declarations, his purpose to scrutinize and to eliminate from the administration of his office every improper practice and to secure the best terms possible for the people of this country, who has saved hundreds of thousands of dollars already in the administration of his office—is he particeps criminis in graft when he submits this proposal? The gentleman from Mississippi [Mr. WITHERSPOON] stood upon this floor and paid a deserved and just tribute to the men of the Navy. Are these men of the Navy, who have stood in the front of battle and who have risked their lives and have dedicated their lives and their honor to the glory and the protection of the country, when they come here and give us the benefit of their study and their knowledge and their experience upon these questions, when they tell us that every consideration of patriotism and of self-preservation, every consideration of the welfare and the perpetuity of our Government demands of us that we have these two ships—are they, then, in the language of the gentleman, no longer to be trusted, are they no longer to be considered as honorable men, but as grafters, working in the interest of the trusts and the combines? Gentlemen, such arguments as that do not address themselves to the judgment and the intelligence of thoughtful men. They find no lodgment in honest hearts, when everything is laid open and we can understand and know the facts.

In conclusion, when we come to vote upon this matter, I address myself to you as American citizens interested in the welfare, the prosperity, the glory of the American people, interested in living up to the American history of the past and moved by an honorable purpose to preserve unstained and unsullied the dignity, the manhood, the glory of this country for the history that is to be made in the years to come. [Applause.]

Mr. Chairman, I ask for a vote.

Mr. GRAY. Mr. Chairman, I wish to offer an amendment to the amendment offered by the gentleman from New York [Mr. MAHER].

The CHAIRMAN. The gentleman from Indiana offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 3, line 12, after the word "each," strike out the period and insert the following:

"Both of the battleships hereby authorized shall be built and constructed at a Government navy yard."

Mr. MANN. I make a point of order that that is not an amendment to the amendment offered by the gentleman from New York [Mr. MAHER].

Mr. GRAY. I offer it, then, simply as an amendment, if you make your point of order.

The CHAIRMAN. Does the Chair understand the gentleman from Indiana to withdraw his amendment?

Mr. GRAY. I will withdraw it to offer it again.

Mr. MANN. Does he offer it as an amendment to the amendment or an amendment to the bill?

The CHAIRMAN. The gentleman offers it now as an amendment to the bill.

Mr. GRAY. I do not care how I offer it, so long as it is offered.

Mr. MANN. Under the order that was entered, is debate on this amendment in order? This is an amendment proposing to build in a navy yard.

Mr. GRAY. Have I the right to offer it as a substitute if this amendment is not in order?

Mr. MANN. I think so. I think the gentleman has the right to offer the amendment. Is debate on this amendment closed or not?

Mr. PADGETT. Debate upon the paragraph with reference to the number of ships, and so forth, has been concluded by agreement. The question whether ships shall be built in Government navy yards is left open for discussion

Mr. MANN. The amendment of the gentleman from Indiana and the amendment of the gentleman from New York [Mr. MAHER] also were in reference to where the ships should be built.

Mr. PADGETT. Yes; that question was left open.

Mr. MANN. If that amendment is to be discussed, why not let it wait until the other matter is disposed of?

Mr. GRAY. I asked the chairman when I could offer this, and he said to offer it right away. I am simply complying with his suggestion.

Mr. MANN. I have no desire to have it discussed, as far as I am concerned.

Mr. KONOP. Let us vote on the ships.

Mr. BROWNING. I reserve a pont of order on the amendment.

The CHAIRMAN. The Chair is in doubt as to whether the gentleman has made his point of order in time.

Mr. MANN. The amendment has not yet been reported as a separate amendment.

The CHAIRMAN. That is correct. The gentleman from Indiana now offers an amendment to the bill, which amendment the Clerk will report.

The Clerk read as follows:

On page 53, in line 12, after the word "each," strike out the period and insert the following:

"Both of the battleships hereby authorized shall be built and constructed at a Government navy yard."

Mr. BROWNING. I reserve a point of order on that amendment.

Mr. HARDY. A parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. HARDY. The gentleman from New York [Mr. MAHER] offers an amendment to have one of these ships built in a Government navy yard. Would not the amendment of the gentleman from Indiana, in order to determine its place in the category of motions, be more properly offered as a substitute for the amendment of the gentleman from New York?

The CHAIRMAN. The Chair does not feel called upon to determine that question at this time. The gentleman from Indiana [Mr. GRAY] came to the Chair with an amendment, which the Chair did not read, and asked the Chair when he should offer it. The Chair, without making a ruling, expressed the opinion that he could offer it whenever he chose after the expiration of the debate.

Mr. BROWNING. A parliamentary inquiry.

Mr. HARDY. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman from Texas.

Mr. HARDY. Would it not be in order to move that as a substitute for the amendment of the gentleman from New York?

The CHAIRMAN. That point has not been reached yet.

Mr. BROWNING. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BROWNING. As I understand, this amendment will not be voted on until after we decide on the number of battleships to be constructed.

The CHAIRMAN. The amendment properly comes up after the question has been determined whether the paragraph shall remain in the bill as reported by the committee.

Mr. BROWNING. Because if the amendment is offered now, I wish to make a point of order against it.

The CHAIRMAN. The Chair understands that the gentleman at this point reserves a point of order upon the amendment offered by the gentleman from Indiana, and the Chair will recognize him for that purpose at the proper time, but this is not the proper time.

Mr. MANN. The gentleman from Mississippi [Mr. WITHERSPOON] offers an amendment to strike out the paragraph. Of course, under the rules, any amendment to perfect the paragraph has to be voted upon before the amendment to strike out the paragraph. Both these amendments in reference to where the battleships shall be built are to perfect the paragraph, and, I think, would have to be voted upon first, unless by unanimous consent that is put over.

Mr. BARNHART. In the event that the House should decide that it would build only one battleship, or none at all, then the amendments would be of no use.

Mr. MANN. I am perfectly willing to have it put over; but the House might vote it or strike it out on the question as to whether the battleships were to be built in a navy yard or not.

Mr. BARNHART. The proper time to consider it would be after we decide the other matter, whether we shall have any battleships.

Mr. MANN. Not from a parliamentary point of view.

Mr. PADGETT. Mr. Chairman, I will ask that the vote be taken on the question as to whether or not we shall have one battleship or two or none; and then vote on the question of where they may be constructed.

Mr. MOORE. A parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MOORE. I desire to offer an amendment to the amendment offered by the gentleman from New York [Mr. MAHER].

Mr. CALDER. Why not determine first whether we shall build one or two ships.

Mr. MOORE. My inquiry is whether or not it is now in order to offer an amendment to the amendment offered by the gentleman from New York [Mr. MAHER].

The CHAIRMAN. The Chair is of opinion that it is in order.

Mr. MOORE. Then I present an amendment to the amendment offered by the gentleman from New York [Mr. MAHER], which I send to the desk.

The Clerk read as follows:

Add the following to the Maher amendment: "Unless it shall be found that but one Government yard is equipped to build a battleship."

Mr. CALDER. To that I make a point of order.

Mr. BROWNING. I reserve a point of order.

Mr. MOORE. Mr. Chairman, the point of order being reserved, is it in order to discuss the point of order?

Mr. PADGETT. Mr. Chairman, I ask now that the vote be taken upon the question whether there be one battleship or two, and then that a vote be taken on whether the paragraph authorizing any may be voted upon, and, after that is done, that the vote may be taken on these other amendments.

The CHAIRMAN. Is there objection?

Mr. J. M. C. SMITH. Reserving the right to object, would it be in order to offer an amendment now and have it pending?

The CHAIRMAN. It would.

Mr. J. M. C. SMITH. I offer the following amendment.

Mr. BARNHART. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BARNHART. According to the statement of the chairman of the committee, if two battleships are decided upon those in favor of one battleship or none will have no opportunity to express their preferences.

Mr. MANN. There is an amendment pending for one battleship.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment by Mr. J. M. C. SMITH:
On page 53, at the end of line 12, add the following: "That all materials used in the battleship or battleships authorized shall be purchased and procured in the United States."

Mr. PADGETT. To that I reserve a point of order.

Mr. ROBERTS of Massachusetts. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. ROBERTS of Massachusetts. Is the amendment of the gentleman from Indiana [Mr. GRAY] pending before the committee?

Mr. MANN. It is pending; it was reported.

Mr. ROBERTS of Massachusetts. If so, I desire to offer an amendment to that amendment.

The CHAIRMAN. The Chair is of the opinion that the amendment offered by the gentleman from Indiana [Mr. GRAY] is pending, and the Clerk will report the amendment to the amendment.

The Clerk read as follows:

Add to the amendment of Mr. GRAY the following:
"And the Secretary of the Navy is hereby authorized to equip such navy yards as he may designate in which the battleships herein authorized are to be built with the necessary building slips and equipment, and the sum of $200,000, or such part thereof as may be necessary, is hereby appropriated for each navy yard designated by the Secretary of the Navy in which the battleships are to be constructed."

Mr. JONES. To that, Mr. Chairman, I reserve a point of order.

Mr. PADGETT. Now, Mr. Chairman, I ask that a vote may be taken on the amendment offered to strike out "two" and insert "one."

The CHAIRMAN. Without objection, the vote will be put that way, and the Clerk will report the amendment.

The Clerk read as follows:

Page 53, line 8, after the word "constructed" strike out "two" and insert "one"

Mr. MOORE. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. MOORE. When the gentleman from Tennessee, chairman of the committee, was arranging about time for discussion of the general battleship proposition, I made an inquiry as to whether there would be any time for arguing these amendments, and was told that that would come after the general discussion; that is to say, the 2 hours and 20 minutes discussion.

Mr. PADGETT. I stated that all amendments were concluded except the one of where the battleships should be built.

The CHAIRMAN. The question is on the adoption of the amendment just reported.

The question was taken; and on a division (demanded by Mr. HENSLEY and Mr. BUCHANAN of Illinois there were 80 ayes and 128 noes.

Mr. HENSLEY. Tellers, Mr. Chairman.

Tellers were ordered, and the Chair appointed as tellers Mr. PADGETT and Mr. BUCHANAN of Illinois.

The committee again divided; and the tellers reported that there were 91 ayes and 148 noes.

So the amendment was rejected.

The CHAIRMAN. The next amendment to be voted upon is the Moore amendment offered to the Maher amendment.

Mr. MANN. Mr. Chairman, I ask unanimous consent that the vote may now be taken on the Witherspoon amendment.

Mr. PADGETT. I ask unanimous consent that a vote may now be taken on the Witherspoon amendment, to strike out the paragraph, and then, having disposed of that, we can perfect it with the other amendments.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

The question was taken; and on a division (demanded by Mr. WITHERSPOON) there were 41 ayes and 152 noes.

So the amendment was lost.

The CHAIRMAN. The question now is on the amendment offered by the gentleman from Pennsylvania to the Maher amendment, which the Clerk will report, and the amendment to the amendment.

The Clerk read as follows:

Amendment by Mr. MAHER:
On page 53, line 12, after the word "each," insert the following: "At least one of the said battleships hereby authorized shall be built and constructed at a Government yard."

Mr. MANN. I reserve a point of order on the Maher amendment.

Mr. BROWNING. And I make the point of order against that amendment.

The CHAIRMAN. The gentleman from Illinois reserves a point of order to the amendment and the gentleman from New Jersey makes a point of order against the amendment to the amendment.

Mr. BROWNING. No, Mr. Chairman, I make it against the Maher amendment first.

Mr. MURDOCK. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MURDOCK. The Chairman first proposed that the amendment to the Maher amendment should be read, and the Clerk was about to read the amendment to the amendment, when the point of order was made by the gentleman from New Jersey [Mr. BROWNING].

Mr. MANN. The gentleman is late. When the gentleman from New York [Mr. MAHER] offered his amendment this afternoon, three hours ago, I reserved the point of order upon it.

Mr. MURDOCK. I realize that; but latterly just at this moment the Chairman asked the Clerk to read the amendment to the amendment.

Mr. MANN. The point of order had not been disposed of.

The CHAIRMAN. The gentleman from Kansas will no doubt remember that when the gentleman from New Jersey [Mr. BROWNING] rose some minutes ago for the purpose of reserving the point of order to the amendment, the Chair noted his reservation. The gentleman rose to a parliamentary inquiry, to know whether or not his reservation of a point of order at that time was in order. The Chair answered him by saying, in substance, that he would be recognized at the proper time, and in the clamor the Chair was endeavoring to recognize the gentleman from New Jersey, in order that he might make or reserve his point of order.

Mr. BROWNING. Mr. Chairman, I make the point of order that it changes existing law, and limits the power of the Secretary to build these vessels wherever he pleases.

Mr. MAHER. Mr. Chairman, is it not too late to make that point of order now?

The CHAIRMAN. The Chair has just held that it is not.

Mr. FITZGERALD. Mr. Chairman, will the gentleman state what law this changes?

The CHAIRMAN. The Chair was about to suggest to the gentleman from Tennessee [Mr. PADGETT], having charge of the bill, that he would be very glad to hear him upon the point of order.

Mr. PADGETT. Mr. Chairman, the amendment as written, I think, is subject to the point of order. It is not a limitation and does not purport to be, but is a direction, and it is held that wherever there is direction contained in an amendment on an appropriation bill which will direct or control the discretion of the Secretary it is legislation, and, therefore, is subject to the point of order. This does not purport to be a limitation, but is a direction to the Secretary.

Mr. FITZGERALD. Mr. Chairman, there is no law which authorizes these ships. There is no authority which confers upon the President the right to construct them at any place. The authority for the construction of these ships is contained in the paragraph in the bill. There is no statute authorizing ships for the Navy. This paragraph authorizes the President to have constructed two battleships. It is clearly legislation, because anything that empowers the President to do something which he can not do at the present time is legislation. The President has no power to have constructed two battleships or one battleship or any battleship.

The CHAIRMAN. The point of order comes too late from the gentleman from New York, if he makes it to the paragraph.

Mr. FITZGERALD. I am not making a point of order to the paragraph, Mr. Chairman, but I am calling the attention of the Chair to the fact that this paragraph itself is legislation, because it confers an authority which does not now exist. There is no law authorizing the President or any official to have ships constructed for the Navy. That authority is contained in this paragraph, and any germane limitation upon the authority to construct must be in order. This is the legislation which gives the authority to have the ships constructed.

Mr. MURDOCK. Mr. Chairman, will the gentleman yield?

Mr. FITZGERALD. Yes.

Mr. MURDOCK. Is not the history of this item this, that originally it was held out of order by the Chair and that the committee overruled the Chair on an appeal from his decision?

Mr. FITZGERALD. Mr. Chairman, this old provision has a very peculiar history. It was held that authority to construct ships for the Navy is in order on a naval appropriation bill. It is clearly legislation, because there is no authority in any existing law to add ships to the Navy. This provision gives the authority to add ships to the Navy, and if it gives the authority to add ships to the Navy, any provision that is germane to the provision granting that authority must be in order.

Mr. MANN. Mr. Chairman, will the gentleman yield for a question?

Mr. FITZGERALD. Certainly.

Mr. MANN. Do I understand the gentleman to say that, in his opinion, a battleship provision is subject to a point of order?

Mr. FITZGERALD. Mr. Chairman, I have not expressed any opinion on that question at all.

Mr. MANN. I am asking the gentleman from New York whether he does express the opinion that the battleship provision is subject to a point of order as new legislation?

Mr. FITZGERALD. But I have not expressed any opinion on that question.

Mr. MANN. The gentleman said it is legislation; and if it is legislation, it is not in order.

The CHAIRMAN. The Chair will settle that dispute by holding that if it were subject to a point of order it is not so now.

Mr. MANN. I understand that, Mr. Chairman, but I wanted to lead up to another question, and that is whether the gentleman from New York thought the rest of these items were subject to a point of order?

Mr. FITZGERALD. Mr. Chairman, the gentleman is as well informed upon these questions as I am.

Mr. MANN. Having been in the chair on the consideration of a number of naval appropriation bills.

Mr. FITZGERALD. And sometimes having been overruled. It has been decided that a provision authorizing additional battleships is in order upon a naval appropriation bill. There is no authority in any statute to build battleships, and any provision in a bill which confers an authority upon the executive officer which he has not at the present time is certainly legislation. If it be not legislation, it can not be defined.

The CHAIRMAN. What does the gentleman say to this proposition? If the paragraph in the bill originally was subject to a point of order, and a point of order was not made, may it not now be perfected by germane amendments?

Mr. FITZGERALD. There is no doubt at all of that, Mr. Chairman.

Mr. PADGETT. It is not subject to a point of order and it has never been so held.

Mr. SAUNDERS. Mr. Chairman, if this paragraph was subject to a point of order, and no point of order had been made, the answer to the question of the Chair would be in the affirmative, namely, that the paragraph could be perfected by a germane amendment. That principle, however, does not fit this situation. In the first place this paragraph is not subject to a point of order.

The CHAIRMAN. Is the Chair correctly informed this is an exception to the general rule?

Mr. SAUNDERS. This is the exception argued a few days ago. In the second place the amendment offered by the gentleman from New York is not a germane amendment to this paragraph authorizing the construction of two battleships. After the power is afforded for the construction of battleships, the authorities have the right to exercise a discretion as to where those battleships may be built, so that the amendment of the gentleman from New York proposing to limit the discretion of the authority of the official charged with the building of the ship, is certainly not a limitation. It does not perfect in anywise this particular paragraph. He proposes something that is not germane, namely, a proposition to limit the discretion of the President or the Secretary with respect to the yard or place at which the ship may be built. A limitation of discretion is certainly legislation, and on that ground the amendment of the gentleman from New York is subject to the point of order.

Mr. MAHER. Mr. Chairman, a similar amendment to the one I have offered has been offered in this House for some years past. In the Sixtieth Congress I find a similar amendment was offered here at that time on this bill. I will read to you what the Chairman of that committee held at that time. This is the Sixtieth Congress, first session, page 4807, House proceedings. After considerable discussion on both sides on the amendment pro and con, here is what the Chair said:

> The Chair is prepared to rule. The Chair has not before him the ruling made at the last Congress, although the impression and recollection of the Chair is that the amendment was then offered to a succeeding paragraph in the bill. But the paragraph now before the committee contains the provision that the Secretary of the Navy may build the vessels herein authorized by contract or in such navy yards as he may designate. That provision of itself might be considered legislation, but, if so, any amendment germane to it would be in order. The Chair thinks the amendment offered by the gentleman from New York is germane, and the Chair therefore overrules the point of order.

The Chairman at that time was the gentleman from Illinois [Mr. MANN].

Mr. BROWNING. What is the amendment?

Mr. MAHER. An amendment similar to the one I have offered.

Mr. BROWNING. Will the gentleman be kind enough to read it?

Mr. MAHER. The amendment was:

> Strike out the words "by contract or in navy yards, as hereinafter provided," on lines 1 and 2 of page 76, and add, after the word "eight," on line 7, on page 76, the following provision: "At least one of such battleships shall be built and constructed, under the direction of the Secretary of the Navy, at one of the navy yards; the other of said battleships may also be constructed at one of the navy yards, in the discretion of the Secretary of the Navy, or by contract, as hereinafter provided."

Mr. BROWNING. Was the point of order made?

Mr. MAHER. Yes.

Mr. BROWNING. What did the Chair state?

Mr. MAHER. The Chair ruled it was not subject to the point of order at that time.

Mr. BROWNING. Who was the Chairman?

Mr. MAHER. The gentleman from Illinois [Mr. MANN].

Mr. GOLDFOGLE. Mr. Chairman, I have a clear recollection of the amendment to which my colleague [Mr. MAHER] referred as having been ruled on during the Sixtieth Congress. The gentleman from Illinois [Mr. MANN] was in the chair. The amendment was offered by me. The question arose whether the amendment was germane, and the point of order was made against the amendment. The question arose as to whether the amendment was in order, it directing the place where one or more battleships should be built by the Secretary of the Navy, who in the bill was given discretion, as in the present pending bill he is given discretion, to build the ships; and after discussion, as the Chair will find in the RECORD to which my colleague a moment ago alluded, the gentleman from Illinois [Mr. MANN] then being in the chair ruled the amendment in order. The situation as then presented is no different from the situation now presented. So, upon the authority of the gentleman from Illinois, as well as upon the authority in another case that substantially presented the same phase in the succeeding Congress, I respectfully submit the amendment is germane and in order.

Mr. JONES. Mr. Chairman, I desire to direct the attention of the Chair to a ruling upon a proposition similar to this. On April 20, 1900, the naval appropriation bill was under consideration——

The CHAIRMAN. What is the section?

Mr. JONES. I am reading from section 3864 of Hinds' Precedents, volume 4:

> On April 20, 1900, the naval appropriation bill was under consideration in Committee of the Whole House on the state of the Union, when Mr. J. J. FITZGERALD, of New York, offered to the provision for building new vessels the following amendment: "To be constructed under the supervision and direction of the Secretary of the Navy in such of the navy yards of the United States as are best adapted therefor."

Now, that amendment was, in substance, precisely the same as the amendment which is now offered under like conditions by the gentleman from New York. I do not think there will be any question as to that. I will continue to read:

> Mr. George E. Foss, of Illinois, made a point of order against this amendment.
>
> After debate the Chairman said:
>
> "It appears to the Chair that the natural interpretation of the language just read by the gentleman from New York [Mr. FITZGERALD] is that under the construction of the present law by the Secretary of the Navy there is no law for building any of these vessels in the navy yards, but that legislation would be necessary in order to authorize that."

It will be observed, Mr. Chairman, that the gentleman from New York admits the same thing by this amendment. The Chair then proceeded in these words:

> This is the interpretation the Chair would put upon the language which the gentleman has just read. Aside from that, however, the question now before the Committee of the Whole is whether this provision is new legislation or whether it is a limitation of the appropriation. There are several decisions to which the attention of the Chair has been called. One of them reads in this way: "Provisions that bids for the construction of naval vessels should be limited to bidders having adequate plants and not having over a specified number of vessels under construction were held to be in the nature of legislation and not a limitation."
>
> That decision would seem to throw a good deal of light upon the question of order on this amendment, which provides that the Secretary of the Navy shall construct these vessels "in such navy yards of the United States as are at present established therefor." This would seem to be a parallel case. The Chair therefore, following the decision made in the Fifty-fifth Congress, sustains the point of order.

Now, Mr. Chairman, the gentleman from New York [Mr. FITZGERALD] appealed from this decision, and the ruling of the Chair was sustained upon a vote by tellers of 82 ayes to 74 noes. This is a ruling exactly in point, and if the Chair follows it he must hold that this is new legislation and not in the nature of a limitation.

Mr. GOLDFOGLE. Mr. Chairman, the gentleman from Virginia [Mr. JONES] failed, I am afraid, to recognize the fact that the amendment offered by my colleague [Mr. MAHER] is in precisely the same language and applied to substantially the same kind of a paragraph as the amendment which was offered by me in the Sixtieth Congress, to which I have already alluded. So that the case, as it appeared when the gentleman from Illinois [Mr. MANN] was in the chair, is exactly the same and stands on all fours with the one now presented upon the present point of order. There is not a particle or shade of difference between the two cases. The Secretary being given discretion in the bill to build the ships, it is within the power of the House to say where those ships shall be built, and so it was ruled on my amendment, and there is no distinction that can fairly be made between these two cases. It will be remembered that the amendment that was ruled in order had reference to the ship afterwards named the *Florida*. In a later Congress—I can not turn to the pages in the RECORD just now—an amendment was offered by my colleague [Mr. CALDER], which was at first ruled out, but afterwards, at a later stage, ruled in. It was practically the same in language as the amendment now offered by my colleague [Mr. MAHER]. So you have the two authorities for ruling in this amendment.

Mr. GRAY and Mr. MANN rose.

The CHAIRMAN. The gentleman from Indiana is recognized.

Mr. GRAY. Mr. Chairman, I am not a parliamentarian, and I do not claim such expert knowledge. I simply want to make an inquiry. I understand we have power in this bill to determine the number of ships; I understand that we have power to determine the size of the ships; I understand we have power to determine the type of the ships; we have power to specify the number of guns and the type of guns; we have power and authority here to incorporate a thousand modifications and variations; in fact, the full power of authorization in every phase and detail of full and complete construction. The question I wanted to ask is why this great and broad power of full authorization does not include the lesser power as an incident to the main object, to specify where the ships are to be built and how they should be manufactured and constructed?

Mr. GOLDFOGLE. And so it was held in the preceding cases.

Mr. GRAY. I was making an inquiry and waiting for some gentleman to enlighten me as to by what principle such incidental power is excluded under such full and general authority.

Mr. MANN. Mr. Chairman, I have a good deal of hesitancy in expressing an opinion on any point of order on the naval bill, because for a number of years I occupied the position of Chairman while the naval bill was under consideration, and was compelled to make a good many rulings when I thought I had the matter fresh in my mind, and I might make an argument now contrary to some of the rulings I made then. If so, I should think better of the ruling than I do of the argument.

However, Mr. Chairman, there are certain principles involved, it seems to me. The ruling is that an appropriation for a new battleship is in order because it is a continuation of a work in progress, to wit, that of building up a navy. But this item is not any appropriation at all. There is no appropriation carried in the paragraph under consideration. It is, as suggested by the gentleman from New York [Mr. FITZGERALD], who would not follow out quite the logic of his position, a pure matter of legislation, an authorization to the President to construct two battleships, like an authorization to construct two revenue cutters or an authorization to construct a public building, or an authorization to construct lighthouse tenders, the appropriation either following or being in separate items.

Now, this item is under consideration, and no point of order was made on the paragraph that fixes a limit of cost upon it; that fixes the character of it as to armor and armament; and that fixes the speed of it. I have no doubt, unless I have ruled differently, that we can proceed now and provide through legislative provisions concerning the authorization which we have given to the President. If we had a bill pending before us providing that the President might construct two revenue cutters, or four revenue cutters, plainly, as a matter of legislation, we could say that they should or should not be built in a navy yard—the same power, it seems to me, that we have here. If this item were an item appropriating $15,000,000 or $30,000,000 for the construction of a certain character of battleships, then that would not be legislation. The legislative provision would not be in order.

The CHAIRMAN. The Chair is compelled to admit that with him there is some doubt surrounding this proposition. However, he finds that the building of these ships is authorized. There is no direction anywhere, of which the Chair is aware, that they shall be built by contract. Neither does the Chair know of any direction providing that they shall be built in Government navy yards. The natural supposition, however, is that if the Government is authorized to build them, the Government itself should build them if it can, and, therefore, in a Government navy yard. Being somewhat in doubt, for those reasons, the Chair overrules the point of order.

Mr. MAHER. Mr. Chairman, I wish to speak on the amendment.

The CHAIRMAN. The gentleman from New York [Mr. MAHER] is recognized.

Mr. STAFFORD. Before the gentleman proceeds, may we have the amendment read?

The CHAIRMAN. The Clerk will again report the amendment.

Mr. MURRAY of Massachusetts. And the amendment to the amendment.

Mr. MOORE. May the amendment to the amendment be read in connection with the amendment?

The CHAIRMAN. The Clerk will report the amendment, and then report the amendment to the amendment, so that the committee may have full information.

The Clerk read as follows:

Amendment by Mr. MAHER:
On page 53, line 12, after the word "each" insert the following:
"At least one of the said battleships hereby authorized shall be built and constructed at a Government yard."
Amendment to the amendment by Mr. MOORE:
Add to the amendment the following:
"Unless it shall be found that but one Government yard is equipped to build a battleship."

Mr. CALDER. Mr. Chairman, I reserved a point of order against that amendment which has just been read. I did at the time it was offered.

The CHAIRMAN. A point of order is reserved against the amendment.

Mr. CALDER. I make a point of order.

Mr. MANN. It is not subject to a point of order.

The CHAIRMAN. Does the gentleman reserve it or make it?

Mr. CALDER. I make the point of order.

The CHAIRMAN. The Chair overrules the point of order.

Mr. SABATH. Mr. Chairman——

The CHAIRMAN. The gentleman from New York [Mr. MAHER] has the floor.

Mr. SABATH. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. SABATH. Some time ago the gentleman from Indiana [Mr. GRAY] introduced an amendment to the amendment offered by the gentleman from New York [Mr. MAHER]. May I inquire what became of that amendment?

The CHAIRMAN. That amendment has been discussed to some extent. The Chair thought it was understood that that amendment was offered as a separate amendment.

Mr. SABATH. Would not that be in order now as an amendment to the amendment offered by the gentleman from New York? It deals directly with the subject matter.

The CHAIRMAN. It has been held that it was offered as a separate amendment.

Mr. SABATH. The gentleman from Indiana offered an amendment that both of these battleships, instead of one, should be built in a Government navy yard. Consequently it must be in order, and it is in order.

Mr. GRAY. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The Chair is of the opinion——

Mr. KINKEAD of New Jersey. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. KINKEAD of New Jersey. Was not the gentleman from New York [Mr. MAHER] recognized before the parliamentary inquiries were made?

The CHAIRMAN. The Chair recognized the gentleman from New York under the five-minute rule. The gentleman from Illinois [Mr. SABATH] then rose to a parliamentary inquiry, which the Chair will determine for him by the time the gentleman from New York has concluded.

Mr. GRAY. Mr. Chairman, I rise to a parliamentary inquiry.

Mr. GOLDFOGLE. Mr. Chairman, I rise to a question of order.

The CHAIRMAN. The Chair will state that business can not be transacted in so much confusion. The gentleman from New York [Mr. MAHER] has the floor and will proceed.

Mr. MAHER. Mr. Chairman, there have been some radical changes made in the Government construction of battleships during the past 10 years. Prior to 1903, when the first battleship was built in the Brooklyn Navy Yard, it had been customary for private contractors to take about three years to

build battleships, as in the case of the *Georgia* and the *Nebraska*, and they were seldom completed within contract time, which was usually exceeded by six or eight months. As compared to this, the *Connecticut*, built by the Government in 1903–4, was launched in 16 months after the keel was laid. This is an important consideration in the construction of modern battleships, considering the fact that a ship is out of date in less than 10 years and practically useless in 20 years.

A battleship costing $15,000,000 would depreciate at that rate about a million dollars a year; so that if the Government, by continuing its policy of constructing some of its own battleships, can thereby force private contractors to reduce the time required for building from three years to one year, as at present is the case, it would be economy even if each ship built by the Government cost $2,000,000 more than by contract.

The *Connecticut*, which was built in a navy yard, cost only about 5 per cent more than its sister ship built by private contract; and this added expense was entirely made up by the fact that the workmanship on the Government-built vessel excelled that of the other to such an extent that thousands of dollars were saved in repairs of the navy-yard-built ship, according to the records.

Much has been made of the alleged fact, by the opponents of Government construction, that the *Florida*, which was built at a navy yard, cost nearly $2,000,000 more than its sister ship, the *Utah*, which was built by contract. However, much of this excess cost, it has repeatedly been asserted on the floors of Congress, was due to overhead charges for maintaining the navy yard, most of which would have existed whether there had been any ship at the navy yard or not; so that the costs charged to the battleship were not all caused by the building of the ship, and should not be counted as a part of its cost.

It has also been brought to our attention that contractors building battleships for the Government about that time were losing several hundred thousand dollars on their contracts, due perhaps to their efforts to discourage Government construction, knowing that if it could be shown that Government construction was much more expensive comparatively that there would be a chance of having the Government shops put out of commission, and they could go back to their old practices and recoup their losses.

Whatever the facts might be with regard to the cost of the *Florida*, the more recent efforts at battleship construction in navy yards have been toward lower costs and still faster records.

When the *Pennsylvania* was let to the Newport News Shipbuilding Co. in 1913 the bid by the New York Navy Yard was only about $35,000 more than the bid of the concern that got the contract, and the bid of the Mare Island Navy Yard exceeded the Newport News Co. by only $12,000; either of these differences is a mere bagatelle.

As to the relation of the navy-yard bids to the actual cost of the work, it can be cited that the cost of the battleship *New York*, which has just been completed by the New York Navy Yard, was $659,635.41 less than the original estimate by that navy yard according to the latest facts available at the Navy Department. Furthermore, the battleship *New York* was launched in 12 months and 19 days after the keel was laid, a record that is worth much in these days of rapidly changing designs in war vessels.

It is now predicted that a battleship can be built at a navy yard in about 10 months and at less cost than formerly, unless Congress destroys the present splendid organization of its own shipbuilding establishments by failing to have battleships built there.

In order to maintain a trained and efficient force for construction work in our navy yards it is necessary to build continually, otherwise both equipment and working force will become demoralized and unable to compete successfully with the shipbuilding contractor.

Congress can assist in Government shipbuilding by making the appropriation at such a time as will enable the navy-yard officials to lay the keel of one battleship not later than two weeks after the launching of the last ship. If this method is adopted, it will prove to be a great saving to the Government. It will also provide a continuity of employment for the mechanics and laborers. At a recent meeting of the Committee on Labor the Secretary of the Navy, Mr. Daniels, stated that in his opinion the Government-built ship was the best, and he further stated that there was less repair work on the Government-built vessel.

Mr. DALE. Mr. Chairman, will the gentleman from New York yield?

The CHAIRMAN. Does the gentleman yield to his colleague?

Mr. MAHER. I have not time. Let me state these figures.

Mr. DALE. Let me ask a question.

Mr. MAHER. Well, go ahead.

Mr. DALE. Is it not a fact that the Secretary of the Navy, Mr. Daniels, publicly commended the employees and attachés of the Brooklyn Navy Yard, who were instrumental in so speedily equipping the *New York* previous to her sailing down to Mexico?

Mr. MAHER. Yes; it is a fact.

From the statement received from the Navy Department it seems that the *New York* has been required to bear the expenses of everything that is a direct charge against the yard, whether it be gratuities which are created by Congress or Executive orders, or indirect charges (overhead) from which the ship was exempt. The contract was awarded to the Newport News Shipbuilding Co. to build the *Texas*, at a cost of $5,885,695, they being the lowest bidder; in addition to the contract price $55,000 will be added to cover the cost of changes which is being done by the navy-yard force, making a total of $5,940,695; while the *New York* allotment was $6,490,000, exclusive of indirect charges, both ships to be completed in 36 months.

The statement shows that the *New York* will cost $6,956,442; included in these figures are expenditures covering $382,218.17 for annual leave, holidays, disability, which are gratuities, having been created by act of Congress or Executive orders. The act of February 1, 1901, gives 15 days' leave of absence to all employees who have been continuously employed for one year. The act of May 3, 1908, provides that employees injured in the performance of their duties and have been absent for 15 days shall be paid their regular rate of pay that they would have received had they been employed until they are able to resume their duties. Holidays cover the payment of seven regular holidays, namely, New Year's Day, Washington's Birthday, Decoration Day, Fourth of July, Labor Day, Thanksgiving Day, and Christmas Day; and for the past three years the Saturday half holiday during the three summer months has been granted. It has been decided that the expense incurred by leave, holidays, and disability are not charged against a new ship, nor does it appear as a charge against any repair work, and I fail to see why it should be included in the expense of a new ship being built in the yard. This charge would exist and must exist—new ship or old ship—all work must be suspended on these days; for this reason it is a charge that should be borne by the Government at large.

Classified employees are charged with $287,070; this is a special allotment paid out of increase of Navy pay of classified employees covering clerical and drafting expenses; this is the only place that this expenditure appears; no provision is made to charge this against any work; there is but one way that this could be arrived at, and that is by estimate or pro rata.

The greater part of the material used in the construction of a new ship is delivered on lighters and railroad cars, and is handled by laborers and riggers assigned to this work; the only expense incurred is the labor of these men and this the ship pays for directly; still if the material was handled for use in repair work, part of the cost would be charged to the ship as an overhead charge.

The construction period of the *New York* was 36 months; she was placed in commission in 35¾ months, that is, April 15, and on April 26 sailed from this yard, less than 36 months, and something that has never been equaled either by private or Government yards.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. MAHER. Mr. Chairman, I would like to have one minute more.

Mr. SABATH. Mr. Chairman, I ask unanimous consent that the time of the gentleman be extended two minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. MAHER. Just one minute. Now, Mr. Chairman, I will discuss the charges:

INDIRECT OR OVERHEAD CHARGE.

This account shows an expenditure of $855,430.38. This represents approximately 33 per cent of the total labor charges expended for building the *New York*. It is divided into two classes, namely, shop and general expense, and covers a large scope in navy yards.

SHOP EXPENSE

Is divided into subheads, such as supervision—that is, the masters, quartermen, leading men, planners, and progress man—repairs to shops, repairs to buildings, cleaning, repairs to hand tools, fuel, light, and power. The repairs mentioned cover,

in fact, the upkeep of shops. Some of the charges might be considered fair; still, as they cover the upkeep of the plant, this class of work would have to be done whether a ship is building or not. No shop is used exclusively for the work in connection with the building of a new ship. Tool and machine repairs should be charged against the plant.

GENERAL EXPENSE

Covers cleaning the yard. The cost of cleaning the ship is charged against the ship; that is paid for directly. Minor repairs to derricks, shears, cranes, floats, punts—that are used for mooring and docking a ship—upkeep of dry docks. What has a new ship to do with these items? It is almost 2 years before she is ready to be dry-docked; for 14 months she is being built on the ways. How can she be charged with any of the general items? All the ship wants is space enough to be built. The bulk of her work is done in close proximity to where she is lying, and this applies to her whole construction period. She not only bears her own burden—that is, the supervisors that have charge of her building—but a large part of the expense of the yard, as these figures are based on productive labor of the entire yard. Take, for example, when the yard is full of ships undergoing repairs; she has to saddle part of their expense. As a further illustration, with no work in the yard other than a ship being built on the ways, she would be required to carry the entire expense of the yard, with the result that overhead charges would almost be equal to the direct charge.

For the purpose of comparison the following is quoted:

Ship.	Length.	Keel laid.	Launched.	Time to launch.
	Feet.			*Months.*
Connecticut	456	May 10, 1903	Sept. 29, 1904	16
Florida	521	Mar. 9, 1909	May 12, 1910	14
New York	573	Sept. 11, 1911	Oct. 30, 1912	13

Note the size of the ships and the length of time required to launch. This is but one of the many instances that proves that the *New York* is a record ship.

Total expenses of the *New York* as reported		$6,056,442.55
Less leave, holiday, and disability	$392,218.17	
Classified employees	287,070.00	
Indirect	855,430.38	
		1,534,718.55
		5,421,724.00
Charge all clerical force	287,070.00	
And 40 per cent of indirect	342,172.00	
		629,242.00
		6,050,966.00

If we deduct pay for holidays and half holidays, it will be demonstrated that the *New York* cost no more than its sister ship the *Texas*. We should take into consideration the fact that the *Texas* is now in the New York yard receiving a general overhauling. The work done at a private yard is being torn out of that ship, and the mechanics in the yard are installing new apparatus. They had to tear out the fuse boxes overhead and put them in the bulkhead to prevent the possibility of an explosion in the ship, which could be brought about by a mechanic reaching up to the fuse box and thereby creating an arc and causing serious damage, and perhaps blowing up the ship without anybody firing a shot at her.

The CHAIRMAN. The time of the gentleman from New York has again expired.

Mr. MANN. I ask unanimous consent, Mr. Chairman, to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. BROWNING. Mr. Chairman, there is only one navy yard in the United States that is equipped to build these large battleships, and that is the Brooklyn yard.

Mr. CALDER. Mr. Chairman, will the gentleman yield?

Mr. BROWNING. Yes.

Mr. CALDER. Can not the Mare Island Navy Yard?

Mr. BROWNING. No; not a battleship. A large vessel can be built there, but not a big battleship.

Mr. CALDER. I think it can build a battleship. I beg the gentleman's pardon.

Mr. BROWNING. Now, Mr. Chairman, the Brooklyn Navy Yard has just laid the keel of battleship *No. 39*, and in my opinion that ship can not be launched before April, and probably not before June, of next year.

Mr. Chairman, there is another consideration to be taken into account in building these ships in navy yards, and that is the quality of the work in construction. I have been told by prominent Navy officers that there are no better ships built than those constructed by the New York shipbuilding plant, located in my city, and I have no reason to doubt but that the Newport News Shipbuilding & Dry Dock Co. can build just as good ships.

Now, I want to put some figures in the RECORD that are official, accompanied by a statement that is official, contained in a letter written by Admiral Watt, Chief of the Bureau of Construction.

On the *New York*, which has just been finished in the New York Navy Yard, for labor there was expended on the hull $1,902,817.26; on machinery, $671,078.63; a total of $2,573,895.89.

The cost of the material on the hull was $1,654,399.51; the cost of material for machinery was $1,164,498.60, a total of $2,818,898.11.

The indirect charges on the hull were $641,567.52 and on the machinery $213,862.86, a total of $855,430.38.

Now, here comes a remarkable item. The amount of money that was paid for leave to mechanics and workmen amounted to $174,911.73, and for holidays $177,227.40; the amount paid for leave and holidays of classified employees in the construction of the *New York* amounted to $28,930; a total for leave and holidays of $381,069.13.

The disability charges amounted to $40,079.04. The total cost to the Government by reason of construction of this battleship in a navy yard, exclusive of armor and armament, was $6,956,442.55.

The *Texas*, sister ship of the *New York*, which was built by contract at Newport News, cost $5,830,000, a difference in favor of the battleship *Texas* of $1,126,442.55.

Now, I have another very striking illustration. The cost of U. S. battleship *Florida*, built by the Government in the New York Navy Yard, was as follows:

For labor on hull, $2,197,478.41; labor on machinery, $670,734.68; a total for labor of $2,868,213.09.

Indirect charges on hull, $751,013.98; indirect charges on machinery, $222,270.05; a total of $973,284.03.

Cost of material on hull, $1,286,047.13; cost of material for machinery, $1,167,592.80.

The total cost of the hull was $4,234,539.52, and the total cost of the machinery was $2,060,597.53, making the total cost of the ship, exclusive of armor and armament, $6,295,137.05.

Her sister ship, the *Utah*, built under contract in the Camden (N. J.) yard, cost $4,018,930.80. The cost of the work performed by the Government, after delivery, on account of changes and improvements, was $126,297.54. The total cost of the *Utah*, exclusive of armor and armament, was $4,145,228.34.

The battleship *Florida*, the sister ship of the *Utah*, built in the Government navy yard at Brooklyn, cost $2,140,908.71 more than the *Utah*.

Gentlemen, as I said the other day in some remarks that I made, we need our navy yards with their splendid equipment and magnificently trained artisans and workmen, but we also need the efficient and prompt service rendered by the private establishments.

Now, I do not understand the position of my friends on the other side of the House, or those who wish to build these vessels in Government yards. They are pledged to economy, and there is no economy in building a ship in a Government yard. They cost anywhere from $1,000,000 to over $2,000,000 more than ships built in private yards.

Mr. GOULDEN. I should like to ask my friend from New Jersey whether he does not consider the construction done in Government yards as superior to that done in private yards?

Mr. BROWNING. I do not; and every naval officer I have ever talked to has told me there was no ship ever built that was better constructed than the ships built in the Camden (N. J.) yard.

Mr. GOULDEN. Is not that the opinion of naval authorities, that the Government-built ships are better?

Mr. BROWNING. It is not. Those with whom I have talked on the subject are naval experts. The only opinion I have ever heard expressed to the contrary was that of the Secretary of the Navy, Mr. Daniels.

Mr. GOULDEN. He is a good man.

Mr. BROWNING. He is a very good man. I have nothing to say against him, personally, but I think he is mistaken.

Mr. FITZGERALD. Mr. Chairman, 13 years ago I commenced the agitation in this House to utilize the Government establishments for the construction of vessels for the Navy. At that time the proposition was opposed, on the ground that the Government yards were inadequately equipped; that the cost would be greater; and, as asserted by a distinguished Member of the other House, that if a battleship were ever laid down in

a navy yard, he did not expect to live to see the day it would be finished.

In the second session of the Sixty-second Congress—the last Congress—we authorized the construction of two battleships—the *Texas* and the *New York*. The *Texas* was put under contract with the Newport News Shipbuilding Co. The *New York* was assigned to the New York Navy Yard. The *Texas* was commenced three months earlier than the work was commenced on the *New York* at the navy yard. Last week the *New York* sailed for Mexican waters, fully equipped, ready to participate in whatever events may transpire there. The *Texas*, built by the Newport News Shipbuilding Co., is now in the New York Navy Yard being finished, after the constructor has completed his work. [Applause.]

When Government yards were first utilized for the construction of battleships, contractors took from 36 to 40 months in excess of the contract time in which to complete them. Now, vessels authorized for the Navy, because of the keen competition of the Government yards, are completed within the time fixed by contract. Investigations conducted during a series of years demonstrate that we manufacture powder for the Army and for the Navy more cheaply than we can purchase it. We manufacture all kinds of equipment, large and small arms, more advantageously than they are purchased, and yet it is continuously asserted that in the construction of ships the cost in a Government yard is much in excess of the cost in a private establishment. The truth is, and it is a notorious fact, that for many years it was impossible for Congress to ascertain just what it was costing to build ships in Government yards. By the system of cost accounting previously in vogue, items of every description that should have been charged against the maintenance of the yard, whether there were ships under construction or not, were charged to the cost of the ships, while the yard maintenance was relieved from much expense.

I have never advocated, and I do not believe it to be wise policy, as the facts have demonstrated, to build all the ships authorized for the Navy in Government yards. But I believe that a fair share of them should be built there. I believe that we have authorized nearly $500,000,000 for ships for the Navy, and about $35,000,000 of that amount has been expended in Government yards. It seems to me that it can not be claimed that such a sum is an unfair proportion to spend in utilizing the Government's own plants, equipped and maintained at an enormous cost, and which, if not utilized for the construction of ships, will be permitted to remain practically idle for the benefit of the private establishments.

Only 10 days ago, Mr. Chairman, I attended a banquet in this city of the Society of American Naval Engineers. Mr. Homer Ferguson, formerly a constructor in the Navy, now the business manager of the Newport News Shipbuilding Co., made a very instructive speech, and in insisting that the private yards should be given opportunity to do Government construction he pointed out that there would be no difficulty in replacing a plant, that there would be no trouble to replace equipment, but that a personnel built up by years of effort once dissipated could rarely, if ever, be brought together again. The New York Navy Yard for the last 12 years has been engaged in Government construction. Built there were the *Connecticut*, the *Florida*, the *New York*. The keel of battleship *No. 39* has just been laid down. If it be good business for private establishments to retain skilled and efficient men, it is equally advisable for the Government to do so. The Government should keep together in its own interest the force of skilled mechanics gathered from all parts of the country and welded into an efficient, economical organization. No private establishment would think for a moment of dissipating such a force and why should the Government, why should Congress permit it to be scattered and picked up by private constructors to the disadvantage of the Government? [Applause.] Such action would be indefensible. I hope the amendment will be adopted.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I desire to offer a substitute for the amendment of the gentleman from New York and the amendment offered by the gentleman from Pennsylvania.

The CHAIRMAN. There is one substitute already pending, but the Clerk will read the gentleman's amendment for information.

The Clerk read as follows:

Page 53, line 12, insert: "At least one of the said battleships hereby authorized shall be built and constructed at a Government yard, said yard to be designated by the Secretary of the Navy, and the sum of $200,000, or so much thereof as may be necessary, is hereby appropriated to equip the navy yard so designated with the necessary building slips and equipment for the construction of said battleship."

Mr. JONES. To that, Mr. Chairman, I make a point of order.

The CHAIRMAN. It is not offered now. The Chair permitted it to be read for information, as there is already a substitute pending.

Mr. PADGETT. Mr. Chairman, I ask unanimous consent that the debate on the amendment offered by the gentleman from New York [Mr. MAHER] and the amendment offered by the gentleman from Pennsylvania, and substitutes thereto, may close in 25 minutes—the gentleman from California [Mr. CURRY] to have 5 minutes, the gentleman from New York [Mr. CALDER] to have 5 minutes, and the gentleman from Virginia [Mr. JONES] to have 10 minutes, and I to have 5 minutes.

The CHAIRMAN. The gentleman from Tennessee asks unanimous consent that all debate on this paragraph and amendments close in 25 minutes, the time to be disposed as he has indicated. Is there objection?

Mr. RAGSDALE. Reserving the right to object, Mr. Chairman, I want to ask the gentleman from Tennessee what is the relative cost of a battleship constructed in a navy yard and one constructed in a private yard?

Mr. PADGETT. It costs more to construct one at the navy yard, but if the gentleman will listen to what I have to say I will give him an answer more in detail.

The CHAIRMAN. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. CURRY. Mr. Chairman, we have two navy yards fully equipped and manned to construct a dreadnaught. One is at Mare Island and the other at New York. The Mare Island yard has not as yet constructed a battleship, but we hope in the near future to have one to build. If we do, we will build a ship which will be a credit to the yard and the pride of the Nation. That Mare Island has an adequate equipment is shown by the fact that two years ago the yard was inventoried and appraised at nearly $12,000,000.

The agitation for building Government ships in Government yards was started in the city of Vallejo in the year 1900. Vallejo is the home city of the employees of the Mare Island Navy Yard. Mr. Roney and Mr. Campbell were the leaders in that agitation; they carried on a Nation-wide propaganda of education. The idea was bitterly opposed and fought, not only by business interests but by a number of newspapers, and conscientiously by some officials.

At that session of Congress Admiral Bowles appeared before the Committee on Naval Affairs of both Houses of Congress and stated that it would take a year longer and cost a million dollars more to construct a battleship in a Government yard than it would to construct it in a private yard. He was wrong, honestly and conscientiously wrong. The result of that fight was that the *Connecticut* was built in the Brooklyn yard and the *Louisiana* at Newport News. The *Connecticut* did cost a little more money than did the *Louisiana*, but the money saved since that time by less repairs being required on the navy-yard built ship has more than made up the difference in the original cost.

Mr. JONES rose.

Mr. CURRY. I can not yield, for I have not the time. While we have constructed no battleship, we have built all kinds of other ships. We built the colliers *Intrepid*, *Prometheus*, and the *Jupiter*. The *Jupiter* has only been recently constructed. She is the largest electrically propelled craft in the world, being 542 feet long. All the ships built at Mare Island have been awarded in competition with private and public yards. We have underbid the private yards and other navy yards for every ship assigned to us, and we have always built them within the estimates and the appropriations and have never had to come to Congress for a deficiency.

Recently the two gunboats *Monocacy* and *Palos* were built at Mare Island. The *Monocacy* was built for $80,000 less than the appropriation and $18,597.10 less than the estimate. The *Palos* was built for $125,000 less than the appropriation and $6,000 less than the estimate. I believe it is good business judgment to equip the yards for battleship-building work. The opportunity for the yards to bid against private yards has saved the Government a great deal of money, even when the contracts went to the private yards, because it has reduced the bids of the private yards to such an amount that there has only been a reasonable margin of profit for the contractor. I would like to see both of the ships provided for in this bill assigned to Government yards, although I do believe that it is good governmental policy to encourage private yards by giving them some of the ships to build—perhaps later on, when we have three to build instead of two. But the battleships provided for in this bill should both be constructed at Government yards. Capt.

Bennett, the commandant, and his predecessor, Admiral Mayo, have both officially stated that Mare Island is equipped to construct a battleship.

Mr JONES. Mr. Chairman, there are two amendments pending, one providing for building one battleship at a Government yard and the other, in the nature of a substitute, providing for the building of both ships at Government yards. Mr. Chairman, it may be as well to state in the beginning that if it should be decided that both ships are to be built at Government yards they will never be built, since it is a fact, known to every gentleman on the floor of this House who is familiar with the subject, that there is only one Government yard in the United States, and that the Brooklyn yard, which is equipped to build the battleships provided for in this bill.

Mr. Chairman, on the 16th day of March last the keel of the battleship *No. 39* was laid at the New York Navy Yard. It was stated by the commandant of the yard, Admiral Gleaves, on that occasion in a speech to the employees, that this battleship could be launched in 10 months. I have a letter from Admiral Watts in which he informs me that, judging from the rate of progress made on the *New York* battleship, *No. 39* should be launched about May 1, 1915.

I am further informed by competent judges who have had wide experience in the construction of battleships that *No. 39* can not be launched earlier than July 1, 1915, and I have no idea that she will be. Nobody can attach any importance to the statement of Admiral Gleaves made amid the environment and in the circumstances under which he spoke. Moreover, Admiral Gleaves is not a naval constructor; but, on the contrary, a nontechnical man who possesses no special knowledge of shipbuilding. The naval constructor and the engineer officer who built the *New York* and who are building *No. 39* have never, I venture to affirm, made such an absurdly preposterous statement as that attributed to Admiral Gleaves. Their opinions would be worth something, and if they agreed with Admiral Gleaves we should be quickly told so.

If, then, it shall be decided that one ship is to be built at a Government yard, it will mean that only one of the two battleships provided for in this bill will be built within any reasonable period.

A good deal has been said about the relative cost of constructing ships in Government yards and in private yards. A gentleman a few moments ago asked what was the difference in this cost. May I say to him that nine ships all told, up to this time, have been constructed in Government yards, and that those nine ships cost the Government $7,799,000 more than the aggregate of the responsible bids made by private yards for the building of those ships.

Mr. Chairman, much has been said also about the *New York* and the *Texas*. These are sister ships, built from the same drawings, and, by the way, the drawings were made by designers at the Newport News private yard which built the *Texas*, at a cost of $237,000. This private yard was required to furnish the designs and detail plans which cost it this large sum to produce to the New York Navy Yard, to be used in the construction of the *New York*. The New York Navy Yard paid the Newport News Shipbuilding & Dry Dock Co. for copies of all their important drawings, including the designs and detail plans of which I have spoken, just $3,248.75. Had the Government paid for these drawings and plans what they actually cost the Newport News private yard, the cost of the *New York* would have exceeded that of the *Texas* by more than a million and a third dollars.

I hold in my hand a letter addressed to me by the Secretary of the Navy on the 13th day of April last, in which he gives the total cost of the *New York* to the Government as $6,956,000 in round numbers. Please remember that this is the ship the gentleman from New York [Mr. FITZGERALD] has been telling us of. The Newport News Co., under contract, built the sister ship, the *Texas*, for $5,830,000, or more than a million dollars less than the Government built the *New York* for. Yet gentlemen from New York ask that this ship be constructed in a yard which is equipped with only one building way, and that building way now occupied by battleship *No. 39*, which will not be launched, in all probability, before the 1st of July, 1915. Until it is launched the keel of no other battleship can be laid at that yard.

Mr. Chairman, in view of these facts will this body deliberately vote to build this ship in a yard which can not lay its keel, according to the statement of the Chief of the Bureau of Construction and Repairs, for a year from this time? The gentleman from New York [Mr. MAHER] and the gentleman from California [Mr. CURRY] have both made statements which are absolutely incorrect and which the gentleman from California would not permit me to correct whilst he had the floor. These gentlemen both said that whilst the original cost of Government-built ships was larger than that of contract-built ships, the repairs to the private-built ship cost more than the repairs to the Government-built ship, and both of them instanced the *Connecticut*, built at the New York Navy Yard, to prove their statements. I recently addressed a letter to Admiral Watt and asked him to give me the facts in regard to this. I asked him to tell me what had been the amount expended for repairs on the *Connecticut* and what had been the amount expended for repairs on the *Louisiana*, the sister ship to the *Connecticut*, built at the Newport News yard. I have his letter here. It is dated April 1, 1914, and in it he says that the repairs, commencing in 1906 and running down to March 15 of this year, upon the *Connecticut* amounted in all to $917,610.06, whilst those on the *Louisiana* for the same period amounted to $885,915.75. These are the exact figures, and they show that the *Connecticut* has cost the Government more for repairs than has the *Louisiana*. And yet gentlemen stand here and state that the contrary is true, although they offer no proof to sustain their unfounded statements. It not only cost the Government over a million dollars more to build the *New York* than it cost to build her sister ship, the *Texas*, but it has cost more to repair Government-built ships than it has to repair private-built ships. There can be no question as to the correctness of my figures, because I obtained them from the highest official sources. Gentlemen who speak for the New York Navy Yard can produce nothing to sustain their contention. They make their statements in the face of accurate and absolutely reliable figures, furnished by the Navy Department.

Mr. Chairman, something has been said about the *New York's* having gone to Mexico, whilst the *Texas* is at the New York Navy Yard. I wish to say as to this that if the *Texas* is at the New York yard she is there because the Secretary of the Navy ordered her there to receive certain additions to her equipment not named in the specifications under which she was constructed. For instance, there are certain engineering hatches and some changes in the magazines which the Newport News company was never asked to make. Then, turret sights are being installed and bore sighting of guns done, all of which is work which the Government always does and which it will not permit any private contractor to do. It is to have this work done that the *Texas* has been sent to New York, and any intimation that work done on her at Newport News was not done according to the specifications under which she was built is not true.

The *Texas* has had her test trial, and it was a severe one. She has been accepted conditionally, as are all contract-built Government ships.

The *New York* has never had her engines tested in any trial trip, and she is not complete to-day and will not be for two months to come, notwithstanding she has left the yard. There never has been a battleship built that it did not require at least two months to complete after she had been commissioned, and the *New York* will prove no exception to this rule.

I may also state in this connection that the Government requires a cash guaranty from all contract builders of Government ships. It retains for 6 months and 10 days after the first test trial has been made $100,000 of the contract price of every contract-built battleship, in order to cover any undiscoverable defects that may develop in that time. So much for the unwarranted assumption and baseless insinuations in regard to the *Texas*. She cost more than a million dollars less than the *New York*, and she is certainly as good if not a better ship.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MOORE. Mr. Chairman, may I ask that the arrangement made a little while ago may be amended so as to have an extension of five minutes?

The CHAIRMAN. Is there objection?

Mr. PADGETT. I was going to say the gentleman had momentarily stepped out of the Chamber, and I had overlooked the fact that he was the author of the amendment which is pending, and I neglected to include him. I now ask that debate be extended for five minutes and that time be given the gentleman.

The CHAIRMAN. Is there objection to the request of the gentleman from Tennessee? [After a pause.] The Chair hears none, and it is so ordered.

Mr. CALDER. Mr. Chairman, those of us who advocate the building of battleships in navy yards have no quarrel with the gentleman from Virginia [Mr. JONES]. He represents the Newport News Shipbuilding district, and, like the good Representative he is, is here opposing the building of ships in navy yards, and if he succeeds hopes that the Newport News Shipbuilding Co. will get its share of this work. Much has been said whether the Brooklyn yard can build this vessel if this amendment is agreed to. There is no doubt of it. The keel of battleship *No. 39* was laid on the 16th day of March,

1914, and the naval constructors of that yard tell me that she will positively be launched inside of 12 months, and they maintain they are correct in this because the battleship *New York*, now in Mexican waters, was launched within 13 months after her keel was laid. They say they are in a state of preparedness, with everything ready, and there is not the slightest doubt that on the 15th of next March battleship *No. 39* will be in the water.

I maintain that the policy adopted by Congress 13 years ago under the leadership of the gentleman from New York [Mr. FITZGERALD], the gentleman from Massachusetts [Mr. ROBERTS], and the gentleman from California [Mr. J. R. KNOWLAND] in building part of our naval program in a Government navy yard has been a very wise one. Previous to the construction of the *Connecticut* at the Brooklyn Navy Yard, in 1904, it took from four to five years to build a battleship of 15,000 tons by contract and at a cost in some cases as high as $350 a ton. Since Congress has insisted that the Navy Department build some ships at Government yards, the time consumed for construction has been reduced to three years—a saving in time of two years, and in view of the deterioration in value of a battleship a saving in money to the Government of $1,000,000 on each ship. I have referred to the cost per ton of building ships by private contract under the old conditions, but with navy-yard competition and an eight-hour restriction the Newport News Shipbuilding Co. built the *Texas* for $218 a ton—a saving through this competition, as against the old price, of nearly $2,000,000. Permit me to lay before the committee a comparison of the cost and time consumed in building the battleships *New York* and *Texas*. These ships are of 27,000 tons displacement. For the building of the *New York* 36 months was allowed from May 1, 1911, when her keel was laid. She was finished and on her way to actual service April 26, 1914—5 days less than the 36 months specified. The construction of the *Texas* began December 17, 1910. Under the terms of contract with the Newport News Shipbuilding Co. she should have been delivered December 17, 1913. She was not delivered to the Government until March 4, 1914, and is still at the Brooklyn Navy Yard having her gun sights installed and otherwise being prepared for service. She will not be ready to go to sea until May 12, making a total of five months' time consumed more than the *New York*, constructed as she was at the Brooklyn Navy Yard.

We are willing to stand or fall on the record of these two ships in matter of time consumed in construction, cost of the two ships, and the real value of the respective vessels.

It is not disputed that the contract-built ship took five months longer to complete for actual use. As to the relative cost: In the naval bill of June 24, 1910, two battleships were authorized of 27,000 tons displacement, at a cost of not exceeding $6,000,000, each exclusive of armor and armament, and on an amendment offered by me the Navy Department was directed to construct one of these battleships at a navy yard. At the following session the department submitted estimates to Congress which indicated that it would cost a great deal more to build at the navy yard, and sought to repeal the provision requiring the building of one of these battleships at a Government yard. In this they were unsuccessful, and Congress increased the limit of cost of the Government-built ship from $6,000,000 to $6,400,000 and provided that the latter amount should be exclusive of overhead or indirect charges. Mr. Chairman, in view of the attitude of the department at that time the letter I have in my hand from Chief Naval Constructor Watt is very interesting. Now, the facts are it was entirely unnecessary to increase the limit of cost of the Government-built ship. In this letter the figures show that, exclusive of the indirect or overhead charges and armor and armament, the battleship *New York's* cost to complete was $5,392,794, over $1,000,000 less than the limit of cost fixed by the act of March 4, 1911, and $659,635.41 less than the estimate of the department for the construction of this vessel and $557,901 less than the actual cost of the sister ship *Texas*, built by the Newport News Shipbuilding Co., the contract price of which was $5,885,695, with the additional expenditure of $55,000 for work performed at the Brooklyn Navy Yard.

As to the relative value of these two ships, permit me to pay my respects to the magnificent battleship *Texas* and to say to the gentlemen from Texas in this body: It is a ship worthy the greatness of your State; if ever put to the test, I am certain it will shed glory on the name it bears. I have examined every part from hold to the upper deck while she lay at the Brooklyn Navy Yard receiving the final finishing touches which that great yard put on her after leaving the hands of her builders; and across the pier lay the *New York*, the flagship of Admiral Winslow, easily the finest ship in the American Navy, complete in every detail. I was present at her launching; built at the navy yard at Brooklyn by American workmen under living and humane conditions, and, as I stated a moment ago, for over one million less than the limit of cost and for $659,000 less than the department's estimates. Have you read what the Secretary of the Navy said of this vessel, as printed in the Brooklyn Daily Eagle recently:

"The celerity and promptness with which the Brooklyn Navy Yard prepared the dreadnaught *New York* on such short notice," said Secretary Daniels, "was striking proof of the efficiency and preparedness of that yard for any emergency. It is also an answer to objections that the navy yards can not build ships as well as private yards and have them ready. It may be cited that the *New York*, built at the Brooklyn yard, was put in condition to go to sea earlier than the *Texas*, built at a private yard. When the *New York* left the Brooklyn yard she was splendidly equipped, and is another evidence of the efficiency of navy-yard construction."

The battleship *New York* left the harbor of New York for Mexican waters on Sunday morning, April 26. I knew of her intended sailing and watched her from the Brooklyn Bridge as she turned her head majestically down the East River and sailed out to sea. The people of New York City were proud; she carried the flower of our youth in her crew, and we were confident if called into action fresh from our workmen she would give a good account of herself.

Those of us who have argued in favor of building some of the battleships at the navy yards have maintained that it kept them in a state of preparedness in case of emergency; this was never better exemplified than in the past few weeks in the navy yard at Brooklyn. We were completing the *New York* and were busy laying the keel of battleship *No. 39*, having employed on these two ships over 1,500 men. There was at the yard undergoing repair and alteration the *Texas*, *Washington*, *North Dakota*, and supply ship *Celtic*, when orders came from Washington to get these vessels ready for sea. Work was temporarily suspended on *No. 39*, and the entire well-organized and efficient force of men was put to work getting these other ships prepared. The work was completed, and the *New York*, *Washington*, *North Dakota*, and supply ship *Celtic* are to-day with the fleet in Mexican waters and the *Texas* will leave by May 15.

As a further reason for the adoption of this amendment let me call the attention of the committee to the battleship *Pennsylvania*, now being constructed by the Newport News Shipbuilding Co. for $7,275,000. This vessel is 31,400 tons displacement, and is the same size as battleship *No. 39*, now being constructed at the Brooklyn Navy Yard, which yard estimated to build her for $7,303,000, or only $28,000 more than the bid of the Newport News Co.; and I am reliably informed by a very prominent officer of the Navy that this sum will be reduced by over $500,000 as a result of the competition obtained by the department for the material to be used; so that battleship *No. 39* when completed will cost nearly $500,000 less than the price paid the Newport News Co. for the *Pennsylvania*. The navy yards are now competing with the private yards on more equal terms than in the past. Formerly the private yards worked 10 hours per day and the navy yards worked 8 hours; now both work 8 hours. It is true that a little better wages are paid by the Government than the contractor and that the men work under better conditions, but with this incentive to work and the improved machinery installed by the Government we are able without difficulty to compete as to cost and excell both as to time required and the character of the ship.

The two battleships authorized under the paragraph just agreed upon are to be known as *Nos. 40* and *41* and will be 32,000 tons displacement, and the limit of cost, exclusive of armor and armament, is fixed at $7,800,000. There is not the slightest doubt that if this amendment providing that one shall be built at a navy yard is agreed to that it can be built within the contract time and the limit of cost, and that every naval expert will agree that it will be a better ship than one built by contract at a private yard.

The great navy yard at Brooklyn is proud of its achievements. We have built there in the past 10 years the battleships *Connecticut*, *Florida* and *New York*, the finest of their respective classes in the American Navy; the great collier *Vestal*, and have under construction battleship *No. 39*, which will be launched, so the commandant, Capt. Gleaves, states, before the end of the year, and we will then be ready to be given the building of one of the two battleships just authorized as soon as her plans are ready.

Mr. Chairman, the people of Brooklyn are proud of their skilled mechanics that have made it possible for us to produce these great warships. We are part of the great metropolis of the Nation, and the patriotic impulses of the people of our city have been moved by witnessing the building and launching of these vessels. We thank the House for extending us this consideration in the past and ask for a favorable vote on

this amendment, so that we may continue to reflect credit on our city and the country in the matter of building ships for the American Navy.

When the section authorizing the building of two battleships was acted upon this afternoon I voted for it, and have during my 10 years of service in the House always voted to build two battleships a year. I am in favor of continuing the program of building two battleships a year for at least the next six years, unless an international agreement can be obtained by the great maritime powers that they shall gradually reduce their naval armament. Previous to the Spanish-American War this country was so situated that we did not need to compete in the matter of the size of our Navy with Great Britain, Germany, Russia, France, and Japan, but the result of that war, bringing to us Porto Rico, Guam, the Philippine Islands, and Hawaii, and since then the building of the Panama Canal, compelled this Nation to maintain a first-class Navy at the highest state of efficiency. The preparedness of the Navy in its occupation of Vera Cruz only a few days ago—which occupation, in my judgment, will do more ultimately to settle the Mexican question without further loss of life—was simply an evidence of the necessity of this country being constantly prepared not to destroy nations and men but to help preserve the peace of the world. And so, Mr. Chairman, I am in favor of the program recommended by the Naval Committee.

I know that the amount carried—$140,000,000—is considerable; but when you stop to think of the fact that there are more chauffeurs running automobiles in the State of New York alone than there are men in the United States Navy, and that it cost more last year for the rubber tires on the automobiles used in the United States than it did to conduct the entire Navy, including the building and repair of ships, it can readily be seen that we are not going beyond our ability to maintain this Navy. We are now a world power. We are the strong Nation of the Western Hemisphere. Nothing else will do more to maintain the peace of this hemisphere—and, in fact, the peace of the entire world—than the United States maintaining a navy strong enough to compel every other nation on earth to observe peace. When the time comes, and I hope it will, to call a halt on the further extension of our Navy, I will be one of those who will add my voice and vote to that end; but that time, Mr. Chairman, has not yet arrived.

I think it fitting that I should insert in these remarks some observations on the youth of Brooklyn who were the first ashore at Vera Cruz, Mexico, on April 21, in answer to the call of duty, and who fell on that day and the succeeding day. Two of them—John F. Schumacher, coxswain, of 161 Harmon Street, Brooklyn, and Albin Eric Stream, ordinary seaman, residing at 227 Sixty-seventh Street, Brooklyn—laid down their lives for the honor of the flag, and Arthur Berstein, seaman, 30 Thatford Avenue; Eugene J. Grey, ordinary seaman, 73 Devoe Street; George G. Craig, ordinary seaman, 556 Hamburg Avenue; Charls D. Cameron, ordinary seaman, 108 Doscher Street; John L. Bennett, coxswain, 167 Sands Street; Hugh Aloysius Boyle, ordinary seaman, 235 Concord Street; and Frederick Nanz, ordinary seaman, 463 Himrod Street, were wounded in that conflict. These nine young men knew no fear. They were, like every other soldier and sailor, enlisted for whatever service they were called upon to perform. Their example is an inspiration to every other young man of our great city; and, while we sympathize with their families and express the hope that the wounded will soon recover, we know their names will go down in the history of the Navy as Brooklyn's contribution to the furtherance of peace and civilization of benighted Mexico, torn and rent by civil strife; soon, I hope, to be restored to peace and prosperity.

Mr. MOORE. Mr. Chairman, the amendment offered by me is intended to accentuate the fact of the consolidation of Federal shipbuilding in one navy yard.

Incidentally all of us do the best we can for our localities, and I suppose a Member of Congress who does not stand up for his city or for his district falls short of being a Representative. For that reason I intend to commend the gentlemen from New York for their splendid presence this afternoon when the question of the Brooklyn Navy Yard is involved. They are here, Democrats and Republicans alike, firm and united. Indeed, the fact that they are here so solidly and on time is worthy the attention and, I would venture to say, the approval of our official timekeeper from Connecticut [Mr. DONOVAN]. [Laughter.]

But the fact is that the Brooklyn Navy Yard is the only navy yard equipped to build a battleship. Now, it has been so since I have been a Member of this House, and each time the naval bill has come here attention has been called to it. I do not envy Brooklyn or New York. I admire their splendid delegation and the force and energy they put into a movement of this kind. I hope they will get what they want.

Mr. DONOVAN. Will the gentleman yield?

Mr. MOORE. Yes; I will yield to the official timekeeper from Connecticut for a question.

Mr. DONOVAN. Will you not admit that you have been as faithful and earnest and painstaking when matters pertaining to Philadelphia have come up in the House as almost anyone else? You will admit that, will you not?

Mr. MOORE. That is true.

Mr. DONOVAN. You will admit when it came to putting a finger in the pork barrel for Philadelphia you were there?

Mr. MOORE. That may be true.

Mr. DONOVAN. And everybody knows they are not always present except when the pork barrel is around. I do not want it to go abroad that the Member from Philadelphia is ever absent when the pork barrel is passed around.

Mr. MOORE. I am glad to have the gentleman make that speech. I will have it printed and circulated throughout my district as a tribute to the activity of the "gentleman from Pennsylvania." And if the gentleman from Connecticut was more active in getting "pork" for Connecticut, to improve his rivers up there, he would be more popular with his own constituents. Sometimes in his criticism of others he forgets to do justice to himself.

Now, it is a good thing for New York to get together. It is a fine tribute to organization for these men to stand shoulder to shoulder and put another ship in the Brooklyn Navy Yard, which is already bulging out with battleships and has no room for more.

But, Mr. Chairman, the whole profession of the party in power is against monopoly. You crowd out private shipbuilding concerns because, as you charge, they effect a combination. You interfere with the work of the men employed by these companies because, you say, they monopolize the work, and yet year after year, even after your attention is called to it, you come along and vote everything you have the power to vote into one navy yard. It is said there is another navy yard equipped to build battleships. It is said that Mare Island is so equipped. That statement does not seem to be borne out by the facts.

Mr. FITZGERALD. Will the gentleman yield?

Mr. MOORE. I will yield.

Mr. FITZGERALD. The present Democratic Secretary of the Navy is the only Secretary of the Navy who ever awarded a vessel to be constructed in the League Island Navy Yard.

Mr. MOORE. And the Democratic Congress passed an act which solemnly bound him to do it, but now you fail to give the Philadelphia Navy Yard the ways on which to build the ship. You have put the ship up in the air and told us to go there and build it. The gentleman from New York knows how ridiculous that is. He is faithful and loyal to his party, and I am going to ask him to vote for an amendment I shall offer later on to stand by the law that he himself helped to pass in this House.

Now, Mr. Chairman, if there are two navy yards equipped to build battleships, there is nothing to fear from the passage of my amendment. If the one at Mare Island is so equipped, as the gentlemen from California contend, then there will be Government competition in the building of battleships the moment this amendment passes. But so long as you continue to sit here and vote that each battleship shall be built in a navy yard, and you refuse to other navy yards the means to build battleships that you give to Brooklyn, just so long will you maintain a governmental monopoly at Brooklyn, which is as much a monopoly in its way as any private monopoly against which you complain. [Applause.]

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. MOORE. That is all, Mr. Chairman.

The CHAIRMAN. The question is on the adoption of the amendment.

Mr. PADGETT. Mr. Chairman, I am not going to attempt to make a speech. I simply want to make a plain statement to the membership of the House.

I am not opposed to the development of our navy yards and to giving them all the work that they can properly and legitimately transact. I have a letter here, which I will put in the RECORD for information, coming from the Secretary of the Navy, with reference to the cost, up to the present time, of the two sister ships, the *New York*, built in the navy yard at Brooklyn, and the *Texas*, built in a private yard. It shows that the amount expended, as shown by this itemized statement, is

$1,040,000 more upon the *New York* in the Government yard than upon the *Texas* in the private yard. Here is the letter:

NAVY DEPARTMENT,
Washington.

Subject: Cost of battleships *Texas* and *New York*.

MY DEAR MR. PADGETT: 1. Referring to your letter of the 17th instant, requesting certain data relative to the cost of battleships *Texas* and *New York*, in reply to which the department, in its letter of March 21, 1914, stated that it was necessary to obtain certain of the desired detailed information on the *New York* from the navy yard, New York, there is given below such of the data requested as have been furnished to date by the New York Navy Yard relative to the cost of battleship *New York*, exclusive of armor and armament:

	Hull.	Machinery.	Total.
Labor:			
Expended to Mar. 1, 1914	$1,825,308.66	$634,735.19	$2,460,043.85
Estimated to complete	77,508.60	36,343.44	113,852.04
Material:			
Expended to Mar. 1, 1914	1,535,685.51	808,024.60	2,343,710.11
Estimated to complete	118,714.00	356,474.00	475,188.00
Indirect:			
Expended to Mar. 1, 1914	615,447.12	202,269.30	817,716.42
Estimated to complete	23,120.40	11,593.56	37,713.96
Leave [1]			174,911.73
Holiday [1]			177,227.40
Disability [1]			40,079.04
Classified employees employed in construction of New York but charged to current appropriations (estimate of commandant)			287,070.00
Leave and holiday of classified employees employed in construction of the New York (estimate of commandant)			28,930.00
Cost to Government of hull and machinery by reason of construction in navy yard, according to returns received from New York			6,956,442.55

[1] Resulting from construction of New York and charged against appropriation "Increase of the Navy; construction and machinery."

2. Attention is invited to the fact that the above total cost to the Government of the *New York* is subject to modification as the final actual cost of work covered by the estimates to complete may be either more or less than the estimates mentioned above.

3. The above statement of total cost to the Government of the construction in navy yard—New York—includes expenditures for indirect charges under the existing system of bookkeeping; also expenditures for leave, holiday, and disability which have resulted by reason of the construction of the *New York*. Such expenditures are lodged against the appropriation "Increase of the Navy, construction, and machinery," which appropriation covers the cost of hull and machinery for the *New York*, but are excluded from the "limit of cost" of the ship by the phraseology of the appropriation act of March 4, 1911.

4. The above total cost to the Government of the *New York* includes also the charges for classified employees while engaged in drafting, accounting, and clerical work for the *New York*. In accordance with statute law such charges are covered by the annual working appropriations and therefore are not included in the "limit of cost" of the vessel, although such expenditures result from the construction of the vessels.

5. In reply to your request for information as to any overhead charges which would enter into the construction of the ship by private contractor which are not included in the navy yard cost, the following items are items of cost to private contractors which are not included in the "limit of cost" nor in the "indirect charges" under the present system of cost accounting of the ship built in the navy yard:

Officers' salaries.
Clerical force, draftsmen, civilian assistants, subinspectors, expert aids, chemists, watchmen, messengers, etc.
Leave, holiday, and disability.
Ship insurance throughout periods of construction and trial trips.
Expenses of trial trips. By reason of conducting trials of Government-built vessels after commissioning and "shaking-down cruise," expenses of same are lodged against cost of maintaining in commission and not against cost of construction.
Expenses of receiving, testing, and handling stores.
Depreciation, fire insurance of plant.
Interest on money invested, taxes.
Repairs made to buildings, railways, plant machinery, and equipment, when such repairs are in excess of the limits for various items of indirect charges made against the *New York*, as per accounting system now in force. These limits are $25 and $100.

6. As regards the cost of the above items, it will be noted that the cost for clerks, draftsmen, etc., leave, holiday, and disability are shown above. There is no information available showing what would be the cost of the remaining items.

7. The commandant of the navy yard, New York, reports that the total expenditures to March 1, 1914, on battleship *New York*, together with the small estimated amounts to complete the vessel, indicate a performance lower than the original estimates by $413,750.50 under hull, and $245,884.91 under machinery, or a total of $659,635.41.

8. The cost of the battleship *Texas*, is as follows: Hull and machinery, cost under contract, including changes during construction, $5,885,695.

9. There will also be additional expenditures on the *Texas*, chargeable to the limit of cost, by reason of work performed by the Government subsequent to delivery, on account of changes and improvements. The actual cost of this work is not available, as the work has not been completed. The estimated cost of same is $55,000.

Sincerely yours,
JOSEPHUS DANIELS.

Hon. LEMUEL P. PADGETT, M. C.,
Chairman Committee on Naval Affairs,
House of Representatives, Washington, D. C.

Mr. COOPER. Mr. Chairman, will the gentleman permit an interruption?

The CHAIRMAN. Does the gentleman from Tennessee yield to the gentleman from Wisconsin?

Mr. PADGETT. Yes.

Mr. COOPER. I wanted to ask the gentleman whether certain overhead charges had not been made against the *New York* that are not charged against the *Texas*? I so understand.

Mr. PADGETT. The *Texas* is a contract ship. That is a stated sum. There is a detailed statement here of overhead charges that are not included in this estimate cost of the *New York*. But I want to say that even with the fact that the ship *New York* has cost more than the *Texas*, I would still favor the placing of a ship in the navy yard in order to hold our organization if I thought it was needed. But it is not needed at this time.

Now, what are the facts? On March 16, 1914, which is just about or a little more than a month ago—five or six weeks—the keel of the battleship *No. 39*, which is a much larger ship than the *New York*, was laid. I have a letter here from the department, which I will put in the RECORD, stating that that ship will not get off of the ways until about the 1st of July, 1915. This letter is as follows:

MAY 5, 1914.

Hon. LEMUEL P. PADGETT,
Chairman Committee on Naval Affairs,
House of Representatives.

MY DEAR MR. PADGETT: As you will see by the inclosed memorandum, the technical bureaus disapprove the building of a battleship either at New York or Mare Island out of the coming appropriation. This simply means that we are not yet prepared to do what I would wish. Next year it would look more propitious. New York will have launched No. 39, and without further expense we could start another battleship; this year is too soon.

* * * * * * *

In any event, I hope you will be able to leave the department to act as may be best, with only the usual legislation defining the placing of all building in navy yards in the event of a combination.

Very sincerely, yours,
JOSEPHUS DANIELS.

Mr. MAHER. Mr. Chairman, will the gentleman yield for a question?

The CHAIRMAN. Does the gentleman yield?

Mr. PADCETT. I regret I have not the time. The yard can build but one ship at a time.

Mr. MANN. Will the gentleman yield?

Mr. PADGETT. Yes.

Mr. MANN. Did not the commandant of the Brooklyn Navy Yard state that he would launch that ship in 10 months?

Mr. PADGETT. I do not know whether he did or not. That statement was made by some one. But I have the official statement here of the department, dated of this date, as to when they would get it off.

Mr. CALDER. Mr. Chairman, will the gentleman yield?

Mr. PADGETT. Not now. Another thing: The battleship *New York* is a ship of about 27,000 tons, and *No. 39* is 31,400 tons, a much larger ship. The *New York* was on the ways 13 months, and they estimate that this ship, being 4,500 tons larger than the *New York*, will take about 15½ months to get off of the ways.

Now, Congress meets in December, and we will appropriate at the next session, which closes on the 4th of March, either for one battleship or for two battleships; I do not know which. Either one of those ships can be placed in the navy yard at Brooklyn and will meet all of the requirements.

Mr. CALDER. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Tennessee yield to the gentleman from New York?

Mr. PADGETT. The sum total of a direction or authorization to put this ship in the navy yard is simply to delay its construction, according to the statement here, about one year.

Mr. CALDER. Will the gentleman yield now, please?

Mr. PADGETT. I am not in favor of delaying the construction.

Mr. CALDER. Will the gentleman yield?

Mr. PADGETT. Yes.

Mr. CALDER. How long will it take to prepare the plans of these battleships after the naval bill becomes a law?

Mr. PADGETT. It is stated here that they will have them ready for advertisement the 15th of October.

Mr. CALDER. One more question, if the gentleman pleases.

Mr. PADGETT. Yes.

Mr. CALDER. We authorized the building of battleship *No. 39* on the 4th of March last year?

Mr. PADGETT. Yes, sir.

Mr. CALDER. It was just 1 year and 12 days after that before we laid the keel of *No. 39*.

Mr. PADGETT. That is true. But *No. 39* was 4,500 tons larger than the *New York*. But these two ships—*Nos. 40* and *41*—to be authorized in this bill are substantial reproductions of *No. 39*, with certain improvements; and they state here that

they will have the plans ready and the specifications, and will advertise for the construction by the 15th of the coming October.

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

Mr. PADGETT. Now, Mr. Chairman, I am going to put this memorandum in the RECORD:

NAVY DEPARTMENT,
Washington, May 5, 1914.

[Memorandum for Hon. LEMUEL P. PADGETT, Member of Congress, chairman Committee on Naval Affairs, House of Representatives.]

Subject: Battleship building at navy yards.

DEPARTMENT'S POLICY.

It is the policy of the department to develop shipbuilding at navy yards, the extent to be measured by the importance and capacity of each yard. This extent may range from a coal barge to a battleship, and embraces these as well as tugs, gunboats, submarines, destroyers, and all the fleet auxiliaries, such as supply ships, transports, colliers, oilers, and the like.

The advantages claimed for a development of shipbuilding at the navy yards are:

(1) A check upon the cost of private shipbuilding. Congress has repeatedly vested authority in the department to use the navy yards "should it reasonably appear" that the Government is deprived "of fair, open, and unrestricted competition." While the department does not anticipate such a condition to arise, the possession of adequate facilities, together with the knowledge and experience gained in the navy yards, safeguard the public interests. As here stated, no inference is warranted that private shipbuilding shall suffer hardship, for the department considers it as an asset for war of great value.

(2) An increased efficiency and preparedness of the working force due to a more uniform and steady employment of workmen. Retention of trained employees is the ambition of the department. Navy yards are primarily repair and emergency yards. Sudden expansion in necessity is impossible with a fluctuating labor roll.

(3) An improved morale of yard service from master workman to the lowest laborer or messenger. The inculcation of an esprit de corps in navy yards engaged in shipbuilding is easy. Officers and men have a common pride in the launching of a vessel which they have seen grow up under their eye and hand. Throughout her building they have become imbued with a common spirit which commands success.

(4) The expenses of inspection and trial trips are eliminated, changes are under ready control, and throughout the building is regulated by the same routine that applies to all Navy work. Some of the very officers that helped to build her will go to sea in her when built.

CRITERIA.

Before a navy yard is allowed to engage in shipbuilding it is made to show:

(1) A lower bid than a private contractor.
(2) That no special equipment is required, or such equipment only as may be of permanent value.
(3) That there is no extraordinary increase in the plant required.
(4) The extent of the staging, cranes, and ways that are required.
(5) The labor market and industrial conditions of the vicinity.
(6) The objectionable supervising and drafting force.

BATTLESHIP BUILDING.

The highest expression of the shipbuilding art is the battleship. These are governing principles for the assignment of a battleship to a navy yard, namely:

Shipbuilding culminating in a battleship should be a process of gradual growth. A yard should pass through the stages of small shipbuilding to the larger. So will it surely acquire the experience and training essential to produce that most wonderful work—a modern battleship.

In a logical development of our shore establishments it will be found that we require two large naval bases on each ocean. At these the navy yards should reach their greatest development. Hence these should be the ones selected for battleship building. At these will be needed, with threatening war, all the resources the department can command of workmen and material. It will then be the department's policy to allow such moderate shipbuilding at the smaller yards as may be needed for the advantages to be realized, but to reserve the battleship building for the yards attached to the naval bases on which in time of stress the greatest reliance must be placed.

NEW YORK AND MARE ISLAND.

To-day we have but one yard in which a battleship can be built; that is New York. Battleship No. 39 is now under construction there.

Two oilers of 14,500 tons displacement have geen awarded to the Mare Island Yard for building—the *Maumee* and *Kanawha*. Further equipment would have to be provided to make it possible to build a battleship at Mare Island. New York and Mare Island are the only two yards which can be considered as properly developed at the present time for battleship building without a large expenditure of money, time, and training.

NEW YORK.

1. The following questions are asked and answered:

(1) What delay would it occasion if one of the new battleships were ordered built at the New York Navy Yard?

Hull: The keel of battleship *No. 39* was laid March 16, 1914. The average elapsed time between laying of the keel and launching, in the case of the last six battleships, is about 15 months. Since battleship *39* is considerably larger than either of those ships it will probably require at least 15½ months from the date of laying keel until date of launching; that brings her date of launching about July 1, 1915. If battleship *No. 40* or *41* is to be built at New York Navy Yard, this would place the earliest date of laying of her keel about July 15, 1915. The plans and specifications for battleship *40* and battleship *41* will be ready for advertisement about August 1, 1914; opening of bids about October 1, 1914; placing of contract about October 15, 1914. If one of these vessels is to be built at the New York yard, the keel should be laid by March, 1915. It is probable, therefore, that there would be a delay of at least 4 months on this score—in the case of the new battleship. The New York yard is not equipped with draftsmen and other facilities for the rapid designing of details for two battleships of somewhat different design, even though one be at a considerably advanced state of construction, it being noted that in the cases of the *Florida*, *New York* and battleship *39* the principal plans have been purchased from the private shipbuilders that had contracts for sister ships; a similar procedure can hardly be expected in the case of the next battleship, and in this case there would be an additional time element required; considering the time lost before laying the keel—estimated at about 3 months—it is probable that at least 6 months would be required for building this battleship over and above the time that would be required if contract were placed with a private builder.

Machinery: It is estimated that a delay of about one year would result in so far as the machinery is concerned.

2. In order to avoid delay, could we construct two at the New York Navy Yard contemporaneously?

Hull: Two battleships could not be built simultaneously at the New York yard without very extensive additions to the facilities of the yard—additions that would require at least several years to complete and whose prosecution could not advance advantageously while one battleship should be on the stocks.

Machinery: Two could be built contemporaneously with the delay of one year, as before stated.

3. If two were attempted, would it not inflate our organization so that afterwards it would give great trouble?

If two battleships should be attempted simultaneously, even after the completion of alterations referred to above, the organization would be so inflated as to require an average force for the 30-month period of construction of fifteen hundred men more than are at present required for one battleship, and upon completion of one ship there would have to be a discharge of this additional force unless a new ship should follow simultaneously. It is of great importance to keep the force as uniform as practicable.

Of course if we could be assured that we might continue indefinitely to keep two battleships on the stocks, violent fluctuations in the organization would be avoided.

4. If two were constructed at the New York Navy Yard, what would be the cost of building ways, slips, additional machinery, etc.?

Hull: At the present time the New York yard is provided with facilities for building only one battleship at a time, and the ship-fitting appliances for this are crowded to the limit. In order to build two battleships simultaneously, it would be necessary to provide another building slip and additional ship-fitting facilities. The navy-yard authorities have carefully investigated schemes for extending the building facilities of this yard and have submitted an ideal scheme of improvements involving the abandonment of the present slip, the razing of certain shop buildings, and the erection of extensive ship-fitting sheds and building slips under cover, the estimated cost of the New York yard being $1,344,730, and the work would extend over several years. Whether this particular scheme should be followed or not, the erection of facilities for building an additional battleship, including a slip for the same, would involve a very large expenditure.

Machinery: To build two contemporaneously and without loss of time would necessitate the building of a new foundry and an extension of the machine shop, both of which improvements are now almost a necessity. The cost would be about $480,000 for these improvements.

Note.—The following extract from a report on the New York Navy Yard, dated September 5, 1913, and made to the department by the board of inspection for shore stations, is of interest:

"SHIPBUILDING WAYS.

"The yard possesses building ways upon which some of the largest battleships have been constructed. There is a second set of ways in existence upon which the U. S. S. *Maine* was built, but it is now in such a dilapidated condition and is so short in length that, in order to use it for battleship work, it will be necessary to strengthen the foundation as well as to tear down certain buildings to secure space for keel blocks, as well as room for the assembling of material. There is a third possible site for building ways to the westward of the existing ways, but such construction would necessitate heavy expenditure in securing foundations, replacing buildings that will have to be torn down, and in the erection of a Gantry crane for handling material.

"The board does not consider it advisable to recommend the extension of the smaller building ways or the development of any new ways for the construction of battleships, since it is considered that naval interests would be better subserved by building a second battleship at some other naval station on the Atlantic coast in case the department should desire to undertake the construction of two such vessels at one time.

"By reason of the unsatisfactory ship-fitters' shop that exists at the yard, it is not considered that the construction of two battleships should be assigned to the yard, since the cost of the hull work of both vessels would be excessive, as compared with the price at which such vessels could be obtained from a private shipbuilding company or by assigning to two separate yards the construction of a single vessel. The board considers that, rather than undertake the construction of two vessels at the same time at a single navy yard, the development of battleship construction ought to be effected at a second navy yard, since naval interests would be better subserved thereby."

MARE ISLAND.

The following questions are asked and answered:

1. Can a battleship like *No. 39* be built at the Mare Island Navy Yard?

Machinery: With the present equipment, it can not be built at Mare Island.

Hull: The Mare Island yard is not equipped to build a battleship.

2. If not, what would be the additional cost to fit the yard to construct a battleship of this design?

Machinery: An expenditure of $125,000 would be required to equip this yard with the necessary boring mill, lathes, planers, etc.

Hull: It is estimated by the navy-yard authorities that it would cost $117,400 in addition to the purchase of a floating crane, which the department estimates at $450,000, to equip this yard.

Total for additional equipment, $692,400.

3. What are the estimates of cost of construction at Mare Island?

Machinery: It is not possible to give estimates of the cost of construction at Mare Island; however, it is believed that it would be slightly in excess of the cost at New York, probably 5 per cent more.

Hull: It is not possible to give reliable estimates. When the *Pennsylvania's* bids were called for, Mare Island furnished one lower than the New York yard. This bid was criticized on the basis of the large experience of the latter yard in building battleships. Besides, the bid did not take account of the additional shop facilities and other improvements that would be required.

Ordnance: An important item in considering the availability of Mare Island for battleship building is the excess of cost of shipments to

Mare Island over those to New York City, as estimated on the basis of battleship *No. 39*.

	Tonnage.
Turrets, complete, exclusive of armor	1,268
Broadside mounts	187
Broadside guns	110
Armor	8,000
Total	9,565

From Washington to New York, at 15½ cents per 100 pounds ($3.47 per ton)	$33,190.55
Washington, D. C., to Mare Island, Cal., by rail, over land-grant road, $1.77 per 100 pounds ($39.65 per ton)	381,252.25
Washington to Mare Island via Panama, 70 cents per 100 pounds ($15.68 per ton)	149,179.20
To Mare Island, Cal., by rail, over land-grant road	381,252.25
To New York	33,190.55
Difference	348,061.70
To Mare Island via Panama	149,179.20
To New York	33,190.55
Difference	115,988.65

The additional cost of shipments from Washington to Mare Island over shipments to New York by rail is $348,061.70, and it is probable that all shipments will have to be made by this route by reason of the time required as well as the fact that divided shipments are made.

CONCLUSION.

From all of the foregoing it must be evident that—

1. The department desires to encourage shipbuilding in the navy yards.
2. Only the New York yard is at present equipped for building a battleship and can build only one at a time.
3. The Mare Island yard is the only other yard sufficiently developed in shipbuilding to be intrusted with a battleship, but it is not equipped for the work.
4. However, the department hopes that the Congress will see its way clear to leave the question an open one, not restricting it to either private or navy-yard building. If it is decided that one or more battleships must be navy-yard built, funds for the necessary yard equipment must be provided.

Mr. PADGETT. Mr. Chairman, I am going to ask that the committee rise, since under the previous order the House will take a recess at 5 o'clock. But when we get into the House I am going to ask to modify that order, so that we can run still later to-night. I think we can finish the bill.

Mr. MANN. I do not think the modification can be made.

Mr. PADGETT. I move, Mr. Chairman, that the committee do now rise.

The motion was agreed to.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. JOHNSON of Kentucky, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 14034) making appropriations for the naval service for the fiscal year ending June 30, 1915, and for other purposes, and had come to no resolution thereon.

RECESS.

Mr. PADGETT. Mr. Speaker, under the order previously made the House would recess at 5 o'clock until 8 o'clock, for the consideration of the Private Calendar. I desire to submit a request for unanimous consent to modify the recess order, so that the House may continue in session not later than 7 o'clock to-night, and then recess until 8. I think in that time we can finish the bill.

Mr. SHERWOOD. I object.

The SPEAKER. The gentleman from Ohio [Mr. SHERWOOD] objects.

Mr. PADGETT. That is the end of it.

The SPEAKER. Under the special order the House will take a recess until 8 o'clock to-night, and the gentleman from Ohio [Mr. BULKLEY] will act as Speaker pro tempore.

Accordingly (at 5 o'clock p. m.) the House took a recess until 8 o'clock p. m.

EVENING SESSION.

The recess having expired, the House was called to order by Mr. BULKLEY, Speaker pro tempore.

The SPEAKER pro tempore. The Clerk will read the special order for this evening.

The Clerk read as follows:

On motion of Mr. POU, by unanimous consent,

Ordered, That on Tuesday, May 5, 1914, the House stand in recess from 5 o'clock p. m. until 8 o'clock p. m., and that a session be held from 8 o'clock p. m. until 11 o'clock p. m. for the consideration of bills upon the Private Calendar which are not objected to.

The SPEAKER pro tempore. The Clerk will report the first bill on the calendar.

SARAH B. HATCH.

The first business on the Private Calendar was the bill (H. R. 8811) to execute the findings of the Court of Claims in the case of Sarah B. Hatch, widow of Davis W. Hatch.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Sarah B. Hatch, widow of Davis W. Hatch, of Bexar County, Tex., the sum of $3,000, being the amount found due for timber taken and used by United States troops in the winter of 1865 and 1866 and the spring of 1866, as set forth in the findings of fact filed by the Court of Claims on March 28, 1910, and printed as House of Representatives Document No. 857, Sixty-first Congress, first session.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. MANN. Mr. Speaker, these bills have to be considered in Committee of the Whole House unless it is waived.

Mr. BYRNES of South Carolina. I ask unanimous consent that this bill be considered in the House as in Committee of the Whole.

Mr. FOSTER. I ask unanimous consent that all bills on the Private Calendar be considered in the House as in Committee of the Whole.

The SPEAKER pro tempore. The gentleman from Illinois asks unanimous consent that all bills on the Private Calendar be considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

The SPEAKER pro tempore. Is there objection to the present consideration of this bill. [After a pause.] The Chair hears none.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

CHARLES W. HAMMOND.

The next business on the Private Calendar was the bill (H. R. 7633) for the relief of the personal representative of Charles W. Hammond, deceased.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury of the United States is hereby authorized and directed to pay to the personal representative of Charles W. Hammond, deceased, the sum of $68 for services in carrying the mail between Macon and Albany, Ga., in 1860 and 1861.

The Clerk read the following committee amendment:

In line 4, after the words "to pay," place a comma and insert the words "out of any money in the Treasury not otherwise appropriated."

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

JAMES P. BARNEY.

The next business on the Private Calendar was the bill (H. R. 9147) to restore First Lieut. James P. Barney, retired, to the active list of the Army.

The bill was read, as follows:

Be it enacted, etc., That the President be, and he is hereby, authorized to restore First Lieut. James P. Barney, retired, to the active list of the Army of the United States with the rank of first lieutenant of Cavalry, his name to appear on the active list of the Army of the United States next below that of First Lieut. Francis H. Ruggles: *Provided*, That such restoration shall be in temporary excess of the number authorized only until such time as a vacancy shall occur in the grade of captain of Cavalry: *Provided further*, That prior to his restoration to the active list this officer shall have passed an examination to the grade of lieutenant of Cavalry, as prescribed by regulations of the War Department under the terms of the act of Congress approved October 1, 1890.

The following committee amendments were read:

On page 1, line 8, after the word "*Provided*," strike out the rest of said line, together with all of lines 9 and 10, and line 11 up to and including the word "Cavalry," and insert in lieu thereof the following: "That the number of officers shall not be increased by reason of the passage of this act."

Also, on page 1, strike out all of line 13 and insert in lieu thereof the following: "a physical examination for promotion to the grade of first lieutenant, as."

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. MANN. Mr. Speaker, reserving the right to object, there does not seem to be very much information in the report in this case. We have a letter from the Secretary of War, but no statement as to the age of the man, the length of his service, the character of his service, or the reason for his retirement heretofore.

Mr. GARD. Mr. Speaker, Mr. Barney is a Virginian who has been in the service 10 or 12 years and had service of at least five or six years during that time in the Philippines. He incurred an illness while in the Philippines in the line of duty, and it was necessary to have two distinct surgical operations

performed on him, and as the result of the operations he was retired on account of physical disability incurred in the line of duty. Since then he has recovered his health. He is a very efficient soldier. He has had charge of the instruction in marksmanship, and he has desired for two years or more to get back into the active service of the Army. I think his age is 36 years, and his present condition is vouched for by a number of reputable physicians. He is ready at this time to enter the service.

Mr. KAHN. I will say that at the present time he is receiving the pay and allowance of a first lieutenant. If restored, he will receive the pay and allowance of a captain. He appeared before the committee and seemed to be a young man in vigorous health.

Mr. MANN. Is it the expectation that the committee amendments will be agreed to?

Mr. GARD. Yes.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The committee amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

JOSEPH L. DONOVAN.

The next business on the Private Calendar was the bill (S. 1808) for the relief of Joseph L. Donovan.

The Clerk read the bill, as follows:

Be it enacted, etc., That the President of the United States be, and he is hereby, authorized to nominate and, by and with the advice and consent of the Senate, appoint Joseph L. Donovan, late a captain in the Twenty-second Infantry, United States Army, a captain of the Infantry in the Army of the United States, and when so appointed he shall be placed on the retired list of the officers of the Army.

The SPEAKER pro tempore. Is there objection?

Mr. STAFFORD. Reserving the right to object, I notice from the report of The Adjutant General that this officer seeking to be restored to the retired list was sickly before he saw any service; that is, before he saw any real Army service. I read from the medical report that in 1894 he had acute muscular rheumatism, and later that he had the measles. According to the record he had about as complete a record of disease as you might expect from any Army officer.

I would like to inquire of the gentleman from California what this man could receive as a pension to which he would be entitled for having received injuries incurred while in line of duty, and what different allowance he would receive if restored to the retired list?

Mr. KAHN. I do not know just what pension he would be entitled to. This officer graduated at West Point.

Mr. STAFFORD. What pension is a captain allowed, because he was retired as a captain?

Mr. KAHN. No; he was not retired at all.

Mr. STAFFORD. He resigned.

Mr. KAHN. He resigned at a time when he was mentally unbalanced. Every captain in the regiment advised the colonel not to accept his resignation. He should have been retired for physical disability; but instead of that the colonel of the regiment did send his resignation on to Washington, and it was accepted.

If the gentleman will look over the papers on file in the case he will find a signed statement made by his fellow officers to the colonel of the regiment urging that his resignation be not accepted. This man was severely wounded in 1899 and afterwards went insane. He was sent to an insane asylum and was treated there for several months. Subsequently he was discharged as cured, went back to the Philippines, and entered the campaign against the Moros. He was exposed to all the hardships and rigors of that campaign. While in that campaign he became obsessed with the idea that his accounts were not right and he resigned. Of course his accounts must have been right or his resignation could not have been accepted. The officers with whom he was associated realized the condition of his health and urged the colonel not to accept the resignation. He should have been sent before a medical board of survey and should have been retired for disability.

Mr. STAFFORD. Of course the gentleman does not question but that he has a pensionable status?

Mr. KAHN. I do not think he has.

Mr. STAFFORD. For injuries received in the service that are the cause of his present physical condition? That is the basis of the claim for reinstatement.

Mr. KAHN. I do not know whether he has a pensionable status.

Mr. STAFFORD. Can the gentleman give us the reason why the War Department at one time returned an unfavorable report in the case?

Mr. KAHN. I do not know, but I had a talk with Gen. Wood subsequent to the time that that favorable report was sent to the committee. Gen. Wood said that he had looked up the record of this man and found that he was an exceedingly brave and efficient officer, and that on the retired list he could be of considerable service to his country doing the work that retired officers can do. He is a comparatively young man, and, in my judgment, he would be very efficient in the recruiting service and work of that kind.

Mr. STAFFORD. I think the record shows he is not only a physical but a mental wreck. It is one of those unfortunate cases, and the question in my mind is whether he would not have a pensionable status which would compensate him for injuries which he received in the Philippine service. He certainly has a meritorious record.

Mr. KAHN. I think he still carries the bullets he received.

Mr. STAFFORD. I do not feel inclined to press the objection.

Mr. MANN. Mr. Speaker, will the gentleman yield?

Mr. KAHN. Certainly.

Mr. MANN. As I understand, this man had an attack of what we usually call insanity—two distinct mental disturbances, in fact.

Mr. KAHN. Yes.

Mr. MANN. And he resigned while in one of those mental disturbances?

Mr. KAHN. Yes.

Mr. MANN. The other captains protested against the acceptance of his resignation?

Mr. KAHN. Exactly.

Mr. MANN. But the adjutant of the regiment declined to favorably consider their request because of the nature of the offense which had caused his resignation. Does the gentleman know what the nature of the offense was? I will not ask him to state what it is.

Mr. KAHN. I do not know. The information I have is that the man became obsessed with the idea that he was indebted to the Government. Of course that could not have been, or his resignation would not have been accepted.

Congress on one or two occasions has placed men on the retired list under similar circumstances. I recall the case of Detchmandy, in the Fifty-seventh Congress, and the gentleman may recall it. He was a very efficient officer in the Philippines and participated in the campaign against Aguinaldo. He was mentally unbalanced and resigned under somewhat similar circumstances to those existing in Capt. Donovan's case, and subsequently Congress restored him to the retired list.

Mr. MANN. Well, as I understand, the committee believes that this man sent in his resignation at a time when he was mentally irresponsible?

Mr. KAHN. Absolutely.

Mr. MANN. And that he ought to have been retired then.

Mr. KAHN. Exactly so.

Mr. MANN. Instead of his resignation being accepted.

Mr. KAHN. Exactly so.

Mr. MANN. I am opposed to these bills putting men on the retired list under ordinary circumstances, but if the committee is absolutely satisfied that he resigned only because he had an attack of insanity at the time, I think it puts a different light upon the case.

Mr. KAHN. The committee felt that way.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill? [After a pause.] The Chair hears none.

The bill was ordered to be read a third time, was read the third time, and passed.

FRANK ELLSWORTH M'CORKLE.

The next business in order on the Private Calendar was the bill (H. R. 3432) to reinstate Frank Ellsworth McCorkle as a cadet at United States Military Academy.

The Clerk read as follows:

Be it enacted, etc., That the President be, and he is hereby, authorized to reappoint as cadet at the United States Military Academy, without regard to age or the existence of vacancies, Frank Ellsworth McCorkle.

The SPEAKER pro tempore. Is there objection to the present consideration of this bill?

Mr. WINGO. Mr. Speaker, I would like to have some explanation of the bill.

Mr. McKELLAR. Mr. Speaker, I will say for the benefit of the gentleman and the House this is one of a number of cadets who were dismissed from the academy, and who have been all

restored except two others and this one. The others were restored, and I believe two did not ask to be restored. Six, I think, have already been restored by the Senate. A bill was passed by the Senate, and afterwards passed the House. These nine cadets were charged with having taken a glass of beer at some little town near West Point, and were dismissed from the academy on that account.

Mr. LANGLEY. Just one glass?

Mr. McKELLAR. I will see whether it was one glass or not; I have the facts here. I am mistaken about that; I will say for the benefit of Mr. LANGLEY and other gentlemen of the House it is two glasses of beer. These cadets were dismissed because of that. This was wrong, of course, but I think all these boys should be given another chance. The sentences of three of these boys were suspended, and they were kept in the academy. Congress has passed an act for the relief of the other three, and now this is the last one who is asking for relief. The committee thought this boy ought to have another chance.

Mr. WINGO. Did they all commit the same offense?

Mr. McKELLAR. Yes.

Mr. WINGO. All they did was to take a couple of glasses of beer?

Mr. McKELLAR. I am not sure how much each of the other cadets took.

Mr. WINGO. I do not care anything about the number——

Mr. McKELLAR. This boy took two glasses of beer. That is all the offense with which he is charged, and the committee thought he ought to be given an opportunity to redeem himself.

Mr. GOULDEN. How many of these boys were there originally?

Mr. McKELLAR. Nine.

Mr. GOULDEN. And seven have been readmitted?

Mr. McKELLAR. Six have been readmitted, and two have not made application for readmission, as I am informed.

Mr. GOULDEN. Why did not this boy make application earlier?

Mr. McKELLAR. He made application, but it happened Mr. ANTHONY, his Representative, introduced a bill in the House, and the House method of getting at this thing is a much slower method than where a bill is introduced in the Senate.

Mr. GOULDEN. We discovered that long ago.

Mr. KAHN. Mr. Speaker, as a matter of fact a similar bill was reported to the House in the last Congress, but died upon the calendar because it was reported out late in the session.

Mr. McKELLAR. I will say to the gentleman from New York, if he will give me his attention for a moment, Mr. KAHN has called my attention to this fact, that the Committee on Military Affairs of the House reported this bill at the last session, but it died on the Private Calendar. That accounts for the delay.

Mr. GOULDEN. I hope the gentleman will see it does not die at this session.

Mr. McKELLAR. I thank the gentleman.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill? [After a pause.] The Chair hears none.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

GEORGE P. HEARD.

The next business in order on the Private Calendar was the bill (H. R. 2728) for the relief of George P. Heard.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of War be, and he is hereby, authorized and directed to allow George P. Heard, late captain, Medical Corps, United States Army, to take the examination prescribed by law and under the regulations for the government of the Army for the grade of major in the Medical Corps: *Provided*, That if the said George P. Heard successfully passes the required examination the President is hereby authorized and directed to appoint him a major, Medical Corps, upon the active list of the Army, to rank from December 15, 1910: *Provided further*, That nothing herein contained shall be construed to carry back pay.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. MANN. Mr. Speaker, reserving the right to object, this bill apparently proposes to restore a man to the Army, giving him advanced rank to date back to December 15, 1910. Does not the gentleman think this is going some to retire a man to the Army and give him advanced rank dating back three or four years?

Mr. McKELLAR. Well, that was the date on which, it seemed to the committee, he ought to have been allowed to take that examination, and we think there was no reason why he should not.

Mr. MANN. He took an examination and failed in it, and under the law was dismissed.

Mr. McKELLAR. All line officers have the right to take a second examination; and I will say to the gentleman that he was very, very close to the mark, as he will see by the record here. I hope the gentleman will not object to it.

Mr. MANN. I do not think it is proper to date back these restorations.

Mr. McKELLAR. I am not going to be captious about that, and if the gentleman feels that there ought to be some revision, if he will offer an amendment I do not know but that I will agree to it. I hope he will make it as mild as possible and give this gentleman a chance.

Mr. MANN. I do not know what the amendment ought to be, whether it should be to strike out "to rank from December 15, 1910." or not.

Mr. McKELLAR. This has been on the calendar. It was reported out last year, and it came up and failed because of the termination of the session.

Mr. MANN. It was reported out only on January 30. It has not been very long.

Mr. McKELLAR. It was reported out at the last session of Congress.

Mr. MANN. I beg the gentleman's pardon. It was reported out on January 30.

Mr. McKELLAR. This present bill was reported out at this session, of course, but a similar bill was reported out at the last session of Congress. Of course, this bill was not——

Mr. MANN. I am talking about this bill.

Mr. McKELLAR. Now, if the gentleman from Illinois will suggest what amendment he desires to offer——

Mr. MANN. I do not think I know enough about it to suggest an amendment, but I am opposed to restoring a man to the Army and giving him an advanced rank in the restoration, and then dating back the rank three or four years.

Mr. McKELLAR. I will suggest to the gentleman I will offer an amendment on page 1 of the bill to strike out the last two words on page 1, and down to the colon in line 2 on page 2, "to rank from December 15, 1910." I will move to strike out those words.

Mr. MANN. I suppose then some gentleman will go over and urge the Senate to restore the language, and then the House, under the gentleman's leadership, will agree to the amendment.

Mr. McKELLAR. I will say to the gentleman if I agree to strike out those words I am not going to urge any such amendment as that in the Senate.

Mr. MANN. I know the gentleman would not go to the Senate. I would not accuse him of that.

Mr. McKELLAR. Mr. Speaker, in order to meet the objection, I move——

Mr. MANN. If the gentleman will agree to offer the amendments and support them, and strike out the language he speaks of, and also the words "and directed" in line 4, page 1, so it will simply give the President authority to appoint the man——

Mr. McKELLAR. I am inclined to think that that ought to be done, anyway.

Mr. MANN. I do not think we can direct the President.

Mr. McKELLAR. I think not.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. STAFFORD. Mr. Speaker, reserving the right to object, I think there should be another clause similar to the other bills reported from the Committee on Military Affairs of this character, to the effect that the number of officers shall not be increased by reason of the passage of this act. It is not intended to increase the number of officers just to accommodate a man who could not pass his examination and who now wishes to get back in the service.

Mr. MANN. The last proviso ought to go out, and the gentleman can insert it in that. If the gentleman's amendment goes through, there is no necessity for providing it shall not carry back pay.

Mr. McKELLAR. Why not strike it all out?

Mr. STAFFORD. I suppose the gentleman has no objection to including the language that I refer to?

Mr. McKELLAR. What is that?

Mr. STAFFORD. Providing the number of officers shall not be increased by reason of the passage of this act.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill? [After a pause.] The Chair hears none. Does the gentleman from Tennessee desire to offer an amendment?

Mr. McKELLAR. Mr. Speaker, I offer the following amendment to the bill:

In line 4, page 1, of the bill strike out the first two words, "and directed."

Mr. KAHN. Also the same in line 10.

Mr. McKELLAR. Also the same words in the last line of page 1. I offer those amendments to page 1.

The SPEAKER pro tempore. The Clerk will report the amendment.

The Clerk read as follows:

Page 1, line 4, strike out the words "and directed," and on page 1, line 10, strike out the words "and directed."

The SPEAKER pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. McKELLAR. Mr. Speaker, I now offer the following amendment: In line 1, page 2, strike out everything in the paragraph after the word "Army," and insert in lieu thereof the words:

Provided further, That the number of officers shall not be increased by reason of the passage of this act.

The SPEAKER pro tempore. The Clerk will report the amendment.

The Clerk read as follows:

Page 2, strike out all after the word "Army," in line 1, and insert the following: "*Provided further*, That the number of officers shall not be increased by reason of the passage of this act.

The SPEAKER pro tempore. The question is on agreeing to the amendment.

The amendmeat was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill as amended.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

Mr. McKELLAR. Mr Speaker, I ask that the report of the committee be published in the RECORD. This report is as follows:

The Committee on Military Affairs, to whom was referred the bill H. R. 2728, having considered the same, report thereon with a recommendation that it do pass, and in support of this recommendation submit the following report:

Dr. George P. Heard entered the service at Fort McPherson July 13, 1901. He was honorably discharged from the service December 15, 1909. The following is his record while in the service:

GENERAL SUMMARY OF EFFICIENCY REPORTS.

1903. Maj. C. L. Hodges, Twenty-third Infantry, Parang, P. I.: In charge of town near by during prevalence of cholera. Performance of duty, excellent. General summary of habits, conduct, bearing, professional zeal, ability: Excellent. Condition of discipline, capacity for command: Good.

1904. Col. J. T. Van Orsdale, Seventeenth Infantry, Cotabato, P. I.: General summary: Excellent.

Maj. C. L. Hodges: Attention to duty: Excellent. General summary of professional zeal, bearing, appearance, intelligence, etc.: Good.

Lieut. H. C. Bonnycastle, Parang, P. I.: General summary: Very good to excellent.

1905. Capt. Durfee, Seventeenth Infantry: General summary: Excellent to good.

1906. Lieut. Col. G. H. Torney, General Hospital, Presidio, San Francisco: General summary: Very good to good.

1907. Lieut. Col. G. K. Hunter. General summary: Excellent to very good.

1908. Capt. Walter Cox, Medical Corps, Camp Bumpus, P. I. General summary: Very good to good.

1909. Col. Crampton, Medical Corps, chief surgeon, Philippines Division. States he has had little opportunity to observe, but gives general summary of good.

1909. Col. C. A. P. Hatfield, Camp McGrath: General summary: Good.

It will be seen from the foregoing that Dr. Heard was in service in the Philippine Islands for a little more than five years. That during a portion of this time an epidemic of cholera prevailed in the post where he was stationed, and that his performance of duty at such a time is declared by his officer in charge to have been excellent. A careful examination of the foregoing report shows that it is one that any officer surgeon in the Army might feel proud of.

On March 17, 1910, Maj. Gen. Leonard Wood, with whom Dr. Heard had served in the Philippine Islands, and who knew personally of the facts about which he spoke, stated of Dr. Heard:

"George P. Heard, late captain, Medical Corps, United States Army, served under my command in Mindanao, P. I., during the years 1903, 1904, and 1905. His professional reputation was excellent, and his discharge of duty marked by zeal and efficiency. His work while in charge of the hospital at Cotabato was especially notable for its excellence. His standing as an officer was excellent.

"LEONARD WOOD,
"Major General, United States Army."

Under the same date Gen. Wood wrote the following letter to Dr. Heard:

HEADQUARTERS DEPARTMENT OF THE EAST,
Governors Island, New York City, March 17, 1910.

DEAR DR. HEARD: I inclose herewith statement concerning your service in Mindanao which I hope will be of service to you. I remember very well your excellent work there, especially at Cotabato. I am exceedingly sorry to hear that you are no longer in the service.

With kind regards, very truly, yours,

LEONARD WOOD.

DR. GEORGE P. HEARD,
New York Post Graduate Medical School,
303 East Twentieth Street, New York City.

As to how Dr. Heard was esteemed both as a man and as a soldier by his brother officers in the Army is shown by copies of the following correspondence:

FORT BENJAMIN HARRISON, IND.,
August 29, 1910.

DEAR HEARD: I have just returned from a practice march and find your letter of August 22, and I can't tell you how surprised and sorry I was to hear of your failure on examination for promotion. I feel sure that something other than your ability as a medico must have been involved. (Probably you forgot to give the command "March" after giving "Prepare to pass obstacles.")

Our experiences in the Cotabato Valley, in 1904, are only too fresh in my memory, and the many expressions I then heard from officers and men of your constant care and attention to business.

I will never forget your tireless energy and care of Private Lemmuel and myself when they got us at Bulacan; nor will I ever be able to express my gratitude to you for pulling me through without any after effects.

Seriously, Medico, I am not much of a hand at writing or talking, but if you want to be reinstated, just gather together that command of doughboys you served with in the valley, march them up to the "powers that be," and they will tell a few things that are not known to your superiors, nor are they on record—of duty well and faithfully performed.

You spoke of writing to my father. You know he has been on leave in China and Japan, and has only just returned to his station.

Sincerely hoping that you will succeed in being reinstated, if you so wish,

Yours,

C. K. LEWIS,
First Lieutenant, Tenth Infantry.

—

FORT D. A. RUSSELL, WYO., *March 15, 1910.*

To whom it may concern:

I am personally acquainted with Capt. George P. Heard, late of the Medical Corps, United States Army, and served with him at Camp McGrath, Batangas, P. I., for about eight months in 1908 and 1909; and I take pleasure in certifying to his steady attention to his professional duties as a medical officer and to his ability as a physician and surgeon, as evidenced by the results within my personal observation of his services to officers and enlisted men and their families stationed at Camp McGrath.

FRED J. HERMAN,
First Lieutenant, Ninth United States Cavalry.

—

FORT MCPHERSON, GA., *February 28, 1910.*

To whom it may concern:

George P. Heard served under me for several months at Cotabato and in the valley of the Rio Grande of Mindanao, P. I., 1904. I had opportunity to observe his conduct as post surgeon, etc., and can report that same was to my entire satisfaction. The hospital was always in good condition and he was attentive to his duties in caring for the men, performing surgical operations, etc.

JOHN T. VAN ORSDALE,
Colonel Seventeenth Infantry.

—

FORT D. A. RUSSELL, WYO., *March 15, 1910.*

I hereby certify that Capt. George P. Heard, late of the Medical Corps, United States Army, attended myself and family at Camp McGrath, P. I.; that I found him eminently satisfactory and very attentive in his professional calls at my house where there was a sick baby. I greatly preferred him to any other medical officer stationed at Camp McGrath, and considered him one of the best medical officers I ever came in contact with.

ROBT. STERRETT,
First Lieutenant, Ninth Cavalry.

—

FORT D. A. RUSSELL, WYO., *March 14, 1910.*

To whom it may concern:

I was stationed with Dr. George P. Heard at Camp McGrath, P. I., for a period of about eight months. During part of this period he acted as post surgeon.

It was the general opinion among the officers of the garrison that he was the most efficient medical officer at the post.

He is a man of exceptionally good habits, was always attentive to his duties, and performed all his duties in an exceptionally efficient manner.

Respectfully,

GEO. W. WINTERBURN,
First Lieutenant and Squad Adjutant, Ninth Cavalry.

—

FORT D. A. RUSSELL, WYO., *March 16, 1910.*

To whom it may concern:

I have served for a considerable time in the same post with Dr. G. P. Heard. I consider that for zeal in his profession and for care and attention to cases intrusted to him this officer was decidedly above the average Army doctor. His reputation in these respects was excellent.

EDWARD CALVERT,
First Lieutenant, Ninth Cavalry.

—

FORT BLISS, TEX., *March 1, 1910.*

MY DEAR HEARD: Your letter just received and was glad to hear from you. Yes; I had learned about your case and was very sorry to hear it, and have always believed that they made a great mistake.

It has been a long time since Camp Jossman, and I find it pretty hard to remember facts as they then existed, though our experience there should be vividly impressed on my mind.

As near as I can remember the circumstances it was on muster morning of October, 1902, when Maj. Evans and myself visited the hospital for the purpose of mustering the absentees in hospital. I remember that there were three or four men sick in the hospital and you said that you was afraid that they had cholera. This was, I should say,

about 9.30 or 10 o'clock a. m. At about 4 p. m. one of the men died with the cholera, and our epidemic, if you would call it such in medical parlance, was on. As far as your deserting the job, I know and believe that you did absolutely everything in your power to prevent the spread of the disease, and the mere fact that it was so prevented shows in itself that you was on the job all the time. I do not believe anyone could have performed more noble and self-sacrificing service than you did in those trying days, when we didn't know who was the next to go. Yours was the hardest task of all. When the fact that all of these cases of cholera, with possibly the exception of one, were actually traced to the negligence of the persons who had the disease, i. e., drinking water at unauthorized places, and the fact that the cholera did not spread to the command, it is conclusive proof to my mind that some one was responsible for the satisfactory results, and to my mind you should be given credit for them.

I think it would be well for you to get a letter from Col. Evans and from Chaplain Dougherty; they both knew the state of affairs that existed in those days.

It is all very well for the man back at the desk and out of danger of the operations to criticize and say what should have been done. But it's a far different matter to be up face to face with the proposition with only thin air and very little of it to separate you from the dreadful consequences of contracting the cholera.

Heard, I believe you did all you could and have always upheld your actions when they were discussed; and if you were fired from the corps on this charge it should be removed.

My kindest regards and best wishes. Hope you get your bill through all O. K.

Sincerely,

W. H. WALDRON,
Captain, Twenty-third Infantry.

—

FORT D. A. RUSSELL, WYO., *March 8, 1910.*

To whom it may concern:

This is to certify that I have known Capt. George P. Heard, Medical Corps, United States Army, for about a year, and that during the time he served as a medical officer at Camp McGrath, P. I., his conduct as a man was above reproach, and it was universally conceded that his services as a physician were all that could be asked, and generally above the average in his corps.

It would be superfluous for me to add anything to the good name of Capt. Heard.

Very respectfully,

S. B. PEARSON,
Captain, Ninth Cavalry.

—

To whom it may concern:

I take pleasure in stating that I was stationed at Batangas, P. I., while George P. Heard was serving there as captain in the Medical Corps, and had occasion to call for his professional services at different times for myself and family. I always considered him unusually attentive to duty; in fact, I think I was treated for ear trouble by every medical officer stationed there for two years, and none of them gave as much personal attention to my case as did Dr. Heard, and with good results.

I think it was generally considered that he was very attentive to duty, and his judgment was relied upon; I think also that it was the general impression that Dr. Heard could always be relied upon to respond cheerfully to calls from the poorer classes of natives (charity cases); the same can not be said of all of his colleagues.

Personally, I considered Dr. Heard's proficiency and attention to duty as much above the average as compared with other officers of the same grade and experience.

W. H. MCCORMACK,
Captain, Ninth Cavalry.

—

HEADQUARTERS DEPARTMENT OF THE EAST,
CHIEF QUARTERMASTER'S OFFICE,
Governors Island, New York Harbor, March 15, 1910.

To whom it may concern:

This is to certify that I have known Dr. George P. Heard since July, 1902. He was formerly a surgeon in the Medical Corps, United States Army, and while serving in that capacity was stationed with me at Bacalod, Negros Island, P. I., and afterwards at Camp Jossman, Guimaras, P. I.

I have personal knowledge of the fact that he was, during his service at these two places, attentive to his work and successful in his efforts during critical times in the presence of serious outbreaks of cholera. While serving at Camp Jossman, I understood, he was subjected to criticisms of the chief surgeon, Department of the Visayas. It gives me great pleasure to state that it is within my knowledge that there was nothing in Dr. Heard's conduct at that time that did not then have the cordial support of the officers serving with him, including his commanding officer, Maj. W. P. Evans, Twenty-ninth Infantry (now lieutenant colonel, General Staff). On the contrary, his attention to duty, his practical intelligence, and his courage to do what he believed to be right appealed to his fellow officers and won their commendation.

I have always rated Dr. Heard among the surgeons I have known in the Army as one of those who possess high professional attainments and courage.

Very respectfully,

B. H. WELLS,
Captain and Quartermaster, United States Army.

—

FORT D. A. RUSSELL, WYO., *April 15, 1910.*

Dr. GEO. P. HEARD, *Columbus, Ga.*

MY DEAR DOCTOR: I have been intending to drop you a line for some time expressing my regret at your separation from the service. It was my pleasure and fortune to serve with you some time in Camp McGrath, Batangas, and you may rest assured that I and my family had the greatest confidence in you and regarded your professional ability equal to any and superior to most doctors that we have served with.

With best wishes for your future success, I am,

Sincerely,

F. S. ARMSTRONG,
Captain, Ninth Cavalry.

FORT MCPHERSON, GA., *April 27, 1910.*

Dr. G. P. HEARD,
New York Post Graduate Medical School, New York, N. Y.

MY DEAR DOCTOR: Your letter of April 9 received, and I take pleasure in stating in writing that I knew you in the years 1904–5, while I was district governor, Cotabato district, and while you were post surgeon at Cotabato. I always considered you a most efficient, faithful, and conscientious doctor and noted many instances in which you went out of your way to help sick and destitute Moros.

I was personally very sorry to hear you had failed in your examination and hope you will be successful in getting a reexamination, and I am sure you do yourself credit. You may show this letter if you think it will help you, but I trust you can succeed without its doubtful aid.

Yours, most sincerely,

R. O. VAN HORN,
Captain, Seventeenth Infantry.

—

PAY DEPARTMENT, UNITED STATES ARMY,
DEPARTMENT OF THE MISSOURI,
Omaha, Nebr., May 9, 1910.

To whom it may concern:

This is to certify that I have known Dr. George P. Heard the past two years and during that time he had occasion to treat my wife successfully during a very severe illness lasting over a month. I feel that her recovery was in a great measure due to his untiring efforts on her behalf.

I have always considered him a most willing worker and a good officer.

E. M. SUPLEE,
Captain, Paymaster, United States Army.

—

PHILIPPINE CONSTABULARY SCHOOL,
Baguio, P. I., July 25, 1910.

To whom it may concern:

I had the pleasure of knowing Capt. G. P. Heard, assistant surgeon, United States Army, under circumstances of close official and personal relations for the period of about one year at Cotabato, Mindanao, 1904–5. Of his surgical and medical work I had opportunity to judge from his treatment of my company and of many indigent Moros. After an experience of 11 years in the Philippines and being constantly in the company of Army surgeons I consider Capt. Heard the most efficient one I have met. Personally he is a big-hearted southern gentleman, whom I would trust as a brother.

JOHN R. WHITE.
Lieutenant Colonel, Assistant Director Philippine Constabulary.

—

CAMP MCGRATH,
Batangas, P. I., August 12, 1914.

MY DEAR DR. HEARD: Upon my return from China, July 11, I found your letter and misplaced it. It has just turned up.

While I wish you all success in your efforts to be reinstated in the Medical Corps, I do not know what I can say to help except that your not passing the examination was totally unexpected, as I and others know you to be capable and able to do so.

Your treatment and care of my son, Lieut. Lewis, when he was dangerously wounded in Mindanao, from his account of it to me, showed that you possessed not only the skill of the surgeon but the gentleness of the nurse as well. I am sorry that this is all I can say, but to me it means a great deal.

Yours, sincerely,

THOS. J. LEWIS,
Major, Thirteenth Cavalry.

Dr. GEORGE P. HEARD,
Columbus, Ga.

—

WASHINGTON, D. C., *March 16, 1910.*

Dr. George P. Heard, late captain, Medical Corps, United States Army, was my associate at Camp McGrath, Batangas, P. I., from July, 1908, to March, 1909. From daily observation of him and his work I formed a high opinion of his attention to duty and professional ability. I have heard other medical officers and line officers who were associated with him commend him highly.

He had the confidence of the entire regiment (Ninth Cavalry) with which he served as above.

I was much surprised at his failure of promotion, and can not but believe that he was unfortunate in his examination therefor. I should like to see Dr. Heard given another opportunity for reinstatement, as, in my opinion, an officer is not capable of doing his best work before an examining board while serving in the Philippines.

R. S. WOODSON,
Major, Medical Corps, United States Army.

—

HEADQUARTERS NINTH CAVALRY,
Fort D. A. Russell, Wyo., March 18, 1910.

Dr. GEORGE P. HEARD,
Columbus, Ga.

MY DEAR DOCTOR: Your letter of recent date duly received, and I am glad to be able to bear testimony as you request. You served with my command at Camp McGrath, P. I., for quite a length of time. I was well satisfied with your attention to duty, which was commendable. I feel assured, from my personal observation and from the criticism I have heard, that your professional attainments are excellent. Your conduct as a man and an officer were, during the time I knew you, excellent.

If this statement of facts will be of service to you, I shall be well pleased.

With best wishes for your future welfare, believe me,

Very sincerely, yours,

C. H. WATTS,
Lieutenant Colonel Ninth Cavalry.

—

FORT LAWTON, WASH.,
OFFICE OF COMMANDING OFFICER,
July 10, 1910.

To whom it may concern:

This is to certify that Dr. G. P. Heard, late captain and assistant surgeon, United States Army, served for several months under my command on Guimaras Island, near Iloilo, P. I., as surgeon of my bat-

talion, during which time I found his services entirely satisfactory. He seemed a painstaking, zealous, and capable surgeon, and I was greatly surprised to learn of the circumstances of his separation from the service.

An outbreak of cholera in my command occurred while he was with it, for which, before the cause of the epidemic became known, he was officially criticized. It subsequently became known that the disease was contracted by some enlisted men who broke camp at night and joined a party of Philippine camp followers at a little barrio a couple of miles from camp, where they became infected by eating and drinking insanitary food and drinks with the natives. Appropriate measures were promptly taken and the epidemic stamped out without infecting any other members of the command.

W. P. EVANS,
Colonel Twenty-fifth Infantry.

—

HEADQUARTERS DEPARTMENT OF THE LAKES,
OFFICE OF CHIEF SURGEON,
Chicago, Ill., May 13, 1910.

MY DEAR DOCTOR: In reply to your letter of the 4th instant requesting a testimonial with a view to restoration to the service, desire to state that I have always regarded you as a bright, intelligent, and active medical officer. The services rendered during your recent tour in the Philippines and while under my medical charge were performed very satisfactorily to the command with which you served and to the chief surgeon of the department. You have always enjoyed the reputation of being very studious and an officer of excellent habits.

Yours, very sincerely,

L. M. MAUS,
Colonel, Medical Corps, United States Army.

Dr. GEORGE P. HEARD,
New York Post Graduate Medical School, New York City, N. Y.

—

FORT RILEY, KANS., *April 22, 1910.*

Dr. GEORGE P. HEARD,
New York Post Graduate Medical School, New York, N. Y.

MY DEAR DOCTOR: I know of nothing which has so surprised me as has the fact that you have failed in your examination for promotion in your corps in the Army. At Fort Wingate, N. Mex., you served under my command as post surgeon for one year and four months and it gives me pleasure to be able to state that during that entire period your duties were peculiarly well performed. Your hospital was a model of perfect sanitary arrangements. During the period of service with my command from August, 1906, to December, 1907, your professional zeal and fidelity to your duties were so marked as to win my entire approbation. During your whole service with me I never knew of your indulging in the use of intoxicating liquors at all. I can not, therefore, understand your failure to pass your examination and I feel that you should be granted another opportunity to show that you possess all of the qualifications expected of our medical officers, as I am convinced that you have this technical knowledge and can prove it if afforded the opportunity.

Very respectfully,

GEORGE K. HUNTER,
Colonel Seventh United States Cavalry.

—

VANCOUVER BARRACKS, WASH., *April 13, 1910.*

MY DEAR DOCTOR: I was much pleased to get your letter which reached me to-day. Its coming causes my memory to revert to the stirring times of the war in the Cotabato Valley, at which time you so ably filled the position of post surgeon at Cotabato.

I do not wish to flatter you, but really I feel it is but due to yourself that I should express my appreciation of the manner in which you performed your duties while serving under me. Your attention to duty, your solicitation for the welfare of and attention to the sick, your markedly courteous treatment of all, and your success in the treatment of cases, some of which were of unusual seriousness, all tend to show and to prove conclusively your entire fitness in a personal and professional line for the position you held.

You impressed me most favorably and I am free to confess that I know of no surgeon whom I would rather have under my command than yourself.

With kindest regard and best wishes,

Yours, very sincerely,

G. K. MCGUNNEGLE,
Colonel First Infantry.

In May, 1906, Dr. Heard was examined for the purpose of determining his fitness for promotion to a captaincy, and after such examination the Surgeon General of the Army, George H. Torney, being president of the board, duly accepted the examination and he received his promotion to a captaincy.

In October, 1909, Dr. Heard was again directed to stand an examination to determine his fitness for further promotion. This examination was taken in Manila, and the board reported unfavorably, claiming that the general average of Dr. Heard was 73.2 per cent, when the minimum requirement was 75 per cent. (See report of Secretary of War.)

While at Camp Presidio, the board in Washington confirmed this report and Dr. Heard was duly but honorably discharged from the Army.

The bill simply provides that Dr. Heard be allowed to take the examination prescribed by law under the regulations for the government of the Army for the grade of major, in the Medical Corps, and provides further, that if he successfully passes the required examination, the President is authorized to appoint him a major, but nothing in the bill provides for any back pay.

The committee wishes to call attention to the fact that Dr. Heard's examination papers showed, according to the report of the board, that he made an average of 73.2 per cent, when 75 per cent was required. The examination showed such a record as would justify either average.

The committee is of the opinion that Dr. Heard should be permitted to stand another examination. Another consideration with the committee is that all other line officers are allowed to stand a second examination, and the committee does not see why these medical officers should not have a second opportunity to stand this examination, and especially in view of the fact that the difference between the required per cent and the per cent which the board found Dr. Heard had made is so very small.

The committee recommends that the bill be passed.

The SPEAKER pro tempore. The Clerk will report the next one.

WILLIAM P. HAVENOR.

The next business in order on the Private Calendar was the bill (H. R. 6052) for the relief of William P. Havenor.

The Clerk read the bill, as follows:

Be it enacted, etc., That the patent issued January 6, 1910, to William P. Havenor for the south half of the southeast quarter of section 6 and lot 1 of section 7, township 6 south, range 34 east, Boise meridian, containing 121.27 acres, is hereby confirmed, and the Secretary of the Interior is hereby authorized and directed to issue patent to the said William P. Havenor for the northeast quarter of the southwest quarter of section 6, township 6 south, range 34 east, Boise meridian, containing 40 acres, an additional homestead entry. And also a patent for lot 7 and the east half of the southwest quarter of section 6 and the northeast quarter of the northwest quarter of section 7, township 11 south, range 37 east, entered under the desert-land laws, providing it is shown that the said William P. Havenor has complied with all the requirements of the homestead and desert-land laws of the United States applicable to said entries, notwithstanding the fact that the said William P. Havenor had been commissioned as a deputy mineral surveyor of the United States.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

Mr. FRENCH. Mr. Speaker, I just wanted to offer an amendment touching the form, to strike out a period at the top of page 2, line 1, and insert a comma, and begin the next sentence with "and," using a small letter.

The SPEAKER pro tempore. The Clerk will report the amendment.

The Clerk read as follows:

Page 2, line 1, strike out the period after the word "entry" and insert a comma and insert a small "a" to the word "and."

The SPEAKER pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the amended bill.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

The SPEAKER pro tempore. The Clerk will report the next bill.

JOHN S. M'KINNEY.

The next business in order on the Private Calendar was the bill (S. 3192) waiving the age limit for appointment as cadet engineer in the Revenue-Cutter Service of the United States in the case of John S. McKinney.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is hereby authorized to waive the age limit for the appointment of cadet engineers in the Revenue-Cutter Service, as required by the act of June 23, 1906, in the case of John S. McKinney, and that the Secretary of the Treasury is authorized to permit the said John S. McKinney to participate in the next competitive examination to be held for the position of cadet engineer in the Revenue-Cutter Service.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. MANN. Reserving the right to object, I would like to ask my distinguished friend from Georgia [Mr. ADAMSON], now the chairman of the Committee on Interstate and Foreign Commerce, if that committee is going to break over the rules of the past and start in on special legislation for the Revenue-Cutter Service?

Mr. ADAMSON. Mr. Speaker, in the hearings on this bill the committee examined the officers of the Revenue-Cutter Service. I confess that, with the great caution customary to the members of that committee, we approached the consideration of this Senate bill with care. We had hearings, and after the hearings we determined that this was a meritorious case, and that it was not necessary to break over any rules in order to report the Senate bill.

I think I can briefly state the facts to the House. This young man had a good deal of experience in the Navy. He desired to be a cadet in the Revenue-Cutter Service, and he filed his application for an examination. Before he was examined the sundry civil bill passed, prohibiting the appointment of any further cadets.

Mr. MANN. Oh, the gentleman——

Mr. ADAMSON. Just wait a moment——

Mr. MANN. The gentleman has forgotten this case for the moment and is thinking of another case that came up a number of years ago.

Mr. ADAMSON. No; it was this case, if the gentleman will wait a moment. Then the next sundry civil bill passed, chang-

ing that and permitting further appointments. This young man renewed his application and expected to be examined, but, unfortunately, the President vetoed that sundry civil bill. Afterwards the House passed the same bill, and it was signed, but the young man's birthday had come along too fast, and a month before that bill was signed he got too old.

Now, he thinks that, considering all these various and sundry facts and vicissitudes, he ought to be allowed to take the examination for appointment in that service. During the consideration of the subject it appeared from an examination of the revenue-cutter officials that the service is short of eligibles; that there are vacancies existing now; and that at the examination which was held after this young man became too old to take it they lacked one of having enough. They all like him; they indorse him; they think he is competent; they think he will pass the examination; and they do not think he ought to be deprived of the examination or the service deprived of his ability on account of this series of accidents. I hope my genial and affable friend will be satisfied with this explanation, which is a simple statement of the facts as brought out in the hearings, and that he will not regard this as any unpardonable infraction of the rules which have so long distinguished that committee by their observance rather than by their breach.

Mr. MANN. We passed an act in 1906, I believe—the gentleman from Georgia [Mr. ADAMSON] and I, and others in our committee and in the House—fixing the age limit of entrance for engineer cadets at 26 years. At that time there was one man who had already taken the examination. The age limit was fixed after he took his examination. We did pass a private bill to permit that boy to be admitted, because after he took the examination we cut him out by legislation. Now that is given as a reason why we ought to pass this bill, although the case does not exist here at all. I think the bill to which I refer is the only bill we ever passed out of our committee for personal legislation in the Revenue-Cutter Service since the gentleman and I went on the committee in 1897. There are on this calendar two bills for personal legislation in the Revenue-Cutter Service, and they always say, "Why, they can do that in the Navy." Well, the Navy Committee is weak sometimes [laughter] in heart, at least, but the great Committee on Interstate and Foreign Commerce ought to stand up straight, and if they will not do it I will help them.

Mr. ADAMSON. Mr. Speaker, I would not for the world differ with my distinguished friend on matters of judgment, for he is an exceedingly judgmatical man [laughter]; but when it comes to comparisons all of us have the right to take a fling at it with our judgments, whether they be good or bad. Now, our committee has changed somewhat in personnel, it is true, since the days when the gentleman was chairman of it, and perhaps it suffers in some respects even as to the chairmanship. [Laughter.]

Mr. MANN. It is still a great committee.

Mr. ADAMSON. The gentleman himself was not the distinguished chairman of the committee at the time the first precedent was established.

Mr. MANN. No; if I had been, that precedent would not have been established.

Mr. ADAMSON. But the gentleman and I were both on the committee when the precedent was established, and we did not defeat it or object to it; and when it comes to a comparison, I ask the gentleman to allow the House to decide if this is not fully as justifiable a case as the other. It is true we did not legislate this man out just after his examination; but a series, a concatenation of misfortunes, part of them legislative and part executive, happened to deprive him of the examination when he was young enough; and he is able to stand the examination. Since the gentleman from Illinois went off of that committee the Revenue-Cutter Service has met with a good deal of trouble at the hands of other committees besides ours. Another great committee of this House has taken the liberty to legislate a good deal about the Revenue-Cutter Service, and in the sundry civil bill for the year 1913 it did legislate this man out of a chance to stand the examination. He had his hopes revived when the sundry civil bill for the next year contained a provision restoring his lost opportunity, authorizing seven cadets to be examined. He went to work and prepared for that examination. Unfortunately President Taft vetoed that bill. He was still young enough when it was vetoed, but before the bill could be passed again and signed, the young man got to be too old. If that is not being legislated out of opportunity, it is mighty near it. We had some legislative and some executive and other things happen, and old man Tempus kept on working; and it looks as though there was a complication of diseases, that make it a much harder case, a much stronger appeal to the discretion of the committee and of the House than the precedent which the gentleman and I helped to set. I hope the gentleman in this case will concede that it is not such a great infraction of the rules, and a violation of the dignity of our great committee as at first it may have appeared to him; and I do hope his good nature will remain with him until this bill can be passed. [Applause.]

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. MANN. I object.

JOHN W. CANARY.

The next business in order on the Private Calendar was the bill (H. R. 932) for the relief of John W. Canary.

The bill was read.

The following committee amendment was read:

Strike out all after the enacting clause and insert the following: "That the Secretary of the Treasury be, and he is hereby, authorized and directed, out of any money in the Treasury not otherwise appropriated, to pay to John W. Canary, $461.50 for his services as first lieutenant Company I, Second Regiment Indiana Volunteer Cavalry, from October 31, 1863, to March 4, 1864."

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. MANN. Reserving the right to object, where does the committee get the amount named in the bill, $461.50?

Mr. LOBECK. It is stated in the report:

The Treasury Department reports to your committee that if paid as a first lieutenant from October 31, 1863, to March 4, 1864, inclusive——

Mr. MANN. Yes; I read that.

Mr. LOBECK. Let me finish it—

deducting amount received as first sergeant, the amount due is $461.50.

Mr. MANN. That possibly is the inference of the committee, or the clerk of the committee who prepared the report. The committee inserts the findings of the court, in which Judge Atkinson stated, apparently, that—

Said difference of pay and allowances being $54.40.

Now, the committee gets the report from the Treasury Department showing that the Court of Claims was mistaken. I think the House would be entitled to the report from the Treasury Department. The gentleman will find in the opinion of Judge Atkinson, on page 2 of the report:

The claimant was, he alleges, commissioned by the governor of the State of Illinois October 24, 1864, as first lieutenant of Company I, Fifty-second Illinois Volunteer Infantry. At the date of his said commission and for some time prior thereto he had been first sergeant of his company and was enrolled and paid as such by the War Department up to the date that he was mustered in as first lieutenant, viz, December 17 of said year, and he now petitions Congress to allow him the difference in pay of a first sergeant and that of first lieutenant from the date of his commission to the day he was mustered in as a commissioned officer, said difference of pay and allowances being $55.40.

Mr. LOBECK. That is not in this case; that is in the case of John W. Acker.

Mr. MANN. That may have been simply the opinion of the court.

Mr. LOBECK. The opinion was delivered in the case of Acker. He was a member of Company I, Fifty-second Illinois Volunteer Infantry, and Canary was a member of Company I, Second Indiana Volunteer Cavalry.

Mr. MANN. Did the committee have the letter from the Treasury Department?

Mr. LOBECK. Yes.

Mr. MANN. Why was it not included in the report?

Mr. LOBECK. I did not make up the report; the clerk of the committee made up the report.

Mr. MANN. It seems to me that if the committee leaves it to the clerk to make up the report, the report should give the information on which the committee makes its findings.

Mr. LOBECK. This man Canary was first sergeant up to October 24, 1863. He was made a lieutenant and acted as such up to March 4, 1864, but was paid as a sergeant. The Treasury Department says that the difference between the pay would be $461.50. For a precedent of this case you will find it on page 4 of the report, where it says:

For precedent for paying claims of this character see joint resolution approved July 11, 1870, entitled "Joint resolution amendatory of joint resolution approved July 26, 1866," is hereby so amended and shall be so construed that in all cases arising under the same any person who was duly appointed and commissioned, whether his commission was actually received by him or not, shall be considered as commissioned to the grade therein named from the date his commission was actually issued by competent authority, and shall be entitled to all pay and emoluments as if actually mustered at such date: *Provided*, That at the date of his commission he was actually performing the duties of the grade to which he was so commissioned, or if not so performing such duties, then from such time after the date of his commission he may have actually entered upon such duties.

Mr. STAFFORD. Will the gentleman yield?

Mr. LOBECK. Yes.

Mr. STAFFORD. Can the gentleman give the House the reason why this claimant's application was rejected by the War Department when he applied under the general act of February 24, 1897? I direct attention to the last two lines on page 2 and the first three lines on page 3, which read as follows:

The act of February 24, 1897 (29 Stats., 593), makes provision for the pay of this class of officers, but limits it to such as can come within some of its provisions. The claimant made application for payment under that law, and was refused upon the decision of the War Department that he did not come within the provisions above mentioned; hence the introduction of the bill quoted and its reference to this court.

Mr. LOBECK. That refers to the Acker case.

Mr. STAFFORD. The report says the Canary case is on all fours as the Acker case. As I understand the facts, this man was commissioned by the governor of the State, and he did not receive the commission from the National Government until some time later. He may not have been performing the duties. There is nothing in the report to show that he performed the duties.

Mr. LOBECK. Oh, yes; there is.

Mr. STAFFORD. I mean there is nothing in the report of the department.

Mr. LOBECK. I read the report of the department, and this report was made up and I approved it.

Mr. STAFFORD. I understood the gentleman to say that this report was made up by the clerk. I do not challenge anything that the gentleman has gone over himself and states as a fact.

Mr. LOBECK. I read in the report of the department of his appointment as lieutenant October 31, and also the record of his service as contained in the records filed with the Committee on War Claims that accompanied the bill. It says that he actually did serve both in the field and that he recruited men for the service because his company had got below the actual number needed on account of loss of men in service.

Mr. STAFFORD. I direct the gentleman's attention to the opinion of Judge Atkinson, where he says:

From what has been said above the conclusion of the court is that this is not in any sense a legal claim against the United States, and is equitable only in so far as the Government received the benefits resulting from the services of the men who were enlisted by claimant to become volunteer soldiers in the United States Army.

Is it the purpose of the committee to compensate all these old, stale claimants whose claims have been rejected when they were presented under the general law?

Mr. LOBECK. This claim was not rejected. The report says, on page 2:

It may be asked why this claim was not referred to the Court of Claims "for the investigation and determination of facts" under section 151 of the Judicial Code, and the answer is, that such reference has been made and without results.

The fact is the man actually served as lieutenant from the time when appointed and did actual service and has not been paid, and probably his commission was delayed in being issued on account of the hurry of actual war and did not reach him until March 4.

Mr. STAFFORD. All these men acted, but they were commissioned by the governor, who did not have authority to award commissions binding on the National Government.

Mr. LOBECK. There was the usual red tape to go through before the commission could be issued, and still the men in the meantime were giving their services on the fields of battle to the country and Nation.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

THEODORE DEHON.

The next business in order on the Private Calendar was the bill (H. R. 10201) for the relief of the heirs of Theodore Dehon.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the heirs of Theodore Dehon the sum of $500, for the seizure of 100 bushels of rice, under misinformation, by Capt. Armstrong, and used to feed freedmen in Colleton district, South Carolina, in November, 1865.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill? [After a pause.] The Chair hears none. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

JAMES S. CLARK.

The next business in order on the Private Calendar was the bill (H. R. 13240) for the relief of James S. Clark.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the legal representatives of James S. Clark, of Fayette County, Ky., the sum of $1,886, in full compensation for personal property taken and used and damages done in the use and occupation of real estate, all belonging to said James S. Clark, by the Army of the United States during the War with Spain in the months of August, September, October, November, and December, 1898, in and about the establishment and maintenance of a military camp at Camp Hamilton, in said county and State.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill? [After a pause.] The Chair hears none. The Clerk will report the committee amendments:

The Clerk read as follows:

Line 7, strike out the figures "$1,886" and insert in lieu thereof the figures "$250."

Line 8, strike out the words "damages done in the."

The SPEAKER pro tempore. The question is on agreeing to the committee amendments.

The committee amendments were agreed to..

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill as amended.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill for the relief of the legal representatives of James S. Clark, deceased."

BALEY W. HAMILTON.

The next business in order on the Private Calendar was the bill (H. R. 8808) for the relief of Baley W. Hamilton.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury of the United States not otherwise appropriated, to Baley W. Hamilton, of Rockport, Spencer County, Ind., the sum of $146, in full compensation for the loss of a horse during the Civil War, while he was a private in Company F, First Regiment Indiana Volunteer Cavalry.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. STAFFORD. Mr. Speaker, reserving the right to object, I see in the exhibits in this bill that there is great confusion as to whether this claimant ever owned a horse.

Mr. LOBECK. Mr. Speaker, there is a good deal of evidence, I will say to the gentleman, that he did own the horse.

Mr. STAFFORD. The gentleman will concede that there is a great deal of evidence in the record that shows that he never owned the horse.

Mr. LOBECK. But the preponderance of evidence is the other way.

Mr. STAFFORD. But the gentleman will agree that there is evidence on both sides.

Mr. LOBECK. The preponderance of evidence is in favor of the man's owning the horse. The gentleman from Indiana [Mr. LIEB] is personally familiar with the case, having introduced the bill, and I would prefer to have him take charge of the bill from now on.

Mr. LIEB. Mr. Speaker, there is no controversy about the ownership, because this man Baley W. Hamilton was the owner of this horse. The horse was in the battle at Marks Mills, Ark., in 1864.

Mr. STAFFORD. I direct the attention of the gentleman to the report of the second comptroller, as found on the bottom of page 3 of the report:

The second comptroller was also led to believe, as indicated in disallowance, that claimant was not in possession of horse on or about the date of the battle in which it was alleged horse was lost.

What has the gentleman to say about that?

Mr. LIEB. Mr. Speaker, I will say that when this Baley W. Hamilton had turned the claim over to the claim agent here he filed part of the papers, and during the time this was under consideration in the department he was requested to furnish more evidence. In the interim the agent had died, and the man was too poor to get another, and he did not have anyone else to take up his claim, and it laid dormant until 1888, when the Representative in Congress took it up. They were short of one affidavit, and that was furnished by the man who sold the horse. There are also affidavits here of two or three others, who testified that he did own the horse, who knew that he bought the horse from this man Barnnett. The affidavits are all here.

Mr. STAFFORD. There is considerable conflicting testimony, but I do not care to take the time of the House further, as the amount is very small and a good many years have elapsed since the facts occurred about which he could testify. I will give the benefit of the doubt to his failing memory.

Mr. HOWARD. Mr. Speaker, I would like to ask the gentleman from Indiana one question.

Mr. LIEB. I yield to the gentleman.

Mr. HOWARD. There is not any doubt about this being an Indiana horse? It was not an Arkansas horse?

Mr. LIEB. I do not know. He bought the horse down there. It might have been an Arkansas horse.

Mr. HOWARD. But he had the bona fide title to the horse?

Mr. LIEB. He bought the horse and paid for it with his own money.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill? [After a pause.] The Chair hears none. The Clerk will report the committee amendments.

The Clerk read as follows:

Line 7, strike out the figures "$146" and insert in lieu thereof the figures "$123.93."

Line 8, after the word "horse" insert the words "and equipment."

The SPEAKER pro tempore. The question is on agreeing to the committee amendments.

The committee amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

NAPOLEON B. GIDDINGS.

The next business in order on the Private Calendar was the bill (H. R. 851) for the relief of the legal representatives of Napoleon B. Giddings.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of War is hereby authorized and directed to cause to be investigated the circumstances of the alleged taking from Napoleon B. Giddings, in January, 1847, at Santa Fe, N. Mex., and depositing with A. B. Dyer, lieutenant of ordnance, United States Army, by order of Sterling Price, colonel commanding the Army in New Mexico at that time, of 140 kegs of gunpowder, and to ascertain and determine the reasonable market value of such powder at that time and place, and whether the same, or any part thereof, was ever returned or delivered back to said Giddings, and the final disposition of such powder; and if the same, or any part thereof, was never returned to or delivered back to said Giddings, then to certify to the Secretary of the Treasury the amount of the reasonable market value at that time and place of the powder so never returned or delivered back to said Giddings; and the Secretary of the Treasury is hereby authorized and directed to cause to be paid to the legal representatives of said Napoleon B. Giddings, the said amount so certified by the Secretary of War to be the reasonable market value of such powder as aforesaid.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. MANN. Mr. Speaker, reserving the right to object, the claim here is, as I understand it, that the owner of the powder, or the man who became owner of the powder, and in whose behalf this bill is introduced, had a debt to him of $1,950, and he took 140 kegs of powder in payment of the debt. The powder was then taken away from him; and 140 kegs of powder, 25 pounds to the keg, he says was worth $1.50 a pound, which would make $5,250. Now, does not the gentleman think it is going some for a man who can not collect a bill and takes merchandise for it and then wants from the Government three times what it cost him under doubtful circumstances?

Mr. GREGG. Will the gentleman yield for a moment? I want to call attention to the fact that this does not appropriate any money at all.

Mr. MANN. I understand; it never gives us another chance at it.

Mr. GREGG. It directs the Secretary of War to investigate and ascertain and determine what is the reasonable market value.

Mr. MANN. Determine the market value at the time, and the man swears the market value of the property was $1.50 a pound, and there were 3,500 pounds, for which he paid by collecting a debt of $1,950.

Mr. GREGG. I take it it means the Secretary of War should consider all that in passing upon the value of the property.

Mr. MANN. I do not see how the Secretary of War could. I do not know what the value of the property is or was, and how are you going to fix what the value was at that time, and it is quite likely that at that particular place, under the circumstances of war and a desire to get powder, it may have had a fancy value; I do not know.

Mr. BOOHER. I will say to the gentleman from Illinois it is easy enough for the department to ascertain what they paid for powder at that time at Santa Fe. Santa Fe was in the possession at that time of the United States troops. It had been threatened——

Mr. MANN. But the United States did not buy powder at Santa Fe.

Mr. BOOHER. I think they did.

Mr. MANN. Oh, no.

Mr. BOOHER. Where did they get it? How did the Army get its supply down there?

Mr. MANN. Took the powder there; they did not buy powder on the ground.

Mr. BOOHER. But they know what they paid for it.

Mr. MANN. And they are not buying powder at Vera Cruz.

Mr. BOOHER. Did not they buy powder during the Mexican War, and do not they know exactly what they paid for it?

Mr. MANN. They brought or sent it there.

Mr. BOOHER. That would be the market price, with freight added.

Mr. MANN. Not at all.

Mr. STAFFORD. It is stated——

Mr. MANN. He states the powder is worth in the market $1.50, although he got $5,250 worth of powder for collecting a debt of $1,950.

Mr. STAFFORD. The report shows the powder was not taken for the use of the Government——

Mr. BOOHER. No; I desire to state——

Mr. STAFFORD (continuing). Until such time as it was safe to permit it to be vended. It was for the protection of the owner, and this powder was deposited with the Government, and the report shows, if I am not mistaken, that the owner never called upon the Government for his powder.

Mr. BOOHER. Oh, the report does not show anything of the kind. If the gentleman will read the report it will show that he called for the powder repeatedly.

Mr. MANN. He shows that he left the country and never went there afterwards.

Mr. BOOHER. The gentleman is mistaken about that.

Mr. MANN. It is in the report.

Mr. BOOHER. The gentleman says he left the country—he left the country with the Army to join Col. Price's regiment——

Mr. MANN. He left the country.

Mr. BOOHER (continuing). And served with that regiment during that war, and he also served and became a lieutenant colonel in the Federal Army in the War between the States.

He was the first Delegate in Congress from the Territory of Nebraska. He was not the kind of a man that the gentleman is trying to make out that he was.

Mr. MANN. Here is the statement and affidavit of the gentleman to the effect that two or three days thereafter deponent left Santa Fe and returned to his home in Missouri, and had never returned to Santa Fe, N. Mex., and so forth, "since which time deponent has never been notified that the property would be delivered up to him," and so forth. I think I was warranted in saying that the gentleman left the country. Of course I do not know, but I take it from his own statement.

Mr. BOOHER. That is correct. He joined——

Mr. MANN. That is in the report.

Mr. BOOHER. He joined Col. Price's regiment, went back to Santa Fe, and accompanied that regiment to California. That was his history. He came back to the country after the close of the Mexican War and his service in California, and then went to Nebraska and became the first Delegate in Congress from Nebraska.

Mr. MANN. His statement was that he left down there two or three days after the 1st of March, 1847, and went to Missouri.

Mr. BOOHER. Yes, sir.

Mr. MANN. And this powder was not taken from him until about the 1st day of January, 1847.

Mr. BOOHER. Yes.

Mr. MANN. And if between January, 1847, and March 1, 1847, he went to California and got back, it would be a hurried trip in those days, when there was no railroad transportation.

Mr. BOOHER. The gentleman has not a right to put that construction on my language.

Mr. MANN. I understood the gentleman to say that.

Mr. BOOHER. I did not say it that way. I said he went to Santa Fe and joined Price's regiment, and then went to California with that regiment for the relief of Fremont.

Mr. MANN. He went back to Missouri and did not return to Santa Fe.

Mr. BOOHER. Whether he went to New Mexico and joined it or not, I do not know, but I know his history is that he joined that regiment.

Mr. MANN. He ought to put that in his affidavit. He said he went home. Is the gentleman willing to accept an amendment to insert after the word "Giddings," in line 4, page 2, the language "and in the opinion of such Secretary the circumstances of the case render the United States liable for the full value of such powder," and then to insert after the word "Giddings," in line 7, "but not to exceed the sum of $1,950"?

Mr. BOOHER. I am willing to accept the last amendment of the gentleman, because I think that is fair. I think the value that Col. Giddings put on this powder in his affidavit was the retail price of that powder, and the gentleman knows that would not be the market value the Government would pay. The market value of the powder if they paid for it would be what the Government was paying for powder at that time, and no doubt the records of the War Department would show it. Now, if the gentleman thinks the $1,950 he paid for it is sufficient, I will not object to the amendment.

Mr. MANN. He did not pay for it. He took that in cancellation of a debt.

Mr. BOOHER. He took that in part payment. He canceled that much of it. We ought to make the statement fairly. I do not know how much they owed him, but he took that in part payment of his debt, and took it at that price. And it seems to me—and I want to be frank—that ought to be a fair value for his property, and I will agree to that amendment. I do not like to agree to the other.

Mr. MANN. Here are the circumstances of the case. There is absolutely nothing to show the Government is liable for this powder. The Government seized the powder with the direction that it should be returned to this man when he asked for it and it was suitable to give it back to him. He asked for it before he left Santa Fe, but he left Santa Fe almost within a month of the time it was seized, and they did not desire powder in the hands of private individuals there at the time. I do not know what became of the powder, and there is nothing here to indicate it.

Mr. BOOHER. The presumption is that the party who took it got the benefit of it.

Mr. MANN. The Government did not seize this powder because it wanted to use it at all. It seized it so that other people could not use it. Now, it seems to me if the Secretary investigates the case and finds the Government is liable, it may be proper to pay it, but to direct the Secretary to pay it when the Government may have a complete equitable defense would hardly seem fair.

Mr. BOOHER. Well, does the gentleman think that if they had any other defense than is set out here in the report they would have made it? There has been no time when the Government has said it was not liable for this powder, and this bill has been reported repeatedly since the Thirty-fifth Congress, in both House and Senate, time and time again.

Mr. MANN. There is nothing in the report to show that the Government ever said it was liable.

Mr. BOOHER. No; but the Government was liable for the value of that powder unless the Government shows that it returned the powder to the man that it belonged to.

Mr. MANN. I do not know what the law may be. The Government may be seizing arms out in Colorado now and impounding them, and Government officials might be saying to a man from whom they take arms that he is entitled to get them again. Is the Government liable for the value for the arms the moment it seizes them?

Mr. BOOHER. Oh, no.

Mr. MANN. I do not know whether it is or not. I do not pretend to say. But if a man will not go back and get the arms, that would make the Government liable the moment it seized them.

Mr. BOOHER. Suppose the man did demand the return of the arms and the Government refused to give them up?

Mr. MANN. The man demanded this powder within practically a month at that time, but they are not willing to let the powder go out. It might have been used against the Army. Whether he could have gotten it or not I do not know. It seems to me that that would be a very fair amendment, to let the Secretary of War determine whether the circumstances render the Government liable.

Mr. GREGG. What is the amendment, please? I did not hear it.

Mr. BOOHER. What was the first amendment which the gentleman proposed?

Mr. MANN. To insert, after the word "Giddings," in line 4, page 2, the words "and in the opinion of such Secretary the circumstances of the case render the United States liable for the value of such powder," so that in making the investigation he shall investigate the circumstances and make the findings and have the facts that make the Government liable to pay the money.

Mr. GREGG. I do not see any objection to that amendment.

Mr. BOOHER. I will agree to that amendment. Now, the other amendment—let us talk about that for a moment. I do not know whether that is a fair amendment or not. Would it not be better to put in the price of powder at that time?

Mr. MANN. There was no price of powder at that place except to private individuals. Powder may have been worth $10 a pound at Santa Fe at that time.

Mr. ELDER. I think the price of powder would be the amount it was worth at the nearest place at which it could be bought, plus the freight to Santa Fe.

Mr. MANN. No; the price that prevailed at the place where the Government seized it would be the market value.

Mr. ELDER. What I was trying to suggest was that if the powder was worth more than $1,950 the claimant is entitled to it.

Mr. MANN. Suppose at a certain place—for example, at Tampico, Mexico—eggs are a dollar apiece. What does the Government have to pay? A dollar apiece—the price in China or at Tampico?

Mr. ELDER. The price at Tampico. The Government bought no powder in Santa Fe. The only other way to arrive at it would be to find out what price was being paid for powder at Santa Fe, what the Government was paying in the closest open market, plus the freight to Santa Fe.

Mr. MANN. I think that is true. But here is a man who says the value of powder there was $1.50 a pound.

Mr. ELDER. If it is worth more than $1,950 he should not have been deprived of the price.

Mr. MANN. He ought to be paid what he paid for it.

Mr. BOOHER. He has waited 67 years for it. I am inclined to think if we do not accept the gentleman's proposition he will object to my bill, and the claimants will not get anything. I have suffered at his hands three times already on this bill, and I will now accept his proposition. [Laughter.]

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

Mr. BOOHER. Now, Mr. Speaker, will the gentleman from Illinois send up that amendment?

The SPEAKER pro tempore. The gentleman from Illinois [Mr. MANN] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 2, line 4, after the word "Giddings," insert the words "and in the opinion of such Secretary the circumstances of the case render the United States liable for the value of such powder"; and after the word "Giddings" in line 7, page 2, insert the words "but not to exceed the sum of $1,950."

The amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, and was accordingly read the third time and passed.

On motion of Mr. BOOHER, a motion to reconsider the last vote was laid on the table.

SNARE & TRIEST CO.

The next business in order on the Private Calendar was the bill (S. 1369) for the relief of the Snare & Triest Co.

The bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. MANN. I object.

FLORINE A. ALBRIGHT.

The next business in order on the Private Calendar was the bill (H. R. 6880) to carry out the findings of the Court of Claims in the case of Florine A. Albright.

The bill was read as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, directed to pay, out of any money in the Treasury not otherwise appropriated, to Florine A. Albright the sum of $14,640, in full compensation for stores and supplies taken by the United States Army during the Civil War, and reported by the Court of Claims in Senate Document No. 466, Fifty-ninth Congress, first session.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. STAFFORD. I object.

Mr. ELDER. I wish the gentleman would reserve the right to object.

Mr. STAFFORD. I have no objection to reserving the right.

Mr. ELDER. I thank the gentleman for that. I should like to make as short and succinct a statement as possible in regard to this bill.

A great many years ago, I think about 1872, a claim was filed, originally by Sterling T. Austin and later by his heirs, for some cotton, mules, and other property taken by the Government in East Carroll Parish, State of Louisiana. It was finally held by the Court of Claims that some $59,000 of cotton was taken. As a matter of fact, there was between $200,000 and $300,000 worth of cotton taken, and the court found that there was $14,640 worth of mules and other property taken.

There were two different provisions of law, one in regard to cotton and the other in regard to captured and abandoned property; and in order not to mix these two claims they finally

dropped from the amount the mules and other property taken and concentrated their efforts on the cotton; and in 1898, during a Republican Congress, in face of the findings of the Court of Claims that Sterling T. Austin had been constructively disloyal, Congress passed a bill, and the claim of $59,000 for cotton was paid. In a long debate in the House, found on page 2484 of the CONGRESSIONAL RECORD of 1898, it was made to appear that while the Court of Claims had held this man to be constructively disloyal, purely for the reason that he lived in the South, yet as a matter of actual fact he had been loyal to the Union, so far as it was possible and convenient to his health in those trying times, and that he was entitled to his money. For this reason, as I say, Congress passed a bill to pay the claim for the cotton. Now, this bill is for the remaining amount, for the mules and other property, besides the cotton. The Court of Claims has found that the Government did take this property, and as a matter of simple justice I think the Government ought to pay for it.

A little history in this particular case: While the Government has only paid $59,000 for cotton taken, it actually received, according to the proof, over 1,200 bales of cotton from this man, a two years' crop, and it actually brought between $200,000 and $300,000; but all they could establish with absolute certainty was this amount of $59,000, as well as this amount of $14,640 for other property.

This happened in the neighborhood of Vicksburg, where the fighting was very hot, and the Union officers testified that this man was a Union sympathizer, and that all that had ever been done that could be held against him, outside of living within the Confederate lines, was that two or three of his negroes out of several hundred were taken by the Confederates and used in building embankments and entrenchments, and that he did not dare resist their use.

He was later appointed postmaster in the little town of Lake Providence in the seventies, during the hot days of reconstruction. His son, under a Government rule, was appointed probate judge there. Both father and son were killed in that town on the same day as a result of the ill feeling over the southern question. While I have no sympathy with them, being a southerner, yet I think as a matter of justice these people are entitled to this money, and in my opinion they were unquestionably loyal to the Union during the war. It is a matter of doing simple justice.

The Government takes the property of these people without the right of law. The only right they had was the right of necessity, a necessity that war brings on. The Court of Claims has found that this property was taken and used by the Government. Now, why should not the Government pay them? A Republican Congress, as I said a moment ago, an overwhelming Republican Congress, in the face of this same finding held that they were not really disloyal but loyal to the Union. If necessary I would like to read to the gentleman from the CONGRESSIONAL RECORD of 1898 what some Republican leaders said in that case in regard to this particular claim.

Mr. MANN. Was that in the House?

Mr. ELDER. It was. Mr. Mahon said, "I yield 20 minutes to the gentleman, Mr. Updegraff."

Mr. MANN. Mr. Speaker, will the gentleman yield?

Mr. ELDER. Certainly.

Mr. MANN. Does not the gentleman think that this is a claim which ought to be considered and discussed in the House? It can not be done very well upon a Unanimous Consent Calendar. I think the claim will be reached some time for real consideration.

Mr. ELDER. I think it can get real consideration now. I realize that if any gentleman does not want it considered he can put it hors de combat.

Mr. MANN. I have no objection to its being considered now, but I want to say to the gentleman that I shall want to be heard on it for at least half an hour whenever it is considered.

Mr. ELDER. The gentleman understands that if this is not taken up now it will not be considered at all.

Mr. MANN. I think the gentleman is mistaken; I have had some experience in the House.

Mr. ELDER. Of course the gentleman has had much more experience than I have, but in the shape the calendar is in I do not think we will get to consider it.

Mr. MANN. This bill is on top of the calendar, and one of these days the War Claims Committee will have a day undoubtedly, and, in my opinion, this bill will be reached.

Mr. ELDER. Does not the gentleman think there is enough merit in it to be passed by the House? I know that the gentleman from Illinois wishes to do the fair thing, and this has been already passed on by a Republican House.

Mr. ROBERTS of Massachusetts. Will the gentleman yield?

Mr. ELDER. Certainly.

Mr. ROBERTS of Massachusetts. Does the gentleman from Louisiana think it is fair to other Members who have bills on the calendar, the understanding being that only those receiving unanimous consent shall be taken up, to inject his bill at this time, knowing that it will invite a long discussion and therefore shut out any possible consideration of many bills behind it that, if they could be reached, would go through without objection?

Mr. ELDER. I do not think it is unfair because any Member can shut off discussion by objecting to even an explanation. We certainly, even in cases of unanimous consent, can not expect all bills to go through without some little discussion.

Mr. ROBERTS of Massachusetts. The gentleman has already consumed 15 minutes.

Mr. ELDER. I would like to have half an hour.

Mr. STAFFORD. Mr. Speaker, when I made the original objection I had read the report and was fully acquainted with it, and recognized that it was an important claim amounting to $14,000, and involving the claim of loyalty on the part of the claimant. I thought it would expedite business to object, and I reserved the objection to accommodate the gentleman from Louisiana.

The SPEAKER pro tempore. Does the gentleman from Wisconsin object?

Mr. STAFFORD. I object.

EDWARD WILLIAM BAILEY.

The next business on the Private Calendar was the bill (H. R. 5832) for the relief of Edward William Bailey.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed, out of any money in the United States Treasury not otherwise appropriated, to pay to Edward William Bailey, of Portsmouth, Va., the sum of $1,500, for injuries resulting from the total loss of one eye and the serious impairment of the other eye, caused by a wound received by him at the hands of a target party of United States sailors and marines, while engaged at target practice at St. Helena, near Norfolk, Va., on or about November 7, A. D. 1890.

The SPEAKER pro tempore. Is there objection to the consideration of the bill?

Mr. MANN. I object.

MARGARET M'QUADE.

The next business on the Private Calendar was the bill (S. 1922) for the relief of Margaret McQuade.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to Margaret McQuade, widow of the late Edward McQuade, alias Edward Quade, out of any money in the Treasury not otherwise appropriated, the sum of $840, as compensation for the death of the said Edward McQuade, alias Edward Quade, caused by and in the performance of his duties as an employee in the Government service in the War Department.

The SPEAKER pro tempore. Is there objection?

Mr. STAFFORD. Mr. Speaker, reserving the right to object, I would like to inquire of the chairman of the committee as to the policy of compelling the Government to pay claims for injuries received by a Government employee in performing services of a private character for a Government official, as I believe this case is. I believe McQuade was at the time a driver for Secretary Dickinson. He was driving the Secretary's child and the governess for pleasure, and while he was driving the horses became riotous. He did his duty and saved the occupants of the carriage, but he himself suffered injury. Why should not Secretary Dickinson, for whose benefit he was virtually performing the service, be the person responsible for compensating his widow for the injuries?

Mr. POU. I will say to the gentleman that this man who lost his life was an employee of the Government, and was detailed by his superior officer to the position of driver for the Secretary of War. He had no control over his assignment. He could not resign, and he is as much an employee of the Government as any other of these persons for whose death we compensate.

Mr. STAFFORD. While he was an employee of the Government, yet it was a service that he was not performing for the Government, but was performing for the Cabinet officer personally.

Mr. POU. Certainly he was performing service for the Government, because the Government furnishes these Cabinet officers with drivers. The man was not master of his own actions; he was strictly in line of duty.

Mr. STAFFORD. In line of duty of his employer, Secretary Dickinson, but not performing the work of the Government.

Mr. POU. Secretary Dickinson did not employ him.

Mr. STAFFORD. Yes; but Secretary Dickinson was availing himself of his services for doing some personal work.

Mr. MANN. Mr. Speaker, will the gentleman yield?

Mr. STAFFORD. Certainly.

Mr. MANN. The Government provides Cabinet officers and the President with carriages for all purposes. The Government also provides the drivers, and it is intended that those carriages shall be used by the wives of the Cabinet officers and by the wife of the President. We provide the drivers. If we are going to pay any Government employee compensation for injuries received why should not these drivers stand in the same position as anyone else, no matter whom they are driving? We provide the carriage not merely for the use of the Cabinet officer to go from his home to his office, but for the use of his wife and his children, if he wishes to give his children the use of it. We assign the man to do the driving just like any other employee. I do not see any distinction.

Mr. STAFFORD. Then I assume the gentleman's position, carried to a logical end, would mean that if one of these chauffeurs operating automobiles for the Government, assigned by the Government for the benefit of officials, for official service, should utilize the automobile in social-function work——

Mr. MANN. But, if the gentleman will permit, we expressly forbid that these automobiles shall be used for social-function work.

Mr. STAFFORD. The gentleman will pardon me, but if in doing that social-function work the chauffeur is injured, I take it, according to the gentleman's logic, the Government is liable for the injury.

Mr. MANN. The gentleman evidently does not get the distinction. We especially provide that the vehicles owned by the Government, except those for the President and the Cabinet officers and the secretary of the President, shall not be used for social functions, but we have always provided these carriages for use socially of the wives of the members of the Cabinet or for the wife of the President. The gentleman would not contend for a minute that with several automobiles for the use of the President it was not proper for the President's wife to ride in one for social purposes?

Mr. STAFFORD. Oh, no.

Mr. MANN. But, for instance, in the case of the vehicle that is provided for the use of the Printing Office the law forbids that it shall be used for anything except official purposes. That prohibition does not extend to these Cabinet officers, and hence the distinction. These drivers are employees of the Government while performing these social functions, and they can not refuse to perform the services. They have to perform that work if they are employed at all.

Mr. STAFFORD. Mr. Speaker, I recognize that this claim is most meritorious. I assume this widow is in needy circumstances, and yet I question whether the Government should be responsible——

Mr. GREEN of Iowa. Mr. Speaker, will the gentleman yield a little further?

Mr. STAFFORD. For injuries arising out of employment which is not of a governmental character, such as the work in this instance. I yield to the gentleman from Iowa.

Mr. GREEN of Iowa. Mr. Speaker, this bill was before the House in the last Congress, and the very question which the gentleman now raises was very fully discussed at that time for, I think, three-quarters of an hour or an hour. After going very carefully over the matter, at the conclusion of the discussion every one I think concluded the man was performing a proper governmental service and the bill went through unanimously.

Mr. STAFFORD. Mr. Speaker, I recognize that I missed much during the two years that I was out of Congress, and I suppose that this was when this bill was considered last. Inasmuch as it was given favorable consideration at that time and the House unanimously believed it was a proper claim, I shall not raise objection at this time.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill? [After a pause.] The Chair hears none. The question is on the third reading of the Senate bill.

The bill was ordered to be read a third time, was read the third time, and passed.

T. J. SEMMES.

The next business in order on the Private Calendar was the bill (H. R. 11381) for the relief of the estate of T. J. Semmes, deceased.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he hereby is, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Myra E. Semmes, executrix and sole legatee of T. J. Semmes, late of New Orleans, deceased, $395.55 in full payment for rents collected by the United States during the Civil War from property owned by the said T. J. Semmes and situate at New Orleans, La.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill? [After a pause.] The Chair hears none.

The committee amendment was read, as follows:

Page 1, line 6, strike out the words "and sole legatee."

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

RICHARD C. REED.

The next business in order on the Private Calendar was the bill (S. 3997) to waive for one year the age limit for the appointment as assistant paymaster in the United States Navy in the case of Landsman for Electrician Richard C. Reed, United States Navy.

The Clerk read as follows:

Be it enacted, etc., That the age limit for appointment as an assistant paymaster in the United States Navy in the case of Landsman for Electrician Richard C. Reed, United States Navy, be, and the same is hereby, waived for one year.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. MANN. Reserving the right to object, who has charge of the bill?

Mr. WITHERSPOON rose.

Mr. MANN. May I ask the gentleman what is a "landsman for electrician"?

Mr. WITHERSPOON. I suppose I can give a correct answer to that question, as the gentleman from Illinois has already told me how to answer it.

Mr. MANN. I did not know.

Mr. WITHERSPOON. The title, as I understand it in the Navy—I never heard of it until this bill came up——

Mr. MANN. I understand this man is now in the Navy as an enlisted man holding that title?

Mr. WITHERSPOON. Yes, sir.

Mr. MANN. In the electrical department, and took an examination for appointment as paymaster, and they were slow in marking up his papers for some reason, or marking up the papers.

Mr. WITHERSPOON. His papers were passed. It seems he had to be examined to get an appointment as assistant paymaster, and his papers were examined and approved on the day before he became 26 years old. The law provided that he could not be appointed after he is 26 years old. Now, it also provided that he had to be appointed by the President and confirmed by the Senate, and it happened on this one day on which he was to get his appointment the President was out of town and the Senate not in session, so he lost it on account of no fault of his, and the committee thought that that provision of the law should be waived in his case.

Mr. STAFFORD. Will the gentleman yield?

Mr. WITHERSPOON. Yes, sir.

Mr. STAFFORD. Does not the gentleman think it is a bad practice to make a special rule for just one individual? Why not raise the age limit? Is it not class legislation of the worst sort?

Mr. WITHERSPOON. I do not think so. I do not think it is ever a bad practice to do what is right.

Mr. STAFFORD. Have not a thousand and one persons outside the service the same right to have the age limit raised?

Mr. WITHERSPOON. Yes; I think if a thousand persons should take the examination and pass it satisfactorily and it be determined that they ought to be in office, and then the authorities should delay the examination of those papers until the day before the age limit was reached and then the President and Senate should leave the city, I think that thousand should have the limit waived in their case.

Mr. STAFFORD. The gentleman is aware that the same condition may occur in different branches of the civil service where the age limit is reached and the person is no longer eligible, and yet you are favoring this person just because he is in the service to-day.

Mr. WITHERSPOON. No; I do not think another case like this will occur in a thousand years. That is my judgment about it.

The SPEAKER pro tempore. Is there objection? [After a pause.] The Chair hears none.

The bill was ordered to be read a third time, was read the third time, and passed.

EMORY SCOTT LAND.

The next business in order on the Private Calendar was the bill (H. R. 1366) for the relief of Emory Scott Land.

The bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. MANN. I object.

The SPEAKER pro tempore. The gentleman from Illinois objects, and the Clerk will report the next bill.

CAPT. HAROLD L. JACKSON, RETIRED.

The next business in order on the Private Calendar was the bill (H. R. 4492) to restore Capt. Harold L. Jackson, retired, to the active list of the Army.

The bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. MANN. Mr. Speaker, I object.

Mr. COPLEY. Mr. Speaker, I wish my colleague would reserve his objection until this matter has been presented.

Mr. MANN. I will reserve the objection for a moment.

Mr. GARRETT of Tennessee. Does the gentleman intend to object in the end?

Mr. MANN. Well, sometimes a gentleman may give such information——

Mr. GARRETT of Tennessee. Then we will end the agony now.

Mr. COPLEY. The agony is just beginning, I will say to the gentleman.

Mr. GARRETT of Tennessee. If it is the purpose of the gentleman from Illinois finally to object, I will end the agony now.

Mr. FOSTER. Maybe we can overcome the gentleman from Illinois [Mr. MANN].

Mr. COPLEY. I hope my colleague will reserve his objection.

Mr. MANN. So far as I am concerned, I am reserving it.

Mr. COPLEY. Now, Mr. Speaker, this is the situation: This matter has been presented to the Military Affairs Committee of this House three separate times, and in each instance has been unanimously reported favorably to this House. The bill has passed the House once and it has passed the Senate twice. The first time it passed the House and Senate it reached the President too late for his signature. It was not vetoed, but did not become a law. If any man will read the bill and read the committee's report, I am sure there must be some reason for his objection that I do not know, and it will give me great pleasure if my colleague will give his reasons for objecting to the bill.

Mr. MANN. I can tell the gentleman very quickly that I am opposed to any bill that restores a man in the Army and puts him back to the same rank and relative position he would have held if he had not been retired. I think it is a lot of gall for anybody to want to go back in the Army at the same place he was when he went out.

Mr. COPLEY. This man was retired involuntarily. He has again recovered his health, and he has served on active duty all but about six weeks since the time he was retired.

Mr. KAHN. Will the gentleman yield?

Mr. COPLEY. With pleasure.

Mr. KAHN. This is an unusual case. This man was examined by the medical officers of the Army, who held he was afflicted with Bright's disease. The young man thereupon was retired. The years rolled on. He protested against the decision of the Army board of survey that found he had Bright's disease, and he could get no satisfaction. If he had had Bright's disease, he would have been dead long ago. As a matter of fact, he has been examined a number of times since then, and they have always found that he did not have Bright's disease, and the committee felt that under those circumstances where the disease of the man was erroneously diagnosed by the board through no fault of his he ought not to suffer in consequence.

Mr. MANN. Here is one of those cases where if a Member of Congress had Bright's disease, or thought he had——

Mr. KAHN. He did not think so.

Mr. MANN. Or his constituents thought he had something more fatal and kept him home for two years and he wanted to get back, he would want to go back at the top. The rest of the Members of Congress never look at it in that way.

Mr. COPLEY. The fact of the matter is that this man was retired involuntarily. He wanted to go back, and his colonel told him if he went back he would be retired, and he was retired, but has been in active service ever since. He was mentioned in special orders in the Philippines. He has been doing active service, and he wants to get back, and the report of the committee itself is in these words:

The bill simply allows the officer an opportunity of appearing before an examining board, with a view of determining whether he is fit mentally and physically for active service. If he is, he may be restored to the active list. If he is not, he remains where he is.

The Committee on Military Affairs, to which this bill was referred, considers this an act of simple justice, and so reports. Now, I hope my colleague will not press his objection.

The SPEAKER pro tempore. Is there objection?

Mr. MANN. I am very sorry not to accommodate my colleague, but I am very fixed in my views on this. I object.

Mr. COPLEY. Mr. Speaker, I give notice now that the House may as well adjourn. I will object to every private bill that comes up to-night from now on.

Mr. MANN. The gentleman will never get his bill through, anyhow.

Mr. COPLEY. I do not care. I will never get it through anyhow if you can help it, and you know it.

Mr. MANN. The gentleman will not help his cause in that way, either.

Mr. COPLEY. I have no cause that I know about.

The SPEAKER pro tempore. The gentleman from Illinois [Mr. MANN] objects. The Clerk will report the next bill.

JOHN W. HYATT.

The next business in order on the Private Calendar was the bill (H. R. 4744) to authorize the appointment of John W. Hyatt to the grade of second lieutenant in the Army.

The bill was read, as follows:

Be it enacted, etc., That the President be, and he is hereby, authorized, by and with the advice and consent of the Senate, to appoint John W. Hyatt, late a second lieutenant in the Sixteenth Regiment United States Infantry, to the grade of second lieutenant in the United States Army: *Provided*, That prior to such appointment the said John W. Hyatt shall pass, in a manner satisfactory to the Secretary of War, the physical examination required of candidates for appointment as second lieutenant.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill? [After a pause.] The Chair hears none.

The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read a third time, and passed.

The SPEAKER pro tempore. The Clerk will report the next bill.

ERIK J. AANRUD.

The next business in order on the Private Calendar was the bill (H. R. 4318) to authorize the Secretary of the Interior to cause patent to issue to Erik J. Aanrud upon his homestead entry for the southeast quarter of the northeast quarter of section 15, township 159 north, range 73 west, in the Devils Lake land district, N. Dak.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to cause patent to issue to Erik J. Aanrud upon his homestead entry for the southeast quarter of the northeast quarter of section 15, township 159 north, range 73 west of the fifth principal meridian, serial No. 02727, Devils Lake land district, N. Dak., notwithstanding his two prior entries, which embraced 120 acres: *Provided*, That the present entry for 40 acres be in all other respects complete and proper.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The SPEAKER pro tempore. The Clerk will report the next bill.

THOMAS J. LEARY.

The next business in order on the Private Calendar was the bill (H. R. 3960) to correct the lineal and relative rank of First Lieut. Thomas J. Leary, Medical Corps, United States Army.

The Clerk read the bill, as follows:

Be it enacted, etc., That the President be, and he is hereby, authorized to advance First Lieut. Thomas J. Leary, Medical Corps, United States Army, to the grade of captain in the Medical Corps with rank of captain from the 5th day of August, 1912, and to cause his name to appear upon the lineal list of captains of the Medical Corps next below that of George D. Heath, of the same corps: *Provided*, That he shall successfully pass the examination for promotion from the grade of first lieutenant to the grade of captain in the Medical Corps as required by existing law: *Provided also*, That he shall receive pay as captain only from date of acceptance of his commission as such under the terms of this act.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. MANN. I object.

The SPEAKER pro tempore. The gentlaman from Illinois objects.

Mr. HOWARD. I hope the gentleman will withhold his objection.

Mr. MANN. I will withhold it.

Mr. HOWARD. This is not a restoration of this officer to the service.

Mr. MANN. It is a worse case than that.

Mr. HOWARD. No, sir. If the gentleman will permit me to explain this case, I think he will not interpose any objection.

Mr. MANN. If the gentleman wants to explain it for my benefit, he does not need to do it, because I am thoroughly familiar with the case.

Mr. HOWARD. There are some facts in this case that are not included in the report I drew and which, if known at the time, I would have incorporated.

Mr. MANN. Let me ask the gentleman a few questions.

Mr. HOWARD. Yes.

Mr. MANN. This man was in the Medical Corps in the Philippines?

Mr. HOWARD. Yes, sir.

Mr. MANN. And resigned and went out of the service, and about a month afterwards he applied for appointment in the service again, and was appointed again? He went in as a lieutenant, and now, having gotten back in, he wants to be put at a higher place than he holds now, a little lower than he would have held if he had remained in the service, and does not want to take any of the punishment that comes from leaving the service?

Mr. HOWARD. Yes; he takes the punishment of the loss of 15 files.

This gentleman is a constituent of Mr. VARE, of Pennsylvania. The circumstances are these: Lieut. Leary's father was stricken with serious illness in Pennsylvania. He received this information just four days before he left the Philippine Islands, after serving in the treatment of cholera at an isolated post in the Philippines. At the time he received this message from his relatives as to the serious illness of his father he resigned from the service. It took him 29 days to cross the Pacific Ocean and land in California. Upon his landing in California he received a communication from his relatives, which was then and there waiting for him, to the effect that the doctor had pronounced his father so much better that it would be unnecessary to come home to help take care of him, whom he thought was a helpless invalid.

He immediately telegraphed to the War Department, asking to withdraw his resignation. Surg. Gen. Torney directed him to stand another examination, and he stood that examination immediately afterwards in Washington; and in all he was out of the service less than 40 days. That is, from the day he left the Philippine Islands to the day he stood the examination for readmission to the service, he was out of the service only 40 days.

Now, I want to say this to the gentleman from Illinois: This young fellow is an exceptionally fine officer. He has lost 119 files by this resignation. Every classmate that entered with him will not only be pleased, but will be delighted if he is advanced to the rank that they now have attained. But he goes to the foot of it, and he loses 15 files in addition. He is still in the Medical Corps. If the young man loses these files, the promotion being very slow in the Medical Corps, before this young doctor, Leary, who is now 34 years old, will be a major in the Medical Corps at the present rate of promotion he will be an old man. He is now performing a large per cent of all the surgical operations that are performed in the Walter Reed Hospital in this town. I have only met him once or twice in my life.

There is not a finer young officer in the United States Medical Corps than this young man, and under the circumstances of his resignation I think his affection for his father and his willingness to give up a service to which he was devoted should receive due consideration. He was not running away from any service that might be obnoxious to him. He had spent much time in this cholera camp, diagnosing cases over there in an isolated camp where he could not even visit his wife and baby.

The circumstances of his resignation and reentry into the service make this an exceptional case; and in view of the magnificent record of this young man, who has willingly accepted his medicine, I hope the gentleman will not object to it. This bill was inspired by the late Surg. Gen. Torney. It was favorably recommended by Mr. Stimson when he was Secretary of War, and under this administration the department have heartily concurred in the recommendations of the former Secretary of War, and have said that because of the exceptionally fine record of this young man they would be delighted to see him receive the relief which this bill will give him.

Mr. VARE. Will my colleague yield?

Mr. HOWARD. Certainly; with pleasure.

Mr. VARE. Has not this young surgeon had actual charge of the Walter Reed Hospital during the last two years?

Mr. HOWARD. Yes.

Mr. VARE. Has he not been a special assistant to Maj. Rhodes?

Mr. HOWARD. In fact, when Maj. Rhodes was detailed to the White House under the former administration this young Dr. Leary, as I am informed, had absolute charge of that great hospital out there. I am frank to say that if I thought this was doing anybody an injustice I would not espouse the cause of this young man or urge the passage of this bill; but it does absolutely nobody an injustice. He goes to the foot of his class, and he is penalized 15 files by his resignation, which absolutely amounted to nothing, in view of the fact that immediately upon his arrival in Washington he sought an examination and went back into the service. I know the gentleman from Illinois is averse to bills of this character; but this young man is in the service. He resigned under a misapprehension as to the condition of his father, and immediately upon being correctly informed as to the condition of his father's health he made an application and stood the examination for reentry into the service, and has never shrunk from any duty imposed. In view of this fact, it seems to me that Congress could well strain a point and give him this relief. He goes to the foot of his class.

Mr. VARE. Will my colleague yield again?

Mr. HOWARD. With pleasure.

Mr. VARE. As I understand it, if Lieut. Leary was promoted to be a captain he would not take the place of any other captain?

Mr. HOWARD. Absolutely nobody.

Mr. VARE. He would take the last captaincy?

Mr. HOWARD. The last captaincy in his class, at the foot of the list. He has lost 15 files, and everybody below him—all of the lieutenants in the grade in which he now is—would welcome the passage of this bill.

Mr. MANN. There are some very good Army officers who have got the notion into their heads that they can get promotion by special acts. The first thing that an Army officer ought to learn is that he must suffer the consequences of any act that he performs; that personal solicitation will not remove the consequences; and an Army officer who does not learn that is not much good in the service if he gets back and is advanced. I honor the young man if he resigned on account of the health of his father, but he is the one to take the consequences, not the men who remained in the service. I am utterly opposed to advancing men in the Army by acts of Congress, which are acts of special favoritism at the best, and the case of this young man probably would never have received any consideration if he had not been living in Washington.

Mr. HOWARD. Will the gentleman permit me to interrupt him? I want to say that this young man is not seeking any influence of any congressional aid.

Mr. MANN. He is seeking the influence of all congressional aid.

Mr. HOWARD. Just as I stated awhile ago, the introduction of this bill in the last Congress—when it was favorably reported and put on the calendar, but never reached on account of the congestion of business—was inspired not by young Leary, but by the late Surg. Gen. Torney, who had a very great affection for this young man, and considered him one of the best men in the medical corps. He is a bright, willing young man, expert in his profession, and I hope the gentleman from Illinois will not object to this bill, but will let it pass. It hurts nobody.

The SPEAKER pro tempore. Is there objection?

Mr. MANN. I object.

Mr. POU. Mr. Speaker, I want to say here that we have just 50 minutes left. There is going to be opportunity later for discussion of all contested bills, and I think we ought to have the regular order from now on, in justice to gentlemen who have bills on the calendar. I demand the regular order.

STEPHEN MORRIS BARLOW.

The next business on the Private Calendar was the bill (H. R. 9536) for the relief of Stephen Morris Barlow.

The Clerk read the bill in full.

The SPEAKER pro tempore. Is there objection to the consideration of the bill?

Mr. MANN. I object.

CHARLES A. DAVIDSON.

The next business on the Private Calendar was the bill (H. R. 3041) to carry into effect the findings of the Court of Claims in the cases of Charles A. Davidson and Charles M. Campbell.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of the money in the Treasury not otherwise appropriated, the sum of $750 to Charles A. Davidson, and the sum of $750 to Charles M. Campbell, late clerks of United

States courts in Indian Territory, in pursuance of the findings of fact reported to the United States Senate by the Court of Claims in the cases of Charles A. Davidson and Charles M. Campbell *v.* The United States, No. 14046, congressional.

The SPEAKER pro tempore. Is there objection?

Mr. DAVENPORT. Mr. Speaker, I would like to read a letter which I received from the Department of Justice. It is as follows:

OFFICE OF THE ATTORNEY GENERAL,
Washington, D. C., May 5, 1914.

Hon. JAMES S. DAVENPORT,
House of Representatives.

DEAR SIR: Permit me to acknowledge your letter of May 2, inclosing a copy of House bill 3041, Sixty-third Congress, first session, and a report upon it by Mr. STEPHENS of Mississippi, from the Committee on Claims, and to say that the facts pertaining to the claims of Charles A. Davidson and Charles M. Campbell are fairly and accurately reported by the court in the findings of fact certified to Congress.

I have no further objection to urge to the payment of these claims.

Very truly, yours,

J. C. MCREYNOLDS, *Attorney General.*

The SPEAKER pro tempore. Is there objection?

There was no objection.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

W. W. BLOOD.

The next business in order on the private calendar was the bill (H. R. 1515) for the relief of W. W. Blood.

The Clerk read the bill as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury of the United States not otherwise appropriated, to W. W. Blood, of Greenville, Plumas County, Cal., the sum of $439.09, in full payment for all work and labor done and performed by him for the Government of the United States or its official representatives at the Indian school near Greenville, Indian Valley, Plumas County, Cal., during the year 1907.

The SPEAKER pro tempore. Is there objection?

Mr. STAFFORD. Reserving the right to object, I would like to get some information, besides that contained in the report, as to the reason why this man did not receive compensation from the department for the work performed. There is nothing in the report to show why he was not paid by the department.

Mr. RAKER. By reference to the report of the department for this year the gentleman will find that by the time he got around to get his pay the time limit under section 3690 of the Revised Statutes had passed and the appropriation had lapsed.

Mr. MANN. I would like to ask how he managed to get such a report out of the Assistant or Acting Assistant Secretary of the Interior where he says:

In view of the facts as developed by the investigation made, it appears Blood actually performed work and furnished material from which the Government benefited, and that he has an equitable claim.

The department has no authority to pay anything but a legal claim, and the department knows it.

Mr. RAKER. There is no question that had the money not been returned to the Treasury or lapsed the man would have received his money.

Mr. MANN. Oh, the department does not pay equitable claims.

Mr. RAKER. The Greenville Indian School is about 150 miles from where I live. I am acquainted with the school, the conditions, and the man. The man performed the work and furnished the material, and the money had been appropriated for building the school.

Mr. STAFFORD. Was the work accepted as soon as performed?

Mr. RAKER. It was, and the record so shows.

Mr. STAFFORD. I can not find anything in the report; otherwise I should not have asked the gentleman the question.

Mr. RAKER. I take it to be in the report; I think it is.

Mr. DONOVAN. Mr. Speaker, I demand the regular order. This session was to be for uncontested cases.

Mr. STAFFORD. This may be an uncontested case.

Mr. DONOVAN. But it was to be for cases where there was no objection.

The SPEAKER pro tempore. The regular order is to put the question. Is there objection?

Mr. STAFFORD. Reserving the right to object, Mr. Speaker——

Mr. DONOVAN. The gentleman must object or not.

Mr. STAFFORD. Mr. Speaker, if we can not reserve the right to object, we might as well quit right here.

Mr. DONOVAN. This was to be for cases where there was no objection.

Mr. STAFFORD. If the gentleman from Connecticut will withhold his demand for the regular order. Here is a case where the report is defective, where it does not show the reason why the claim was not paid by the officer, and the Acting Secretary of the Interior says that it is an equitable claim. The inference arises that it was not a legal claim, and therefore the department refused to pay it. The gentleman from California, who is acquainted with the facts, is giving those facts to the House, so that we can come to some decision on it.

Mr. MANN. Mr. Speaker, I agree with the gentleman from Connecticut that we ought to get through, and I object.

Mr. RAKER. Mr. Speaker, I want unanimous consent to proceed for about three minutes.

Mr. MANN. I object.

Mr. RAKER. Just a moment, gentlemen.

Mr. MANN. The gentleman will get his bill up later.

Mr. RAKER. No; I do not think there is a chance for it to come up later.

The SPEAKER pro tempore. The regular order is demanded.

Mr. RAKER. Mr. Speaker, this bill passed the House twice last year by unanimous consent.

Mr. MANN. No; I think the gentleman is mistaken. I think I objected to it once.

Mr. MOORE. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentlemen will state it.

Mr. MOORE. When a bill is objected to under the rule under which we are now proceeding, the objection does not take it off the calendar?

The SPEAKER pro tempore. No.

Mr. MOORE. It remains on the calendar, for consideration later on?

The SPEAKER pro tempore. That is correct.

Mr. RAKER. Mr. Speaker, I ask unanimous consent that I may proceed for one minute.

The SPEAKER pro tempore. Is there objection?

There was no objection.

Mr. RAKER. Mr. Speaker, I want to call the attention of the committee to the fact that this bill was reported in the last Congress, and unanimously passed the House when it came up on the calendar. It went over to the Senate, but did not pass because of the fact that there was not time. In fact, it passed the House twice. It passed the House in a general omnibus bill, and then the Senate struck it out of the bill with half a dozen others. It then came back.

Mr MANN. Mr. Speaker, if I did not object to this bill last year I fell down, because I had it marked bad.

Mr. RAKER. Mr. Speaker, I guess we might just as well quit to-night on this. I do not think there is a quorum present. There is no use of saying that a bill is bad, when the Members of this House last year passed it twice.

The SPEAKER pro tempore. The time of the gentleman from California has expired. The Clerk will report the next bill.

MOSES M. BANE.

The next business in order on the Private Calendar was the bill (H. R. 7553) for the relief of the estate of Moses M. Bane.

The Clerk read the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. MANN. I object.

Mr. RAKER. Mr. Speaker, reserving the right to object——

The SPEAKER pro tempore. The gentleman from Illinois objects, and the Clerk will report the next bill.

ELIZABETH MUHLEMAN.

The next business in order on the Private Calendar was the bill (H. R. 12191) for the relief of Elizabeth Muhleman, widow, and the heirs at law of Samuel A. Muhleman, deceased.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is hereby authorized and directed to pay to Elizabeth Muhleman, widow, and the heirs at law of Samuel A. Muhleman, deceased, out of any money in the Treasury not otherwise appropriated, the sum of $1,000, in full compensation for the death of said Samuel A. Muhleman on February 14, 1898, caused by injury received on the 9th day of June, 1893, while employed as a clerk in the Record and Pension Office, War Department, while located in Ford's Theater at the time of its collapse.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. RAKER. Mr. Speaker, reserving the right to object, I would like to have the gentleman explain the bill.

Mr. STAFFORD. Mr. Speaker, will the gentleman yield?

Mr. RAKER. Yes.

Mr. STAFFORD. Has the gentleman read the report in this case?

Mr. RAKER. Mr. Speaker, like the gentleman, I go over all of these matters.

Mr. STAFFORD. I am certain if he has read the report in this case he will not ask for any further information, because it is a very clear case.

Mr. RAKER. Who has charge of the bill?

Mr. POU. Mr. Speaker, I will say that it was reported by the gentleman from Mississippi [Mr. STEPHENS].

Mr. MANN. Mr. Speaker, I demand the regular order.

The SPEAKER pro tempore. Is there objection? [After a pause.] The Chair hears none. The Clerk will report the committee amendment.

The Clerk read as follows:

Page 1, lines 4 and 5, strike out the words "and the heirs at law."

The SPEAKER pro tempore. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill for the relief of Elizabeth Muhleman, widow of Samuel A. Muhleman, deceased."

THOMAS B. M'CLINTIC.

The next business on the Private Calendar was the bill (S. 661) for the relief of the widow of Thomas B. McClintic, deceased.

The Clerk read the bill, as follows:

Whereas Thomas B. McClintic, late passed assistant surgeon and a commissioned officer in the United States Public Health and Marine-Hospital Service, contracted the Rocky Mountain spotted fever while performing his duty as assistant surgeon in the special work of investigating the causes of Rocky Mountain spotted fever in the State of Montana, and in which special work he had been exclusively engaged for the best part of two years last past, and in which he was engaged when he contracted the disease of Rocky Mountain spotted fever, of which he died in Georgetown University Hospital in the city of Washington on the 13th day of August, 1912: Therefore

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the widow of Thomas B. McClintic, deceased, the sum of $5,760, being the amount of salary and allowances for two years.

The SPEAKER pro tempore. Is there objection?

Mr. STAFFORD. Mr. Speaker, I reserve the right to object.

Mr. FLOOD of Virginia. Mr. Speaker, I desire at the proper time to offer two amendments, and I would like to state what they are now. In line 3, on page 2, I desire to move to strike out the figures "$5,760" and insert "$2,880," and in line 4, page 2, I desire to strike out "two years" and insert "one year."

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

Mr. FLOOD of Virginia. Mr. Speaker, I offer the amendments to which I have just referred.

The SPEAKER pro tempore. The Clerk will report the amendments.

The Clerk read as follows:

Page 2, line 3, strike out "$5,760" and insert in lieu thereof "$2,880."

Page 2, line 4, strike out the word "two" and insert the word "one."

The SPEAKER pro tempore. The question is on agreeing to the committee amendments.

The amendments were agreed to.

The bill as amended was ordered to be read a third time, was read the third time, and passed.

SAMUEL HENSON.

The next business in order on the Private Calendar was the bill (S. 1171) for the relief of Samuel Henson.

The Clerk read the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. MANN. Mr. Speaker, I object.

HYACINTHE VILLENEUVE.

The next business in order on the Private Calendar was the bill (H. R. 6260) for the relief of Hyacinthe Villeneuve.

The Clerk read the bill, as follows:

Be it enacted, etc., That upon the filing in the Department of the Interior of a proper reconveyance to the United States, previously recorded in the county wherein the land lies, of the southeast quarter of the northwest quarter of section 15, township 162 north, range 57 west, fifth principal meridian, in the Devils Lake (N. Dak.) land district, accompanied by a duly certified abstract showing title in the United States, free of liens and encumbrances, the party or parties making such reconveyance shall be entitled to select, in lieu of said tract, 40 acres of vacant, surveyed, nonmineral, and unoccupied public lands.

SEC. 2. That upon the acceptance by the Secretary of the Interior of such reconveyance of the land above described, the patent issued therefor to the Santa Fe Pacific Railroad Co. shall be canceled and the homestead entry made for said land on December 5, 1908, by Hyacinthe Villeneuve passed to patent.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill? [After a pause.] The Chair hears none, and the Clerk will report the committee amendments.

The Clerk read as follows:

Page 2, line 1, insert the word "unreserved."

Page 2, line 2, after the word "lands," insert "*Provided*, That the selection made under such exchange be made within two years after the approval of this act.

The SPEAKER pro tempore. The question is on agreeing to the committee amendments.

The committee amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

JOSEPH HODGES.

The next business in order on the Private Calendar was the bill (S. 540) for the relief of Joseph Hodges.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Interior is hereby authorized to issue a patent to Joseph Hodges for the following-described lands: The southwest quarter of the northeast quarter and the south half of the northwest quarter of section 29; the south half of the northeast quarter and the southeast quarter of the northwest quarter of section 30; the west half of the southeast quarter and the west half of the northeast quarter of section 15; the southwest quarter of the southeast quarter of section 10, all in township 13 north, range 5 east of Salt Lake meridian, upon the transfer by the said Joseph Hodges to the United States of the northeast quarter of the southeast quarter of section 3; the southwest quarter of the southwest quarter of section 26; the southwest quarter of the southwest quarter of section 27; the south half of section 16, all in township 14 north, range 4 east of Salt Lake meridian, situate in the Cache National Forest: *Provided*, That upon the reconveyance of the surrendered lands they will become a part of the Cache National Forest.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. STAFFORD. Mr. Speaker, reserving the right to object, I notice there is no information whatsoever contained in the printed sheet called a report on this case. The House is entirely without any information as to——

Mr. MANN. There is a supplemental report.

Mr. HOWELL. There is a very full report. This bill simply provides an exchange of land in the national forest for lands outside. It has met the approval of the Department of Agriculture and the Secretary of the Interior.

Mr. GRAHAM of Illinois. I will say to the gentleman from Wisconsin that the committee gave it very careful attention, inquired a couple of times of the department in reference to it, and I believe it is entirely meritorious.

Mr. STAFFORD. Will the gentleman inform the House as to the practice of this committee in submitting a report consisting of four lines which does not contain any information at all?

Mr. GRAHAM of Illinois. Mr. Johnson was assigned to make the report, and I presume he inadvertently made that report and afterwards made a fuller report. He made the report, I presume, in order to get it on the calendar, and then made a fuller report as soon as he had time to do so. The second report is very complete.

Mr. STAFFORD. On the statement of the gentleman that this matter has been given full consideration, and having had handed me the complete report known as the supplemental report, I withdraw the objection.

The SPEAKER pro tempore. Is there objection? [After a pause.] The Chair hears none.

The bill was ordered to be read a third time, was read the third time, and passed.

REBECCA C. PEPPER.

The next business in order on the Private Calendar was the bill (S. 2563) for the relief of Rebecca C. Pepper.

The bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. MANN. Mr. Speaker, I object.

Mr. GRAHAM of Illinois. Will my colleague reserve the right to object?

Mr. MANN. Not at this time in the evening.

Mr. GRAHAM of Illinois. It is really very meritorious.

Mr. MANN. I went over the report, and I do not think so.

Mr. GRAHAM of Illinois. I would be glad to state to the gentleman——

Mr. MANN. If I had time, I would be glad to hear the gentleman, but not at this time.

The SPEAKER pro tempore. Does the gentleman object?

Mr. MANN. I object.

GEORGE W. CARY.

The next business in order on the Private Calendar was the bill (H. R. 1517) for the relief of George W. Cary.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Interior is authorized to investigate the status of section 14, township 38 north, range 8 east, Mount Diablo meridian, within the State of California, to determine whether said lands were settled upon by George W. Cary prior to the issuance of an allotment to Annie Roseberry, Indian; and if the said

Secretary of the Interior does so determine that the said lands were settled upon, he is hereby authorized and empowered to cancel the trust patent issued to the said Annie Roseberry and to award said Annie Roseberry another allotment equally satisfactory upon any vacant public lands he may determine, and to allow George W. Cary the right to make a homestead entry upon said lands upon which he has settled within three months of the date of the passage of this act.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill? [After a pause.] The Chair hears none. The Clerk will report the committee amendments.

The Clerk read as follows:

Page 1, line 4, after the word "of," insert the words "the southeast quarter of southwest quarter and west half of southeast quarter section 11, and the northwest quarter of northeast quarter of."

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

Page 2, line 3, strike out the words "equally satisfactory" and insert "not exceeding 160 acres."

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

Page 2, line 7, after the word "passage," insert the words "and approval."

The question was taken, and the amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

JAMES HARVEY DENNIS.

The next business in order on the Private Calendar was the bill (H. R. 11040) to carry out the findings of the Court of Claims in the case of James Harvey Dennis.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to L. Helen Dennis, administratrix of the estate of James Harvey Dennis, deceased, the sum of $26,538, in accordance with the findings of the Court of Claims reported in Senate Document No. 619, Sixty-second Congress, second session, said sum to be accepted and receipted for in full of said claim against the Government. *Provided*, That the said L. Helen Dennis shall file in the Treasury Department a certificate showing her appointment as administratrix of said estate and a certified copy of her bond, which bond must be at least equal in amount to the sum hereby appropriated: *And provided further*, That if said L. Helen Dennis be dead or no longer holding said office, payment shall be made to her successor upon his or her complying with the same requirements as herein provided with respect to the said L. Helen Dennis, administratrix.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. MANN. Mr. Speaker, reserving the right to object, I would like to ask one question of the gentleman from Kentucky, who introduced the bill and in the last Congress reported the bill, whether the committee had before it the findings of the Court of Claims made, I think, in 1890, or some time along there? I have been trying to get hold of those findings for a long time and never have been able to get them; and while they are referred to in the report, in a way, I would like to know whether the committee had those findings?

Mr. CANTRILL. We quote from the findings of the Court of Claims.

Mr. MANN. Oh, no; I beg the gentleman's pardon. There is a statement here as to what the Court of Claims found.

Mr. CANTRILL. As to what the Court of Claims found; yes.

Mr. MANN. And a letter from one of the judges of the Court of Claims, written 12 or 15 years after the Court of Claims had made its report, as to what it had found, and apparently there were some very long and complicated findings.

Mr. CANTRILL. I will state to the gentleman from Illinois, if he will permit me, from my own personal knowledge, I know that Maj. Dennis lost on this contract over $200,000.

Mr. MANN. That does not interest me at all, even if he lost $2,000,000. We do not want to pay him anything that we do not owe him.

Mr. CANTRILL. The Court of Claims, in going through all the claims, reported this one of $6,500. The claim has been favorably reported by the Senate six different times and it has passed the Senate six different times. It has eight favorable reports of the House of Representatives behind it, and it has passed the House twice. At the last session of Congress it passed the House and passed the Senate, but in separate bills. There have been fourteen favorable reports by Congress on this bill.

Mr. MANN. I know that; but that does not count for anything at all. I am not disposed to object to the consideration of the claim, although it seems remarkable and strange that this committee could have never presented to either body of Congress the facts on which the claims were founded—the finding of the Court of Claims. I do not know whether the committee ever had them. If so, nobody has ever put it in any of the reports.

Mr. CANTRILL. But the judge of the court and the clerk of the court reported the finding of the Court of Claims——

Mr. MANN. The opinion of the judge that was written some 14 years after he had made a finding, as to what his finding was, is not worth the snap of your finger.

The SPEAKER pro tempore. Is there objection? [After a pause.] The Chair hears none. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read a third time, and passed.

ELLIS P. GARTON, ADMINISTRATOR.

The next business in order on the Private Calendar was the bill (H. R. 9092) for the relief of Ellis P. Garton, administrator of the estate of H. B. Garton, deceased.

The bill was read in full.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. MANN. I object.

The SPEAKER pro tempore. The gentleman from Illinois objects, and the Clerk will report the next bill.

REFUND OF DUTIES ON WILD-CELERY SEED.

The next business in order on the Private Calendar was the bill (H. R. 1781) providing for the refund of certain duties incorrectly collected on wild-celery seed.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to William A. Avis, of New York, N. Y., the sum of $434.30, being the amount incorrectly collected on 4,343 pounds of wild-celery seed imported at the port of New York on November 3, 1909, entry No. 273,740.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill? [After a pause.] The Chair hears none.

The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

QUITCLAIM TO LAND, HAMPDEN COUNTY, MASS.

The next business in order on the Private Calendar was the bill (H. R. 3334) authorizing the quitclaiming of the interest of the United States in certain land situated in Hampden County, Mass.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of War is hereby authorized and directed, by quitclaim deed for and on behalf of the United States, to convey to John D. McKnight and William H. McKnight, or their heirs and assigns forever, all right, title, and interest it may have in and to all of that plat or parcel of ground described as containing 40 rods of land together with a right of way "situated in Springfield in Hatch's pasture, so called, near Garden Brook," Hampden County, Mass., and acquired by the United States through the deed of Solomon Hatch, dated September 14, 1825, recorded September 15, 1825, in book 75, at page 186 of the records of Hampden County.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill? [After a pause.] The Chair hears none.

The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

L. V. THOMAS.

The next business in order on the Private Calendar was the bill (H. R. 10172) for the relief of L. V. Thomas.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to L. V. Thomas the sum of $2,000, out of any money not otherwise appropriated, for personal injuries received while working on the Panama Canal in the employ of the Panama Canal Commission as a carpenter.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill? [After a pause.] The Chair hears none. The Clerk will report the amendment.

The Clerk read as follows:

Page 1, line 5, strike out "$2,000" and insert "$1,680."

The SPEAKER pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read a third time, and passed.

JAMES STANTON.

The next business in order on the Private Calendar was the bill (H. R. 3428) for the relief of James Stanton.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to James Stanton, of Leaven-

worth, Kans., out of any money in the Treasury not otherwise appropriated, the sum of $1,912.40, the same being for extra work performed by said James Stanton on a contract with the War Department, dated June 8, 1908, for grading, paving, curbing, and rock hauling on Grant Avenue, Fort Leavenworth, Kans.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill? [After a pause.] The Chair hears none. The Clerk will report the amendment.

The Clerk read as follows:

Page 1, line 10, after the word "Kansas," insert the following: "*Provided*, That no part of the said sum shall be paid to the said James Stanton unless he has carried out a certain agreement, under a contract dated August 27, 1907, namely, that he would keep the said road in satisfactory condition for a period of five years from the completion of the work under the last-named contract and that, in case of his refusal or failure to fulfill said agreement, any amounts which may have been expended by the United States for keeping this road in a satisfactory condition during the five-year period shall be deducted from the said sum of $1,912.40, and shall be available to reimburse the War Department for such necessary expenditures as same are made: *And provided further*, That the Government does not relinquish any of the rights secured to it under the guaranty bond of the said James Stanton, in the Massachusetts Bonding & Insurance Co., dated January 4, 1910, should the said sum of $1,912.40 prove insufficient for defraying the cost of the work necessary to place and keep the road in such satisfactory condition during the said five-year period."

Mr. MANN. Mr. Speaker, the spelling of the word "five" in line 18 should be corrected by the Clerk.

The SPEAKER pro tempore. Is that part of the amendment?

Mr. MANN. That is in the amendment.

The SPEAKER pro tempore. By unanimous consent the correction will be made. Is there objection?

There was no objection.

The SPEAKER pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The SPEAKER pro tempore. The Clerk will report the next bill.

ORMOND M. LISSAK.

The next business in order on the Private Calendar was the bill (H. R. 1133) for the relief of Lieut. Col. Ormond M. Lissak.

The bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. MANN. I object.

The SPEAKER pro tempore. The gentleman from Illinois [Mr. MANN] objects. The Clerk will report the next bill.

RELIEF OF CERTAIN FIRE INSURANCE COMPANIES.

The next business in order on the Private Calendar was the bill (H. R. 4480) to reimburse certain fire insurance companies the amounts paid by them for property destroyed by fire in suppressing the bubonic plague in the Territory of Hawaii in the years 1899 and 1900.

The bill was read.

Mr. MANN. Let that bill go over.

The SPEAKER pro tempore. The gentleman from Illinois [Mr. MANN] objects. The Clerk will report the next bill.

HENRY LA ROQUE.

The next business in order on the Private Calendar was the bill (H. R. 14229) for the relief of Henry La Roque.

The Clerk read the bill, as follows:

Be it enacted, etc., That Henry La Roque, an Indian of the White Earth Indian Reservation in the State of Minnesota, be, and he is hereby, permitted to appeal within 90 days after the passage of this act from the decree entered in the United States Circuit Court of Appeals for the Eighth Circuit on the 8th day of July, 1912, in a suit wherein the United States is the appellant and Henry La Roque the appellee to the Supreme Court of the United States, giving such notice or notices and taking such proceedings as are required by law and practice in such cases to effect such appeal. To enable such appeal to be taken and perfected the time therefor and for all notices and proceedings provided in the law or practice to be given or taken is hereby extended until the expiration of the period of 90 days from and after the passage of this act.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The SPEAKER pro tempore. The Clerk will report the next bill.

JAMES EASSON.

The next business in order on the Private Calendar was the bill (H. R. 900) for the relief of James Easson.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to James Easson, of Racine, Racine County, Wis., the sum of $300, being the sum unlawfully collected from him by the board of enrollment, namely, $300, to furnish a substitute when drafted for service in the Army, he not being a citizen of the United States at the time.

With a committee amendment.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the committee amendment.

The Clerk read as follows:

Page 1, line 5, after the word "Wisconsin," insert the words "out of any money in the Treasury not otherwise appropriated."

The SPEAKER pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The SPEAKER pro tempore. The Clerk will report the next bill.

RELIEF OF LEGAL REPRESENTATIVE OF GEORGE E. PAYNE, DECEASED.

The next business in order on the Private Calendar was the bill (H. R. 9851) for the relief of the legal representative of George E. Payne, deceased.

The Clerk read the bill, as follows:

Be it enacted, etc., That the claim of the legal representative of George E. Payne, deceased, of New Orleans, La., for personal property taken by United States officers, and for the crop of sugar sold by the sequestration commissioners, and the net proceeds transferred by them to the Quartermaster's Department, and used for the public good and for the use and occupancy of the plantation of said deceased, taken by United States Army officers, and turned over to the United States Treasury agent, and by said agent leased to William Spear for the year 1864, and for the use and occupancy of the Freedman's Bureau for the year 1865, be, and the same is hereby, referred to the Court of Claims of the United States for adjudication, at the fair and reasonable rental and the value of the property taken and used as aforesaid, on the evidence heretofore presented and such other evidence as may be adduced, any statute of limitation to the contrary notwithstanding: *Provided, however*, That it be shown to the satisfaction of the court that said George E. Payne did not give any aid or comfort to the late Civil War, but was throughout the war loyal to the Government of the United States.

With a committee amendment.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the committee amendment.

The Clerk read as follows:

Page 2, line 1, strike out the word "of" and insert the word "by."

The SPEAKER pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The SPEAKER pro tempore. The Clerk will report the next bill.

DAVID C. M'GEE.

The next business in order on the Private Calendar was the bill (H. R. 2705) for the relief of David C. McGee.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to David C. McGee, late of Company I, Fiftieth Regiment Illinois Volunteer Infantry, out of any money in the Treasury not otherwise appropriated, the sum of $165, in full of his claim for balance due him as bounty by reason of reenlistment in the United States Army during the War of the Rebellion.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

MRS. H. G. LAMAR.

The next business in order on the Private Calendar was the bill (H. R. 14197) for the relief of the legal representatives of Mrs. H. G. Lamar.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, directed and required to pay, out of any moneys in the Treasury of the United States not otherwise appropriated, to the legal

representatives of Mrs. H. G. Lamar, late of Macon, Ga., now deceased, the sum of $226.66, the same being for the rent of one building from October 27, 1865, to November 30, 1865, located in Macon, Ga., and occupied as quarters for the commanding officer and staff of the United States Army of the district of Columbus, Department of Georgia, under a contract of lease made with said Mrs. H. G. Lamar by Capt. W. A. Rankin, assistant quartermaster, and dated October 27, 1865.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. MANN. Reserving the right to object, I should like to ask the gentleman from Nebraska [Mr. LOBECK], who made the report, whether it is the policy of that committee to get any report from the War Department on these bills?

Mr. BARTLETT. I can state to the gentleman——

Mr. MANN. No; I should like to hear from a gentleman on the committee whether it is the policy of the committee to refer these bills to the War Department?

Mr. LOBECK. We did not refer this bill, and I understand it is not the policy of the committee to do so.

Mr. MANN. Where a claim is made against the War Department for use and occupancy, is it the policy of the committee to ask any questions of the War Department?

Mr. LOBECK. I will refer that question to the chairman of the committee.

Mr. GREGG. It has not been the policy of the committee to refer them unless there was some complicated state of facts.

Mr. MANN. I am not speaking of this particular case, although I think it ought to have been referred.

Mr. GREGG. It is not the policy of the committee to refer them unless a case involves a complicated state of facts.

Mr. MANN. I suppose the committee assumes that all that the claimants say is true, and that it is not necessary to ask the War Department anything about it.

Mr. GREGG. We do not assume that, where the facts are complicated and the War Department has the facts.

Mr. MANN. You never know whether the War Department has the facts or not unless you ask them. You do not know what the records of the War Department will disclose.

Mr. BARTLETT. This was never presented through the War Department.

Mr. GREGG. We had the original papers in this case.

Mr. MANN. That does not affect the question. You do not know what records the War Department may have.

Mr. BARTLETT. I will state to the gentleman that these claims were never presented to the War Department. This old lady took them and put them in a trunk, and they were not found until a long time afterwards.

Mr. MANN. But the War Department ought to have a record of having given the papers. Does not the gentleman admit that?

Mr. BARTLETT. I think so. I think it would be well for the committee to ask for the information which the department has in these cases.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The bill was ordered to be engrossed and read a third time, and was accordingly read the third time and passed.

SAMUEL M. FITCH.

The next business in order on the Private Calendar was the bill (H. R. 10122) to credit Samuel M. Fitch, collector of internal revenue, first district of Illinois, on the books of the Treasury Department with the sum of $1,500 for cigar stamps lost or stolen in transit.

The Clerk read the title of the bill.

Mr. COPLEY. Mr. Speaker, I make the point of order that there is no quorum present.

Mr. STAFFORD. Is not this a bill introduced by the gentleman from Illinois [Mr. MANN]?

Mr. COPLEY. I think so; yes.

Mr. STAFFORD. Does not the gentleman know that that is so?

Mr. COPLEY. I know that that is so; yes.

Mr. RAKER. I hope the gentleman will withdraw the point of order and let us pass that bill.

Mr. MANN. Was it my friend from Aurora who objected?

Mr. COPLEY. I did not object to anything. I made the point that there is no quorum present. That is not an objection.

Mr. RAKER. I hope the gentleman will do as I did. I looked around and found that there was a quorum present, and then did not want to make the point.

Mr. FOSTER. Let us be generous.

Mr. COPLEY. Mr. Speaker, yielding to the solicitation of men who have suffered to-night, I withdraw the point of no quorum.

The SPEAKER pro tempore. The point is withdrawn. The Clerk will report the bill.

The bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. FOWLER. Mr. Speaker, I object.

LILLIAN J. HARTLEY—LEAVE TO WITHDRAW PAPERS.

By unanimous consent, at the request of Mr. HART, leave was granted to withdraw from the files, without leaving copies, the papers in the case of H. R. 17803, Sixty-first Congress, second session, granting a pension to Lillian J. Hartley, there being no adverse report thereon.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted—

To Mr. STEPHENS of Mississippi, for 10 days, on account of sickness of his mother.

To Mr. SHERLEY, indefinitely, on account of sickness.

ADJOURNMENT.

Mr. POU. Mr. Speaker, the hour of 11 o'clock has arrived, and I therefore move that the House do now adjourn.

The motion was agreed to; accordingly (at 11 o'clock p. m.) the House adjourned until Wednesday, May 6, 1914, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of the Treasury, transmitting copy of a communication from the Secretary of War submitting an estimate authorizing and directing the accounting officers of the Treasury to credit the sum of $862.50 in the accounts of First Lieut. A. Moreno, special disbursing officer, United States Army (H. Doc. No. 961); to the Committee on Claims and ordered to be printed.

2. A letter from the Secretary of the Treasury, transmitting an additional estimate of appropriation for repairs to revenue cutters for the fiscal year ending June 30, 1914, in the sum of $6,444.50 (H. Doc. No. 962); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. FLOOD of Virginia, from the Committee on Foreign Affairs, to which was referred the bill (H. R. 11179) authorizing the Secretary of State to extend invitation to foreign countries to send delegates to the Fourth International Congress on Home Education, reported the same without amendment, accompanied by a report (No. 620), which said bill and report were referred to the House Calendar.

Mr. J. M. C. SMITH, from the Committee on Public Buildings and Grounds, to which was referred the bill (H. R. 7298) to increase the limit of cost of the public building at Smyrna, Del., reported the same with amendment, accompanied by a report (No. 622), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. JOHNSON of Utah, from the Committee on the Public Lands, to which was referred the bill (S. 1087) authorizing the exchange of certain lands within the Fishlake National Forest, Utah, reported the same without amendment, accompanied by a report (No. 623), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. SHERWOOD, from the Committee on Invalid Pensions, to which was referred the bill (S. 4168) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors, reported the same with amendment, accompanied by a report (No. 616), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (S. 4352) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors, reported

the same with amendment, accompanied by a report (No. 617), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (S. 4552) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and to certain widows and dependent relatives of such soldiers and sailors, reported the same with amendment, accompanied by a report (No. 618), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (H. R. 16294) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors, reported the same without amendment, accompanied by a report (No. 619), which said bill and report were referred to the Private Calendar.

Mr. McKELLAR, from the Committee on Military Affairs, to which was referred the bill (H. R. 10719) to remove the charge of desertion from the military record of Joseph P. Leiter, reported the same with amendment, accompanied by a report (No. 621), which said bill and report were referred to the Private Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. EDWARDS: A bill (H. R. 16295) appropriating $1,000,000 for the use of the United States Public Health Service in encouraging rural sanitation, with special reference to the prevention and suppression of malaria and typhoid fever; to the Committee on Appropriations.

By Mr. RAKER: A bill (H. R. 16296) to provide for issuing of patents for public lands claimed under the homestead laws by deserted wives; to the Committee on the Public Lands.

By Mr. SUTHERLAND: A bill (H. R. 16297) providing for the survey of the Monongahela and Cheat Rivers in West Virginia and Pennsylvania, the Tygarts Valley River, the West Fork River, the Little Kanawha River, and the Kanawha River, and their tributaries, in West Virginia; to the Committee on Rivers and Harbors.

By Mr. HEFLIN: A bill (H. R. 16298) to incorporate the Mothers' Day Association; to the Committee on the Judiciary.

By Mr. DOOLITTLE: A bill (H. R. 16299) to amend section 24, chapter 2, of the Judicial Code of the United States; to the Committee on the Judiciary.

By Mr. HINDS: A bill (H. R. 16300) providing for the establishment of a lobster-rearing station at some suitable point on the Atlantic coast; to the Committee on the Merchant Marine and Fisheries.

By Mr. RUCKER: Resolution (H. Res. 503) providing for the consideration of S. 2860; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. SHERWOOD: A bill (H. R. 16294) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war; to the Committee of the Whole House.

By Mr. ANTHONY: A bill (H. R. 16301) granting an increase of pension to Jesse J. Spencer; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16302) granting a pension to Kate Morgan; to the Committee on Invalid Pensions.

By Mr. BELL of Georgia: A bill (H. R. 16303) granting a pension to William J. Hayes; to the Committee on Pensions.

Also, a bill (H. R. 16304) granting an increase of pension to Celia P. Edmondson; to the Committee on Pensions.

By Mr. BURNETT: A bill (H. R. 16305) to reimburse Henry Weaver, postmaster at Delmar, Ala., for money and stamps stolen from said post office at Delmar and repaid by him to the Post Office Department; to the Committee on Claims.

By Mr. COX: A bill (H. R. 16306) granting a pension to Sarah A. Hammond; to the Committee on Invalid Pensions.

By Mr. DICKINSON: A bill (H. R. 16307) granting an increase of pension to Thomas J. Crosby; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16308) for the relief of George W. Colbert; to the Committee on Military Affairs.

By Mr. HENSLEY: A bill (H. R. 16309) granting an increase of pension to Jacob M. Lincoln; to the Committee on Invalid Pensions.

By Mr. KINKEAD of New Jersey: A bill (H. R. 16310) granting an increase of pension to Nelson Ransier; to the Committee on Invalid Pensions.

By Mr. MERRITT: A bill (H. R. 16311) granting an increase of pension to Jennie E. Nelson; to the Committee on Invalid Pensions.

By Mr. POST: A bill (H. R. 16312) granting an increase of pension to V. B. Littleton; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16313) granting an increase of pension to David R. Riley; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16314) granting an increase of pension to Junius F. Whiting; to the Committee on Invalid Pensions.

By Mr. REED: A bill (H. R. 16315) granting an increase of pension to Michael F. Conway; to the Committee on Invalid Pensions.

By Mr. RUSSELL: A bill (H. R. 16316) granting a pension to Eliza J. Glover; to the Committee on Invalid Pensions.

By Mr. SCULLY: A bill (H. R. 16317) granting an increase of pension to Hannah Johnson; to the Committee on Invalid Pensions.

By Mr. SELDOMRIDGE: A bill (H. R. 16318) granting a pension to Helen E. Kilburn; to the Committee on Invalid Pensions.

By Mr. SWITZER: A bill (H. R. 16319) granting a pension to Clara Murray; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16320) for the relief of Samuel Reigle; to the Committee on War Claims.

By Mr. BYRNS of Tennessee: A bill (H. R. 16321) granting an increase of pension to Margaret A. Bennett; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Memorial of George H. Harris, of Sybertville, Pa., providing for the pension of the relatives of the soldiers and sailors killed at Vera Cruz, Mexico; to the Committee on Pensions.

Also (by request), memorial of sundry citizens of Hoboken, N. J., protesting against the war between the United States and Mexico; to the Committee on Foreign Affairs.

By Mr. ANTHONY: Petition of M. T. Williams and other citizens of Valley Falls, Kans., favoring rural credits legislation; to the Committee on Banking and Currency.

Also, petition of H. Truefitt and other citizens of Centralia, Kans., favoring certain pending pension legislation; to the Committee on Invalid Pensions.

Also, petition of 231 citizens of McLouth, Kans., favoring national prohibition; to the Committee on the Judiciary.

By Mr. BAILEY (by request): Petitions of J. D. Roberts, J. L. Evans, T. D. Williams, David Jones, John O. Jones, Rees John, C. G. Williams, Emanuel Jones, N. Griffiths, E. L. Roberts, John E. Reese, A. C. Roberts, C. C. Harris, Gethue Davies, Berry Thomas, C. D. Evans, Philip Evans, Simon Johnson, John Thomas, Thomas Casker, William Davies, William H. Thomas, G. H. Price, D. H. Abrams, H. R. Harris, D. T. Davies, Bert Gibbons, John Andrews, Griffith Powell, R. T. Ellis, Samuel Steele, W. S. Williams, Joseph Thomas, D. E. Webber, T. J. Edwards, Thomas Edwards, John A. Thomas, William O. West, Joe Edwards, Henry Will, Thomas Edwards, Norman Price, George Thomas, John P. Jones, William Ramstedt, F. B. Ferner, George Legg, and W. H. Jones, all of Johnstown, Pa., for passage of House joint resolution 168, relative to national prohibition; to the Committee on the Judiciary.

SENATE.

WEDNESDAY, *May 6, 1914.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, we come to Thee day by day because whatever of merit there is in us must come from Thee. Our very conscious life, with its feeling of dependence, rests upon our sense of the absolute and the infinite. Thou art and Thou art a rewarder of them that diligently seek Thee. We pray that Thou wilt enable us to do Thy will, that we may know the doctrine that it is of God, and that our lives may be brought even at this moment into a more blessed accord with Thy will. For Christ's sake. Amen.

The Journal of yesterday's proceedings was read and approved.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed the bill (S. 661) for the relief of the widow of Thomas B. McClintic, deceased, with amendments in which it requested the concurrence of the Senate.

The message also announced that the House had passed the following bills:

S. 540. An act for the relief of Joseph Hodges;

S. 1808. An act for the relief of Joseph L. Donovan;

H. R. 12191. An act for the relief of Elizabeth Muhleman, widow of Samuel A. Muhleman, deceased;

H. R. 13240. An act for the relief of the legal representatives of James S. Clark, deceased;

H. R. 14197. An act for the relief of the legal representatives of Mrs. H. G. Lamar; and

H. R. 14229. An act for the relief of Henry La Roque.

ENROLLED BILL SIGNED.

The message also announced that the Speaker of the House had signed the enrolled bill (H. R. 5993) authorizing the city of Montrose, Colo., to purchase certain public lands for public park purposes, and it was thereupon signed by the Vice President.

PETITIONS AND MEMORIALS.

The VICE PRESIDENT presented a petition of the Board of Trade of Hilo, Hawaii, praying for an appropriation for the construction of a breakwater at Nawiliwili Harbor, Island of Kauai, Territory of Hawaii, which was referred to the Committee on Commerce.

He also presented petitions of sundry citizens of Indianapolis, Attica, and West Lebanon, in the State of Indiana; of Gardiner and Biddeford, in the State of Maine; of Detroit and Benzonia, in the State of Michigan; of Upland and Glendale, in the State of California; of McKees Rocks, Pa.; of Chicago, Ill.; of Carthage, N. Y.; of Glen Alpine, N. C.; of Fort Hill, Idaho; and of Mansfield, La., praying for the adoption of an amendment to the Constitution to prohibit polygamy, which were referred to the Committee on the Judiciary.

Mr. GALLINGER presented petitions of the congregations of the Congregational Church of North Weare; the Congregational Church of Langdon; the Protestant Churches of Keene and the First Congregational Church of Keene; of the Christian Endeavor Society and the Sunday School of the Congregational Church of West Concord; and of the Christian Endeavor Society of Merrimack County, all in the State of New Hampshire, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented memorials of Fred D. Crawford and 18 other citizens of Lancaster, Woodville, and Benton; of 82 citizens of Derry, 248 citizens of Dover, 46 citizens of Keene, and 15 citizens of Greenland, all in the State of New Hampshire, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented a memorial of Typographical Local Union No. 152, of Manchester, N. H., remonstrating against the proposed increase in postage rates on second-class mail matter, which was referred to the Committee on Post Offices and Post Roads.

He also presented the petition of Mrs. Charles E. Tenney, of West Lebanon, N. H., praying for the adoption of an amendment to the Constitution granting the right of suffrage to women, which was ordered to lie on the table.

He also presented a petition of the Central Labor Union of Lebanon, N. H., praying for the enactment of legislation to increase the wages of compositors and bookbinders in the Government Printing Office, which was referred to the Committee on Printing.

He also presented the petition of J. A. Tufts, of Exeter, N. H., praying for the enactment of legislation creating a division on kindergarten education in the Bureau of Education, which was referred to the Committee on Appropriations.

He also presented a memorial of the American Association of Landscape Architects, of Rochester, N. Y., remonstrating against the abandonment of the half-and-half plan for the payment of the expenses of the District of Columbia, which was referred to the Committee on the District of Columbia.

Mr. BURLEIGH presented a petition of sundry citizens of Wytopitlock, Me., and a petition of the congregation of the Methodist Episcopal Church of West Scarboro, Me., praying for national prohibition, which were referred to the Committee on the Judiciary.

Mr. WORKS presented petitions of the Ministerial Union of Salinas, and of the congregations of the First Presbyterian Church, the First Christian Church, and the First Methodist Church, of the Young Men's Christian Association, and the Church Federation, all of Watsonville, in the State of California, praying for national prohibition, which were referred to the Committee on the Judiciary.

Mr. DILLINGHAM presented a petition of the congregation of the Methodist Church of Barnard, Vt., and a petition of sundry citizens of Plainfield, Vt., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. SHIVELY presented petitions of the congregations of the Methodist Episcopal Church of Mooresville and the Home Presbyterian Church, of Indianapolis, and of the Woman's Home and Foreign Missionary Society of Preston Church, of Greencastle, all in the State of Indiana, praying for the adoption of an amendment to the Constitution to prohibit polygamy, which were referred to the Committee on the Judiciary.

He also presented petitions of the congregations of the Grace Lutheran Church, of Elkhart, and the First Presbyterian Church of Elkhart, and of the First Baptist Sunday School of Elkhart, all in the State of Indiana, praying for the enactment of legislation providing for Federal censorship of motion pictures, which were referred to the Committee on Education and Labor.

He also presented a memorial of the Manufacturing Association of Evansville, Ind., remonstrating against any further extension of the Parcel Post System, which was referred to the Committee on Post Offices and Post Roads.

He also presented a petition of Washington Camp, No. 33, Patriotic Order Sons of America, of Indianapolis, Ind., praying for the enactment of legislation to further restrict immigration, which was ordered to lie on the table.

He also presented a petition of the Federation of Labor of Fort Wayne, Ind., praying for the enactment of legislation to grant pensions to certain civil-service employees, which was referred to the Committee on Civil Service and Retrenchment.

Mr. BRANDEGEE presented a petition of the Woman's Christian Temperance Union of Croton, Conn., praying for national prohibition; which was referred to the Committee on the Judiciary.

He also presented a petition of Camp Kirkland, No. 18, United Spanish War Veterans, of Winsted, Conn., praying for the enactment of legislation granting pensions to widows and orphans of soldiers and sailors of the Spanish-American War, which was referred to the Committee on Pensions.

Mr. PAGE presented a petition of the congregation of the Advent Christian Church, of Vernon, Vt., praying for national prohibition, which was referred to the Committee on the Judiciary.

Mr. DU PONT presented a petition of sundry citizens of Wyoming, Del., praying for national prohibition, which was referred to the Committee on the Judiciary.

Mr. JOHNSON presented petitions of sundry citizens of Livermore Falls, Me., praying for national prohibition, which were referred to the Committee on the Judiciary.

Mr. NORRIS presented a petition of the Nebraska Conference of the Evangelical Lutheran Augustana Synod of America, praying for national prohibition, which was referred to the Committee on the Judiciary.

Mr. POINDEXTER presented a petition of Local Branch Congregations Association of Eastern Washington and Northern Idaho, of Odessa, Wash., praying for national prohibition, which was referred to the Committee on the Judiciary.

He also presented a memorial of the Central Labor Council of Tacoma, Wash., remonstrating against the conditions existing in the mining districts of Colorado, which was referred to the Committee on Education and Labor.

DONATION OF CANNON.

Mr. CHAMBERLAIN, from the Committee on Military Affairs, submitted a report (No. 484) accompanied by a bill (S. 5495) authorizing the Secretary of War to make certain donations of condemned cannon and cannon balls, which was read twice by its title.

He also, from the same committee, to which were referred the following bills, reported adversely thereon, and the bills were postponed indefinitely:

A bill (S. 5437) authorizing the Secretary of War to donate to the town of West Warwick, R. I., condemned cannon and balls;

A bill (S. 5380) authorizing the Secretary of War to deliver to the city of Pittsburg, Okla., one condemned bronze or brass cannon;

A bill (S. 5377) authorizing the Secretary of War to donate to the town of Nottingham, N. H., condemned cannon and balls;

A bill (S. 5105) authorizing the Secretary of War to donate to the H. G. Libby Post, No. 118, Grand Army of the Republic, in the town of Newport, State of Maine, one bronze or brass cannon or fieldpiece, with its carriage and cannon balls;

A bill (S. 5156) donating a brass or bronze cannon to the incorporated town of Alden, Iowa;

A bill (S. 5257) authorizing the Secretary of War to donate to the General Hazen Post, No. 258, Grand Army of the Republic, Lincoln, Kans., one bronze cannon and sufficient shells to make two pyramids;

A bill (S. 4668) authorizing the Secretary of War to deliver to the village of Ellsworth, Wis., two condemned bronze or brass cannon;

A bill (S. 4669) authorizing the Secretary of War to deliver to the town of Eagle River, Wis., two condemned bronze or brass cannon;

A bill (S. 5006) authorizing the Secretary of War to donate to the Grand Army of the Republic Post at Chariton, Iowa, two brass or bronze cannon or fieldpieces, with their carriages and a suitable outfit of cannon balls;

A bill (S. 5059) authorizing the Secretary of War to donate one cannon to the town of New Preston, Conn.;

A bill (S. 4285) authorizing the Secretary of War to donate to the hall of Topeka Post, No. 71, Grand Army of the Republic, for use in its plat in the Mount Auburn Cemetery, in Topeka, Kans., four cannon or fieldpieces;

A bill (S. 4286) authorizing the Secretary of War to donate to the O. M. Mitchell Post, No. 69, Grand Army of the Republic, Osborne, Kans., two cannon or fieldpieces;

A bill (S. 4287) authorizing the Secretary of War to donate to the city of Concordia, Kans., two cannon or fieldpieces;

A bill (S. 4388) authorizing the Secretary of War to donate to the Masonic homes property at Elizabethtown, Pa., four brass or bronze cannon or fieldpieces, with their carriages, and a suitable outfit of cannon balls;

A bill (S. 4544) authorizing the Secretary of War to donate to Custer Post, No. 25, Grand Army of the Republic, at Cherokee, Iowa, two brass or bronze cannon or fieldpieces, with their carriages, and a suitable outfit of cannon balls;

A bill (S. 4645) authorizing the Secretary of War to donate to Post 305, Grand Army of the Republic, Towanda, Kans., one cannon or fieldpiece;

A bill (S. 4403) authorizing the Secretary of War to donate to the city of Stafford, Kans., one cannon;

A bill (S. 4429) authorizing the Secretary of War, in his discretion, to deliver to the Fort Totten Indian School, at Fort Totten, in the State of North Dakota, one condemned cannon, with its carriage, and outfit of cannon balls;

A bill (S. 4438) authorizing the Secretary of War to donate to Wadsworth Post, No. 7, Grand Army of the Republic, of Council Grove, Kans., two cannon or fieldpieces; and

A bill (S. 4510) authorizing the Secretary of War, in his discretion, to deliver to the city of Hope, in the State of North Dakota, one condemned cannon, with its carriage, and outfit of cannon balls.

FISH-CULTURAL STATIONS ON COLUMBIA RIVER.

Mr. JONES, from the Committee on Fisheries, to which was referred the bill (S. 4854) to authorize the establishment of fish-cultural stations on the Columbia River or its tributaries in the State of Oregon, reported it with amendments and submitted a report (No. 485) thereon.

BRIDGE ACROSS BAYOU MACON, LA.

Mr. SHEPPARD. From the Committee on Commerce, I report back favorably, without amendment, the bill (S. 5291) to authorize Edmund Richardson or the parishes of East Carroll and West Carroll, La., or both, to construct a bridge across Bayou Macon at or near Epps Ferry, La., and I submit a report (No. 483) thereon. I ask for the immediate consideration of the bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PUBLIC BUILDING AT PENSACOLA, FLA.

Mr. KERN. From the Committee on Public Buildings and Grounds, I report back favorably, without amendment, the bill (H. R. 12291) to increase the limit of cost for the extension, remodeling, and improvement of the Pensacola, Fla., post office and courthouse, and for other purposes.

Mr. BRYAN. I ask unanimous consent for the present consideration of the bill.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That the act entitled "An act to increase the limit of cost of certain public buildings, to authorize the enlargement, extension, remodeling, or improvement of certain public buildings, to authorize the erection and completion of public buildings, to authorize the purchase of sites for public buildings, and for other purposes," approved June 25, 1910, be, and the same is hereby, amended, so as to increase the limit of cost for the extension, remodeling, and improvement of the Pensacola, Fla., post office and courthouse in the sum of $30,000, or so much thereof as may be necessary to complete said extension, remodeling, and improvement.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. OLIVER:

A bill (S. 5489) making appropriation for payment of certain claims in accordance with findings of the Court of Claims, reported under the provisions of the acts approved March 3, 1883, and March 3, 1887, and commonly known as the Bowman and the Tucker Acts; to the Committee on Claims.

By Mr. JAMES:

A bill (S. 5490) granting a pension to Marvel J. Nash (with accompanying papers); to the Committee on Pensions.

By Mr. TOWNSEND:

A bill (S. 5491) for the relief of the legal representatives of Capt. Harrison S. Weeks and Alexander McCook Guard; to the Committee on Claims.

By Mr. OVERMAN:

A bill (S. 5492) authorizing the Secretary of War to donate two condemned bronze or brass cannon or fieldpieces and a suitable outfit of cannon balls to the city of Lenoir, N. C.; to the Committee on Military Affairs.

By Mr. JONES:

A bill (S. 5493) granting an increase of pension to Francis M. Stults; to the Committee on Pensions.

By Mr. JOHNSON:

A bill (S. 5494) for the relief of the legal representatives of Henry Prince, and others; to the Committee on Claims.

By Mr. OLIVER:

A bill (S. 5496) authorizing a credit in certain accounts in the office of the Auditor for the War Department (with accompanying paper); to the Committee on Claims.

By Mr. NORRIS:

A bill (S. 5497) authorizing the issuance of patent to Arthur J. Floyd for section 31, township 22 north, range 22 west of the sixth principal meridian, in the State of Nebraska; to the Committee on Public Lands.

By Mr. CRAWFORD:

A bill (S. 5498) to secure cooperation between the Interstate Commerce Commission and the State railway boards and commissions of the several States in correlating, changing, and establishing intrastate rates, charges, and fares which indirectly affect interstate commerce in the transportation of passengers and property by public carriers, and providing for procedure relative thereto; to the Committee on Interstate Commerce.

By Mr. RANSDELL:

A bill (S. 5499) making appropriation for the construction of a roadway and walks leading to and around the Chalmette Monument, Chalmette, La.; to the Committee on Military Affairs.

By Mr. O'GORMAN:

A bill (S. 5500) for the relief of the legal representatives of Joseph H. McArthur, and others; to the Committee on Claims.

By Mr. CHAMBERLAIN:

A joint resolution (S. J. Res. 145) authorizing the President to detail Lieut. Frederick Mears to service in connection with proposed Alaskan railroad; to the Committee on Military Affairs.

AMENDMENTS TO RIVER AND HARBOR APPROPRIATION BILL.

Mr. JONES submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

Mr. SHIVELY submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

EMPLOYMENT OF STENOGRAPHER.

Mr. O'GORMAN submitted the following resolution (S. Res. 350), which was read and referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the provisions of the resolution of April 6, 1914, authorizing the Committee on Interoceanic Canals to employ temporarily a stenographer be extended for 30 days from the adoption of this resolution.

AFFAIRS IN MEXICO.

Mr. SHEPPARD. I have here a brief statement from the Dallas Morning News of May 3, 1914, by my colleague [Mr. CULBERSON], on the Mexican situation, which I should like to have printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

[From the Dallas Morning News, Sunday, May 3, 1914.]

Yesterday Senator CULBERSON gave out an interview in support of President Wilson's Mexican policy, as follows:

"Every class of our citizenship throughout the country, and especially every Democrat, should uphold the President in his policy with Mexico. Necessarily the President has information on the subject not in possession of the general public, and which can not in the nature of things be made public, at least for the present, which influences, if not controls, his action. Under such conditions the people should rely upon his judgment and discretion to do what is just and wise for the United States. He is by the Constitution clothed with authority to deal with foreign nations, and the character of President Wilson particularly is such that this power may be safely placed in him and in his administration.

"POLICY IS WISE.

"Besides this, the policy which he is pursuing in the matter is, I think, the wise one, and reflects the best sentiment of the American people. In its breadth and essentials this policy seeks to avoid war with Mexico by all means consistent with our domestic and foreign interests and the national honor. To the great mass of thinking Americans war is a fearful thing and should be the very last resort. War with Mexico, while not the most serious one we could engage in, would be calamitous enough. It would mean, primarily, the loss of many of our brave men in battle and bring sorrow to many homes. It would necessitate the raising of an army of from 250,000 to 500,000 men, the expenditure of hundreds of millions of dollars out of the Public Treasury, an increase in Federal taxation, with a possible bond issue, an indefinite increase of the pension list, and, after a long and distressing guerrilla warfare, which would reflect no added glory upon American arms, it would offer a dangerous temptation to annex territory which we do not need and a population which we can not assimilate or absorb. Above all this even, perhaps it would dishonor us as a Christian nation for engaging in a useless and preventable conflict with a comparatively helpless people.

"PRESIDENT'S PLAN.

"These, as they present themselves to me, are the fundamental principles which govern President Wilson in his course with Mexico. To carry them out, his plan has been to give the Mexican people an opportunity to settle their contentions among themselves, to refuse to intervene, which would mean war, in the contest, and to decline recognition of the government of Huerta. Obviously it is the wise course to allow the Mexicans to adjust these differences themselves if they can do so without encroachments upon our rights or where cruelties are not so widespread and revolting as to raise a question of broad humanity. This is the American doctrine of local self-government and national autonomy.

"So far the situation has not justified the United States in interposing in the contest, because no invasion of their rights has occurred which can not be adjusted short of war, and the cruelties practiced have been sporadic rather than general, not reaching the stage, as in Cuba in 1898, where a whole people were threatened and involved. The latest incident, at Tampico, where seamen of the United States were arrested, while it was the culmination of indignities offered to the United States, was manifestly an act which was adjustable short of war, and which, when satisfactory reparation was not made on demand, the President was warranted in redressing by reprisals and seizure of ports.

"The principal complaint in some quarters, however, is that the President should have recognized Huerta, and it is claimed that if he had done so the rebellion would long ago have been suppressed. Whether such action would have followed recognition of Huerta, in view of subsequent events, is extremely doubtful. It is true the President would have had precedents had he recognized Huerta as the head of the de facto Government of Mexico, but the United States established precedents in government for themselves, and for one I am proud that we had a President who in this instance went directly to the root of things and declared the wholesome and godly doctrine that treachery and assassination would find no refuge here."

PRESIDENTIAL APPROVALS.

A message from the President of the United States, by Mr. Latta, executive clerk, announced that the President had, on May 2, 1914, approved and signed the following acts:

S. 656. An act granting to the trustees of the diocese of Montana of the Protestant Episcopal Church, for the benefit of "Christ Church on-the-Hill," at Poplar, Mont., lots 5, 6, and 7, in block 30, town site of Poplar, State of Montana; and

S. 3403. An act to abolish the office of receiver of public moneys at Springfield, Mo., and for other purposes.

CHESAPEAKE & DELAWARE CANAL.

Mr. SAULSBURY. Mr. President, I desire to give notice that on Friday next, the 8th instant, after the remarks of the Senator from West Virginia [Mr. GOFF], I shall address the Senate briefly relative to the Chesapeake & Delaware Canal.

AFFAIRS IN MEXICO.

The VICE PRESIDENT. The Chair lays before the Senate a resolution coming over from a previous day, which will be stated.

The SECRETARY. Senate resolution 349, by Mr. LIPPITT.

The VICE PRESIDENT. The resolution has been read.

Mr. LIPPITT. Mr. President, I have presented this resolution to the Senate and I should like to have immediate consideration of it. I have done so because the suspicion that our Government is aiding or abetting or conniving at or even condoning the atrocities of the villainous Villa is so sickening a suggestion to me that I have been loath to believe that it can possibly be true. But the circumstances that are continually coming to our attention, the expressions of opinion and belief on the part of people close to the administration have been so frequent that it is being forced upon me that the purpose of the Mexican policy of the administration is to do some such thing as has been expressed in the article which accompanies my resolution.

The policy the President intended to pursue toward Mexico was very plainly set forth by him in the message he submitted to Congress. In his message of August 27, after calling attention to the friendship this country had and ought to have for the Mexican people and our desire to aid and assist them in every possible way, he goes on to say what our duty is under those circumstances.

It is now our duty—

He says—

to show what true neutrality will do to enable the people of Mexico to set their affairs in order again and wait for a further opportunity to offer our friendly counsels.

Later on in the same message he says:

I deem it my duty to exercise the authority conferred upon me by the law of March 14, 1914, to see to it that neither side to the struggle now going on in Mexico receive any assistance from this side the border.

Further on:

We can not in the circumstances be the partisans of either party to the contest that now distracts Mexico or constitute ourselves the virtual umpire between them.

He also says:

We should let everyone who assumes to exercise authority in any part of Mexico know in the most unequivocal way that we shall vigilantly watch the fortunes of those Americans who can not get away, and shall hold those responsible for their sufferings and losses to a definite reckoning.

Then he says:

That can be and will be made plain beyond the possibility of a misunderstanding.

That message was read on the 27th of August, and in it the President says that a definite reckoning can be had. Up to date, however, no attempt has been made to get any recompense for the people who have been suffering by the loss of their property and the death of their relatives in the struggle in northern Mexico. No later than two weeks ago Monday, April 20, in the message which the President read to the two Houses of Congress, after reiterating his great desire to be the friend of Mexico and to help them he again asserts the duty of impartiality. He says:

The people of Mexico are entitled to settle their own domestic affairs in their own way, and we sincerely desire to respect their right.

Nevertheless he says in another part of the same message that—

If armed conflict should unhappily come as a result of his attitude—

Referring to Huerta—

of his attitude of personal resentment toward this Government, we should be fighting only Gen. Huerta and those who adhere to him and give him their support.

Mr. President, when I consider those statements of the purpose of this administration and of our Government toward the distracted people of Mexico, and when I see the acts that are being performed from day to day in connection with those circumstances in Mexico, I confess that I find my mind in a maze. The contradiction between what is done and what is said ought to be done is so great that I almost feel that I am going hand in hand with Alice among the tipsy-topsy conditions of Wonderland.

The facts are that in the one part of Mexico, a very large part of Mexico, there has been peace and order, so far as I know, during the entire year now passed. In another part of Mexico there has been a perfect carnival of crime and carnage, such a carnival as in modern times we can not find a parallel to, a carnival whose confetti has been flying bullets and whose cheers have been changed into the cries of dying men and women; and those flying bullets, Mr. President, have been American bullets fired from American guns that we have sent across the American border and put into the hands of Mr. Villa and his associates with the consent and the approval and the encouragement of the President of the United States.

It is impossible for me to see how we are observing the strict duties of neutrality when we take action such as this.

Mr. NORRIS. Mr. President——

The VICE PRESIDENT. Does the Senator from Rhode Island yield to the Senator from Nebraska?

Mr. LIPPITT. Yes; Mr. President.

Mr. NORRIS. I wished to ask the Senator if he thought it was good practice for the Senate to call on the President——

Mr. LIPPITT. Mr. President, I am going to say only a few words more, and I will answer the question of the Senator in those few words.

Mr. NORRIS. I have not yet finished asking it.

Mr. LIPPITT. Very well; I will listen to the Senator's further question.

Mr. NORRIS. I wanted to ask the Senator whether he thought it was proper for the Senate to pass a resolution which in effect asks the President of the United States to answer an item appearing in a newspaper, regardless of what the conditions may be anywhere?

Mr. LIPPITT. I supposed that was the question the Senator was going to ask. When I interrupted him, I thought he had finished his question. I will answer it in just a minute or two.

I was saying, Mr. President, when I was interrupted, that the conditions which seemed to exist in Mexico were such and the acts that we have taken in connection with them were such as made our professions of neutrality seem very insincere.

I had just referred to the effect of American arms going over our border and coming into the hands of the insurrectionists.

Two weeks ago, in connection with the incident in Tampico, brought about by the overzealous action of a subordinate of the Mexican Government, Congress was asked to pass in the utmost haste an act of approval of the course of the President; and we were told that the reason why such haste was necessary was because the Government wished to seize the customhouse at Vera Cruz for the purpose of preventing the landing at that port of the cargo of a German ship then about due, consisting of a large consignment of arms and ammunition destined for Gen. Huerta and that part of the Mexican people whom he represented.

Even while the Senate was deliberating upon what course we thought should be pursued in the matter, the President was so anxious to prevent the landing of this cargo that he took upon himself the responsibility of acting without waiting to hear the result of our deliberations. Even while this matter was being discussed here in the Senate on Tuesday night a fortnight ago we received the news of the landing of our sailors and marines at Vera Cruz, of a battle, if it may be dignified by that term, that occurred, of the death of some of our own people, and of the death of some 200 innocent Mexican people, civilians largely, who had had no connection with any offensive action toward our Government. In short, Mr. President, we find in these two actions an apparently definite purpose to aid and assist the people who are responsible for the atrocities in the north of Mexico and to discourage and impede those who have maintained law and order in and around that part of Mexico which adjoins the City of Mexico.

Mr. President, I am bringing this matter up for this purpose: The Senator from Nebraska [Mr. NORRIS] has asked me why I dignify a newspaper report by asking the President to reply to it. I am dignifying that newspaper report because it represents and voices rumors and things that are more direct than rumors which are current all through the city of Washington, indicating that the President of the United States and his advisers are in every way in sympathy with the progress of Gen. Villa's army and are hoping for its success. If that is the policy of the administration, it seems to me that we should have it plainly set before this body.

Mr. President, we are liable at almost any minute to be called upon to act upon what may be the most important question that will ever come before any of the men who now sit in this body, a question of declaring war against the Mexican people or against some part of the Mexican people, a war whose termination it is not in the power of any man to foresee. At any moment some unfortunate incident may occur that will so inflame the minds of our own people or of the Mexican people, or perhaps of some other nation whose affairs are being inextricably mixed up with the Mexican situation, that we can not deliberate upon our course with calmness and in the manner that such a question should be approached. In the message which the President delivered here two weeks ago he said:

> I do not wish to act in a matter possibly of so grave consequence except in close conference and cooperation with both the Senate and House.

Mr. President, the time for conference is to-day, while we can consider these questions without the pressure of warlike excitement; and it seems to me it is the duty of this administration, which to a peculiar degree is pledged to frankness and to candor, which is pledged to candor to a degree that no other administration that ever occupied the White House has been pledged—I say it is the duty of that administration to speak to this body, to the American people, and to the people of the whole world in such a way that there shall be no misunderstanding and no secrecy about the position which we occupy on this very grave subject.

I am aware that I am but a single Member of this body, but as a Member of this body I want to do my duty in regard to this very momentous question in the very best way I can; and with that desire and duty prominent in my mind, I say now that there is no way in which it can be properly exercised unless complete information is laid before this body as to what has occurred in the relations of this Government with Gen. Villa and Mr. Carranza and the people whom they represent, of what negotiations have occurred between them, of what instructions were given to William Bayard Hale when he went as the envoy of the President to confer with them, of what correspondence is going on now, and a presentation of this whole matter in such a way that we shall know exactly on what premises we are acting, and therefore shall be able to decide with wisdom what our course should be.

I trust the resolution will have favorable consideration.

Mr. STONE. Mr. President, the Senator from Nebraska [Mr. NORRIS] asked a pertinent question, whether the Senator from Rhode Island [Mr. LIPPITT] thought it proper for the Senate to call upon the President to make formal answer to newspaper items, whether in the form of news, so called, or in the form of editorials. Of course it is not a proper thing for the Senate to do, and, Mr. President, I had supposed that every Senator knew that; I had supposed that even the Senator from Rhode Island knew that much. The Senator presented this clipping from a Washington paper, known to be intensely hostile to the President, that he might make it the basis of what he supposes to be an attack upon the administration.

Mr. President, I care nothing especially about Villa. I think it true that many things he is reputed to have done deserve condemnation. The Senator from Rhode Island denounces Villa and those with whom he is associated. I do not defend them, neither do I approve of the defense the Senator from Rhode Island seems disposed to make of Huerta, who is not only guilty of treason, but whose hands are red with the blood of his chieftain who trusted him.

The Senator speaks of the occurrence, the unfortunate occurrence, at Vera Cruz. He seems to think that this Government is not justified in the course taken there, although Congress in advance—at least the House in advance—gave to the President its consent and approval to take such action as might be necessary to vindicate the honor of our flag; and the whole Congress has approved of what he did, except, possibly, the Senator from Rhode Island, who now speaks in disparagement of what was done.

Mr. LIPPITT. Mr. President, will the Senator yield?

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from Rhode Island?

Mr. STONE. Yes.

Mr. LIPPITT. Mr. President, I simply want to say that I think there was nothing in my remarks that expressed either approval or disapproval of what was done there in regard to the incident of the boat crew of American sailors. I simply called attention, or meant to call attention, if I expressed myself as I intended, to the fact that extraordinary haste was demanded for the purpose of preventing a supply of ammunition being received by one of the contestants in the Mexican situation.

Mr. STONE. I know what the Senator said.

Mr. LIPPITT. I do not want what I said to be twisted into something that I had not at all in my mind to discuss, and I think I did not discuss.

Mr. STONE. The Senator did criticize; if he did not mean to criticize, I confess my inability to understand him. He did criticize what was done at Vera Cruz, and lamented, as all of us do, the loss of American lives in the conflict there. Then he proceeded to charge against the administration the guilt of taking the lives of some 200 innocent Mexicans. The "snipers," who were firing at our boys from cover night and day, in violation of all the known rules of civilized warfare, making themselves liable to court-martial if captured, the Senator from Rhode Island seems to regard as "innocent Mexicans" for whom our hearts should pour out a flood of sympathy.

Mr. President, the Senator says that we were overhasty in taking possession of the customhouse at Vera Cruz because a German vessel was approaching laden with arms and munitions of war for Huerta's army. There is no doubt that the fact that that vessel was due at that port hastened the action taken by the administration. For myself I stand here to approve what the President did. We were then in an acute controversy with the Huerta government, for reasons well understood; we had made a peremptory demand upon Huerta, which had been insolently refused, and the President was taking the only means at his command to enforce the ultimatum or to punish Huerta and his following for what they had done.

The Senator from Rhode Island criticizes and blames the President for what he did. The Senator thinks that the administration should have sat quiet and remained inactive and per-

mitted rapid-firing guns and field cannon and rifles and millions of rounds of ammunition to be delivered into the hands of Huerta's men to be used against our flag and our soldiery when they were about to land and take possession of Vera Cruz. The Senator would seem to be in deep sympathy with the Mexicans because of this deprivation. I am sorry to find a Senator on this floor in that state of mind and heart.

Mr. LIPPITT. Mr. President, while the Senator from Missouri is growing indignant over the situation of a cargo of arms arriving at Vera Cruz, will he also tell us whether he approves of the permission that has been in force for several months by which American arms have been put into the hands of all the rebels in northern Mexico, which will just as distinctly and inevitably be turned against this Government as any other arms that are in Mexico? Let us have a little consistency here.

Mr. STONE. Oh, Mr. President, the Senator can defend Huerta if he wishes to do so; he can put his senatorial arm about him and hold him up as one deserving of praise if he wishes to do so. I am not defending either Huerta or Carranza.

The Senator wishes to know about the order of the President raising the embargo on the exportation of arms across our southern border. Mr. President, the Senator seems to forget, if he ever knew it, or knowing, seems to ignore, the fact that until we took possession of Vera Cruz arms and munitions of war manufactured in the United States were just as accessible to Huerta and his forces as to Carranza and his forces after the embargo was raised. As for that, the doors had always been open to Huerta; they had never been closed against him until now.

The Senator says we should not have lifted the embargo and let American arms and munitions go across the Rio Grande into the hands of the constitutionalist forces; that those guns are now turned upon Americans; that the bullets with which these people in northern Mexico are slaying Americans are American bullets. Mr. President, as a matter of fact, I have not known that any of the arms allowed to be imported into northern Mexico from the United States have been used against American troops or citizens. When and where has anything of that kind been done? If the Senator had confined himself to a possible situation—that is, if he had said that these arms might in future be used against us in case of war between this country and the Carranza-Villa forces—he would have been nearer correct. So far, however, the people who received these arms crossing the Rio Grande have made no demonstration of hostility against the United States, but up to this time have maintained a strict neutrality in our conflict with the Huerta government.

The Senator, however, is so possessed of partisan bias and spleen that he could not let pass an opportunity to incorporate in the RECORD an attack upon the President of the United States, and to make that attack the basis of observations that are out of place here at this time. Mr. President, it is absolutely silly to think of calling upon the President of the United States to answer such newspaper articles as that the Senator has recited in his resolution. Why, if that is permissible, if that sort of thing is allowed, then Senators who feel like the Senator from Rhode Island can every day clip from the newspapers things of a similar kind and call upon the President to say whether in fact they are true; in other words, they can have the President of the United States constantly before the Senate answering newspaper attacks upon him, perhaps anonymous attacks, or maybe attacks made under the authority of the management of the papers themselves. Such a procedure would be not only absurd, it would be absolutely silly.

I move to lay the resolution on the table.

Mr. CLARK of Wyoming. Mr. President, will the Senator allow me just a moment before making that motion?

Mr. STONE. Yes.

Mr. CLARK of Wyoming. I wish to ask the Senator a question.

Of course we are all intensely interested in the situation in Mexico—all of us, from the President to the humblest citizen of the Republic, the President perhaps not more so than some others. This resolution perhaps is subject, perhaps not, to the criticisms showered upon it by the Senator from Missouri, the chairman of the Committee on Foreign Relations. While the resolution calls attention to the newspaper clipping, the purpose of the resolution is, if possible, and if not incompatible with the public interest, to get some idea of the position which the President and his administration assume in regard to the forces and the conditions in northern Mexico.

It is rumored, as the Senator knows—and we can get nothing except from the newspapers or rumors, because neither the President nor his administration nor the Foreign Relations Committee nor its chairman have taken the country into their confidence as to the conditions that exist there, and the relations that may or may not exist between this administration and the Villa forces—there is a well-defined notion, which I fear is growing by reason of not being contradicted or by reason of not being openly discussed, that there is some sort of an arrangement whereby the Government of the United States in some way is bound up in the fortunes of the constitutionalists of Mexico.

What I wish to ask the Senator before the motion is made is whether the Senator is in a position where he can give us any information as to what situation we are in with regard to the Carranza forces? We know, of course, how we stand in regard to Huerta and his forces. Is there any information that a long-suffering and patient Senate can have at this time from the information which the Senator himself perhaps possesses as to the situation of this country with regard to the Carranza forces?

Mr. STONE. Mr. President, it grieves my heart to know that my friend from Wyoming is oppressed with the thought that there is a growing fear among the people that the administration is doing something wrong and indefensible.

Mr. CLARK of Wyoming. Mr. President——

Mr. STONE. I think I can reassure the Senator, and perhaps relieve to some extent his apprehension——

Mr. CLARK of Wyoming. If the Senator can do so, I shall be glad to have him.

Mr. STONE. By expressing a very emphatic opinion that the American people are not disturbed, not uneasy, not apprehensive that the President of the United States is going to commit, much less that he has committed, any act to the discredit of this Government.

Mr. CLARK of Wyoming. The very definite assurance of the Senator in relation to that matter is very satisfactory. [Laughter.]

Mr. STONE. I thought I could satisfy the Senator. [Laughter.]

Mr. President, one word as to the question, What are the relations between the United States and Mexico? I had supposed everybody knew that, especially that an American so astute, studious, and well informed as the Senator from Wyoming knew it. If he does not know it, however, I will give him further assurance in order to quiet his dread apprehensions.

We are in possession of Vera Cruz. We have landed there a force of soldiers and marines, and we are holding that city. Our quarrel is with Huerta and Huerta's forces, because of what they had done. We have taken possession of Vera Cruz as an incident to or as a result of our conflict with the Huerta government. We have no alliance or war with Carranza. Carranza and his forces are at war with Huerta, not with us. If they care to prosecute that war without taking any step hostile to this Government and our people, I do not believe it is the desire or intention of the administration, or of this Congress, or, with few exceptions, of the people of the United States to force a war with the Carranza and Villa forces. If they continue in their present course, I confess I can see no reason for opening hostilities with them; and I do not think any hostile movement on our part will be made against them so long as they attend to their own affairs and go on along the lines they are now following and have declared it to be their purpose to pursue.

Another thing which perhaps the Senator is not aware of is that the representatives of three Latin-American countries, the three principal ones, are now engaged, with the consent of this Government and Gen. Huerta, in an effort to bring about an adjustment of all the troubles in the Republic of Mexico, with the hope that an orderly Government may be established there and peace preserved.

I renew my motion.

The VICE PRESIDENT. The question is on the motion to table the resolution.

Mr. LIPPITT. Mr. President, will the Senator withhold that motion for just a minute?

Mr. STONE. I will not. I move to lay the resolution on the table.

The VICE PRESIDENT. The question is on tabling the resolution.

The motion was agreed to.

PANAMA CANAL TOLLS.

Mr. O'GORMAN. I ask unanimous consent that the canal bill may be laid before the Senate in order that the Senator from Kentucky [Mr. BRADLEY] may address himself to that measure.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 14385) to amend section 5 of an act to provide for the opening, maintenance, protection, and operation of the Panama Canal and the sanitation of the Canal Zone, approved August 24, 1912.

Mr. BRADLEY. Mr. President, the issue presented in the proposed repeal of free tolls is not and can not be made political. Even if it had been political, it passed beyond the realm of politics when, in 1912, the three leading political parties indorsed the exemption of coastwise vessels from tolls. But if this were not true, the issue is of such paramount national importance that it is as far above politics as the stars are above the sea.

A distinguished Representative has said that in the consideration of this question, "towering above all other considerations, is the necessity to retain the Democratic Party in power." I regret that such a thought should have ever entered the brain of any American, much less have found utterance. For a half century I have persistently fought, the greater portion of the time against seemingly overwhelming odds, for the Republican Party. I love that party with almost an idolatrous devotion, but, much as I love it, I would rather see it go down in defeat than see a stain placed upon the honor and glory of the Republic.

The only question presented, Mr. President, is shall we gratify the President and reverse 100 years of national policy by surrendering the sovereign right to control our domestic concerns into the hands of an insatiable foreign power?

I fear there are some who do not appreciate the true gravity of the situation. The bill under discussion not only repeals the provision exempting coastwise vessels, but repeals the provision granting exemption to vessels of the United States and her citizens from the maximum charge of $1.25 per ton on ships of commerce. Therefore, should this bill pass, this Government will be placed upon exact equality with all other nations. However, substantial as these concessions are, they will not satisfy Great Britain, who protests against the exclusion of her railroad or trust owned ships from the canal and against free tolls to Panama. By the last objection she strikes at the very existence of the canal, as under its provisions we secured title from Panama to the territory through which the canal is constructed.

For these reasons the issue involved is one of the most vital and far-reaching importance that has ever been presented to the Congress of the United States. Upon its fate depends our right for all time to come to regulate a canal constructed on our own territory and paid for by our own people. Once surrendered we can not regain it, for by enacting the law we confess the violation of a solemn treaty, the commission of a dishonorable act.

The canal will cost the enormous sum of $400,000,000. The extent of that expenditure may be realized when we reflect that to aggregate that sum it would require an accumulation of $1,000,000 each year for 400 years.

The construction of a canal at some point across the Isthmus has been the dream of centuries, and no nation on the globe save this would have had the courage, the genius, the enterprise, and the ability to make that dream a reality.

If in the beginning the people of this country had known the vast sum required to construct it and had believed for a moment that after the payment of that sum we would be charged with its management, repair, and defense, and would make all nations entirely equal with our own in sharing the benefits, it never would have been undertaken.

I am as much in favor of strictly observing the Nation's honor as any Member of this body, but I do not believe there is any foundation for the charge that in enacting the present law Congress was guilty of violating the treaty in the slightest degree. I am equally well satisfied that the passage of the proposed bill will not only prevent the enlargement of our merchant marine, but will seriously cripple our already insignificant and languishing commerce. Not only so, but I am equally confident that it will swell almost incalculably the already enormous commerce of Great Britain and deliver us, bound in commercial chains, into her hands and the hands of the great transcontinental railroads of Canada and the United States.

But the matter of dollars and cents fades into insignificance when we reflect that a repeal will be an acknowledgment of the criminal bad faith of Congress and an humble and servile surrender of the sovereign right to control our domestic concerns.

Never has there been, concerning any public question, such persistent efforts made to becloud the facts and mislead the public mind, not only as to the meaning, but also the wording, of the Hay-Pauncefote treaty. The transcontinental and shipowning railroads have at all times bitterly opposed the construction of this canal and are now actively engaged in the effort to repeal, because they know that water competition will greatly reduce the vast profits they have been accumulating for years and release the people from their greedy clutches. Another agency has been at work—the Carnegie Peace Foundation. Many thousands of dollars have been contributed by the latter to send broadcast over the Nation and countries abroad literature favoring Great Britain's contention in the attempt to convince the people that the Congress of the United States could not and did not honestly exempt American coastwise vessels from toll. Nor has this expenditure been confined alone to the Peace Foundation in the dissemination of literature and in other directions. The transcontinental railroads of Canada and the United States and railroad and trust-owned ships have been actively engaged in the same direction. In the first place, a number of newspapers were induced, through misrepresentation, cajolery, and otherwise, to publish articles favorable to the British view. Ministers of the gospel, inspired by love of peace and fear of war, expressed themselves favorably, in many instances having either not read or understood the treaty; and a considerable number of college professors, in many instances to obtain notoriety, and probably in some instances to qualify themselves for the receipt of a Carnegie pension, expressed themselves antagonistically to their own country. Now and then a lawyer was persuaded to give an opinion. Some of these persons were never heard of before. After all of these expressions were obtained, they were carefully collated and published in pamphlet form, at least three enlarged editions of which were printed and circulated by the million throughout the United States and other countries. This plan was well conceived and was not only carried out in part before the law was enacted, but has been persistently prosecuted since its passage up to the present time. The passage of the law seemed to have had no effect on the ardor of this propaganda, its fight having been persisted in with increased vigor. The full effect of these publications can not well be estimated.

Mr. Andrew Carnegie, who came here from Scotland a poor office boy and succeeded in acquiring a collossal fortune, has founded what is known as the Peace Foundation, which is combined, I am told, with a publication known as the Peace Advocate. Thousands of this publication, in addition to pamphlets issued by the foundation, have been circulated throughout the United States and in foreign lands, especially Great Britain.

Mr. Carnegie conceived the idea some years ago of uniting this country with Great Britain under the name of the "United States of Great Britain," and selected these agencies to bring it about, operating at all times in the sacred name of peace (?). He has been active and untiring, whether entirely on his own responsibility or as the agent, in part, of Great Britain I can not say. In order to impress his views favorable to a union of this country and Great Britain he wrote and published, about a year ago, a book entitled, if I remember correctly, "Triumphant Democracy," the second part of which is designated "A Look Ahead." In this remarkable publication he said:

> The greater union would be one in which although she—England—would not be all powerful, yet she would *undoubtedly be first*, and regarded with all the deference due to age and motherhood.
>
> Numerous as would be the States comprising the reunited nation, each possessing equal rights, still *Britain, as the home of the race, would ever retain precedence*, first among equals. However great the number of the children who might sit around her in the council *there would never be but one mother, and that mother Britain.*

He would have us ignore the nations whose brave sons assisted in our struggle for liberty. He would have us forget the kindly offices of Russia, who prevented Great Britain from recognizing the independence of the Southern Confederacy, not because she loved the South, but to separate our country so that it might more easily be the prey of her insatiable greed, and in gratitude to Great Britain for the wrongs inflicted upon this Nation in the past form a union offensive and defensive against them. And this man Carnegie, hand in hand with the shipowning and transcontinental railroads and the coterie that surrounds him are attempting to persuade American citizens to surrender the sovereignty and honor of their country.

Not only have misrepresentations been made in many instances, but mutilated portions of the Hay-Pauncefote treaty as well as portions of the Clayton-Bulwer treaty, which had no force because expressly superseded by the first-named treaty, have been scattered promiscuously over the country. Whenever any individual indorsed their views he was at once advertised as a most wonderful and learned man, and in this way many hitherto comparatively obscure persons have been surprised to hear for the first time their varied and distinguished accomplishments through the public press. Some slanderers have even gone so far as to say Mr. Roosevelt opposed free tolls, notwithstanding the fact that he has time and again vigorously stated the contrary, accepted a nomination for Presi-

dent on a platform declaring in favor of free tolls in good faith, made a campaign on that platform in good faith, and to-day continuing that good faith stands by his platform.

Showing the character of the methods that have been resorted to, newspapers have in many instances published as correct the following as part of the treaty:

The canal shall be free and open to the vessels of commerce of all nations on terms of entire equality, so that there shall be no discrimination against any such nation, or its citizens or subjects, in respect of the conditions or charges of traffic or otherwise.

In the first place, it will be observed that the words "*and of war*" following the words "vessels of commerce" were omitted, for if inserted they would most naturally suggest to every reader that it was preposterous that this Government would agree that all the war vessels of foreign countries should have equal rights with its own.

In the second place, the words "*observing these rules*," following the words "all nations," were omitted, because if inserted they would naturally suggest that certain rules were to govern, and on inquiry it would be found that these rules were prescribed by the *United States alone for the government of her own canal;* and that the United States, having provided the rules under which her canal should be free and open to the vessels of commerce and war of all nations observing her rules, was necessarily not included in the expression "all nations," as she could not be expected to make rules for the government of herself. Many good people have been misled by this false publication and in consequence prejudiced against free tolls.

But notwithstanding the large sums of money expended by the Peace Foundation and the transcontinental and other railroads in the dissemination of literature, and notwithstanding the misrepresentations in the public press, the large majority of the newspapers, the large majority of leading statesmen, including a majority of the Congress of the United States, the three leading political parties, and fourteen millions of voters have indorsed the granting of free tolls to the coastwise vessels of the United States.

To the confusion of the American people it has been stated in certain newspapers and magazines, in Congress, and other places that because the Bard amendment offered to the treaty, striking out article 3 and substituting a new article giving the United States "the right to discriminate in respect of the charges of traffic in favor of vessels of its own citizens engaged in the coastwise trade," was defeated in the Senate that it necessarily follows the Senate surrendered that privilege.

That amendment was offered by Senator Bard to the *first* Hay-Pauncefote treaty, of February 5, 1900, which was amended and ratified by the Senate, but rejected by Great Britain, and has no reference to the existing treaty, on account of which we might contend that Great Britain refused to accept the treaty because the amendment was not adopted with as much earnestness as our adversaries make their contention.

The Senate was in secret session when the Bard amendment was defeated, and hence, under the rules, remarks of Senators were not reported. But the contention that the defeat of the Bard amendment was the surrender by the Senate of all claim by the United States to discriminate in favor of its coastwise vessels is not only contradicted by the treaty itself, which is amply specific, but by the testimony of Senators then present. Ex-Senator Bard says:

When my amendment was under consideration *it was generally conceded* that even without that specific provision the rules of the treaty would not prevent our Government from treating the canal as part of our coast line, and consequently could not be construed as a restriction of our interstate commerce forbidding the discrimination in charges for tolls in favor of our coastwise trade, *and this conviction contributed to the defeat of the amendment.*

Senator LODGE, one of the 11 Senators who voted against toll exemption and who now favors its repeal, said, July 20, 1912, in open Senate, in speaking of the Bard amendment:

I voted against it in the belief that it was unnecessary; that the right to fix tolls, if we built the canal, or it was built under our auspices, was undoubted. *I knew that was the view of Senator Davis—*

Now dead—

who was at the time the chairman of the committee. I certainly so stated on the floor.

I personally have never had any doubt that the matter of fixing tolls must necessarily be within our jurisdiction, and when I referred to going to The Hague as useless, I did not mean because our case was not a good one. I meant because, in the nature of things, we could by no possibility have a disinterested tribunal at The Hague.

Senator CLAPP, July 17, 1912, in the Senate, in speaking of the Bard amendment, said:

I know I was here at the time, although I do not recall all of the speeches. But while some of us voted—insisting in some instances that these things should be explicit, and in others voting with the majority upon the ground that they were covered, anyhow. I believe, both with reference to the coastwise trade and especially with reference to the question of fortifications, that many of the votes cast against those express conditions were cast upon the theory that without them we nevertheless had the right to do them.

Mr. O'GORMAN. That the provisions were unnecessary.

Mr. CLAPP. Yes; that they were necessary.

Senator PERKINS stated, August 6, 1912, in the Senate:

I wish to state that Senator Davis, of Minnesota, was at that time chairman of the Committee on Foreign Relations. He was, as is conceded by all, an authority on international law, and took the view stated by the Senator from New York, and that stated by the Senator from Washington. There is no question about it, that the rules we did make were to govern other nations than ourselves.

On March 6, 1914, the Washington Post published an interview with ex-Senator Marion Butler, of North Carolina, as follows:

I remember that when the article of the treaty was under consideration which provides that the canal shall be open to the vessels of all nations on the same terms, that several Senators suggested the propriety of adding a provision expressly exempting our domestic commerce through coastwise vessels.

The prompt response to this proposition on the part of the Senators having the treaty in charge was that such an amendment was unnecessary, because the treaty was so understood by the contracting parties.

Similar statements have been made by ex-Senators Foraker, Beveridge, Towne, Turner, Kearns, Deboe, Dubois, Pritchard, Mason, and CLARK of Wyoming—15 in all.

The testimony is overwhelming that the opinion then was that the treaty as written secured the right embraced in the amendment.

Before the tolls law was passed, but after its provisions were well known, Mr. Innes, of the British embassy, in a communication to Secretary Knox, July 8, 1912, said:

As to the proposal that exemption shall be given to vessels engaged in the coastwise trade, a more difficult question arises. If the trade should be so regulated as to make certain that only *bona fide* coastwise traffic, which is reserved for the United States vessels, would be benefited, it may be no objection could be taken. * * *

I digress a moment to remark that ample testimony has recently been given before the Interoceanic Canals Committee that such a regulation can be made.

In another portion of his communication Mr. Innes says:

The proposal to exempt all American shipping from payment of the tolls would, in the opinion of His Majesty's Government, involve an infraction of the treaty, nor is there, in their opinion, any difference in principle between charging tolls only to refund them and remitting tolls altogether. The result is the same in either case, and the adoption of the alternative method of refunding the tolls in preference to that of remitting them, *while perhaps complying with the letter of the treaty*, would still contravene its spirit.

It is true *there is nothing in the Hay-Pauncefote treaty to prevent* the United States from subsidizing its shipping, and if it granted a *subsidy His Majesty's Government could not be in a position to complain.*

Now, it will be observed that, taken all in all, this is a very mild and insufficient protest, as well as very unreasonable, coming from a Government that for years has subsidized its vessels and which will continue to subsidize every vessel which it sends through the canal, and which gave subsidies to its ships years ago in violation certainly of the spirit of its treaty with the United States.

Following the communication of Mr. Innes on November 14, 1912, nearly three months after the law had passed, Sir Edward Grey, Secretary of State of Foreign Affairs of Great Britain, before he had seen the proclamation of President Taft, published the preceding day fixing the rate of tolls, addressed a letter to the State Department, which the British ambassador handed to Secretary Knox on the 9th of December, along the lines of the previous communication from Mr. Innes, but greatly elaborating the same and discussing objectionable portions of the toll-exemption law approved August 24. In this letter he suggests submitting the question to arbitration, which was substantially agreed to by Secretary Knox.

While these negotiations, which gave promise of probable early adjustment, were pending, and before Secretary Knox answered the letter of Secretary Grey, the enemies of free tolls in America actively increased the dissemination of literature, and a bill was introduced to repeal the law. This most naturally resulted in the encouragement of Great Britain. This Foundation, operating in the holy name of peace by sending out its seditious matter, was doing an act which eventually may cause war.

On January 17, 1913, Secretary Knox answered the letter of Secretary Grey in such a lucid and convincing manner as to scatter his contentions to the winds. The effect of this answer, however, was greatly weakened by the persistent activity of some of our own people.

Now, arbitration can not be thought of, for under the dictation of the President an attempt is being made to repeal the law, thereby conceding everything to Great Britain.

There are some who profess to believe that exemption of our coastwise vessels would be a subsidy. So far as I am concerned, I would not approve subsidies except in self-defense. Had we adhered to the laws adopted by our fathers instead of being wheedled out of our rights by Great Britain, or, having

failed in this, had we adopted subsidies, we would not be compelled now to pay foreign ships more than $175,000,000 annually for carrying our commerce, but would ourselves be carrying all of it and a great part of the world's commerce besides. Eventually, in order to develop our merchant marine, we must pay subsidies or repeal our navigation laws, abrogate the treaties made thereunder, and return to the system of discriminating duties established by the fathers and recognized in the tariff bill lately adopted.

Excluding the cost of the Panama Canal, we have expended more than $700,000,000 in the construction of canals and the improvement of rivers and harbors in which no tolls have been exacted. Democrats have universally voted for appropriations for this purpose. All of this has been done to relieve our commerce.

The exemption from tolls to our own vessels passing through our own canal is not, in the strict sense of the word, a subsidy. But if it is a subsidy, then the exemption from toll on our rivers and in our harbors and canals—for instance, in the Soo Canal, whose commerce greatly exceeds any that may be anticipated in Panama—is also a subsidy.

We all know that subsidies are unpopular with many of our people, and hence appreciate the artfulness of the position assumed by Secretary Grey that Great Britain could not object to the adoption of subsidies as applicable to the canal. He knew that the mere mention of the word "subsidy" is as exciting to some citizens of the United States as a red flag is to a bull.

But it is strange that for so many years we have relieved interstate commerce from payment of tolls in all our own waters and heretofore no attempt has been made to denominate it as a subsidy. It is strange it took our Democratic friends so long to discover that these were subsidies. If we are, on the plea of a subsidy, to obtain no benefit in the Panama Canal, in order to be consistent we should give no benefit to our ships in any of our waters, but should have the Government authorities collect tolls from all our citizens engaged in water interstate commerce, thus increasing the cost of transportation to the consuming public.

So far as the canal is concerned, if we pass this bill we shall, of course, draw infinite consolation from the fact that we have encountered and conquered pestilence, have removed mountains, have accomplished the most wonderful engineering feat known among men, have by a majestic construction united the two oceans at the enormous expense of $400,000,000, have bound ourselves to maintain the neutrality of the canal against the world, have expended and will continue to expend many millions in fortifying and policing the same and keeping it in repair, all for the benefit of the other nations of the world as much as for our own, they to reap substantially all the benefits on account of the limited amount of our commerce when compared to theirs, without any expense or responsibility, while we bear all the burdens. However, in the language of Ambassador Page, we may say to Great Britain that—

> It adds to the pleasure of the building that great work that you will profit by it.

But the exemption to coastwise vessels is not a subsidy. The lexicographers tell us that a subsidy is "a sum of money granted for a purpose." Pray tell me how the exemption of interstate vessels from the payment of tolls in our own canal can be tortured into the payment of a sum of money granted to them. We pay them no money. We simply allow them to use our property without the payment of money to us. And why? Is it for the purpose of swelling the fortunes of those engaged in our coastwise trade? By no means, but for the purpose of cheapening freights to our people. If an American coastwise vessel pays, say, $6,000 for the privilege of passing through the canal, that amount will be added to cost of freight and be paid by the American consumer if the goods are shipped into the interior; by the producer if they are shipped outside the interior. Instead of remitted tolls being a subsidy to the shipowner it is a benefit bestowed on the American people. A subsidy, however, would be far better than a surrender of our rights and the injury or destruction of our commerce.

The transcontinental railroads of the United States and Canada have not only had entire control over commerce shipped from coast to coast, but upon a large percentage of the commerce moving from the interior to the coasts and have ruled with a rod of iron. They see in the exemption of coastwise ships from toll a serious menace to their monopoly. Hence their representatives have appeared before the Interoceanic Committee and vociferously protested against it. The present law closed the canal against ships owned by these and other railroads for the purpose of preventing them from perpetuating their monopoly; in other words, to bring about an active competition between land and water transportation. No sane man can doubt that should the law remain in force, by reason of the great difference between land and water rates immense benefits will accrue to the people of the United States. This has been fully established by proof recently before the committee. But without enlarging now on this point, I refer to a speech of great power, a speech of a distinguished man, President Wilson, at Washington Park in the campaign of 1912, which will hereafter be quoted at length. Speaking of the good that will result from the present law which he now seeks to have repealed, he said:

> It provides for free toll for American ships through the canal and prohibits any ship from passing through which is owned by any American railroad company. You see the object of that, don't you? We don't want the railroads to compete with themselves, because we understand that kind of competition. We want water carriage to compete with land carriage, so as to be perfectly sure that you are going to get better rates around the canal than you would across the continent. [Applause.]

The people were pleased with the speech and Mr. Wilson was pleased with himself.

> The farmers of this country are, in my judgment, just as much concerned in the policy of the United States with regard to that canal as any other class of citizens of the United States.
>
> Everything that is done in the interest of cheap transportation is done directly for the farmer as well as for other men. So that you ought not to grudge the millions poured out for the deepening and opening of old and new waterways. [Applause.]

The people were still pleased, and so was Mr. Wilson.

Nearly all of our canals were built by private enterprise, but the Government has obtained control of a large majority of them in order to remove charges on commerce; and those of which the Government has not obtained control are under the management of railroads. In some instances the roads have operated canals at a loss in order to break down competition and to maintain freight charges on their lines. But we are told that the Panama Canal is differently situated from the others, because it involves the commerce of the world. This might be true if there were across the Isthmus a natural thoroughfare. As far as international law can be regarded as settled, while commercial ships may of right pass through artificial canals, yet the nation that constructs them may annex such conditions to their use as it chooses. (Moore's Int. Law Dig., vol. 3, p. 268.)

It is contended by some that the act exempting tolls was not carefully considered, and hence is entitled to but little weight. In view of the facts such a contention is as unjust as it is untrue. However, it is quite in harmony with the many misrepresentations which have been made concerning the treaty, and is only a part of a carefully prepared scheme in some quarters to prejudice the people of the United States against the action of Congress and bring her representatives into disrepute.

The bill was considered with great care. After it had been debated in Committee of the Whole and a majority and minority report were made in the House, six days were consumed in debate, and on May 21, more than two months after the minority report was filed, by a majority of 19 votes, the bill passed the House.

The bill was reported to the Senate and referred to the proper committee May 24. After thorough investigation by the committee it was favorably reported June 12, and after exhaustive debate, on August 9, nearly two months after the report was made, it was adopted—44 for and 11 against—and this, too, in the very teeth of Great Britain's protest which had in the meantime been made to the State Department.

June, 1912, after the vote by the House and before the vote in the Senate, the Republican convention indorsed and nominated Taft for President. In view of the fact that he had declared in favor of toll exemption, his nomination was an approval of that doctrine.

July 2, 1912, the Democratic convention declared in its national platform:

> We favor the exemption from tolls of American ships engaged in coastwise trade passing through the Panama Canal. We also favor legislation forbidding the use of the Panama Canal by ships owned or controlled by railroad carriers engaged in transportation competitive with the canal.

August 7, 1912, the Progressive Party in its platform declared:

> The Panama Canal, built and paid for by the American people, must be used primarily for their benefit. We demand that the canal shall be so operated as to break transportation monopoly now held and misused by the transcontinental railroads by maintaining sea competition with them; that ships directly or indirectly owned or controlled by American railroad corporations shall not be permitted to use the canal; and that American ships engaged in coastwise trade shall pay no tolls.

If there was a single word of objection to these declarations in any one of the conventions, I have never heard of it. Indeed, it seemed that the exemption of American vessels from tolls had become the fixed policy of the American people.

In the campaign that ensued the speakers of each party lauded the statute, no one more strenuously than Mr. Wilson, who had accepted his nomination not only with alacrity but with the utmost Christian resignation.

In view of the fact that the law had passed, notwithstanding the protest of Great Britain, our people have made large investments in the building of ships for coastwise trade, and the repeal of the law would inflict great damage upon them and would be an act of bad faith on our part. However, if Great Britain is satisfied, their wrongs amount to nothing.

To the profound astonishment of the American people—and, for that matter, I doubt not of the people of the civilized world—on the 5th of March, 1914, President Wilson delivered a message to Congress earnestly insisting that the toll exemption should be repealed.

That surprise grew out of the fact that the Chief Magistrate of the United States asked that his Government should surrender its sovereign rights. The surprise, however, was increased in this country by reason of the President's repudiation of the platform on which he was nominated, which he heartily indorsed during the campaign, and on which he was elected. Not only did the Democratic platform indorse the exemption from tolls of coastwise vessels, but the same platform concluded with this lofty, earnest, and, as was then supposed, honest declaration:

> Our platform is one of principles which we believe to be essential to our national welfare. Our pledges are made to be kept when in office as well as relied upon during the campaign, and we invite the cooperation of all citizens, regardless of party, who believe in maintaining unimpaired the institutions and traditions of our country.

The President and many Senators seem not to have seriously regarded this declaration or the speech of the Secretary of State before the Pennsylvania House of Representatives, May 13, 1913, in which he said:

> If a man after his election finds something which he can not honestly support, what ought he to do? Violate his conscience? No. Then what? He should resign and let the people select a man to do what they would have him do. * * *
>
> A platform is binding upon every honest man who runs upon that platform. * * *
>
> The representative who secures office upon a platform and then holds the office and betrays the people who elect him is a criminal worse than the man who embezzles money intrusted to him.

And, notwithstanding these high-sounding declarations, Mr. Bryan now favors the repeal, having evidently concluded that the rule laid down by him does not apply to a Secretary of State.

I do not refer to these inconsistencies through any burning desire or with the hope to prevent any Democrat from committing them, but simply to show how untenable and unreliable is the judgment of any man who thus shifts from one position to another and who has no respect for his party platform.

An attempt, however, is being made to justify the President and those who support him by referring to another plank in the platform denouncing subsidies. The two planks do not necessarily conflict, because free tolls do not constitute a subsidy in the sense the word is ordinarily used; but if they do, it follows inevitably that the Democratic Party did not deal honestly with the people in making two conflicting declarations in order to obtain votes from those having divergent opinions.

However this may be, Mr. Wilson heartily and without qualification indorsed free tolls and is in morals now estopped from taking a contrary position, except, at least, in case of the direst extremity.

An effort is made to escape the binding force of the platform on the ground that the general declaration against subsidies precedes the special indorsement of free tolls. But the repealants forget that the universal rule of construction is that a special provision always stands superior and paramount to a general declaration. Such was the decision In re City Trust Co. (121 Fed., 708), and two of the judges joining in that opinion are now judges of the Supreme Court.

There is another universal rule of construction, that in order to arrive at the true intent the whole instrument shall be considered. There is no trouble in applying that rule in this instance. The Democratic Party did not regard exemption from tolls to American vessels in domestic waters as a subsidy, and for years, by its votes in Congress, had recognized such exemptions. Neither did they regard such exemption as any more a subsidy than the provision contained in the Underwood tariff law giving a 5 per cent advantage or rebate to American ships engaged in the foreign trade over the ships of other nations carrying imports into the United States. And although more than 20 foreign powers have protested against this law, neither the President nor his adherents have proposed its repeal. Probably if we are so unpopular abroad, that law has contributed to it more than any other cause.

So it is there is really no conflict in the Democratic platform.

It is not only fair but eminently proper in discussing this remarkable message to call attention to the fact that the President not only accepted a nomination on a platform indorsing that exemption, but during the campaign earnestly commended its justice and propriety. And right here I pause to inquire if he had spoken before the people in that campaign as he speaks now does any sane man believe he would have been elected? But now that Mr. Wilson has been elected he does not hesitate to condemn the bridge that carried him over. What are the reasons for this remarkable change? He does not ask the repeal as a matter of *policy alone*, but to use his own words as a matter of *justice and wisdom*. Hence, it will not do to say that he is asking it merely to avoid complications. Contrast this statement with his speech during the campaign at Washington Park, N. J., August 15, 1912, after the bill had passed. Speaking of the opening of the canal he said:

> What interest have you in opening it *to the ships of the world?* We don't own the ships of the world. * * * The chief road by which your crops travel to the Orient is through the Suez Canal. They don't go around by the Pacific. * * * The western farmer therefore has to ship his crops across the continent in order to reach the ships that are to take that road. And when his crops reach the port do they find American ships waiting for them? Not at all. In most years not a single ship carrying the American flag goes through that canal [Suez] carrying freight. * * *
>
> One of the great objects in cutting that great ditch across the Isthmus of Panama is to allow farmers who are near the Atlantic to ship to the Pacific by way of the Atlantic ports, to allow all the farmers on what I may, standing here, call this part of the continent to find an outlet at ports of the Gulf or the ports of the Atlantic seaboard and then have coastwise steamers carry their products down around through the canal and up the Pacific coast or down the coast of South America.
>
> Now, at present there are no ships to do that, and one of the bills pending—passed, I believe, yesterday by the Senate as it had passed the House—provides for free tolls for American ships through that canal and prohibits any ship from passing through which is owned by any American railroad company. You see the object of that, don't you? [Applause.] We don't want the railroads to compete with themselves, because we understand that kind of competition. We want water carriage to compete with land carriage, so as to be perfectly sure that you are going to get better rates around the canal than you would across the continent. * * *
>
> Everything that is done in the interest of cheap transportation is done directly for the farmer as well as for other men. So that you ought not to grudge the millions poured out for the deepening and opening of old and new waterways.
>
> *Our platform is not molasses to catch flies. It means business. It means what it says.* It is the utterance of earnest and honest men, who intend to do business along those lines and who are not waiting to see whether they can catch votes with those promises before they determine whether they are going to act upon them or not.
>
> They know the American people are now taking notice in a way in which they never took notice before, and gentlemen who talk one way and vote another are going to be retired to very quiet and private retreats.

I wonder if this last statement is prophetic of the disposition the people will make of Mr. Wilson should he again offer for the Presidency.

But let us return to this wonderful message:

> In my own judgment, very fully considered and maturely formed, the exemption *constitutes a mistaken economic policy from every point of view, and is, moreover, in plain contravention of the treaty with Great Britain* concerning the canal concluded on November 18, 1901.

It would have been more illuminating had the President explained why he accepted a nomination on, and heartily indorsed by act and speech, a disreputable platform "*in plain contravention of a treaty*" by which act, if he is correct, the Nation was dishonored.

Was he in earnest when he accepted the nomination? Was he in earnest when he spoke in New Jersey? The exemption was just and wise, yea, even politic, then. If he did not act and speak frankly then, he should confess it now and admit that his platform did not "mean business," but was "molasses to catch flies." If on the other hand he has changed his mind, he should have said so and not appear, as he now does, before the American people speaking in two different ways with two different voices. He does not suggest an arbitration, which Great Britain proposed—and which was substantially agreed to by Secretary Knox—and which would now be acceptable to her, but asks that the law shall be repealed, although Innes, representing Great Britain, has admitted that the exemption of bona fide coastwise vessels might not be objectionable.

Again, the President says:

> Whatever may be our own difference of opinion concerning this much-debated measure, *its meaning is not debated outside the United States.*

Even if this statement were true, it might have occurred to his mind, at least, that the interest of people in the canal outside the United States is opposed to ours, and hence such an opinion, even if it existed, should cause no surprise. But the statement is untrue.

On April 10, 1913, Hon. George C. Butte, M. A., one of the most profound German lawyers of Heidelburg, issued and had printed an article in a celebrated German periodical at Munich—

Jahrbuch des Völkerrechts—thoroughly vindicating the position of the United States. This article was printed as a Senate document May 5, 1913, on motion of the distinguished Senator from New York [Mr. O'GORMAN], and must have come to the notice of the President. His may be said to be an unprejudiced view, the opinion of a writer in a foreign land. On account of the clearness of statement and wonderful force of this article, I will make extensive quotations.

In the beginning of the article he says:

He deceives himself grievously who believes the United States made the stupendous sacrifice of human energy and public money necessary to build the Panama Canal, the greatest liberty man has ever taken with nature, with any other purpose in view than the national advantage of the United States—commercial and, above all, political advantage. * * * Equally clear also is the fact that the United States never thought of selfishly appropriating the canal as a national monopoly. It was to be a great open highway to bring remote nations and peoples into closer relation with one another; it should be dedicated to the commerce of the world as an exalted agency of peace, in the control of a liberty-loving people, for the promotion of human happiness and the spread of the blessings of civilization. Nor is there anything necessarily incompatible in these positions. No one underestimates the benefits to mankind of the Suez Canal because the builders thereof draw a 30 per cent dividend annually. * * *

Every presumption of good faith in the observance of a treaty is to be allowed in favor of a nation as against a charge of treaty violation when a difference of opinion has arisen as to the meaning of the treaty involved. The burden of proof rests upon the nation charging the violation. * * *

Such pretentions and demands, when coupled with a direct or covert allegation of treaty violation in the event they are not complied with, acquire a wholly unjust importance by reason of the unfortunate but undeniably actual circumstance that the mere charge of treaty violation always places the nation against which it is made under suspicion in the minds of many and imposes upon it the unfair burden of proving a negative, namely, that it has done no wrong.

In the present controversy between Great Britain and the United States it is an important fact that the construction placed by Great Britain upon the Hay-Pauncefote treaty, if recognized, will result in an unquestionable and an unmixed national profit to Great Britain.

* * * * * * *

The questions involved are provisions of internal legislation affecting directly only the domestic affairs and the subjects of the United States, and as such may not be annulled or even called in question by any foreign court, arbitral or otherwise. This proposition is so elemental, striking as it does to the very root of the doctrine of national sovereignty, that no nation having reasonable ground for believing that this proposition arises ought to be criticized for entertaining an honest doubt as to the propriety of submitting itself to an arbitration. * * * The conclusion is irresistible that the parties never intended that vessels of commerce and of war of all nations observing these rules should be entitled to use the canal "on terms of entire equality" with the United States, but on terms of equality among themselves. * * *

The persistent efforts of the British Government, vigorously supported by transcontinental railway lines, to accomplish the repeal of the act of August 24, 1912, have up to this time met only with rebuffs in and out of Congress. It is believed that the American Nation will remain steadfast in the face of unwarranted demands, conscious of honorable motives as respects foreign powers, and firm in upholding her sovereign right to legislate as to her own property and her own subjects as she sees fit. * * *

It seems that in Germany the influences against free tolls are clearly understood.

As showing the present opinion in Germany, I quote the following special dispatch from Berlin to the Washington Post of March 7, 1914:

It has been years, if, indeed, such a case every occurred before, since the United States so openly backed down before England—years since it so openly felt and said it no longer was absolute in its own sphere, but dependent upon other powers.

In these words Count von Reventlow, the noted naval critic and writer on international topics, summarized to-night his view of Wilson's latest move on the canal tolls question.

Even in Great Britain there are those who agree that the toll exemption is right.

The Law Magazine and Review of London is the leading publication of its kind in England. In its November number, 1912, appear articles written by eminent British authorities, Edward S. Cox-Sinclair and C. A. Hereshoff Bartlett, LL. D., fully sustaining the position of our Government. These articles are exceedingly able and exhaustive, and I regret that time will not justify quotations therefrom; however, they were inserted in the CONGRESSIONAL RECORD a year ago, on motion of the distinguished Senator from New York [Mr. O'GORMAN], and surely did not escape the eye of the President.

Following the reply of Secretary Knox on January 17, 1913, to Sir Edward Grey, the Manchester (England) Guardian said:

By the American navigation laws, as by all navigation laws, coastwise traffic is reserved to American registered ships. As none but American ships can make a voyage, say, between San Francisco and New York, there can be no question of discrimination against other ships. This coastwise traffic was an American monopoly before the Hay-Pauncefote treaty, and a monopoly it remains. * * * As America retains the monopoly, we fail to see how any question of discrimination can arise against a second party who does not exist, so far as coastwise traffic is concerned. The real grievance against the bill in its amended form is not against its morality but something much narrower. It may with fairness be said that the American definition of coastwise shipping is so wide that it includes practically all American shipping. * * * Our foreign office, when it concluded the Hay-Pauncefote treaty, should have foreseen this practical difficulty, and it could then with reason have pressed for the restriction of the American definition of coastwise traffic.

In March, 1913, the Irish Industrial Journal published, I believe, in Dublin, said:

According to the Irish Times the phrase "all nations" includes the United States. Therefore the United States can not discriminate against themselves. According to this interpretation *all* vessels must pass through on the same terms. There must be equality. It would, however, be absurd to hold that a country could not discriminate in the case of its own vessels. How, then, could equality be established among nations which do not discriminate against themselves? To hold this view would be equivalent to denying the United States jurisdiction in their own country.

It must be admitted, therefore, that the United States Congress has the power to make the laws governing its own affairs. It has power certainly to make regulations concerning its domestic traffic. Let us take the case of traffic passing between New York and San Francisco. This clearly is domestic traffic. * * * It is interstate commerce, and is not foreign. No country could subject her coasting commerce to foreign regulations.

* * * * * * *

"Would Irishmen permit the United States to interfere with the Dublin port and docks board in fixing dues on vessels trading from Liverpool to Dublin?" * * * "Yet this is what is proposed by an Irish journal, in the face of the fact that the Panama Canal is built on American territory by American capital." * * * "The merits of the case are equal and the comparison is fair." * * * "The treaty should be interpreted: 'We, the United States, guarantee equality to you' (all nations). This appears to us to be the common-sense interpretation. A man can not contract with himself. When the United States throws open her canal to all nations on equal terms she is in the position of a host throwing open his house to his guests. When he says to his friends, 'Come you all to my house,' he surely does not include himself." * * * "It is evident that a man can not contract himself in his own house, neither can a man (or a nation) enter into an engagement with himself. Consequently the phrase 'all nations' can not include the United States, nor consequently its shipping, which can be exempted." * * * "The British people were simply guaranteed equality with all other nations bar the United States."

* * * * * * *

"Now, a treaty can only bind in the form of a contract. The Hay-Pauncefote treaty is lacking in the essentials of contractual obligation. The subject matter was uncertain, the agreement was conditional, there was no consideration, and it was not competent for ambassadors to surrender sovereign rights. As regards the first point, it is contended that the negotiations (in the Clayton-Bulwer treaty) had the Nicaraguan scheme in mind, and that it was to be a joint enterprise undertaken by the United States and Great Britain.

If this was a true version of what was in the minds of the parties, then the Hay-Pauncefote treaty involves no contract, as the subject matter has vanished. In any event, the agreement depended on a canal being built and was therefore conditional. Then there is the question of consideration, without which no contract can lie. We may well ask what did the United States receive by way of remuneration or benefit of any kind for making the treaty. The consideration for the use of the canal is the payment of dues. The consideration for being permitted to construct it might be stated to be in the fact that Britain agreed to withdraw her opposition to the construction. But if she had no legal right to oppose the canal project, she could not waive it as a legal consideration. Finally, there is the question of territorial sovereignty and the rights of the United States over its own shipping which could not be affected by any treaty obligations. * * *

In passing her coasting trade free she does no injury to us, for the carrying trade between the States has been confined to vessels under her flag ever since the first days of the Republic. The whole agitation is well known to be inspired by the American and Canadian railway companies.

It seems that in Ireland the agencies at work for repeal are fully understood.

But what is most surprising is that the President seems not to have read the letter of Mr. Innes of July 8, 1912, to Secretary Knox, in which he says:

If the trade can be so regulated as to make it certain that only bona fide coastwise traffic which is reserved for United States vessels would be benefited by this exemption, it may be that no objections could be taken.

And yet in the face of these expressions from eminent sources the President says the "meaning of the treaty *is not debated outside of the United States. Everywhere else the language of the treaty is given but one interpretation, and that interpretation precludes the exemption I am asking you to repeal.*"

After the message was delivered, in April last, the London Daily Telegraph published the following editorial:

We on our side should endeavor to realize the peculiar difficulties of the situation as to Panama. What the Americans have to deal with there is not, as many English critics have assumed, a mere question of canal tolls. It is not even a question solely of American versus foreign shipping.

Interwoven with it are various domestic questions of greater or less difficulty. Perhaps the most difficult of them all arises out of the competition between American coasting steamers and the transcontinental railways. Part of the object of exempting coasting vessels from canal tolls was to enable them to reduce their freight rates and to force a similar reduction on the transcontinental roads.

This, it will be observed, is a purely domestic affair. Foreigners are not interested in it except, perhaps, indirectly as holders of transcontinental railroad stocks. The coasting lines are practically all owned in the States, and that may explain the special favor with which they are regarded in Congress.

* * * * * * *

There are really two issues involved—a special one affecting the administration of the Panama Canal and a much broader one involving the moral and legal right of the United States under existing treaties to discriminate in favor of its own coastwise shipping.

While foreign critics naturally fix their attention chiefly on the first issue, it is equally natural that in the minds of American citizens the second should be most prominent.

Coastwise shipping is already a recognized principle of American policy. It has been applied in a variety of ways, and this, it may be contended, is the first occasion on which its application has been challenged.

An American champion of discrimination may plausibly ask why it should be excluded from the Panama Canal when it is permissible on every other foot of the United States coast line.

The Canal Zone is, in law and in fact, American territory and subject to all the territorial rights of the United States. That being so, why should not the general law and policy of the United States in such matters equally apply to it?

* * * * * * *

When the British public realize the larger question which lies behind it, namely, the general claim of the United States to discriminate in favor of its coastwise shipping, they may see that a settlement of the smaller question will not carry them far while the larger one remains open.

* * * * * * *

Already European shipowners find themselves in this dilemma. Their system of rebate affords an undeniable precedent for the refunding of canal tolls to American coasting ships. While they continue in force no European Government, British, French, or German, which recognizes them, can object to their American counterpart.

Again, immediately following the message, a London dispatch in giving the position assumed by the British newspapers (March 6), says:

The Daily News styles the message as one of the most perfectly phrased documents of modern times. The editorial admits that the United States might have an abstract right not to impose tolls on the American coastwise shipping, just as Great Britain has the right to abstain from participation in the Panama-Pacific Exposition, but that such actions would be mistakes.

So well satisfied are the nations of the earth with the justice and right of the exemption of United States coastwise vessels from payment of toll, notwithstanding their interest, that not one of them has made a protest to the United States except Great Britain.

But we are told in the message that—

We are too big, too powerful, too self-respecting a Nation to interpret with too strained or refined a reading the words of our own promise just because we have power enough to give us leave to read them as we please.

We have not given them a strained or refined reading. No such action is necessary. In making our construction we have considered the plain and simple words of the treaty. Rather, I should say, "We are too big, too powerful, too self-respecting a Nation" to surrender our sovereignty to Great Britain.

Continuing, the President says:

We ought to reverse our action without raising the question whether *we were right or wrong.*

In other words, we should not contend for the interest of our country, even if we are right.

Some years ago a distinguished officer of the American Navy proposed the toast, "Our country. May she be always right; but right or wrong, our country." But our President has varied the toast by substantially saying, "Great Britain, right or wrong."

The Members of this body, after mature deliberation, enacted the law. Now those who favored it are asked to stultify themselves. The trouble seems to be with the President that he thinks he is not a part of the country, but that the country and Congress are a part of him. He dictated a tariff bill and a currency bill. The antitrust bills, it is said in the press, did not suit him and were withdrawn in order that he might revise them. However subservient his party may have been to his will in these economic questions, it can not and dare not submit now on a question so seriously affecting our country's honor.

Those who voted for the law are asked to reverse their action, to sacrifice their self-respect, to eat their words in support of his foreign policy. The request is an insult, and the President should be plainly told that Congress is neither his slave nor his Trilby.

It would be interesting to know when the President reached his conclusion. It is a significant fact that in the week preceding April 26, 1913, a cable dispatch from London announced that Ambassador Bryce had informed the British Government that President Wilson favored the British view that the United States could not rightly or justly relieve its coastwise traffic from the payment of tolls. This was unofficially denied from Washington, but never denied in Great Britain. From that time it has been persistently stated from time to time in the public press that "President Wilson favored the repeal of the toll exemption." Some believed this report, but in the main it was discountenanced. In view of the present conditions, it seems that the report from London and the reports in our home press were true, and that as far back as a year ago the President reached his lately announced conclusion. If this be true, why did he for so long withhold that conclusion from Congress? He and he alone can answer.

The failure to speak sooner might be attributed to the fact that the President was not until recently impressed with the necessity of appeasing Great Britain, were it not that, through the newspapers on the evening of the day he delivered his message and on the morning of the following day, he stated to his callers that—

there was nothing in international relations that was critical—

But explained—

that the administration has found it embarrassing to deal with foreign nations, not one of which believed that the United States has been keeping its contract under the Hay-Pauncefote treaty, and all of which are suspicious of our good faith.

From these statements it appears that our coy and blushing President merely desired to be relieved of embarrassment, and that to accomplish this we were asked to surrender our right of sovereignty to Great Britain.

To the accomplished reporter of the Courier-Journal the President denied that any "especial foreign situation is critical," but indicated that "it is uncomfortable and insecure to try to deal with people who think one is an outlaw." The correspondent then asked the President "if any foreign Government had communicated a formal sentiment of that kind," whereupon he replied, "A man can tell whether another one likes him or not without receiving a formal letter on the subject."

So it is, we find that the President is asking us to sacrifice the important and far-reaching right that we have to manage our own canal, built with our own money, and upon our own soil, in order to relieve him of "embarrassment" or "discomfort and insecurity in dealing with people who think he is an outlaw and who do not like him."

In his estimate of the sentiment of foreign nations, the President disagrees with Mr. Bryan, who recently, in speaking of our position internationally, said, "We occupy, to-day, a proud position among the nations."

However, the conduct of foreign nations concerning our present war with Mexico show that even if any apprehension existed at the date of the President's message it was entirely groundless.

The message of the President, as said, is nothing short of an insult to those Members of Congress who voted for the present law. He knew when he delivered it that the toll-exemption law had been carefully considered and debated in both Houses before it was enacted. He knew that the law was the deliberate act of Congress, notwithstanding the pending protest of Great Britain, and yet he charges Congress not with having erred but with having acted in "plain contravention of the treaty." In other words, he charges that Congress deliberately violated a solemn treaty and besmirched the Nation's honor. If this be true, necessarily Congress dishonored itself and reflected discredit on the American people. And, to add insult to injury, having thus condemned us, he asks us to confess the truth of his charge by repealing the law. Surely no self-respecting Congress will tamely submit to this insult, much less confess his guilt. Even if he speaks truly, it will not reflect any more credit upon us to comply with his request than it reflects upon the thief to drop stolen goods and plead guilty. He does not even propose, what would be willingly accepted by Great Britain, that we should arbitrate. He simply says in substance, there is nothing to arbitrate; Congress has been guilty of dishonorable conduct, and should make amends by repealing the obnoxious act.

Our Chief Magistrate should hold the honor of Congress in the highest esteem; but, instead, he places the seal of criminality upon the great law-making body of the United States. And not only so, but upon the three great political parties, which in 1912 indorsed the law; and last, and worse than all, upon the 14,000,000 voters who approved the law. Carried to its legitimate conclusion, he brands himself with dishonor in approving this dastardly conduct of Congress by act and speech during the campaign.

But he says in his message: "I ask this of you in support of the foreign policy of the administration." If this be true, why was it necessary for him to charge by implication bad faith on Congress? Certainly it would at most have been sufficient to have said that, in his judgment, our action was "a mistaken economic policy." Why not have simply asked for the repeal on the ground that it was absolutely necessary to the carrying out of his foreign policy? Even this would have been a very vague and unsatisfactory request, because of his failure to speak candidly and give his reasons for making it, but it would at least have been respectful to Congress.

However, if his only reason is to enable him to carry out his foreign policy, in view of the policy he has pursued with Mexico, that reason would furnish the very best ground for refusing to grant the request. The trouble has been that the administration until recently made a feeble stand, with the dove of peace

in one hand and a jug of grape juice in the other, proclaiming in mellifluous tones, "In hoc signo vinces."

I agree that the President has been actuated by an honest endeavor to procure peace and a constitutional government in Mexico. The trouble, however, is that his ideals are too exalted to be realized. The great majority of her people are not fitted for constitutional government. There is too much of ignorance, too much of insatiable ambition, too much of rapine, too much of internal strife, too much of butchery. You might as well undertake to establish a Sunday school in hell as real constitutional government in Mexico by Mexicans. I had intended, Mr. President, to fully discuss the President's Mexican policy, but owing to present complications will refrain.

Now, what was his foreign policy at the time he read his message? We did not know; for, unlike other Presidents, he failed to tell. It is doubtful whether he himself knew. He declined to take us into his confidence. He gave no explanation for his own change of opinion. He gave no reason for the action he asked us to take. He only states that he desires it done in order to help him carry out a policy which he does not disclose. Whether we would have deemed that policy wise if we had known what it was we can not tell. We were simply asked to blindly trust him.

We were sent here by constituents who rely upon our loyalty and ability to decide for ourselves and to exercise independence, not to be dictated to by the Executive, but to act as we see it in the interests of the people and of the country. We were not sent here to implicitly obey the presidential mandate as to what laws we shall enact or repeal. This is not a one man's Government, but a Government of 100,000,000 of freemen.

Great Britain, when humored, has never been satisfied with less than complete submission to her will. Her whole history has been one of blood and conquest. She has assisted in the advance of civilization, but not for civilization's sake, only for conquest, and in so doing has covered her hands and conscience with innocent blood. She has never been our friend except as she believed it to be for her own advancement.

Her demands are not only without foundation, but are unjust and impudent as well. This is our canal, built with our own money, on our own soil. She will obtain more benefit from it than any other nation—indeed, more than all others combined—because of her immense merchant marine and the establishment of a new route to Australasia and her Asiatic possessions. She owes no obligation and assumes no responsibility connected with the canal. She denied us the right to engage in her coastwise trade, as we have denied her the right to engage in ours. This is our domestic affair as much as the navigation of our canals at the north or the navigation of the Mississippi. We agreed that the canal should be open to her and all other nations observing our rules on terms of entire equality, but we did not agree to waive our superior rights, much less to deny ourselves entire equality, and this we will do if we surrender our right to control our own property exclusively, which right is not only inherent but is specifically asserted in the treaty, and deprive our coastwise vessels of exemption, while all other vessels passing through the canal are subsidized.

The President in his message on the Mexican situation said:

> The people of Mexico are entitled to settle their own domestic affairs in their own way, and we sincerely desire to respect that right.

When I heard that utterance I wondered why a right should be so fully conceded to the people of Mexico which he was unwilling to concede to the people of the United States.

If we concede partially the demands of Great Britain now, we will be compelled to concede more, even to the extent of becoming involved with Panama as to the title to the canal. Besides, if we yield so readily to Great Britain we will be considered an easy mark by other nations and furnish them an incentive, aye, even an invitation, to demand concessions.

When the President saw the rising storm of the Nation's wrath he attempted to still it and at the same time obtain votes for the repeal by saying through the public press that the repeal of the exemption clause could not be regarded as an interpretation of the treaty, because it would be a legislative act, and that by such repeal the United States would merely show a disinclination to raise the question of discrimination, but does not by its act limit any future policy of the Government. Such a position, in my judgment, does not reflect credit upon the President's intelligence.

The majority of the committee now reports, in order to meet the views of the President and with the hope of preventing the defeat of the bill, this amendment:

> The passage of this act, or anything therein contained, shall not be construed as waiving, impairing, or affecting any rights possessed by the United States, under treaty or otherwise.

To say that the passage of the bill shall not be construed as a waiver or to affect any rights possessed by the United States, when it repeals an express assertion of right under the treaty, is self-contradictory.

A highwayman demands your pocketbook. You promptly surrender it, accompanied with a statement that your action is not to be construed as impairing or affecting your rights in any way.

Secretary Grey and Ambassador Bryce each suggested to Secretary Knox that the complaint of Great Britain as to free tolls could be removed by a repeal of the law. The repeal, in other words, is all that she seeks, and when that is accomplished Great Britain is satisfied to that extent. She cares nothing for the declaration in the amendment, because she knows that a declaration that we do not intend to surrender a right when we at the same time by repeal actually surrender that right is the merest moonshine.

But it will be said that hereafter we can pass another law providing for free tolls. If we repeal the present law, we will never enact a similar statute, because we have repealed it at the instance of Great Britain as well as the President of the United States, both of whom claim that it is a violation of the treaty. The passage of this bill is necessarily an interpretation of the treaty, because it is the response of Congress to the request of the President, who himself interpreted the treaty in his message.

Did he not in that message say to Congress that the exemption was "*in plain contravention of the treaty*"? Did he not thereby say that under the treaty we were not entitled to such an exemption? And did he not on this ground urge a repeal?

Now, if Congress complies with his request does it not say necessarily thereby that it agrees with the President that we are not entitled to the exemption and that the law is in plain contravention of the treaty? The United States by such action would not merely show a "disinclination to raise the question of discrimination"; it would, on the contrary, completely surrender its right to make such a discrimination. That surrender would be for all time, because if the United States should hereafter attempt to assert it, the act of Congress could and might well be pleaded in estoppel on the theory that other nations had changed their position and acted upon it.

If the United States is entitled to the exemption and that right has been properly asserted by Congress, why repeal the law? How does it happen that we have this question before us? Would we be considering it if the President had not made his request, based upon the assertion that the law "is in plain contravention of the treaty"?

Neither the purpose nor the effect of the amendment will deceive the American people. If the repealants conscientiously believe the law is wrong, why not boldly stand for its repeal? Why sugar coat the pill? The effect of the medicine will be just the same.

Much encouragement has been given the repealants on account of the statements of ex-Ambassador Choate and Chargé White. These gentlemen were located in London at the time the Hay-Pauncefote treaty was negotiated. Their letters to Senator MCCUMBER forcibly manifest their interest in the question at issue. Mr. Choate says, answering the Senator:

> I answer both these questions *most emphatically* in the affirmative. The phrase quoted "vessels of commerce and war of all nations" *certainly* included our own vessels and was so *understood* by our own State Department and by the foreign office of Great Britain. It was *understood* by the same parties that these words also included our vessels engaged in the coastwise trade.

It was not sufficient to say, "I answer both of your questions in the affirmative," but he deemed it necessary to add "*most emphatically*" in his answer concerning "vessels of commerce and war of all nations," and lest the earnestness of his answer might be questioned, he adds that the phrase "*certainly*" included our own vessels, and so forth. This sounds more like the statement of a deeply interested party than that of an ex-American ambassador. He then proceeds to tell the *understanding* at both the foreign and home offices. It might be ordinarily thought that one man could not be at two places 3,000 miles apart at the same time, but such a thought could not be entertained for a moment concerning this omnipresent individual. How could he know what was the *understanding* in the United States? Only by intuition or correspondence. Now, all the correspondence has been preserved, and if it is not shown by it that the understanding was derived by him from correspondence we must assume that he spoke from intuition or supposition; and even if his letters show that such was *his* opinion it must not be forgotten that the treaty as amended was ratified afterwards and its language must control in any event. Besides, his statements as to the "*understanding*" are not legal evidence. It may be he thought that as he so understood it no one should

be permitted to understand it otherwise. Not content with this statement, he proceeds to make an argument to sustain his *understanding*. If he had stated a fact, why bolster it up with an argument? Unfortunately his argument conflicts with his premises. He says:

When we came to the negotiation of the last treaty *there was no question* that as between the United States and Great Britain the canal should be open to their citizens and subjects on equal terms, and should also be open on like terms to the citizens and subjects of every other State that brought itself within the category prescribed. *On that point there was really nothing to discuss*, and in the whole course of the negotiations *there was never a suggestion on either side* that the words "the vessels of commerce and of war of all nations" meant anything different from the natural and obvious meaning of these words.

Now, if this be true, and it certainly must be, for Mr. Choate says it is, if there "was no question" about it, if "*there was really nothing to be discussed*," if "*there was never a suggestion on either side that the expression meant anything different from the natural and obvious meaning of the words*," pray how could Mr. Choate know what was the understanding except from his own construction by implication? It might with equal truthfulness be said on the other side that for the very reasons he gives such exemption was believed to exist. Continuing, he says:

Such language admitted of the exemption or exception of no particular kind of vessels of commerce and of war of any nation, whether of vessels engaged in foreign trade or coastwise trade—

And he adds in a sarcastic vein—

or of black or white vessels. * * * It is true that in many treaties there have been specific exceptions of vessels in the coastwise trade, and it would have been easy to insert it here. But nobody ever suggested that there should or could be such an exception or exemption inserted *by implication* in this treaty.

Now, Mr. Choate knew, or at any rate being a distinguished lawyer skilled in diplomacy and learned in treaty interpretation, as well as conversant with all the treaties between this country and Great Britain, should have known that our treaty of 1815 with Great Britain provided:

That no higher or other duties or charges shall be imposed in any of the ports of the United States on British *vessels* than those payable in the same ports by the *vessels* of the United States, nor in the ports of His Britannic Majesty's territories in Europe on the *vessels* of the United States than shall be payable in the same ports on British *vessels*.

He knew then that, notwithstanding this treaty did not exclude or exempt any vessel of any character, that for 86 years Great Britain had charged the United States on its vessels from four to six times as much as it charged on its own coastwise vessels, thus construing the treaty not to apply to her coastwise vessels, to which construction the United States never objected. He knew, too, that during the same period the United States had given the same construction to the treaty and had preferred her coastwise vessels as against the vessels of Great Britain. He knew, too, that the Supreme Court of the United States in Olsen *v.* Smith (195 U. S.) had construed the treaty and held that it did not apply to coastwise vessels.

In other words, he knew that both countries had so construed this treaty long before the negotiation of the Hay-Pauncefote treaty, of which construction it must be presumed the representatives of both countries had full knowledge and in making the present treaty must have considered the same. He knew, too, that there is no better settled principle of international law than that the intention of the contracting parties may generally be fairly and safely determined by instituting a comparison of the present treaty with treaties between the same parties whether prior, posterior, or contemporary concerning the same subject. (Phillimore's (English) International Law, 103.) And yet, notwithstanding all this, he makes the statement quoted, which is in direct conflict with the facts and rules of international law, as well as the decision of the Supreme Court of the United States and the long-continued construction of the treaty of 1815 by both countries. The words "vessels of commerce" were no more general that the word "vessels." For these very reasons there was no necessity for any specific exemption in the treaty, even if the United States comes within the expression "all nations."

Mr. Choate argues that five-sixths of the shipping of the United States is coastwise, and it is therefore inconceivable that we should have intended, without saying a word on the subject, to exempt approximately the entire shipping of the United States.

In the first place, he fails to recognize the fact that the small volume of our foreign shipping is due entirely to the advantage Great Britain has taken of our credulity and friendship by violating in spirit her treaties by the payment of large subsidies to her vessels.

But his assumption that approximately the entire coastwise shipping will pass through the canal is, as he knows, the grossest exaggeration. Only a small portion comparatively will go through the canal, as there are only 29 coastwise ships qualified to pass—more than 300 being prohibited from its use because owned by railroads.

He then expresses the hope that his statement will aid Senator McCUMBER in his argument for repeal. I have no doubt this hope was sincere.

Continuing, he says:

I have read, so far as accessible, the arguments made thus far in the House of Representatives on the pending question and have observed very little discussion of the question what the language of the treaty means, but the whole discussion seems to rest upon prejudice and the proposition that we ought not to submit to British dictation.

That the CONGRESSIONAL RECORD was "accessible" to him there can be no doubt, and in view of the numerous able speeches made in that body on the construction of the treaty his statement made March 31 is manifestly untrue.

Mr. White, who was the understudy of Mr. Choate, says:

That the exemption of our coastwise shipping from the payment of tolls was never suggested to nor by *anyone* connected with the negotiation of the treaties in this country or in England, and that the words "all nations" and "*equal terms*" were *understood* to refer to the United States as well as all other nations.

It will be observed that the words "*equal terms*" referred to by Mr. White are not in the treaty. How, then, could there have been an understanding concerning words not embraced in the treaty? Like Mr. Choate, he seems to have been ubiquitous. The statements of Choate and White conflict with those of Secretary Hay in his explanation of the history of the treaty sent to the Senate Committee on Foreign Relations at the time the present treaty was pending. He there says:

The United States *alone, as the sole owner of the Canal as a purely American enterprise, adopts and prescribes the rules by which the use of the canal shall be regulated* and assumes the entire responsibility and burden of enforcing, without the assistance of Great Britain or of any other nation, its absolute neutrality.

It was also believed—

Said Secretary Hay—

that this change would be in harmony with the national wish, that this great international waterway would not only *be constructed and owned, but exclusively controlled and managed by the United States.* * * *

The whole theory of the treaty is that the canal *is to be entirely an American canal.* * * * When constructed *it is to be exclusively the property of the United States, and it is to be managed, controlled, and defended by it.*

Referring to the history of the third clause in the first Hay-Pauncefote treaty, which was omitted from the present treaty—

The high contracting parties will, immediately upon the exchange of the ratifications of this convention, bring it to the notice of the other powers and invite them to accede to it—

And so forth, Mr. Hay says:

Thus the whole idea of contract right in the other powers is eliminated.

And so forth.

The distinguished Senator from Massachusetts, on the 17th day of July, 1912, said, in the Senate:

When I reported that treaty my own impression was that it left the United States in complete control of the tolls upon its own vessels. I did not suppose then that there was any limitation put upon our right to charge such tolls as we pleased upon our own vessels, or that we were included in the phrase "all nations."

Referring to the treaty in another portion of the same speech he said:

I was familiar with the work that was done upon it in London at the time it was concluded there and finally agreed to, and I was very familiar with it here. Although, as the Senator from Georgia correctly said, the question was not raised at that time, I personally have never had any doubt that the matter of fixing the tolls must necessarily be within our jurisdiction.

In view of all these statements, the representations of Mr. Choate and Mr. White as well are manifestly incorrect. Nor must it be forgotten that Mr. Choate is a leading member of the Peace Foundation and more than a year ago volunteered a speech in favor of Great Britain, which was printed and distributed by that organization. But the treaty itself clearly refutes their representations, and it is certainly the best evidence of what the agreement was. It is the solemn written contract between the parties, and in the absence of any charge of fraud or mistake its terms can not be varied by oral testimony. And we shall bear in mind that from the day it was ratified up to July, 1912, when Innes wrote to Secretary Knox—a period of 11 years—no attempt was made to construe the words "all nations" as including the United States.

We have been told by the learned Senator from Massachusetts [Mr. LODGE], for whom I have the greatest admiration and most profound respect, that with the beginning of 1909 the United States occupied a higher and stronger position among the nations of the earth and possessed a greater influence in international affairs than at any period of our history, but that this exalted position and commanding influence have been largely lost and the United States is now regarded by other nations with dis-

trust, and in some cases with dislike. Now, what nations distrust or dislike us? It is true that, so far as Colombia is concerned, she dislikes us—and why? We offered her fair terms in order that we might undertake the construction of a canal in which the civilized world was interested, and she refused to accept. Later, after Panama had seceded, we purchased the privilege from her and paid the consideration. If any blame attaches to this transaction, it attaches to Colombia, who, like the dog in the manger, while she would not and could not accomplish anything herself, refused to allow another nation to accomplish it.

Then, we have a controversy with Great Britain concerning tolls, and abrogated one of our treaties with Russia. I do not believe that Russia distrusts or dislikes us, for she peacefully seeks another treaty; nor do I see how Great Britain can distrust or dislike us, because we are conscientiously contending, as the Senator from Massachusetts believes, for our rights under a treaty.

I deny that we are distrusted or disliked by the nations of the world. On the contrary, I quite agree with Secretary Bryan that the United States occupies a proud position among the nations of the world. We can not afford nor should we be expected or called upon to purchase the good will of any nation by surrendering a well-grounded right. A purchased friendship can not be relied upon.

The Senator agrees that, under the treaty, Congress had the right to exempt our coastwise shipping, but because there is a difference of opinion among the people of the United States concerning that right he thinks the exemption should be repealed. When we consider how this difference of opinion, in a large degree, was brought about and how slight it is at best, comparatively speaking, I am unable to see why it should be made a controlling factor such as to induce any Member of this body to surrender his convictions and vote to deprive the people of the United States from exercising a great and important right.

The Senator says that the settlement of the matter is easy; that no one denies that under the treaty the United States can collect tolls from its coastwise ships and repay them. Conceding this to be true, why should we thus climb over the house in order to go through the garden gate?

But however fair and easy the Senator's solution of the trouble may seem to him, he is mistaken in saying that no one denies that such a course can be rightfuly pursued. Mr. Innes, in his letter of July 8, 1912, said:

> The proposal to exempt all American shipping from the payment of tolls would, in the opinion of His Majesty's Government, involve an infraction of the treaty, nor is there, in their opinion, any difference in principle between charging tolls only to refund them and remitting tolls altogether. The result is the same in either case, and the adoption of the alternative method of refunding the tolls in preference to that of remitting them, while perhaps complying with the letter of the treaty, would still contravene its spirit.

In other words, while Great Britain objects to the United States exercising this right, yet she will not send a single ship through the canal that will not have its tolls refunded or be given a subsidy direct.

If the United States is lacking in influence or standing to-day, it is not on account of the tolls question, but because of its weak, vacillating, and uncertain policy of "watchful waiting" with Mexico. If we abandon our sovereignty over the canal to Great Britain, all other nations will know that we did it with the purpose of purchasing immunity for a continuation of our "watchful waiting" policy under which we have accomplished nothing and under which there can be no peace.

In making the Clayton-Bulwer treaty the United States disregarded the Monroe doctrine, and this is the fruitful source of all of our woe. Great Britain had no rights in Central America that we were bound to respect, because in her attempt to acquire territorial rights she had deliberately violated the Monroe doctrine. The United States, in order to avoid strife, entered into the compact, thereby assuming an unnecessary burden.

That treaty became obsolete by reason of its violation by Great Britain; hence there was no necessity for us to enter with Great Britain into the Hay-Pauncefote treaty, but again, in the interest of peace and to prevent friction, we negotiated it.

Great Britain knew when the Clayton-Bulwer treaty was made that her trumped-up claims were without merit. Equally well, when the Hay-Pauncefote treaty was negotiated, she knew that we were under no obligations to enter into it and were treating with her merely to cultivate friendly feelings.

But these concessions have only emboldened her to make her present demands. Nothing so nerves the arm of a bully as to be impressed with the belief that he is feared by his adversary. Prior to the adoption of the Clayton-Bulwer treaty, from comparatively a short while after the discovery of America, the feasibility of the construction of the canal had been discussed without any substantial result. The first material advance, in my judgment, was made by the United States in negotiating a treaty with New Granada in 1846, by which New Granada guaranteed to the United States that the right of way or transit across the Isthmus of Panama upon any modes of communication that then existed or might thereafter be constructed should be open and free to the Government and citizens of the United States, guaranteeing also equality of tolls and exemption from import duties on merchandise shipped to New Granada for exportation beyond. In consideration of these privileges the United States guaranteed to New Granada the perfect neutrality of the Isthmus and the rights of sovereignty and property which New Granada had and possessed over the said territory.

Great Britain, seeing the purpose of the United States, and believing the most available route for the canal would be across Nicaragua, set to work to trump up some sort of claim in the territory through which it was supposed the canal would have to pass. For this purpose she claimed that there was a settlement of British subjects at the Belize, on the coast of Central America, which was of the most insignificant dimension and had no substance or form of territorial dominion. British woodcutters were there under an ancient Spanish license of timber cutting, and nothing more. She also undertook to establish a protectorate along the Mosquito Coast over a small tribe of Indian savages, which was so inconsequential as not even to have a name.

Under this insignificant plea Great Britain was anxious to be made a party to a treaty looking to the construction of the canal. At the time the Clayton-Bulwer treaty was negotiated neither the United States nor Great Britain had the slightest idea of constructing the canal. Their purpose and agreement was to afford protection to any person or persons who should undertake its construction. Neither of them agreed to expend a single dollar in its erection or for its maintenance.

As the Clayton-Bulwer treaty only had this object in view, it was agreed in article 1 that neither—

> the United States nor Great Britain will ever obtain or maintain for itself any exclusive control over the canal; that neither will erect or maintain any fortifications commanding the same or in its vicinity, or occupy or fortify, *or colonize*, or assume or exercise any domain over Nicaragua, Costa Rica, *the Mosquito Coast, or any part of Central America;* nor will either make use of any protection which either affords or may afford, or any alliance which either has or may have to or with any State or people for the purpose of erecting or maintaining any such fortifications, or of occupying, fortifying, or *colonizing* Nicaragua, Costa Rica, *the Mosquito Coast, or any part of Central America;* or of assuming or exercising dominion over the same—

And so forth. This was the basis of the treaty, and the canal to be constructed is specifically described in the preamble as—

> *between the Atlantic and Pacific Oceans by the way of the River San Juan de Nicaragua and either or both of the lakes of Nicaragua or Managua to any port or place on the Pacific Ocean.*

Article 2 provided, in case of war between the parties, the vessels of either traversing the canal were to be exempted from blockade, detention, or capture by either, and this protection was to extend from the two ends of the canal to such distance as thereafter should be found expedient.

Article 3 provided, that in the event the construction should be undertaken upon fair and equitable terms by parties having the authority of the local Governments through whose territory the same should pass, that such persons and their property used or to be used shall be protected from commencement to completion by both parties from unjust detention, confiscation, seizure, or any violence.

Article 4 provided, that the parties should use their influence with any State, States, or Governments possessing or claiming to possess jurisdiction or right over the territory which the canal should traverse to induce them to facilitate its construction in order to procure a free port at each end of the canal.

Article 5 binds the parties, when the canal is completed, to protect it from interruption, seizure, or unjust confiscation and to guarantee the neutrality thereof so that it should be forever open and free and *the capital invested therein secure.* Both Governments, or either of them, on six months' notice by one to the other, reserved the right to withdraw their or its protection or guarantee if both Governments, or either, should deem the persons managing the canal should adopt such traffic regulations as were contrary to the spirit or intention of the treaty by making unfair discrimination in favor of one of the contracting parties over the other, or should impose oppressive exactions or unreasonable tolls upon passengers, vessels, and so forth.

The sixth article provided, that the parties shall invite other nations to enter into stipulations with them similar to those entered into by them in order that such other States may share in the advantages of having contributed to the work; and, further, that each should enter into treaty stipulations with

such of the Central American States as they might deem advisable for the purpose of more effectually carrying out the design of the treaty, namely, that of constructing and maintaining the said canal as a ship communication between the two oceans on equal terms to all and protecting the same.

The seventh article merely provided that a preference may be extended to such persons or company as may first offer to commence the same.

Article 8 agrees to extend their protection *by treaty stipulations* (the stipulations not then being made) to any other practicable communication by canal or railway across the Isthmus connecting North and South America, it being understood that the parties constructing or owning same should impose no other charges or conditions of traffic than the United States and Great Britain should approve, and that said canal or railway should be open to the citizens and subjects of the two Governments on equal terms and to other nations who are willing to grant thereto similar protection.

These conditions were eminently wise and proper, because each Government was equally bound in all respects, and neither agreed to expend any sum in building the canal. Of course, neither party could erect fortifications on the canal, because the canal was to be built on foreign territory.

Concerning the reprehensible conduct of Great Britain connected with this treaty, President Pierce said, May 15, 1856:

> It was with surprise and regret that the United States learned * * * that a military expedition under the authority of the British Government had landed at San Juan del Norte, in the State of Nicaragua, and taken forcible possession of that port, the necessary terminus of any canal or railway across the Isthmus within the territory of Nicaragua.
>
> It did not diminish to us the unwelcomeness of this act on the part of Great Britain to find that she assumed to justify it on the ground of an alleged protectorship of a small and obscure band of uncivilized Indians, whose proper name had even become lost to history, who did not constitute a State capable of territorial sovereignty, either in fact or in right, and all political interest in whom and in the territory they occupied Great Britain had previously renounced by successive treaties with Spain when Spain was sovereign to the country and subsequently with independent Spanish America.

For 50 long years after this treaty was made, Great Britain did not take a single step to promote the construction of a canal. Her whole object in making the treaty was to hamper the United States, because she well knew that when completed the canal would not only largely advance the commerce of the United States, but in case of war overwhelmingly increase its power.

In the meanwhile she deliberately violated her solemn obligation in the treaty not to colonize or assume or exercise any domain over "*the Mosquito Coast or any part of Central America.*"

The Senate Committee on Foreign Relations, on January 10, 1891, called specific attention to violations of the treaty in a report unanimously agreed upon and signed by John Sherman, George F. Edmunds, William P. Frye, William M. Evarts, J. N. Dolph, John T. Morgan, Joseph E. Brown, H. B. Payne, and J. R. Eustis, certainly a most distinguished array of American statesmen.

In that report attention was directed to the conduct of Great Britain preceding the treaty as to the Belize and Mosquito Coast, which I have already referred to. Speaking of the conduct of Great Britain after the making of the Clayton-Bulwer treaty as to the violation of her agreement not to colonize, the report says:

> The next step taken after the convention of 1850 was in 1853, when a legislative assembly was constituted to manage the affairs of the settlement. This was followed by a convention between Great Britain and Guatemala in 1859 for the establishment of the boundaries between what the treaty chose to call "Her Britannic Majesty's settlement and possessions in the Bay of Honduras" and the territories of Guatemala, etc.
>
> By this treaty that which was before a licensed industrial establishment became instantly a possession of the British Crown. The settlement government continued until 1862, when the settlement was declared a colony of the British Crown and a regular colonial establishment was set on foot; and so from that time to this the form and substance of a regular colonial government as a part of Her Majesty's dominions has continued. It is understood that its geographical dominion has been vastly enlarged from the licensed woodcutting limitations and boundaries that existed in 1850. All this has taken place systematically and persistently, notwithstanding the declaration of Her Majesty's Government that it should not "colonize or assume or exercise any dominion over * * * the Mosquito Coast or any part of Central America." * * *
>
> In view of all these considerations the committee is of opinion that the United States is at present under no obligations, measured either by the terms of the convention, the principles of public law, or good morals, to refrain from promoting, in any way that it may deem best for its just interests, the construction of this canal, without regard to anything contained in the convention of 1850.

Considering the violation of the Clayton-Bulwer treaty which rendered it obsolete and the fact that material changes in the condition of affairs had taken place, it was neither the interest nor the purpose of this Government to be further bound. That we had the right to disregard the treaty is fully sustained by all international law writers and by every principle of right and justice.

The pretense in some quarters that Great Britain in entering into that treaty surrendered certain valuable rights which constituted a consideration on her part is ridiculous. She yielded nothing except a right of way over the territory she had acquired in violating both the treaty and the Monroe doctrine and her supposed ability to delay the enterprise until another treaty could be made. However, this concession, in view of the fact that the canal is constructed along another route, amounts to nothing.

Before the present treaty was ratified, however, and as part of the history leading up to its negotiation, it is proper to remark that President Grant had said:

> I commend an American canal on American soil for the American people.

President Hayes said, December 1, 1879:

> The policy of this country is a canal under American control. The United States can not consent to surrender their control to any European power. It is the right and duty of the United States to assert and maintain such supervision and authority over any interoceanic canal across the Isthmus that connects North and South America as will protect our national interests.
>
> It will be the great ocean thoroughfare between our Atlantic and Pacific shores and *virtually a part of the coast line of the United States.* Our merely commercial interest in it is greater than that of all other countries, while its relation to our power and prosperity as a nation, to our means of defense, our unity, peace, and safety, are matters of paramount concern to the people of the United States.

Later, President Harrison said, speaking of the canal:

> Our national policy now, more than ever, calls for its control by this Government.

In December, 1898, President McKinley said:

> That the construction of such a maritime highway is now more than ever indispensable to that intimate and ready intercommunication between our eastern and western seaboard demanded by the annexation of the Hawaiian Islands and the prospective expansion of our influence and commerce in the Pacific, and that our national policy now more imperatively than ever calls for its control by this Government, are propositions which I doubt not the Congress will duly appreciate and wisely act upon.

As stated, four Presidents—Grant, Hayes, Harrison, and McKinley—plainly stated the object, character, and purposes of the canal, among other things that it would form a part of the coast line of the United States, before the Hay-Pauncefote treaty was entered into. Not only so, but Secretary Blaine in a letter to Minister Lowell November 19, 1881, said:

> The Clayton-Bulwer treaty was made more than 30 years ago under exceptional and extraordinary conditions, *which have long since ceased to exist, conditions which were at best temporary in their nature and which can never be reproduced.*

Mr. Blaine objected to the "perpetuity" of the treaty on the ground (1) that it bound the United States not to use its military force in any precautionary measure, while it left the naval power of Great Britain perfectly free and unrestrained, ready at any moment of need to seize both ends of the canal and render its military occupation on land a matter entirely within the discretion of her "Majesty's Government"; (2) that it embodied "a misconception of the relative positions of Great Britain and the United States with respect to the interests of each Government in questions pertaining to this continent," and impeached "our right and long-established claim to priority"; (3) that it gave the same right through the canal to a warship bent upon an errand of destruction to the United States coasts, as to a vessel of the American Navy sailing for their defense, and that the United States *demanded* for its own defense the right to use only the same provision as Great Britain so emphatically employed in respect to the Suez route by the possession of strategic and fortified posts and otherwise for the defense of the British Empire; (4) that only by the supervision of the United States could the Isthmian Canal "be definitely and at all times secured against the interference and obstruction incident to war"; (5) that "a mere agreement of neutrality on paper between the great powers of Europe might prove ineffectual to preserve the canal in time of hostilities," and that if, in the event of a general European war, one of their naval powers should seize it, the United States might be obliged to enter upon a "defensive and protective war" in order to support her own commerce; (6) that while the European powers had often engaged with one another in war "in only a single instance in the past hundred years" had the United States "exchanged a hostile shot" with any of them, and that, as it is improbable that "for a hundred years to come" such an incident would be repeated, the "one conclusive mode" of preserving the neutrality of the canal was to place it under control of the United States as the Government "least likely to be engaged in war, and able in any and every event to enforce the guardianship which she shall assume"; (7) that since the treaty was made the number of French and German vessels frequenting the Cen-

tral American coasts had greatly and relatively increased; (8) that the expected aid in the construction of the canal from British capital, which the treaty was designed to secure, had not been realized, and that owing to the great development of the United States foreign capital could not in future enter as an essential factor into the determination of the problem. In conclusion Mr. Blaine said:

The following is a summary of the changes necessary to meet the views of this Government:

"1. Every part of the treaty which forbids the United States fortifying the canal and holding the political control of it in conjunction with the country in which it is located to be canceled.

"2. Every part of the treaty in which the parties agree to make no acquisition of territory in Central America to remain in full force. As an original proposition this Government would not admit that Great Britain and the United States should be put on the same basis, even negatively, with respect to territorial acquisition on the American continent, and would be unwilling to establish such a precedent without full explanation. But the treaty contains that provision with respect to Central America, and if the United States should seek its annulment it might give rise to erroneous and mischievous apprehensions among a people with whom this Government desires to be on the most friendly terms. * * * The acquisition of military and naval stations necessarily for the protection of the canal and voluntarily ceded to the United States by the Central American States not to be regarded as a violation of the provisions contained in the foregoing. * * *

"4. The clause in which the two governments agreed to make treaty stipulations for a joint protectorate of whatever railway or canal might be constructed at Tehuantepec or Panama has never been perfected. No treaty stipulations for the proposed end have been suggested by either party, although citizens of the United States long since constructed a railway at Panama and are now engaged in the same work at Tehuantepec. It is a fair presumption, in the judgment of the President, that this provision should be regarded as obsolete by the nonaction and common consent of the two governments.

"5. * * * In assuming as a necessity the political control of whatever canal or canals may be constructed across the Isthmus, the United States will act in entire harmony with the governments within whose territory the canals shall be located."

In the light of the foregoing declarations of Mr. Blaine and those of four Presidents of the United States, the present treaty was negotiated. Great Britain therefore was not and could not have been misled either as to the intention or claim of the United States.

By the Hay-Pauncefote treaty Great Britain conceded substantially everything embraced in the amendments made by the Senate to the first Hay-Pauncefote treaty and the changes made in the present treaty before its adoption, and Secretary Hay, who negotiated the treaty in a memorandum, which he sent to the Senate Committee on Foreign Relations, said:

The whole theory of the treaty is that the canal is to be *an entirely* American canal. * * * When constructed it is to be *exclusively the property of the United States,* and *is to be managed, controlled, and defended by it.*

And yet, despite all the foregoing facts and circumstances, it is contended that the United States was included in the expression "all nations observing these rules," and can not discriminate in favor of its own commerce. In other words, it is contended that the Hay-Pauncefote treaty gave England more than the Clayton-Bulwer treaty and relieved her at the same time of every liability under the Clayton-Bulwer treaty. The language of the treaty, however, is so plain that its meaning can be easily seen within its four corners.

Even the facts and circumstances which preceded the treaty, plainly as they point to its solution, need not be resorted to. The meaning is plain and simple.

Under the Clayton-Bulwer treaty the rules to be observed were jointly prescribed by the two powers, but under the present treaty the rules were made by the United States alone. When the Hay-Pauncefote treaty was made it was declared—

First. That the treaty should *supersede the Clayton-Bulwer treaty.*

Second. That the canal should be constructed under the auspices of the United States, either directly at its own cost or otherwise as stated.

Third. That subject to its provisions—not the provisions of the Clayton-Bulwer treaty—*the United States should have and enjoy all the rights incident to the construction, as well as the exclusive right of providing for the regulation and management of the canal.*

Before going further it is proper to add that Great Britain was relieved of every responsibility she assumed in the Clayton-Bulwer treaty. She had no responsibility in enforcing neutrality or in protecting the canal in any way. She simply stood forth with perfect freedom from any responsibility, and was not to furnish a single dollar to construct this mighty enterprise. She was even relieved from taking part in the making of rules. Besides, as the canal was not built on the Nicaraguan route, her concessions in the old treaty became valueless, and the only consideration the United States received was her consent that the old treaty should be superseded, which was not necessary, because by reason of her violation of the old treaty it had become a dead letter; and notwithstanding Great Britain was, without any consideration, relieved of every burden and every responsibility or liability, for which she really gave nothing in return, she now claims equal benefits with the United States, who assumed all expense and every burden.

The canal being the property of the United States, our Government alone adopted the rules and specifically set them out in the treaty. The United States said, in effect, "I built the canal and paid for it, but, notwithstanding, I will give all nations the right to use it on equal terms who observe my rules."

"1. The canal shall be free and open to the vessels of commerce and of war *of all nations observing these rules,* on terms of entire equality, so that there shall be no discrimination against any such nation, or its citizens or subjects, in respect of the conditions or charges of traffic or otherwise. Such conditions and charges of traffic shall be just and equitable."

The canal was already free and open to the vessels of the United States. It was not necessary, therefore, to declare that it should be free and open to them, and it is certainly ridiculous to suppose for an instant that the United States, which was sovereign, should make rules for herself. Neither can it be supposed that she should observe her own rules. Her only purpose was to make rules which, if observed, would allow all nations entire equality in the use of her own canal. Surely it can not be contended that the United States made rules which would compel her to make just and equitable charges of toll on her own commerce, for this she would certainly do. And yet the contention of the repealants lead to the ridiculous conclusion that the United States was so apprehensive lest it might charge too much on its own commerce it concluded to adopt rules to prevent such action.

Suppose I should establish a public park in Washington and adopt rules for its conduct and management, declaring that it shall be open on terms of entire equality to all who observe my rules, and that there shall be no discrimination against any in respect to the conditions or charges for its use. What sane man would contend that I embraced myself and could not enter or use my own park without paying the same charge as all others? Suppose I should say in my rules for the government of all the people that they should not enter the park on Sunday, would any man with a thimble full of brains contend that I could not enter my own park on that day?

As well said by ex-Secretary Olney and substantially reiterated by Secretary Knox:

The treaty is a contract by which the United States as owner and proprietor fixes the terms on which it grants the use of the canal to its customers, and hence it can not be contended with any reason that in fixing the use of its canal to its customers the United States regarded itself as one of its customers.

The position of Great Britain is amusing if it were not made with so much seriousness. During the Civil War a Union cavalryman, coming upon an infantryman sitting beneath the shade of a tree, asked, "Have you got airy dollar?" and being answered affirmatively, as he dismounted remarked, "I'll get right down and play you a game of 'seven-up' for who shall have it." His conception of equity is similar to that entertained by Great Britain. Talk about the United States violating the treaty! It is Great Britain who proposes to violate the treaty. She is notorious for violating treaties with the United States. She violated the treaty of Ghent, the treaty (1819) concerning the fisheries off the coast of Newfoundland and Labrador; she violated the Clayton-Bulwer treaty of 1850 and the treaty of Washington (1871).

In the course of this debate we have been cited to the wonderful liberality of England concerning our commerce in the Welland Canal and reminded how she released her hold on the United States, notwithstanding her treaty advantages. This grows out of the protest of Secretary Grey of November 14, 1912, in which he refers to the generosity of Great Britain in yielding to the United States.

In the treaty of Washington—article 27—proclaimed July 4, 1871, Great Britain agreed to urge upon Canada to secure the citizens of the United States the use of the Welland Canal on terms of equality with the inhabitants of Canada. But notwithstanding the treaty, prior to 1893 our wheat and grain paid a freight of 20 cents per ton through this canal, while the Canadian Government allowed a rebate of 18 cents per ton on wheat carried as far as Montreal, which gave the Canadian shipper a rate of only 2 cents a ton.

England having ignored our protest, on August 23, 1888, President Cleveland sent a vigorous message to Congress on the subject, but Great Britain continued her policy.

July 26, 1892, President Harrison approved the act to enforce reciprocal relations between the United States and Canada. On August 18 he issued a proclamation placing a toll of 20 cents per ton on freight passing through the St. Marys Falls Canal going to any Canadian port. On February 21, 1893, he withdrew

these tolls on assurance by Great Britain that our freight in the Welland Canal would be handled at Canadian rates. So it appears that Great Britain, instead of being generous, was forced to yield to our demands.

But let us pursue the language of the Hay-Pauncefote treaty a little further. It is stipulated that the canal shall be free and open to "the vessels of *commercé and of war* of all nations observing the rules." Can it be doubted that the canal is free and open to the "vessels of commerce and of war" of the United States aside from rules made by the United States? But what are the vessels of commerce of all nations? Surely, even if our rules apply to us, they do not embrace vessels engaged in our coastwise trade. For a hundred years both Great Britain and the United States have ruled that under the treaty of 1815 neither country can engage in the coastwise traffic of the other, and each can discriminate in favor of its coastwise trade as against the foreign commerce of the other, notwithstanding the treaty uses the word "vessels" without any qualification. Therefore the same construction must apply here to the general term "vessels of commerce," and hence the coastwise vessels of the United States are exempt.

But if we are to allow the construction of our adversaries, that the canal shall be free and open to the vessels of commerce of all nations, it follows that it must be open also to *the vessels of war* of all nations who observe the rules on terms of entire equality. I know it has been said by a Democratic Representative that no man but a fool would contend that the rule had anything to do with vessels of war of the United States. I quite agree with the distinguished commentator. And if such an interpretation is evidence of imbecility, it is equal evidence of imbecility to declare that the rule has any reference to the vessels of commerce of the United States. The two classes of vessels are specified in the same sentence and connected by the copulative conjunction "and." It can not be said that vessels of commerce of the United States are included and vessels of war excluded. I quite agree that neither are included. But if the United States vessels of war are included, then, as Mr. Sumner has said, "the ridiculosity of the proposition becomes palpably apparent." To say that the canal shall be free and open to the vessels of war of all nations upon terms of entire equality would be to deprive the canal of all importance as a defense for our country, and instead make it the active agent of its destruction. Not only so, if the rules we adopt apply to the United States, we will be compelled to pay toll every time one of our vessels of war passes through the canal. This rule applied to all foreign nations is reasonable, but the contention that it applies to the United States is the height of absurdity.

Again, if one of the six rules adopted applies to the United States, they all apply, for they are all enumerated under the expression, "The United States adopts * * * the following rules." Now, let us see where this construction will lead. It is provided:

> The canal shall never be blockaded, nor shall any right of war be exercised nor any act of hostility be committed within it.

If this applies to the United States, then we could not blockade the canal for our own safety, and could not send a vessel of war through it for our defense. Again, this rule is perfectly reasonable as to foreign nations, but unreasonable as to the United States.

Rule 3 provides:

> Vessels of war of a belligerent shall not revictual nor take any stores in the canal except so far as may be *strictly necessary;* and the transit through the canal shall be effected with the least possible delay—

And so forth.

If this rule applies to the United States and we should happen to be a belligerent we could not revictual nor take any stores in our own canal "except so far as may be *strictly* necessary." If we should take one biscuit more than necessary we would be open to the severest condemnation, and even if we took no more than was strictly necessary we would be compelled to eat as we ran in order that we might pass through the canal "with the least possible delay." It might be well enough to apply this rule to foreign vessels, but it would certainly be ridiculous to apply it to ours.

Rule 4 provides:

> No belligerent shall embark or disembark troops, munitions of war, or warlike materials, except in case of accidental hindrance of the transit, and in such case the transit shall be resumed with all possible dispatch.

This rule might well apply to foreign nations, but to apply it to the United States would seriously cripple our right of self-defense and place us more or less at the mercy of the nation with whom we were at war.

Rule 5 declares:

> The provisions of this article (3) shall apply to waters adjacent to the canal, within 3 miles of either end. Vessels of war of a belligerent shall not remain in such waters longer than 24 hours at any one time, except in case of distress, and in such case shall depart as soon as possible; but a vessel of war of one belligerent shall not depart within 24 hours from the departure of a vessel of war of the other belligerent.

If this rule applies to the United States when a belligerent, and we should deem it necessary to send out a vessel of war to await the coming of an enemy, if the enemy did not arrive within 24 hours, we would have to run back into the canal like a squirrel to its hole, and, after spending a short while, return; and if the enemy did not appear in the next 24 hours, we would have to run back again, and thus play hide and seek until the enemy appeared. And when he did appear, if we should engage him and he should attempt to depart, we could not follow him until we had waited for 24 hours, by which time pursuit would be idle. It is true we might remain more than 24 hours if we were in distress, and the only way in which we could remain longer would be to get in that condition.

I know that war terminates all treaties as between the countries at war. But when a treaty has been made by one nation with all the nations of the world that observes its rules, which rules govern it as well, under such treaty it can not blockade the canal, even in time of war, against the nations with which it is at peace.

I am aware it has been conceded by the British Government that the United States, being the sovereign charged with the protection of the canal, can exercise belligerent acts. But this concession only strengthens the position that, as the rules applying to a condition of belligerency do not govern the United States, none of the others apply, because they are all adopted together and are not subject to separation.

The sixth rule more forcibly, if possible, than the others demonstrates that the rules we have made do not apply to the United States. By its provisions——

> The plant, buildings, and all works necessary to the construction of the canal, * * * in time of war as in time of peace, shall enjoy complete immunity from attack or injury by belligerents and from acts calculated to impair their usefulness as part of the canal.

I dare say no Senator will be bold enough to contend that this rule applies to the United States, for if it does it would appear in case of belligerency that the United States, fearing it would attack or injure or do some act to impair the usefulness of its own canal, concluded to establish a rule in order to prevent such a terrible catastrophe.

So it is, as each rule is considered, the contention that it applies to the United States becomes more and more absurd, until we are absolutely amazed that sensible men should occupy such an untenable and nonsensical position.

The intention and plain interpretation of the treaty is that the United States, after building this majestic structure, threw it open to all nations that would observe its rules on terms of "entire equality," guaranteeing neutrality as between them in case of belligerency and agreeing that the charges for traffic should be just and equitable.

The United States being the owner of the canal, and under the plain and positive language of the treaty having "*all the rights incident to the construction,* as well as the *exclusive right of providing for its regulation and management,*" had the undoubted right as sovereign to make rules for its government, declaring that as to all nations that observed those rules the canal should be free and open on terms of entire equality. But it does not operate its own canal by virtue of any rules; it uses it as the owner. If its own right of use, like that of other nations, is made dependent upon its rules, and it should violate them, it would forfeit the right to use its own canal. Such an idea is monstrous and can not be entertained for a moment.

This is an international treaty, affecting only international affairs. National and domestic subjects are not included in its terms, for as to these every free and self-respecting nation exercises unlimited sovereign power. The surrender of this sovereign power can not be inferred, but must be expressed in the plainest and clearest terms, if indeed it can be surrendered, under any circumstances. Our coastwise traffic is exclusively domestic. Under our laws and treaties all nations are positively prohibited from engaging in it, and have been for a hundred years. Under that traffic we do not compete with any foreign nation. We are prohibited by treaty and laws from engaging in the coastwise traffic of every foreign nation. Every nation on the globe reserves this traffic as a purely domestic concern. The fact that our coastwise trade will pass through the canal does not alter or affect its character. It is confined to American ports and American vessels owned and controlled

by American citizens. Great Britain can not compete with us and has conceded through her representative, Innes, that "it may be" we have the right to exempt all bona fide coastwise vessels. This contention as to coastwise traffic is correct, even if the rules apply to the United States. But as these rules do not apply to the United States, it is at perfect liberty to exempt all its commerce of every character.

Not only was Great Britain released from responsibility and all protection of the canal, but the United States flatly refused to allow the insertion of article 3 of the first Hay-Pauncefote treaty binding her to bring the treaty to the notice of other powers and invite them to adhere to it. The memorandum of Secretary Hay shows this was done deliberately, the United States taking the position that the adoption of that article might be construed as making other powers parties to the contract and giving them contract rights in the canal, "which was *peculiarly an American affair.*" Besides, it is stated that none of these powers had anything to part with in consideration for the privilege.

Here again the absolute right of the United States to control was plainly manifested.

The provision requiring that other nations who obtained the benefits of the canal should observe the rules provided by the United States was inserted to meet the views of Lord Lansdowne, who thought if this should not be done other powers would have an advantage over Great Britain, who had bound herself to observe the rules, in that they would not be similarly bound. So it is Lansdowne agreed that the United States had authority to settle this matter and only asked equality of treatment as between *other countries and his own*, not as between his country and the United States.

In the first Hay-Pauncefote treaty the United States was prohibited from erecting fortifications. This was omitted from the second treaty, but it was provided that the United States should "be at liberty to maintain such military police along the canal as may be necessary to protect it against lawlessness and disorder." Afterwards when the United States undertook to fortify the canal, Great Britain made a feeble protest, but finally withdrew it. This again proves conclusively that five of the six rules provided by the United States were not regarded by Great Britain as having any control over or in any way appertaining to the action of the United States. If five or six rules did not include the United States in the expression "all nations," how can it be true that the remaining rule includes it? Either all or none have application to the United States as being embraced in the words "all nations." This concession as to five rules was rendered absolutely necessary by every principle of common sense, because an attempt to apply them led to a manifest absurdity. When fully considered, the application of the first rule is equally absurd, but this could not be conceded by Great Britain without surrendering her whole contention.

However, even if rule 1 does apply, it can not be held to embrace coastwise ships. The rule provides:

> There shall be no discrimination against any such nation or its subjects in respect of the conditions or charges of traffic or otherwise.

After the treaty of 1815 between the United States and Great Britain heretofore referred to, Congress passed a law providing for the exemption of coastwise steam vessels of the United States from the payment of pilotage charges. Promptly a British subject instituted suit, contending that this law was a violation of the treaty. In that case, Olsen *v.* Smith (195 U. S., 332), Justice White held that there was no merit in the contention; that the treaties had reference alone to ships engaged in the foreign trade, and did not apply to coastwise vessels. It will be observed there was no exception as to coastwise vessels in the treaty, though Great Britain had for nearly 100 years uniformly charged our foreign ships from three to six times more than her coastwise vessels.

Said the Supreme Court in the Olsen case:

> What we do or omit to do with regard to our coastwise trade is of no concern to any nation, for they can not complain with regard to a traffic in which they have no interest. No regulation, exemption, or privilege which we see fit to grant to our coastwise trade is a just subject of complaint, for it does not concern vessels engaged in the foreign trade.

This opinion was rendered more than 10 years ago, and has never been questioned or objected to by Great Britain.

The Hay-Pauncefote treaty does not apply to or in anywise affect coastwise vessels of either country, as they had been otherwise provided for both by treaty and statute. The language in the Hay-Pauncefote treaty is similar to that in the treaty of 1815. But it is said this is only a decision of an American court and can not govern Great Britain. This contention is without force, because the Supreme Court only recognized and reiterated the interpretation theretofore pursued by Great Britain for 90 years. Both countries having acted upon this construction must be held to have considered it applicable to the language employed in the present treaty, especially as there is no specific statement to the contrary. By instituting a comparison of a treaty in dispute with other treaties, whether prior, posterior, or contemporary upon the same subject between the same parties, the intention may generally be fairly and safely ascertained. (Phillimore's International Law, 103.)

But it is not necessary that we should refer to the treaty to ascertain our rights. Independent of the treaty, our rights are established by ownership, and we could not legally surrender them by treaty.

While Great Britain denies the right of the United States to exempt her coastwise or other vessels of commerce, nevertheless she agreed to the treaty negotiated with Colombia January 22, 1903, in which the United States guaranteed that Colombia should have the right to transport over the canal its vessels, troops, and munitions of war at all times free of charge. Now, how could the United States confer a right on Colombia which it did not possess and could not exercise for its own benefit? By agreeing to that treaty Great Britain in effect conceded the right of the United States to free vessels both of commerce and war. It can not be contended that the consent of Great Britain conferred any right to make the treaty, for the United States under the treaty was conceded all rights incident to the construction of the canal as well as the exclusive right of providing for its regulation and management. Great Britain had no more right than any other nation observing the rules. The whole effect of the act of Great Britain was to concede to the United States the power to confer such rights on Colombia.

On November 18, 1903, only 10 months after the treaty with Colombia, which was not ratified, Panama, having seceded from Colombia and been recognized by Great Britain, made a similar treaty with the United States, except that she granted territory, in which it was agreed that she should have substantially the same toll rights theretofore given Colombia. Great Britain, having full knowledge of this transaction, never made any objection until November 14, 1912, twelve years after the treaty was proclaimed, when Secretary Grey entered his objection in his letter to Secretary Knox—although Chargé Innes, July 8, 1912, made no complaint—to the granting of free tolls to Panama.

I have said, and I repeat it, that the objection to granting free tolls to Panama involves our title to the territory where the canal has been constructed. That grant was a part of the consideration to Panama for the territory. If we can not guarantee the rights conferred on Panama the treaty is in peril. For 12 long years after the treaty was proclaimed Great Britain remained silent. She saw hospitals crowded with the victims of yellow fever; she witnessed the death of hundreds of Americans engaged in that great and perilous construction; she saw the removal of mountains and the erection of locks involving enormous expense, and never raised her voice, for she knew that on account of her immense merchant marine she would obtain as much benefit from the canal as the whole world beside. But when she saw that the canal was almost completed, and when every other nation was rejoicing, she, and she alone, raised her voice in solemn protest. She misled the United States by reason of her silence and she misled the United States by reason of her consent that the same privileges should be accorded to Colombia. Morally, if not legally, she is by reason of her conduct estopped from all complaint. Having failed to speak when she should have spoken, equity and good conscience require that she should now remain silent.

The Republic of Panama made an exceedingly valuable concession, many millions of times more valuable than the chips and whetstones conceded by Great Britain, a concession that no other nation in the world could make, accepting certain compensation and privileges therefor, by reason of which she was entitled to preference over every other nation by every principle of international law, a principle recognized by Great Britain herself concerning our treaty with the Hawaiian Islands.

In 1876 the United States entered into a treaty with Hawaii by the terms of which mutual trade concessions were made. Before that treaty Great Britain and Hawaii made a treaty containing the most-favored-nation clause. Notwithstanding this, Great Britain admitted, using her own language:

> As the advantages conceded the United States are expressly stated to be given in consideration as an equivalent for certain reciprocal concessions on the part of the United States, Great Britain can not, as a matter of right, claim the same advantage for her trade under the strict letter of the treaty of 1851.

Our adversaries lay great stress on the expression in the preamble of the treaty, "without impairing the general principle of neutralization established in article 8 of that convention" (meaning the Clayton-Bulwer treaty).

This expression does not directly or indirectly confer rights on Great Britain equal to those possessed by the United States. It simply means, as shown by the treaty itself, that the United States, in case of war, will not allow the canal to be used by one belligerent foreign nation to the detriment of any other. Of course it does not mean that the United States will preserve the neutrality of the canal against itself in case of war or otherwise. The word "neutral" implies the existence of no less than three parties, for the United States as one party could not preserve the neutrality of the canal except as between two belligerent parties.

It is contended that the term "general principle of neutralization" includes all regulations of traffic. This contention is without merit. It means freedom from attack, and nothing more. In Moore's International Law Digest "neutralization" is defined:

Strictly speaking, the term "neutralization," when applied to a canal, refers to a condition under which the canal would be closed to the ships of war of belligerents. The term, however, has come to be used in a broader sense than this, so as to include an arrangement whereby protection is sought to be guaranteed against hostile attack or hostile interruption, while the same freedom of use is sought to be assured in war as in peace.

Those who favor the repeal universally resort to article 8 of the Clayton-Bulwer treaty and argue that the canal is "open to the citizens and subjects of the United States and Great Britain on equal terms."

In the first place, they forget that article 1 of the present treaty specifically provides that "*the present treaty shall supersede*" the Clayton-Bulwer treaty.

There is absolutely no part of the old treaty left in force. To supersede means "to set aside," "to render useless." In other words, the Clayton-Bulwer treaty was rendered useless and was set aside by the new convention.

But we are told it is revived as to article 8 by the statement in the present treaty that it is adopted "without impairing the 'general principle' of neutralization established in article 8." The "*general principle*" is not impaired, it is true, but the particular characteristics of the article are destroyed. When we examine the facts and circumstances connected with and expressed in article 8 it becomes manifest that only "the *general* principle" is not impaired. By reference to that article it will be seen in the first place that it provided—

They hereby agree to extend their protection *by treaty stipulation* to any other practical communications—

And so forth.

They did not agree to extend their protection *then*, or the words "by treaty stipulation" would not have been used. They would have been entirely superfluous. But waiving this, they agreed then and there to so extend their *joint* protection to any other practical route. No one will contend that in the new treaty Great Britain extended its joint or separate protection to any route.

Again in that article it was declared to be *jointly* understood by the *two Governments* that—

The parties constructing or owning the same should impose no other charges or conditions of traffic thereupon than the aforesaid *Governments* shall approve of as just and equitable; and that the same canals or railways, being open to the citizens and subjects of the United States and Great Britain on equal terms, shall be open on like terms to the citizens and subjects of every other State which is willing *to grant thereto such protection* as the United States and Great Britain engage to afford.

Now, as has been said, in the first place, it is apparent at that time that it was not contemplated that either the United States or Great Britain should construct the canal, for they bound themselves to protect the parties who constructed or owned it, and all other nations, in order to enjoy equality, were to grant similar protection. Under the old treaty Great Britain bound herself to protect, while under the present treaty she does not bind herself to protect. Under the old treaty neither the United States nor Great Britain was to construct the canal; under the present treaty the United States alone is charged with that responsibility. Under the old treaty the charges were to be approved by *both* Governments; under the new treaty the United States *alone* fixes the charges, agreeing that they shall be just and equitable. Under the old treaty the rules for the government of the canal were made *jointly* by the two countries; under the present treaty the United States *alone* makes these rules.

In other words, the joint enterprise of 1850 became the single enterprise of 1901. The conditions and considerations being changed, the obligation is necessarily changed. The language of the present treaty makes it perfectly plain, not that the rules governing the Suez Canal are to govern the Panama Canal, but the language is specific that the "United States, as the basis for the neutralization of the said canal, *adopts the following rules*, substantially as embodied in the convention of Constantinople for free navigation of the Suez Canal; *that is to say*," and so forth.

The rules are then set forth fully and with perfect clearness. By "substantially" is meant the substance of the rules as applicable to the difference in circumstances and conditions surrounding the two canals. Hence, to make everything certain, *the rules are themselves inserted* in the treaty, and hence we are relieved of any consideration of the old treaty in order to determine them. It is unnecessary to theorize as to what the rules are, because they are described as the "*following rules*" and then specifically set out. To say that Great Britain, who was entitled to equal treatment with the United States under the Clayton-Bulwer treaty, now that she is relieved of every burden expressed in that treaty, in consideration of which she was to have this privilege, while she escapes the burdens is to retain the privileges is ridiculous. The consideration having failed the privilege granted by reason thereof necessarily fails. To say that Great Britain, who was to have equal privileges with the United States in a canal to be built by *third persons*, now that the United States agrees to build the canal or have it built, is to retain the privilege is outside the realm of reason. Again, the consideration having failed, all equality fails, for there can not be benefits where there are no burdens.

It is plain that the neutralization referred to in article 8 of the Clayton-Bulwer treaty is the freedom which flows from *joint* protection and *joint* responsibility, for if the United States and Great Britain, together with the other nations, extend protection, such protection conclusively establishes the neutrality of the canal as among them.

When the present treaty was sent to the Senate it was accompanied by a carefully prepared statement of Secretary Hay showing all that occurred during its negotiation, including all amendments proposed and considered after the action of the Senate on the first Hay-Pauncefote treaty, which Great Britain declined to accept.

This statement fails to show, either directly or indirectly, that there was any contention during all that time that the principle of neutrality contained in the present treaty applied to the equal treatment or equality of rates with Great Britain. On the contrary, it shows that every mention of neutralization had reference to a state of belligerency.

Great Britain was largely induced to agree to the present treaty—

Says Secretary Hay—

because she was relieved entirely from the making of rules for neutralization, from the enforcing of neutrality, and the maintenance of the security of the canal.

To this may be added she was relieved from all expense.

The contention of Secretary Grey in his protest was a mere afterthought, as by including in neutralization the fixing of equality of rates, and so forth, he hoped to hinge a claim that the United States could have no preference concerning her own commerce.

Lord Lansdowne, in his memorandum submitted August 3, 1901, showing that he fully understood the meaning of the term "substantially" as used in the description of the rules adopted, in speaking of the rules for neutralization, said:

In form the new draft differs from the convention of 1900, under which the high contracting parties, after agreeing that the canal might be constructed by the United States, undertook to adopt certain rules as the basis upon which the canal was to be neutralized. In the new draft the United States intimate their readiness "to adopt" *somewhat similar rules* as the basis of the neutralization of the canal. It would appear to follow that the whole responsibility for upholding these rules and thereby maintaining the neutrality of the canal would henceforward be assumed by the Government of the United States.

Again he says:

The change of form is an important one; but in view of the fact that the whole cost of the construction of the canal is to be borne by that Government, which is also to be charged with such measures as may be necessary to protect it against lawlessness and disorder, his Majesty's Government is not likely to object to it.

I have nowhere seen a more comprehensive definition of the word "neutralization" as used in the treaty than in a very able address delivered by the junior Senator from Arkansas [Mr. ROBINSON] before the Michigan State Bar Association, July, 1913. Said he:

This term has an accepted meaning in international law. It relates to a state of war The rules of the treaty are therefore applicable in case of war and in nowise control the operation of the canal in time of peace. They are designed to secure in spite of conflicts the uninterrupted use of this canal, to preserve it from seizure or destruction—the obligation to maintain neutrality imposed by the treaty on the United States implies its right to do the very things forbidden by the rule to other nations—to blockade the canal, to embark and disembark troops, and to take munitions of war; to blockade the canal against the warships of any belligerent seeking to occupy the canal for naval purposes. * * *

The rules of neutralization do not establish the theory of identical tolls, but they do deny any nation at war with another the right to use the canal for offensive purposes or to the exclusion of others.

But suppose we admit for sake of argument that the principles of neutralization apply to identical tolls. That would by no means apply to the United States, for she is making rules for the government of her own canal as to all nations observing those rules and not for the government of herself.

Adopting, however, the construction contemplated by the repealants, that the United States is governed by the rules she has made for the government of others, then it follows that the canal shall be free and open to the vessels of commerce and of war of the United States *on terms of entire equality*, so that there shall be no discrimination against it or its citizens in respect to the conditions or charges of traffic, *or otherwise*. Now, if this be true, how can it be open on terms of entire equality to the United States, which notoriously refuses to grant subsidies to her ships, if the ships of the world which are subsidized are to be allowed to use the canal on terms of equality with her? How can their use under such circumstances be on entire equality with hers? How can her ships without exemption be placed on entire equality with those of Great Britain, who pays subsidies annually of more than $9,000,000? How can the United States compete with these subsidized ships? There is but one way in which this competition can be met, but one way in which we can be placed on terms of entire equality and that is by exempting our vessels from tolls; and if the construction contended for is correct it necessarily gives us a perfect right to exempt our vessels from the payment of tolls in order that we may have this entire equality. It can not for a moment be supposed that the United States is to be the only country on earth that shall pass its unsubsidized ships through the canal in competition with the subsidized vessels of the world. If this be true, then our commerce will be completely eliminated from the canal, in and about which we have paid $400,000,000. All our citizens can do will be to sit on the banks and witness the flags of all nations save their own floating in triumph over the canal. Truly an uninspiring picture to an American.

Mr. Chamberlain, United States Commissioner of Navigation, recently stated before the Interoceanic Committee that we have only 363 coastwise vessels of sufficient tonnage to use the canal, and that according to his information 92 per cent of these are owned or controlled by railroads, and hence are prohibited from using the canal. So that we have only 29 coastwise ships to use in the canal. He further stated that to compel our coastwise vessels to pay toll through the canal would mean ruin for them unless subsidized. And yet the repealants would deny exemptions, knowing that subsidies will not be granted to our coastwise vessels. Even if we are allowed the exemption we will not be placed upon entire equality with Great Britain and other nations. More than one-half of the commerce passing over the canal will be British commerce. It is estimated that it will require a large sum yearly for the upkeep of the canal and that for some time at least our annual deficit will amount to $7,000,000. This being true, one-half of that amount will be expended for the benefit of Great Britain, who will receive at least one-half the benefits.

And if we are to be governed by terms of entire equality, even aside from what I have said, how could such equality exist unless all nations of the earth should share equally with us the total cost of this stupendous construction and its annual upkeep?

Concerning the remission of tolls as against subsidized ships, President Taft in his message of December, 1911, said:

> I am confident that the United States has the power to relieve from the payment of tolls any part of our shipping that Congress deems wise. We own the canal; it was our money that built it. We have the right to charge tolls for its use. These tolls must be the same to everyone, but when we are dealing with our own ships the practice of many Governments in subsidizing their own merchant vessels is so well established in general that a subsidy equal to the tolls can not be held to be a discrimination in the use of the canal. The practice in the Suez Canal makes this clear.

So that whether the United States is or not included in the expression "all nations" the exemption of coastwise vessels is justified.

Four Presidents of the United States before the Hay-Pauncefote treaty was made distinctly said, in substance, that the canal was to be an American canal built and controlled by the United States.

After the treaty was adopted two other Presidents gave their construction of its meaning.

Mr. Roosevelt has spoken repeatedly, but for the sake of brevity I refer only to the following:

> I believe the position of the United States is proper as regards coastwise traffic. I think we have the right to free bona fide coastwise traffic from tolls. I think this does not interfere with the rights of any other nation, because no ships but our own can engage in coastwise traffic. There is no discrimination against other ships when we relieve the coastwise trade from tolls. I believe the only damage that would be done is the damage to the Canadian Pacific Railway. * * * I do not think it sits well on the representatives of any foreign nation * * * to make any plea in reference to what we do with our own coastwise traffic.

In another message to Congress President Taft said:

> After full examination of the Hay-Pauncefote treaty and of the treaty which preceded it, I feel confident that the exemption of the coastwise vessels of the United States from tolls and the imposition of tolls on the vessels of all nations engaged in the foreign trade is not a violation of the Hay-Pauncefote treaty.

Again, in a memorandum submitted to Congress at the time he approved the bill exempting coastwise vessels from the payment of tolls, after setting out the rules adopted by the United States in the treaty, he said:

> Thus it is seen that the rules are but a basis of neutralization intended to effect the neutrality which the United States was willing should be the character of the canal and not intended to limit or hamper the United States in its sovereign power to deal with its own commerce, using its own canal in whatever manner it saw fit.

These utterances are in full accord with the statements of Secretary Knox and the public utterances of Stimson, Secretary of War, and Nagel, Secretary of Commerce and Labor.

Our course in exempting coastwise vessels has been approved by six Presidents; impliedly by the Supreme Court of the United States; by three Secretaries of State; by the governors of a number of States; by ex-Secretary of State Olney; by ex-Attorney General Bonaparte; by Hon. Frank Fuille, law officer of the Isthmian Canal Commission; by Hon. Hannis Taylor and other distinguished writers on international law; by a number of the great judges of Federal and State courts; by a large majority of leading statesmen and publicists in this country and a considerable number abroad; indirectly by Mr. Innes, head of the British legation; by a majority of both Houses of Congress in enacting the law; by the three leading political parties in their platforms in 1912; by the recorded votes of 14,000,000 American freemen; and by President Wilson while a candidate for President.

But if the repealants are correct in their contention it follows that the treaty-making power surrendered the right of sovereignty of the United States to control her domestic concerns, surrendered the welfare of her people, and endangered the safety and materially injured, if not destroyed, her commerce, those who negotiated and ratified it under the law of nations not only acted beyond their authority but betrayed their country, and consequently the treaty is utterly void.

In Vattel's Law of Nations, section 160, the rule is laid down:

> Since in the formation of every treaty the contracting party must be vested with sufficient powers for the purpose, a treaty pernicious to the state is null and not at all obligatory, as no conductor of a nation has the power to enter into engagements to do such things as are capable of destroying the state, whose safety the government has intrusted to him. The nation itself, being necessarily obligated to perform everything required for its preservation and safety (book 1, sec. 16, etc.), can not enter into engagements contrary to its indispensable obligations.

Heffter (German writer), in his work on International Law, lays down the rule that a state may repudiate a treaty "when it conflicts with the rights and welfare of the people." (98.)

Hautefeuille (French writer) declares:

> A treaty containing the gratuitous cession or abandonment of an essential natural right * * * is not obligatory. (109.)

Bluntschli (German writer) expresses the opinion:

> A State may hold treaties incompatible with its development to be null and void. 455–456. (See Hall's International Law (English), 374, citing the three foregoing authorities with approval.)

Woolsey's International Law declares:

> When a treaty-making power flagitiously sacrifices the interest of the nation it represents such treaty has no binding force. The treacherous act of the government can not be justly regarded as the act of the nation and forms should give way to reality. Moreover, the other party to the treaty ought not to draw advantage from the iniquity of an agent whom it has itself tempted. (Sec. 101–104.)

And last, though by no means least, our own Hannis Taylor, whose great work on international law is recognized as a leading authority throughout the world, fully sustains the principles enunciated in the authorities cited.

We are flippantly, at times almost insultingly, told that our objection to repeal is in the interest of the coastwise ship monopoly, and on this groundless assumption we are arraigned by our adversaries. The question has been asked, "Will we hide behind the flag while we burglarize the American Treasury for the benefit of the coastwise shipping interest?" Even if the charge were true, it is better by far that we should favor a monopoly to our own people than to grant a monpoly to Great Britain with her subsidized ships, the transcontinental railroads of Canada, and the English-owned railroad of Lord Cowdray in Mexico. But the charge is absolutely and manifestly false. I will retort, "Shall we hide behind what we are pleased to call the honor of our country in order to rob the American people for the benefit of the transcontinental and ship-owning railroads and Great Britain?" It is an old game, as old

as time, that in order to accomplish unfair designs and prevent suspicion the guilty party should call the other "thief" first. Great Britain proceeded upon this theory when she charged us with violating the treaty, and some of her friends in Congress have proceeded on the same theory when they charge us with acting in the interest of a monopoly. But the people of the United States can not be deceived by this fallacious accusation. They know that in the law granting free tolls to our coastwise ships there is a clause prohibiting all trust and railroad owned ships from passing through the canal.

The proof before the Interoceanic Committee shows that the transcontinental and other railroads protested against the exemption, and proof before the Lobby Investigating Committee shows that the railroads spent a considerable sum of money in the employment of a lobbyist to prevent the incorporation in the law of the provision to prevent ships owned or operated by any railroad, or in which any railroad may have a direct or indirect interest, from competing with traffic through the canal.

But this is not all. The Tehuantepec Railroad, crossing Mexico south of Mexico City, connects Puerto Mexico, on the Gulf or Atlantic side, with Salina Cruz, on the Pacific, and is 190 miles long. It was built under contract with the Mexican Government by S. Pearson & Son, under the personal direction of Sir Weetman Pearson, alias Lord Cowdray, of England. The Mexican Government paid for the building and Sir Weetman negotiated the Mexican bonds. The road, with both the harbor improvements, cost $65,000,000.

After the road was completed in 1902, Sir Weetman, alias Lord Cowdray, took it over upon a contract with the Diaz government for 51 years, Mexico retaining only the right of inspection. Otherwise the property belongs completely to Lord Cowdray for that period. So it appears that this is essentially a British road.

The exemption of our coastwise vessels from the payment of tolls through the canal will destroy the usefulness of this road.

The American-Hawaiian Steamship Co. is almost its sole customer. It clears its ships in New York for Puerto Mexico. There it unloads, and freights its cargoes over the Salina course by way of Lord Cowdray's railroad. It charges $12 a ton freight from New York to Honolulu, and vice versa. Of this amount it pays Cowdray's road $4 on each ton.

In 1911 it carried 788,820 tons, all of which save 90,000 was American coastwise traffic. All these facts appear in the testimony of Mr. Dearborn, president of the road, before the House committee.

The contract between the railroad and the steamship company terminates with the opening of the canal, the result of which will be a yearly loss to the road of $2,952,280.

President Dearborn explained further that the steamship company would save 12 days now lost in unloading, reloading, and crossing from ocean to ocean.

Lord Cowdray is the English oil king. He owns the Tampico oil fields, in addition to an equal interest with Sir Lionel Carden in those lying near his road. Great Britain is now turning her battleships into oil burners, and depends on Cowdray for the oil to operate them. Doubtless the foregoing facts, among others, caused Great Britain to so quickly recognize Huerta's government. The great interest of Great Britain in protecting her subjects, and incidentally herself, by defeating coastwise-ship exemption is therefore apparent in Mexico. This, connected with the protection of the commerce of the transcontinental railroads of Canada, shows the gigantic British interests that are at stake.

These great interests are warring on our commerce simply because they know that their monopoly will be destroyed by toll exemption of coastwise vessels and the inhibition on trust and railroad owned ships from using the canal. So that instead of the friends of free toll fighting for monopoly, the shoe appears to be on the other foot. The interest of 29 coastwise vessels pales into utter insignificance when contrasted with that of the transcontinental and shipowning railroads and the English-owned Mexican railroad. These great monopolies will be fostered and fattened by denying exemption to the coastwise vessels of the United States.

Much has been said concerning the Suez Canal. It is unfortunate, considering her conduct, that Great Britain should even refer to that subject.

It is claimed for Great Britain that she only asks the United States to accord the same treatment in the Panama Canal that she accords in Suez. This is untrue. While it is true the rules of the convention of Constantinople apply to all vessels in time of war or peace without distinction of flags, "the rights of Turkey as the territorial power," together with the sovereign rights of the Sultan and the rights and immunities of the Khedive, are reserved. Nor must it be forgotten that Great Britain, who now so earnestly pleads for neutralization, is not bound to that principle in Suez. When the powers interested met in London in 1885, Sir Julian Pauncefote submitted this memorandum defining the British position:

> The British delegates in presenting this draft of a treaty as the definite regulation intended to guarantee the free use of the Suez Canal, think it their duty to formulate a general reservation as to the application of these provisions in so far as they may not be compatible with the transitory and exceptional condition of things actually existing in Egypt, and may limit the freedom of action by their government during the period of the occupation of Egypt by the forces of Her Britannic Majesty.

Nothing being accomplished at that meeting in 1887 a new draft of a convention was signed at Paris by Great Britain and France, subject to the concurrence of other powers interested. This draft was submitted to the other powers by Lord Saulsbury, accompanied with a note containing the reservation made by Sir Julian Pauncefote as above set out and was signed by the representatives of Great Britain, Germany, Austro-Hungary, Spain, France, Italy, the Netherlands, Russia, and Turkey, subject to the reservation. All the powers named except Great Britain are bound to respect the neutrality of the canal and to guarantee its free use by the ships of commerce and of war of all nations at all times.

As long as Great Britain occupies Egypt, whenever she concludes that it is to her interest to disregard this convention and utilize the canal for purposes of war she is at liberty to do so. She may exclude belligerent ships and close the canal to all commerce, as did Sir Garnet Wolseley in 1882.

The same man—Pauncefote—who thus procured a free hand for Great Britain in the Suez Canal, signed the treaty which it is claimed binds our country to do at Panama what Great Britain refused to do at Suez. Great Britain induced the powers to respect the neutrality of the Suez Canal, although she refused to do it; and now she contends that the United States is bound to guarantee the neutrality of the Panama Canal and give her equal rights of passage through it for all her ships.

But for a moment I call your attention to the dastardly conduct of Great Britain concerning the Suez Canal.

Prior to the opening of that canal the Mediterranean was a closed sea and all the commerce on it from the Far East was carried under the flags of Great Britain and Holland.

When De Lesseps was engaged in constructing the canal for a corporation, Great Britain, seeing that when completed it would admit other nations as competitors to her commerce, through Lord Palmerston placed every obstacle in the way of De Lesseps. He induced Said Pasha to withdraw 20,000 laborers from the canal and engage them in raising cotton. Of course this action delayed the construction of the canal.

However, in 1867, despite all difficulties, the canal was completed. Great Britain at once determined to obtain control of it, and Disraeli inaugurated the necessary steps to accomplish that end. He took advantage of the strained financial condition of Ismail Pasha, who had forced the Khedive to buy a sufficient number of shares in the canal company to give Egypt a certain control in the management, and bought these shares for Great Britain.

Great Britain, in order to accomplish her object, after the completion of the canal, proceeded to make herself its mistress. She fortified Gibraltar, Malta, and Cyprus, on the Mediterranean side of the canal, and at the outlet of the Red Sea she acquired the island of Perim, which she fortified. Having obtained these positions of vantage, she proceeded to occupy Egypt.

Notwithstanding these steps of aggression, Great Britain then professed that she would observe the principle of neutrality regarding the canal, but later, as we have seen, she made her occupation of Egypt the excuse for the reservation made by Pauncefote.

When Arabi Pasha revolted in 1882 he declared he would not violate the neutrality of the canal except at the last extremity, and only in case of some act of English hostility at some point of the canal.

Great Britain, always on the alert, saw her opportunity, and, on the pretense of her ownership of stock in the canal, but really for the purpose of obtaining full control, in August, 1882, forcibly took possession of the canal, tied up shipping at the gates or passing places, and put a gunboat at each end.

Rear Admiral Goodrich, of the United States Navy, reported these facts to his Government with a statement that he had "protested against this act of violence and spoliation."

Great Britain refuses to be bound by the rules which she seeks to make applicable to other nations, "but acts always and

everywhere consistent with the fundamental principles of her foreign policy, seizes whatever she can, holds all she has, and proclaims loudly her desire to preserve equal rights and to distribute the benefits of her Christian civilization."

In order to incite the interior of the country against free tolls it is contended that the exemption of coastwise vessels will not benefit the people except along the coasts.

If the producers of cotton in the interior of Texas and in other Southern States will have a new and cheaper outlet for their cotton, if the farmers of the Central West will have another and cheaper route over rivers connecting with the canal or otherwise by which to ship their grain, cattle, and manufactured articles and will be enabled to obtain articles at much cheaper rates from distant States of the Union than they can by rail, how can it be said that they will not be benefited?

A distinguished Representative said:

When you say that if you reduce the freight rates on the coast the rates in the interior will not be reduced, you might as well say that if you reduce the level of the water along the edges of a great lake that the interior of the lake will not be reduced.

So that while trade will continue between the coasts the people of the Middle West will get lower rates and new markets.

He gives an apt illustration of the coast trade. Canned salmon is one of the large industries along the Pacific coast, amounting to $30,000,000 last year. It can be shipped through the canal to New Orleans, thence up the Mississippi to St. Louis cheaper than by rail. Such a shipment can be made much cheaper through the canal and will result in material good to the consumer.

Recently an experimental shipment of barley was made from San Francisco to St. Louis by way of Panama. First by ship to Panama, thence by rail across the Isthmus to Colon, thence by ship to New Orleans, thence by barge up the Mississippi to St. Louis. The cost was $4,200 less by this method than by rail, although the bulk was broken to cross the Isthmus by rail.

Free coastwise ships will result in cheaper lumber, cheaper fruit, cheaper barley, and other articles from the western coast, all of which will be of great benefit to the consumer.

Of course all that has been said concerning shipments from the western coast applies with equal force to shipments from the eastern coast. Nor is there any weight in the argument that railroads will increase their rates. On the contrary, the exact opposite will result.

The railroads, of course, have a great advantage, on account of rapidity of shipment, but to maintain this will be compelled to reduce their rates.

Competition is the life of trade. Suppose the rate should be reduced from New York to Spokane and into Idaho and Montana and that part of the country, so that it is less than from Chicago, what would be the result. Chicago would simply reduce her rates to prevent New York from taking her market.

The persistent fight by the railroads before the committee recently in favor of repeal very plainly shows whether their rates will be reduced.

After expending $400,000,000 to build the canal, besides the millions we will be compelled in the future to expend to police, defend, and keep it in repair, shall we allow Great Britain, who gave substantially no consideration for the valuable rights she obtained under the treaty, perfect equality with the United States, thus destroying our commerce, weakening our national defense, and surrendering the right to control our domestic concerns? And especially shall we do all these things when she, by attacking the treaty with Panama, is endangering our title to the canal itself?

I have always been an advocate for peace. No one more dreads and despises war; but I am opposed to buying peace with money or by the sacrifice of the Nation's rights. I am opposed to peace at any price. Peace can not reign at the expense of justice and honor unless it be the peace of cowardice, the peace of despotism, or the peace of death.

A nation's integrity is its most priceless possession, and its sacrifice ever has been and ever will be the certain prelude to its destruction.

Our forefathers, in 1776, when this Nation was a weakling, fought and died to vindicate a great principle. They sought no compromise, but with heart and brain inspired with right and patriotism, they wrung independence from Great Britain. Again, in 1812, they fought and died to preserve their commerce and avenge the insults and outrages inflicted upon them by the same power.

The same country is now attempting to violate its treaty and is demanding that we surrender our right to regulate domestic affairs.

The people of the United States did not surrender in 1776; they did not surrender in 1812; and, with the graves of their forefathers around them, their spirits hovering over them, the inspiration of their deeds within them, and the flag proudly floating above them, they will not surrender now.

The PRESIDING OFFICER (Mr. MARTINE of New Jersey in the chair). What is the pleasure of the Senate?

Mr. O'GORMAN. I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Gallinger	O'Gorman	Shively
Bankhead	James	Oliver	Smith, S. C.
Bradley	Kenyon	Page	Thomas
Bristow	Kern	Perkins	Thompson
Burton	Lane	Pomerene	Vardaman
Chamberlain	Lea, Tenn.	Robinson	West
Chilton	Lee, Md.	Saulsbury	Williams
Clark, Wyo.	Lippitt	Sheppard	Works
Clarke, Ark.	McCumber	Sherman	
Cummins	Martine, N. J.	Shields	

Mr. LANE. I wish to announce the unavoidable absence of the Senator from Minnesota [Mr. CLAPP] on the business of the Senate in connection with committee work.

Mr. POMERENE. I desire to announce that the junior Senator from Missouri [Mr. REED] is necessarily detained from the Senate on important business.

Mr. SHIVELY. I desire to announce that the senior Senator from Missouri [Mr. STONE] is detained from the Senate on important business. He is paired with the Senator from Wyoming [Mr. CLARK].

The PRESIDING OFFICER. Thirty-eight Senators are present—less than a quorum.

Mr. SHIVELY. I ask that the names of absent Senators be called.

The PRESIDING OFFICER. The Secretary will call the names of absent Senators.

The Secretary called the names of absent Senators, and Mr. BRYAN, Mr. MARTIN of Virginia, Mr. NORRIS, Mr. OVERMAN, Mr. OWEN, Mr. SMITH of Georgia, Mr. SMOOT, Mr. SWANSON, and Mr. WARREN answered to their names when called.

Mr. LA FOLLETTE, Mr. HOLLIS, Mr. BURLEIGH, Mr. DILLINGHAM, and Mr. CRAWFORD entered the Chamber and answered to their names.

The PRESIDING OFFICER. Fifty-two Senators have answered to their names. A quorum of the Senate is present.

Mr. BRISTOW. Mr. President, I had intended to address the Senate this afternoon on the canal bill, but I understand it is desired to have an executive session. Therefore I shall not undertake to address the Senate to-night, but shall do so to-morrow afternoon, following the address of the junior Senator from New York [Mr. O'GORMAN], unless something should interfere.

Mr. SHIVELY. Mr. President, I desire to say to the Senator from Kansas that it is not the purpose to move at this time for an executive session, but to do so later, if the Senator will proceed with his remarks.

Mr. O'GORMAN. Mr. President, I ask that the canal bill be temporarily laid aside.

The PRESIDING OFFICER. Without objection, that will be done.

Mr. SMITH of Georgia. Before that is done I should like to give notice that on Monday, May 11, immediately after the close of the morning business, I desire to address the Senate upon the Panama Canal bill.

Mr. O'GORMAN. I desire to say a word further. The reference by the Senator from Kansas to an executive session was based upon information which I conveyed to him, and my information was based upon that given to me by Members on this side.

PROPOSED INCREASE OF RAILROAD RATES.

Mr. OWEN. Mr. President, on yesterday it was suggested by the Senator from Wisconsin [Mr. LA FOLLETTE] that he had not seen anywhere in the public press any denial from the President of the United States of the newspaper editorials to the effect that the President was in favor of having an increase in the freight rates of the railways.

I wish to have recorded in the RECORD the fact that on the 6th of April the President, in his usual interview at the White House with the various representatives of the leading metropolitan papers of the country, was asked this question by some of them:

They say you are trying to get an increase of the railroad rates, Mr. President?

He replied:

You know, I explained to you gentlemen before that I could not express any opinion about that, because the commission is a semijudicial body, and it would not be proper for me to do so.

HYACINTHE VILLENEUVE.

H. R. 6260. An act for the relief of Hyacinthe Villeneuve, was read twice by its title.

Mr. SMOOT. Mr. President, a few days ago the Senate passed a bill identical with the one that the Chair has just presented to the Senate. For that reason I desire to ask that immediate consideration of the House bill be granted, and then I shall enter a motion for a reconsideration of the vote——

Mr. OWEN. I feel compelled to call for the regular order on this matter.

Mr. SMOOT. This is the regular order.

Mr. OWEN. I think the unfinished business is the regular order. It should be.

The PRESIDING OFFICER. That, the Chair understands, has been laid aside. The Chair rules that this is the regular order. It is a message from the House of Representatives.

Mr. SMOOT. This is a message from the House of Representatives, laid before the Senate by the Presiding Officer.

Mr. OWEN. What has become of the regular order?

The PRESIDING OFFICER. The Chair understands that it was temporarily laid aside.

Mr. OWEN. A request was made that it be temporarily laid aside, but the request has not been granted by the Senate. It requires unanimous consent.

The PRESIDING OFFICER. The Chair understands that this was at the request of the chairman of the committee.

Mr. OWEN. I understand that, but it has to be laid aside by unanimous consent.

The PRESIDING OFFICER. The Chair is informed that at the request of the chairman of the committee a message of this character may be laid before the Senate at any time.

Mr. OWEN. Mr. President, I shall not insist on this procedure at this time, but I shall insist upon the regular order hereafter.

The PRESIDING OFFICER. The Senate will take cognizance of that.

Mr. SMOOT. I was stating that a bill identical with the one before the Senate passed the Senate the other day, and I now ask that this bill be immediately considered. Then I shall enter a motion to reconsider the vote of the Senate by which the bill passed the Senate the other day.

The PRESIDING OFFICER. A motion is made by the Senator from Utah that House bill 6260 shall be immediately considered.

Mr. GALLINGER. What is the title of the bill?

The PRESIDING OFFICER. The Secretary will state the title of the bill.

The SECRETARY. An act for the relief of Hyacinthe Villeneuve.

Mr. SMOOT. It grants title to a piece of land in North Dakota. The Senator from North Dakota asked unanimous consent the other day for the consideration of the bill; it was granted and the bill passed.

Mr. GALLINGER. I simply imitate the suggestion that so often emanates from the Senator from Utah in saying that this is a bad form of legislation, and that the bill ought to go to a committee; but I shall not make any point against it.

Mr. SMOOT. I wish to say to the Senator that if a bill identical with this had not already passed this body, I never would have asked for the present consideration of the bill.

Mr. GALLINGER. Similar bills have come here under similar circumstances, and the Senator has very wisely suggested that they ought to go to committees; but I shall not make the point.

Mr. SMOOT. Let it go to the committee, then.

Mr. GALLINGER. No; I do not make the point at all. I am willing that the bill shall be considered.

The PRESIDING OFFICER. Is there any objection to the immediate consideration of the bill?

Mr. OWEN. I think it ought to go to the committee.

The PRESIDING OFFICER. Objection is made. The bill will be referred to the Committee on Public Lands.

ELIZABETH MUHLEMAN.

Mr. OVERMAN. I ask the Chair to lay before the Senate the bill received to-day from the House of Representatives for the relief of Elizabeth Muhleman, widow of Samuel A. Muhleman, deceased.

The SECRETARY. H. R. 12191, an act for the relief of Elizabeth Muhleman, widow of Samuel A. Muhleman, deceased.

Mr. OVERMAN. There is on the calendar a bill (S. 4060) for the relief of Elizabeth Muhleman, widow, and the heirs at law of Samuel A. Muhleman, deceased, which was reported by me April 1 from the Committee on Claims. I ask that the bill just received from the House of Representatives be substituted on the calendar for the Senate bill.

The PRESIDING OFFICER. Without objection, that action will be taken.

Mr. OVERMAN. I ask that the Senate bill be postponed indefinitely.

The PRESIDING OFFICER. Without objection, it is so ordered.

HOUSE BILLS REFERRED.

The following bills were severally read twice by their titles and referred to the Committee on Military Affairs:

H. R. 851. An act for the relief of the legal representatives of Napoleon B. Giddings;

H. R. 2728. An act for the relief of George P. Heard;

H. R. 3432. An act to reinstate Frank Ellsworth McCorkle as a cadet at United States Military Academy;

H. R. 4744. An act to authorize the appointment of John W. Hyatt to the grade of second lieutenant in the Army; and

H. R. 9147. An act to restore First Lieut. James P. Barney, retired, to the active list of the Army.

The following bills were severally read twice by their title and referred to the Committee on Public Lands:

H. R. 1517. An act for the relief of George W. Cary;

H. R. 3334. An act authorizing the quitclaiming of the interest of the United States in certain land situated in Hampden County, Mass.;

H. R. 4318. An act to authorize the Secretary of the Interior to cause patent to issue to Erik J. Aanrud upon his homestead entry for the southeast quarter of the northeast quarter of section 15, township 159 north, range 73 west, in the Devils Lake land district, North Dakota; and

H. R. 6052. An act for the relief of William P. Havenor.

The following bills were severally read twice by their title and referred to the Committee on Claims:

H. R. 900. An act for the relief of James Easson;

H. R. 932. An act for the relief of John W. Canary;

H. R. 2705. An act for the relief of David C. McGee;

H. R. 3041. An act to carry into effect findings of the Court of Claims in the cases of Charles A. Davidson and Charles M. Campbell;

H. R. 3428. An act for the relief of James Stanton;

H. R. 7633. An act for the relief of the personal representative of Charles W. Hammond, deceased;

H. R. 8808. An act for the relief of Baley W. Hamilton;

H. R. 8811. An act to execute the findings of the Court of Claims in the case of Sarah B. Hatch, widow of Davis W. Hatch;

H. R. 9851. An act for the relief of legal representative of George E. Payne, deceased;

H. R. 10172. An act for the relief of L. V. Thomas;

H. R. 10201. An act for the relief of the heirs of Theodore Dehon;

H. R. 11040. An act to carry out the findings of the Court of Claims in the case of James Harvey Dennis;

H. R. 11381. An act for the relief of the estate of T. J. Semmes, deceased;

H. R. 13240. An act for the relief of the legal representatives of James S. Clark, deceased; and

H. R. 14197. An act for the relief of the legal representatives of Mrs. H. G. Lamar.

H. R. 14229, an act for the relief of Henry La Roque, was read twice by its title and referred to the Committee on the Judiciary.

H. R. 1781, an act providing for the refund of certain duties incorrectly collected on wild-celery seed, was read twice by its title and referred to the Committee on Finance.

AGRICULTURAL APPROPRIATIONS.

Mr. GORE. I ask unanimous consent that the Senate resume the consideration of the agricultural appropriation bill.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 13679) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1915.

Mr. GORE. I ask that the Secretary read the amendment on page 18, that was passed over when it was first reached.

The PRESIDING OFFICER. Without objection, that will be done.

The SECRETARY. On page 18, line 13, it is proposed to strike out "$80,580" and insert:

$180,580: *Provided*, That of the sum thus appropriated, $100,000 shall be used for furnishing the primary markets in the cotton-growing States with a set of samples as standardized by the Government, and a sample of the bleached and unbleached yarns made from the different grades, showing the waste, tensile strength, and bleaching quality thereof.

Mr. GALLINGER. Mr. President, I will ask the Senator having the bill in charge if that proviso is not in the nature of a subsidy? We have heard a great deal about subsidies to the shipping interests of the country. Before this bill is passed I wish to call attention to various items in the bill that are direct subsidies to certain interests, and this is one of them.

Mr. GORE. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from Oklahoma?

Mr. GALLINGER. I yield, because I am seeking information.

Mr. GORE. I do not care to interrupt the Senator from New Hampshire. I thought he had finished.

The PRESIDING OFFICER. The Senator from New Hampshire still has the floor.

Mr. GALLINGER. I am glad to be interrupted, Mr. President. I have raised the question in all seriousness.

Mr. GORE. It was, of course, the desire of the committee to rally as much support in behalf of the Agricultural appropriation bill as possible, and we thought that by inserting a subsidy we would have the unanimous and enthusiastic support, at least, of the senior Senator from New Hampshire.

Mr. GALLINGER. Would the Senator have any objection to my introducing as an amendment to this bill a provision taken from a bill that I introduced to rehabilitate the merchant marine, giving a subsidy to the shipping interests?

Mr. GORE. I have no objection whatever to the Senator introducing any bill or any amendment for which he feels disposed to stand sponsor.

Mr. GALLINGER. Would the Senator support that amendment?

Mr. GORE. I would not.

Mr. GALLINGER. The Senator admits that this is a subsidy, and the other is a subsidy.

Mr. GORE. There are subsidies and subsidies.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from Utah?

Mr. GALLINGER. I yield to the Senator.

Mr. SMOOT. If that is the object of this amendment, I certainly shall make a point of order against it. I now make the point of order that it is general legislation on an appropriation bill; it increases an appropriation, and is not estimated for.

Mr. SMITH of South Carolina. Mr. President, I wish to call the attention of the Senate to the fact that in this bill we are spending several million dollars for the purpose of demonstrating to the farmer the best method by which we can increase his output. It seems to me it comes with ill grace for any Member on this floor to vote for an appropriation to teach the farmer how to make a larger crop and then make no effort to give him any knowledge as to the value of what he does make.

I am the author of this amendment. I proposed it for the reason that we have before us a demonstration in the form of these yarns, made under an appropriation secured by me to the last Agricultural appropriation bill, showing that the trade on account of the grades which it has arbitrarily fixed is making a difference of anywhere from $15 to $20 per bale; whereas by this test of the relative value of the different grades the Department of Agriculture has demonstrated that no such actual difference exists.

You and I are dependent for the textiles of this country upon the southern cotton grower. The only way you can make him prosperous is to make his work profitable. I do not see how any Member on this floor can vote millions of dollars for the purpose of increasing the output, and then make no appropriation whatever to teach those who produce the raw material what it is worth.

I have here a letter from the Department of Agriculture on this very point, which I ask to have read.

Mr. SMOOT. Before the Senator asks to have the letter read, I wish to ask him in all seriousness how it is possible to give information as to the different grades of cotton, showing the waste, the tensile strength, and the bleaching qualities, when it is——

Mr. SMITH of South Carolina. Here it is.

Mr. SMOOT. Wait a minute; I was asking a question. I know that one manufacturer can take half a bale of cotton, and another manufacturer can take the other half of the same bale, and the first one can work the cotton through one mill, and the other manufacturer can work the other half through the other mill, and the tensile strength of the yarn produced will not be the same.

Mr. SMITH of South Carolina. The Senator from Utah is not going to stand here, before an intelligent body of men, and introduce any such argument as that, for the reason that he knows that No. 1 yarn is a certain number of yards to the pound, and the increased twist determines the number of that yarn.

Mr. SMOOT. The Senator does not go far enough. Why does he not go further and explain, if he knows, about the manufacture of——

Mr. SMITH of South Carolina. Oh, I would leave all knowledge of all affairs to the Senator from Utah.

Mr. SMOOT. I have not asked the Senator to do that; but I do know that I can take a 30 or 40 or 60 run yarn made by one mill, and take the same number of yarn, or what are supposed to be——

Mr. SMITH of South Carolina. Ah!

Mr. SMOOT. Made by another mill, and the tensile strength will not be the same.

Mr. SMITH of South Carolina. Precisely. Now, I will ask the Senator from Utah a question.

Mr. SMOOT. Therefore, I say, who is going to judge as to what the strength should be? Is the department going to do so? If so, in what mill shall it be made—one in New Hampshire, one in North Carolina, one in South Carolina, or where?

Mr. SMITH of South Carolina. Mr. President, the Senator from Utah, as a matter of course, encyclopedic as he is, will understand that the department has also demonstrated that the speed of the gin had nothing whatever to do with the value of the cotton ginned. Before this appropriation of mine was secured authorizing the department to test it, that was another fiction by which the farmers of this country were systematically robbed.

The manufacturers would get a certain kind of cotton, and on account of its appearance they would declare that it was gin-cut cotton, that it was not in good form, and therefore that the farmers should lose from 1 to 2 cents a pound, or from $10 to $15 a bale. The department has proven that the speed of the gin has nothing to do with the quality of the output. The department standardized the grades of cotton, from good ordinary to middling fair—nine grades—five full grades and four half grades. The department took samples from the exchanges of the country and out of the whole made an average which represented the uniform grades of upland cotton produced in the South. It then sent some of each grade of this cotton to the mills at Danville, Va., and some of it to the textile department at Clemson College, S. C., and elsewhere, I believe. It was spun at these places with the same speed, with the same humidity, and with the same mechanical conditions surrounding it. As a result it was found that good ordinary bleached and good ordinary unbleached, as represented on this card, were practically the same as the other grades so far as tensile strength and bleaching qualities were concerned.

As a practical cotton grower, I want to call the Senate's attention to the fact that here is the middle grade; all below that grade brings a lower price and all above it brings a higher price. The trade made a difference of $15 per bale between middling and good ordinary. Under the impartial test of the department, made at Clemson College and at Danville, it was proven, as shown on this card, that there is practically no difference in the yarns made from the grades from middling fair to good ordinary. But the trade makes a difference of $15 a bale between middling and good ordinary, and $30 a bale between middling fair and good ordinary.

The department has impartially spun this yarn under conditions that should characterize every well-organized mill, using upland cotton, under the same mechanical conditions, with the same humidity and the same speed of the spindle, and has reached this result. I ask the Senator from Utah if some mill wants to make a little more time, thereby injuring the fiber by reckless speed, is he going to stand here and advocate that the farmer shall be penalized for such a manufacturer's benefit—that these samples shall not be given the farmer to protect him from this very condition?

Mr. SMOOT. Mr. President, the question asked by the Senator from South Carolina has nothing to do with what the tensile strength and bleaching quality of a certain size yarn may be in different sections of this country. The Senator knows that in some parts of the country the water has a great deal to do with it; again, the machinery has a great deal to do with it, as well as the humidity. This is the case with any size of yarn spun from any graded cotton.

Mr. SMITH of South Carolina. Then does the Senator from Utah mean to say that he is going to penalize the grower of cotton because some manufacturer increases the speed of his spindles to a point where it absolutely breaks the fiber, and because such a manufacturer happens to be located in a place where certain meteorological conditions or climatic conditions make it unprofitable to spin the stuff, when the department

has demonstrated that under right conditions—which are easily made available, because they have the very same in Clemson, the very same in Danville, and the very same in Fall River—it is easy under the modern processes of milling to get the same conditions in every mill?

When in a well-regulated mill, running with the same speed, with an artificial condition within the breaker room and the picker room and the slasher room you can without any additional cost produce the same condition in New England that you do in the South, and the same condition in the South that you do in New England, surely the Senator from Utah is not going to come here and say that because our mills have had a condition of speed and of climate that might not make the product as good in one as in the other he is going to penalize the grower and penalize the producer of the raw material because some man wants to use an old, worn-out system and thereby enrich himself at the expense of those who produce the cotton.

Mr. McCUMBER. Mr. President, I am always interested when it comes to grading cotton. I want, first, to answer the suggestion made by the Senator from Utah [Mr. SMOOT], that these samples would be of no benefit, because you could not compel a purchaser to buy according to such samples; but, after all, does not the Senator think it would put the seller upon fighting ground, at least, if he had a sample before him that he could compare with his own, and say, "Mine is just as good or better than that sample"? Would not it put him in a position, anyway, to demand his rights?

I am quite well satisfied that if we could have such a thing as Government standardization of grain, and we could have a sack of No. 1 northern, No. 2 northern, and No. 3 northern at every principal place of primary market, the farmer could come in, take a handful of it, then take a handful of his own wheat, compare them, and weigh them, it would help him considerably in demanding and securing the right kind of a grade if he happened to run up against one of the kind of grain buyers of whom the Senator from Minnesota [Mr. NELSON] spoke the other day, who are altogether responsible for our sufferings in my particular State. So I am in favor of that; but I want to ask the Senator from South Carolina a question before he goes away. As I understand, we now have Government standardization of cotton?

Mr. SMITH of South Carolina. Yes.

Mr. McCUMBER. Was that fixed by law?

Mr. SMITH of South Carolina. It was fixed by law.

Mr. McCUMBER. By the law of Congress?

Mr. SMITH of South Carolina. By the law of Congress.

Mr. McCUMBER. How on earth did the Senator get votes enough in the Senate to pass a bill to standardize cotton?

Mr. SMITH of South Carolina. I will state to the Senator from North Dakota that that miracle happened before I came here.

Mr. GORE. Mr. President——

The VICE PRESIDENT. Does the Senator from North Dakota yield to the Senator from Oklahoma?

Mr. McCUMBER. Yes.

Mr. GORE. I wish to say to the Senator from North Dakota that the Government has prepared a series of standard grades for cotton under an appropriation carried in an Agricultural appropriation bill, and it is proceeding to prepare grades of corn and of other grain under a similar provision in the Agricultural appropriation bill.

There is no law requiring cotton sold for interstate commerce to be sold on the basis of those standard grades. I have introduced a bill, which is now in the Committee on Agriculture and Forestry, requiring the standardization of cotton grades and requiring the persons who grade cotton for interstate shipment to use the official standard grades of the Government. I have introduced a like bill respecting grain grades, and it is my hope, with the earnest cooperation of the Senator from North Dakota, that we shall, sooner or later, be able to pass both of those measures through the Senate and through the other House of Congress, so that the use of these standard grades will be required in interstate commerce respecting both cotton and grain.

With the permission of the Senator from South Carolina [Mr. SMITH], I will proceed to say that it is estimated by the Department of Agriculture that the cotton producers of Texas alone lose $40,000,000 a year because the information respecting the actual utility of different grades of cotton is not in the possession of farmers and that utility is not acted upon in the trade. Now, there is no compulsory method of obliging purchasers to pay these prices based on these different utilities, but it is a matter of education. I assume that a farmer on 160 acres of land in Utah or in California, covered with rock and cactus, might be willing to sell it for one price, but if he knew it contained a gold mine he might exact a little higher price. When the producers of cotton learn that the actual utility in the different grades of cotton does not differ in accordance with the commercial grades, as they have hitherto existed in the trade, the farmer will probably insist on a little more generous price, or, at any rate, that is the hope of the department and the hope of those in the Senate who are concerned in the welfare and prosperity of the cotton producers of the South.

Mr. McCUMBER. I have no doubt in the world, Mr. President, that this would be most beneficial. You can very often take advantage of the seller of an article when he does not know what the article itself is worth, but if he has some standard by which to go, if he has some sample with which he can compare his own, then reading the market price of a particular thing that he has to sell, he will undoubtedly hold it until somebody will give him the grade to which it is entitled. If we furnish him the information that will enable him to determine to what grade he is entitled, I think we shall have done a great deal for him.

I, for one, can not agree with the Senator from Utah [Mr. SMOOT] that we could not afford to spend a hundred thousand dollars for this purpose, that might help the cotton growers in the saving of millions of dollars upon a single year's crop.

Mr. THOMAS. Mr. President——

Mr. McCUMBER. Just a moment. What has perhaps surprised me, Mr. President, more than anything else in this matter, is how we could get anything of this kind through, especially if the Senator from Alabama had been present and had opposed it with such eloquence as he uttered against grain standardization, stating that you might just as well have standardization for carrots and cabbages, and had the Senator from Missouri [Mr. REED] also been present, who declaimed against grain standardization, saying it was just as foolish to have standardization of grain as it would be to have standardization for turnips, eggs, and so forth—with that sentiment, which it seemed three-fourths of the other side agreed was logical, and voted accordingly the other day, I confess it has been a matter of great surprise to me how on earth we could have gotten a bill through the Senate which provided for Federal standardization of cotton.

In addition to that, I call attention to the fact that it will take something of an army of Federal employees to carry on this demonstration, to see that this work is done and that the farmers have an opportunity to see the demonstrating work done; it will take a great many more than it would have taken in all of the cities to have graded grain under the operation of the bill which I advocated the other day. It will take several times as many persons to carry into effect this provision; and yet that bill was assailed from all sides upon the ground that it was proposing to interject into the commerce of the country a great Federal machine with many Federal employees.

For the life of me, Mr. President, I can not see the difference between a Federal employee who goes to Minneapolis and grades a carload of wheat and a Federal employee who goes down to New Orleans and inspects and grades a bale of cotton. To me they look just exactly the same; and yet my friends from the cotton section, with the exception of a few of them—and I especially want to except my good friend from South Carolina [Mr. SMITH]—argued as to the viciousness of the appearance of a Federal inspector of grain up in Minnesota; and yet how lovely he appeared when he got down to New Orleans to inspect their cotton; how welcome he would be as a Government employee in the State of Louisiana and yet how objectionable he would be in the State of Minnesota or of Missouri or of Illinois. I now yield to the Senator from Colorado.

Mr. THOMAS. Mr. President, I quite agree with the Senator from North Dakota that there is no difference whatever between an inspector engaged in the work which he has described in Minneapolis and one engaged in the work which will under this amendment have to be done at New Orleans; but I should like to ask this question: If it be true—and I have no doubt the statement is well founded—that the State of Texas alone has lost $40,000,000 because of the lack of something of the sort described in this amendment, would it not be well for the losers of the $40,000,000 to put up the hundred thousand dollars which is desired for this purpose instead of asking Uncle Sam to do it?

Mr. McCUMBER. Well, Mr. President, I find myself forced to agree with those who think that Uncle Sam can do that work pretty well, because under his control it is done on a scientific, organized plan, and can probably be more effectively done than it can be done by the States. Furthermore, I do not know that the States have the information that is necessary to carry on this work. I am willing, at any rate, to grant them that amount. I know that this money could be spent in

very many ways that would not be as valuable to the country as it would be in increasing the cotton crop.

I am speaking upon this question at this time, because in the very next paragraph I shall offer an amendment to provide for the standardization of grain, not the inspection of grain by Federal employees, because the vote which was taken here the other day rather frightened me upon that proposition; but as all who spoke against inspection were in favor of Federal standardization, at least so far as their utterances went, I hope to have inserted in the bill, following this clause, a pro ision that has been proclaimed to be satisfactory to the entire trade of the country, and while it is not satisfactory to the farming element of the country, at least it is a step in the right direction; so I am going to appeal to those Senators who feel that the toilers in our fields should have protection to support me in that amendment.

Mr. President, I want to say a word with reference to the point of order. I think the point of order might possibly be leveled against the increase of the appropriation, but certainly I can not see how it is possible to claim that it is new general legislation. If I understand the rules correctly, when you provide for the expenditure of a certain sum of money for a certain purpose, you may also provide how it may be used to carry out that purpose, and an amendment that simply declares how the money appropriated is to be spent is not new legislation nor is it general legislation, because it is directed only against the method of the expenditure of that particular sum.

I have to-day been looking up the precedents on this subject, and I think probably I would be justified in calling the Chair's attention to a statement made by Vice President Fairbanks when he was in the chair. I will not read it now; but he declared that the precedents are very conflicting, so conflicting upon the subject of what constitutes general legislation that the Chair had nothing to follow in the line of precedents. The question has generally been submitted to the Senate, and the Senate itself has determined whether an item was general legislation or otherwise, according as to whether or not it wanted to pass the particular legislation. My examination of the authorities convinces me that the then Vice President was entirely correct in that statement, and that we really have no rule established by precedent as to what constitutes general legislation. We have this rule, however, Mr. President—and this is the particular thing I want to call to the Chair's attention—as stated by Senator Frye when President pro tempore of the Senate in a number of instances, whenever an item appropriates money for a particular purpose we can introduce and attach an amendment setting forth how the appropriation is to be carried into effect; in other words, we can limit it or in any way determine how the money shall be expended.

Mr. JONES. Mr. President, I want to ask the Senator from South Carolina a question, if he will allow me. Can he tell me how many sets of these samples this $100,000 will provide?

Mr. SMITH of South Carolina. The Department of Agriculture has made an estimate, and it says that—

If instead of furnishing full sets of grades—

That is, including what is called the half grades——

Mr. JONES. Would those be full sets?

Mr. SMITH of South Carolina. I think they will be sufficient. The department says:

If instead of furnishing full sets of grades the five principal grades—good ordinary, low middling, middling, good middling, and middling fair—were furnished, approximately 6,500 sets of grades and exhibits of yarns, etc., could be furnished.

That would take about $100,000.

Mr. JONES. In whose keeping or charge will these sets be placed?

Mr. SMITH of South Carolina. They will be placed in the hands of the buyers—that is, in the hands of the sworn weighers who are stationed at these places—and I have an amendment which I propose to offer to take care of that by providing that where sets shall be furnished the Secretary of Agriculture shall secure a proper individual to take care of them.

Mr. JONES. How are they made responsible for the safekeeping of these sets of samples?

Mr. SMITH of South Carolina. The samples are already put in such shape that they only need to be displayed, and the buyer, the individual, the sworn weigher, will himself be responsible for them. Very little care is necessary after they put them up in the form in which they now put them up.

Mr. JONES. Suppose a man takes a set of samples and puts them in his pocket and they are never again seen?

Mr. SMITH of South Carolina. Well, I suppose arrangements can be made, just as is now the case in sending out seed to the different farmers of our State for demonstration work.

Mr. JONES. As I understand, these samples are to protect the sellers of cotton from the men who buy. If you furnish the samples and put them in charge of the men who buy, it seems to me that there would be every inducement for them to get rid of the samples in some way, inadvertently or otherwise.

Mr. SMITH of South Carolina. I will state to the Senator that if we proceed on the supposition that no man will do his duty we will not get anywhere.

Mr. JONES. I do not understand that the men in whose hands these samples are placed are officials of the Government.

Mr. SMITH of South Carolina. Oh, no; but they are a check. The farmers demand them. They make requisition and indicate to the Department of Agriculture that they—the sellers, the producers—have made requisition. When they have made this requisition, and the samples are placed in the hands of the proper officials, the farmers will certainly see that the officials will always have the samples where they will be available for the farmers' benefit.

Mr. JONES. That is what I am trying to ascertain—in whose hands the sets of samples are going to be placed, and who is to be responsible for them. It seems to me that if we are going to make an appropriation of this kind we ought to make some provision specifying in whose hands the samples are to be placed, and providing for holding those persons responsible for their safe-keeping, and for their having the samples available whenever the sellers come in to sell. It seems to me that we shall find ourselves, at the end of the current year, with a demand for another $100,000 to replace samples that have been lost, inadvertently laid aside, misplaced, or something of the sort.

Mr. SMITH of South Carolina. I think that could be very well left to the Secretary of Agriculture. I intended to propose an amendment to the bill providing that these samples shall be furnished at such shipping points as he may prescribe, at the demand of the patrons of those shipping points.

Mr. JONES. Why not say "under such rules and regulations as may be prescribed by the Secretary of Agriculture"?

Mr. SMITH of South Carolina. Precisely; that is the point I make—"under such rules and regulations as the Secretary of Agriculture may prescribe for their safekeeping and proper exhibition."

Mr. McCUMBER. Mr. President, I was about to suggest to the Senator that even without the amendment the Secretary would undoubtedly make the necessary rules. He already has that authority; and I doubt not that there would not be a single little store, perhaps, in any town where cotton was marketed that would not be very glad to keep the samples there for the inspection of customers.

EXECUTIVE SESSION.

Mr. SHIVELY. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After six minutes spent in executive session the doors were reopened, and (at 5 o'clock and 50 minutes p. m.) the Senate adjourned until to-morrow, Thursday, May 7, 1914, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate May 6, 1914.

ASSISTANT REGISTER OF THE TREASURY.

John Floyd King, of the District of Columbia, to be Assistant Register of the Treasury, to fill an existing vacancy.

UNITED STATES ATTORNEY.

Edward C. Knotts, of Carlinville, Ill., to be United States attorney, southern district of Illinois, vice William A. Northcott, whose term expires May 6, 1914.

UNITED STATES MARSHALS.

Cooper Stout, of Murphysboro, Ill., to be United States marshal for the eastern district of Illinois, vice Charles P. Hitch, whose term has expired.

Christopher C. Gewin, of Greensboro, Ala., to be United States marshal for the southern district of Alabama, vice Gilbert B. Deans, whose term has expired.

POSTMASTERS.

ILLINOIS.

George H. Luker to be postmaster at Staunton, Ill., in place of Henry A. Fischer. Incumbent's commission expired April 1, 1914.

KANSAS.

Celia Hughes to be postmaster at Weir, Kans., in place of Philip Moore. Incumbent's commission expired April 20, 1914.

James W. Morphy to be postmaster at Russell, Kans., in place of Lavelle H. Boyd. Incumbent's commission expires June 2, 1914.

KENTUCKY.

George W. Snyder to be postmaster at Warsaw, Ky., in place of W. B. Graham. Incumbent's commission expires May 19, 1914.

LOUISIANA.

E. O. Lalande to be postmaster at Napoleonville, La., in place of E. T. Dugas. Incumbent's commission expired January 26, 1914.

Washington J. P. Prescott to be postmaster at Garyville, La., in place of Robert E. Rosenberger. Incumbent's commission expires May 24, 1914.

MAINE.

Alfred T. Hicks to be postmaster at Auburn, Me., in place of Winchester G. Lowell. Incumbent's commission expired April 12, 1914.

Morrill McKenney to be postmaster at Richmond, Me., in place of Thomas G. Herbert. Incumbent's commission expires May 31, 1914.

MARYLAND.

Thomas Y. Franklin to be postmaster at Berlin, Md., in place of Charles C. Mumford. Incumbent's commission expired May 2, 1914.

Oliver C. Giles to be postmaster at Elkton, Md., in place of George M. Evans. Incumbent's commission expired March 28, 1914.

MASSACHUSETTS.

Lawrence J. Dugan to be postmaster at Webster, Mass., in place of William I. Marble. Incumbent's commission expired December 13, 1913.

John M. Hayes to be postmaster at North Abington, Mass., in place of Ernest W. Calkins. Incumbent's commission expired April 29, 1914.

William J. Kenney to be postmaster at Attleboro, Mass., in place of John A. Thayer. Incumbent's commission expired March 31, 1914.

Eugene Meagher to be postmaster at Rockport, Mass., in place of William Parsons. Incumbent's commission expired March 17, 1914.

MICHIGAN.

Edgar W. Farley to be postmaster at Yale, Mich., in place of E. Harvey Drake. Incumbent's commission expires May 25, 1914.

H. W. Hagerman to be postmaster at Sturgis, Mich., in place of Chauncey J. Halbert. Incumbent's commission expires June 2, 1914.

James A. King to be postmaster at Manistee, Mich., in place of William J. Barnhart. Incumbent's commission expired April 1, 1914.

Charles E. Lovejoy to be postmaster at Milford, Mich., in place of John E. Crawford. Incumbent's commission expired April 1, 1914.

F. W. Richey to be postmaster at Dowagiac, Mich., in place of Julius O. Becraft. Incumbent's commission expired March 17, 1914.

MINNESOTA.

Michael J. Daly to be postmaster at Perham, Minn., in place of George M. Young. Incumbent's commission expired April 13, 1914.

MISSOURI.

Henry S. Hook to be postmaster at Jamesport, Mo., in place of James C. Harrah. Incumbent's commission expired March 28, 1914.

MONTANA.

Clemens H. Fortman to be postmaster at Helena, Mont., in place of George W. Lanstrum. Incumbent's commission expires May 17, 1914.

Samuel Hilburn to be postmaster at Kalispell, Mont., in place of James R. White. Incumbent's commission expires May 31, 1914.

NEBRASKA.

J. O. Blauser to be postmaster at Diller, Nebr., in place of Samuel C. Hutchinson. Incumbent's commission expired January 12, 1914.

Claude J. Brown to be postmaster at Lynch, Nebr., in place of Albert C. McFarland. Incumbent's commission expired March 1, 1913.

Thomas T. Osterman to be postmaster at Blair, Nebr., in place of Wesley J. Cook. Incumbent's commission expired April 20, 1914.

Edward W. Roche to be postmaster at Kimball, Nebr., in place of Isaac Roush. Incumbent's commission expired December 17, 1912.

NEW JERSEY.

John J. O'Hanlon to be postmaster at South Orange, N. J., in place of Frederic B. Taylor. Incumbent's commission expired April 20, 1914.

George N. Smith to be postmaster at Wildwood, N. J., in place of J. Albert Harris. Incumbent's commission expired February 21, 1914.

CONFIRMATIONS.

Executive nominations confirmed by the Senate May 6, 1914.

PROMOTIONS IN THE NAVY.

Rear Admiral Charles F. Pond to be a rear admiral.
Commander Thomas Washington to be a captain.
Lieut. Commander James P. Morton to be a commander.
Capt. Walter McLean to be a rear admiral.
Asst. Naval Constructor Alexander H. Van Keuren to be a naval constructor.
Asst. Naval Constructor Edwin G. Kintner to be a naval constructor.
Asst. Naval Constructor Fred G. Coburn to be a naval constructor.
Pharmacist Richard F. S. Puck to be a chief pharmacist.

POSTMASTERS.

CALIFORNIA.

George R. Bellah, Oxnard.
Wright S. Boddy, Oakdale.
James A. Lewis, Carpinteria.
Lottie L. Miracle, Campbell.
Joseph Scherrer, Placerville.
James F. Trout, Avalon.
J. D. Wagnon, Sonoma.

KENTUCKY.

Goalder Johnson, Hickman.

MICHIGAN.

Peter F. Gray, Lansing.
John Loughnane, Lapeer.

VERMONT.

Patrick H. Harty, Saxtons River.

WYOMING.

Perle R. Herrin, Hanna.

WITHDRAWAL.

Executive nomination withdrawn May 6, 1914.

Thomas E. Glass to be postmaster at Jackson, Tenn.

HOUSE OF REPRESENTATIVES.

WEDNESDAY, *May 6, 1914.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Our Father in heaven, let Thy kingdom come in all fullness and possess our minds and hearts, that with a clearer vision, a wider sweep of knowledge, and a more earnest desire to do Thy will we may work together with Thee for the destruction of evil, that righteousness may be established in the earth, the longings of our souls be fulfilled, and all the world rejoice together in peace and happiness. In His name. Amen.

The Journal of the proceedings of yesterday was read and approved.

MEMORIAL EXERCISES AT NAVY YARD, BROOKLYN, N. Y.

Mr. FITZGERALD. Mr. Speaker, I ask unanimous consent for the present consideration of the concurrent resolution which I send to the Clerk's desk.

The Clerk read as follows:

House concurrent resolution 39.

Resolved by the House of Representatives (the Senate concurring), That for the representation of the Congress at the exercises to be held at the navy yard in Brooklyn, N. Y., on Monday, May 11, 1914, in honor of the men of the Navy and Marine Corps who lost their lives at Vera Cruz, Mexico, there shall be appointed by the Vice President 7 Members of the United States Senate and by the Speaker 15 Members of the House of Representatives.

SEC. 2. That the expenses of the committee shall be defrayed in equal parts from the contingent appropriations of the Senate and House of Representatives.

The SPEAKER. Is there objection to the present consideration of the resolution?

Mr. MANN. Reserving the right to object, will the gentleman from New York make some statement in reference to the resolution.

Mr. FITZGERALD. Mr. Speaker, on Monday morning next, May 11, the bodies of some 18 sailors and marines who were killed at Vera Cruz, Mexico, are to arrive in Brooklyn upon a United States battleship. Memorial exercises are to be held at the navy yard and, according to the statements that have appeared in the public press, the President, the Secretary of the Navy, the Admiral of the Navy and his staff, on behalf of the Government, are to be present, and the city of New York is officially to participate in these ceremonies. For that reason I offer this resolution, which provides that the Congress shall be officially represented at these ceremonies.

Mr. SABATH. May I inquire of the gentleman what the resolution provides as to the number of Representatives and Senators? I have introduced a similar resolution asking for 50 Members of the House and 15 Members of the Senate.

Mr. FITZGERALD. I have not seen the gentleman's resolution.

Mr. SABATH. I introduced it this noon, and that is the reason I made the inquiry.

Mr. FITZGERALD. This resolution provides for 7 Members of the Senate and 15 Members of the House. My recollection is that usually the representation of the House is larger than the representation of the Senate, but the Senate can fix its representation as it sees fit.

The SPEAKER. Is there objection to the present consideration of the resolution?

There was no objection.

The resolution was considered and agreed to.

IRRIGATION OF ARID LANDS.

Mr. CONNELLY of Kansas. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the subject of irrigation of arid lands.

The SPEAKER. The gentleman from Kansas asks unanimous consent to extend his remarks in the RECORD on the subject of arid lands. Is there objection?

There was no objection.

CHANGE OF REFERENCE.

The SPEAKER. The bill (H. R. 9628) to refund to the corporate authorities of Frederick City, Md., the sum of $200,000, exacted of them by the Confederate Army under Gen. Jubal Early, July 9, 1864, under penalty of burning said city, was by mistake referred to the Union Calendar. It should be on the Private Calendar. Without objection, the correction will be made.

There was no objection.

LAWS RELATING TO THE JUDICIARY.

The SPEAKER. The unfinished business is the bill (H. R. 15578) to codify, revise, and amend the laws relating to the judiciary.

Mr. MURDOCK. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MURDOCK. If under the rules a Member should make a motion to dispense with Calendar Wednesday, and that motion should carry, what would be before the House?

The SPEAKER. The naval appropriation bill.

Mr. MURDOCK. There would be no chance to get to either one of the calendars?

The SPEAKER. To answer the gentleman further, of course you could not get the naval appropriation bill up without a vote of the House. If that was voted down, then the ordinary business would be before the House.

Mr. MURDOCK. Which would be the call of committees.

Mr. BARTLETT. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. BARTLETT. If there was a privileged bill on the calendar, that would be in order.

The SPEAKER. Of course, and as a matter of fact, there are two appropriation bills on the calendar.

Mr. MURDOCK. But they would have to be called up, and if they were not called up the Speaker would order a call of committees.

Mr. MANN. Nothing else is privileged.

The SPEAKER. There might be some other privileged matter. Under the rule the House automatically resolves itself into Committee of the Whole House on the state of the Union.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. RUSSELL in the chair.

The CHAIRMAN. The House is now in Committee of the Whole House on the state of the Union for the consideration of a bill of which the Clerk will report the title.

The Clerk read as follows:

A bill (H. R. 15578) to codify, revise, and amend the laws relating to the judiciary.

Mr. WATKINS. Mr. Chairman, on last Wednesday section 13 was temporarily passed so as to allow some information to be obtained. I now ask that that section be read.

The Clerk read as follows:

SEC. 13. In all States and Territories where there are reservations or allotted Indians the United States district attorney shall represent them in all suits at law and in equity.

Mr. WATKINS. For the purpose of getting the matter properly before the House I will move to strike out the last word and ask the Clerk to read the communication from the Commissioner of Indian Affairs, which I send to the desk.

The Clerk read as follows:

DEPARTMENT OF THE INTERIOR,
OFFICE OF INDIAN AFFAIRS,
Washington, May 5, 1914.

Hon. JOHN T. WATKINS,
Chairman Committee on Revision of Laws,
House of Representatives.

MY DEAR MR. WATKINS: I have your letter of April 30, wherein you ask for information as to the provision in the act of March 3, 1893 (27 Stat. L., 631), whereby United States attorneys are called upon to represent Indians in suits at law and equity, and which provision is section 13 of H. R. 15578, a bill to codify, revise, and amend the laws relating to the judiciary.

This provision of law is important and necessary, and should not be stricken from the bill under consideration by your committee.

Not many of the Indians, considering the entire population, are in a position to employ counsel to represent them in legal proceedings. There are but few tribal attorneys, and it is doubtful whether it might be considered a part of their duties to represent the Indians. This section of law therefor affords, in many instances, the only means of procuring counsel for the Indians in order to prosecute or defend their rights, and is a necessity of which they should not be deprived.

I earnestly recommend that the item be left in the bill.

Very truly, yours,

CATO SELLS, *Commissioner.*

Mr. STEPHENS of Texas. Mr. Chairman, in the State of Oklahoma each of the Five Civilized Tribes have employed an attorney at a stipulated price, who attends to all the business of these Indians as tribes and as allotted individuals. What I desire to ask the gentleman is whether or not the authorization of the United States attorneys under this section 13 would in any way repeal the law regulating the duties of these employed attorneys by the tribes?

Mr. WATKINS. From the communication which I have had read from the Commissioner of Indian Affairs I do not think so. They are familiar with the facts in the matter, and they say the section should be left in for the protection of the Indians, and that it would in no way conflict with any other law.

Mr. STEPHENS of Texas. I think it necessary that they should be represented by competent counsel. There are no Indians that have employed attorneys except the Five Civilized Tribes.

Mr. GREEN of Iowa. This section in the bill is the present law?

Mr. STEPHENS of Texas. Mr. Chairman, I asked the question in order to know what would be the result if there was a conflict between the two authorities. I suppose they will settle that among themselves. I think the law is a good one. I have no objection to it.

Mr. WATKINS. Mr. Chairman, I withdraw the pro forma amendment.

Mr. STAFFORD. I think some action ought to be taken on section 13.

The CHAIRMAN. The gentleman can make a motion to strike the section out if he desires.

Mr. WATKINS. Mr. Chairman, it was simply passed over for further consideration.

Mr. STAFFORD. With no motion pending?

Mr. WATKINS. No.

Mr. STAFFORD. Did the gentleman ask to return to that section?

Mr. WATKINS. Yes; on last Wednesday I asked to postpone consideration of that section until to-day, and this morning the section has been reread, and a communication from the Commissioner of Indian Affairs has been read to show that it is necessary to remain in the statute.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 36. Every clerk of a district court or circuit court of appeals, before entering upon the duties of his office, shall give bond to the United States in a sum not less than five thousand and not more than forty thousand dollars, to be determined by the Attorney General, with sufficient sureties, to be approved by the court for which he is appointed, faithfully to discharge the duties of his office, and to lawfully account for, pay over, and disburse all moneys received by him as clerk;

and seasonably to record the decrees, judgments, and determinations of the court for which he is clerk. Whenever the business of the courts in any judicial district shall make it necessary in the opinion of the Attorney General for the clerk to furnish greater security than the official bond theretofore given, a bond in a sum not to exceed $40,000 shall be given when required by the Attorney General, who shall fix the amount thereof. It shall be the duty of the district attorneys, upon requirement by the Attorney General, to give 30 days' notice of motion in their several courts that new bonds, in accordance with the terms of this section, are required to be executed; and upon failure of any clerk to execute such new bonds his office shall be deemed vacant. All bonds given by the clerks shall, after approval, be recorded in their respective offices, and copies thereof from the records, certified by the clerks respectively, under seal of court, shall be competent evidence in any court. The original bonds shall be filed in the Department of Justice.

Mr. WATKINS. Mr. Chairman, I offer the following committee amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Page 15, line 9, after the word "appeals," insert the words "including the clerks of the district courts for Hawaii and Porto Rico."

The CHAIRMAN. The question is on agreeing to the amendment.

Mr. STAFFORD. Mr. Chairman, I should like to inquire of the chairman of the committee whether there is any necessity for extending the provision to include the district courts of the Territory of Alaska?

Mr. WATKINS. Mr. Chairman, in the organic act of Alaska that is provided for and it is not necessary.

Mr. STAFFORD. Does not the gentleman think there should be some provision incorporated in the codification?

Mr. WATKINS. No; that will be attended to when we reach that in its regular order, if we ever succeed in doing so.

Mr. STAFFORD. If the chairman is to give consideration to that later, I do not want to press it.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. WATKINS. Mr. Chairman, I have another committee amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Page 15, line 14, after the word "office," strike out the words "and to lawfully account for, pay over, and disburse all moneys received by him as clerk" and insert in lieu thereof the following: "And to lawfully account for all moneys received or earned by him as clerk."

Mr. WATKINS. Mr. Chairman, the object of the amendment is simply to compel the clerk to account for the money earned by him as well as fees received by him.

Mr. STAFFORD. Mr. Chairman, will the gentleman yield?

Mr. WATKINS. Yes.

Mr. STAFFORD. I understand that under the existing practice the clerks are entitled to collect certain prescribed fees, and then if the fees are in excess of the salary for that office he is obliged to turn the excess amount over to the Government. Would not this provision compel him to turn all of the fees over, regardless of whether they are a part of his salary or not?

Mr. WATKINS. Yes; it would require him to account for them, but not to absolutely turn them over.

Mr. STAFFORD. I understood the amendment proposed by the gentleman was to account for and pay over all moneys received and earned?

Mr. WATKINS. Mr. Chairman, I will state to the gentleman the status. Further on in the bill the gentleman will find that the clerks are placed on a salary basis. They are required to charge certain fees of office. Those fees of office are accounted for and paid over, but while they are paid over, if there is an excess over the amount of the salary which is designated in the bill, which is $5,000, that excess goes into the Treasury. If it does not reach more than that amount, then the clerk in effect retains the fees, but the fees must be accounted for and paid over. In other words, the clerks are to be paid salaries, but at the same time they account for and pay over the fees of office.

Mr. STAFFORD. At the present time, as I understand it, all the clerks are on a fee basis.

Mr. WATKINS. Yes; they charge fees and collect those fees, and by the provisions of this bill if the fees aggregate more than $5,000, then the fees are turned over into the Treasury, and if they do not amount to more than $5,000, the salary of the clerk is paid out of the fees.

Mr. STAFFORD. The salary of all clerks at the present time is not in excess of $5,000, provided the fees equal that amount?

Mr. WATKINS. That is correct, so far as this bill provides.

Mr. STAFFORD. And it is proposed in a subsequent provision in this bill to change that system and prescribe definite salaries for the clerks?

Mr. WATKINS. That is, they are placed on a salary basis, and the reason for that is this: There were clerks of the district court and clerks of the circuit court, and those clerks are now doing only the work of the district court, because the circuit courts have been abolished. In effect, they have double the work that they used to have. They used to get $3,500 and fees.

Mr. STAFFORD. The provisions which the committee have incorporated in the bill prescribe stated salaries for the clerks. Has the gentleman followed the bill recommended by the Committee on the Judiciary, which is now upon the calendar, prescribing the salaries of clerks?

Mr. WATKINS. No. That bill has not yet become a law. We did not feel authorized to incorporate that because of the fact that the commission which was authorized to do that class of work had not passed upon it. Wherever the commission, authorized to embody in their revision new laws, and they recommend it, we incorporate that new law, but unless the law had actually been passed by Congress we did not feel authorized to insert any new law.

Mr. STAFFORD. Did the committee incorporate in this instance and in the other instances the recommendations of the commission without passing upon the merits of the proposition?

Mr. WATKINS. I might say that largely we did.

The CHAIRMAN. The time of the gentleman from Louisiana has expired.

Mr. STAFFORD. Mr. Chairman, I ask that his time be extended for five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. WATKINS. Mr. Chairman, I will say that there are several instances in which I, as chairman of the committee, and members of the committee would have slightly changed the phraseology, and in some instances we might possibly have changed the substance, if it had not been for the fact that we were afraid of causing a confusion and a conflict with the decisions already rendered and bringing about an entanglement. For that reason we were so cautious as to go substantially by the recommendations of the commission until we came to a law that had been repealed or amended. When that had been done, we felt compelled under our duties to leave out the law repealed and put the language of the new law in the bill.

Mr. STAFFORD. Now, as I recall—perhaps my memory is at fault—when the joint committee, of which Judge MOON was chairman, had charge of this judiciary title in the Sixty-first Congress, it was stated that they did not necessarily follow the recommendations of the commission, but that in many instances they departed from the recommendations and failed to incorporate their recommendations in their report. Am I correct or not in that position?

Mr. WATKINS. I will state to the gentleman that being a member of the Committee on the Revision of the Laws at that time, and having passed upon that bill, I can state correctly that almost entirely the report of the commission was adopted. There may have been some few instances where the phraseology was slightly changed or an instance or two where the idea of the commission might have been changed, but they were rather the exceptions if at all. I believe I understand what the gentleman is referring to, and that was the abolition of the circuit courts; but that was the recommendation of the commission, if that is what the gentleman had in mind.

Mr. STAFFORD. It was not only limited to that instance throughout that large bill, but the committee departed from the recommendations of the permanent codification commission.

Mr. WATKINS. I just received on yesterday a letter from Hon. W. D. Bynum, a member of that commission, in which he calls my attention to the fact that the proposition by the gentleman is not correct, but that in fact, substantially to all intents and purposes, the entire codification as recommended by the commission was enacted in the bill known as the judiciary title No. 1.

Mr. STAFFORD. Now, that brings up the question which was before the committee last week, as to the inability of the committee to obtain the very valuable notes and work compiled by the joint committee, which, upon the death of Senator Heyburn, were transferred to the Secretary of the Senate for safe keeping. As I recall, the gentleman said he made a request upon the Secretary or some person connected with the Senate for the use of these papers and that they were refused. I am authoritatively informed—and I am considerably interested in this, as all members of the committee are, because we know that the attorney assigned by the Department of Justice, Mr. Lott, who is still connected with the service, was a most painstaking and efficient official and performed very conscientious work in going over the report of the commission——

The CHAIRMAN. The time of the gentleman has again expired.

Mr. STAFFORD. Mr. Chairman, I ask unanimous consent that the gentleman's time may be further extended for five minutes.

The CHAIRMAN. The gentleman from Wisconsin asks unanimous consent that the time of the gentleman from Louisiana may be extended for five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. STAFFORD. And that that data is now available for the committee, if they desire it—that the Secretary of the Senate replied to the gentleman when he received the chairman's request that it was only necessary to have some order of the Senate, so that the Senate might be able to have this data now in their possession returned whenever it was necessary, and that the Secretary of the Senate, in his letter to the gentleman, requested him to call upon him and arrange for an interview with some Senator who was a member of this joint committee, whereby some arrangement could be made, and that thereafter he received no reply whatsoever from the gentleman, the chairman of the committee.

Mr. WATKINS. Now, in reply, I wish to state, to begin with, that Judge Lott was a most valuable employee to the Joint Committee on Revision of the Laws of the House and Senate, as well as a member of the former commission, the labors of which ceased in 1906, and that Mr. Bynum was also a very valuable member of that commission to codify and revise the laws.

Mr. STAFFORD. He was a member of the commission?

Mr. WATKINS. He was a member of the commission, a very able man, a very efficient man from my experience in doing this work, and I have been in communication with both of them. More than that, I have been in communication with the brother of Senator Heyburn, who was also employed as a special employee by the Joint Committee on the Revision of the Laws, and have had assistance for a part of the time of Judge Lott during the arrangement of this bill, preparing the bill for the House, and I was assured that there would be no trouble at all; and following the suggestion of each and every one of them that there would be no trouble at all in having the papers which went in the report of the Senate placed in the hands of the committee which was doing the actual work of codification, I have no complaint to make of the Secretary of the Senate as to the course he took. I do not intend to reflect upon him at all. We were advised as to the location of these papers, and I addressed, with all respect and deference, this communication, and when it was received it had such conditions and such requirements connected with it I did not feel like it was necessary, that with the assistance which the committee had and in the progress we were making with it and with the benefits which we were deriving from the work which we had before us of the commission, the volume containing the work of the commission, we did not consider it necessary that we should comply with the conditions as a prerequisite that were put upon us by the Secretary of the Senate.

Mr. STAFFORD. As I understand the situation, the Secretary of the Senate only stated that at that time he could not deliver over this valuable data, but that he requested an interview with the gentleman so as to have an order of the Senate passed whereby these documents could be transferred to the committee—to my mind a very reasonable request—and that no notice whatsoever was taken by the gentleman or his committee to that request; and the reason for making the request for an interview was this, that Senator SUTHERLAND, who was formerly a member of that joint committee, believed that this joint committee would probably be re-created; and if it is the Senate will have need again of this valuable compilation.

Now, for one I recognize that this data as compiled by Mr. Lott would be of valuable service to the committee, and as this bill is likely to consume all the Calendar Wednesdays from now until the end of the session, and as the committee could have the use of that between Wednesdays to go over, I can see where the committee could obtain most valuable information for the use of the House if the gentleman would but apply to the Secretary for those documents.

The CHAIRMAN. The time of the gentleman has expired.

Mr. WATKINS. Mr. Chairman, I would like to have just two or three minutes to answer that last question.

Mr. STAFFORD. Mr. Chairman, I ask unanimous consent that the gentleman may proceed for three minutes.

The CHAIRMAN. The gentleman from Wisconsin asks unanimous consent that the gentleman from Louisiana may proceed for three minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. WATKINS. I will state to the gentleman that while the requirements of the Clerk do not on their face appear unreasonable, it was not, on account of the controversy which had arisen with reference to the re-creation of this joint committee, deemed advisable by the chairman of the Committee on Revision of the Laws to comply with the requirements and stipulations made by the Secretary of the Senate. It is not necessary to go into detail to explain why this joint committee has not been re-created. But there are reasons which are supposed by some to be sufficient reasons. It may be that it is best that the joint committee should not be appointed. I do not know. That is in controversy. But, so far as the chairman of the Committee on Revision of the Laws is concerned, the bill has been introduced by the chairman as an individual Member of the House, to ask for the appointment of this joint committee, and that has laid in the committee room without any action on it at all.

Mr. STAFFORD. The gentleman will agree that this work on which Mr. Lott was engaged for so many years, and which is now in possession of the Senate, would be a valuable aid to his committee in passing upon these sections, because it represents the work of Mr. Lott, who was employed for years and years by the commission and later by the joint committee.

Mr. WATKINS. I suppose it would; but we did not know of the location of it until we had nearly finished the bill.

Mr. STAFFORD. Until about March of this year?

Mr. WATKINS. Along about there.

Mr. GREEN of Iowa. Mr. Chairman, I ask that the amendment be again reported. I could not hear it distinctly before.

The CHAIRMAN. Without objection, the amendment will be again read.

The amendment was again reported.

Mr. GREEN of Iowa. Mr. Chairman, I do not understand the necessity for this amendment. I do not wish to be captious, but it seems to me that the language as it stands now is superior to that which is proposed by the amendment. A clerk can not account for moneys that he does not receive, and I fail to see the object of this provision.

Mr. WATKINS. Will the gentleman permit an interruption?

Mr. GREEN of Iowa. Certainly.

Mr. WATKINS. I will say to him that the clerk simply accounts for moneys. He is not required to pay over any money which he does not receive, but he simply accounts for it, because he charges up every item in his fee bill when he does the work, and the Government is to get the benefit of it, and the officials of the Government must know to whom to look to make collection of the amount.

Mr. GREEN of Iowa. I fear the gentleman has not correctly taken the definition of the word "account." In my opinion it does not include such action as is referred to by the chairman. I think that a man can not account for funds which he has not received.

Mr. WATKINS. You will see the words "pay over" were left out of the amendment.

Mr. GREEN of Iowa. It is true the words "pay over" are left out of the amendment, but that does not help the situation. All of this language, in my judgment, could be left out of the bill without any injury, because if a clerk correctly discharges the duties of his office as is provided by the language preceding——

Mr. BARTLETT. May I suggest to the gentleman that certainly the word "disburse" ought not to be left out of the bill, because the clerk is the register of the court, and he holds the money that is deposited with the register of the court, and he disburses it, and only disburses it upon certain orders of the judge? He deposits it in the bank and pays it over to those entitled to it. I think the word "disburse" should be left in the bill.

Mr. GREEN of Iowa. But that is left out by the amendment, as I understand.

Mr. BARTLETT. That is left out. And the words "pay over" ought to be left in, because he has to account for and pay over the amount that is received for salaries. If the fees in the office exceed the amount paid for salaries, he has to pay that over to the United States and account for it.

Mr. GREEN of Iowa. I will say that if any of these words appear in the bill, this word "disburse" ought to be there also.

Mr. BARTLETT. I think so, too.

Mr. GREEN of Iowa. I think the amendment as now proposed——

Mr. MANN. Will the gentleman from Iowa [Mr. GREEN] yield for a question?

Mr. GREEN of Iowa. With pleasure.

Mr. MANN. As I understand the amendment, it only requires the clerk to account for the fees received or earned. It does not require him, as the present bill reads, to pay over the money. So would it not be the case that fees earned, but not received, the clerk would account for by so stating?

Mr. GREEN of Iowa. That would be true only, I think, as to fees which have been actually received. I am at a loss to understand how a man can account for money he has never received.

Mr. MANN. This does not say "moneys." This says "fees earned." He can account for fees earned as earned, but not collected, as it seems to me, under that amendment.

Mr. GREEN of Iowa. The original provision was "moneys earned." I have forgotten the exact provision in the amendment.

Mr. MANN. No; this provision is to lawfully account for and pay over and disburse all moneys received by him as clerk. I do not know that the word "moneys" would make any difference. This provision requires him to pay over.

The CHAIRMAN. The time of the gentleman from Iowa [Mr. GREEN] has expired.

Mr. GREEN of Iowa. Mr. Chairman, I ask unanimous consent to proceed for three minutes more.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. MANN. Now, under the amendment he is not required to pay over moneys that he has earned but not collected, but to account for them. In other words, he has to account for all the fees earned. He may account for them as being part not collected. If he collects them, then he must account for the disposition of the money. I am using positive language, but I am asking for the gentleman's judgment more than expressing a judgment of my own.

Mr. GREEN of Iowa. I am inclined to think the gentleman from Illinois is correct as to the words "pay over," which ought to go out of the bill in any event, because the clerk receives certain money which he may not be required to pay over. But the clerk also earns money that he never receives, and, therefore, in my judgment, is under no obligation to account for it other than to make the necessary record in his books, which he would do if he discharged the duties of his office faithfully.

The CHAIRMAN. The time of the gentleman has expired. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. WATKINS. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Louisiana.

The Clerk read as follows:

Page 15, line 22, strike out the word "forty" and insert the words "one hundred."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 37. In case of a breach of the condition of a bond of a clerk of a circuit court of appeals or district court, the United States or any person thereby injured may institute suit on said bond, and thereupon recover such damages as shall be legally assessed, with costs of suit, for which execution may issue in due form. If individual suing fails to recover in the suit, judgment shall be rendered and execution may issue against him for costs in favor of the defendant; and in case the United States shall fail to recover, costs of the suit shall be borne by the Government.

Mr. BARTLETT. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Georgia moves to strike out the last word.

Mr. BARTLETT. This is a new law. Why is it necessary, I will ask the gentleman from Louisiana, to provide, if the party fails to recover his suit, judgment shall be rendered and issued for costs? Is not that the law now?

Mr. WATKINS. That is with reference to some of the other officials.

Mr. BARTLETT. It is so in all cases except in equity cases.

Mr. WATKINS. We wanted it to apply to all.

Mr. BARTLETT. In every case except equity cases, I understand, that is the practice in the courts of the United States. In a common-law suit, where the party is cast in the suit, judgment for costs follows, unless it be in certain classes of suits where the plaintiff does not recover as much damages as costs, in which event the plaintiff recovers only so much costs as damage. I do not see why it is necessary that in a common-law suit you should say that in case the Government fails to recover, the cost shall be assessed against the Government, as in a case where an individual fails to recover. A chancery judge can in an equity case apportion the costs among the parties according to what he may deem proper and equitable. In a common-law suit it follows, as a matter of course, that the costs follow the verdict and the judgment. I do not see any necessity for this, and I therefore ask why.

Mr. WATKINS. The other officials have this provision applying to them. This is simply made to cover the clerk also.

Mr. GREEN of Iowa. Mr. Chairman, I would like to ask the chairman of the committee a question, whether in line 14, before the word "individual," on page 16, the article "the" is not stricken out?

Mr. MANN. That word "individual" should be stricken out and the words "such party" inserted there.

Mr. GREEN of Iowa. I agree with the gentleman. Mr. Chairman, I move to amend by striking out the word "individual" in line 14 and in lieu thereof inserting the words "such party," in accordance with the suggestion of the gentleman from Illinois [Mr. MANN].

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend, page 16, line 14, by striking out the word "individual" and inserting in lieu thereof the words "such party."

Mr. GREEN of Iowa. Yes. Strike out the word "individual."

Mr. BARTLETT. That might not do, because that might refer either to the Government or the individual.

Mr. MANN. It is identically the language used in section 24. It is the same thing.

Mr. GREEN of Iowa. The word "individual" is not proper there, because it might be a corporation or a firm.

Mr. BARTLETT. I recognize that. Mr. Chairman, I move to strike out all of that paragraph after the word "form," in line 14 of page 16, down to the word "Government," because, it seems to me——

Mr. MANN. If the gentleman will permit, this language in section 37, as to the clerks' bonds, should be the same as it is in section 24 as to marshals' bonds, and, with the change suggested by the gentleman from Iowa [Mr. GREEN], it is identically the same. The other is old law.

Mr. BARTLETT. It may be old law. I will accept the suggestion of the gentleman from Illinois. It occurs to me that lawyers in enacting statutes ought to know the law as it has been ever since the judiciary act of 1789 was passed, and that the party cast in a suit pays the costs in the case.

Mr. MANN. When you provide in the same law for suits on marshals' bonds and on clerks' bonds it should be the same. The other change has already been made.

Mr. BARTLETT. All right. Mr. Chairman, I will withdraw my proposed amendment.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Iowa [Mr. GREEN].

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 38. The said bond shall remain, after any judgment rendered thereon, as a security for the benefit of the United States or any person injured by breach of the condition of the same, until the whole penalty has been recovered; and the proceedings shall always be as directed in the preceding section.

Mr. BARTLETT. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Georgia moves to strike out the last word.

Mr. BARTLETT. I would like to ask the gentleman from Louisiana if that is put in here as new law?

Mr. MANN. I will say to the gentleman that that is the identical language in section 25 as to marshals.

Mr. BARTLETT. I understand the report on this bill proposes to say that the existing law is printed in roman and amendments are printed in italics.

Mr. MANN. I do not think this provision has been in as to clerks' bonds. They are trying to make it uniform as to clerks' bonds, the same as with respect to marshals' bonds.

Mr. BARTLETT. I understand; but I again repeat, Mr. Chairman, that we are simply saying something as new that is a hundred years old. We all know it is as old as the law and as the bond itself.

Mr. MANN. That is true. I suppose it is done more as a matter of convenience than anything else.

Mr. BARTLETT. We are simply writing into the statute what has been the common law in the country and what has been the practice of the courts for over 100 years in this country and for 200 years in England.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn. The Clerk will read.

The Clerk read as follows:

SEC. 40. Every clerk of a district court shall, within 30 days after the adjournment of each term thereof, forward to the Solicitor of the Treasury a list of all judgments and decrees, to which the United

States is a party, which have been entered in said court during such term, showing the amount adjudged or decreed in each case for or against the United States, and the term to which execution thereon will be returnable. He shall also at the close of each quarter, or within 10 days thereafter, report to the Commissioner of Internal Revenue all moneys paid into court on account of cases arising under the internal-revenue laws, as well as all moneys paid on suits on bonds of collectors of internal revenue. The report shall show the name and nature of each case, the date of payment into court, the amount paid on account of debt, tax, or penalty, and also the amount on account of costs. If such money, or any portion thereof, has been paid by the clerk to any internal-revenue officer or other person, the report shall show to whom each of such payments was made; and if to an internal-revenue officer, it shall be accompanied by the receipt of such officer.

Mr. MANN. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Illinois moves to strike out the last word.

Mr. MANN. I would like, if I may, to get a little more accurate understanding of what the italics mean in this bill and as to part 2 of the report of the committee. In this section, line 12, there are inserted in italics the words "is a party," and on page 39 of part 2 of the report of the committee is given what purports to be the existing law that is covered by section 40. But that does not begin to cover what is in this section. It may be that that is an error in part 2 in not containing section 797 of the Revised Statutes, which I have not examined. What I read may be in the existing law:

Every clerk of a district court shall, within 30 days after the adjournment of each term thereof, forward to the Solicitor of the Treasury a list of all judgments and decrees to which the United States is a party—

And so forth. I do not find that language under the head of section 40 as existing law in part 2 of the report. Now, is that the existing law, and inadvertently omitted from part 2 of the report?

Mr. WATKINS. It is inadvertently omitted. I do not know whether it was done at the Printing Office, or where.

Mr. MANN. I am not criticizing it or seeking to embarrass the committee in any way. I simply want to fix definitely in my mind what the italics mean. When you insert the italics "either party," I want to know whether that is or is not the existing law.

Mr. WATKINS. That was through an oversight at the Printing Office, or at some other place.

Mr. MANN. That might easily happen. I have no criticism to make of an oversight of that sort.

Mr. WATKINS. I will say to the gentleman, however, that the words "either party" are new words, which have been substituted for the words "or parties."

Mr. MANN. That is all right.

The CHAIRMAN. If there be no objection, the pro forma amendment will be withdrawn, and the Clerk will read.

The Clerk read as follows:

SEC. 45. If any clerk of any district court or circuit court of appeals of the United States shall willfully refuse or neglect to make any report, certificate, statement, or other document required by law to be by him made, or shall willfully refuse or neglect to forward any such report, certificate, statement, or document to the department, officer, or person to whom, by law, the same should be forwarded, the President of the United States is empowered, and it is hereby made his duty in every such case, to remove such clerk so offending from office by an order, in writing, for that purpose. Upon the presentation of such order or a copy thereof, authenticated by the Attorney General of the United States, to the judge of the court whereof such offender is clerk, such clerk shall thereupon be deemed to be out of office, and shall not exercise the functions thereof. Such district judge, in the case of the clerk of the district court, shall appoint a successor; and in the case of the clerk of a circuit court of appeals, the circuit judges shall appoint a successor. And such person so removed shall not be eligible to any appointment as clerk or deputy clerk for the period of two years next after such removal.

Mr. BARTLETT. Mr. Chairman, in line 10, page 19, it provides that—

Upon the presentation of such order or a copy thereof, authenticated by the Attorney General of the United States, to the judge of the court whereof such offender is clerk, such clerk shall thereupon be deemed to be out of office and shall not exercise the functions thereof.

Ought there not to be some provision made for something further than the mere presentation of the order to the judge? Ought there not to be some record made somewhere in the court of the receipt of the order and of the fact that the clerk has been removed?

Mr. WATKINS. It is an official order, and this is the old law.

Mr. BARTLETT. It may be the old law, and yet it may be objectionable. There ought to be some record of the removal in the court from which the clerk is removed, not simply the presentation of an order to declare the office vacant. I do not care to do anything more than simply to call attention to it.

The CHAIRMAN. If there be no objection, the pro forma amendment will be considered as withdrawn, and the Clerk will read.

The Clerk read as follows:

SEC. 50. No person shall at any time be a clerk or deputy clerk of a United States court and a United States commissioner without the approval of the Attorney General; and no marshal or deputy marshal, attorney or assistant attorney of any district, jury commissioner, clerk of marshal, no bailiff, crier, juror, janitor of any Government building, nor any civil or military employee of the Government, except as in this chapter provided, and no clerk or employee of any United States justice or judge shall have, hold, or exercise the duties of United States commissioner. It shall not be lawful to appoint any of the officers named in this section receiver or receivers in any case or cases now pending or that may be hereafter brought in the courts of the United States.

Mr. BARTLETT. Mr. Chairman, in the existing law there is a provision that clerks or deputy clerks must not be related to the judge within a certain degree of affinity or consanguinity.

Mr. WATKINS. Yes.

Mr. BARTLETT. That seems to have been left out. There is a provision in the existing code that the clerk or deputy clerk shall not be related to the judge in the fourth degree of affinity or consanguinity. Here you fix the qualifications of the clerk and prescribe certain things that shall disqualify him; but if this is a revision of the law, if you leave out the prohibition with reference to relationship, why does not that repeal the existing provision?

Mr. WATKINS. This simply relates to the holding of two offices at one time by the same person. It does not refer to the qualifications as a whole. The other provision still stands. This does not repeal it at all.

Mr. BARTLETT. This says—

No person shall at any time be a clerk or deputy clerk of a United States court and a United States commissioner without the approval of the Attorney General—

and you here prescribe what a man shall not do; and one of the exceptions to the existing law is left out of the qualifications.

Mr. MANN. Mr. Chairman, I move to strike out the last word. Under section 45 you provide for the removal of a clerk. He is at once removed upon the presentation of a certain order. Then you provide that the court may appoint a clerk. When can that newly appointed clerk perform any duties as clerk?

Mr. WATKINS. Immediately after he is appointed and gives the bond which is required of all clerks and takes the oath.

Mr. MANN. Section 50 says that no man shall at any time be a clerk without the approval of the Attorney General. Now, when you remove a clerk instantly, upon the presentation of a paper to him, and the district court appoints a clerk, is it possible to get the instantaneous approval of the Attorney General for the appointment?

Mr. WATKINS. There would be no objection to inserting the words "when he is qualified under the general law"; but the law covers that when it provides how he shall be appointed and how he shall be qualified. That would apply to the clerk so appointed as well as to any other clerk.

Mr. MANN. I suppose the matter must be covered somewhere in some way, if such a clerk has ever been removed; but here you provide that the clerk instantly goes out of office. Now, the court must have some one to perform the duties of clerk. Therefore you provide that the court may appoint a clerk. Then you provide that the clerk can not act until his appointment has been approved by the Attorney General.

Mr. WATKINS. There is a provision in the statute that the deputy clerk shall perform the duties of clerk until the successor of the clerk has qualified.

Mr. MANN. That may cover it.

Mr. BARTLETT. The old law covers that.

Mr. MANN. He can not act as clerk until after his appointment has been approved by the Attorney General.

Mr. BARTLETT. That is true.

Mr. WATKINS. That is correct; but the deputy clerk goes on with the work until the new clerk is qualified.

The CHAIRMAN. If there be no objection, the pro forma amendment will be considered as withdrawn, and the Clerk will read.

The Clerk read as follows:

SEC. 52. The judge of the district court of each district shall appoint a stenographer for such court, who shall hold his office during the pleasure of the judge: *Provided*, That when there are two or more judges for the same district each judge shall be entitled to appoint a stenographer for his court. Before entering upon said office he shall take and subscribe an oath well and truly to perform the duties of the same and shall file said oath with the clerk of the court.

Mr. MANN. I move to strike out the section. Is this now provided for by law in any way?

Mr. WATKINS. No; it is not.

Mr. MANN. How does it get into a codification bill?

Mr. WATKINS. It was recommended by the commission. It is placed here for the purpose of facilitating the progress of trials in the courts.

Mr. MANN. Oh, well, I do not think it will facilitate the progress of trials. Here is a proposition to have practically no one permitted to serve as stenographer in a court except the official stenographer, or some employee of the official stenographer. In a large city that is rank monopoly and ought never to be permitted. It is proposed to insert that in a codification bill. In my city, where the courts or some of them are sitting all the time, of course one stenographer can not do the work. That means that you will have an official stenographer who will have a lot of employees. That means usually that people who want correct transcripts do not want to take the transcript of the official stenographer, although they will have to pay for it.

Now, why should they be put to that burden? What is the trouble with existing conditions? It may be necessary while a court is seldom in session to have an official stenographer there and pay him a salary. We do not have to pay official stenographers salaries in these places where the courts are continuously in session, or in session much of the time, and I can see no reason why the Government should do it. How many judges are there?

Mr. GREEN of Iowa. Will the gentleman yield?

Mr. MANN. I am trying to get some information as to why this unusual provision should appear in a codification bill.

Mr. GREEN of Iowa. There is no provision now to pay a reporter.

Mr. MANN. There is no provision in this bill for paying the salary of the reporter. Section 93 says it shall be fixed by the Attorney General.

Mr. GREEN of Iowa. It might be added also that in the rural districts the Federal courts do not sit in continuous session and the reporter would not have a great deal to do. If he was employed at any ordinary salary he would get a great deal more than his services would be worth.

Mr. MANN. Section 93 provides for a salary to be fixed by the Attorney General, payable monthly, and in addition that they may collect and receive of the party requiring a transcript the sum of 10 cents per folio for the same. Of course you could not expect a stenographer to do all the work for the salary that he would receive. There is no reason in New York City, Philadelphia, Chicago, and various other places in the country where the courts are practically in continuous session for giving a monopoly to the judge as to designate who may take down the testimony in his court. He may appoint one stenographer, but there may be a dozen employed. The stenographer will let that out, hire others, and then get a rake-off on it. That is what will be done. It will become a public scandal if this provision goes into the bill. We will be paying a stenographer a salary, and in my town the chief stenographer may be making ten or twenty thousand dollars on the side and having the work done by persons whom he employs. And this in a codification bill, too; I do not see any excuse for it.

Mr. SCOTT. Mr. Chairman, I desire to call attention to the further fact, in addition to what the gentleman from Illinois has said, that in the rural districts—and when I say "rural districts" I mean such States as Iowa, Minnesota, the Dakotas, and Nebraska—and all through the West, the Federal courts sit at numerous places in the district. They only hold court a few days at a time in one division. It is customary, and I think almost universal, for the Federal courts to use the official stenographers of the local courts. To illustrate, in my city, which is a small one, we have four official stenographers. There is never any difficulty in having one or even two of these to attend the sessions of the Federal court. That is a great convenience locally throughout the division in which the court may be sitting. It is a convenience in this way, that when attorneys desire transcripts of evidence to perfect records they can get access to the local stenographers very easily and get their work done quickly. Otherwise, if the stenographer follows the court about, they have to send off to some other division. With four or five divisions within a district you never know where the stenographer is if he is following the court about. You write for a transcript, and he is probably off in another division 50 or 60 miles away by the time you get your letter there. It requires from a week to two weeks to get the smallest transcript of these cases, whereas you can get the accommodation almost immediately where the record is kept in the place where the reporter resides and where the notes are filed. It seems to me this would be followed by great inconvenience throughout the larger parts of the country.

Mr. WATKINS. Mr. Chairman, when the gentleman from Illinois first made the motion to strike out the section he asked as to the number of district judges. From the best data I have there are 92 district judges, not including Alaska, Porto Rico, and the Hawaiian Islands. On the proposition to strike out the section, I will say that the commission has recommended that there be official court stenographers provided for, and they give this as a reason for it:

> The value of shorthand notes of testimony and other proceedings in expediting trials and insuring accuracy in bills of exception and transcripts on appeal is abundantly established in experience. It is believed to be desirable that this duty shall be performed by a sworn officer of the court, with such provisions as will secure the preservation of the notes. The laws of nearly all the States provide for court stenographers, and there are abundant considerations of convenience and economy which dictate that the laws of the United States should no longer fail to do so.

There is a vast difference between stenographers who are competent to be appointed as official stenographers of courts and a stenographer who might be called into the case in the city or hamlet, jerked up all of a sudden and placed in court to take stenographic notes of a technical nature. The trial might be full of technical features that the ordinary stenographer would not be familiar with. It is a great detriment to the work, for a green stenographer who may be able to take and transcribe notes from dictation in a law office, or a stenographer taken from a counting house who was not an expert in legal work, on account of the mistakes and errors that he would fall into. In such cases it is a great detriment to the parties litigant, and is in every way objectionable.

Now, Mr. Chairman, this is purely for the purpose of putting them on an official basis, to regulate their conduct by rules established by the court, and make them amenable to the court under those rules. I think it is proper that official stenographers should be provided for. Not only do the commissioners recommend this, but this particular provision has been gone over carefully by those who are interested in seeing that the laws are properly enforced and that only proper laws are passed, and that the official conduct of the court shall be governed as far as possible by certain rules and regulations established by order of the court. This is not a hasty conclusion which the committee has come to, but it is after due and careful deliberation that these various sections were put into this codification.

Mr. MANN. Mr. Chairman, I appreciate the fact that this committee did not insert these sections in the bill but that they came originally through the commission that was appointed.

It was not the duty of the commission to insert it, nor was the commission composed of those practical lawyers who knew about such things. It is absolutely impossible in the large cities to comply with this provision and ever get the work properly done. What can you expect of a stenographer, for instance, who is requried to make a transcript with a provision in the law that when such service is rendered on behalf of the United States, or when the judge requires such a copy to assist him in rendering a decision, the stenographer shall make no charge? I understand that is the provision of the bill. Does the gentleman so understand it?

Mr. LLOYD. On page 93 there is a provision in the bill which authorizes the payment of a salary to the stenographer.

Mr. MANN. I understand; but what are you going to do about the salary? Here is a case, we will say, where the United States is one of the parties, and the trial may proceed for three or four months. That is not such an infrequent case. Does the gentleman think that we can fix a salary under which a stenographer will furnish a transcript of the testimony to the Government for that length of time for nothing?

Mr. LLOYD. Section 93 provides that the stenographer of the district court shall receive such salary as the Attorney General shall from time to time determine. If there was such a case as that which the gentleman states and the attention of the Attorney General were called to it, he would be entitled to see to it that the individual receive proper compensation.

Mr. MANN. I do not think he would. I do not think the Attorney General can fix a salary for a particular case.

Mr. BARTLETT. He has to have the money appropriated first with which to pay it.

Mr. MANN. And he can not fix it, anyway, unless the money is appropriated. In the one case you will not get a good report, because it would take a corps of stenographers to take the testimony for three months, and you could not get the work done if they received no compensation except a salary, because that would mean they would furnish the transcript for nothing. In the case of a private individual, you will not get good official stenographic work done for him.

Mr. LLOYD. I do not know how it will work out in the city courts, but I know that in the State courts, especially in the State of Missouri, with which I am somewhat familiar, we had this very trouble, and we changed the law so as to provide that every circuit court should have its official stenographer. The circuit judge appoints a stenographer, and since that law has been in effect we have had very little trouble with transcripts and very little trouble with the stenographers. Prior to

that time in many places in the State of Missouri the courts were not able to secure good stenographers; but now the stenographer receives a salary and receives compensation, and the result is that we have competent people.

Mr. MANN. I have no objection to a provision which would authorize the court to appoint a stenographer where it is necessary to have an official stenographer to get a transcript of the testimony.

Mr. LLOYD. But we have found this in Missouri: That the wisest course was to provide for official stenographers. Then there is never any question about what the record is, because the official stenographer's record is the record. Prior to that time, not having an official stenographer, very frequently questions arose as to what the testimony was.

Mr. MANN. And the question very frequently will arise now as to what the testimony is, because you will not get competent stenographers in this way. We have some official stenographers in our town, in some of the State courts, and, for aught I know, they perform very good service; but they do not receive a salary, nor do lots of lawyers accept their services, and they keep perpetually rowing about it, as I understand.

Mr. LLOYD. Mr. Chairman, I feel very sure that under the national law it would be the same thing as under the State law. Under the State law, where the judge appoints a stenographer, he feels to some extent responsible for the character of the person that is employed, and the result is that we have the very best stenographers there are employed by the courts.

Mr. MANN. Yes; but the gentleman knows perfectly well that one stenographer can not take the testimony. We have five or six stenographers to take the proceedings of this House, which only lasts five or six hours a day.

Mr. LLOYD. But the court will be just as particular in selecting two stenographers as in selecting one.

Mr. MANN. The court can select only the chief stenographer. He has nothing to say about the subordinates who will be hired to perform the work, giving a rake-off to the chief.

Mr. LLOYD. But that chief stenographer is responsible to the court, and if the work is not properly done it may be expected that the chief stenographer will lose his place. That is what the gentleman would do and what any sensible man would do in administering the law.

Mr. MANN. You can not do it. I have had practice enough to know that this is not workable.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois.

The question was taken; and on a division (demanded by Mr. WATKINS) there were—ayes 10, noes 10.

Mr. MANN. Mr. Chairman, I would demand tellers if there was any way of getting them; but considering the fact that it takes 20 Members to order tellers and there are only 20 Members present, 10 voting the other way, I shall not make the demand. I am not going to make the point of no quorum, because this bill was dead when it was born.

So the amendment was rejected.

Mr. MANN. Mr. Chairman, I move to strike out the first word "shall" on page 21, line 25, and insert in lieu thereof the words "may, at his discretion."

Mr. LLOYD. Mr. Chairman, we have no objection to that amendment.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Illinois.

The amendment was agreed to.

Mr. NORTON. Mr. Chairman, I offer the following amendment:

Line 25, page 21, strike out the words "a stenographer" and insert in lieu thereof the word "stenographers."

Mr. LLOYD. Would it not be better to add the words "or stenographers," and then if only one stenographer be needed only one will be appointed, and if he needs more than one it would give him authority to appoint more than one.

Mr. NORTON. Yes; I think it would be better wording, and I will offer that as an amendment. On page 21, line 25, after the word "stenographer," insert the words "or stenographers."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 21, line 25, after the word "stenographer," insert the words "or stenographers."

Mr. BARTLETT. Mr. Chairman, I do not think that this amendment ought to be adopted. The present provision is one which I thought ought to have been stricken out; but as long as we have got it we ought to keep it as good as we can. The present provision is that the judge of the district court of each district shall appoint a stenographer for such court, and so forth, and it also provides on the next page where there are two or more judges for the same district, each judge shall appoint a stenographer for his court. Now, there are some districts in which there are two district judges—Alabama has three judges and two districts, so we will have in one district a judge who can appoint a dozen stenographers.

Mr. NORTON. I think he should have that right.

Mr. MANN. May I ask the gentleman a question?

Mr. BARTLETT. Yes.

Mr. MANN. The gentleman knows in a good many districts the district court holds court in a number of different cities.

Mr. BARTLETT. Yes.

Mr. MANN. Now, in those cities in general there are local stenographers.

Mr. BARTLETT. Yes.

Mr. MANN. Now, we pay the expenses of the judge traveling around $10 a day in addition to his compensation, but we aim to have deputy marshals and deputy clerks in those towns. Why should not we have a local stenographer in those towns to act as stenographer for the court instead of requiring an official stenographer to travel around with the judge at probably an expense of another $10 a day?

Mr. BARTLETT. Well, I do not think we ought to have the judge to appoint one man to be the official stenographer of the court. His compensation is to be fixed by the Attorney General and the provision carried in the legislative, executive, and judicial appropriation bill provides for the money for the payment of stenographers.

Mr. NORTON. Will the gentleman yield?

Mr. BARTLETT. Yes.

Mr. NORTON. If the gentleman lived in a district where the court was held in five or six different towns——

Mr. BARTLETT. That is exactly my condition; I live in a district where the court is held in a number of towns.

Mr. NORTON. Would not the gentleman prefer to have a stenographer appointed by the court in his town who would take the testimony in the court in session in that particular town, so that if he wanted a transcript he could get it readily and promptly rather than to be obliged to search all over the district to find where the court stenographer may be at any certain time?

Mr. BARTLETT. I have had some experience in the testimony taken in certain investigations in the district, and in my State the lawyers have certain difficulties in securing transcripts in cases where these stenographers are appointed by the judge. I think myself that the judge ought not to be permitted to appoint but one of these stenographers permanently, and if the court needs another stenographer in another case or in a particular emergency, why, then, we may be able to secure them, but to have a Federal judge or any other judge to appoint all over the district an unlimited number of stenographers, without any limit, according to this amendment, does not seem to me to be proper. He is not supposed to appoint one for each town he holds court in. He may appoint a stenographer in every district, and I am not willing, as far as I am concerned, to confer that power upon the Federal judiciary.

The CHAIRMAN. The time of the gentleman has expired.

Mr. NORTON. Mr. Chairman——

Mr. WATKINS. I did not understand whether the gentleman rose to discuss the amendment.

Mr. NORTON. To discuss the amendment.

Mr. WATKINS. Then I will wait until the gentleman has finished, as I would like to be heard on the amendment.

Mr. NORTON. Mr. Chairman, I know from what experience I have had with this subject in the court practice that local stenographers to take the testimony in cases that might be tried in any certain town or city where the court may be held are much more satisfactory to the practicing attorneys than to have but one official court stenographer. As has been admitted by all in debate on this subject, no one stenographer will be able to take all the testimony in any judicial district. It will be necessary for him to secure assistance, and I see no good reason why the court should not be given authority to appoint local stenographers in different towns or cities where the court may be held. I believe this amendment should be adopted and that it will facilitate the work of the court and be most satisfactory to all practicing attorneys.

Mr. WATKINS. Mr. Chairman, when the proposition was up to strike out the entire section, the gentleman from Illinois [Mr. MANN] contended that it would give an opportunity for the judges to appoint their favorites, and it would be squandering the public money to allow a man to appoint a stenographer and pay the salary to some favorite of his, but now the question is not to appoint one, but to appoint innumerable stenographers. If it is possible to conceive the idea that a district judge, a judge of the United States court, would take advantage of the opportunity which might be afforded him to select one steno-

rapher and use that to the detriment of the Government and be extravagant in the use of that stenographer, the argument would certainly be a great deal stronger on that line if any number of stenographers were allowed to be assigned by the judge. I do not concede, for my part, that the judges would take such advantage of the opportunity which they might have to practice what is sometimes called graft, but I do consider that if this amendment as now offered, allowing judges to appoint any number of stenographers which they see proper to appoint be adopted, it will be a great injustice to the Government, it will be an extravagance, and it will not be in line with economy.

Mr. NORTON. If the gentleman will permit, if a judge can appoint more than one stenographer, the gentleman says it will not be economy to the Government. These stenographers are not paid a salary unless the salary is authorized by the Attorney General, and if they do the work in their local towns or cities, their compensation need only be 10 cents a folio under the law. Is not that correct?

Mr. WATKINS. No; the salary is to be fixed by the Attorney General; he fixes the salary——

Mr. NORTON. But under the provisions of this bill stenographers are to receive 10 cents a folio, and the stenographer's salary over and above this may be merely nominal.

Mr. WATKINS. Later on in this bill which we are considering the salary is provided for.

Mr. NORTON. I understand in section 93 of this bill provision is made for the compensation to be paid stenographers.

Mr. WATKINS. Now, Mr. Chairman, there are districts in which the judges hold courts at four, and in some instances, perhaps, five different places, and at each one of those places the judge would naturally want a stenographer, and if this bill allowed a salary to each one of those stenographers, it would be vastly more than the mileage to which reference has been made here in this argument. Instead of being in the line of economy and reform it would be a most outrageous extravagance to allow any such liberty or opportunity as this on the part of the judges to appoint an indiscriminate number of stenographers. The salary will be fixed for each stenographer, and it is not to be supposed, if a man is going to devote his time and be set apart as official stenographer, that he would be satisfied with anything less than a reasonable salary for the reservation of his time. He might be permitted to do outside work, of course. Still, he would expect to receive a reasonable salary. I hope the committee will vote down the amendment.

Mr. STAFFORD. Will the gentleman yield?

Mr. WATKINS. Certainly.

Mr. STAFFORD. I assume the stenographers receive a stated salary at the present time?

Mr. WATKINS. No; they are on a fee basis.

Mr. MANN. There are no official stenographers.

Mr. STAFFORD. I understand that there are official stenographers.

Mr. WATKINS. No; there are no official stenographers. They are stenographers of the court, but they get so much a folio.

Mr. STAFFORD. I know that in the district court of Milwaukee there is a certain woman who has been connected with that court for 40 years.

Mr. WATKINS. I suppose she is efficient.

Mr. STAFFORD. She is a most efficient stenographer, and I thought she had some direct appointment. Certainly her services have the approval of the various district judges who have served in that court.

The CHAIRMAN. The question is on the amendment.

Mr. MANN. Mr. Chairman, I would like to be heard. A few years ago we had an impeachment trial, where one of the charges that was preferred was that Judge Swayne, I think it was, had taken $10 a day for his traveling expenses, the law providing, as I recall, that he should be paid his expenses not to exceed $10 a day. And he, and, as it developed, other judges, under the custom just took the $10 per day without regard to the actual expenses which they were granted. Now, if we pay the judge $10 a day while he is traveling from one place to another and sitting and holding court at a place where he does not live, as we do, we will be paying the stenographer the same thing. That does not look like economy to me. Take North Dakota, the State from which the gentleman comes who offered the amendment, and the distances are quite long. Now, what is the idea in saying that you have to have a stenographer to travel around with the judge instead of employing a stenographer at the town where the court is held? It will not add to the expense; quite far from it. It will save the Government an expense of probably $10 a day for most of the year. And if you have 93 stenographers—of course, they will not all be traveling, because in some States the judges do not hold court in different places—it will amount to quite a tidy sum. If I could get that amount for a year, I would retire now.

Mr. TAGGART. Will the gentleman yield?

Mr. MANN. I will.

Mr. TAGGART. Would there not be considerable difficulty in finding a competent stenographer at various places?

Mr. MANN. If he does not find a competent stenographer, he would not have to appoint one there. This does not require the judge to appoint a stenographer, but to give him permission to appoint more than one stenographer in his district, so that he may appoint an efficient stenographer in those cities where he holds court, and the Attorney General will fix the salary accordingly.

Mr. TAGGART. That is true; but would it lead, now, to this kind of trouble: Here is a party who is entitled to have a stenographer paid by the Government in the trial of a case that he is in, plaintiff or defendant. That is, in a civil case. In fact, the defendant in a criminal case is entitled to a transcript of testimony, as I understand it, and that is paid for by the Government——

Mr. MANN. There is no such provision in existing law or in this bill.

Mr. TAGGART. Is not there a provision of that kind in this bill?

Mr. MANN. No.

Mr. TAGGART. But here is the point, though. Independent of who pays for it, if we had a lawsuit we would be entitled to have a competent stenographer to take that testimony.

Mr. MANN. That is true; and we never have any difficulty in getting one. But the gentleman has not reached his point yet, and I am waiting for it.

Mr. TAGGART. The point is that it will be practically impossible to secure a competent court stenographer every place that the court might sit.

Mr. MANN. I am not discussing that question. I am discussing the question of whether he shall have power, if he is going to name an official stenographer, to only name one for his district, or whether he shall have the power to name one at the different places where he holds the court, instead of requiring the official stenographer to travel around with him at the expense of the Government. Now, we would have more than one judge if it were not for the fact that we have to pay the judges practically the same salary. They would have nothing to do most of the time. But the stenographers may be employed for a week or two weeks, in the course of a year, at one time, and do not have to get a year's salary for that. Their salaries can be graded accordingly.

The CHAIRMAN. The question is on agreeing to the amendment.

Mr. WILLIS. Mr. Chairman, I desire to be heard on the amendment. I want to call the attention of the committee to what will be done if we adopt the pending amendment. This section 52 proposes to so change the law that it shall read that the judge of the district court, in his discretion, may appoint a stenographer or stenographers for such court. Now, turning to section 93, it will be observed that this same bill provides that the stenographers of the district court shall recieve such salaries as the Attorney General shall from time to time determine. Taking those two sections together, it will be seen that if you adopt this amendment, here is what you propose to do: You propose to give to one officer of the Government authority to appoint as many minor officials of this particular character as he may desire—stenographer or stenographers. He may appoint one in every township, if he wants to do so, or in every school district. It is not likely that he would appoint that many, but he has unlimited authority to appoint stenographers. You give to one officer of the Government authority to appoint as many officials as he pleases, and then you give to another officer of the Government authority to fix the salaries of those minor officials. I do not believe that is wise legislation. It abdicates the power of Congress and concentrates too much authority in the hands of executive and judicial officers.

Mr. MANN. The gentleman knows that to be the law as to clerks and deputy marshals and other officials. I do not know whether it has been abused or not. If so, I never heard of it.

Mr. WILLIS. I know that is the law, but I do not believe in adding to an unwise law. I voted for the gentleman's amendment to strike out this whole thing and leave the appointment of stenographers as it now exists.

Now I yield to the gentleman from North Dakota.

Mr. NORTON. I was going to ask whether the gentleman thought this provision would be more abused than the provision for the appointment of clerks and the designation of the salaries of the clerks?

Mr. WILLIS. Well, I do not care to enter into a comparison of abuses. It seems to me this furnishes an opportunity for abuse. As a general principle of legislation, I do not believe it is wise to give to one officer authority to appoint minor officials without limit as to number and then to give to another official of the Government the authority to fix the salaries of those minor officials. I do not believe that is wise legislation, either in State or Nation.

Mr. NORTON. The gentleman's argument, then, presumes that whenever an opportunity is allowed for a district judge or the Attorney General of the United States to make abuses under the law, they will do so?

Mr. WILLIS. I do not presume anything of that kind; but I think that when this Congress is legislating it ought not willfully and with its eyes open pass a law that invites abuse. We ought, as far as possible, to prevent abuses instead of making it convenient and easy for the officials of the Government to abuse the law. That is what you do here—that is, to let one officer appoint as many minor officials as he pleases, and then let another officer fix the salaries as he pleases. I think you are entering upon unwise legislation. I think there should be a limit fixed by law as to the number of officers and the compensation paid.

Mr. SCOTT. Mr. Chairman, will the gentleman yield?

Mr. WILLIS. I yield to the gentleman from Iowa.

Mr. SCOTT. Does not the gentleman think that when one officer appoints a minor official and another fixes the salary they would be a check, one upon the other?

Mr. WILLIS. I think perhaps it would not be as bad that way as it would be to have the same officer appoint and fix the salaries. The point I make is that we ought not to have either one. We ought to have the number fixed by law, and in the same way we ought to have the compensation fixed. By the method proposed it would leave the whole thing subject to executive and judicial lawmaking. We simply invite abuse. I do not say that abuses will come surely, but I do not think we should invite abuses.

Mr. GORMAN. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Ohio yield to the gentleman from Illinois?

Mr. WILLIS. Certainly.

Mr. GORMAN. Does not the gentleman think we could so amend section 93 as to prevent abuse, the only abuse suggested by the gentleman, that too much may be paid out as salaries or too many people put on salaries?

Mr. WILLIS. If we adopt this amendment—which I hope we shall not do—I shall join with the gentleman in an effort to amend section 93. But "sufficient unto the day is the evil thereof."

Now, the amendment proposed is one that enlarges unduly the authority of the judge in the appointment of stenographers, and that is the amendment I am seeking to defeat. I think it ought to be defeated.

Mr. GORMAN. I will help you defeat it.

Mr. WILLIS. Good.

Mr. STAFFORD. Mr. Chairman, the question before the committee is one that resolves itself largely into one of convenience to practitioners. Under the present system, whether it has authority of law or not, the strenographers, by reason of the large fees that they are enabled to charge for transcripts of testimony, accompany the judges when they go to the respective places for holding court. Nearly every practitioner knows that stenography has advanced that far that you can find expert stenographers in every place where a court holds its session who will be expert enough to take the testimony.

There is this point that comes to my mind: That the practitioners appearing in these respective places should have their convenience considered in the transcript of testimony. Under the existing practice, when this perambulatory stenographer accompanies the court, immediately after the close of the session he or she returns to his or her headquarters. It may be difficult for an attorney to have his case made up by the transcription of the minutes because the stenographer is separated from the branch city where the court has been held for a brief session.

Now, so far as abuse of appointment by the court is concerned, every power may be abused, but certainly we have the right to trust implicitly the district judges, that they will not abuse this authority.

Now, the Attorney General's office, upon the recommendation of the district judge, has authority to appoint ad libitum assistant district attorneys to assist the district attorney, and fix their salaries up to a certain amount, and this provision has not been abused. In this section 93 there is ample safeguard provided so as to prevent abuse.

Mr. TAGGART. There is authority to allow the judge discretion to appoint more than one?

Mr. STAFFORD. Yes.

Mr. TAGGART. And if he finds one who is wholly satisfactory he can accompany him to the different places? Is that the idea?

Mr. STAFFORD. It leaves it to his discretion.

Mr. TAGGART. I am opposed to the Attorney General having the power to fix the salary of any stenographer.

Mr. STAFFORD. I will say to the gentleman that that is a matter that can come up in connection with section 93, where we provide the salaries and the fees which they are entitled to receive, and we can easily limit the salaries of the stenographers there, as may be seen, and allow them to take the fees that are customary in the case of court stenographers connected with State courts.

Mr. BOOHER. Mr. Chairman, will the gentleman allow me to ask him a question?

The CHAIRMAN. Does the gentleman from Wisconsin yield to the gentleman from Missouri?

Mr. STAFFORD. Yes.

Mr. BOOHER. What objection would there be to permitting the district judge to appoint a stenographer at each place where he holds court?

Mr. STAFFORD. That is the very intention of this amendment, to give him that power, whereas under the existing phraseology he has not the authority.

Mr. BOOHER. In that event the salary should be fixed at so much per diem for the time actually spent in court, and then for the fees for the transcript?

Mr. STAFFORD. That will be considered when we reach section 93.

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken; and the Chairman announced that the noes seemed to have it.

Mr. MADDEN. A division, Mr. Chairman.

The committee divided; and there were—ayes 19, noes 18.

Mr. MADDEN. Mr. Chairman, I think I shall make the point of no quorum.

Mr. DONOVAN. Tellers, Mr. Chairman.

The CHAIRMAN. The gentleman from Connecticut asks for tellers. Those in favor of ordering tellers will rise and stand until they are counted. [After counting.] Nine Members, not a sufficient number, and tellers are refused.

Mr. MADDEN. I make the point of no quorum, Mr. Chairman.

The CHAIRMAN. The gentleman from Illinois makes the point of no quorum. Evidently there is no quorum present. The Clerk will call the roll.

The Clerk called the name of Mr. ABERCROMBIE.

Mr. MADDEN. I withdraw the point of no quorum, Mr. Chairman.

Mr. GARRETT of Texas. I object. The roll call had commenced.

The CHAIRMAN. One name had been called. The Chair understands that after the point of no quorum has been made and the call has begun, it can not be dispensed with.

The Clerk proceeded to call the roll, when the following Members failed to answer to their names:

Adair	Drukker	Hulings	Montague
Anderson	Eagan	Humphreys, Miss.	Moon
Ansberry	Elder	Jacoway	Morin
Anthony	Fairchild	Jones	Moss, Ind.
Ashbrook	Ferris	Kahn	Moss, W. Va.
Austin	Fess	Keister	Mott

Stevens, N. H.	Tuttle	Webb	Witherspoon
Talbott, Md.	Vare	Whaley	Woodruff
Temple	Vollmer	Whitacre	Woods

The Speaker having resumed the chair, Mr. RUSSELL, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having under consideration the bill (H. R. 15578) to codify, revise, and amend the laws relating to the judiciary, found itself without a quorum, whereupon he caused the roll to be called, and 282 Members responded to their names, and he herewith reported the names of the absentees to the House.

The SPEAKER. A quorum having appeared, the committee will resume its sitting.

The House accordingly resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 15578) to codify, revise, and amend the laws relating to the judiciary, with Mr. RUSSELL in the chair.

Mr. WATKINS. Mr. Chairman, we renew the request for tellers.

Mr. BURNETT. Mr. Chairman, a parliamentary inquiry. What is the question upon which tellers were demanded?

The CHAIRMAN. The Clerk will report the amendment for the information of the committee.

The Clerk read as follows:

On page 21, in line 25, after the word "stenographer" insert the words "or stenographers."

The CHAIRMAN. The Chair would like to state that it is his belief that the vote on this amendment was final before the point of no quorum was made. The Chair wants to state the condition as it was at the time. The amendment was presented to the House, and the vote was taken upon the amendment viva voce, then by division, and upon the division the amendment was carried. Then tellers were called for, and there were not a sufficient number to order tellers, so that tellers were refused. Then the point of no quorum was made. The opinion of the Chair and the information which he has on the subject is that the vote upon the amendment was final, but the Chair is ready to receive further light upon that question.

Mr. BARTLETT. I think the Chair is wrong. You can not decide the proposition of a quorum being present at a time when it was not present. If I am correctly informed, as soon as tellers were refused, the point of no quorum was made. It was demonstrated by the vote upon the division that there was not a quorum present, and it developed upon the call for tellers that there was no quorum present. Therefore less than a quorum could not decide the question as to whether tellers should or should not be ordered. There being no quorum present, the House was without power even to pass upon the amendment or to refuse tellers. It could do nothing without a quorum.

The CHAIRMAN. The Chair has not passed upon the question. He has only stated his impression. Knowing that this question would come up, he asked the gentleman from Alabama [Mr. UNDERWOOD], who thinks as the Chair thinks; but the Chair wishes to decide this question correctly, and will be glad to have any light upon it.

Mr. WILLIS. Mr. Chairman, I want to submit for the consideration of the Chair the following facts which the Chair has already stated quite fully. A division was had and the Chair announced that the ayes have it.

Mr. NORTON. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. NORTON. What is before the House?

Mr. DONOVAN. A point of order, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. DONOVAN. The gentleman from North Dakota can not take the gentleman from Ohio off his feet by a parliamentary inquiry while the gentleman is addressing the Chair.

Mr. WILLIS. I yielded for the purpose, but finding out what the gentleman wanted, I want now to address myself to the parliamentary situation. The committee had divided and the Chair announced that the ayes had it. Thereupon a call was made for tellers. The Chair announced that tellers were refused, and immediately the point of no quorum was made by the gentleman from Illinois [Mr. MADDEN].

Mr. STAFFORD. Is the gentleman entirely accurate in his presentation of the facts? The facts are that a viva voce vote was taken, and the Chair declared that the noes had it. The gentleman from North Dakota demanded a division. A division was had, and there were 19 in favor and 18 opposed, and the Chair declared that the ayes had it, and thereupon a demand for tellers was had, but not a sufficient number arose, and the Chair declared that there was not a sufficient number. Then after the Chair declared that there was not a sufficient number the gentleman from Illinois made the point of no quorum.

Mr. WILLIS. That is substantially what I stated. As soon as the demand for tellers was made and the Chair announced that tellers were refused the point of no quorum was made. My contention is that as soon as the committee found itself without a quorum that invalidated the proceedings immediately antecedent to the time when the absence of a quorum was shown. A quorum now being present, proceedings must begin anew at the point where the last uncompleted matter was taken up, that is, where the call for tellers was made. Therefore it seems to me that the call of the gentleman from Louisiana for tellers is in order at this time.

Mr. NORTON. Mr. Chairman, the facts in this case have been stated, and what is the proper parliamentary proceeding is now the question. The facts are that a viva voce vote was taken and announced by the Chair as being carried. Then there was a call for tellers. Those in favor of tellers were asked to rise and a count was taken, and the Chair declared that the request for tellers was denied. If the question of no quorum was to be raised, it should have been raised before the Chair declared the demand for tellers was denied. If a vote in the Committee of the Whole House is ever to be final, it must be when tellers are asked for and denied by the Chair. I call for the regular order.

Mr. MADDEN. Mr. Chairman, I wish to submit to the Chair this thought: It became evident to me as a member of the committee that there was no quorum present, and the purpose of my making the point of no quorum was, in effect, to challenge the right of those having voted to pass upon the question finally. The mere fact that the point of no quorum was made is notice of that challenge. I submit to the Chair that nothing less than a quorum can act upon a question before the body if any Member present challenges the right of that number of less than a quorum to act. That challenge having been made, and the Chair having ascertained that no quorum was present, the action of the committee acting with less than a quorum is void. A quorum was afterwards developed by a roll call, and a quorum is now present, and it seems to me that the whole question must be referred back to a quorum through the quorum of the committee considering the subject matter on which the challenge was made. So I submit to the Chair that the action of the committee was not final, and can not be final, as long as the challenge is presented until at least a quorum of the committee is present and takes action. It seems to me that no one can raise the question of doubt as to the lack of the power of any number of Members present less than a quorum to take final action on any question before the House.

Mr. SISSON. Mr. Chairman, the House of Representatives, by the Constitution, as well as the Committee of the Whole House on the state of the Union, requires a quorum to be present for the transaction of business. The moment that it appears that less than a quorum is present, the action on that particular matter is vacated until you have a quorum. The precedents are uniform, so far as the question of the Constitution is concerned in the House. The same rule of construction must apply in Committee of the Whole House on the state of the Union, and the rules of the House require that there must be 100 Members present for the transaction of business.

Now, if it develops upon a demand for tellers that no quorum is present, then the fact that the Chair determines that there is no quorum present vitiates the whole proceeding, because the only way to determine whether or not the committee determines to take a vote by tellers is by a rising vote. If during that proceeding it should develop that no quorum was present, the mere fact that the Chair on a viva voce vote declared it carried does not amount to anything if it is determined upon the call for tellers that no quorum was present. That is all one contemporaneous proceeding. The gentleman has a right to demand tellers if dissatisfied with the Chair's decision on the viva voce vote, because that is the way adopted in Committee of the Whole to determine whether the Chair's decision is correct. When he appeals from the decision of the Chair he appeals and is entitled to an actual count; and being entitled to an actual count, the thing is not decided until he exhausts his remedy, and if it should develop that no quorum is present he is entitled to have a quorum, and has a right to demand whether or not the Chair's hearing was accurate in determining the question.

If that were not true, we would be in the anomalous situation of a man demanding tellers without there being anything like a quorum present, and then he would not raise the question if by the teller vote he should carry it. Suppose he had

tellers and carried it, he would not raise the question, but when he finds there is no quorum present it is his right to demand that a quorum shall be present.

Mr. LLOYD. Suppose it should occur now that tellers were refused; what would be the situation?

Mr. SISSON. If a quorum is present and tellers refused, it would be the decision of the Chair and the decision of the committee.

Mr. LLOYD. The gentleman's position is that no valid action has been taken in the case because it was developed that no quorum is present. Now he says if we should decide to raise the question of tellers and tellers were refused, then the action would be valid.

Mr. SISSON. Because a quorum has declined to grant tellers. *The committee* that has the right to act is declining to do it. Those people who acted heretofore had no authority to decline to grant tellers.

Mr. LLOYD. But that does not make valid that which is invalid; and the gentleman says that which has been done thus far is invalid, and the amendment was adopted.

Mr. SISSON. But the gentleman entirely loses sight of this fact, that a quorum of the committee can validate that which otherwise would be invalid. The very action of the majority of the committee, if there is a quorum present, taking that position settles the question.

Mr. NORTON. Mr. Chairman, will the gentleman yield?

Mr. SISSON. Yes.

Mr. NORTON. In a viva voce vote, when the question of tellers is raised, when is the action completed?

Mr. SISSON. I do not understand.

Mr. NORTON. When the vote is taken by rising vote, and tellers are demanded, when is the vote completed? Is it not completed when the Chair declares that tellers are denied, if there is not a sufficient number for tellers?

Mr. SISSON. No.

Mr. NORTON. The action is not then completed?

Mr. SISSON. Oh, because it is not then completed, if it should develop on that denial that no quorum was present. The Chairman has no right, nor has the committee any right, to bind anyone when a quorum is not present.

Mr. NORTON. If a quorum is present, is it not complete when the Chair declares that tellers are denied?

Mr. SISSON. If the committee declines to grant tellers, and a quorum is present, it is final, because the majority of a quorum has the right to act and bind the committee; but when you have no quorum present, then they have no right to bind the committee, no right to put an amendment on the bill, nor can the Chair's hearing determine that fact when as a matter of fact it is shown by actual count that no quorum is present.

Mr. NORTON. Then the gentleman admits that when a quorum is present and tellers are denied, the action is final?

Mr. SISSON. Final, because a quorum has the right to make it final.

The CHAIRMAN. The Chair is ready to rule. The gentleman from Louisiana has requested that the vote on the call for the tellers be again taken. The Chair will hold, after conferring with authorities upon the subject, that we must begin where we left off, the fact having been shown that there was no quorum present at the time the former vote was taken. The question is on ordering tellers. Those in favor of ordering tellers will rise and stand until counted. [After counting.] Twenty-six, a sufficient number, and tellers are ordered. The Chair appoints the gentleman from Louisiana, Mr. WATKINS, and the gentleman from North Dakota, Mr. NORTON, to act as tellers.

Mr. WATKINS. Mr. Chairman, before the committee divides, I ask unanimous consent that the amendment be again reported.

The CHAIRMAN. Is there objection?

There was no objection.

The Clerk again reported the amendment.

The committee again divided; and the tellers reported—ayes 15, noes 46.

So the amendment was rejected.

Mr. WILLIS. Mr. Chairman, I desire to invite the attention of the gentleman from Louisiana to this fact. The language in line 25, as I understand it, has been amended so that it reads:

The judge of the district court of each district may, at his discretion, appoint a stenographer for such court, etc.

I believe that was the amendment adopted. Is the gentleman satisfied with the language which follows on page 22, in lines 2 and 3, where it reads:

Provided, That when there are two or more judges for the same district each judge shall be entitled to appoint a stenographer for his court.

Does the gentleman think that is consistent with the other line as amended?

Mr. WATKINS. Yes; I think so.

Mr. WILLIS. It does not seem to me it is; but, if the gentleman is satisfied, I am not disposed to object to it.

Mr. GOLDFOGLE. Mr. Chairman, I would like to inquire what the situation is. As I understand it, with reference to the appointment of stenographers in a court, suppose there are three or four judges?

Mr. WATKINS. Each one has the right under that section to appoint a stenographer.

Mr. GOLDFOGLE. Without regard to the number of parts that the court holds?

Mr. LLOYD. Each judge has the right to appoint a stenographer.

The Clerk read as follows:

SEC. 53. Such stenographers shall, under the direction of the judge, attend all sessions of the court and take full stenographic notes of the testimony, and of all objections, rulings, exceptions, and other proceedings given or had thereat, except when the judge dispenses with his services in a particular cause or with respect to any portion of the proceedings therein. The stenographer shall file with the clerk forthwith the original stenographic notes taken upon a trial or hearing. He shall perform such other duties as the judge may from time to time require.

Mr. TOWNER. Mr. Chairman, I offer the following amendment which I send to the desk and ask to have read.

The Clerk read as follows:

Page 22, line 9, after the word "testimony" insert the words "and identify the record evidence in any trial, hearing, or proceeding."

Mr. TOWNER. Mr. Chairman, the object of the amendment is simply this. The language of the section is that he shall attend all sessions of the court and take full stenographic notes of the testimony, but apparently the phrase that should follow stating the things of which he should make stenographic notes was omitted. There is nothing there except the indication that he should take stenographic notes of the sessions of the court. Of course, that is not what is intended. What is meant to be reported are the trials and proceedings, and that is what is specified in my amendment. Besides, it is not only the evidence that is to be taken, but it is also necessary that he should identify the record testimony. Of course, it would not be desired, especially in cases where very voluminous record testimony was taken, that the reporter should transcribe all of the record evidence. It is only necessary that he should identify it and make it a part of the record. It seems to me that the chairman should have no objection to this amendment. I have another following it.

Mr. WATKINS. If I knew what the other was, I might not have any objection to it.

Mr. TOWNER. This stands on its own merit.

Mr. WATKINS. Standing that way alone, I do not see any particular objection to it. It may be coupled, however, with something else.

Mr. TOWNER. There is nothing that would be objectionable.

Mr. BARTLETT. I should like to have the amendment again reported.

The CHAIRMAN. Without objection, the Clerk will again report the amendment.

There was no objection, and the Clerk again reported the amendment.

Mr. TOWNER. So that it will read:

Such stenographers shall, under the direction of the judge, attend all sessions of the court and take full stenographic notes of the testimony, and identify the record evidence in any trial, hearing, or proceedings—

And so forth.

Mr. WILLIS. Does the gentleman think that comes in at the proper place, with what follows at the end of line 9?

Mr. BARTLETT. And he ought to identify the objections as well.

Mr. WILLIS. If the gentleman will read the amendment, and read what follows at the end of lines 9, 10, and 11, he will see it will not make any sense at all.

Mr. BARTLETT. It ought to identify the objections as well as the whole record.

Mr. STAFFORD. Will the gentleman yield there——

Mr. TOWNER. I confess I do not see any inconsistency.

Mr. STAFFORD. Why does not the general language found in line 10, "and other proceedings given or had thereat," cover the specific case instanced by the gentleman's amendment?

Mr. TOWNER. Well, I am inclined to think it would, except it leaves the language in lines 8 and 9 so that it does not identify the duty at all of the stenographer, "and shall take full stenographic notes, testimony, and"—and what?

Mr. STAFFORD (reading). "And shall take full stenographic notes of the testimony and"——

Mr. TOWNER. What?

Mr. STAFFORD. "Of all objections, rulings, exceptions, and other proceedings given or had thereat." We all know when an attorney presents any documentary evidence it is noted by the stenographer, and I suppose that general language covers just the case instanced by the gentleman's amendment.

Mr. TOWNER. The difficulty is this: It says, "and of all objections, rulings, and exceptions and other proceedings given or had thereat." What does "thereat" refer to? It refers, under the language as stated now, to the proceedings of the sessions of court. That is what is meant. My amendment follows the word "testimony," and it would read, "notes of the testimony in any trial, hearing, or proceeding."

Mr. STAFFORD. Does not the gentleman think that if this general language is not broad enough to comprehend the case instanced that it would be better to insert it after the word "thereat," in line 11, as suggested by the gentleman from Ohio [Mr. WILLIS]?

Mr. TOWNER. I have a further amendment in regard to that matter.

The CHAIRMAN. The time of the gentleman has expired.

Mr. WILLIS. Mr. Chairman, I desire to be heard against the amendment unless we can have some understanding as to its meaning. I have looked at the amendment very hurriedly, but I call the attention of the gentleman to how it would read as proposed. I will read the section as it would be if the amendment were adopted:

Such stenographers shall, under the direction of the judge, attend all sessions of the court and take full stenographic notes of the testimony and identify the records of the evidence in any trial or proceeding, and of all objections, rulings, exceptions—

And so forth.

That does not convey the meaning the gentleman wants; it would not be good English. I do not desire to oppose the gentleman's amendment, but does not the gentleman think there is force in that?

Mr. TOWNER. I think the language of the whole section might be greatly improved.

Mr. WILLIS. The gentleman had better withdraw the amendment and fix it up.

Mr. TOWNER. Mr. Chairman, I desire to withdraw the amendment for the present.

The CHAIRMAN. The gentleman from Iowa asks unanimous consent to withdraw the amendment. Is there objection? [After a pause.] The Chair hears none.

Mr. TOWNER. Mr. Chairman, I desire to submit another amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 22, line 11, after the word "thereat," strike out the remainder of line 11, all of line 12, and down to and including the word "therein" in line 13, and insert in lieu thereof the following: "Upon the request of either of the parties to the litigation or the order of the court or judge."

Mr. TOWNER. Mr. Chairman, this amendment is based upon what I think to be a serious objection to the language used as reported by the committee, where direction is given for the taking of stenographic notes of the testimony and objections and rulings, that under the terms of the bill the power is given absolutely to the judge to dispense with the services of a reporter in any particular case or with respect to any portion of the proceedings therein. I can hardly think that the chairman of the committee or the committee would desire to give such power as that to the court or judge. That provision would allow the court or judge at any time merely by his order and with or without reason to deprive litigants of a complete record and thereby deprive them of their right to an appeal. This would amount to a denial of the right to a fair and impartial trial and a denial of justice. It would allow the court or judge to say that some part of the proceedings should not be reported that might be vital to the interest of some of the parties to the litigation. I can hardly think that that can be desired. Certainly it would not be safe to litigants, and for that reason I have inserted in lieu of that language that the right to have a case reported shall exist in all cases and shall be granted upon the request of either of the parties to the litigation or upon the order of the court or judge. That is, either of the parties to the litigation may ask that the matter shall be reported, or if the parties to the litigation do not desire it reported and the judge himself should desire it reported he may order that it be done. It must be evident such a provision would be very much safer for all parties concerned and work injustice to none.

Mr. STAFFORD. Will the gentleman yield?

Mr. TOWNER. Certainly.

Mr. STAFFORD. This is rather a technical criticism, but it may have some potency. The gentleman notices that the clause relating to the stenographers contains the phrase "attend all sessions of the court and take full stenographic notes," and I would inquire whether this clause would not modify the requirement of the stenographer to attend all sessions of the court, and would not the gentleman's amendment find a better place after the word "and," in line 8, so as to read:

Attend all sessions of the court and, upon the request of the parties to the proceedings, or judge, take full stenographic notes of the testimony and of all objections—

And so forth.

Mr. TOWNER. I think there would be no objection to its being inserted at that place. I certainly object—and I think it is a serious objection, a vital objection—to the provision of the bill giving the power to the court to prevent a record being made in any case. Such a power might be used—and certainly would be used—in such a way as to deprive litigants of a fair trial and of their right to an appeal. It is a dangerous power, too great and too dangerous to be granted to any person under any circumstances. I hope that the chairman and the members of the committee will accept this amendment.

Mr. GOLDFOGLE. Mr. Chairman, I ask that the amendment may be again reported.

The CHAIRMAN. Without objection, the Clerk will again report the amendment.

The amendment was again reported.

Mr. GOLDFOGLE. Mr. Chairman——

Mr. BARTLETT. There is a period after that. The words "stenographer shall file" do not follow after that sentence.

Mr. GOLDFOGLE. Mr. Chairman, I offer as a substitute that all words on line 11, beginning with the word "except," and all the words on line 12 and part of the words "proceedings therein," on line 13, be stricken out, and a period be inserted after the word "thereat," on line 11, so that there shall be stricken out the words:

Except when the judge dispenses with his services in a particular cause or with respect to any portion of the proceedings therein.

The CHAIRMAN. The Clerk will report the substitute.

The Clerk proceeded to read the substitute.

Mr. BARTLETT. A point of order, Mr. Chairman. There is already an amendment pending, offered by the gentleman from Iowa [Mr. TOWNER], to strike those words out and to substitute something, and this is a mere division.

The CHAIRMAN. Is not that all one amendment?

Mr. BARTLETT. Yes, sir; to strike out and insert.

The CHAIRMAN. The Chair understands it is one amendment. Now, this is a substitute to that. Is not that in order? The Chair thinks so.

Mr. TOWNER. This is only omitting a part of the motion to amend.

Mr. GOLDFOGLE. I think a substitute is in order to strike out the whole.

Mr. STAFFORD. Mr. Chairman, I respectfully submit the preference is always given to motions to perfect the text. This motion of the gentleman from Iowa is to strike out and insert, and that is a preferential motion to a motion to strike out, and must first be put. It does not preclude the gentleman from New York [Mr. GOLDFOGLE] offering his amendment in case the amendment of the gentleman from Iowa is refused. But at the present time it is not in order.

The CHAIRMAN. The Clerk will report both amendments.

The Clerk read as follows:

Amendment offered by Mr. TOWNER:
"Page 22, line 11, after the word 'thereat,' strike out the remainder of line 11, all of line 12, and down to and including the word 'therein,' in line 13, and insert in lieu thereof the following:
"'Upon the request of either of the parties to the litigation or the order of the court or judge.'"

Mr. BARTLETT. I call the attention of the Chair to section 449 of the Manual——

The CHAIRMAN. Now, the Clerk will read the substitute offered by the gentleman from New York [Mr. GOLDFOGLE].

The Clerk read as follows:

Substitute offered by Mr. GOLDFOGLE:
"Page 22, line 11, insert a period after the word 'thereat' and strike out the words:
"'Except when the judge dispenses with his services in a particular cause or with respect to any portion of the proceedings therein.'"

Mr. BARTLETT. Mr. Chairman, the amendment of the gentleman from Iowa [Mr. TOWNER] is to strike out the same words that the gentleman from New York offers to strike out, and to insert in their place certain substantive words and material. That must be first put before the motion to strike out the paragraph or section.

The CHAIRMAN. The amendment offered by the gentleman from New York is to strike out the same words as by the amendment offered by the gentleman from Iowa. The gentleman from Iowa asks to insert some other words to take their place, while the substitute of the gentleman from New York is to strike out and substitute nothing.

Mr. BARTLETT. That is it, exactly.

The CHAIRMAN. The Chair feels, with that understanding of the facts, that the amendment offered by the gentleman from Iowa should first be voted upon. Does the gentleman from New York [Mr. GOLDFOGLE] wish to be heard?

Mr. GOLDFOGLE. I do not desire to be heard on the point of order. I desire to be heard on the amendment offered by the gentleman from Iowa [Mr. TOWNER].

The CHAIRMAN. The gentleman from New York is recognized.

Mr. GOLDFOGLE. Mr. Chairman, I agree with the gentleman from Iowa that the power given to a judge in the bill as proposed is rather a dangerous power. It may be exercised, possibly, to the great disadvantage and detriment and injury of a party litigant. And I recall cases in the appellate courts, both in my State and in other States in the Union, in which reversals were ordered upon matter appearing in the record in both civil and criminal cases, which reversals would not and could not have taken place had the record not disclosed fairly the proceedings had upon the trial. Comments of counsel frequently form a legitimate place in the record of a trial. There are a variety of things that occur to the mind of the lawyer who has had experience in the trial of causes, which require a record of them to be made in the trial proceedings. In the case of a judge who would be inclined to be arbitrary or obstinate I can conceive that many things that ought to find place in the record would not be there because of an order of the judge to the stenographer to keep them out. Under our system of judicature, under our very liberal system that obtains in courts of justice, I am quite unwilling to allow the power to be vested in any judge to keep out of the record such matters as he may desire to keep out, but which have a proper place in the trial record. That is really the power that would be given a judge under the proposed bill.

Now, so far as the matter which the gentleman from Iowa [Mr. TOWNER] would substitute for that which he seeks to have stricken out is concerned, I am again apprehensive that if that matter were inserted it might also lead to abuse. I would like to be with the gentleman from Iowa in his amendment, but on the spur of the moment I am inclined to think that the amendment would be even too broad a power to confer.

Mr. TOWNER. Mr. Chairman, will the gentleman yield?

Mr. GOLDFOGLE. Certainly; with pleasure.

Mr. TOWNER. I will say to the gentleman from New York that I can conceive of no possible combination of circumstances that would permit any injustice being done, for this reason: As the section would stand then, it compels the reporting by the reporter of all of the trials and transactions that occur, unless the parties to the suits themselves waive it.

Mr. GOLDFOGLE. But you say "either party."

Mr. TOWNER. Yes.

Mr. GOLDFOGLE. You mean that either party might request it be left out, and then the judge could order it left out. I have not kept closely in mind the language of your amendment.

Mr. TOWNER. No, indeed; it is the other way. Either of the parties may request that this shall be done; either of the parties to the litigation may request that the report shall be made, or the judge himself may make the request that the report shall be made, so that any party who desires a full record, no matter what side he may be on, has the power to ask that there shall be a full record of the testimony taken.

Mr. GOLDFOGLE. Why should not a full record be made in every case? I want to say this to the gentleman from Iowa: I am not, of course, acquainted with the methods pursued in the courts in some of the States far distant from my State, but in my State, especially in my district—the southern district of New York—we take full record of the proceedings on the trial. We take the testimony in full; we mark the exhibits; and when the record is made up you have a perfect disclosure on it of what took place upon the trial between the court, the witnesses, and the counsel.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. TOWNER. Mr. Chairman, I ask unanimous consent that the gentleman's time may be extended for five minutes.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. TOWNER. Let me say to the gentleman from New York that there are very many transactions in the courts where neither party desires all of the evidence taken—a great many transactions, in fact, where neither party nor the judge himself considers it of sufficient importance that any of it should be taken—and that, of course, saves a lot of trouble and expense. The parties to the suit have the right to preserve their rights by asking—either of them or any of them—that the full record shall be made, so that their rights may be fully preserved, if they desire. And even if the parties themselves might not desire the evidence to be taken and preserved, if the judge, for his own protection, desired that the evidence be taken and preserved, he has the right to make the order. So that it seems to me that everything possible that is necessary to preserve justice, or the opportunity for justice, to any party is preserved in the amendment.

Mr. GOLDFOGLE. Do I understand that in the State of Iowa the record is not completely made up by the stenographer, as, for instance, the taking down of the testimony, the objections, and the exceptions, and the charge of the court to the jury?

Mr. TOWNER. Certainly, in cases where it is desired; but the gentleman will understand that there are a great many cases that are tried where this is not done and where the parties do not desire it to be done.

Mr. GOLDFOGLE. It is not so over my way.

Mr. TOWNER. Oh, I think there must be in every court a great many of those proceedings that are not necessary to be preserved.

Mr. GOLDFOGLE. I understood a little while ago that each judge was to have the right to appoint a stenographer. Now, if that means anything at all, it means that a stenographer shall attend the court, that he shall take down the proceedings of the trial, so that the evidence or transcript of his minutes may be called for, and that whether for purposes of appeal or for some other purpose, the opportunity shall be afforded to the litigants to have that transcript furnished.

Mr. TOWNER. Certainly. There is no trouble about that.

Mr. GOLDFOGLE. That being so, why should there be anything in this act which would require any party to make a request in the first instance to have the case reported in full?

Mr. TOWNER. I will say to the gentleman that from a long experience on the bench I can safely say that in more than one-half of the transactions in the court, proceedings of various kinds, ex parte and otherwise, there is no necessity whatever that the entire proceedings should be reported, and nobody requires or asks that they shall be reported.

Mr. GOLDFOGLE. I have not reference to ex parte proceedings. I have reference to trials, both civil and criminal. And I want to say to the gentleman that after a very long experience on the bench I know that over my way they take upon the trial full notes of the proceedings; so much so that the appellate court has no difficulty at all in learning from the record what has taken place upon the trial, what the judge has done, and what he has said, so that the tribunal may be enabled intelligently to pass upon the questions presented for review.

Mr. TOWNER. Certainly. That is always the case whenever there is a trial or any contest whatever.

Mr. GOLDFOGLE. Would not the gentleman think it would be just as well to leave out all the words beginning with the word "except" down to the period, instead of inserting the words that the gentleman desires to have inserted?

Mr. TOWNER. No; because that would compel the stenographic reporting of all transactions of the court.

Mr. GOLDFOGLE. The gentleman means all the ex parte proceedings, and so on?

Mr. TOWNER. Yes.

Mr. GOLDFOGLE. I do not think that any judge cares to have ex parte proceedings taken down. I have no reference to them.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Has the gentleman from New York [Mr. GOLDFOGLE] concluded his remarks?

Mr. GOLDFOGLE. I have.

The CHAIRMAN. The gentleman's time has expired.

Mr. BARTLETT. Mr. Chairman, the gentleman proposes in his amendment, which I think is a proper one, that in those cases in which the parties think that they are of sufficient importance to have the services of a stenographer, or where the court itself shall direct it, whether the parties agree or not, and the case appears to be to him of sufficient importance, he then directs the stenographer to report the case, and it is only in those cases that it is compulsory upon the stenographer to take down the testimony. Is that correct?

Mr. TOWNER. The gentleman is correct in this, either party may demand—either party to the litigation.

Mr. BARTLETT. If one party declines and the other desires it, the judge can direct him to do it?

Mr. TOWNER. Yes.

Mr. BARTLETT. And if neither party desires it, the judge on his own motion can order it?

Mr. TOWNER. Yes.

Mr. BARTLETT. So that it depends upon either the wish or the views of one party to the suit, or the judge, as to the necessity of requiring this service?

Mr. TOWNER. Yes. This would leave it in this condition, that either party or the judge could demand that it be taken, whether the other party wishes it, or the judge wishes it, or not. His demand would be sufficient to require that the evidence be taken; or, if the parties themselves do not demand it, the judge may order it, so that in any case where any party to the litigation whatever might seek or require it, the opportunity will be given to have full record made.

Mr. BARTLETT. The gentleman understands that the Supreme Court of the United States, in the new rules which they have adopted, have endeavored to abolish the old method of bringing up everything that occurs in the court. They have adopted a new rule—which I think is a good one—which requires the parties to present the facts and what transpired in the trial in a narrative form, instead of embracing questions and answers and arguments pro and con and what the court said. The records of the courts have become so voluminous by pursuing the old method which the gentleman from New York [Mr. GOLDFOGLE] has referred to, of taking down every answer and every question and every objection and argument, that the court could hardly wade through them; and the Supreme Court, in the new rules they have promulgated, have provided what we have had in Georgia for 20 years, that you can not send up the stenographic report of what occurred and the questions and answers and all in that way, but that you shall present it in as concise a narrative form as the nature of your case will permit. That is what the Supreme Court requires now.

Mr. TOWNER. That is the rule also in our courts on appeal, I will say to the gentleman, and has been for many years.

Mr. GOLDFOGLE. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Iowa yield to the gentleman from New York?

Mr. TOWNER. Yes.

Mr. GOLDFOGLE. Of course the gentleman from Georgia is right, so far as cases on appeal are concerned, because the record is made up in narrative form from the transcript of the stenographer's minutes of what occurred upon the trial.

Mr. BARTLETT. I understand.

Mr. GOLDFOGLE. Now, what I had reference to when I made my argument was that in the first instance, in the court in which the trial takes place, there should be a stenographic report of the matters that legitimately should go into the record, and the judge ought not to have the arbitrary power to say to a stenographer, "Do not take that down, and do not take this down"; so that when you come to make up your case on appeal in narrative form, lo and behold, you find many things omitted that ought fairly to be presented to the appellate court in order that it may determine whether the objections made were tenable, or whether, as in a case that is now present in my mind, a very recent case in my State, the court can say that the whole atmosphere of the trial was such that it could not be said the appealing party had a fair trial.

Mr. BARTLETT. There is no difference between the gentleman from New York and myself on that subject. I think whatever occurred in court, where the case is of sufficient importance to require the services of a stenographer, should be taken down; and if the gentleman had practiced law in the courts down where I live he would know from experience the absolute necessity for such a practice.

Mr. RUCKER. Mr. Chairman, I beg the indulgence of the committee for a few moments, in order to make a very important statement, which may involve a slight violation of the rules governing debate in the House. A long time ago, so long almost that "the memory of man runneth not to the contrary," Michael Gill filed a contest against the gentleman from Missouri [Mr. DYER]. That contest was referred to Committee on Elections No. 3. In due time the testimony was taken and filed. Arguments were heard months ago, and months ago the committee reached a final conclusion. Several days ago at least a report was prepared, as I am informed, and printed for the examination and approval of members of that committee before being formally filed in the House. I am informed that the report has been agreed to by all those who favor it, a majority, in number, of the committee, but it has not yet been filed, and the Lord only knows when it will be filed.

Let me say that there is no disposition on earth on my part to utter one word which, by any kind of implication or construction, might reflect upon or criticize any of the members of the committee; but I believe I am justified in saying that members of the committee are pleading with the chairman to file the report, which has been agreed upon, and let the House take such action thereon as in its wisdom it should take. I have no doubt the distinguished chairman of that committee, who is now present and hears what I say, has some reason for his action in this matter in failing and refusing to file the report. It may be that at some time in the dim past some other contest hung fire like this one, but it does seem to me, with all deference and respect to the distinguished gentleman, the chairman of the committee, that no good reason can be shown why, when a committee of this House has solemnly reached a conclusion, that conclusion should not be furnished in a report to the House. I want to say in behalf of the Missouri delegation that there is some anxiety about this matter; but I want to say, further, that not one of them, to my knowledge—and I believe I am correctly advised—has taken any part, certainly no objectionable part, in this contest in any wise. All we have done was quietly to await the action of a committee of this House, without seeking in any manner, shape, or form to affect its action. But the committee having acted, we now feel that we have a right to demand, or I prefer to say, we feel we have a right to respectfully request, the chairman of the committee to take that committee's report out of his pocket and file it with the Clerk of this House, where it ought to be.

I make these remarks, Mr. Chairman, in the best of good humor, confessing my superb regard for the distinguished chairman and his great ability; but I have tried to make them pointed enough and plain enough, if possible, to induce the good gentleman to tell us when the House of Representatives may have the benefit of the deliberations and judgment of his great committee.

Mr. STAFFORD. Regular order, Mr. Chairman.

Mr. GOLDFOGLE. Mr. Chairman, the gentleman from Missouri [Mr. RUCKER] was right when he said he was digressing from the legitimate line of debate on this bill. I appreciate the good nature of the gentleman from Missouri, and want to thank him for the very kind compliment that he paid to the chairman of the Committee on Elections No. 3; but I would like to say to the gentleman from Missouri that he is a little in error with regard to the facts in the case to which he referred. If this were the time to enter upon a discussion of the facts and a recital of the details, I would be better enabled to enlighten the gentleman from Missouri as to the course——

Mr. RUCKER. Will the gentleman yield?

The CHAIRMAN. Does the gentleman from New York yield to the gentleman from Missouri?

Mr. GOLDFOGLE. In a few moments. I say I would be better enabled to enlighten the gentleman, if light were at all needed, as to the time it took to hear and determine the matters in controversy in that election case and to prepare in proper form and present to the House the committee report. However, I permit myself very briefly to call attention to the fact, not because it has a place in this debate, but so that I may in kind return my respects to the gentleman from Missouri, and to assure him that I am appreciative of his good nature. It was not until the beginning of the second session of this present Congress that in due course of practice and procedure of the House, with which, of course, the gentleman from Missouri is thoroughly familiar, the testimony in the case reached the committee. The testimony is embraced in two volumes, comprising 2,205 closely printed pages. The type in which it is printed is so small that really it has been most trying to the eye. If the record were printed in the type we are accustomed to use for appeal cases in my State, it would probably take up some 4,000 or 5,000 pages at least. In the type in which we print the hearings of committees it would likely make 7,000 or 8,000 if not more pages of print.

Mr. RUCKER. Will the gentleman yield?

Mr. GOLDFOGLE. Pardon me. I will yield to the gentleman from Missouri as soon as I complete my statement as to the record in the case. It is not before me now, but I think I have a clear recollection.

The briefs were voluminous. There was no desire on the part of the chairman of the Elections Committee, and there never will be a desire on the part of the chairman of the committee to determine any election case in any partisan spirit. I think I can speak for the committee over which I am privileged to pre-

side when I say I do not believe there was any desire on the part of members of that committee to determine the questions in any hasty or partisan way.

Mr. RUPLEY. Mr. Chairman——

Mr. RUCKER. Will the gentleman yield now?

The CHAIRMAN. Does the gentleman yield?

Mr. GOLDFOGLE. I yield to the gentleman from Missouri for a question.

Mr. RUCKER. Having decided all the questions contained in this voluminous record, why will not the chairman present the report of the committee?

Mr. GOLDFOGLE. In a moment I will tell the gentleman from Missouri, in the same spirit of good nature which he referred to me. The briefs submitted, I was about to say, were quite voluminous, the authorities cited were many, the questions that were presented were complex, and after we had gone through this record, after we had heard a motion to take further testimony, and after we concluded upon what we would do, the report was drawn. It was sent as a matter of courtesy to the different gentlemen of the committee before it was to be filed, so that if anything was to go in, or anything had been omitted by error, it might be corrected, and all questions avoided as to matter, form, or substance. I told some gentlemen, not that I need state it now, but the gentleman from Missouri is so extremely good-natured I can not resist telling him, that the chairman of the Committee on Elections No. 3 will, within a very short time, submit the report for the action of the House in the manner in which reports have usually been submitted, according to my experience and what I believe to be the practice of the House.

Mr. RUCKER. Mr. Chairman, the gentleman from New York having told me that the good-natured chairman will in a very, very short time make his report, and having taken so long a time——

Mr. GOLDFOGLE. Oh, the gentleman is in error; he did not take a long time. I am afraid my friend, who has had a long experience in the House and is a distinguished and able Member, has forgotten the course that these elections cases generally run. I know the gentleman has been very busy with the business of the House, that he has his hands full of matters in his own committee, and I know how ably he presides, and I know that the gentleman would not want to rush headlong into anything.

Mr. RUCKER. This case was settled long and long ago.

Mr. RUPLEY. Will the gentleman yield?

Mr. GOLDFOGLE. For a question.

Mr. RUPLEY. I am a member of the Elections Committee No. 3.

Mr. GOLDFOGLE. I trust the gentleman from Pennsylvania will recognize the fact that in this Committee of the Whole is not the place where the internal matters of the committee are to be discussed.

Mr. RUPLEY. I trust the gentleman from New York will recognize the fact that this is the place and the forum.

Mr. GOLDFOGLE. To pass upon the report of the committee?

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. RUCKER. Mr. Chairman, I ask that the time of the gentleman be extended three minutes.

The CHAIRMAN. The gentleman from Missouri asks that the time of the gentleman from New York be extended three minutes. Is there objection?

Mr. STAFFORD. I object.

Mr. RUPLEY. Mr. Chairman, I desire to address the Chair in my own right.

The CHAIRMAN. The gentleman from Pennsylvania.

Mr. RUPLEY. Mr. Chairman, I desire to interrogate the chairman of the Committee on Elections No. 3.

Mr. GOLDFOGLE. I raise a question of order.

The CHAIRMAN. The gentleman will state it.

Mr. GOLDFOGLE. The matter on which the gentleman desires to interrogate the gentleman from New York has no place now, while we are under the five-minute rule upon a revision of the laws in the Committee of the Whole House on the state of the Union.

Mr. RUCKER. A parliamentary inquiry.

The CHAIRMAN. A point of order is now before the House. The gentleman from Pennsylvania has the floor, and the gentleman from Missouri can not take him off his feet by a parliamentary inquiry.

Mr. RUPLEY. Mr. Chairman, I have listened to the discussion between the distinguished gentleman from Missouri [Mr. RUCKER] and the chairman of Elections Committee No. 3, the gentleman from New York, on the contest pending in this election between Michael J. Gill and Congressman Dyer. As a member of that committee I have insisted——

Mr. GOLDFOGLE. Mr. Chairman, I raise a question of order.

The CHAIRMAN. The gentleman will state it.

Mr. GOLDFOGLE. I raise the point of order that the matter to which the gentleman has reference is not germane to the bill now under consideration.

The CHAIRMAN. The point of order is well taken.

Mr. RUCKER. Will the gentleman from Pennsylvania yield?

Mr. RUPLEY. Yes.

Mr. RUCKER. Mr. Chairman, is it in order to move to suspend the rules long enough for the gentleman from Pennsylvania to ask the gentleman from New York one question?

The CHAIRMAN. The gentleman can not move to suspend the rules in Committee of the Whole.

Mr. RUCKER. I was not sure that it could be done, but I wished to find out.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa.

Mr. TOWNER. Mr. Chairman, a suggestion was made by the gentleman from Wisconsin [Mr. STAFFORD] that perhaps the better place for the insertion of this amendment would be in line 8 instead of where the language is stricken out in line 11. I think that that is true, and with the consent of the committee I will change my amendment so that the insertion shall follow the word "and" in line 8. So that part of the section will read as follows:

Such stenographers shall, under the direction of the judge, attend all sessions of the court, and upon the request of either party to the litigation, or the order of the court or judge, take full stenographic notes of the testimony and of all objections, rulings, exceptions, and other proceedings given or had thereat.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa to modify his amendment as suggested?

There was no objection.

The CHAIRMAN. The Clerk will report the amendment as modified.

The Clerk read as follows:

Page 22, line 8, after the word "and," insert the words "upon the request of either of the parties to the litigation, or the order of the court or judge." And on the same page, line 11, strike out the words "except when the judge dispenses with his services in a particular case, or with respect to any portion of the proceedings therein."

The CHAIRMAN. The question is on the amendment.

The amendment was agreed to.

Mr. GOLDFOGLE. Mr. Chairman, I withdraw the amendment that I offered.

The CHAIRMAN. Without objection, the gentleman from New York withdraws his amendment.

There was no objection.

The Clerk read as follows:

SEC. 54. The stenographer shall, upon request, furnish, with all reasonable diligence, to the defendant or his attorney in a criminal cause, or a party or his attorney in a civil cause, a copy from his stenographic notes of the testimony and proceedings, or a part thereof, upon the trial or hearing, upon payment by the person requiring the same of the fees provided elsewhere in this title: *Provided*, That he shall make no charge for such services when rendered on behalf of the United States or when the judge requires such a copy to assist him in rendering the decision.

Mr. IGOE. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

On page 22, line 26, after the word "decision," insert the following: "*Provided also*, That in criminal cases punishable by imprisonment or death, where the defendant shall have been found guilty, a transcript of the evidence shall be furnished the defendant for use on appeal or writ of error in any court of review, and the cost of furnishing same shall be borne by the Government of the United States, provided the defendant shall make request therefor and shall file with his request a statement under oath that he is without means to pay the cost thereof and is unable to procure funds with which to pay the same."

Mr. IGOE. Mr. Chairman, I would like to state that this amendment was prepared by the gentleman from Illinois [Mr. GORMAN], who is not here at the present time. I think the amendment is a good one and should be adopted. It explains itself. The purpose of the amendment is to give the defendants in criminal cases who are unable to pay for a transcript the right to secure, on filing an affidavit of inability to pay, a copy of the testimony taken in the criminal cases at the expense of the United States Government.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

Mr. IGOE. Yes.

Mr. BARTLETT. What are the requirements in the affidavit that he must make?

Mr. IGOE. He files a request for the transcript, together with a statement under oath that he is unable to pay for it and is unable to procure funds with which to pay for it.

Mr. WATKINS. Mr. Chairman, it is perfectly evident that every defendant—at least, a large majority of them—will avail

himself of this privilege, if the man is on trial for a criminal offense, particularly if he is guilty—if, in other words, he is a criminal not yet convicted. If he has been so badly disposed toward the law of the country as to violate the criminal laws, it is perfectly evident that he will always make this application and affidavit. I do not think that on a mere statement, whether sworn or unsworn, of the ordinary defendant in a court on the criminal docket we ought to grant this privilege at the expense of the Government. On the other hand, however, if there was sufficient showing made to satisfy the court that the defendant was a pauper, that he was not able to bear the expense, then it may be it would be proper for the Government to go to the expense of furnishing him with his testimony; but I shall certainly oppose the amendment unless the wording of it is so modified as to leave it clearly within the discretion of the court to say whether a sufficient showing has been made to justify the court in coming to the conclusion that the defendant is not financially able to bear the expense of the transcript.

Mr. TOWNER. Mr. Chairman, the matter raised by this amendment is really of considerable importance. I wish it might be more carefully considered by the committee. I think there ought to be some provision by which under some circumstances an indigent man charged with a serious crime could procure for his aid in appeal a copy of the testimony. I think there is no provision in the bill by which this can be secured, and it might result in a denial of justice. On the other hand, there are a great many cases that would come within the amendment that the gentleman has offered; for instance, cases against the postal laws and against the revenue laws, where the penalty is imprisonment, which are comparatively unimportant and in which, without an application made to the court or judge, the right ought not to be given to the defendant to procure the copy of the transcript of the evidence at the expense of the Government. My idea would be, if the amendment could be changed so that the application should be made to the court, and by him granted in his discretion, except in capital cases or in cases where the punishment might be imprisonment for life; and I think in such cases the man ought to have the right to the transcript whether or not the court orders it; in all other cases, I suggest it would be better if it were left to the judge to determine whether it should be granted.

Mr. IGOE. Does the gentleman mean that it should be left to the discretion of the court altogether, or does he mean to leave it to the court to determine whether the defendant is able to pay?

Mr. TOWNER. Yes; and whether it should be done at the expense of the Government.

Mr. IGOE. I would like to suggest I would be willing to modify the amendment, if it would meet the approval of the committee, so that the judge of the court might pass upon the affidavit and inquire into the facts as to the ability of the defendant to pay for the transcript, leaving it, therefore, to the judge to determine.

Mr. TOWNER. Would it not be necessary only to add to the amendment the words "at the discretion of the court"?

Mr. IGOE. I do not know that it would be very much of an improvement to leave it to the discretion of the court, both as to the ability to pay and as to whether the application should be granted. The judge might be a little bit backward about granting a free transcript in certain cases.

We know of one very prominent case very recently where the court indicated all through the trial a disposition to belittle the defense, and if one of the defendants in a case of that sort should apply for a transcript the judge might be unwilling to grant the request.

Mr. TOWNER. Mr. Chairman, I will say to the gentleman that if he will modify his amendment, even as he says, I will support it, although I would be better satisfied if it were left to the discretion of the court.

Mr. IGOE. Then I ask unanimous consent to modify my amendment by striking out the last proviso and inserting the following:

Provided, The defendant shall make request therefor and shall prove to the satisfaction of the judge that he is without means to pay the cost thereof and is unable to procure funds with which to pay the same.

Mr. WATKINS. Mr. Chairman, I think there will be no objection to that verbiage unless it is intended to strike out all of it after the word "provided."

Mr. IGOE. In the amendment I offered?

Mr. WATKINS. Oh, yes.

Mr. IGOE. This is an amendment to my amendment.

Mr. WATKINS. Yes.

The CHAIRMAN. The Clerk will report the amendment as modified.

Mr. TOWNER. I think perhaps it should read "provided also," because it follows the language "provided."

The CHAIRMAN. The Clerk will report the amendment as modified.

The Clerk read as follows:

Strike out the last proviso in the amendment and insert in lieu thereof the following: "Provided the defendant shall make request therefore and shall prove to the satisfaction of the judge that he is without means to pay the cost thereof and is unable to procure funds with which to pay the same."

Mr. STAFFORD. Now, Mr. Chairman, may we have the amendment reported as amended?

The CHAIRMAN. The Clerk will report the amendment as amended.

The Clerk read as follows:

Page 22, line 26, after the word "decision," insert the following: "*Provided also*, That in criminal cases punishable by imprisonment or death, where the defendant shall have been found guilty, a transcript of the evidence shall be furnished the defendant for use on appeal or writ of error in any court of review, and the cost of furnishing same shall be borne by the Government of the United States, provided the defendant shall make request therefor and shall prove to the satisfaction of the judge that he is without means to pay the cost thereof and is unable to procure funds with which to pay the same."

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

SEC. 55. The stenographer shall attend to the duties of his office in person, except when excused for good and sufficient reason by order of the court, which order must be entered upon the minutes of the court. When the stenographer of any court has been excused in the manner provided by this section, the court may appoint a stenographer pro tempore, who shall take the same oath and perform the same duties and receive the same compensation during the time of his employment as the regular stenographer.

Mr. STONE. Mr. Chairman, observing men have noticed for same time a nation-wide propaganda against the progressive policies of the present administration. It seems to be the hope of certain powerful interests, by a campaign of misrepresentation of the laws already enacted, to deter President Wilson from carrying out his program. The objection really is not so much to what has been accomplished as to what is in prospect. The gigantic trusts and monopolies that have had their unholy hands on the throats and in the pockets of the American people seek to prevent the passage of legislation that will require them to comply with the rules of fair trade and that will make those personally liable for violations of the antitrust law suffer for their wrongdoing. If they should direct their efforts against the particular measures which they wish to defeat, their motives would be manifest and their movement would fail. Instead they attack other matters of less or no concern to them and pursue the attack with vigor and venom in the belief that thereby they will cause our able and courageous President to think it expedient to abandon his plans for further legislation until this manufactured storm about completed legislation has subsided.

Generally the misleading statements appear anonymously as news articles, sometimes in the larger city dailies, but more often in the patent insides of country weeklies innocently purchased by the editors from the ready-print trust. In this way the authorship is seldom fixed and, therefore, responsibility for the false utterances is avoided. It is only occasionally that such erroneous statements are made by an individual of prominence under such conditions as to reveal his identity.

Such an instance occurred recently in my home city of Peoria, Ill. On the evening of April 27 Hon. Frank O. Lowden delivered an address to a Republican club there. Mr. Lowden was formerly a Member of this House, but is now known chiefly because of his connection with the Pullman Co., a corporation which, by requiring the traveling public to give generous tips for service which the company ought to provide and by other economies, has been enabled in the last few years to issue over 100 per cent in stock dividends, pay 8 per cent cash dividends on its stock regularly, and accumulate an enormous surplus. In the course of his remarks he presented as facts things so utterly false that his announcement of them must be attributed either to pitiful ignorance or to dastardly design. If unchallenged, their tendency would be to destroy confidence, cause business depression, and bring disaster upon the country. In referring to the Federal reserve act, which established a new banking and currency system, Mr. Lowden said:

Under its provisions the Federal Reserve Board have the power to suspend for 30 days the requirement that notes be redeemed in gold, and to continue this suspension for 15 days further from time to time. Many men fear that in times of great financial stringency the board may, yielding to the tremendous pressure which will be brought upon them, so use this power that the whole question of fiat money will have to be fought over again, particularly in view of the fact that the new currency provided for is not to be issued by the banks, as it should be, but by the Government. For it will be easy to make those who never have favored the gold standard believe that the value of the currency to be issued depends not upon the requirement of its redemption in gold, but upon the fact that the Government has issued it.

The contention that the Federal reserve notes are not at all times and under all circumstances redeemable in gold is absurdly false. Section 16 of the Federal reserve act states:

The said notes shall be obligations of the United States, and shall be receivable by all national and member banks and Federal reserve banks, and for all taxes, customs, and other public dues. They shall be redeemed in gold on demand at the Treasury Department of the United States, in the city of Washington, D. C., or in gold or lawful money at any Federal reserve bank.

Nowhere is there a provision which under any possible construction gives to the Federal Reserve Board authority to suspend this requirement for redemption. In order to give double assurance that Federal reserve notes are always redeemable in gold it is provided in section 26 that—

Nothing in this act contained shall be construed to repeal the parity provision or provisions contained in an act approved March 14, 1900, entitled "An act to define and fix the standard of value, to maintain the parity of all forms of money issued or coined by the United States, to refund the public debt, and for other purposes."

The act of March 14, 1900, just mentioned, is familiarly known as the gold-standard law, and provides:

That the dollar consisting of 25.8 grains of gold nine-tenths fine, as established by section 3511 of the Revised Statutes of the United States, shall be the standard unit of value, and all forms of money issued or coined by the United States shall be maintained at a parity of value with this standard, and it shall be the duty of the Secretary of the Treasury to maintain such parity.

The Secretary of the Treasury may, for the purpose of maintaining such parity and to strengthen the gold reserve, borrow gold on the security of United States bonds, issue one-year gold notes bearing interest at a rate not to exceed 3 per cent per annum, and so forth.

The ordinarily astute Mr. Lowden surely allowed his boldness or recklessness to lead him into this unwarranted assault upon the Federal reserve act. It was uncomplimentary to the audience which he addressed to assume that their intelligence would accept such an absolutely baseless assertion. No well-informed and truthful banker will attempt to sustain him in the argument which he advanced. His position is entirely untenable, and candor should compel him to admit the fact and undertake to correct the wrong which his public criticism has caused.

Perhaps Mr. Lowden will endeavor to justify his charge by quoting the first part of division (c) of section 11 of the Federal reserve act, wherein the Federal Reserve Board is authorized and empowered—

To suspend for a period not exceeding 30 days, and from time to time to renew such suspension for periods not exceeding 15 days, any reserve requirement specified in this act.

The power to suspend the reserve requirements does not affect nor qualify the redemption features of the law. The reserve requirements are set forth in detail in section 19. They specify the per cent of the demand deposits and of the time deposits which a bank must keep in its vaults and in the Federal reserve bank of its district, and the amount of gold held by the Federal reserve banks to redeem outstanding Federal reserve notes. A suspension of these requirements would permit the holding by a bank of a less amount in its vaults and in the Federal reserve bank of the district. This would enable a bank in an emergency to pay out more than it would ordinarily be permitted to do in order to satisfy an unusual demand to liquidate liabilities, but it does not alter the character of the money used to make payments nor to redeem Federal reserve notes. Any confusion on this subject is cleared by the first proviso under division (c) of section 11, which immediately succeeds the portion heretofore quoted, and which is as follows:

That it (Federal Reserve Board) shall establish a graduated tax upon the amounts by which the reserve requirements of this act may be permitted to fall below the level hereinafter specified.

The remainder of division (c) is devoted to a schedule of penalties to be increasingly applied as the gold reserve held against Federal reserve notes falls below 40 per cent. There is not the slightest suggestion anywhere in the Federal reserve act that the suspension of the reserve requirements involves more than the amount of the reserves. The penalties prescribed refer wholly to a possible deficiency in the amount of the gold reserve and not at all to a change in the character of the reserve.

The power conferred by the Federal reserve act upon the Federal Reserve Board to suspend the reserve requirement is not a new proposition, nor has it proved a dangerous one. A power analogous to this was exercised by the Comptroller of the Currency with respect to national banks for nearly 50 years. Section 5191 of the national-bank act provides that—

The Comptroller of the Currency may notify any association whose lawful money reserve shall be below the amount above required to be kept on hand to make good such reserve; and if such association shall fail for 30 days thereafter so to make good its reserve of lawful money, the comptroller may, with the concurrence of the Secretary of the Treasury, appoint a receiver to wind up the business of the association, as provided in section 5234.

Under section 5191 of the national-bank act, the Comptroller of the Currency was explicitly authorized to tolerate for a period of 30 days a violation of the reserve requirements of the act without applying a penalty. This power was often abused, and violations were tolerated for several years instead of for a single month. The penalty prescribed for the offense indicated was so radical that it was not applied in the whole history of the national banking system. The Federal reserve act does not lodge this power in one man, but commits it to a board of seven men and charges them with the duty of prescribing and enforcing a reasonable penalty for violation of law. The power to suspend reserve requirements as to their amount was included in the law because three times within 60 years the British Parliament has found it necessary to sanction by law similar suspensions in order to arrest panics in Great Britain. It will rarely if ever be used, but it is important that the Federal Reserve Board should have this power. Even if used, it does not mean that "the whole question of fiat money will have to be fought over again." That might result if such action were allowable as was taken in 1907, when, under the old system, banks refused not merely to pay deposit liabilities in gold or lawful money, but refused to pay out money or currency of any kind.

The suggestion that Federal reserve notes constitute a fiat currency reaches the height of the ridiculous. The most casual survey of the conditions governing the issuance of this currency and the securities provided for its redemption disproves such an insinuation.

The Federal reserve act provides that the Federal Reserve Board may, in its discretion, issue to a Federal reserve bank, on application, currency in amount equal to collateral presented and indorsed by the Federal reserve bank and the member banks and deposited with it as security for such currency issues, the collateral thus deposited being notes, drafts, or bills of exchange arising out of actual commercial transactions, or being issued or drawn for agricultural, commercial, or industrial purposes, or the proceeds of which have been used or are to be used for such purposes, having a maturity not not exceeding 90 days except in the case of certain agricultural paper, where a longer maturity is allowed.

This currency is issued by the United States Government, is its obligation, and is redeemed by the United States Government in gold if presented to it for redemption. The credit of the United States alone has proved sufficient to make the greenback as good as gold, but the Federal reserve notes have behind them not only the credit of this great Republic, representing $125,000,000,000 of property and the strongest and most virile Nation with the most stable form of government that the world has ever known, but besides have behind them in array of other securities which would be ample in themselves.

What are these other securities?

First, there is the obligation of a trusted citizen to a member bank upon his negotiable paper of a qualified class based upon an actual commercial transaction. Experience has shown that the probability of failure of that security is about 1 in 10,000.

Second, there is the obligation of the member bank that indorsed the commercial paper. The probability of a bank in good standing which has been extended accommodation by the Federal reserve bank failing within 90 days is about 1 in 25,000. Before the Government of the United States can lose by the issuance of a Federal reserve note on commercial paper of the kind required both the trusted citizen and the member bank must fail within the same 90 days. The probability of failure of these two securities occurring within the same 90 days would be 1 in 10,000 multiplied by 25,000, or 1 chance in 250,000,000.

These two securities for Federal reserve notes, the individual credit of the drawer of the commercial paper and of the member bank which indorses it, have been sufficient in other countries, as in Germany, which emits legal-tender notes against commercial paper, and also in France, that has the right to issue legal-tender notes against commercial paper taken by the Bank of France for discount.

However, under the Federal reserve system a chance for loss, so remote as to be in the ratio of one to two hundred and fifty million, is protected by a series of additional safeguards. The Federal reserve notes are further secured by the stock of the member bank in the Federal reserve bank, by the reserves of the member bank on deposit in the Federal reserve bank, by the double liability of the stockholders of the member bank, by the 40 per cent gold reserve, by the surplus and earnings of the Federal reserve bank, by the first lien upon all the assets of the Federal reserve bank, by the double liability of the member banks belonging to the Federal reserve bank, and by the double

liability of the stockholders of the member banks of the Federal reserve bank.

It seems inconceivable that the Federal reserve notes, protected as they are in these various ways, should be compared with fiat currency which has behind it only the Government credit. Other objections have been urged to the system, but no critic of the Federal reserve act, save Mr. Lowden, whether banker, business man, or specialist, has had the audacity to seriously contend that the Federal reserve notes are not entirely safe. As a practical fact the security behind the Federal reserve notes is many times more than sufficient to satisfy the obligation before the holder would reach the United States Treasury, but superimposed upon the 10 lines of security already outlined is the obligation of the United States. To express solicitude about the soundness of such currency is to exhibit sheer foolishness. Sensible people will not be deceived nor alarmed by such an unfounded complaint, by such an obvious pretense. The outcry of Mr. Lowden will prove futile, because to be otherwise it would require such a degree of simplicity and credulity among the people as has never been witnessed since the world began.

The Federal reserve notes are not only sound but their volume can be increased or decreased to meet the requirements of trade and commerce. Our country has never before had an elastic currency. At times it was redundant and encouraged reckless speculation with the consequent reaction and depression. At other times it was so stringent that the rates of interest became exorbitant, and business of all kinds was practically paralyzed.

The President recommended the character of currency which should be authorized when in the course of his message on banking and currency he said:

> We must have a currency, not rigid as now, but readily, elastically responsive to sound credit, the expanding and contracting credits of everyday transactions, the normal ebb and flow of personal and corporate dealings.

The great purpose outlined by the President has been accomplished in the Federal reserve act. Everyone has recognized for years the necessity of making provision for the varying currency demand. All nations which have a modern financial system have long had such a currency. Yet distinguished but now discredited Republican leaders in Congress delayed and denied relief from year to year, until the demands of the people changed to reproaches. Under the leadership of a Democratic President, who yields neither to greed nor to declamation, who has the courage and the constancy to fulfill his promises, the Sixty-third Congress has provided for such a currency as will give prompt and efficient relief.

The complaint of Mr. Lowden, that the new currency "is not to be issued by the banks, as it should be, but by the Government," will meet with the hearty concurrence of every Wall Street financier, but will not get a favorable response from the great masses of the American people. The President voiced the will of an overwhelming majority of the people of this country when in the course of his message he suggested that—

> The control of the system of banking and of issue which our new laws are to set up must be public, not private, must be vested in the Government itself, so that banks may be the instruments, not the masters, of business and of individual enterprise and initiative.

Deep-rooted in the American mind is the idea that control of the currency is a function of sovereignty, not to be surrendered to banks or private interests; that the people's money ought to be issued and controlled by the people's Government. Inasmuch as all business and industry are dependent for success upon the volume and the circulation of currency, its issuance should be controlled by the Government for the public good, not by large individual banks, whose policy would be directed by their own profit and interests. Such great power should be exercised for the benefit of all the people and not for the enrichment of a few. It is only through accredited Government officers that the people can act in this matter, and it is far preferable to intrust this power to representatives of the people than to private individuals, who have no public responsibility and hence no obligation to work for the public betterment in preference to their own selfish interests.

No, Mr. Chairman, instead of being made the object of bitter attack, the Federal reserve act deserves to be warmly welcomed by all who value and who would preserve the rights of the people. It is freighted with reforms and benefits. It remedies the weaknesses and deficiencies and corrects the evils of the national-bank system. It avoids the vices and dangers and monopolistic tendencies of the Aldrich scheme which the Republican Party proposed. It embodies so much of all established systems as has been shown by the stress and storm of experience to be free from defect, supplemented by what experience has shown to be lacking. It serves alike and without partiality or injustice all classes and interests and promotes all legitimate business. It will save the country in the future from the paralyzing influence of monopoly of money and bank credits; effectively prevent panics which have heretofore threatened our whole financial structure; avoid the prospect of disaster always imminent while Wall Street could put into the maelstrom of stock operations the hundreds of millions of dollars of the reserves of interior banks by requiring that hereafter reserves shall be kept in the Federal reserve banks to be dedicated to the development of commerce, agriculture, and manufactures in the Federal reserve district where the money belongs; create a discount market where commercial paper can be readily discounted, thus enabling banks to extend to customers all prudent and legitimate accommodation; permit the extension by banks of their activities into foreign fields, so that it will be possible for them to handle a vast amount of highly profitable business which American business men are accustomed to turn over to foreign institutions, for the simple reason that under the old order of things American banking institutions were not allowed to establish foreign branches; and provide a more effective and less expensive method of domestic exchange and collection and also a system of examination and publicity which better safeguard the banking operations of the country.

The system will stand the test of fair disputation. Yes; it will survive even the crafty and shameless assaults which a desperate political exigency has caused to be directed against it. Seven thousand four hundred and eighty-two out of a possible seven thousand four hundred and ninety-seven national banks have already signified their intention to join the system, thus assuring its success and at the same time hurling the lie into the faces of those who prophesied its failure through the refusal of the banks to join. Under its beneficent operation and despite the pretended anxious doubts and chilling fears of political marplots who to regain lost power or to intimidate persons charged with a public duty would bring upon their countrymen the ruin which they affect to decry, this mighty Republic is destined to advance rapidly and continuously along the pathways of progress and prosperity.

Mr. TOWNER. I would like to ask the chairman of the committee if he does not think the language in line 6, the word "may" should be changed to "shall." If it leaves the power in the discretion of the judge whether, when a vacancy occurs, he may or may not appoint a stenographer to act in his stead, would not that act as a means by which a report of the transactions of the court might fail?

Mr. WATKINS. I will state to the gentleman there may be some case in which it would not be absolutely necessary for the court at once to appoint the stenographer. The word "may" was left in the discretion of the court ad interim—that is, at the time the vacancy occurs and the time of appointment of a permanent stenographer—and I do not think there would be any danger in leaving it to him. It is possible there may be occasion when it would not be necessary at once to go to the expense or for the court to take the trouble of selecting some one to appoint at that particular time. Sometimes judges go away to spend their vacations, and there may be contingencies in which it would not be absolutely necessary to appoint the permanent stenographer. The word "shall" is peremptory, and would force him at once to make the appointment.

Mr. TOWNER. I think, perhaps, that might be true; but I merely desired to suggest that to the chairman. Of course, taken in connection with the amendment already adopted by the committee, it allows parties to proceedings to demand that the evidence shall be taken, and I think perhaps no harm can be done.

The Clerk read as follows:

> SEC. 57. The following and no other compensation shall be taxed and allowed to attorneys, solicitors, and proctors in the courts of the United States, to district attorneys, clerks of the circuit courts of appeals and district courts, marshals, commissioners, jury commissioners, stenographers, witnesses, jurors, and printers, in the several States and Territories, except in cases otherwise expressly provided by law. But nothing herein shall be construed to prohibit attorneys, solicitors, and proctors from charging to and receiving from their clients, other than the Government, such reasonable compensation for their services, in addition to the taxable costs, as may be in accordance with general usage in their respective States, or may be agreed upon between the parties.

Mr. STAFFORD. Mr. Chairman, I move to strike out the last word for the purpose of obtaining some information. I notice that in the present paragraph the committee has inserted two new classes—jury commissioners and stenographers. I assume that jury commissioners at the present time have no stated salary or stated fees, and in the bill as proposed the gentleman is going to limit the fees of the jury commissioners.

Mr. WATKINS. They are fixed at $3 a day.

Mr. STAFFORD. Does the gentleman intend to change the present regulations, so far as jury commissioners are concerned?

Mr. WATKINS. I see no cause for it.

Mr. STAFFORD. Very well. I withdraw the pro forma amendment.

The CHAIRMAN. The pro forma amendment is withdrawn, and the Clerk will read.

Mr. WATKINS. Excuse me for just a moment. I want to answer the gentleman's question properly.

Mr. STAFFORD. I direct the attention of the chairman to section 92, page 59.

Mr. WATKINS. That is what I was going to say; I was mistaken about the compensation. I had in mind jurors instead of jury commissioners. It is $5 a day for jury commissioners; and I had in mind jurors when I answered the question.

The Clerk read as follows:

SEC. 59. The United States district attorney for each of the following judicial districts of the United States shall be paid, in lieu of all fees, per centums, and other compensations, an annual salary, as follows: For the northern and middle districts of the State of Alabama, each $4,000; for the southern district of the State of Alabama, $3,000; for the district of Arizona, $4,000; for the eastern and western districts of Arkansas, each $4,000; for the northern district of California, $4,500; for the southern district of California, $4,000; for the district of Colorado, $4,000; for the District of Columbia, $6,000; for the district of Connecticut, $2,500; for the district of Delaware, $2,000; for the northern and southern districts of Florida, each $3,500; for the northern district of Georgia, $5,000; for the southern district of Georgia, $3,500; for the district of Idaho, $4,000; for the northern district of Illinois, $10,000; for the southern and eastern districts of Illinois, each $5,000; for the district of Indiana, $5,000; for the northern and southern districts of Iowa, each $4,500; for the district of Kansas, $4,500; for the eastern and western districts of Kentucky, each $5,000; for the eastern district of Louisiana, $3,500; for the western district of Louisiana, $2,500; for the district of Maine, $3,000; for the district of Maryland, $4,000; for the district of Massachusetts, $5,000; for the eastern district of Michigan, $4,000; for the western district of Michigan, $3,500; for the district of Minnesota, $4,000; for the northern and southern districts of Mississippi, each $3,500; for the eastern and western districts of Missouri, each $4,500; for the district of Montana, $4,000; for the district of Nebraska, $4,000; for the district of Nevada, $4,000; for the district of New Hampshire, $2,000; for the district of New Jersey, $5,000; for the district of New Mexico, $4,000; for the southern district of New York, $10,000; for the northern, western, and eastern districts of New York, each $4,500; for the eastern district of North Carolina, $4,000; for the western district of North Carolina, $4,500; for the district of North Dakota, $4,000; for the northern and southern districts of Ohio, each $4,500; for the eastern and western districts of Oklahoma, each $4,000; for the district of Oregon, $4,500; for the eastern district of Pennsylvania, $6,000; for the middle and western districts of Pennsylvania, each $4,500; for the district of Rhode Island, $2,500; for the eastern and western districts of South Carolina, $4,500, $2,500 of which shall be for the performance of the duties of district attorney for the western district; for the district of South Dakota, $4,000; for the eastern, middle, and western districts of Tennessee, each $4,500; for the northern, southern, eastern, and western districts of Texas, each $4,000; for the district of Utah, $4,000; for the district of Vermont, $3,000; for the eastern district of Virginia, $4,000; for the western district of Virginia, $4,500; for the eastern and western districts of Washington, each $4,500; for the northern and southern districts of West Virginia, each $4,500; for the eastern and western districts of Wisconsin, each $4,000; and for the district of Wyoming, $4,000.

Mr. CALDER. Mr. Chairman, I submit the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

"Page 27, line 20, after the word 'western,' strike out 'and eastern,' and in line 20, after the word 'northern,' insert the word 'and,' and in line 21, after the word 'dollars,' insert 'for the eastern district of New York, $6,000.'"

Mr. CALDER. Mr. Chairman, this amendment, if agreed to, will fix the compensation of the United States district attorney of the eastern district of New York at $6,000. The salary he receives now is $4,500. The eastern district of New York is composed of the counties of Kings, Queens, Suffolk, Nassau, and Richmond in that State, and contains a population of 2,500,000 people; all of the great Boroughs of Brooklyn, Queens, and Richmond, of the city of New York, besides the counties of Nassau and Suffolk are contained in the district. In this district we have five State's attorneys, or county district attorneys, and in the county of Kings, which contains the Borough of Brooklyn, the district attorney receives a salary of $10,000 a year. In the county of Queens he receives $8,000 and in the counties of Richmond, Nassau, and Suffolk $5,000. The salary of $4,500 was fixed many years ago when the population and business of this district was small comparatively. In the old days most of the business in that part of the State was transacted in the southern district, which was the old city of New York. Four years ago Congress created an additional judge in the eastern district, and since then the business has more than doubled.

Mr. BARTLETT. Will the gentleman yield for a question?

Mr. CALDER. With pleasure.

Mr. BARTLETT. Is it not a fact until recent years the district attorneys were entitled to certain fees as compensation——

Mr. CALDER. Yes.

Mr. BARTLETT. And that in addition to their salary?

Mr. CALDER. Yes.

Mr. BARTLETT. But in recent years, I do not recollect exactly the date, although I could obtain it in a moment, we have fixed the salary of the district attorneys at a certain amount instead of paying fees?

Mr. CALDER. Yes.

Mr. BARTLETT. And the compensation that we have fixed for the district attorney in this district to which the gentleman has reference is not commensurate with the duties he has to perform and the service he has to render?

Mr. CALDER. That is so.

Mr. BARTLETT. And in order to get the class of lawyers who ought to be in a position to discharge these important duties the salary ought to be sufficient to attract to it that class of lawyers that can perform the duties best?

Mr. CALDER. Mr. Chairman, the gentleman from Georgia is correct. Forty-five hundred dollars paid a man fit to be district attorney in the great city of New York, I am sure you will all agree, is nowhere near enough.

Mr. BARTLETT. I do not think it is enough for a United States district attorney in any district in the United States.

Mr. CALDER. I agree with the gentleman on that, too, especially as to this great city, where we pay the county district attorney a salary of $10,000, and in the other counties in that district more than the amount the United States Government pays. This man has four assistants under him, and the place ought to attract the very best legal talent we have. And the pay—$4,500—I am sure the committee must agree, is not sufficient.

Mr. BARTLETT. Not only that, if the gentleman will permit me, but take the district in which I live, the southern district of Georgia. The southern district of Georgia is provided a district attorney, at $3,500, and the northern district a district attorney, at $5,000, the northern district embracing Atlanta, where they try a thousand cases, I presume, a year, and transact other important business.

I do not know what the policy was of the former administration, and I am not criticizing it; but the policy pursued by this administration, which I think is a proper one—and probably the gentleman has not had the experience I have—is that when you undertake to secure the appointment of a district attorney, the first question asked by the Attorney General or those who represent him is whether or not he will agree to give all of his time to the office of district attorney. In other words, they are not satisfied—and I have no doubt that is the correct policy—to appoint a prominent lawyer to the office of district attorney if he will not agree to give all of his time to the office, or if he is to devote part of his time to professional duties not connected with his office. I have had this experience recently: A prominent lawyer in my district desired to be appointed district attorney; he desired to have the appointment more in recognition of his services to the party and on account of his position at the bar and the honor of the office than for any salary attached to it. He was asked the question if he would devote all of his time to the office. The Assistant Attorney General inquired of me how a man of that standing and position in the legal profession could agree to devote all of his time to the office at a salary of $3,500. I replied that he desired the office not for the salary, but for the honor of the position. His practice paid him more than that, but we happened in this case to be able to present a lawyer who was willing to serve the Government in an honorable position and to be recognized as a part of the Democratic administration, and because he had served the party loyally for many years as a member of the Democratic Party as State chairman. I said, "I do not see how he could afford to take it, but he desires the office in order that he may discharge the duties of it under this administration." So I say again, I do not believe any of the salaries of these district attorneys are commensurate with the duties of the office and in many instances do not secure that class of lawyers that ought to be appointed to fill such a high and important position, where they have to contend with the ablest lawyers of the country.

The CHAIRMAN. The time of the gentleman from New York [Mr. CALDER] has expired.

Mr. CALDER. Mr. Chairman, I ask unanimous consent for about three minutes more.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. BARTLETT. It will not do to say that because there are some prominent and able lawyers who do accept this office and who do perform satisfactorily the duties of it that therefore the salary is enough, and if they do not like it they need not

apply for it. Members of the legal profession, which is a high and noble profession, have something else in view rather than the dollars that can be made out of it. There is something else to be attained in this honorable profession of a lawyer than the mere money he can make out of it. So far as I am concerned, I think the gentleman from New York [Mr. CALDER] is right in endeavoring to give to this office in New York a salary commensurate with the duties to be performed, and which should attract to that office the very best legal talent that we can secure. The fact that the salaries are not made higher in my district or in my State will not prevent me from supporting the gentleman's amendment.

Mr. CALDER. Mr. Chairman, I thank the gentleman for his interruption. He has stated the case a great deal better than I could. I simply want to add this for the information of the gentlemen present: We have two district judges in this district constantly employed in trying cases, and this office has four assistant district attorneys in addition to the district attorney. It is very difficult to get the type of men that we require to transact the business.

In conclusion, Mr. Chairman, I want to call attention to the fact that the business transacted in the office of the United States district attorney for the eastern district of New York is much greater than that transacted in the eastern district of Pennsylvania, which includes the city of Philadelphia, where the salary is $6,000. The United States district attorney's office in Brooklyn is filled by the Hon. William J. Youngs, a very able lawyer and a man who has filled the place most acceptably. If it were not for the fact that he has other means, he could not afford to hold the place, and when his term expires it will be very difficult to get another man for the position who is anywhere near his equal unless the compensation is increased. I sincerely trust my amendment will be agreed to.

Mr. BROWN of New York. Mr. Chairman, I do not wish long to delay the committee from the consideration of this bill to codify, revise, and amend the laws relating to the judiciary, which bill is some 194 pages in length, but I can not let pass this opportunity to say a few words in support of the amendment offered by my colleague from New York [Mr. CALDER]. His amendment, as the members of the committee will recollect, is to increase the salary of the United States attorney for the eastern district of New York from $4,500 a year to $6,000 a year.

To bring the matter home to the committee, I will state that the population of Kings County, which comprises the old city of Brooklyn, now a part of Greater New York, according to the advance sheets just published by the Census Bureau, has reached the amazing figure of 1,833,696; the population of Queens County, also included within the city of Greater New York, is 339,886; the population of Richmond County (Staten Island), which is also included in the city of New York, is 94,043; the population of Nassau County, which lies within the first congressional district, according to the census of 1910, was 83,930; and the population of Suffolk County, which also lies within the first congressional district, was 96,138. Therefore the combined population of the area included within the eastern district of New York reaches the huge figure of 2,447,693 persons.

The committee will readily understand that the civil cases alone tried in this district in themselves are sufficient to entitle the district attorney to his present compensation, entirely aside from the criminal suits continually being prosecuted by him.

The distinguished gentleman from Georgia [Mr. BARTLETT], a member of the Appropriations Committee, has taken occasion to refer for the sake of comparison to the business done in the eastern district of Pennsylvania, which includes the city of Philadelphia. I notice from the report of the Attorney General for the fiscal year ended June 30, 1913, that in the eastern district of Pennsylvania, where the United States attorney receives a salary of $6,000 and his three assistants receive a total of $8,000, the number of cases commenced was 277, as against 220 in the eastern district of New York, where the three assistants of the United States attorney receive only $6,400 a year, but that during this same period 166 cases were terminated in the eastern district of New York as against 110 in the eastern district of Pennsylvania. Curiously enough, the judgments rendered in favor of the United States varied only $100 in the two districts, this difference being in favor of the eastern district of New York. Ten years ago in the eastern district of New York there were but 98 suits pending, whereas last year there were 192 suits pending.

The Federal Government has already recognized the increase in the amount of business to be done in the courts by assigning an additional judge to the eastern judicial district, so that there are now two judges continually trying cases in the city of Brooklyn. Mr. Chairman, while I believe that the mere presentation of these figures should be adequate to show the reasonableness of the amendment now pending before the committee, yet I desire to state further that under the present administration it is required of the United States attorney that he shall devote his entire time to the business of the Government. In the eastern district of New York the district attorney is confronted with the ablest lawyers in New York City, who have retainers from the corporations who employ them, in many cases, I should judge, amounting to over $50,000 a year. New York attracts the best legal talent from all over the country, and it is a fact known to all that, while the scale of living in New York may be higher than in most other places, the compensation paid the man of brains and ability is more than commensurate with the scale of living. If the Government is to be represented by a district attorney able to meet on an equal basis the best legal brains in the city, he should receive at least a reasonable compensation as judged by the standards of the locality.

While it is eminently fitting that this amendment should be proposed by the only Republican Congressman within the eastern district of the State of New York, it is no less fitting that the responsible majority party should take to itself the credit of enacting into law this much-needed increase in compensation. The present district attorney is a Republican, of whom no man—in my presence, at least—has said anything but good. If this amendment shall speedily be enacted into law, as I hope it may, he will receive the benefits of it during the remainder of his term of office. I am both glad and proud to have some little part in recognizing the distinguished services of a man who has served his country, no less than his party, these many years with great credit to himself and with entire satisfaction to his country.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York [Mr. CALDER].

The amendment was agreed to.

Mr. BARTLETT. Mr. Chairman, I move, on page 26, line 18, to strike out the words "three thousand five hundred" and insert "four thousand."

Mr. STAFFORD. Mr. Chairman, I wish to be recognized in opposition to the amendment, if no one wishes to speak in favor of it. Of course, every Member here—and there are not many here, not more than 25—can rise and propose amendments to increase the salary of the district attorneys of their respective districts. I do not know what the position of the chairman is going to be toward this program, but, of course, if we are going to make a wholesale increase of salary——

Mr. BARTLETT. Only one amendment offered now.

Mr. STAFFORD. Yes; but there will be many more.

Mr. IGOE. I have one.

Mr. STAFFORD. The gentleman from Missouri says he has one. We are going to load down this bill, and the result will be that instead of it being a codification it will be a bill for the increase of salaries.

Mr. IGOE. Will the gentleman yield?

Mr. STAFFORD. I will be glad to do so.

Mr. IGOE. Do you not believe it will be a good time to increase the salaries of these officers, if they need to be increased?

Mr. STAFFORD. The gentleman has been here long enough to know that it is not the regular way to raise salaries.

Mr. IGOE. You can not do it on an appropriation bill.

Mr. STAFFORD. The Judiciary Committee has reported to the House a bill revising the salaries of the clerks of the United States courts, and the salaries recommended will curtail their income under the present fee system. If there is merit in these respective propositions, they should go through the regular channel and not be submitted here haphazardly for the judgment of this very meager assembly.

Mr. BARTLETT. Mr. Chairman, may I interrupt the gentleman just a moment?

Mr. STAFFORD. If the Members are going to proceed with this policy, I serve notice now that there must be a quorum present.

Now, the gentleman from New York [Mr. CALDER] advanced a very meritorious case, and——

Mr. MAPES. Mr. Chairman, will the gentleman yield?

Mr. STAFFORD. Not at the present time. I took occasion to send for the report of the Attorney General, in order to compare the work in that district with the work in the only other district in the country where the district attorney is receiving $6,000, namely, in the eastern district of Pennsylvania. The work done in the eastern district of New York was nearly twice as much as that done in the eastern district of Pennsylvania. I thought the gentleman made out a very meritorious case. I was waiting to hear from the chairman of the committee as to his policy. Perhaps he is waiting to have each

one who is concerned with our respective district attorneys and looking after their interests to rise here and move to increase their salaries; but I say to the chairman of the committee and to the other Members here that it is not fair to the Members who are absent to take them unawares and report these increases in this way. If this practice is going to be continued, I serve notice that it will require a quorum to go on with the consideration of this bill.

Mr. GARRETT of Texas. Mr. Chairman, will the gentleman yield?

Mr. STAFFORD. Yes.

Mr. GARRETT of Texas. Why does the gentleman say that it is not fair to the absent Members when they are well aware that this bill is now under consideration?

Mr. STAFFORD. Because in the consideration of similar bills it was the policy of this House not to pursue any such practice, and because the chairman of the committee stated that it was not to be the policy to amend this bill in any unusual manner.

Mr. BARTLETT. May I interrupt the gentleman to say that it was upon a bill identical with this that the salaries of the Supreme Court judges were increased?

Mr. STAFFORD. Yes; and they were increased at a time when there was not a quorum present, when the Members were downstairs at luncheon. I well remember that occasion, and the committee was taken unawares, as the committee is now being taken unawares. If that is the policy, well and good. Let us have a quorum here.

Mr. BARTLETT. Mr. Chairman, I dissent from the statement of my friend from Wisconsin that this is not the proper place to do it. This is the proper place in which it should be done. This is a bill revising the Judicial Code of the United States, providing for the officers and the salaries of these officers. It is a bill which provides for the offices of district attorneys in the various districts and the salary attached to each, like the other Judicial Code bill, providing for the courts and the judges and the salaries of the judges; and it was in that very bill that we fixed the salaries of the judges of the Supreme Court in 1911, providing the salaries that they now receive. At that time the salary was only $12,000. Nobody ought to be taken unawares, Mr. Chairman. Every Member of the House knows, or should know, that this bill is now being considered. Less than two hours ago we had a call of the House, in which two hundred and odd Members were present.

Mr. STAFFORD. That was before the ball game began.

Mr. BARTLETT. Well, Mr. Chairman, the gentleman from Wisconsin knows as well as I do, from his experience and service in this House, that all legislation, especially the details of a bill in this House, in this Congress, are worked out by the few faithful men who stay and give attention to business, as the gentleman from Wisconsin always does.

Mr. STAFFORD. I thank the gentleman.

Mr. BARTLETT. The gentleman from Wisconsin, whether there is a ball game going on or not, or any other amusement, is here attending to the duties that his constituents have intrusted to him.

Mr. STAFFORD. I appreciate the bouquets which the gentleman is handing me, but I shall not be swerved thereby from my position.

Mr. BARTLETT. I am not attempting to swerve the gentleman from his position. He knows and everybody else knows that it is true that he, among others who remain here, is endeavoring to perform his duty as best he understands it.

Take the State of Georgia. The gentleman will see that it is divided into two districts, the northern and the southern. In the northern district the district attorney gets $5,000, and in the southern district he gets $3,500.

Mr. COX. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Georgia yield to the gentleman from Indiana?

Mr. BARTLETT. I do.

Mr. COX. What is the comparison between the business in the northern district and that in the southern district?

Mr. BARTLETT. I have not the report of the Attorney General before me. I did not anticipate that the question would be brought up. But it is not so disparaging as to pay one $3,500 and the other $5,000.

Mr. COX. Will the gentleman yield to another question?

Mr. BARTLETT. Yes.

Mr. COX. Was there any trouble in finding good lawyers who would be glad to fill the place in the southern district of Georgia?

Mr. BARTLETT. We have only had the chance in 20 years to find a man. We are trying now to find somebody.

Mr. COX. Has the place been filled by a Democrat?

Mr. BARTLETT. No; it is not now filled by a Democrat.

Mr. COX. Can the gentleman inform me how many applicants there are for that job?

Mr. BARTLETT. There are four.

Mr. COX. I presume they are good lawyers?

Mr. BARTLETT. They are very good. But the Democrats are willing to serve the Democratic Party and the country for very small pay, and are willing to serve for an amount of pay which would be very large pay to a Republican in my country.

Mr. GARRETT of Texas. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Georgia yield to the gentleman from Texas?

Mr. BARTLETT. Yes.

Mr. GARRETT of Texas. I was just going to ask my friend from Georgia as to the difficulty in finding men to fill the places, so far as he is concerned. Would he have any difficulty in finding men who would be willing to come here as Members of Congress at that salary?

Mr. BARTLETT. A great many would come, and some would be willing to come at one-half the present salary, and be well paid, at that. [Laughter.]

The CHAIRMAN. The time of the gentleman from Georgia has expired.

Mr. DONOVAN. Mr. Chairman, is it necessary for me to make a pro forma motion?

The CHAIRMAN. The gentleman can move to strike out the last word.

Mr. DONOVAN. Just a word, Mr. Chairman. How is that we get back to page 26? I thought that had been passed. By what sort of legislative proceeding do you turn back? We acted upon fixing the salary of the district attorney in one of the New York districts, and now by some species of legerdemain you go back.

Mr. BARTLETT. No. That is in the same paragraph.

The CHAIRMAN. There are three pages in this paragraph. The paragraph was read, and it is subject to amendment.

Mr. DONOVAN. Mr. Chairman, I did not expect you to answer the question. I supposed some of these legislative sharps around here would be able to answer. This bill, as I understand, Mr. Chairman, is read by the clerks; and, of course, they read it in rotation. All that part has been read and passed, and we were up to page 27, line 20. Now, this gentleman gets up here, on account of the success of the Member from the Brooklyn district in getting an increase of salary for an official there, and he takes it upon himself that no one will notice it, and goes back and offers an amendment.

Mr. BARTLETT. The gentleman is mistaken about that.

Mr. DONOVAN. The gentleman can take his seat for a moment. He has lots of time to talk. Now, let us see who is it we are raising the salary for? We might as well have a little truth. No one can deny that this court is to the United States a petty court; that it bears the same relation as a petty court to a State.

The principal part of its business is the trial of cases of infringements of the public acts. What are they? How much ability and brains does it take to fine a man who has failed to destroy the stamp on a cigar box? How much ability and brains does it take for the United States to secure a conviction and fix the penalty on some one who has not procured his special license for the sale of whisky? How much brains and ability in a lawyer does it take to punish some one for sending scurrilous matter through the mails on a post card? As I say, these are comparatively small matters. The salaries mentioned are, as a rule, ample, and lawyers are nearly committing murder in order to get appointed to these positions. Even my friend the gentleman from New York [Mr. GOLDFOGLE] is having his life made a burden the way they are beseeching him, trying to get an appointment for some lawyer in his locality. He is unable to attend to the duties of his office as Congressman on account of the greed of the legal brethren. My friend from Georgia [Mr. BARTLETT] rose from his seat, violating the legislative rules of procedure, on account of the gentleman from New York [Mr. CALDER] pulling a piece of pie out of this little legislative proceeding, and he tackles it and offers an amendment. Now, I am going with the gentleman from Wisconsin [Mr. STAFFORD], and if you are going to do this business you shall do it officially, with a sufficient number, right now.

Mr. COX. Mr. Chairman, I move to strike out the last word. I am in absolute sympathy with the statement made by the gentleman from Wisconsin [Mr. STAFFORD], and desire to back him up, that if you get any more of these increased salaries through here you have got to do it with a quorum. I did not oppose the motion of the gentleman from New York [Mr. CALDER], because I was looking to the chairman of the codifica-

tion committee, who brought this bill in here, to oppose the amendment.

Mr. WATKINS. Will the gentleman yield for an interruption?

Mr. COX. Yes; I will.

Mr. WATKINS. I have investigated the question and have ascertained the immense amount of work that is done in that district, and am surprised that a greater increase was not asked for. The work there thoroughly justifies the increase.

Mr. COX. I sat quietly by waiting for the chairman to oppose the amendment or to make some statement in explanation of his position, but I never heard him open his mouth. It has been my observation upon the floor of this House that when amendments are offered to a bill the man in charge of the bill makes a statement about it one way or the other, either opposing the amendment or admitting it. I know that the man who stands upon the floor of this House and says one word in behalf of the Treasury of the United States is engaging in a thankless task. He is met with the statement that persons could be got to come here to Congress at half the salary we are drawing, and I say that could be done, and probably with greater ability than the average membership of this House.

Mr. BARTLETT. May I interrupt the gentleman?

Mr. COX. Just for a minute.

Mr. BARTLETT. I did not intimate anything of that sort. I said that those people who would come here for that amount would be well paid for the kind of service they could render.

Mr. COX. Master minds like Daniel Webster, Henry Clay, John C. Calhoun, and Thomas H. Benton never drew to exceed $8 per day, either as Members of this House or of the other body, and they only drew that $8 per day when Congress was in actual session. I do not subscribe to the doctrine that you have got to pay tremendous salaries before you can get a man commensurate to fill a job or a position. That rule may hold good in certain sections of this country, but it is the exception and not the rule. In Indiana the position pays only $5,000 a year, and yet I know that there was a tremendous struggle among men of my party out there to get that job, since this administration went into power, and I know that one of the ablest men of the bar of the State of Indiana was finally selected to fill that place, a man about whom there is no question but what he can go into any city and earn from $10,000 to $15,000 a year. And yet he took the job. That was a matter of his own concern. Why he wanted it I do not know, but he took it.

Mr. BARTLETT. Will the gentleman yield?

Mr. COX. For a question.

Mr. BARTLETT. Does not the gentleman think that this lawyer he refers to in Indiana would consider it somewhat of an honor to be a part of this great Democratic administration?

Mr. COX. I have no idea of what his controlling thought was. It evidently was not money; it probably was power. There are no doubt men in this House serving on a salary of $7,500 a year who, if they would stop and go into some business, would earn four times that amount of money. So it is not money all the time that men struggle for; it is power, influence, position. I do not subscribe and never have subscribed to the doctrine that we ought to pay salaries in order to get high-class, brainy men, because you will get them with the salaries that they are drawing at the time they are appointed.

Besides, here is another thing which is an evil everywhere: Men know when they are elected to the office, or when they are appointed to the office, exactly what the salary is, but immediately they begin a crusade to get the salary increased. That is true in my State, and I imagine it is true in other States in this Union. They know what the salary is before they are elected, but as soon as they are elected they conceive the idea of their great and grave importance, and they rush off to the legislature or Congress and exert themselves to get their salaries increased.

The CHAIRMAN. The time of the gentleman from Indiana has expired.

Mr. COX. Mr. Chairman, I ask for two minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. COX. Men who are seeking these appointments now as district attorney know exactly what their salaries will be and they are willing to accept them, willing to work under them, and yet we are asked to increase them. But, as I said a while ago, the man who opposes these increases of salary, who says a word in behalf of the Treasury of the United States or of the taxpayers, is flaunted right and left, is ridiculed in every conceivable way that it is possible to ridicule him.

For one, Mr. Chairman, while I am on the floor of this House—and I am usually here—whether the chairman of the committee opposes the increases or not, you will never get another one through until you have a quorum to get it in. If we have to stand here when the roll is called every 30 minutes, it is going to be called. Because here is the place to do it, here is the bill, here is the foundation on which to build your increase of salary, and here is the time to do it. Because Members are absent is no reason why you who are interested in the increase should not offer them, and if they are offered a quorum is going to be called for, and if Members are in the city these proposed increases in salaries are going to be put in or defeated, one way or the other. [Applause.]

Mr. GARRETT of Texas. Mr. Chairman, in making an inquiry a moment ago of the gentleman from Georgia, I did not mean to cast any reflection on the integrity or the fidelity of any Member of this House. The gentleman from Indiana [Mr. Cox] seems to have taken exception because I asked the question if the gentleman from Georgia did not think that there were men who would come to Congress for half the price now provided by law. I think that there are men who would come to Congress, and be glad to get here, free of charge, not to serve the country but to serve some other special interest while they were here. [Applause.]

I believe that there are men who would be glad to be appointed district attorney, free of charge, in order that they might serve some other special interest rather than that of the Government of the United States. My query was in reply to a statement made by the gentleman from Indiana when he seemed to predicate his objection to this increase on the ground that some men might be found that would want the job and would be willing to take it. I do not know whether there was merit in the New York cases or not. I do not think the gentleman from Georgia would offer an amendment that he did not conscientiously believe was right and proper, but, Mr. Chairman, I have observed in the short time that I have been in this House that the loudest cry is made against the increase of salary of some little clerk or doorkeeper on some proposition to raise the salary of some little officer $100, but when you come to the great appropriation bills carrying hundreds of millions of dollars they pass the House without a roll call. I saw that very thing done less than a month ago—a bill passed this House appropriating over $100,000,000 out of the Treasury of the United States and not a man raised his voice against it or questioned one item in it. And yet men get up on the floor of this House, if you attempt to raise the salary of some worthy man to a living wage, and attempt to belittle men who are simply desirous of paying public officials a reasonable compensation for their services.

As far as I am concerned I am willing that every public servant should be paid a reasonable salary for honest services rendered the people. As far as the question of a quorum is concerned, I believe that there ought to be a quorum here every day when the House convenes, and that it should be kept here, and that Members should be in their seats all the time to transact the public business. [Applause.]

Mr. METZ. Mr. Chairman, I move to strike out the last two words. I have listened with very much interest to what the gentlemen have said, and I quite agree with what they have said as to the value of the services that these gentlemen render. I know the conditions in the Brooklyn office, and I am very glad that the amendment in respect to that office has been agreed to.

I ask unanimous consent to extend my remarks in the RECORD upon the subject of salaries.

The CHAIRMAN. The gentleman from New York asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. DONOVAN. Mr. Chairman, I am going to raise the point of order that we have no right to consider this matter. It has been passed. We have passed the page to which the amendment is offered, and we are up to line 21, on page 27. We can not go back this way promiscuously and offer amendments. The gentleman can ask unanimous consent to go back and make the motion.

Mr. BARTLETT. Mr. Chairman, there is no point of order in that.

Mr. DONOVAN. The gentleman should ask unanimous consent to go back and make his motion.

Mr. BARTLETT. Mr. Chairman, the gentleman is mistaken in respect to that. Let me proceed for just a moment and I am satisfied that when the gentleman's attention is called to it he will realize the error into which he has fallen. On page 26, line 1, section 59 begins, and on page 28, line 24, section 59 ends. In that section, which is all one paragraph, are contained provisions for the salaries for all of the district attor-

neys, commencing with Alabama and ending with Wyoming; and in that section is a provision for the salary for the district attorney for the eastern district of New York and for the southern district of Georgia. They are all in one paragraph, all in one section; and we have proceeded no further than that section.

The CHAIRMAN. Does the gentleman from Connecticut desire to be heard upon the point of order?

Mr. DONOVAN. Just one word. We are now reading this bill for amendment under the five-minute rule. We have read all of that portion to which the amendment has been offered. We have gone by it.

Mr. BARTLETT. We have not got by it.

Mr. DONOVAN. And we have gotten down to line 21, on page 27. That is our legislative proceeding—we are reading the bill for amendment. We have passed that page of the bill, and if the gentleman desires to make the motion he should ask unanimous consent to go back so that he may offer it at the proper point. That is all I care to say.

The CHAIRMAN. The Chair will state upon the point of order made by the gentleman from Connecticut that under the rules and practices of the House, in the reading of a bill the second time for amendment, it is read by paragraphs. This paragraph now before the committee covers three pages. The entire paragraph has been read, and when read it is subject to amendment in any part of it.

Mr. DONOVAN. Mr. Chairman, will the Chair permit an interruption?

The CHAIRMAN. Yes.

Mr. DONOVAN. The rules do not require a second reading. You have to get unanimous consent to have the Clerk report it again. It has to be by unanimous consent after we have gotten by a point.

The CHAIRMAN. The bill is being read now for the second time. The entire paragraph or any part of it is open to amendment. It is not necessary that the amendments should be offered first to the first part of the paragraph, and so on. An amendment could be offered to the last paragraph first or to the first paragraph last. Any part of the entire paragraph is subject to amendment at any time until the entire paragraph is finally passed. This entire paragraph is now before the committee, and the point of order is overruled.

The question is on the amendment offered by the gentleman from Georgia.

Mr. DONOVAN. Mr. Chairman, is not the chairman of the committee that has this matter in charge going to say anything?

Mr. STAFFORD. Let us have a vote, so that we may see what the feeling of the committee is.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia.

The question was taken; and on a division (demanded by Mr. BARTLETT) there were—ayes 15, noes 15.

So the amendment was rejected.

Mr. WATKINS. Mr. Chairman, I wish to state that, in view of the fact that I have been notified that there will be some other amendments to this section, and in view of the fact that it has been stated that a quorum would be demanded in case there were other motions made along this line, I move that the committee do now rise.

Mr. MURDOCK. I think the gentleman ought also to state that it is now 5 minutes of 5 o'clock.

Mr. STAFFORD. Mr. Chairman, it was not my purpose to make the point of no quorum if the motions were defeated.

The CHAIRMAN. The question is on the motion of the gentleman from Louisiana that the committee do now rise.

Mr. MURDOCK. Division, Mr. Chairman.

The CHAIRMAN. A division is called for.

The committee divided; and there were—ayes 30, noes 11.

So the motion that the committee rise was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. RUSSELL, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 15578, and had come to no resolution thereon.

SUPPLEMENTING EXISTING LAWS AGAINST UNLAWFUL RESTRAINTS AND MONOPOLIES.

The SPEAKER. The Chair recognizes the gentleman from Alabama [Mr. CLAYTON]. [Applause.]

Mr. CLAYTON. Mr. Speaker, I desire to call the attention of the House to the fact that I have this day made a report on the bill H. R. 15657, a bill which is entitled "To supplement existing laws against unlawful restraints and monopolies, and for other purposes."

Mr. MURDOCK. Mr. Speaker, will the gentleman yield?

Mr. CLAYTON. Certainly.

Mr. MURDOCK. Does that now complete the bills on trust matters that the gentleman will report?

Mr. CLAYTON. I think it does. I think I may say that this bill is comprehensive and embraces the subject matter which was contained in the several tentative bills which the committee had under consideration and with which the gentleman from Kansas is familiar.

Mr. BARTLETT. Does it include the bond-issue proposition?

Mr. CLAYTON. No. The Committee on the Judiciary did not have jurisdiction of that subject. That belongs to the Committee on Interstate and Foreign Commerce.

Mr. STAFFORD. Will the gentleman yield?

Mr. CLAYTON. With pleasure.

Mr. STAFFORD. Can the gentleman inform the House as to his plans for early consideration of the bill?

Mr. CLAYTON. I have asked the Committee on Rules to bring in a special rule for its early consideration.

Mr. STAFFORD. What is the form of the rule as expressed in the request of the gentleman?

Mr. CLAYTON. Well, it is in the usual form in like cases.

Mr. STAFFORD. How much time for debate?

Mr. CLAYTON. It was suggested by this rule that general debate should be had for 16 hours and 4 hours under the five-minute rule. It has since been suggested that perhaps it would be wise for the Committee on Rules to amend the latter proposition so as to make the time for debate under the five-minute rule longer than 4 hours.

MEMORIAL EXERCISES, BROOKLYN NAVY YARD, N. Y.

The SPEAKER. The House this morning passed a concurrent resolution (No. 39) authorizing the Speaker to appoint 15 Members to go to the funeral exercises of the sailors and marines killed at Vera Cruz. The Chair finds on investigation there are 18 of them and he wants to appoint Members from each district that had one, and in addition to that he would like to appoint the gentleman from New York [Mr. FITZGERALD] who introduced the resolution, the gentleman from New York [Mr. CALDER] who is the only Republican Member from New York, and Mr. MAHER, who represents that navy yard where these services are to take place, so the Chair would like to appoint 21 Members.

Mr. GARRETT of Tennessee. Mr. Speaker, I ask unanimous consent to reconsider the vote by which the concurrent resolution was passed.

The SPEAKER. The gentleman from Tennessee asks unanimous consent to reconsider the vote by which the concurrent resolution was passed. Is there objection? [After a pause.] The Chair hears none.

Mr. GARRETT of Tennessee. Mr. Speaker, I ask unanimous consent that the resolution may be amended so as to provide for 21 Members.

The SPEAKER. The gentleman from Tennessee asks unanimous consent that the resolution be amended so as to provide for 21 Members. Is there objection?

Mr. GOLDFOGLE. Mr. Speaker, reserving the right to object, did we understand the Chair correctly to say that it was the desire of the Chair to appoint a Member from each district from which came one of these men who fell at Vera Cruz?

The SPEAKER. Yes.

Mr. GOLDFOGLE. The reason I asked that is that one of the men from my district fell there, and I wanted to be certain.

The SPEAKER. The Chair would request all Members in whose district one of these sailors or marines lived to inform the Chair, so that he can get the name. Is there objection? [After a pause.] The Chair hears none. The question is on the amendment.

The question was taken, and the amendment was agreed to.

The question was taken, and the resolution as amended was agreed to.

ENROLLED BILL AND JOINT RESOLUTIONS SIGNED.

The SPEAKER announced his signature to enrolled bill and joint resolutions of the following titles:

S. 5445. An act for the relief of Gordon W. Nelson;

S. J. Res. 97. Joint resolution authorizing the President to extend invitations to foreign Governments to participate in the International Congress of Americanists; and

S. J. Res. 142. Joint resolution authorizing the Vocational Education Commission to employ such stenographic and clerical assistants as may be necessary, etc.

LEAVE OF ABSENCE.

By unanimous consent, Mr. JACOWAY was granted leave of absence, for two days, on account of serious illness in his family.

ADJOURNMENT.

Mr. WATKINS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 1 minute p. m.) the House adjourned to meet to-morrow, Thursday, May 7, 1914, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on preliminary examination and survey of mouth of Bayou St. John, Orleans Parish, La. (H. Doc. No. 963); to the Committee on Rivers and Harbors and ordered to be printed, with illustrations.

2. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on preliminary examination and survey of Rock River, with a view to securing a channel 7 feet deep from the dam at the head of the feeder of the Illinois & Mississippi Canal, at or near Sterling, Ill., to the city of Janesville, Wis.; also with a view to ascertaining whether, for the maintenance of navigation, storage reservoirs are necessary at or near the headwaters of said river, and to determine what portion of the cost of said improvement should be borne by owners of water power and others (H. Doc. No. 964); to the Committee on Rivers and Harbors and ordered to be printed, with illustrations.

3. A letter from the Secretary of the Treasury, transmitting copy of a communication from the Secretary of War submitting an estimate of appropriation in the sum of $25,000 required for the service of the War Department for the fiscal year ending June 30, 1915 (H. Doc. No. 965); to the Committee on Appropriations and ordered to be printed.

4. A letter from the Secretary of the Treasury, transmitting copy of a communication from the Assistant Secretary of Commerce reporting, under section 4, act June 17, 1910 (36 Stat., p. 537), claim for damages which has been considered, adjusted, and determined by the Commissioner of Lighthouses in favor of the Fleming Contracting Co., of New York (H. Doc. No. 966); to the Committee on Appropriations and ordered to be printed.

5. A letter from the Secretary of the Treasury, transmitting supplementary estimate for the public-building work within the limits of cost previously authorized (H. Doc. No. 967); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. OLDFIELD, from the Committee on Patents, to which was referred the joint resolution (H. J. Res. 257) authorizing the Commissioner of Patents to exchange printed copies of United States patents with the Dominion of Canada, reported the same without amendment, accompanied by a report (No. 624), which said joint resolution and report were referred to the House Calendar.

Mr. FERGUSSON, from the Committee on the Public Lands, to which was referred the bill (H. R. 15799) to provide for stock-raising homesteads, and for other purposes, reported the same without amendment, accompanied by a report (No. 626), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. CLAYTON, from the Committee on the Judiciary, to which was referred the bill (H. R. 15657) to supplement existing laws against unlawful restraints and monopolies, and for other purposes, reported the same with amendment, accompanied by a report (No. 627), which said bill and report were referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. McKELLAR, from the Committee on Military Affairs, to which was referred the bill (H. R. 962) for the relief of William H. Shannon, reported the same with amendment, accompanied by a report (No. 625), which said bill and report were referred to the Private Calendar.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 1432) granting a pension to Martha J. Curry; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 12949) for the relief of William S. Colvin; Committee on the Post Office and Post Roads discharged, and referred to the Committee on Claims.

A bill (H. R. 7455) granting an increase of pension to William T. Marshall; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 11729) granting an increase of pension to Effie Haywood Woodruff; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. OLDFIELD: A bill (H. R. 16322) amending sections 476 and 477 of the Revised Statutes of the United States; to the Committee on Patents.

By Mr. DILLON: A bill (H. R. 16323) to amend section 237, chapter 10, of the Judicial Code; to the Committee on the Judiciary.

By Mr. HELGESEN: A bill (H. R. 16324) to make Pembina, N. Dak., a port through which merchandise may be imported for transportation without appraisement; to the Committee on Ways and Means.

By Mr. ASWELL: A bill (H. R. 16325) to waive any and all claims of the United States to lands within the private-land claims located in township 6 north, range 3 west, in the State of Louisiana; to the Committee on the Public Lands.

By Mr. MOORE: A bill (H. R. 16326) to increase the pension of those who lost limbs in the military or naval service of the United States during the Civil War of 1861 to 1865, inclusive; to the Committee on Invalid Pensions.

By Mr. UNDERHILL: A bill (H. R. 16327) to provide an appropriation for the erection of a building within which to install a Government exhibit at the Panama-Pacific International Exposition; to the Committee on Industrial Arts and Expositions.

By Mr. CARLIN: A bill (H. R. 16328) to authorize the use of the property of the United States at Mount Weather, near Bluemont, Va., as a summer White House; to the Committee on Agriculture.

By Mr. SABATH: Joint resolution (H. J. Res. 261) for the appointment of a committee to attend the funeral ceremonies over the bodies of the Nation's dead who fell at Vera Cruz, to be held at New York City, Monday, May 11, 1914; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ANSBERRY: A bill (H. R. 16329) for the relief of Jackson Brown; to the Committee on Military Affairs.

By Mr. BATHRICK: A bill (H. R. 16330) granting a pension to Florence Wood Hayden; to the Committee on Invalid Pensions.

By Mr. FITZHENRY: A bill (H. R. 16331) granting a pension to Samuel Stauffer; to the Committee on Invalid Pensions.

By Mr. HOBSON: A bill (H. R. 16332) granting a pension to Sarah B. Scott; to the Committee on Pensions.

By Mr. JOHNSON of South Carolina: A bill (H. R. 16333) granting a pension to Joanna C. Roper; to the Committee on Pensions.

By Mr. LEE of Pennsylvania: A bill (H. R. 16334) granting an increase of pension to Joseph E. Freeston; to the Committee on Invalid Pensions.

By Mr. LEWIS of Maryland: A bill (H. R. 16335) granting an increase of pension to John Brown; to the Committee on Invalid Pensions.

By Mr. McCLELLAN: A bill (H. R. 16336) granting a pension to Charles Black; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16337) granting an increase of pension to Orra M. Duncan; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16338) granting an increase of pension to John Gray; to the Committee on Invalid Pensions.

By Mr. O'SHAUNESSY: A bill (H. R. 16339) granting an increase of pension to Mary E. Davis; to the Committee on Invalid Pensions.

By Mr. SCULLY: A bill (H. R. 16340) granting an increase of pension to Amelia Lefferson; to the Committee on Invalid Pensions.

By Mr. SELLS: A bill (H. R. 16341) granting an increase of pension to Romain M. Hawkins; to the Committee on Invalid Pensions.

By Mr. SUTHERLAND: A bill (H. R. 16342) granting a pension to Elizabeth Jordan; to the Committee on Invalid Pensions.

By Mr. SWITZER: A bill (H. R. 16343) granting a pension to William H. Whittaker; to the Committee on Pensions.

By Mr. WOODRUFF: A bill (H. R. 16344) granting an increase of pension to Hezikiah B. Hulbert; to the Committee on Invalid Pensions.

PETITIONS, ETC.

By Mr. WOODRUFF: Petitions of sundry citizens of Iosco, Crawford, Bay, Arenac, Presque Isle, and Ogemaw Counties, all in the State of Michigan, against national prohibition; to the Committee on the Judiciary.

SENATE.

THURSDAY, *May 7, 1914.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, we pray that we may feel the sacredness of our citizenship in a land so great and so free. Thou hast called upon Thy servants in this Senate to write the laws of a Christian Nation. We have not yet exhausted the treasure of divine revelation in the making of a nation. So do Thou grant unto them the grace to seek divine help that all Thy will may be written into the laws and into the life of this great Nation.

We remember to-day we are receiving back to their native soil the bodies of the boys of the Navy who gave their lives in obedience to the call of their country. Their blood is a part of the purchase price of the sacred inheritance that we have received. Grant us, we pray Thee, deeper convictions than ever before of our solemn obligations to men and to God, and to be such men as that we may be worthy of the trust that Thou dost commit to us. For Christ's sake. Amen.

The Journal of yesterday's proceedings was read and approved.

EMPLOYMENT OF CONVICTS IN FOREIGN COUNTRIES.

The VICE PRESIDENT laid before the Senate a communication from the Secretary of Commerce, transmitting, in further response to a resolution of November 10, 1913, an additional report from the American consul general at Berlin, Germany, on the employment of convicts in foreign countries, which, with the accompanying paper, was referred to the Committee on Printing.

FINDINGS OF THE COURT OF CLAIMS.

The VICE PRESIDENT laid before the Senate a communication from the assistant clerk of the Court of Claims, transmitting a certified copy of the findings of fact and conclusion filed by the court in the cause of the Methodist Episcopal Church South, of Campbellsville, Taylor County, Ky., claimants, *v.* United States (S. Doc. No. 479), which, with the accompanying paper, was referred to the Committee on Claims and ordered to be printed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed a concurrent resolution providing for representation of the Congress at the exercises to be held at the navy yard in Brooklyn, N. Y., on Monday, May 11, 1914, in honor of the men of the Navy and Marine Corps who lost their lives at Vera Cruz, Mexico, etc., in which it requested the concurrence of the Senate.

ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bills, and they were thereupon signed by the Vice President:

S. 540. An act for the relief of Joseph Hodges;

S. 1808. An act for the relief of Joseph L. Donovan;

S. 1922. An act for the relief of Margaret McQuade; and

S. 3997. An act to waive for one year the age limit for the appointment as assistant paymaster in the United States Navy in the case of Landsman for Electrician Richard C. Reed, United States Navy.

PANAMA CANAL TOLLS.

Mr. THORNTON. Mr. President, I am compelled to leave the Chamber shortly, and I now give notice that at the conclusion of the routine morning business on next Saturday I will desire to address the Senate on the Panama Canal tolls question.

PETITIONS AND MEMORIALS.

Mr. CUMMINS. I present a memorial numerously signed by citizens of the second congressional district of Iowa, remonstrating against the adoption of an amendment to the Constitution to prohibit interstate liquor traffic. I ask that the memorial may be received and referred to the Committee on the Judiciary.

The VICE PRESIDENT. The memorial will be referred to the Committee on the Judiciary.

Mr. CUMMINS. I present petitions numerously signed by citizens of Davenport, Boone, and Russell, in the State of Iowa, praying for the adoption of an amendment to the Constitution to prohibit interstate liquor traffic. I ask that the petitions may be received and referred to the Committee on the Judiciary.

The VICE PRESIDENT. The petitions will be referred to the Committee on the Judiciary.

Mr. TILLMAN. I have here a letter addressed to me, which I ask may be read.

The VICE PRESIDENT. The Secretary will read the letter.

The Secretary read as follows:

MONAGHAN BAPTIST CHURCH,
Greenville, S. C.

Whereas ex-Senator Carman, in his lecture this afternoon in the city of Greenville, S. C., on Mormonism, suggested that the citizens of this Commonwealth request their representatives in both Houses of the United States Congress to use their influence to adopt the proposed amendment to the Constitution of the United States prohibiting polygamy:

Resolved, That it is the sense of this audience, assembled at Greenville, S. C., this 4th day of May, 1914, that it is the patriotic duty of the United States legislative branch of the Government of the United States to make the pending amendment against polygamy into an article in the Constitution of the United States.

Submitted by C. W. Smith.

P. S.—This paper was read to an audience of 1,800 or 2,000 people in the tent of the Red Hall Chautauqua last night, and was unanimously adopted by the audience. I sincerely hope that you will consider our wishes.

The VICE PRESIDENT. The letter will be referred to the Committee on the Judiciary.

Mr. HOLLIS. I present a letter addressed to me, which I ask may be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

MANCHESTER, N. H., *May 1, 1914.*

Hon. HENRY F. HOLLIS,
United States Senate, Washington, D. C.

DEAR SENATOR HOLLIS: I run a market at 609–613 Elm Street, Manchester, N. H., dealing in meats, fish, and groceries. I have noticed a great reduction in the retail prices of staple articles of food used in every household since a year ago.

I herewith submit the actual retail prices for such articles in my own store for the months of April, 1913, and April, 1914:

	April, 1913.	April, 1914.
Best creamery butter, per pound	$0.42	$0.30
Storage creamery butter, per pound	.38	.36
Best cream cheese, per pound	.24	.22
Good cheese, per pound	.18	.18
Skimmed cheese, per pound	.12 to .15	.12 to .15
Best fresh eggs, per dozen	.26 to .28	.24 to .25
Good eggs, per dozen	.24	.20 to .22
Pea beans, per quart	.10	.08
Evaporated apples, per pound	.12	.12
Patent flour, per barrel	6.00	5.50 to 5.75
Oatmeal, per pound	.03½	.03
Salt pork, per pound	.13 to .15	.10 to .12
Pure leaf lard, per pound	.18	.13
Pure lard, per pound	.18	.15
Substitute lard, per pound	.15	.12
Hams, skinned backs, per pound	.13	.10
Hams, regulars, per pound	.20	.17
Smoked shoulders, per pound	.18	.15
Fresh prime beef, first cut, per pound	.14 to .15	.12½ to .14
Fresh prime beef, second cut, per pound	.22	.17
Chuck beef, per pound	.20	.15
Boiling beef, per pound	.16 to .18	.12 to .13
Round steak, per pound	.14 to .15	.10 to .12
Sirloin steak, prime beef, per pound	.22 to .25	.18 to .20
Pork loins, per pound	.32	.25
Sugar, per pound	.40 to .45	.25
	.22	.16
	.06	.04½

I feel that you are entitled to know of this great reduction in the cost of living in the largest city of the State of New Hampshire, and I shall be pleased to have you lay these facts before the United States Senate.

Respectfully, yours,

MOISE VERRETTE.

Mr. BRISTOW presented a memorial of sundry citizens of Hooker, Okla., remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented petitions of sundry citizens of Kansas, praying for national prohibition, which were referred to the Committee on the Judiciary.

He also presented a petition of sundry citizens of Hooker, Okla., praying for the enactment of legislation to grant a compensatory time privilege to employees of the Post Office Department, which was referred to the Committee on Post Offices and Post Roads.

Mr. BURTON presented a petition of the American Genetic Association, praying for the enactment of legislation to provide a literacy test for immigrants to this country, which was ordered to lie on the table.

He also presented a petition of sundry citizens of Ohio, praying for the enactment of legislation to provide for the celebration of the so-called "One hundred years of peace among English-speaking peoples," which was referred to the Committee on Foreign Relations.

He also presented a petition of sundry citizens of Ohio, praying for a settlement of the Mexican difficulties without resort to armed intervention, which was referred to the Committee on Foreign Relations.

He also presented petitions of sundry citizens of Ohio, praying for an appropriation of $100,000 for the enforcement of the so-called migratory bird law, which were referred to the Committee on Appropriations.

He also presented a petition of sundry citizens of Ohio, praying for Federal aid in remedying the conditions existing in the mining districts of Colorado, which was referred to the Committee on Education and Labor.

He also presented petitions of sundry citizens of Ohio, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented memorials of sundry citizens of Ohio, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. LODGE presented a petition of the congregation of the First Baptist Church of Waltham, Mass., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

Mr. BURLEIGH presented a petition of sundry citizens of Enfield, Me., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

He also presented a petition of the Woman's Christian Temperance Union of Calais, Me., praying for national censorship of moving pictures, which was referred to the Committee on Education and Labor.

Mr. KENYON presented petitions of sundry citizens of Iowa, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. WORKS presented telegrams in the nature of memorials from members of the Grain Trades Association of California and of the German-American League of California, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented a petition of the Woman's Social and Helping Hand Club, of San Francisco, Cal., praying for the enactment of legislation providing for Federal censorship of motion pictures, which was referred to the Committee on Education and Labor.

He also presented a telegram in the nature of a petition from the Woman's Christian Temperance Union of Visalia, Cal., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

Mr. PAGE presented the petition of Charles N. Prouty, of Spencer, Mass., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

Mr. BRADLEY presented memorials signed by 4,707 individual citizens of the State of Kentucky, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. KERN presented a memorial of sundry citizens of Wayne, Ind., and a memorial of the Hotel and Restaurant Keepers' Association and the Indiana Hotel Keepers' Association, of Indianapolis, Ind., remonstrating against national prohibition, which were referred to the Committee on the Judiciary.

He also presented a petition of local branch, Railroad Trainmen's Association, of Seymour, Ind., praying for the enactment of legislation to further restrict immigration, which was ordered to lie on the table.

Mr. McLEAN presented a petition of Camp Kirkland, No. 18, United Spanish War Veterans, of Winsted, Conn., praying for the enactment of legislation to pension widows and orphans of veterans of the Spanish-American War, which was referred to the Committee on Pensions.

Mr. WARREN presented resolutions adopted by the Anti-saloon League of Wyoming, representing 500 people, favoring national prohibition, which were referred to the Committee on the Judiciary.

CALLING OF THE ROLL.

Mr. McCUMBER. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Goff	O'Gorman	Sutherland
Bankhead	Hitchcock	Oliver	Swanson
Borah	Hollis	Overman	Thomas
Brady	Hughes	Owen	Thompson
Brandegee	James	Page	Thornton
Bristow	Johnson	Perkins	Tillman
Bryan	Jones	Pittman	Townsend
Burleigh	Kenyon	Robinson	Vardaman
Burton	Kern	Root	Walsh
Chamberlain	La Follette	Sheppard	Warren
Clapp	Lane	Shively	Weeks
Clark, Wyo.	Lea, Tenn.	Simmons	West
Clarke, Ark.	Lodge	Smith, Ga.	Williams
Cummins	McCumber	Smith, Md.	Works
Dillingham	Martine, N. J.	Smoot	
Gallinger	Norris	Sterling	

Mr. WALSH. I wish to announce the continued absence of my colleague [Mr. MYERS] on account of illness and to state that he expects to be in attendance on his duties next week.

Mr. MARTINE of New Jersey. I desire to announce that the junior Senator from South Carolina [Mr. SMITH] is unavoidably absent on official business.

Mr. TOWNSEND. I announce that the senior Senator from Michigan [Mr. SMITH] is absent on important business. He is paired with the junior Senator from Missouri [Mr. REED] on all votes. I desire this announcement to stand for the day.

Mr. SMOOT. I wish to announce the unavoidable absence of the junior Senator from Wisconsin [Mr. STEPHENSON].

The VICE PRESIDENT. Sixty-two Senators have answered to the roll call. A quorum is present.

INSPECTION AND GRADING OF GRAIN.

Mr. McCUMBER. Mr. President, I have here a letter in the form of a petition, or the substance of a petition, from the editor of the Cooperators' Herald, a farm paper in my State. I have stricken out certain portions of it, and I ask that the balance, that which has not been stricken out, may be read.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Secretary will read as requested.

The Secretary read as follows:

FARGO, N. DAK., *May 4, 1914.*

Senator P. J. McCUMBER,
United States Senate, Washington, D. C.

DEAR SENATOR McCUMBER: I read with profound sorrow and regret the defeat of your splendid grading and inspection bill, which has been before the Senate so long.

In view of the unanswerable arguments advanced during the course of the debate on the bill by yourself and by Senator GRONNA, of the vast amount of reliable data and evidence gathered during the hearing on your bill and upon the bill introduced by Senator GRONNA while he was a Member of the House, and in view of the fact that every farmers' organization, national or otherwise, in the country has, time and again, unequivocally indorsed your bill, I confess I am at a loss to understand the attitude of the Senate toward the most important and the most neglected and discriminated against industry in our country, the agricultural industry.

It is not necessary for me to add anything to the vast array of facts and arguments that have been presented to the Senate and to the House to prove the dire need of direct Federal inspection and grading of farm products, even were I able to do so, so I will content myself with expressing the hope that you and your colleague, Senator GRONNA, will press every opportunity to secure the adoption of your bill, either as a rider to the Agricultural appropriation bill, if not too late, or as an amendment to the Gore-Lever bill, which, I understand, is to come up soon, and which, I understand, has the indorsement of the grain exchanges of the country.

Friends of the farmer are unalterably opposed to any legislation of this character that falls short of direct Federal inspection. They are unalterably opposed to Federal supervision of State or board inspection, or any other subterfuge.

The grain combine, as represented by the grain exchanges, is always strongly represented at Washington whenever any legislation affecting the selfish interest of that powerful combine is before the Senate or House. On the other hand, farmers of the country are practically unorganized, and such organizations as they have are without the means to maintain a lobby at Washington.

No class in the United States has been more long suffering; no class desires more sincerely to believe that the men whom it has helped to place and maintain in high positions are at all times impelled by honesty of purpose and patriotic motives, and, I believe, no class has more reason, because of treatment received, to call in question those attributes than the agricultural class.

May we hope that the principles embodied in your bill, that North Dakota's Senators have worked and fought for so conscientiously, consistently, and so long, shall be enacted into law before the adjournment of the present Congress.

Sincerely, yours,

GEO. L. NELSON,
Editor the Cooperators' Herald.

REPORTS OF COMMITTEES.

Mr. SHIVELY, from the Committee on Pensions, submitted a report (No. 489), accompanied by a bill (S. 5501) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and of wars other than the Civil War, and to certain widows and dependent relatives of such soldiers and sailors, which was read twice by its title, the bill being a substitute for the following pension bills heretofore referred to that committee:

S. 106. Henry Lottner.
S. 549. Harriet Pierson Porter.
S. 1649. Sigmund L. Messing.
S. 1747. Susan A. Reynolds.
S. 2978. Rosina Freer.
S. 3025. Roland J. Patrick.
S. 3102. William W. Oglesby.
S. 3387. Bernhart Levyson.
S. 3978. Willis D. Clark.
S. 4607. Mary Adair Kendall.
S. 4642. Rose Schroeder.
S. 4650. Maud M. Whitton.
S. 4911. Charles F. Pegg.
S. 4915. John W. Thomas.
S. 4963. Freddie O. J. Horne.

S. 4971. George Wash.
S. 4972. Dock J. Miller.
S. 4984. Michael A. Clark.
S. 5117. Leo S. Baumgart.
S. 5153. John W. Fessel.
S. 5162. Alice M. Robinson.
S. 5179. Alexander M. Clark.
S. 5268. Alfred A. Stampp.
S. 5292. David Britton.
S. 5332. Emory A. Hilkert.
S. 5334. Robert Layman.
S. 5376. James G. Smith.
S. 5394. Virginia C. Sawyer.

Mr. SHIVELY, from the Committee on Pensions, to which was referred the bill (H. R. 14234) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war, reported it with amendments, and submitted a report (No. 490) thereon.

Mr. WORKS, from the Committee on Fisheries, to which was referred the bill (S. 4977) to establish a fishery experiment station on the Pacific coast of the United States, reported it with an amendment and submitted a report (No. 491) thereon.

Mr. SMOOT, from the Committee on Public Lands, to which was referred the bill (S. 5316) authorizing the survey and sale of certain lands in Coconino County, Ariz., to the occupants thereof, reported it without amendment and submitted a report (No. 492) thereon.

Mr. CLAPP, from the Committee on Indian Affairs, to which was referred the bill (H. R. 11246) for the restoration of annuities to the Medawakanton and Wahpakoota (Santee) Sioux Indians, declared forfeited by the act of February 16, 1863, reported it without amendment and submitted a report (No. 493) thereon.

Mr. NORRIS, from the Committee on Public Lands, to which was referred the bill (S. 5092) for the relief of Charles A. Spotts, reported it without amendment and submitted a report (No. 494) thereon.

Mr. JONES (for Mr. THORNTON), from the Committee on Fisheries, to which was referred the bill (S. 5313) to regulate the taking or catching of sponges in the waters of the Gulf of Mexico and the Straits of Florida outside of State jurisdiction; the landing, delivering, curing, selling, or possession of the same; providing means of enforcement of the same; and for other purposes, reported it without amendment and submitted a report (No. 488) thereon.

PUBLIC BUILDING AT OSAGE CITY, KANS.

Mr. SWANSON. From the Committee on Public Buildings and Grounds I report back favorably, without amendment, the bill (S. 5066) to increase the authorization for a public building at Osage City, Kans., and I call the attention of the Senator from Kansas [Mr. BRISTOW] to the report. It is a very urgent measure, and I ask unanimous consent for its present consideration.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read as follows:

Be it enacted, etc., That to enable the Secretary of the Treasury of the United States to give effect to and execute the provisions of existing legislation authorizing the acquisition of land for the site and the erection of a public building at Osage City, Kans., the limit of cost heretofore fixed by Congress therefor be, and the same is hereby, increased $5,000, and the Secretary of the Treasury is hereby authorized to enter into contracts for the completion of said building within its limit of cost, including site.

Mr. SWANSON. The bill provides for an increase of $5,000 in the appropriation for the erection of a public building at Osage City, Kans. The Secretary of the Treasury estimates that it will require $7,000 additional to construct the building according to the plans and specifications, which originally provided for an expenditure of $50,000. A bid, however, could not be secured to erect the building for that sum. I therefore move an amendment to the bill, on page 1, line 8, after the word "increased," to strike out the sum "$5,000" and to insert in lieu thereof "$7,000," as recommended by the Treasury Department.

The amendment was agreed to.

Mr. GALLINGER. Mr. President, I observe that the Senator from Virginia suggested that this was an urgent matter. I will inquire if the Senator is informed as to what progress is being made in the Office of the Supervising Architect in making these improvements? I ask the question for the reason that months ago a bill was passed appropriating money for a very much-needed improvement in the post office in my home city, but inquiry of the Supervising Architect has always brought a reply that the work of the bureau was so far behind that no definite information could be given as to when the work would be taken up. Is this particular bill different from others, and will this appropriation be spent in the near future or will it go in with the others that are being delayed?

Mr. SWANSON. Mr. President, this bill provides for the increase of the appropriation in order that the plans and specifications which have already been prepared and the money for which has been appropriated may be carried out, the bids having been in excess of the amount appropriated. As soon as this increase is granted, new bids will be asked for, according to the plans and specifications. If they are within the appropriation, they will be accepted and the construction of the building will be proceeded with.

In connection with the delay of other public buildings, I wish to say that we are about seven years behind in the construction of buildings which have been authorized. A joint committee of the House and Senate was appointed to investigate this matter and to ascertain if we could not hasten the construction of these buildings. The delay has been largely occasioned because nearly 100 employees in the Supervising Architect's Office were dismissed a few years ago, not having been provided for in the appropriation bill, and therefore the means of making plans and specifications and contracts having been greatly reduced, the Supervising Architect's Office has been unable to provide the plans and specifications for the construction and improvement of buildings.

Mr. GALLINGER. Mr. President, I thank the Senator from Virginia for giving me the explanation. I did not intend to indulge in any criticism, but there is a condition that in some way ought to be remedied. It is bad enough to have the construction of new buildings postponed year after year, but it is infinitely worse to have such a condition as exists in my home city, where the public business is being carried on to the detriment of the Government and the people, an appropriation having been made months ago to remedy the trouble and nothing being done to remedy it.

Mr. SWANSON. I will say to the Senator from New Hampshire that the joint committee to which I have referred has made its report. We have provided a plan by which we hope that the buildings authorized can be constructed in three years.

I should like to say in this connection that the fault has not been with the Treasury Department, either under this administration or under the former administration. Senators think buildings can be constructed promptly and quickly, and yet when the department has asked for architects to prepare plans and to supervise the construction, Congress has refused to pay the force necessary to do the work which they have directed to be done. If Congress will provide a force sufficient to prepare plans, prepare for construction and the supervision of such buildings, they can be and will be promptly and properly constructed. I hope when the recommendations of the joint committee come before the Senate for consideration and action that those who have been complaining of the delay in the construction of buildings will aid us to get sufficient force to have this work properly and promptly done.

Mr. GALLINGER. Mr. President, as I have already said, I did not intend to indulge in any criticism, but I will venture to suggest to the Senator from Virginia, who is an influential member of the committee, that I trust a suggestion will be made to the Treasury Department and to the Supervising Architect that it would be well to take up cases exactly like this one and the one in my home city and give relief where buildings already exist, rather than to expend energy and money in constructing new buildings for the present. I think it is important that we should have adequate facilities where buildings are now constructed, rather than that we should hasten to construct new buildings, the construction of which can wait without any detriment to the public service. That is all I desire to say.

Mr. SWANSON. I fully concur in what the Senator from New Hampshire has said.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

FEDERAL BUILDING AT SALISBURY, MD.

Mr. SWANSON. From the Committee on Public Buildings and Grounds I report back favorably, without amendment, the bill (S. 4158) to reduce the fire limit required by the act approved March 4, 1913, in respect to the proposed Federal building at Salisbury, Md., and I submit a report (No. 486) thereon. It is a very urgent bill, and I ask unanimous consent for its present consideration.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized to disregard the provisions contained in the public building act approved March 4, 1913, requiring 40 feet open space for fire protection about the proposed Federal building at Salisbury, Md., or to reduce the space required thereby to such an extent as he may deem necessary.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

SIERRA NATIONAL PARK, CAL.

Mr. WORKS. From the Committee on Public Lands I report back favorably without amendment the bill (H. R. 13770) to consolidate certain forest lands in the Sierra National Forest, Cal., and I submit a report (No. 487) thereon. It is a matter of urgency, and I ask unanimous consent for the present consideration of the bill.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to consolidate certain forest lands in the Sierra National Forest and the Yosemite National Park, Cal."

LIEUT. FREDERICK MEARS, UNITED STATES ARMY.

Mr. CHAMBERLAIN. From the Committee on Military Affairs I report back favorably without amendment the joint resolution (S. J. Res. 145) authorizing the President to detail Lieut. Frederick Mears to service in connection with proposed Alaskan railroad, and I ask unanimous consent for its present consideration.

The VICE PRESIDENT. Is there objection to the present consideration of the joint resolution?

Mr. BORAH. Mr. President, I am not going to object to the consideration of the joint resolution, but I shall object to any further requests for unanimous consent to consider bills this morning.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution, which was read, as follows:

Resolved, etc., That the President of the United States be, and he is hereby, authorized to detail and require Lieut. Frederick Mears, United States Army, to perform service in connection with the location and construction of the railroad or railroads in the Territory of Alaska provided for in act of Congress approved March 12, 1914.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

Mr. CHAMBERLAIN. In connection with the passage of the joint resolution I desire to have put in the RECORD a letter from the Secretary of the Interior giving the reasons why this request was made.

The VICE PRESIDENT. Without objection, that action will be taken.

The letter referred to is as follows:

THE SECRETARY OF THE INTERIOR,
Washington, May 6, 1914.

Hon. GEORGE E. CHAMBERLAIN,
Chairman Committee on Military Affairs,
United States Senate.

MY DEAR MR. CHAMBERLAIN: Pursuant to the provisions of the act of Congress approved March 12, 1914, being an act to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes, the President selected Lieut. Frederick Mears, of the United States Army, to perform services in connection with this work. Lieut. Mears is the chief engineer of the Panama Railroad. He is not, however, an officer of the Engineering Corps of the Army or Navy, and the Secretary of War advises me that the proposed detail is not authorized by the act of March 12, 1914, supra, and is forbidden by section 1222 of the United States Revised Statutes, and that in case of other details of officers of the Army to perform civil duties it has been found necessary to procure special legislative authority for such designation.

Lieut. Mears is in the city, and it is the President's desire that he should proceed at once to Alaska, and at the President's request I inclose a joint resolution which I trust that you will see fit to introduce and on which we hope for prompt action.

Cordially, yours,

FRANKLIN K. LANE.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. BRYAN (for Mr. FLETCHER):

A bill (S. 5502) for the relief of James D. Butler; to the Committee on Claims.

By Mr. HUGHES:

A bill (S. 5503) granting a pension to Lillian J. Hartley; to the Committee on Pensions.

By Mr. JONES (for Mr. THORNTON):

A bill (S. 5504) to authorize the Secretary of Commerce to provide additional inspection of the fisheries of Alaska, and authorizing the purchase or construction of vessels and boats to be used in connection therewith; to the Committee on Fisheries.

By Mr. WORKS:

A bill (S. 5505) granting a pension to Josephine C. Sumner (with accompanying papers); to the Committee on Pensions.

By Mr. CLAPP:

A bill (S. 5506) for the relief of Cyrus Kennedy; to the Committee on Military Affairs.

By Mr. OWEN:

A bill (S. 5507) to correct the military record of Stephen W. Parker; to the Committee on Military Affairs.

By Mr. BORAH:

A bill (S. 5508) granting an increase of pension to Martha G. Lee (with accompanying papers); to the Committee on Pensions.

By Mr. McLEAN:

A bill (S. 5509) granting an increase of pension to Burnum W. Francis (with accompanying papers); to the Committee on Pensions.

By Mr. VARDAMAN:

A bill (S. 5510) for the relief of the heirs of Jacob Kuykendall; to the Committee on Claims.

By Mr. CHAMBERLAIN:

A joint resolution (S. J. Res. 146) to authorize the President to raise the organization of the Regular Army on certain occasions to its prescribed statutory maximum strength; to the Committee on Military Affairs.

AMENDMENTS TO RIVER AND HARBOR BILL.

Mr. MARTINE of New Jersey submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

Mr. BURTON submitted two amendments intended to be proposed by him to the river and harbor appropriation bill, which were referred to the Committee on Commerce and ordered to be printed.

Mr. SHIELDS submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

PANAMA CANAL TOLLS.

Mr. WORKS. I submit an amendment to the Panama Canal tolls bill and ask that it be read.

The VICE PRESIDENT. The Secretary will read as requested.

The Secretary read as follows:

Strike out the amendment reported by the committee and insert in lieu thereof the following:

"*Provided*, That neither the passage of this act nor the imposition upon or collection of tolls from the ships of this country or its citizens for passing through the Panama Canal shall deprive the United States of the right as owner of said canal to exempt from the payment of such tolls any and all ships of the Government and its citizens at any future time, nor shall this act be construed as a waiver of such right or as an acceptance of or consent to such a construction of any treaty with a foreign country as will deny or abridge the same."

Mr. WORKS. I ask that the amendment may be printed and lie on the table subject to call.

The VICE PRESIDENT. That action will be taken.

EFFECT OF TARIFF LEGISLATION ON AGRICULTURE—ADDRESS BY SENATOR PENROSE.

Mr. OLIVER. Mr. President, I have an address, delivered at Sharon, Pa., on the 30th ultimo by my colleague [Mr. PENROSE], upon the subject of the injury to agriculture and our national welfare by the Democratic tariff. I ask unanimous consent that it may be printed in the RECORD.

The VICE PRESIDENT. Is there any objection to the request of the Senator from Pennsylvania?

Mr. SIMMONS. Mr. President, I could not hear the Senator. I do not know what the paper contains.

Mr. OLIVER. The paper, Mr. President, contains some very valuable statistics as to the effect of the recently enacted tariff bill upon the agricultural interests of the country. It was delivered by my colleague at Sharon, Pa., on the evening of the 30th of last month.

The VICE PRESIDENT. Is there any objection to the address referred to by the Senator from Pennsylvania being printed in the RECORD?

Mr. SIMMONS. Mr. President, I think it is an exceedingly bad practice to be printing in the RECORD speeches delivered outside of the Chamber by Senators, but if the request comes from the senior Senator from Pennsylvania [Mr. PENROSE] I shall not feel like objecting to it. I do feel like saying, however, that it is a very bad precedent to establish.

Mr. MARTINE of New Jersey. Mr. President, I should like to say that I have been regaling myself this morning with reading one of the Philadelphia papers, and I think it is utterly unnecessary to publish any more of the effusions of the colleague of the Senator from Pennsylvania. The Philadelphia papers are just chock full of the calamity howl, death, desolation, stagnation, and woe that is perpetrated in the daily press of Philadelphia by the distinguished senior Senator from Pennsylvania [Mr. PENROSE]. Everything is cloudy and gloomy, and there is no hope for mankind hereafter, because of the enactment of a Democratic tariff bill.

I do not think it is necessary to encumber the RECORD with any more of it. You can buy for 1 cent the Philadelphia Inquirer or one of the other Philadelphia papers, and you will fairly see the magnificent, stalwart form of Senator PENROSE pictured on every page. It finally winds up with the statement that he is going to spread his gospel; that he is even going to invade the State of the Senators from Indiana, and there tell the tale of sadness and woe that the Democratic Party has brought on this land. [Laughter.]

I am opposed to depressing mankind further. I felt sad after I read this speech, and, great God, I do not want another page in any document spread with like propaganda.

Mr. OLIVER. Mr. President, I am glad to find that the Senator from New Jersey at last realizes the effect of this act, to the passage of which he was a party, and realizes the injurious effect that it is having on the country. However, I do not think that is pertinent to the present proposition. I only wish to say that the facts contained in this address will find their way into the RECORD sooner or later. If they are included in this way it may save 15 or 20 minutes of the time of the Senate at a future period, because I wish to assure Senators that they will go into the RECORD.

The VICE PRESIDENT. Is there any objection to printing the address in the RECORD? The Chair hears none, and the address of the senior Senator from Pennsylvania will appear in the RECORD.

Mr. MARTINE of New Jersey. Mr. President, I object.

The VICE PRESIDENT. The Chair has ruled.

The address is as follows:

THE INJURY TO AGRICULTURE AND OUR NATIONAL WELFARE BY THE DEMOCRATIC TARIFF.

(Address by Hon. BOIES PENROSE, United States Senator from Pennsylvania.)

The Democratic administration has been in power for a little over a year. Its first important legislative act, the tariff, has been in effect a little more than six months. This is a comparatively short period. It would have seemed almost incredible, at the time this act was passed, that in six months thereafter its great feature would stand out clearly as a great national blunder. Yet this has come to pass. And now this blunder is practically admitted by the leading authority in the Democratic Party in the matter with regard to which the blunder was made. I refer to this because the matter is one of fundamental national importance and of great interest at this time to the people of Pennsylvania.

ITS EFFECT ON AGRICULTURE.

This blunder concerns the great industry of agriculture. As to Pennsylvania, the manufactures of the State are so much in evidence that many of our people do not realize that Pennsylvania is a great agricultural State also. But it is noted for the number, good management, and general excellence of its farms and for its large agricultural production.

A recent report of the Department of Agriculture of the United States practically admits that in our country to-day the incentive to more farming and better farming is wanting. This report from the department Bureau of Statistics says:

> However desirable increased production of farms may be from the consumers' standpoint, it does not follow that such increased production would result in any increase in the cash income per farm or per capita of farm population, or that prices paid by consumers would be any lower.

The meaning of this, which is brought out further in the report, is that, as the increase of crops would simply result in a lowering of the price at which the farmer must sell, he has no practical incentive to apply increased labor and improved and more scientific methods to his industry. But the welfare of all our people requires that the production of our agricultural industry be increased as much as possible and that more scientific methods and better organization be established in this industry throughout our country. As the products of our country increase, our purchasing power increases, and with it come better homes and more comforts of life, better education and advantages for our children, and the increase of individual energies and capacities and of all that makes life useful and satisfactory. This is as true for the agricultural industry as for any other industry. Farms are really factories for the manufacture of crops, and must have the same sort of intelligent consideration and regard that manufacturing establishments need. It is remarkable that it should be thought that the farmers should be always content with small returns for their hard work, so fundamentally necessary for the public welfare. Why, in fact, should not the pursuit of agriculture in the United States yield as much return for investment and labor as is obtained in other business enterprises?

But we are now brought face to face with the fact, and reminded of it by the Department of Agriculture, that the natural and necessary inducement to encourage our farmers to greater efforts, better methods, and increased production has been seriously impaired. Here is a most serious economic discouragement introduced to disturb the excellent progress that has been under way, and which the farmers have been making for themselves in a businesslike way, and by means of many useful associations for self-help and cooperation, like the granges and other notable organizations. And the farmers have been going ahead to work out better methods for marketing their products in the cities, so that avoidable wastes, delays, and maladjustments between producers and consumers should be eliminated and the city consumers more efficiently and more cheaply served. And now the Department of Agriculture of the United States, in its comment upon the situation in this matter, plainly admits that what the consumers really need is better marketing and distribution of our own farm products, and not the free entry of all sorts of foreign products, which inevitably discourages and delays progress in really satisfying the consumers' needs. The department says in its report:

> The long line of distributers and middlemen between the farmer and consumer are in a position to take advantage of the market and to a certain extent control the market in both directions, because they are better organized to keep informed of crop and market conditions and to act promptly than either farmers or consumers, who are not organized, and as individuals are helpless. The high prices paid by consumers, ranging from 5 to nearly 500 per cent in some cases more than the farmer receives, indicate that there is plenty of room for lowering the cost of farm products to consumers and at the same time largely increasing the cash income per farm without increasing farm production. This condition is undoubtedly a marketing problem, which will have to be solved by better organization of farmers and improved methods of marketing.

That our resources are such as to enable our own farmers to vastly increase their production when they have the proper incentive is made clear in the latest annual report of the Secretary of Agriculture. The Secretary says:

> The situation is one about which many have become pessimistic, but of course there is no ground for thinking that we have yet approximated the limit of our output from the soil. As a matter of fact, we have just begun to attack the problem; we have not even reached the end of the pioneering stage, and have only in a few localities developed conditions where reasonably full returns are secured. With a population of less than 95,000,000 living on more than 3,000,000 square miles, it is unreasonable to speak as if our territory had been much more than pioneered. The population per square mile in the Union does not exceed 31, and ranges from seven-tenths of 1 in Nevada to 508 in Rhode Island. It is less than 76 per square mile in any State in the Union except in 8 Eastern States and in Ohio and Illinois; less than 50 in any Southern State; less than 43 in any State west of the Mississippi except Missouri; less than 25 in the great States like Texas, Washington, Nebraska, Oklahoma, Kansas, and California; less than 10 in the Dakotas, Oregon, and Colorado; and less than 5 in most of the Rocky Mountain Commonwealths.
>
> Look at it from another point of view. According to the best statistics available, it appears that the total arable land in the Union is approximately 935,000,000 acres; that only about 400,000,000 of this is included in farms and improved; that over 100,000,000 is unimproved and not included in farms; and the remainder is unimproved lands included in farms. But there is another thought. What about the efficiency of the work on the land now under cultivation? What part of it may be said to be reasonably, efficiently cultivated? What part of it is satisfactorily cultivated and is yielding reasonably full returns? The opportunity for guessing in this field is unlimited, but, according to the best guesses I can secure, it appears that less than 40 per cent of the land is reasonably well cultivated and less than 12 per cent is yielding fairly full returns or returns considerably above the average.
>
> * * * * * * *
>
> We have been suddenly brought face to face with the fact that in many directions further production waits on better distribution and that the field of distribution presents problems which raise in very grave ways the simple issue of justice; that under existing conditions in many instances the farmer does not get what he should for his product; that the consumer is required to pay an unfair price; and that unnecessary burdens are imposed under the existing systems of distribution there can be no question.

The Democratic tariff threw away many duties and reduced duties all along the line on manufactured articles; and yet the greatest feature of this tariff is that it has put farm products practically on the free list at one blow. This was one of the great objects of the Democratic tariff. A great deal of popular

excitement had been aroused about what is known as the high cost of living, and the Democratic Party maintained that this was caused by the Republican tariff—especially by the duties on farm products—and that the only thing to do was to remove these tariff duties on farm products and reduce the other duties radically.

The Republican Party maintained that the high cost of living prevailed all over the world, and occasioned as much comment, or more, in other countries as in the United States; and that, as it was a world-wide phenomenon, the most sensible thing to do was to carefully examine into the causes of it and determine the true remedy and then proceed in this country to do our part in applying the remedy. This is characteristically the Republican way of meeting a difficulty, the constructive way, the way by which good and lasting results are secured and prosperity maintained. And the Republican Party gave warning that to sacrifice the tariff was not the way to correct the high cost of living, but was the way into greater difficulties and serious distress.

NEW COMPETITION BUT NO REDUCTION IN THE COST OF LIVING IN THE CITIES.

But the Democratic Party used its power to enact its tariff under the whip and spur of the President, and in such shape as pleased the President, without careful scrutiny by a scientific tariff commission such as the Republican Party sought to establish and which the welfare of the great interest of agriculture and of all our people urgently requires. Now after six months of this tariff, which the Democratic President and his party promised would reduce the cost of living, it is admitted that it has given no relief to the consumer and can scarcely be expected to do so in the future. The defenders of this Democratic tariff are hard pressed to find a single instance of the lowering of prices of any food products to the consumers in the cities, to those for whose sakes it was said that the Republican rates of duty would have to be sacrificed. The sacrifice has been made, and at the expense of the American farmers, but no benefit has been obtained from the free importation of farm products to offset the injury to the farmers. The people of the cities are not getting their food supplies cheaper. The Democratic promise of a reduction in the cost of living has broken down and is now discredited.

THE ONLY WAY TO HELP THE CONSUMERS IN THE CITIES.

As the Department of Agriculture makes clear in its report, the only way by which the actual consumers in the cities can get cheaper food is through better methods of marketing and distributing our own food products. This is recognized also by the present Postmaster General, who is making heroic efforts to bring the city consumer and farm producer together by means of the parcel post. This problem of distribution, from its very nature, must be worked out by and through our own farmers. They have taken up their part of the task in the right spirit and with good effect. The people of the cities must, however, cooperate and do their full share. The task is a great one and calls for all the aid that the cities can render, and they can and must aid with their great resources and facilities, their training and skill in organization and business enterprise, and the intelligence and aggressiveness which have made American business men known and respected the world over. The city people must not forget that they must do their part also in securing a larger production of American farm products.

Our own farmers and our farm production are discouraged by the present tariff policy and the net result is a worse condition than before, to which the great depression of industry generally adds further difficulty. It was a great blunder—and worse than a blunder—to throw away our tariff on farm products and bring against the domestic market of our own farmers the unrestricted competition of farm products from all over the world, including the products of the cheapest and most degraded labor to be found in the world. In this serious injury to our farmers Pennsylvania, in common with the other great agricultural States, suffers greatly.

DAIRY PRODUCTS.

Throughout Pennsylvania the market for dairy products is a matter of great importance to the farmers. The Democratic tariff has cut the tariff rates drastically on such products. Under the Republican tariff butter was dutiable at 6 cents per pound. The present rate is only 2½ cents per pound. This is a reduction of almost 60 per cent. The result is shown in the statistics of recent imports, and a comparison with the imports under the Republican tariff makes clear the tremendous effect of the change.

During the four months from October, 1912, to January, 1913, both inclusive, under the Republican rate the imports of butter and substitutes therefor were 470,175 pounds, valued at $122,313. In the corresponding four months one year later, October, 1913, to January, 1914, both inclusive, under the present Democratic tariff, the imports have amounted to the enormous total of 4,575,079 pounds, valued at $1,031,759. This sudden increase in these imports, which the domestic market must absorb, amounts to 4,104,904 pounds, valued at $909,446. The first month under the new tariff was October, 1913. The imports of butter and substitutes during this month were 463,399 pounds, more than seventeen times the imports of the same month one year before; but for the next month, November, 1913, the imports were 1,069,617 pounds, considerably more than double the imports of October. It is evident that the real effect of the new rates did not have time to appear in the imports of October. Hence the imports of the following few months afford a much truer indication of what to expect under the new rates. During these months the imports steadily increased. The average monthly imports during November, December, and January amounted to 1,370,560 pounds. These figures indicate yearly imports of not less than 16,446,720 pounds.

The imports of cheese and its substitutes have also increased greatly. The duty on this important dairy product was reduced from 6 cents per pound to 20 per cent ad valorem. In 1912, a normal year, the rate of 6 cents was equivalent to about 32 per cent ad valorem, so that this reduction was almost 40 per cent. During the first four months under the new tariff the increase in the imports of this article amounted to 6,254,068 pounds, valued at $927,511. The probable annual importations under the new rates, judging from the imports of November, December, and January, will amount to not less than 78,128,420 pounds.

Cream, which under the Republican tariff was dutiable at 5 cents per gallon, is now on the free list. Milk, both fresh and condensed, is also now absolutely free of duty. The increase in the imports of cream during the first four months of the new tariff, over those of the corresponding period of one year before under the former tariff, amounted to 183,035 gallons, valued at $167,078. The imports of milk increased in the same period from $66,531 worth to $322,211 worth. A great deal of condensed milk is now being imported and has cut off a very important part of the American farmer's market for domestic milk for condensation. It is reported that new arrangements are now actively under way for great additional importations of milk, both fresh and condensed, and it is certain that our farmers have only begun to experience the effect of free trade in these articles. And it is now announced that the American manufacturers of condensed milk will pay American dairymen lower prices for milk during the six months beginning April 1, because of the tariff changes. However, the consumers of condensed milk will not get it any cheaper.

CORN.

In Pennsylvania the greatest crop is corn, as in so many of our great agricultural States. In 1911 Pennsylvania had 1,435,000 acres in corn and the yield was 63,858,000 bushels. The State has steadily increased its acreage and yield of corn since 1909. And to-day it would like to and could go on to produce much more corn, as could also our other States. But the Republican duty of 15 cents per bushel has been swept away, and corn is now on the Democratic free list, and corn is being brought in in enormous quantities, principally through the Atlantic ports, from Argentina and other distant countries.

Without a comparison of the actual figures it is hard to realize what this new competition means. We have now at hand the Government statistics of imports for the first four months under the new tariff, from October 4, 1913, to the end of January of this year. During the corresponding four months one year ago the imports of corn into the United States amounted to 258,684 bushels, valued at $139,766, and yielded some revenue to the United States Treasury. During the corresponding four months one year later, the first four months under the new tariff, the imports of corn amounted to the enormous total of 7,004,159 bushels, valued at $4,656,216, and yielded no revenue whatever to the United States Treasury, but entered without toll into the American market.

The farmers of Pennsylvania, into which a great deal of this corn has gone, will realize before long what this new competition means. And they will understand the extent of it when they consider that this importation during only one-third of a year is about 11 per cent of the entire production of corn in the great State of Pennsylvania throughout an entire year. If these imports continue at the present rate throughout the year, they will amount to about a third of the entire production of Pennsylvania in that period.

Of course, with an agricultural product, it can not be predicted with certainty that the imports of one period of four months will continue at the same rate throughout the whole year. There are certain seasons for crops, and crop conditions vary. And yet, as corn can come into our markets free of any

duty from all countries where corn can be grown, and as additional arrangements for new and greater importations will naturally be made with every passing month, it is not improbable, since far greater importations are indicated by the statistics now at hand, that the imports of corn for the year 1914 will exceed the average annual corn crop of Pennsylvania.

It is reported that the recently harvested corn crop of Argentina will be much greater than any crop heretofore produced in that country. As the greater part of the Argentine crop is exported, it is practically certain that much larger quantities of Argentine corn will come to the United States in the near future, and that the free access to our markets will encourage a still larger production in Argentina next year. And now it is reported that Russia will make a Government monopoly of the sale and export of grain produced in that country and develop by special efforts the greatest possible amount of exports. The free access to our markets invites and encourages this great foreign development as well as the one in South America, and all this must be at the expense of our own agricultural development.

OATS.

Oats constitute a great crop in Pennsylvania. In 1911, 31,720,000 bushels were produced from 1,212,000 acres, an average yield per acre of 28½ bushels. This crop was a substantial increase over the yield as reported by the census for the year 1909. Under the Republican tariff the duty on oats was 15 cents per bushel. The Democratic tariff, now in effect, has cut down this rate to only 6 cents per bushel, a reduction of 60 per cent. With the Republican tariff in effect, the imports during the four months from October, 1912, to January, 1913, both inclusive, were 23,580 bushels, valued at $11,679. With the Democratic tariff in effect, the imports of the corresponding four months one year later, from October, 1913, to January, 1914, both inclusive, the first four months under the new tariff, amounted to the interesting total of 16,194,145 bushels, valued at $5,628,405.

Here is as much as one-half of the annual production of Pennsylvania, as much as is obtained by the hard work of Pennsylvania farmers from 568,215 acres, coming in from all over the world. The statistics show that the imports in October, 1913, the first month under the new tariff, do not indicate the full effect of the tariff, for the imports in the following month, November, were twice as much as in October, and were greater in December than in November. The average monthly importations during November, December, and January amounted to 4,556,450 bushels. At this rate throughout the year the yearly importations would amount to 54,577,400 bushels, or about one and two-thirds times the annual output of Pennsylvania.

POTATOES.

The Republican rate of duty on potatoes was 25 cents per bushel. The Democratic rate is only 10 per cent ad valorem, or no duty if imported from countries which impose no duty on potatoes from the United States. The situation in this matter is something like that with wheat—we have not yet begun to experience the full effect of what is practically a free-trade tariff. However, we are now experiencing a great deal of the effect. Under the first four months of the new tariff potatoes came in free of duty to the amount of 2,183,187 bushels. During the same period potatoes dutiable at 10 per cent came in to the amount of 1,078,508 bushels. The total of these imports is 3,261,695 bushels, valued at $1,478,819. What this means can be realized when it is remembered that in the corresponding four months one year before, under the Republican tariff, the imports were 79,500 bushels, valued at $84,641. The increase in the short period, with the full power of the new tariff not exercised, amounts to 3,182,195 bushels, valued at $1,394,178.

HAY.

The duty on hay was cut from $4 to $2 per ton. In the first four months under the low rate 64,633 tons were imported. This is an increase of 10,410 tons over the imports of the corresponding four months one year before. If the comparison is made with reference to the last three months for which statistics are available, the increase is greater.

CATTLE.

Under the Republican tariff the duty on cattle was 27½ per cent ad valorem when valued at more than $14 per head and $3.75 per head on those valued at not more than $14. This specific duty was equivalent to about 27½ per cent on the imports of 1912. The Democratic tariff has made all cattle free of duty. The imports have more than trebled. Under the Republican rate 136,087 head of cattle came in during the four months from October 1, 1912, to January 31, 1913. In the corresponding period one year later, the first four months under the Democratic tariff, 431,921 head of cattle came in. The increased imports are very largely from Mexico, notwithstanding the disturbed conditions in that country. When order is restored there, the Mexican exports of cattle to the United States must increase greatly beyond these recent numbers.

SHEEP.

Sheep are also free of duty under the Democratic tariff. The Republican rate was 75 cents per head if less than 1 year old and $1.50 per head if more than 1 year old. These specific duties averaged from 14 to nearly 19 per cent ad valorem in 1912. Under free trade in sheep, during the first four months of this policy, 124,588 head of sheep came in, valued at $276,231, the average import value being $2.22 per head. During the corresponding four months one year before, under the Republican rates, the imports were 9,430 head, valued at $50,821, the average import value being $5.39 per head.

MEATS.

Fresh meats are now on the free list under the Democratic tariff. Imports have increased greatly. For the first four months under the new tariff there have been imported 44,764,396 pounds of beef and veal, 1,055,470 pounds of mutton and lamb, and 401,014 pounds of pork, a total of 46,220,880 pounds of fresh meats, valued at $3,754,023. The imports of such meats under the Republican tariff were included in the group called "all other meat products" prior to July 1, 1913, and hence an exact comparison of these recent importations with those of the corresponding period of one year ago can not be made. But as all the imports during this period of one year ago of all the articles in the group called "all other meat products" amounted to only $536,804 and the recent imports of fresh meats alone amounted to seven times this amount, the enormous increase in the imports of meats is clearly shown in the statistics.

EGGS.

The statistics also indicate the great quantities in which new imports of eggs are coming in, although under the classification of import statistics an exact comparison of the first four months under the new tariff with the corresponding four months one year ago can not be made, as eggs were then included with other articles. During the first four months under the new tariff 2,885,561 dozen eggs were imported. The large importations did not begin to come in until last December. The statistics indicate importations of about 12,000,000 dozen eggs during a year. During the fiscal year 1912, under the Republican tariff, 1,098,702 dozen eggs were imported. The Republican rate of duty was 5 cents per dozen. The Democratic tariff has eggs on the free list.

BUCKWHEAT.

Buckwheat is an important crop in Pennsylvania, which in 1911 had a larger acreage in this crop than any other State and raised 6,373,000 bushels, or 36.31 per cent of all the buckwheat raised in the United States. Under the Republican tariff the duty on buckwheat was 15 cents per bushel of 48 pounds, and the duty on buckwheat flour was 25 per cent ad valorem. Under the Democratic tariff both buckwheat and buckwheat flour are on the free list. The imports of buckwheat are not separately reported in the Government statistics, but it is well known that large quantities have been coming in during the past few months, almost all of which are imported directly by the millers and used instead of American buckwheat.

SECTIONAL DISCRIMINATION.

The Democratic administration did not apply its policy of free trade in agricultural products to the whole country without favoritism. The southern farmers were not treated as harshly as were the northern farmers. The northern farmers must have corn, buckwheat, and other grains on the free list, but the southern farmers were granted a protective duty on rice. The northern farmers must contemplate potatoes on the free list, but the farmers of Virginia, North Carolina, and other Southern States enjoy a protective duty on peanuts.

Fruit such as is produced by the northern farmers is subject only to a very low rate of duty, but the lemons and oranges of Florida have a protective duty. The wool produced in Northern States is on the free list, while the Angora goat hair produced in Texas enjoys a protective tariff. These discriminations in favor of southern farmers are a practical admission of the truth that protective duties develop agricultural production and prosperity.

THE IMPORTANCE OF THE REPUBLICAN POLICY FOR AGRICULTURE.

In striking contrast with the mistaken policy toward agriculture exhibited in the present tariff, the Republican policy has been and is to bring to bear the influences that make for a great increase in our own production and subsequent prepara-

tion of foodstuffs. This is the really constructive policy which is of genuine service to all our people. It is of advantage not only to Pennsylvania, but to all the States. And it is the only policy that will give us a permanent benefit.

It is not generally realized that we have enormous areas of undeveloped lands in our own country. In fact, the development of domestic agriculture has only fairly begun in a number of the Western States. In North Dakota only about one-fourth of the land is under cultivation. In the eastern part of Montana lies a great agricultural territory which has hardly begun to be cultivated. Those who have made a careful study of our agricultural possibilities demonstrate that we can raise in the United States all the food needed to supply eight times the present population. In Pennsylvania, although a State of great agricultural development, there is a great deal of productive land unused or insufficiently used.

The great force and, in fact, the only force that will lead to the development of these resources is sufficient inducement to farmers to incur the risk and labor incident to cultivating them. This inducement must be an adequate return for the labor and risk. Take the country through and through and it must be admitted that comparatively few farmers receive as yet an adequate return for their unremitting toil and constant investment. By giving to the American farmers a reasonable advantage in the American market, to which they are by their citizenship entitled, we will supply the needed inducement for them to extend their enterprise and best efforts to the more thorough cultivation of farms now in use and to the cultivation of land that is now idle and unproductive. Another evidence of the error of the Democratic policy and of the value of the Republican policy is to be found in a report recently issued by the committee on statistics and standards of the Chamber of Commerce of the United States. This report is thoroughly scientific and disinterested. It shows that there is no foundation for any apprehension that our population increases faster than our domestic food supply can and should increase.

This chamber of commerce is a nonpartisan association made up of chambers of commerce and boards of trade throughout the country. It has nothing to do with politics and makes its investigations and reports according to the actual facts ascertained in a businesslike and thorough way, and its reports are for the information and guidance of all men. The report of this body on the food supply shows a great increase in the domestic output of agricultural products, much beyond the increase of population and its requirements, and goes on to say:

> It is entirely within the possibility of modern scientific farming, economically and profitably, to increase the yields of most food crops in a very large measure at comparatively small expense. In some cases the possibility of increase, under these conditions, of certain products runs as high as 100 per cent and more. An instance in point is that of the production on 10 acres, by a boy in South Carolina, of 228 bushels of corn per acre, as against an average of 28 bushels all over the United States. The innumerable instances of what can be done in this direction and the steadily broadening work of the Federal Department of Agriculture and the State agricultural colleges throughout the country give assurance that we may expect a steady increase in production per acre in the coming years. If, therefore, we survey the field in sober thought rather than the Cassandra-like spirit of prophecy, the outlook seems to be for a greater variety, increasing abundance, and a more reasonable price of food for the people.

On the other hand, to keep our doors thrown open to the free entry of the agricultural production of the world is to subject our farmers, our own fellow citizens, to the competition of the cheapest labor in the world and to hold back from our people the normal incentive to fully develop their own lands while adding to such incentive for foreign peoples. There are enormous areas of undeveloped lands in the newer countries of the world, in South America and Australia, and also in Siberia and other parts of Asia, in Russia, and in many parts of Africa. Throughout the world there is a rapid increase in the production of food products in excess of the increase in the world's population. Hence the level of prices of such products must be low and may go much lower. Improved processes of packing and transportation bring to our doors the competition of these products in a way that is very threatening for our own producers. And with these importations sanitary inspection can not be as thorough as with the home-grown article, and our farmers are at a disadvantage in this matter as well as in the matter of price.

THE REPUBLICAN POLICY THE ONLY ONE THAT WILL HELP CONSUMERS AND PRODUCERS.

The flood of importations of foreign products can accomplish nothing toward the solution of this problem, but has the effect of discouraging our own farmers, diminishing their output, and withdrawing from them the practical and necessary inducement to find and establish the proper method of distribution. And under this discouragement and in the lack of an effective marketing system the younger people will continue to leave the farms and enter the cities, there to enter into the intense competition for employment and to add to the wage troubles and unemployment that are so heartbreaking to the workers of the cities.

Only that which helps the producers can help the consumers. If we really want to reduce the cost of living, we must turn away from the destructive policy of the Democratic Party. We must repeal the present tariff and establish one that will fairly recognize the American farmer and the American laborer. The American farmer is entitled to especial consideration in our tariff. His industry is the basis of our life and prosperity. He should be the last to be deprived of protection. He should receive constant and liberal encouragement, not by words alone but by the positive effect of the economic situation, to raise more and better crops, to adopt the successful methods of more intense and more diversified farming, to install machinery wherever possible, to study and experiment for better marketing, and to supply his home and environment with more conveniences and attractions for himself and his family.

Everything of this sort will amply repay the American people. The protection and encouragement of the farmer will be the real relief and welfare of all the people of the cities. It will, in fact, be the salvation of the cities and the Nation from evils of socialistic ideas and perils of revolutionary discontent, which, if allowed to run on, will threaten the very existence of the Republic. Only upon the foundation of the large and lasting welfare of the American farmer can the strength of the Nation continue. The great and powerful interests in the cities—the merchants, the manufacturers, the bankers, and all who have prospered greatly—owe it to their country, as well as to themselves, to devote their best thought and attention, even to the point of sacrifice if it were necessary, to secure for the American farmers every encouragement for their best efforts and a generous prosperity for them and theirs.

DIPLOMATIC HISTORY OF THE PANAMA CANAL (S. DOC. NO. 474).

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, which was read:

To the Senate of the United States:

In response to the resolution of the Senate of the 29th ultimo, calling for certain correspondence relating to the so-called tripartite convention concluded in 1909 between the United States, Colombia, and Panama, and for correspondence not heretofore communicated relating to the "Hay-Concha protocol," I transmit herewith a report of the Secretary of State containing the correspondence called for.

WOODROW WILSON.

THE WHITE HOUSE, *May 7, 1914.*

Mr. HITCHCOCK. I ask that the message of the President and accompanying papers be printed with Senate Document No. 474 and that they be referred to the Committee on Foreign Relations.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

MEMORIAL EXERCISES, BROOKLYN NAVY YARD.

The VICE PRESIDENT laid before the Senate the following concurrent resolution (No. 39) of the House of Representatives, which was read and referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

> *Resolved by the House of Representatives (the Senate concurring).* That for the representation of the Congress at the exercises to be held at the navy yard in Brooklyn, N. Y., on Monday, May 11, 1914, in honor of the men of the Navy and Marine Corps who lost their lives at Vera Cruz, Mexico, there shall be appointed by the Vice President 7 Members of the United States Senate and by the Speaker 21 Members of the House of Representatives.
>
> SEC. 2. That the expenses of the committee shall be defrayed in equal parts from the contingent appropriations of the Senate and House of Representatives.

PANAMA CANAL TOLLS.

Mr. O'GORMAN. I ask that the Panama Canal bill be laid before the Senate.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 14385) to amend section 5 of an act to provide for the opening, maintenance, protection, and operation of the Panama Canal and the sanitation of the Canal Zone, approved August 24, 1912.

Mr. O'GORMAN. Mr. President, on the 7th day of August, 1912, by a vote of 44 to 11, the Senate declared that vessels engaged in the coastwise trade shall be exempted from the payment of tolls passing through the canal. I ask that the Secretary read the record of that vote.

The VICE PRESIDENT. Without objection, the Secretary will read as requested.

The Secretary read as follows:

In favor of exemption—

Ashurst	Cummins	Martine, N. J.	Simmons
Bacon	Dillingham	Massey	Smith, Ariz.
Borah	Fletcher	Newlands	Smith, Ga.
Bourne	Gallinger	O'Gorman	Smith, S. C.
Bristow	Johnson, Me.	Overman	Smoot
Bryan	Johnston, Ala.	Page	Stone
Burnham	Jones	Perkins	Swanson
Catron	Kenyon	Pomerene	Thornton
Chamberlain	Kern	Reed	Townsend
Clapp	La Follette	Sanders	Williams
Crawford	Martin, Va.	Shively	Works

Opposed to exemption—

Brandegee	Fall	Nelson	Root
Burton	Gronna	Oliver	Wetmore
Crane	Lodge	Penrose	

Mr. O'GORMAN. A bill is now pending before us to repeal the coastwise exemption, but the advocates of the bill do not seem to be in accord as to the reasons why Congress should reverse itself. Some of those who support the repeal are opposed to the exemption on economic grounds; others recognize its economic advantages but believe that the Panama Canal act violates the Hay-Pauncefote treaty. Others approve the existing law, and while insisting that it does not contravene the provisions of the Hay-Pauncefote treaty, nevertheless favor the repeal because the Executive has requested that this action be taken.

The question is an important one and its wise solution will tax the intelligence and patriotism, perhaps the courage and independence, of every Senator. Our action on the pending measure may mark an epoch in the history of the Republic; its influence may be felt by our posterity. Whether we shall deserve their censure or gratitude will depend upon the manner in which we shall meet the responsibility which now confronts us. If we perform our duty as become Senators of the United States and vote according to our judgment and convictions, I believe that no Senator now or hereafter will have to reproach himself with having abandoned his country when her honor and security called for his defense.

The bill comes from the committee without recommendation, a motion to report it favorably having been defeated by a vote of 5 to 9.

Mr. President, I intend to consider briefly the legal, economic, and political aspects of this question. In my judgment, the British claim has neither law nor justice to sustain it. I hope to be able to establish: First, that the exemption of the coastwise vessels constitutes a wise, economic policy, and is not affected by the Hay-Pauncefote treaty; second, that if coastwise vessels fall within the terms of the treaty, the exemption does not constitute a violation thereof; third, that the canal has been constructed on territory over which the United States exercises the power of sovereignty, while the canal contemplated by the treaty was to be built on alien soil and, therefore, the Hay-Pauncefote treaty is wholly inapplicable.

I shall not at this time attempt to trace the history of the numerous efforts made from time to time during the past century to construct an interoceanic canal. It will be remembered that in 1903 the Republic of Panama ceded to the United States in perpetuity a tract of territory 10 miles wide extending for 40 miles from the Atlantic to the Pacific Ocean. The Supreme Court of the United States, in Wilson against Shaw (204 U. S., 33), decided that the sovereignty of the United States over this tract, known as the Canal Zone, is the same as over any other part of the United States, and that was the specific concession made by the British Government in its second note of protest. It is part of our country. It is territory of the United States and constitutes part of our coast line. Unaided and alone, the United States built the canal through this zone and thus connected the two oceans. In the prosecution of this vast undertaking the United States has expended over $400,000,000. Its construction by American enterprise on American soil at the expense of the American people is the greatest engineering achievement of this or any other age. Unselfishly we offer its advantages to all the nations of the world. It is estimated that it will cost the United States not less than $5,000,000 annually for the maintenance and operation of the canal, and upward of $10,000,000 annually for its military defense, which, together with $12,000,000 annual interest upon the original investment, will make an annual charge of $27,000,000.

In our legislation two years ago Congress provided that the tolls should not exceed $1.25 per ton, with lower rates for ships in ballast, and it has been estimated that for some years 10,000,000 tons will annually pass through the canal at an average of $1 a ton, or $10,000,000 annually. The canal will not, therefore, be self-sustaining, and the United States, the owner of the canal, will for a long period be required to suffer an annual loss of upward of $17,000,000, which will be borne alone by the taxpayers of this country. In limiting the toll rate at $1.25 per ton, and in fixing the specific rate at $1.20 under the presidential proclamation, pursuant to the statute, Congress was required to meet the competition of the Suez Canal, now controlled by Great Britain, the toll rates for that canal at the present time being $1.20 per ton. It was not possible, therefore, to fix a toll rate on a basis of securing a reasonable return upon the cost of construction and maintenance.

In the legislation referred to Congress did not discriminate between American and foreign vessels engaged in over-seas trade. American vessels engaged in foreign trade are required to pay the same tolls that are paid by foreign vessels. Congress, however, did provide that American coastwise vessels shall be exempt from the payment of tolls.

The right to make this exemption has been challenged by the British Government, and the claim has been made that the exemption constitutes a violation of the Hay-Pauncefote treaty. There will be a subsequent reference to the details of this treaty. For the present it is sufficient to state that it is urged on behalf of Great Britain that under its terms vessels of all nations, including American "vessels of commerce and of war," are to be treated alike with respect to toll charges.

If we assume that this interpretation of the Hay-Pauncefote treaty is the correct one, it would nevertheless follow that the exemption of coastwise vessels can not constitute a violation of any of its provisions. Under international law the word "vessels" when used in a treaty, unless the contrary meaning is clearly apparent, refers only to vessels engaged in international or over-seas trade. It does not relate to vessels engaged in local or domestic trade. The words "vessels of a nation" have received among commercial countries their own interpretation by long custom and acquiescence, and are accepted as embracing only such vessels as ply between one foreign country and another, so that in the negotiation of treaties the contracting parties never have in contemplation coastwise vessels of either country. This principle is not only sanctioned by the usages of Great Britain and the United States, but has been distinctly recognized by the Supreme Court of the United States.

In the treaty of commerce and navigation which was concluded with Great Britain on July 3, 1815, six months after the treaty of Ghent, it is provided on behalf of Great Britain that—

> No higher or other duties or charges shall be imposed in any ports of Great Britain on vessels of the United States than those payable in the same ports by vessels of Great Britain.

Notwithstanding this provision as to equality in the treatment of ships, Great Britain for upward of 40 years after the adoption of the treaty of 1815 openly discriminated in favor of her coastwise shipping. Great Britain changed her policy under the treaty of 1815 only in recent years, when she opened her coastwise trade to the vessels of other nations.

The propriety of Great Britain's preferential treatment of her coastwise shipping under the treaty was never questioned. We pursued the same course regarding our coastwise shipping, and our right to do so was expressly affirmed by the decision of the Supreme Court of the United States in the case of Olsen against Smith (195 U. S., 332). In that case, the owner of a British vessel entering the port of Galveston protested against the payment of pilotage charges on the ground that American coastwise vessels being exempt from such charges, British vessels should also be exempt, and invoked the treaty of 1815, which provided on behalf of the United States that "no higher or other duties or charges shall be imposed in any ports of the United States on British vessels than those payable in the same ports by vessels of the United States." This case reached our Supreme Court, which decided against the contention that the discrimination complained of constituted a violation of the treaty, and the court in an opinion by Chief Justice White said:

> Nor is there merit in the contention that as the vessel in question was a British vessel coming from a foreign port, the State laws concerning pilotage are in conflict with the treaty between Great Britain and the United States, providing that "no higher or other duties or charges shall be imposed in any ports of the United States on British vessels than those payable in the same ports by vessels of the United States." Neither the exemption of coastwise steam vessels from pilotage resulting from the law of the United States nor any lawful exemption of coastwise vessels created by the State law concerns vessels in the foreign trade and therefore any such exemptions do not operate to produce a discrimination against British vessels engaged in foreign trade and in favor of vessels of the United States in such trade. In substance, the proposition but asserts that because by the law of the United States steam vessels in the coastwise trade have been exempt from pilotage regulations, therefore there is no power to subject vessels in foreign trade to pilotage regulations, even although such regulations apply, without discrimination, to all vessels engaged in such foreign trade whether domestic or foreign.

Great Britain's uniform practice under the treaty of 1815 and her acquiescence in the interpretation placed upon that treaty by the Supreme Court of the United States establish her understanding as well as ours, that when the words "vessels

of commerce and of war" were used in the latter treaty they were not intended to embrace vessels engaged in coastwise trade. The contention that coastwise vessels do not fall within the contemplation of treaty obligations finds further support in the British note of July 8, 1912, which contains the first objection made by Great Britain and which seems to have been induced by the fear that all American vessels, including those engaged in foreign trade, were to be exempt from the payment of tolls in the canal. In that note, after pointing out objections to the exemption of all American vessels, the British Government stated:

> If the trade should be so regulated as to make it certain that only bona fide coastwise traffic, which is reserved for the United States vessels, would be benefited by this exemption, it may be that no objection could be taken.

It alluded to the possible difficulty of confining such vessels to strictly coastwise trade, but it distinctly recognized the principle for which the American Government contended, and this concession has never been withdrawn by the British Government. Only American vessels are engaged in American coastwise trade, and the provisions of the Panama Canal act make it clear that the exemption is to be restricted to vessels engaged in that trade, and that there will be no difficulty in confining the exemption to vessels devoting themselves exclusively to the coastwise trade was made clear by abundant and satisfactory evidence given before the committee in its recent hearings, and notably by the evidence of Mr. Chamberlain, the Commissioner of Navigation, who said, in substance, that there would be no difficulty in so administering the law that the ships in the coastwise trade would be confined strictly to the coastwise trade and therefore come within the recognition contained in the British note of July 8, 1912.

As foreign vessels are not permitted to compete with American vessels in this trade, it can not be claimed that the exemption of coastwise traffic works a discrimination against foreign ships. As held in Olsen against Smith, supra, the exemption of coastwise vessels does not concern vessels in the over-seas trade and therefore can work no discrimination against British vessels engaged in the foreign trade. There can be no discrimination where there is no competition. Moreover, the phrase "vessels of commerce" is not applicable, for another reason, to vessels that ply between domestic ports. There is a manifest distinction between vessels of commerce and "coastwise trade." Wharton's Law Dictionary, a British authority, defines commerce as:

> The intercourse of nations in each other's produce and manufactures in which the superfluities of one are given for those of another and are the reexchange with other nations for mutual wants. There is a distinction between commerce and trade. The former relates to our dealings with foreign nations, colonies, etc.; the latter to mutual dealings at home.

Now I am quoting from British authority which marks the distinction between commerce and trade and the consequent distinction between vessels of commerce and vessels in trade, one being international and the other being purely local.

In the Encyclopædia Britannica and the International Encyclopedia commerce is defined as—

> Commerce. In its general acceptance a term denoting international traffic in goods or what constitutes the foreign trade of all countries as distinguished from domestic trade.

A "vessel of commerce" is therefore a vessel engaged in international trade. The treaty speaks of "vessels of commerce and of war." The two classes of vessels referred to would necessarily exclude vessels that are neither vessels of commerce nor vessels of war. And for the reasons indicated the treaty excludes vessels engaged in the coastwise or domestic trade. They are not vessels of commerce within the authorities cited.

It follows, therefore, that the criticism of Congress for exempting coastwise vessels is not well founded, and that the law as enacted is supported by reason and precedent. The justice of our position is recognized by that portion of the English public that is not blinded by prejudice and cupidity. The Guardian, an influential newspaper published at Manchester, England, expressed itself as follows:

> The amendment limiting the exemption from tolls to coastwise traffic is important for this reason: By the American navigation laws (as by all navigation laws) coastwise traffic is reserved to American registered ships. As none but American ships can make a voyage, say, between San Francisco and New York, there can be no question of discrimination against other ships. This coastwise traffic was an American monopoly before the Hay-Pauncefote treaty, and a monopoly it remains, for no one has alleged that the treaty suspends the navigation laws—

That claim has not been made yet, but grant this concession and the time is not far distant when you will have to consider it in this body—

> As America retains the monopoly, we fail to see how any question of discrimination can arise against a second party who does not exist, so far as coastwise traffic is concerned. The real grievance against the bill in its amended form is not against its morality, but something much narrower. It may with fairness be said that the American definition of coastwise traffic is so wide that it includes practically all American shipping. An American vessel may leave San Francisco, touch at Hawaii in the Pacific, double Cape Horn, call at Porto Rico, and finally discharge its cargo at New York without ever losing its coasting character. Our foreign office, when it concluded the Hay-Pauncefote treaty, should have foreseen this practical difficulty, and it could then with reason have pressed for the restriction of the American definitions of coastwise traffic to those limits which hold in European courts. There may still be a chance of so restricting the definition of coastwise traffic, and every effort should be made to use it. But if we are to hope for success we must at any rate give the United States Congress the credit for wanting to do the right thing. We must not begin to call names or stir up passion.

This is a suggestion that might be heeded by American as well as British critics of the provisions of the Panama Canal act of 1912.

Ex-President Roosevelt, in whose administration the Hay-Pauncefote treaty was adopted, justifies the exemption in the following language:

> I believe that the position of the United States is proper as regards this coastwise traffic. I think that we have the right to free bona fide coastwise traffic from tolls. I think that this does not interfere with the rights of any other nation, because no ships but our own can engage in coastwise traffic, so that there is no discrimination against other ships when we relieve the coastwise traffic from tolls. I believe that the only damage that would be done is the damage to the Canadian Pacific Railway. * * * I do not think that it sits well on the representatives of any foreign nation * * * to make any plea in reference to what we do with our own coastwise traffic, because we are benefiting the whole world by our action at Panama, and are doing this where every dollar of expense is paid by ourselves. In all history I do not believe you can find another instance where as great and expensive a work as the Panama Canal, undertaken not by a private corporation but by a nation, has ever been as generously put at the service of all the nations of mankind.

The Panama Canal bill, as it passed the House of Representatives in June, 1912, contained the exemption of coastwise vessels. The Senate Committee on Interoceanic Canals amended the bill so as to extend the exemption to American vessels engaged in over-seas trade. The protest of the British Government and the concession that the exemption of coastwise trade would be unobjectionable largely influenced the Senate in rejecting the amendment proposed by the Senate committee and confining the exemption to the coastwise trade as provided in the House bill. In view of the concession of the British Government it may well excite surprise that this question still remains the subject of controversy. Having conceded that objection does not lie against the coastwise trade exemption, it is difficult to find a reason for the continued agitation of the subject or for the unfounded assertion so frequently made that the exemption constitutes a violation of the treaty. I think these considerations to which I have asked your attention clearly establish that coastwise vessels do not come within the contemplation of the treaty, and that this was conceded by Great Britain. This disposes of my first contention.

Now, let me direct the attention of the Senate to my second proposition, namely, that there is no violation of the treaty even if it be held to apply to our coastwise shipping. In other words, I contend that the treaty imposes no restraint on the United States respecting the regulation of American shipping in its use of the canal.

On December 12, 1846, the United States made a treaty with the Republic of Colombia, then New Granada, under which the United States acquired a right to construct a canal or railway at Panama. Three years later, in 1849, the United States entered into negotiations with Nicaragua for the construction of a canal across Nicaragua. Great Britain, however, sought to control the American Isthmus, as she had already secured control of both ends of the proposed Suez Canal. She had been seizing territory on one pretext or another along the coast, and assumed a protectorate over a tribe of Indians known as the Mosquito Indians, who dwelt on the eastern coast of Nicaragua. It has never been seriously claimed that Great Britain had any title to this land. It was Spanish territory down to the time of the establishment of the Republic of Nicaragua, and thereafter was part of the soil of Nicaragua.

We had concluded our Mexican War and appealing to our supposed necessities, Great Britain insisted upon participating in the control of any canal that might be built at that point. Under the Monroe doctrine it was not necessary for the United States to ask the consent of any foreign power to carry on such an undertaking. As I have said, we had already secured canal rights in the Republic of Colombia without the consent of Great Britain, but the unwarranted intervention of Great Britain nevertheless resulted in the Clayton-Bulwer treaty of 1850, which marks one of the most dismal pages of our diplomatic relations.

At this point I ask leave to insert in my remarks the Clayton-Bulwer treaty, which I shall not read.

The PRESIDING OFFICER (Mr. HITCHCOCK in the chair). Without objection, permission to do so is granted.

The treaty referred to is as follows:

CLAYTON-BULWER TREATY OF APRIL 19, 1850.

The United States of America and Her Britannic Majesty, being desirous of consolidating the relations of amity which so happily subsist between them, by setting forth and fixing in a convention their views and intentions with reference to any means of communication by ship canal which may be constructed between the Atlantic and Pacific Oceans by the way of the river San Juan de Nicaragua and either or both of the lakes of Nicaragua or Managua, to any port or place on the Pacific Ocean, the President of the United States has conferred full powers on John M. Clayton, Secretary of State of the United States, and Her Britannic Majesty on the Right Honorable Sir Henry Lytton Bulwer, a member of Her Majesty's most honorable privy council, knight commander of the most honorable Order of the Bath, and envoy extraordinary and minister plenipotentiary of Her Britannic Majesty to the United States, for the aforesaid purpose; and the said plenipotentiaries having exchanged their full powers, which were found to be in proper form, have agreed to the following articles:

ARTICLE I.

The Governments of the United States and Great Britain hereby declare that neither the one nor the other will ever obtain or maintain for itself any exclusive control over the said ship canal; agreeing that neither will ever erect or maintain any fortifications commanding the same or in the vicinity thereof, or occupy, or fortify, or colonize, or assume, or exercise any dominion over Nicaragua, Costa Rica, the Mosquito coast, or any part of Central America; nor will either make use of any protection which either affords or may afford, or any alliance which either has or may have to or with any State or people, for the purpose of erecting or maintaining any such fortifications, or of occupying, fortifying, or colonizing Nicaragua, Costa Rica, the Mosquito coast, or any part of Central America, or of assuming or exercising dominion over the same; nor will the United States or Great Britain take advantage of any intimacy, or use any alliance, connection, or influence that either may possess with any State or Government through whose territory the said canal may pass, for the purpose of acquiring or holding, directly or indirectly, for the citizens or subjects of the one, any rights or advantages in regard to commerce or navigation through the said canal which shall not be offered on the same terms to the citizens or subjects of the other.

ARTICLE II.

Vessels of the United States or Great Britain traversing the said canal shall, in case of war between the contracting parties, be exempted from blockade, detention, or capture by either of the belligerents; and this provision shall extend to such a distance from the two ends of the said canal as may hereafter be found expedient to establish.

ARTICLE III.

In order to secure the construction of the said canal, the contracting parties engage that if any such canal shall be undertaken upon fair and equitable terms by any parties having the authority of the local Government or Governments through whose territory the same may pass, then the persons employed in making the said canal, and their property used, or to be used, for that object, shall be protected, from the commencement of the said canal to its completion, by the Governments of the United States and Great Britain, from unjust detention, confiscation, seizure, or any violence whatsoever.

ARTICLE IV.

The contracting parties will use whatever influence they respectively exercise with any State, States, or Governments possessing or claiming to possess any jurisdiction or right over the territory which the said canal shall traverse, or which shall be near the waters applicable thereto, in order to induce such States or Governments to facilitate the construction of the said canal by every means in their power. And, furthermore, the United States and Great Britain agree to use their good offices, wherever or however it may be most expedient, in order to procure the establishment of two free ports, one at each end of the said canal.

ARTICLE V.

The contracting parties further engage, that when the said canal shall have been completed, they will protect it from interruption, seizure, or unjust confiscation, and that they will guarantee the neutrality thereof, so that the said canal may forever be open and free, and the capital invested therein secure. Nevertheless, the Governments of the United States and Great Britain, in according their protection to the construction of the said canal, and guaranteeing its neutrality and security when completed, always understand that this protection and guarantee are granted conditionally, and may be withdrawn by both Governments, or either Government, if both Governments, or either Government, should deem that the persons or company undertaking or managing the same adopt or establish such regulations concerning the traffic thereupon as are contrary to the spirit and intention of this convention, either by making unfair discriminations in favor of the commerce of one of the contracting parties over the commerce of the other, or by imposing oppressive exactions or unreasonable tolls upon the passengers, vessels, goods, wares, merchandise, or other articles. Neither party, however, shall withdraw the aforesaid protection and guarantee without first giving six months' notice to the other.

ARTICLE VI.

The contracting parties in this convention engage to invite every State with which both or either have friendly intercourse to enter into stipulations with them similar to those which they have entered into with each other, to the end that all other States may share in the honor and advantage of having contributed to a work of such general interest and importance as the canal herein contemplated. And the contracting parties likewise agree that each shall enter into treaty stipulations with such of the Central American States as they may deem advisable, for the purpose of more effectually carrying out the great design of this convention, namely, that of constructing and maintaining the said canal as a ship communication between the two oceans for the benefit of mankind, on equal terms to all, and of protecting the same; and they also agree, that the good offices of either shall be employed, when requested by the other, in aiding and assisting the negotiation of such treaty stipulations; and should any differences arise as to right or property over the territory through which the said canal shall pass between the States or Governments of Central America, and such differences should in any way impede or obstruct the execution of the said canal, the Governments of the United States and Great Britain will use their good offices to settle such differences in the manner best suited to promote the interests of the said canal, and to strengthen the bonds of friendship and alliance which exist between the contracting parties.

ARTICLE VII.

It being desirable that no time should be unnecessarily lost in commencing and constructing the said canal, the Governments of the United States and Great Britain determine to give their support and encouragement to such persons or company as may first offer to commence the same, with the necessary capital, the consent of the local authorities, and on such principles as accord with the spirit and intention of this convention; and if any persons or company should already have, with any State through which the proposed ship canal may pass, a contract for the construction of such canal as that specified in this convention, to the stipulations of which contract neither of the contracting parties in this convention have any just cause to object, and the said persons or company shall moreover have made preparations, and expended time, money, and trouble, on the faith of such contract, it is hereby agreed that such persons or company shall have a priority of claim over every other person, persons, or company to the protection of the Governments of the United States and Great Britain, and be allowed a year from the date of the exchange of the ratifications of this convention for concluding their arrangements, and presenting evidence of sufficient capital subscribed to accomplish the contemplated undertaking; it being understood that if, at the expiration of the aforesaid period, such persons or company be not able to commence and carry out the proposed enterprise, then the Governments of the United States and Great Britain shall be free to afford their protection to any other persons or company that shall be prepared to commence and proceed with the construction of the canal in question.

ARTICLE VIII.

The Governments of the United States and Great Britain having not only desired, in entering into this convention, to accomplish a particular object, but also to establish a general principle, they hereby agree to extend their protection, by treaty stipulations, to any other practicable communications, whether by canal or railway, across the isthmus which connects North and South America, and especially to the interoceanic communications, should the same prove to be practicable, whether by canal or railway, which are now proposed to be established by the way of Tehuantepec or Panama. In granting, however, their joint protection to any such canals or railways as are by this article specified, it is always understood by the United States and Great Britain that the parties constructing or owning the same shall impose no other charges or conditions of traffic thereupon than the aforesaid Governments shall approve of as just and equitable; and that the same canals or railways, being open to the citizens and subjects of the United States and Great Britain on equal terms, shall also be open on like terms to the citizens and subjects of every other State which is willing to grant thereto such protection as the United States and Great Britain engage to afford.

ARTICLE IX.

The ratifications of this convention shall be exchanged at Washington within six months from this day, or sooner if possible.

In faith whereof we, the respective plenipotentiaries, have signed this convention and have hereunto affixed our seals.

Done at Washington the nineteenth day of April, anno Domini one thousand eight hundred and fifty.

JOHN M. CLAYTON. [L. S.]
HENRY LYTTON BULWER. [L. S.]

Mr. O'GORMAN. Mr. President, a careful reading of this instrument discloses a design on the part of Great Britain to prevent the United States from building, or acquiring control over, an interoceanic canal until it suited the purpose or convenience of the British Government. Under the provisions of the treaty neither the United States nor Great Britain could acquire the exclusive control over the canal, and neither Government was to erect or maintain any fortifications commanding the same, or occupy, fortify, or colonize, or assume any dominion over Nicaragua, Costa Rica, the Mosquito Coast, or any part of Central America. These were the only self-denying clauses of the treaty. Neither country undertook to build the canal, but they agreed that in the event of a canal being constructed they would offer it their protection, provided the owner of the canal established reasonable and equitable rates. The self-denying clause of this treaty never embraced Panama; it never embraced Colombia; it never embraced New Granada; and did not affect the rights which the United States secured under the treaty of 1846 to build a canal or railway at that point. While there may be a popular impression that Central America embraces Colombia or Panama, that impression is an erroneous one. That Central America embraces that part of this continent which lies between Mexico and Colombia before the revolution in Panama, and that it did not embrace Panama or Colombia, is made clear by some correspondence to which I shall call your attention.

It will be noted that the self-denying clauses of the treaty were confined in their operation to Central America, and, as stated by Mr. Clayton in his note of July, 1850, to the British ambassador—

> the expression "Central America" was intended to, and does, include all the Central American States of Guatemala, Honduras, San Salvador, Nicaragua, and Costa Rica. There had recently existed a Republic called Central America composing these identical countries.

As stated by Lord Clarendon in his note to Ambassador Buchanan, under date of May 2, 1854:

> It is generally conceded that the term "Central America"—a term of modern invention—could only appropriately apply to those States at one time united under the name of the "Central American Republic," and now existing as five separate Republics.

As I have remarked, Colombia was not one of those Republics, and the self-denying provision of the Clayton-Bulwer treaty imposed no restraint upon the United States respecting the con-

struction of a canal or a railway at Panama at any time since 1846.

I have already stated that under this treaty neither Government undertook to construct the canal. The canal was to be constructed by private persons or corporations, and when constructed, if the rates of traffic fixed by the owner were reasonable and just, in the judgment of the two Governments, they would offer the owners their joint protection. If the charges were not just and equitable, the United States and Great Britain would withhold their protection, and if such protection were tendered and accepted, it could be withdrawn by either country on giving six months' notice to the other if the owner of the canal failed to maintain reasonable rates of traffic.

It will be noticed that in article 8 of this treaty the contracting parties embodied a general stipulation whereby they agreed to extend their joint protection by future treaties to any other isthmian communication at Panama or Tehuantepec, whether by canal or railway, so long as the persons building the same charged fair and equitable rates, but not otherwise.

In this connection I should emphasize the fact that the provisions of the Clayton-Bulwer treaty were concluded really with the seventh article of that treaty, and the eighth article was a general declaration that in the future, by other treaties, agreements, and stipulations, they were prepared to extend a like protection to the builder of any canal or railway at Tehuantepec or Panama.

As I have said, a repudiation of exclusive control is confined to Central America under article 1 of the treaty provision, whereby both Governments agreed that neither would acquire exclusive control of a canal. Under the language of the treaty that self-denying provision is restricted to a canal constructed in Central America, and particularly at Nicaragua. The reference in article 8 to Tehuantepec and Panama does not extend the provisions of article 1, providing that neither Government will acquire exclusive control.

Great Britain asserted no rights in Panama. Her alleged rights under the Mosquito protectorate affected only the coast of Nicaragua, and this was the region where it was expected the canal would be constructed under the preceding provisions.

The provisions of article 8 in this treaty are executory and commit the signatories to no definite obligation capable of enforcement without further negotiations. If occasion arises, the purposes of article 8 are to be carried out in futuro by treaty stipulations. The conditions which may invite the extension of the joint protection of the two Governments under this article are that private persons will build a canal or railway and operate it on reasonable terms to be approved by the two Governments, with the further provisions that the canal or railway shall be open on equal terms to the citizens and subjects of both countries and such other nations as shall unite in the protection thereof. The protection is always conditional upon the rate charges being approved by both Governments. If either Government should disapprove the traffic rates the plan would fail, the protection would be withheld, and the provisions of article 8 would necessarily become inoperative. The same result would follow if the owner of the canal did not desire or refused to accept the protection of the two Governments.

In a note to Ambassador Lowell, under date of November 19, 1881, for communication to the British Government, Secretary Blaine said:

> The clause in which the two Governments agree to make treaty stipulations for a joint protectorate for whatever railway or canal might be constructed at Tehuantepec or Panama has never been perfected. No treaty stipulations for the proposed end have been suggested by either party, although citizens of the United States long since constructed a railway at Panama and are now engaged in the same work at Tehuantepec. It is a fair presumption, in the judgment of the President, that this provision should be regarded as obsolete by the nonaction and common consent of the two Governments.

In a note to Ambassador Lowell, under date of May 8, 1882, Secretary Frelinghuysen calls attention to the fact—

> that for 30 years the Panama Railway has been maintained without other protection than that of the United States and the local sovereign.

As I have pointed out, the entire treaty contemplates the building of a canal or railway by private persons who, in those disturbed sections, would probably need the protection of some stable government.

Articles 3, 7, and 8 refer to "the parties" and "the persons or company" constructing the canal or railway. It must be obvious that no protection would be required if either Government constructed the canal or railway at Panama, and in that event no question regarding the charges of traffic could arise. In fact, the language of article 8 could not apply to a canal or railway built by a government, and as we have seen, it was never invoked in behalf of the Panama Railway; and the United States under its treaty with New Granada in 1846 had the same right to build a canal as to build a railway at that point. Its right in that respect was never impaired until by diplomatic blunder the second Hay-Pauncefote treaty was agreed upon. In a word, both countries, under article 8, agreed to enter into further engagements looking to the joint protection of the private owners of a canal or railway that might be constructed at Panama or Tehuantepec.

The United States was influenced, in part, to enter into the Clayton-Bulwer treaty on the representation that British capital would promote the enterprise. The capital was never supplied. The construction of the canal under the treaty was never undertaken, and the treaty itself was a never-ending source of dispute and controversy. Great Britain's alleged protectorate over the Indian tribe, consisting of three or four thousand savages, was all that she yielded for the execution of this treaty, and this alleged protectorate was something she did not actually possess in her own right. The Indian tribe had no independent sovereignty, and had not asserted nor proclaimed its independence of Nicaragua. There was, therefore, no basis for the protectorate and, as stated by Mr. Bayard, when he was Secretary of State in 1888, "The English act was a mere usurpation."

Notwithstanding the stipulation of the Clayton-Bulwer treaty, that neither nation was to erect or maintain any fortification or occupy or fortify or colonize or assume any dominion over Nicaragua and the other countries named, Great Britain continued to maintain her alleged protectorate over the Mosquito Indians, and retained her occupation of the mouth of the San Juan River, and continued to enlarge her colony at Belize for more than 10 years after the adoption of the treaty. During this period the United States made repeated protests against Great Britain's violations of the treaty obligations without avail.

Finally, by a treaty made between Great Britain and Nicaragua on January 28, 1860, Great Britain agreed that her dominion in Nicaragua and her protectorate over the Mosquito Indians should expire six months after the ratification of that treaty, which did not occur until August, 1860. It will be observed that by this treaty Great Britain merely promised to do what she had undertaken to do 10 years earlier in the Clayton-Bulwer treaty. The record, therefore, establishes beyond dispute that for 10 years after 1850, Great Britain persistently violated and disregarded the provisions of the Clayton-Bulwer treaty. There were other equally flagrant violations of the treaty by Great Britain, and as no steps were taken to build the canal, the instrument in time was regarded as abandoned and obsolete. In treaties, as in other contracts, breaches by one of the contracting parties work an abrogation of the instrument at the election of the aggrieved party.

As I have remarked, nothing was done with a view to the construction of the canal contemplated by the treaty of 1850. There were repeated, persistent violations of the treaty by Great Britain, and her refusal to grant redress when objection was made by our State Department led our people in time to look upon the entire project as abandoned.

Years afterwards interest in an interoceanic canal was revived, and in 1869 President Grant sent a message to Congress recommending the construction of an isthmian canal under the sole control of the United States.

In 1877, President Hayes, in his message to Congress, declared that—

> the policy of this country is a canal under American control. The United States can not consent to the surrender of this control to any European power, and that such a canal shall be virtually part of the coast line of the United States.

President McKinley, in his second message to Congress, declared that—

> the construction of such a maritime highway is now more than ever indispensable to the intimate and ready intercommunication between our eastern and western seaboards, and our national policy now more imperatively than ever calls for this control by this Government.

Whatever had been the views of the United States in the early days regarding a divided control over an isthmian canal, this declaration of President McKinley in 1900 crystallized the sentiment of the American people at that time.

John Hay, then Secretary of State, had been ambassador to Great Britain, and notwithstanding the abandonment of the Clayton-Bulwer treaty, he urged that we enter into a new treaty, so that the old one of 1850 might be formally terminated. His negotiations resulted in the first Hay-Pauncefote treaty of 1900, which reads as follows:

> The United States of America and Her Majesty the Queen of the United Kingdom of Great Britain and Ireland, Empress of India, being desirous to facilitate the construction of a ship canal to connect the Atlantic and Pacific Oceans, and to that end to remove any objection which may arise out of the convention of April 19, 1850, commonly called the Clayton-Bulwer treaty, to the construction of such canal

under the auspices of the Government of the United States, without impairing the "general principle" of neutralization established in Article VIII of that convention, have for that purpose appointed as their plenipotentiaries:

The President of the United States, John Hay, Secretary of State of the United States of America,

And Her Majesty the Queen of Great Britain and Ireland, Empress of India, the Right Hon. Lord Pauncefote, G. C. B., G. C. M. G., Her Majesty's ambassador extraordinary and plenipotentiary to the United States;

Who, having communicated to each other their full powers, which were found to be in due and proper form, have agreed upon the following articles:

ARTICLE I.

It is agreed that the canal may be constructed under the auspices of the Government of the United States, either directly at its own cost or by gift or loan of money to individuals or corporations or through subscription to or purchase of stock or shares, and that, subject to the provisions of the present convention, the said Government shall have and enjoy all the rights incident to such construction, as well as the exclusive right of providing for the regulation and management of the canal.

ARTICLE II.

The High Contracting Parties, desiring to preserve and maintain the "general principle" of neutralization established in Article VIII of the Clayton-Bulwer Convention, *which convention is hereby superseded,* adopt, as the basis of such neutralization, the following rules, substantially as embodied in the convention between Great Britain and certain other powers, signed at Constantinople October 29, 1888, for the free navigation of the Suez Maritime Canal, that is to say:

1. The canal shall be free and open, in time of war as in time of peace, to the vessels of commerce and of war of all nations, on terms of entire equality, so that there shall be no discrimination against any nation or its citizens or subjects in respect of the conditions or charges of traffic, or otherwise.

2. The canal shall never be blockaded, nor shall any right of war be exercised nor any act of hostility be committed within it.

3. Vessels of war of a belligerent shall not revictual nor take any stores in the canal except so far as may be strictly necessary; and the transit of such vessels through the canal shall be effected with the least possible delay, in accordance with the regulations in force, and with only such intermission as may result from the necessities of the service.

Prizes shall be in all respects subject to the same rules as vessels of war of the belligerents.

4. No belligerent shall embark or disembark troops, munitions of war, or warlike materials in the canal except in case of accidental hindrance of the transit, and in such case the transit shall be resumed with all possible despatch.

5. The provisions of this article shall apply to waters adjacent to the canal, within three marine miles of either end. Vessels of war of a belligerent shall not remain in such waters longer than twenty-four hours at any one time except in case of distress, and in such case shall depart as soon as possible; but a vessel of war of one belligerent shall not depart within twenty-four hours from the departure of a vessel of war of the other belligerent.

It is agreed, however, that none of the immediately foregoing conditions and stipulations in sections numbered one, two, three, four, and five of this article shall apply to measures which the United States may find it necessary to take for securing by its own forces the defense of the United States and the maintenance of public order.

6. The plant, establishment, buildings, and all works necessary to the construction, maintenance, and operation of the canal shall be deemed to be part thereof, for the purposes of this convention, and in time of war as in time of peace shall enjoy complete immunity from attack or injury by belligerents and from acts calculated to impair their usefulness as part of the canal.

7. No fortifications shall be erected commanding the canal or the waters adjacent. The United States, however, shall be at liberty to maintain such military police along the canal as may be necessary to protect it against lawlessness and disorder.

[ARTICLE III.]

[The High Contracting Parties will, immediately upon the exchange of the ratifications of this convention, bring it to the notice of the other powers and invite them to adhere to it.]

ARTICLE IV.

The present convention shall be ratified by the President of the United States, by and with the advice and consent of the Senate thereof, and by Her Britannic Majesty; and the ratifications shall be exchanged at Washington or at London within six months from the date hereof, or earlier if possible.

In faith whereof the respective plenipotentiaries have signed this convention and thereunto affixed their seals.

Done in duplicate at Washington the 5th day of February in the year of our Lord one thousand nine hundred.

JOHN HAY.
PAUNCEFOTE.

(Amendments appear in italics. Article III was stricken out by Senate.)

This treaty was deemed objectionable when it came before the Senate for ratification. It did not abrogate the Clayton-Bulwer treaty, but merely extended it. Moreover, it provided that the "high contracting parties," namely, the United States and Great Britain, would establish the rules regulating the use of the canal and maintain its neutralization. That is, the United States would build the canal but Great Britain was to be a partner in its management. By this language Great Britian sought to preserve the joint control provided for by the Clayton-Bulwer treaty. It also prohibited the fortification of the canal.

The Senate endeavored to improve the treaty by amendments. It inserted a clause providing that the Clayton-Bulwer treaty was superseded; also that none of the rules numbered 1, 2, 3, 4, and 5 should apply to measures which the United States might find necessary to take for securing by its own forces the defense of the United States and the maintenance of public order.

The Senate also struck out the provision in article 3 permitting other powers to join in the treaty. The British Government refused to approve this treaty as amended by the Senate, and it was consequently abandoned. Under date of December 4, 1901, the second Hay-Pauncefote treaty was submitted to the Senate and ratified. It read as follows:

The United States of America and His Majesty Edward the Seventh, of the United Kingdom of Great Britain and Ireland, and of the British Dominions beyond the Seas, King, and Emperor of India, being desirous to facilitate the construction of a ship canal to connect the Atlantic and Pacific Oceans, by whatever route may be considered expedient, and to that end to remove any objection which may arise out of the convention of the 19th April, 1850, commonly called the Clayton-Bulwer Treaty, to the construction of such canal under the auspices of the Government of the United States, without impairing the "general principle" of neutralization established in Article VIII of that convention, have for that purpose appointed as their plenipotentiaries:

The President of the United States, John Hay, Secretary of State of the United States of America;

And His Majesty Edward the Seventh, of the United Kingdom of Great Britain and Ireland, and of the British Dominions beyond the Seas, King, and Emperor of India, the Right Honorable Lord Pauncefote, G. C. B., G. C. M. G., His Majesty's Ambassador Extraordinary and Plenipotentiary to the United States;

Who, having communicated to each other their full powers, which were found to be in due and proper form, have agreed upon the following articles:

ARTICLE I.

The high contracting parties agree that the present treaty shall supersede the aforementioned convention of the 19th April, 1850.

ARTICLE II.

It is agreed that the canal may be constructed under the auspices of the Government of the United States either directly at its own cost, or by gift or loan of money to individuals or corporations, or through subscription to or purchase of stock or shares, and that, subject to the provisions of the present treaty, the said Government shall have and enjoy all the rights incident to such construction, as well as the exclusive right of providing for the regulation and management of the canal.

ARTICLE III.

The United States adopts, as the basis of the neutralization of such ship canal, the following rules, substantially as embodied in the Convention of Constantinople, signed the 28th October, 1888, for the free navigation of the Suez Canal, that is to say:

1. The canal shall be free and open to the vessels of commerce and of war of all nations observing these rules, on terms of entire equality, so that there shall be no discrimination against any such nation, or its citizens or subjects, in respect of the conditions or charges of traffic or otherwise. Such conditions and charges of traffic shall be just and equitable.

2. The canal shall never be blockaded, nor shall any right of war be exercised nor any act of hostility be committed within it. The United States, however, shall be at liberty to maintain such military police along the canal as may be necessary to protect it against lawlessness and disorder.

3. Vessels of war of a belligerent shall not revictual nor take any stores in the canal except so far as may be strictly necessary; and the transit of such vessels through the canal shall be effected with the least possible delay in accordance with the regulations in force, and with only such intermission as may result from the necessities of the service.

Prizes shall be in all respects subject to the same rules as vessels of war of the belligerents.

4. No belligerent shall embark or disembark troops, munitions of war, or warlike materials in the canal, except in case of accidental hindrance in the transit, and in such case the transit shall be resumed with all possible dispatch.

5. The provisions of this article shall apply to waters adjacent to the canal, within 3 marine miles of either end. Vessels of war of a belligerent shall not remain in such waters longer than twenty-four hours at any one time, except in case of distress, and in such case shall depart as soon as possible; but a vessel of war of one belligerent shall not depart within twenty-four hours from the departure of a vessel of war of the other belligerent.

6. The plant, establishments, buildings, and all works necessary to the construction, maintenance, and operation of the canal shall be deemed to be part thereof, for the purposes of this treaty, and in time of war, as in time of peace, shall enjoy complete immunity from attack or injury by belligerents, and from acts calculated to impair their usefulness as part of the canal.

ARTICLE IV.

It is agreed that no change of territorial sovereignty or of international relations of the country or countries traversed by the beforementioned canal shall affect the general principle of neutralization or the obligation of the high contracting parties under the present treaty.

ARTICLE V.

The present treaty shall be ratified by the President of the United States, by and with the advice and consent of the Senate thereof, and by His Britannic Majesty; and the ratifications shall be exchanged at Washington or at London at the earliest possible time within six months from the date hereof.

In faith whereof the respective plenipotentiaries have signed this treaty and hereunto affixed their seals.

Done in duplicate at Washington, the 18th day of November, in the year of our Lord one thousand nine hundred and one.

JOHN HAY. [SEAL.]
PAUNCEFOTE. [SEAL.]

This treaty differs from the first Hay-Pauncefote treaty in several respects. The prohibition against fortification is eliminated. Under article 1, the Clayton-Bulwer treaty is expressly superseded and terminated. The rules that are to regulate the government of the canal are to be adopted by the United States alone, and the burden of maintaining the neutralization of the canal necessarily falls upon the United States alone.

The reference to the "general principle" of neutralization in the preamble is, in a strict sense, no part of the treaty. It

merely indicates the reason or the occasion for making it. A preamble can not of itself confer any power. In the construction of statutes the title or preamble can not restrain or extend the import of the enacting clause. It can not be permitted to introduce doubt or uncertainty where otherwise none would exist. Moreover, article 8 of the Clayton-Bulwer treaty, referred to in the preamble, treats of a joint protection. The only reference to neutralization in that treaty is found in article 5.

The canal referred to in the first Hay-Pauncefote treaty was the same canal described in the Clayton-Bulwer treaty, namely, a canal to be constructed at Nicaragua.

Senators, this is important in reference to the plea which we have heard so frequently that Great Britain gave up some valuable right. She never had a right in Panama until it was conferred upon her by the second Hay-Pauncefote treaty. The restraint exercised by Great Britain was enlarged in the second Hay-Pauncefote treaty by extending the treaty to any canal "by whatever route may be considered expedient." This modification was made so as to embrace Panama, and the concession can not be defended as a wise one, inasmuch as the right of the United States to construct a canal at that point without the consent of Great Britain was not affected by the Clayton-Bulwer treaty. This diplomatic blunder can be explained only upon the theory that our negotiators did not know that Panama was not part of Central America in 1850, although the records of the State Department would have disclosed that fact, and the same information might have been ascertained in any encyclopedia.

The new treaty contains a further provision found in article 4 that the general principle of neutralization or the obligation of the contracting parties shall not be affected by any change of territorial sovereignty of the country traversed by the canal. The meaning of this provision is that the rights of the parties shall not be affected by a change in the sovereignty which may occur after the canal is constructed. It can have no application to a condition such as prevails here where the canal was constructed on territory of the United States, even though acquired after the execution of the treaty. If sovereignty had been acquired by the United States after the construction of the canal, then this provision would be applicable.

Subdivision 1 of article 3 is the provision of the treaty which is the basis of the controversy and under which the supporters of the British contention claim that the expression "all nations observing these rules" embraces the United States, overlooking the obvious distinction between the nation that makes, establishes and promulgates the rule and the nations that observe the rule.

In other words, it is said that Great Britain and other nations have the same rights to the use of the canal that the United States has. If that be so, what compensation does the United States derive from the investment of $400,000,000 and for the $17,000,000 annual deficit in the operation of the canal? The United States must have some rights not enjoyed by other nations, because it is declared that the United States shall have all the rights incident to the construction as well as the exclusive right of regulation and management. What can these rights be if they are not rights of ownership and control, subject only to the permission of other nations to make use of the canal on such terms as the United States may impose?

What discrimination is there among the nations so using the canal by permission of the United States if all are treated alike? If you accept the British view, what are the rights we possess incident to the construction?

What is our status? Do we own the canal, or are we only an international caretaker, with no special privilege except to foot the bills and to maintain a sufficient military force to defend the canal and preserve its neutrality? Did we engage in this great undertaking primarily for the United States, and incidentally for the rest of the world, or primarily for the world, without any particular advantage to the United States? Is our only reward the glory of the achievement? In all the history of recorded time did any nation ever act so improvidently as we have acted, according to the views of the British advocates? If we entered into a contract such as is claimed by Great Britain, where were the men whose duty it was to protect the rights of the American people? The British contention is so shocking to one's sense of justice, so abhorrent to every principle of equality and morality, that it needs more to establish it than the doubtful, ambiguous, and highly technical interpretation which is the sole reliance of those who defend the British pretensions. The clearest and most persuasive proof is required to destroy rights of sovereignty, and that we are sovereign in the Panama Canal has been decided by the Supreme Court of the United States, and is expressly recognized by the British Government in its second note of protest. It will be noted that under article 3 the United States adopts six rules and provides that the canal shall be free and open to "vessels of commerce and of war" of all nations observing these rules on terms of entire equality.

The first rule provides for equitable charges of traffic.

The second prohibits acts of war within the canal.

The third prohibits any vessel of war of a belligerent taking on stores in the canal.

Under rule 4, no belligerent shall embark or disembark troops in the canal.

Under rule 5, vessels of war of a belligerent shall not remain in waters adjacent to the canal longer than 24 hours, and that a vessel of war of one belligerent shall not depart within 24 hours of the departure of a vessel of the other belligerent.

The sixth rule provides that the building and accessories of the canal shall enjoy immunity from attack or injury by belligerents.

The rules apply to vessels of war as well as to vessels of commerce. If one rule applies, all apply. Under the terms of the treaty Great Britain, Germany, Russia, Japan, or any other foreign nation can not blockade the canal or exercise any act of war or commit any act of hostility within it; but will it be said that the United States can not close the canal when necessary for the security of our people and the protection of our coasts? As I shall show later on, our right to close the canal and exercise acts of war within it is recognized by the British Government, but I am now seeking the meaning of the language employed in the treaty.

A foreign battleship must pay toll, but it surely never was intended that an American battleship must pay toll passing through our own canal. To whom would it be paid? Must the United States charge itself and at the same time receive payment of a toll on its own ships of war going through its own canal? In the pursuit of an enemy, must the progress of an American battleship be arrested in the canal until its commander pays dues or tolls to the American officers in charge? Can this be seriously contended? If toll must be paid by an American ship of commerce, then toll must be paid by an American battleship, because section 1 of article 3 applies to "vessels of commerce and of war." Where the rule is operative, it affects both classes of ships. Vessels of war of a belligerent must not be revictualed or take on stores in the canal nor shall any right of war be exercised within it. They must not embark or disembark munitions of war or warlike material. Will it be claimed that it was intended that these provisions should also apply to the United States? In considering treaties we must seek the intention of the parties, and if the British interpretation were deemed possible, can it be believed that the treaty would ever have been adopted or ratified by the United States Senate?

Vessels of war of belligerents shall not remain in the canal or waters adjacent longer than 24 hours at one time, and the vessels of war of one belligerent shall not depart within 24 hours of the enemy. Must we observe this rule in time of war? For it must be remembered that the rule that treaties are suspended in time of war has no application to this treaty which, by its terms, applies in time of war as well as in time of peace. If the fleet of an enemy seeks passage through the canal, must a fleet of the United States wait 24 hours until it resumes the pursuit of the foe? In such a case must the American forces at the canal maintain a neutral attitude instead of having our forts fire upon the ships of the enemy and destroy them? These are the inevitable consequences of the British contention. If the rule as to equality of tolls applies, then we are bound by all the other rules.

There are six rules, and, as I have said, if one applies to the United States all apply. Again the language: "So that there shall be no discrimination against any nation"; if we accept the British interpretation and hold the United States to be one of the "all nations," then we have the absurd situation of prohibiting our country from making charges that will discriminate against herself.

Note the words, "the nations observing these rules shall use the canal on terms of entire equality." How can an owner be on terms of entire equality with the mere grantee of a privilege? Where a foreign country fails to observe the rules, its ship will not be permitted to use the canal. Will it be claimed that the United States will be denied the use of the canal if it fails to observe the rules which it establishes?

Who would prohibit the United States from using the canal if it neglected to observe any of these rules? Who could prohibit the ships of the United States from using the canal? Was it ever contemplated by the negotiators that such a contingency could arise? The other nations, however, for whom the United States makes these rules, do stand on an entire equality, and it is to them that the term "all nations" refers.

That the British Government at the time the second Hay-Pauncefote treaty was negotiated understood that it was our purpose to retain the exclusive control over the canal, and that Great Britain was willing to consent thereto, is apparent from the notes of the conference between Secretary Hay and Lord Lansdowne. After the words, "the canal shall be free and open to the vessels of commerce and of war of all nations," Lord Lansdowne proposed to add "which shall agree to observe these rules"; and further on the words "so agreeing," after the clause declaring "that there shall be no discrimination against any nation," and so forth, so that it would read: "That there shall be no discrimination against any nation so agreeing to observe these rules." It is plain that the nations "which shall agree to observe these rules" and "so agreeing" could not embrace the United States, because it was the United States with whom the other nations would agree.

Secretary Hay objected to this suggestion and stated that there would be opposition "because of the strong objection to inviting other powers to become contract parties to a treaty affecting the canal." He suggested, as a substitute for Lord Lansdowne's amendment, that "the canal shall be free and open to all nations observing these rules," and instead of "any nation so agreeing" he proposed "any such nation." I beg the attention of Senators to this language. Lord Lansdowne accepted this amendment, which he declared "seemed to be equally efficacious for the purpose which we had in view, namely, to insure that Great Britain should not be placed in a less advantageous position than other powers, while they stopped short of conferring upon other nations a contractual right to use the canal.

The nations, therefore, with which Great Britain was to enjoy equal rights were the nations which had no contractual rights in the canal, and it is apparent that Lord Lansdowne did not regard the United States as embraced in this class.

These views are strengthened by the declarations made by Lord Lansdowne in his conference with Ambassador Choate regarding the treaty. In the letter of Ambassador Choate to Secretary Hay, under date of October 2, 1901, the ambassador states, speaking of Lord Lansdowne, with whom he was negotiating the treaty: "He has shown an earnest desire to bring to an amicable settlement, honorable alike to both parties, this long and important controversy between the two nations. In substance, he abrogates the Clayton-Bulwer treaty and gives us an American canal, ours to build as and where we like; to own, control, and govern, on the sole condition of its always being neutral and free for the passage of the ships of all nations on equal terms, except that if we get into a war with any nation we can shut its ships out and take care of ourselves."

Nothing could be clearer from this statement than that the prohibitions against blockade and acts of hostility in the canal were not intended to apply to the United States. As Lord Lansdowne stated:

If we get into war with any nation we can shut its ships out and take care of ourselves.

If the other rules were not to apply to the United States, and it must be clear that they do not, rule 1 can not be held applicable without violating every principle of construction.

In Ambassador Choate's note to Secretary Hay under date of August 16, 1901, again speaking of Lord Lansdowne, Mr. Choate states: "He recognizes our desire to reserve the power of taking measures to protect the canal at any time when we are engaged in war"; that "contingencies may arise when it might be of supreme importance to the United States that they should be free to adopt measures for the defense of the canal at a moment when they were themselves engaged in hostilities," and "the necessity" and, of course, "the right of the United States to interfere temporarily with the free use of the canal by the shipping of another power."

That the words, "all nations," as used in section 1 of article 3 did not embrace the United States is again made clear by two statements—one made by Lord Lansdowne and the other by Lord Pauncefote, as communicated by Ambassador Choate to Secretary Hay in two notes—one under date of August 16, 1901, and the other under date of August 20, 1901. In the first note Ambassador Choate said:

Lord Lansdowne claims to desire only that the other nations, parting with nothing, should not be on a better footing with respect to the canal than Great Britain, who parts with so much, and that she shall not be bound by these stringent rules of neutrality while the others are not so bound.

Now, Senators, is it possible to have any doubt as to the meaning of this language? I repeat it:

Lord Lansdowne claims to desire only that the other nations, parting with nothing—

Surely he does not refer to the United States, because we have parted with more than all the rest, indeed we have parted with all that has been expended upon this enterprise—

Lord Lansdowne claims to desire only that the other nations, parting with nothing, should not be on a better footing with respect to the canal than Great Britain, who parts with so much, and that she shall not be bound by these stringent rules of neutrality while the others are not so bound.

Does it not appear from this note as well as from the preceding note, to which I called your attention, that at that time while negotiating the treaty England's only insistence was that she should have the same right as the other powers, which were contributing nothing to the enterprise?

Well, the other nations that part with nothing are not on a better footing than Great Britain. We are treating them all alike, but England now changes her position.

In the note of August 20, 1901, Ambassador Choate said, referring to a conference with Lord Pauncefote on the previous day:

I went over with him fully the two points which I had discussed with Lord Lansdowne and in my answer to you. He recognizes the full force of what I had to say as to the inexpediency of inserting the words, "which shall agree" and "so agreeing" in clause 1 of article 3, after the striking out by the Senate of article 3 in the Hay-Pauncefote treaty. He should emphatically favor omitting them, and thought his Government would assent to the omission; and he seemed to agree that making it read "all nations observing these rules," etc., would reach their object, which is that Great Britain and all other nations should be served alike and be on an equal footing as to obligation to observe the neutrality of the canal.

As the United States was required to maintain the neutrality of the canal, and as it was the only Government charged with that duty and responsibility, the obligation of observing the neutrality plainly rested upon the other nations that were permitted to use the canal with the consent of the United States. I submit that the reasonable interpretation of the language employed in the treaty and the declarations of the negotiators manifest a clear distinction between the rights of the United States and the permission granted to other nations to use the canal on terms of equality to be imposed by the United States.

In the proposed treaty with Colombia, known as the Hay-Herran treaty, in 1903, which was negotiated by Secretary Hay, vessels, troops, and munitions of war of Colombia were made exempt from the payment of tolls through the canal. In 1909, in the proposed treaty with Colombia negotiated by Secretary Root, a like provision was inserted. The proposal to exempt Colombia's ships was called to the attention of the British Government, and in a note to Secretary Root, January 11, 1909, Ambassador Reid quotes Sir Charles Hardinge of the British Foreign Office as follows, speaking of the pending Colombian treaty:

He said it was their duty to protest against any inequality in the treatment accorded foreign nations in the use of the canal, and that Colombia was now as much a foreign nation as any other.

This language would certainly imply the recognition of a distinction between the United States and "foreign nations."

In this connection it should also be noted that a similar exemption is contained in the treaty with Panama ratified in 1904 and acquiesced in by the British Government for many years. Not until the second note of protest regarding the exemption under the Panama Canal act of 1912 did the British Government intimate that the exemption to Panama in 1904 constituted a violation of our obligations. The pending Colombia treaty contains a similar exemption; but if the British contention prevails, the exemption must be denied the country that built the canal and which must bear the burden of maintaining it and defending its neutrality.

That the United States is not embraced in the expression, "all nations," and that we have the power under the treaty to relieve any part of American shipping from the payment of tolls, is the deliberate judgment pronounced by ex-President Taft, Philander C. Knox, ex-Secretary of State Richard Olney, Secretary of State under President Cleveland, and Senator Lodge, who conferred with Ambassador Choate in London during the treaty negotiations. In his message to Congress, under date of December 21, 1911, President Taft said:

I am very confident that the United States has the power to relieve from the payment of tolls any part of our shipping that Congress deems wise. We own the canal. It was our money that built it. We have the right to charge tolls for its use. These tolls must be the same to everyone; but when we are dealing with our own ships, the practice of many governments of subsidizing their own merchant vessels is so well established in general that a subsidy equal to the tolls, an equivalent remission of toll, can not be held to be a discrimination in the use of the canal. The practice in the Suez Canal makes this clear. The experiment in tolls to be made by the President would doubtless disclose how great a burden of tolls the coastwise trade between the Atlantic and the Pacific coast could bear without preventing its usefulness in competition with the transcontinental railroads. One of the chief reasons for building the canal was to set up this competition and to bring the two shores close together as a

practical trade problem. It may be that the tolls will have to be wholly remitted.

Senator LODGE, in a speech delivered in the Senate on April 9, 1914, said:

I was a member of the Foreign Relations Committee of the Senate which reported the amendments to the first Hay-Pauncefote treaty. I had some part in framing those amendments, and, owing to the death of Senator Davis, I was in charge of the treaty when, as amended, it was ratified by the Senate. It so chanced that I was in London when Mr. Choate and Lord Lansdowne were concluding the negotiations which resulted in the second Hay-Pauncefote treaty, and I was familiar with the discussions which then took place. When the second Hay-Pauncefote treaty was sent to the Senate it devolved upon me to report the treaty to the Senate. I mention these facts merely to show that I was in a position to be familiar with all the proceedings which ultimately resulted in the ratification of the second Hay-Pauncefote treaty. I took the view then that under the terms of the treaty of November 18, 1901, the United States was at liberty to exempt its own vessels of commerce from the payment of tolls if it saw fit to do so, and I voted against the Bard amendment, which made this right explicit, because I thought it needless. * * * The opinion which I formed in 1901 as to our rights under the treaty I have never changed. I hold it now as I did 13 years ago.

Secretary Hay, in his statement to the Senate Committee on Foreign Relations, accompanying the second Hay-Pauncefote treaty, said:

The whole theory of the treaty is that it (the canal) is to be exclusively the property of the United States, and is to be managed, controlled, and defended by it. * * * The United States alone is the sole owner of the canal and as a purely American enterprise adopts and prescribes the rules by which the use of the canal shall be regulated.

I commend those words to those Senators who are prone to speak of this waterway as an international canal when every President for 50 years who has spoken of it, nearly every Secretary of State who has had to deal with it, and the Secretary of State who negotiated this particular treaty invariably speak of it as an American canal, to be controlled and governed by the United States.

Ex-Secretary Olney, in his address read before the annual meeting of the American Society of International Law, in Washington, D. C., on April 25, 1913, said:

The single point is, are the words "all nations" inclusive or exclusive of the United States? It seems difficult to successfully contend that the United States is included.

(*a*) The treaty is a contract by which the proprietor of a canal fixes the terms upon which it grants the use of the canal to its customers.

(*b*) It was needed for that purpose only; it was not needed to fix the terms upon which the United States and its nationals—its cestui que trust—should use the canal, because its use, without tolls or otherwise, as the United States might choose, is a necessary incident of its ownership of the canal. It can not reasonably be argued that, in fixing the terms for the use of its canal by customers, the United States looked upon itself as one of the customers.

(*c*) The words "under construction" are in substance the first of a set of six rules adopted by the United States as the basis of the neutrallization of the canal. But the other five certainly apply only to parties other than the United States, so that there is the strongest reason for holding that the first of them is to be given a like application. * * * The principle is well settled that a State conveys away its rights of sovereignty or property only by terms which are clear and express and are not susceptible of any other reasonable construction. If the terms are vague and of doubtful import, the presumption is against the State's intention to part with or abridge its jurisdictional or property rights. * * * In short, the treaty is an instrument by which the proprietor of a canal fixes and states the terms of use to its customers. There is an utter absence of evidence that the United States regarded itself as one of its customers.

With our legal and moral rights so well sustained how can we justify their abandonment to a nation concerning which President Buchanan said in his message of 1857:

Since the origin of the Government we have been employed in negotiating treaties with that power, and afterwards discussing their true intent and meaning.

I now invite your attention to my third proposition that treaties do not apply to changed conditions, and that therefore the Panama Canal is not burdened by the provisions of the Hay-Pauncefote treaty. It will be observed that the Hay-Pauncefote treaty was adopted in 1901, that it was the expectation of both nations that the canal would be built on foreign soil, and that for the protection of the canal it was distinctly stipulated that the rights of the parties would not be affected by any subsequent change of sovereignty of the territory over which the canal was constructed, that is, change of sovereignty after its construction.

At that time, as well as for 50 years before, the contemplated route was through the Republic of Nicaragua. Two years after the adoption of this treaty, we entered into a treaty with the Republic of Panama whereby it conferred upon the United States in perpetuity all the rights of sovereignty possessed by the Republic of Panama over this stretch of land of 40 miles from ocean to ocean. The doctrine is well established in international law that all treaty engagements are necessarily subject to the general understanding that they shall cease to be obligatory as soon as the conditions upon which they were executed are essentially altered. Hall, a well-recognized British authority, declares in his work on international law, that—

neither party to a treaty can make its binding effect dependent at will upon conditions other than those contemplated at the moment when the contract was entered into; and, on the other hand, a contract ceases to be binding so soon as anything which formed an implied condition of its obligatory force at the time of its conclusion is essentially altered.

Mr. Oppenheimer, professor of international law in the University of Cambridge, in his work on international law, states that—

It is an almost universally recognized fact that vital changes of circumstances may be of such a kind as to justify a party in notifying an unnotifiable treaty. The vast majority of publicists, as well as all the Governments of the members of the family of nations, agree that all treaties are concluded under the tacit condition rebus sic stantibus.

Hannis Taylor, the American authority on international law, states the rule as follows:

So unstable are the conditions of international existence and so difficult is it to enforce a contract between States after the state of facts upon which it was founded has substantially changed, that all such agreements are necessarily made subject to the general understanding that they shall cease to be obligatory as soon as the conditions upon which they were executed are essentially altered.

England invoked this rule in her own defense when she was accused by the European powers with violation of the neutrality provisions of the Suez Canal convention. In a convention of the powers a protest was made against the action of Great Britain, and Lord Pauncefote, the joint author of the Hay-Pauncefote treaty, stated the position of Great Britain as follows:

Senators, apply this language to the conditions with which we are concerned:

That Egypt having become British territory since the construction of the canal and the agreement between the powers, Great Britain could not be bound by the neutrality provisions adopted, so far as they affected Egypt, because it was a recognized principle of international law that treaties are only operative so long as the basic or fundamental conditions upon which they are based continue, and that in the event of a fundamental change, such as a change of sovereignty of the soil, any nation which is a party to such treaty could honorably contend that *it was inoperative as to her newly acquired territory.*

This contention of Lord Pauncefote was upheld by the British Government, and England proceeded to fortify her newly acquired territory and continued to maintain it in a fortified condition, notwithstanding the neutrality provisions of the Suez Canal convention to the contrary. In her second note of protest Great Britain reluctantly concedes that—

now that the United States has become the practical sovereign of the canal His Majesty's Government do not question its title to exercise belligerent rights for its protection.

If the canal contemplated by the treaty had been constructed the United States, under the British interpretation, could not exercise belligerent rights. The concession that we may now enjoy belligerent rights recognizes a changed condition which makes the entire treaty inoperative. Where a vital change takes place in the conditions in reference to which a treaty is made international law does not permit one of the parties to the treaty to determine which of its provisions survive and which are extinguished. The treaty must stand or fall as a whole. Under the doctrine recognized by the British Government the treaty is inoperative as to the newly acquired territory of the United States, and the canal constructed on American territory at Panama is no more affected by the Hay-Pauncefote treaty than would be a canal built across any other part of the soil of the United States.

It is not disputed that when the treaty was negotiated both Governments assumed that the canal would be constructed on alien territory and not on the soil of the United States.

Our sovereignty over the territory in question being admitted, and it must be admitted, because it is conceded by Great Britain and determined by the Supreme Court of the United States, it must follow that the canal as constructed was not the canal contemplated by the Hay-Pauncefote treaty, and that the provisions of that instrument have, consequently, no relation to the undertaking. It is true that in the treaty which we made with the Republic of Panama it was stipulated that we would use the canal for the purposes stated in the Hay-Pauncefote treaty, but Great Britain was not a party to that treaty and its rights could not be impaired or enlarged by any provision of an instrument to which it was a stranger. At best, the reference to the Hay-Pauncefote treaty contained in our treaty with Panama was but an indication of a general purpose of neutralization which we were prepared to recognize in the operation of the canal. If we desired it, Panama could now relieve us of this promise and the world could not complain. That the provisions of the Hay-Pauncefote treaty were not deemed binding on the United States or on the Republic of Panama with respect to the canal actually constructed is apparent from the circumstance that in our treaty with Panama

we expressly exempt vessels of the Republic of Panama from the payment of tolls passing through the canal, notwithstanding the Hay-Pauncefote provisions as to the equality of treatment of all nations.

These considerations I submit amply justify the legislation enacted by Congress two years ago. The exemption of coastwise vessels from the payment of tolls may be supported on any one of the three grounds just asserted.

ECONOMIC PHASES.

Mr. President, I now desire to make a few observations regarding the economic phases of this legislation.

For more than 30 years the transcontinental railroads of the country used their powerful influence and resorted to every device to prevent the construction of an isthmian canal.

I do not believe that there is a Senator in this body who will have the temerity to deny the accuracy of that statement, that for 30 years the transcontinental railroads interposed every conceivable obstacle to the construction of a canal connecting the two oceans. Railroads dread water competition because that means cheaper railroad rates. No railroad ever secured control of a competing water line on this continent without destroying competition. Now that the canal is built, the same malign influence is endeavoring to minimize its service to the public.

It was recently reported by a committee of the House of Representatives that 92 per cent of the vessels engaged in coastwise trade are controlled by the railroads of the country, or shipping consolidations which are operated in defiance of the antitrust laws of the land. If these ships, backed by the power of railroads, were allowed to use the canal there would be an end to competition in transportation because, as Mr. Wilson said in his speech on August 15, 1912, "Railroads will not compete with themselves."

Judge Prouty, and Mr. Lane, now Secretary of the Interior, who were for many years members of the Interstate Commerce Commission, appeared as witnesses before the Interoceanic Canals Committee two years ago and gave it as their judgment, based on their knowledge and experience, that the only effective way to secure competition and prevent the railroads from making the canal a corporate asset was to exclude all railroad-controlled vessels.

By the act which the pending bill seeks to amend Congress not only prohibited railroad-controlled vessels from using the canal when in competition with the railroads, but conferred jurisdiction upon the Interstate Commerce Commission to compel railroads in all parts of the country to dispose of their interests in their competing water transportation lines.

It may be argued that proper competition could be secured by a reasonable regulation of rates by the Interstate Commerce Commission, but the regulation of rates can only serve to correct abuses after they develop and oppress the public, while the exclusion of railroad vessels from the canal is an absolute preventive of the abuse.

Moreover, it gives encouragement to independent shipbuilders to construct vessels to engage in the canal trade and thus develop an important American industry.

Exempting coast craft from the payment of tolls will reduce the cost of shipping through the canal to a minimum, and thereby compel competing roads in the United States and Canada to reduce their rates to a competitive basis. The more expensive you make water transportation the greater latitude you extend to the railroads in the fixing of their rates. Place a toll on the domestic shipping and for every dollar you collect by way of a toll you enable the railroads to make a corresponding increase in their rates.

Every ton of freight carried through the canal at $1.20 a ton will enable the competing railroads in the United States and Canada, as well as at Tehuantepec, to charge at least that amount as additional freight; and on a freight car carrying 50 tons of freight from ocean to ocean the railroads will receive $60 more than they would if the ships went through without the payment of tolls. It would be just as fair to cry railroad subsidy under these circumstances as it is to charge ship subsidy.

The proper use of the Panama Canal must result in large direct and greater indirect benefit to the people of the country. It can aid in the revival of the American marine, and we shall be again enabled to carry the American flag on the peaceful missions of commerce to the ports of all the world, including those of our sister American Republics.

The view of the British public on this subject is reflected in a article in the London Times of August 13, 1912, from which I quote:

> The bill (canal act) will offer facilities for foreign-built tonnage to be registered under the American flag. There is, however, a proviso that such tonnage must be placed at the disposal of the United States Government in the event of war. It would seem, therefore, that however willing British shipowners would be to place their ships under American register, this provision is sufficient to deter them from doing so. * * *
>
> If the bill becomes a law, it will prove little short of disastrous to British shipowners. With their best brains and energy devoted to the work, the United States will now proceed to turn out vessels on a wholesale scale, and aided by their freedom from Panama Canal dues there is little to prevent them from entering with success all those trades in which British shipowners are now the principal carriers.

Pass this bill and you will surely earn the approval of the British press and the gratitude of the British shipowners.

Mr. President, military and economic reasons alike induced us to embark on this vast undertaking. There was a time in our history when American ships handled three-fourths of our transportation business between here and Europe, but British cruisers like the *Alabama*, the *Shenandoah*, and the *Florida* destroyed our commerce during the Civil War and drove our flag from the ocean.

In 1901 we carried but 16 per cent of our export trade, and 11 per cent of our import. In 1900 not one American merchant vessel went to or came from Germany, Russia, Sweden, Norway, Denmark, The Netherlands, Italy, Austria, Hungary, Greece, or Turkey. Two small American vessels came to the United States from France; one in ballast. One American sailing vessel came from Belgium in ballast, and one American vessel cleared for Spain. There cleared for or entered from Great Britain 11 American sailing vessels, and 2 small steam vessels went to Great Britain in ballast.

The American flag was never such a rarity on the North Atlantic between the United States and Europe. The mail steamships *St. Louis*, *St. Paul*, and *New York* were practically all we had during 1900 in the North Atlantic. There has been no improvement in our foreign shipping since then.

Our participation in shipbuilding and in the trading, underwriting, and banking incident to navigation was correspondingly low. Contrast this record with certain years before the Civil War, when our flag was seen on every sea, and when we carried 89 per cent of our exports and 95 per cent of our imports in American bottoms. The transportation in foreign bottoms consumes a large part of our cargo, and what we spend for the carriage of our products goes out of the country never to return. If carried in our own ships it would increase our credit abroad, and our imports, if carried in American vessels, would increase our wealth at home.

Our commerce should not be abandoned to the monopoly of foreign nations. We are now in the grip of a foreign steamship trust. All of our carrying trade is controlled and directed by the foreigner. American commerce is made to pay tribute to the steamship interests of London, Hamburg, and Rotterdam. Our commerce has prospered, but we have permitted our navigation to perish. Our American marine has been destroyed, and it was hoped that the Panama Canal would mean its restoration, but the influences that have swept away our shipping now are endeavoring to keep it off the sea. Navigation should keep pace with our commerce. As Jefferson said: "The marketing of our productions will be at the mercy of any nation which has possessed itself exclusively of the means of carrying them, and our politics may be influenced by those who command our commerce." Although Jefferson said this in 1703, was it not prophetic, and does it not describe our condition to-day? We have no control of our own trade. The foreign shipper, the foreign merchant, the foreign banker, and the foreign underwriter fatten upon American commerce.

But it is said that the American vessels engaged in the coastwise trade have a monopoly and need no further assistance; that if any assistance is to be offered by the Government the American ships in the foreign trade should get the benefit of it. It is quite true, as I have shown, that the American merchant marine is sadly in need of encouragement. It is said that we now have but 15 ships engaged in the over-seas trade on the Atlantic and the Pacific Oceans. In 1912, 3,000 British vessels passed through the Suez Canal, and during that entire year only 2 ships flying the American flag passed through the canal. England and Germany control the trade of South America, which would be ours if we had a merchant marine worthy of the Nation. Our foreign shipping is practically destroyed. It is estimated that we give more than $300,000,000 a year to the owners of foreign ships that thrive on our commerce. It was hoped by some that the exemption to the coastwise trade might be followed in the near future by a like exemption to the few American ships now engaged in the foreign trade, but deny this privilege to the coastwise vessels now and you make it forever impossible to confer it upon the ships engaged in over-seas trade.

I repeat that one of the chief purposes of the canal was to secure free competition by water route through the canal so as to regulate and control the railway rates on the American

and Canadian Railway and the Tehuantepec Railroad through Mexico, now under the control of a British syndicate whose fortunes are vitally affected by this legislation. There was another and even more important purpose—the use of the canal in naval operations.

The canal is a military necessity to the United States. We could only by enormous expense maintain permanently on the east and west coast a naval force strong enough to meet unaided any possible opponent. By enabling the Pacific and Atlantic squadrons to unite at short notice the Panama Canal doubles America's naval strength. The canal is therefore primarily a strategical undertaking.

During a recent cruise of the fleet from the Atlantic to the Pacific coast, an ordinary maneuver undertaken in time of peace, the Government found it necessary to charter 40 foreign steamers to provide fuel for the warships. It is humiliating to confess that this great Nation in time of war must depend upon foreigners for our auxiliary fleet. Japan is building 50 ocean ships for her merchant navy. We are building none. Japan can carry 200,000 troops at one time, while we can not carry more than 15,000. Japan has an auxiliary navy of half a million trained sailors. We have not 10,000 auxiliary sailors in the United States.

Mr. President, no patriotic American can contemplate the disappearance of our merchant marine without grave apprehensions as to the consequences to our commercial and naval prestige.

SUBSIDY.

But the opponents of the existing law, seeking an excuse for violation of party pledges, profess to discover that the exemption constitutes a subsidy. Realizing that the reasons first assigned for the repeal have made no impression upon the people, some cunning strategist has resorted to the old expedient of dragging a red herring across the trail in order to divert attention from the real question. What is a subsidy? Some who use the word have a loose conception of its meaning.

A subsidy is a gift of public funds from the Government to a private person or corporation to aid in the establishment or support of an enterprise deemed advantageous to the public. A failure to impose a tax is not a subsidy. No money is taken out of the Treasury for the benefit of the coastwise shipping, and if tolls were imposed it is altogether problematical as to how much money would be derived from that source for the public benefit.

If you want a fitting illustration of a subsidy, I would commend you to the provisions of the pending Agricultural appropriation bill, in which you are applying millions of the public money to the benefit of a particular class of our people at the expense of all the other people of the country. This Agricultural appropriation bill, which is largely composed of subsidies, has been passed by a Democratic House, will be passed by a Democratic Senate, and will probably be approved by a Democratic President. I do not make these remarks in criticism of the Agricultural appropriation bill, for I shall vote for it, but I desire to call attention to the fact that there are very many, even in this body, who wink at subsidies when they help them or their people, while they grow frantic at the thought of supporting an alleged subsidy in which they or their people may be supposed to have no particular interest.

The United States has expended more than $800,000,000 in river and harbor improvements and the building of canals, not including the Panama Canal. There are 12 of these canals throughout the country and during the last fiscal year more than $2,000,000 was expended in their care and operation. As improved water transportation has operated as a regulator upon competing railroads, the public at large has been regarded as the beneficiary of the public moneys appropriated for these purposes. The State of New York has paid out more than $200,000,000 in the construction and maintenance of its canals, but it makes no charge to any vessel using them, believing that the public is fully compensated by the influence the canals exert in the regulation of railroad rates. Now, for the first time in the history of our country, it is claimed that this practice constitutes a subsidy.

The railroad influence is persistent and we meet it at every point. While the railroads had a monopoly of the coastwise vessels it was not thought that the vast sums of money paid out of the Treasury annually for waterways constituted a subsidy, but now that the railroad vessels can not use the Panama Canal the cry is raised that the Government is giving a subsidy to the independent shipowners who may use this waterway. We now hear the cry of subsidy from men, many of whom have grown gray in the defense of privilege and monopoly. Every attorney of the transcontinental railroads, American and Canadian and the allied interests, is hoarse shouting "subsidy." The Tehuantepec Railroad of Mexico, controlled by a British syndicate, fears competition, and its defenders join in the chorus and shout "subsidy"; men who have become masters in the art of political jugglery will assure you that it is a subsidy, but the American people will not be deceived by such protestations.

Before the Panama Canal act of 1912 excluded railroad and trust-controlled vessels from the canal it was estimated that one-tenth of the entire tonnage passing through the canal would represent coastwise shipping, and that if the tolls were exacted from the coastwise vessels they would amount approximately to $1,200,000 a year; but as only 8 per cent of the coastwise vessels are under independent control, and that 8 per cent, as testified by the Commissioner of Navigation, Mr. Chamberlain, constitutes but 29 vessels fit to pass through the canal, the amount of tolls that would be paid by these vessels on the basis above mentioned would probably not exceed three or four hundred thousand dollars a year.

Last year we spent more than $40,000,000 to improve the rivers, harbors, and canals of the country, but no toll or charge will be imposed on any vessel in order to secure a return on this outlay. If it is a subsidy to permit American coastwise vessels to use the Panama Canal without charge, then for these many years we have been paying subsidy to the vessels which formed part of the vast railroad monopoly of the country.

Our Government has expended more than $120,000,000 for the improvement of the Mississippi River, $23,000,000 for the improvement of the Ohio River, and $11,000,000 for the improvement of the Missouri River. We have spent $24,000,000 on the St. Marys Falls Canal. These improvements were made, and the money was paid out of the Treasury for the benefit of the American people. The improvements on the Mississippi, Missouri, and Ohio Rivers were mainly for the purpose of facilitating commerce to and from the Gulf of Mexico. In like manner the Panama Canal was to perfect the waterway system of the United States so as to unite the two oceans and connect the two coasts, thereby permitting barges to be loaded at Pittsburgh or St. Louis or Kansas City and conveyed to San Francisco, Seattle, and other points on the Pacific coast, bringing back the products of that region for distribution to the Gulf coast and the Mississippi Valley.

The domestic commerce of the United States exceeds that of any other nation. More than 40,000,000 tons passed through the Soo Canal in 1912. This is three times greater than the entire traffic on the Suez Canal, but not a dollar of toll was collected on this vast traffic. It costs the Government for the upkeep of the Soo Canal, direct and indirect, millions of dollars every year, but no vessel using this canal is required to pay a toll or other charge for the privilege.

Surely if it is a subsidy to exempt independent coastwise shipping from the payment of tolls in the Panama Canal, where the amount collected would be comparatively small, it is a more reprehensible subsidy to spend millions every year on the Soo and other canals for the benefit of a railroad-controlled shipping.

Perhaps those who claim that the exemption constitutes a subsidy will doubtless explain why they have never raised their voices against the so-called subsidy while the railroads were enjoying the benefit of the system, and why the cry of subsidy was first heard only when a patriotic effort was made to build up an independent coastwise shipping trade freed from the domination of a grinding railroad monopoly.

In 1884 in the river and harbor act it was provided that—

> No tolls or operating charges shall be levied upon or collected from any vessel, dredge, or other water craft for passing through any lock, canal, canalized river, or other work, for the use of and benefit of navigation, now belonging to the United States or that may be hereafter acquired or constructed.

We have never departed from this policy, and those who claim the Panama exemption is a subsidy must reverse the national policy and repeal the law of 1884. Since the adoption of our Constitution in 1789, the uniform policy of the Government has been an untaxed commerce between the States. In the maintenance of this policy we have scrupulously avoided the imposition of any tax or toll on our vessels engaged in interstate commerce. Why should this policy be abandoned? Have the people of the country, by any vote or other declaration, demanded the change? That we have prospered under this policy; that it was wise and sagacious, will not be denied by any student of our growth and development. If it is a subsidy to allow one of our coastwise ships to pass through the Panama Canal without the payment of the tax, then have we not, both parties, Democrats and Republicans, supported similar subsidies for more than a century? If you impose a tax on our vessels going through the Panama Canal, how can you consistently allow our vessels to pass through the St. Marys

Falls canal and other artificial waterways without the payment of toll? Do you have one rule for one section of the country and another rule for a different section? Are we to have free tolls only where it will benefit the railroads, and charge tolls only where it will burden the independent shippers who are competing with the railroads? In either case the railroads will be the only beneficiaries of your proposed legislation. I can not believe that such action by the Congress of the United States will commend itself to the American people.

In truth, an exemption from tolls does not differ economically from the remission of tariff duties. Each of them tends to encourage competition by reducing cost. The payment of tolls will be no burden to the shipowner, because he will simply add the toll to the freight charge, and this will be paid first by the American shipper and then by the American producer and the American consumer.

Is every refusal of the Government to tax its shipping a subsidy? Thomas Jefferson advocated the imposition of discriminatory duties in our tariff and also in our navigation law. This was the principle written into the tariff law at the last session of Congress, which carried a 5 per cent discriminatory rate in favor of goods brought in American ships. Was that a subsidy? Why not? Does it not invite our shippers to use our ships instead of foreign ships? Does it not give somebody 5 per cent of our taxes? Who will get this money—the ships, or the shippers, or both? Or will its benefits finally reach the consumer? This 5 per cent tax exemption was enacted by a Democratic House and a Democratic Senate, and was approved by a Democratic President. During its passage through the House and through the Senate the conscience of no Democrat prompted him to rise up in his place and protest against a Democratic Congress giving a subsidy of that kind in a Democratic tariff bill.

Mr. President, in the same tariff bill provision is made for free shipbuilding material. If the Democratic Party is opposed to indirect as well as direct subsidies, why did it not impose tariff charges on this importation? Some one is benefited by the remission. In these matters, as well as in the Panama Canal exemption, we have pursued a well-defined policy of keeping our ships as free from the burden of taxes as we can, in order that our country might do in a negative way what all foreign countries are doing for their shipping in an affirmative way.

I know it is said that free tolls will simply enrich the shipowner and confer no benefit on the producer and consumer. Well, if free tolls will not decrease the cost to the consumer, imposing tolls on the other canals of the country will not increase the cost to the consumer. I suppose you will make your system uniform. Perhaps this is a part of a program to impose tolls on the shipping on the other canals of the country. This policy was suggested by Prof. Emory Johnson before our committee, and if adopted it will at least have the merit of treating the lake, the river, and canal shipping alike.

PARTY PLEDGES.

Those who seek to justify the betrayal of party pledges must invent an excuse or openly confess that the declaration of principles adopted at the Baltimore convention was a mere sham to be used only for the purpose of deceiving the American electorate and not for the purpose of being redeemed honestly. When before did the Democratic Party violate party pledges? When did it repudiate a solemn covenant with the American people?

Unusual care was taken at the Baltimore convention to adopt a platform which could be scrupulously respected by the party and its candidates. To avoid the possibility of the candidates repudiating the platform, or any part of it, the platform, at the suggestion of the leader of the party, although carefully considered and unanimously approved by the committee on resolutions days before, was not presented to the convention and adopted by that body until after the candidates had been selected. It is within the memory of the members of the committee that we pursued this course on the advice of the then leader of our party, who declared that he did not want any contest or issue between the candidates and the platform.

This was the first time in the history of political conventions that such a course was pursued.

I can not stop to contemplate what would have become of Democratic prospects in the last presidential campaign if the free-toll plank of the platform had been rejected or repudiated before the election; but it was not rejected. It was approved and pressed upon the attention of the public in every section of the country. Its economic advantages were pointed out by the nominees of the party and the thousands of public speakers who advocated their cause. It was given prominence in the campaign textbook which was distributed throughout the country by the national Democratic campaign committee, and yet it was as much a subsidy in 1912 as it is now.

Let us not deceive ourselves, Senators, the free-toll plank was the one dominant American note in the campaign of 1912, and its value to the Democratic Party can not be disparaged when it is recalled that the convention of the Progressive Party adopted the same plank, that the nominee of the Republican Party had already pledged himself to the same principle, and that 14,000,000 citizens of this country by their votes have declared their adherence to this principle. We are now asked to repudiate their declaration, to ignore their rights, and to treat them with a contempt to which American citizens will never submit.

When we talk of national honor we may be suspected of insincerity if we do not recognize that a violated party pledge is the rankest kind of political perfidy. We surely owe at least the same good faith to the American people that we profess to feel for a foreign nation.

The American people, not the British Government, restored the Democratic Party to power, and if we retain power it will be by the favor and confidence of the American people and not by the grace of Great Britain. If we prove recreant to our trust the American people will render a verdict whose lesson will have a salutary influence on the public men of the future. A party platform should be regarded as a confession of faith by the party promulgating it and should be held sacred and inviolate.

How can we hope to retain the confidence of the American people when we have no respect for our party pledges? To what sinister influence will the people attribute this duplicity on the part of a great political party? It is no defense to say that delicate foreign relations justify the repudiation. There can be no condition in our foreign affairs that can excuse the abandonment of vital national rights. If, as the result of war, a conqueror imposed such terms upon us we could accept them as the issue of a struggle, but a self-respecting people can not freely submit to such conditions. Is the Democratic Party prepared to confess itself guilty of a betrayal of a public trust? Will it admit to the country that it secured office by false pretense? What confidence can the people have in such a party so devoid of respect for its own pledges? We secured office under a solemn promise to the American people which we are now asked to repudiate.

Those who say we must act because the President so advises have a very erroneous conception of the senatorial office. They forget our powers and responsibilities, as well as the limitation imposed by the Constitution on the Executive. We are too important a branch of the Government to allow our action to be controlled by the request, caprice, or dictation of any other branch of the Government.

Of all the departments the Senate is the only body possessing legislative, executive, and judicial functions. With the House we legislate; with the President we share the duty of making appointments and adopting treaties; and in the impeachment of public officers we perform judicial functions. I shall never tolerate the degradation of the Senate. I shall never consent to making it subordinate or subject to another branch of the Government. The President is discharging his duty as he sees it. He has his duties to perform under the Constitution and I have mine. No one impugns his honor or patriotism. I simply challenge his judgment. It can not be vindicated, and posterity will condemn it.

For nearly a century the national convention has been the highest authority for the declaration of party principles—the promulgation of the party creed, binding upon all alike. The party doctrine as pronounced by a national convention can be changed only by another national convention. The power is not lodged with a President or a congressional caucus to regulate or modify.

I should prefer to stand with the President, but I have never bolted a Democratic candidate nor a Democratic platform, and I do not intend now to take my place with the repudiators of party pledges. In this emergency every Senator will act according to his own lights. Some may find an excuse for the disregard of party obligations, but as I view it, a party platform is the plighted word of men of honor declaring what their policies will be if they attain power. It is either that or a shifting, dishonest, unconscionable pretense whereby a confiding electorate is misled.

Never until now has the party of Jefferson been exposed to this base imputation upon its honor and integrity. And those who clung to the old Democratic Party in its days of adversity—those who, undismayed by repeated defeats, remained loyal to its candidates and its principles—should not now be asked to

do it a wrong greater than any which its avowed opponents are capable of inflicting upon it.

Senators, I beg you to pause while there is still time and avert a disaster which now threatens the party and the Nation.

NATIONAL HONOR.

But it is said that our national honor is affected and that, right or wrong, we should accept the claim of Great Britain. Since when have we become so weak that we dare not assert our national rights? When we were colonies of Great Britain we did not yield to her demands "whether right or wrong," and I hope that we have not become so unworthy the heritage of liberty won for us by the blood and sacrifice of the patriots of the Revolution that now, after 138 years of independent existence as a nation, we are ready to yield to her unjust exactions.

Are we to abandon the Monroe doctrine when every sentiment of the American people calls for its maintenance? Must we cower before the mailed fist and give the first manifestation of national decline? No nation can respect another that does not respect itself. Surely the most that can be claimed by the British advocate is that the question of the interpretation of the treaty is involved in doubt. If that be so, by what right or authority do we resolve the doubt against our own people? Have we no liberty of action? When have we become so feeble that we can not retain advantages of our own? Have we not the same right that England has to place our own interpretation on the treaty and support it by reason and precedent? Yet we are told, "right or wrong," we should submit. Whence came these standards in the affairs of nations? England has never applied them to herself.

In matters personal to ourselves we may surrender our private rights, if we will; they are ours, and our action affects ourselves alone, but acting as trustees for a nation, can we in honor or justice surrender their rights and interests without rhyme or reason? We may ransack all the authorities on international usage; we may explore all the pages of diplomatic relations, and I venture to assert that no precedent can be found in the history of any country for this extraordinary proposal.

Reason, common sense, justice, and patriotism alike cry out and condemn it. The American people will never consent to it. We, who, for a brief hour, are clothed with their authority are but their servants, and under our system of laws the people recognize no master or ruler in affairs of government. They themselves are sovereign, and they will never condone this threatened spoliation and sacrifice.

While the exemption of coastwise shipping is not a subsidy, if, after an experimental period, it seemed wise to repeal it, I should not hesitate to vote for such a proposition, but to repeal the exemption now is to confess to the world that President Taft and the Congress of the United States violated a solemn treaty, and that under the stress of coercion we are constrained to change our course. To repeal the exemption at this time would involve the further concession that we are not in absolute control of the canal; that it is an Anglo-American and not an American canal, as John Hay declared it would be. The British contention, if upheld, would impose a restriction upon our sovereignty and recognize the right of a foreign government to a voice in the regulation of our domestic concerns. These complications must arise once you recognize Great Britain's right to tell us what we may or may not do in our treatment of our own shipping.

If I would counsel the President, I would remind him that whatever we owe foreign nations we owe more to the American people. It is idle to talk of national honor when we seek to meet unfounded demands by inflicting injustice and dishonor upon our own people. I would urge the strict observance of every international obligation founded on right and justice, but I would defy the powers of the earth before I would permit encroachments upon our rights of sovereignty.

I shall never furl the standard of the United States and lay it at the feet of a foreign nation. In a contest between my country and a foreign Government, I shall take my place with my own people. I will not enlist in the forces of the enemy. I shall be just to my own people before I become generous to those who would invade our national rights. We are sent here to protect American rights and not to sustain foreign aggressions. We have no mandate to barter away national rights. The people look to us to defend them; and if we fail them the people are betrayed.

Mr. President, we have accomplished the greatest task of all time. We have made two oceans one, and yet in a spirit of friendship to all the world we offer to the nations of the earth the use of the greatest achievement of all the centuries. Contrast our conduct with that of England. Which is more honorable? We give where we might withhold. She selfishly demands what belongs to us. England controls more than one-half of the shipping of the world. The canal will confer a greater benefit upon her than upon all the other nations of the earth combined, and yet, although we grant her this princely benefaction, she would deprive our people of their just rights in their own canal. Did the world ever witness such ingratitude, selfishness, and rapacity?

Friends of the British contention dwell on the moderation of Great Britain in surrendering its discriminatory policy in the Welland Canal when it was discovered that her policy violated the reciprocal treaty with the United States made in 1871. But the history of the incident shows that for years Canada deliberately violated the treaty and was forced to abandon its violation only when the United States took retaliatory measures against her in 1892. In that contest Great Britain yielded reluctantly, unwillingly, and tardily, and while her conduct could not to be defended, except at intervals on the floor of the United States Senate, she did not admit that she was in the wrong. To-day she is forcing us to yield, although we are in the right; right according to Mr. Roosevelt, who was President when the treaty was framed; right according to the Supreme Court of the United States, which interpreted a similar treaty; right according to President Taft, in whose administration the canal was built; and right according to the judgment of 12,000,000 American citizens as recorded at the polls in November, 1912.

Those who see something to commend in the conduct of Great Britain regarding the Welland Canal controversy might find it profitable to recall the message of President Cleveland to Congress on August 23, 1888, in which he stated:

> The navigation of the Great Lakes and the immense business of carrying trade growing out of the same have been treated broadly and liberally by the United States Government and made free to all mankind, while the Canadian railroads and navigation companies share in our country's transportation upon terms as favorable as are accorded to our own citizens. The canals and other public works built and maintained by the Government along the line of the Lakes are made free to all—

Free to American and free to Canadian shipping.

> In contrast to this condition, and evincing a narrow and ungenerous commercial spirit, every lock and canal which is a public work of the Dominion of Canada is subject to tolls and charges.

And of the toll of 20 cents a ton which Canada imposed upon American and Canadian shipping in her own canal she at once devised a system by which Canadian shipping would secure a rebate of 18 cents a ton, thereby imposing a net charge of 2 cents a ton upon Canadian ships and retaining a charge of 20 cents a ton on American ships, when just across the waterway this generous Government of ours was placing all of our lakes and canals freely and without charge of any kind at the disposal of Canadian as well as American shipowners.

It is surprising at this late date to find a Canadian, much less an American, defending the morality or justice of this action. And this practice was resorted to at the very time that Canadian ships were enjoying the use of American canals and other public works without the payment of any charge whatever.

In his note to Ambassador Bryce, dated November 14, 1912, Sir Edward Grey, secretary of state for foreign affairs of Great Britain, referring to the treaty of Washington, said:

> Your excellency will no doubt remember how strenuously the United States protested, as a violation of equal rights, against a system which Canada had introduced of a rebate of a large portion of the tolls on certain freight on the Welland Canal, provided that such freight was taken as far as Montreal—

Note this language, Senators—

> and how in the face of that protest the system was abandoned.

It is apparent that Sir Edward Grey was not familiar with the circumstances that induced his Government to alter the system of rebates to Canadian shippers. The system was not abandoned because of the protest of the American Government, but because of a proclamation issued by President Harrison on August 20, 1892, under authority of Congress, which provided, as a retaliatory measure, that after September 1, 1892, a toll of 20 cents a ton should be imposed—

> on all freight passing through the St. Marys Falls Canal in transit to any port of the Dominion of Canada, whether carried in vessels of the United States or of other nations.

The protests of the Government of the United States, made in 1888 and again in 1891, against Canada's disregard of the provisions of the treaty of 1871, had no effect. She was brought to her senses, however, by the retaliatory measure of August, 1892, and in consequence she discontinued her discrimination against American shipping in Canadian waters. Canada abandoned her discrimination not because of our protests, but under stress of punitive legislation by the American Congress.

Senators, our countrymen are a justice-loving people. They respect treaty obligations. The foul slander that we are an outlaw nation is as false as it is unpatriotic and un-American to assert it. Our record, I am sure, will bear comparison with that of Great Britain. The pages of history of every nation in the world, without an exception, teem with instances of treaties she has violated and wrongs she has perpetrated. No nation has been immune from her selfish greed and lust of power, and now before we take the final step in this unwise and mistaken policy, fraught with infinite mischief for the future, let us pause and remember that while we may placate England we shall have to answer to the American people.

Senators, this issue will grow to proportions overshadowing all other questions. It is not impossible that we shall render a decision that will offend the judgment of the American people; but if we do so, I venture the prediction that another Congress will correct the wrong.

President Taft declared, when this question was presented to him, that we had not violated the treaty, and by cogent and unanswerable logic established his contention. Why should this administration seek to undo what has been done by the administrations that constructed the canal and built it on American soil? What respect can foreign nations have for the United States if the act of a President of the Republic in international relations is to be repudiated by his successor? Not since 1776 has Great Britain been allowed a voice in our domestic affairs. What think you would be England's attitude if our positions were reversed? Would she yield her vital interests to foreign dictation, or would she contemptuously rebuke the insolence of a nation making the demand? If we would retain the independent sovereignty of the United States over the canal we must resist this insidious effort to compel our relinquishment of the most strategic point within our national domain.

I know there is a vague suspicion that diplomatic reasons require this national abasement, but my judgment, maturely formed and based upon such information as is available, is that the gravity of our international relations has been grossly, though unconsciously, exaggerated. The American people want peace, but they fear no power on earth. Shadows can not disturb a brave man. They should not alarm a brave and intrepid people. A nation worthy the respect of the world can not relinquish sovereign rights under threat from a foreign power.

I am as jealous of our national honor as any man, but in my judgment our national honor requires no sacrifice such as is proposed. If you encourage a doubt as to the spirit with which Americans are prepared to uphold the interests of our country—if you are ready to yield national rights—you may soon find that you will have to contend with more than one enemy for your station among the nations of the earth. The national humiliation which threatens us can be averted only by giving in the Senate of the United States a reflection of the high and resolute spirit of confidence and patriotism that animates the American people.

Subservience and shame will never elevate a nation or win her respect. National safety can be secured only by firmness and dignity. Yield once to unjust demands and you will be called upon to resist fresh exactions. Why confuse the issue by dwelling on our solemn obligations and suggesting the need of protecting our national honor? Who has assailed our national honor? Whence came the blow? Unfortunately it has been dealt by some of America's own sons. Is there dishonor in upholding the rights of the American people against the wiles of an avaricious competitor for the trade and commerce of the world? In the golden days of the Republic this was patriotism, but according to the new dispensation it is dishonor. Have we in truth become a decadent Nation—where the first claim to distinction is treachery to your own and subserviency to the oppressor?

There was once a national spirit which believed in the honest observance of party pledges, the maintenance of national integrity, and the preservation of the Monroe doctrine, which warned the monarchies of Europe to keep their hands off of this continent.

This spirit is not dead. If there be any who think it is not abroad throughout the land, they do not know the American people. Those who defend American rights may be called jingoes, but it will not weaken their devotion to their country. How familiar the cry of jingo so persistently uttered against those who are not ashamed or afraid to speak up for the pride and dignity of the Republic. It has been the weapon of every political hireling who sought obsequious compromise with foreign aggression. It has been hurled at every man who has stepped out of the conservative miasma to unfurl the flag in the pure sunlight of an unpurchaseable freedom. It was the Tory's epithet for James G. Blaine, because he remembered that he was an American. It was the Tory's epithet for Grover Cleveland, when, in the Venezuelan controversy, he uttered the memorable words:

> There is no calamity which a great nation can invite which equals that which follows a supine submission to wrong and injustice and the consequent loss of national self-respect and honor, beneath which are shielded and defended a people's safety and greatness.

Senators, we owe no debt of gratitude to England. We exist as a Nation, not because of her friendship but in spite of her hostility. If we owe her any expression of gratitude, it is that which liberty owes to tyranny for opportunity—the opportunity to wring from oppression a permanent separation and a glorious independence.

This bill is misnamed. It should be entitled, "A bill to exalt British commerce and destroy American shipping" or "A bill to expand the glory of the British Empire and humiliate the United States." Senators, when I think of the greatness of this Nation, of its vast natural resources, its plains and valleys golden with the harvests that feed the world, its tremendous commercial and industrial centers, its ore-ribbed mountains, and, above all, its mighty army of intelligent, liberty-loving people, and when I contemplate what its genius and its sacrifices have done for the enlightenment and happiness of mankind, I stand aghast at the proposal that we yield supine obedience to a monarchy beyond the sea.

Mr. President, it is useless to pretend that we are dealing with an economic question. The request to repeal was not based upon that ground. Disguise it as you will, the controversy rests upon international grounds. It has been charged that Congress and President Taft are guilty of a breach of faith. As a nation we are charged with breaking our word. Enact the repeal and you confess an act of deliberate national dishonor, because the act of 1912 was passed and President Taft approved it after the protest of Great Britain. If we were wrong in 1912 we should confess our shame and make restitution, but that we were right is established by the great weight of legal authority and the judgment of the Nation. And believing we were right the confession implied in the proposed repeal would expose us to the shame and reproach of the world. The canal was built for military and commercial purposes, and if we now surrender our sovereignty over its waters we may not be able to sustain our military rights in the future without a struggle. And the day may not be far distant when our necessities will compel us to declare to the world that our control of our own canal can not be challenged by any power.

No Senator questions the patriotism and high purposes of the President, but if legislation is to be made dependent upon his will alone, no one can predict the mischief to which such a precedent will expose this Government in future years. The welfare of one hundred millions of freemen can not be dependent upon the judgment of one man. For the making of the laws of the Nation Congress is responsible, and this responsibility can not be evaded. The fathers of the Republic wisely placed a limitation on the power of the Executive, and these limitations can not be disregarded without doing violence to the Constitution which we have all solemnly sworn to uphold.

We may not always have a President who will command in such a high degree the confidence which the American people repose in the present Executive. If the Congress of the United States is to vote blindly with regard to great public questions, trusting alone to the Executive, and acting on his judgment, whether right or wrong, we invite a danger which may involve this country in grave peril and which may at any time produce a national catastrophe.

Let me read to you a few lines from Woodrow Wilson, the publicist, in his Congressional Government, on page 233, speaking of the powers of the President:

> His only power of compelling compliance on the part of the Senate lies in his initiative in negotiation, which affords him a chance to get the country into such scrapes, so pledged in the view of the world to certain courses of action, that the Senate hesitates to bring about the appearance of dishonor which would follow its refusal to ratify the rash promises or to support the indiscreet threats of the Department of State.

Let us take heed of this admonition, and as patriots and Senators perform our duty as our own conscience and judgment dictate.

Mr. President, I believe that the passage of this bill compromises the dignity and honor of the country, and before the deed is consummated I enter my solemn protest against what I conceive to be a betrayal of the American people.

This question of tolls is but an incident in a great contest, now in its initial stage, which may determine the control of the Panama Canal for all time. The construction of the canal will rank among the world's wonders, but the opinion of mankind will pronounce the surrender of our sovereignty over it a colossal blunder and a triumph of British diplomacy.

Mr. BRISTOW. Mr. President, it is with hesitation that I address the Senate following the powerful speech which has just been made by the junior Senator from New York [Mr. O'GORMAN], an address which for unanswerable argument, close and compact reasoning, and lofty patriotism has not been excelled in this Chamber for many years. But I desire to invite the attention of the Senate for a short time to a layman's view of the bill which is pending.

All efforts to construct a canal from the Atlantic to the Pacific waters between the two Americas failed until the experience of the United States during the Spanish-American War demonstrated its necessity as a means of national defense as well as of commercial advantage. Then we determined to build the canal.

The first move was the making of a new treaty with Great Britain to supersede what was known as the Clayton-Bulwer treaty of 1850.

Why the United States should be required to obtain the consent of Great Britain before she could construct a canal across the Isthmus of Panama is a question that naturally comes to the mind of every patriotic American. The answer is that for centuries England has assumed a commercial dominion of the earth and requires other nations to get her consent to any important enterprises that might affect the world's commerce. Our Government was foolish enough in 1850 to accede to this presumption on the part of Great Britain and entered into a treaty by which, in substance, it was agreed that neither party would acquire control of a canal at Nicaragua nor obtain possession of territory for that purpose, but that in the event a canal was built both nations would defend it and protect its neutrality under certain agreed conditions and that it should be open to the use of the citizens of each upon exactly the same terms for all of their commerce. Subsequent events demonstrated that England never intended to construct the canal; she was evidently throwing out her lines for the future. While its construction by private capital only was contemplated in this treaty, the effect of the treaty was that if ever built under American supervision or by our Government England would help us defend it, and for such protection would be given the same rights as America in its use. To us in this day it appears that for our country this was a one-sided and indefensible treaty. It in fact provided a joint control of the canal and tied us hand and foot so far as any independent action was concerned. It was obtained by Great Britain at a time when our statesmen apparently were desirous of satisfying England and stopping her aggressions on this continent.

A NEW TREATY MADE.

After the Spanish-American War, when we had decided to construct the canal, it was claimed by some that for us to undertake to do so without the consent of Great Britain would be a violation of the Clayton-Bulwer treaty. Others insisted that the treaty was obsolete and had been frequently ignored by England and that we ought formally to declare it void and proceed to construct the canal upon our own motion. The result was, however, that Secretary Hay made a new treaty to supersede the existing one. Doubtless he thought this could be accomplished with less friction with England than to ignore or abrogate the old treaty.

The new treaty was entered into and ratified by both Governments in 1901. It provided in general that we could construct the canal and establish rules for its government, that it should be neutral, and all nations that complied with the rules which we prescribed should be treated equally in its use. The canal was begun and the work pushed with vigor and has been attended with extraordinary success. Two years ago such progress had been made that it was thought advisable for Congress to provide for its government and operation when opened. The Panama Canal act of August 24, 1912, was the result.

THE MONOPOLY OF TRAFFIC VIA PANAMA BY THE RAILROADS.

That bill was in the committee for weeks. Extensive hearings were held and every interest concerned was consulted. The greatest controversy before the committee was with the transcontinental railroads. Those railroads practically had controlled traffic by way of Panama since 1878—when there was in operation what was known as the transcontinental railway pool. This pool for a time paid the Panama Railway Co. approximately a million dollars a year for the privilege of controlling its rates between the eastern and western coasts of the United States. That was what these American railroads paid to suppress competition via Panama.

Upon the passage of the interstate-commerce act this pool became unlawful and it was discontinued. Then these railways resorted to another device to destroy Panama competition. The Southern Pacific acquired control of the Pacific Mail Steamship Co., and through that company, by various devices and intrigues which I will not take the time to relate, was able to force the Panama Railroad Co. to enter into an exclusive through billing arrangement with the Pacific Mail on all coast-to-coast trade, which effectively closed the Panama route to all competitors of the railroads. By various means the control of these rates has been maintained by the transcontinental railways down almost to the present time.

This throttling of isthmian traffic and competition by the railways has been a great burden to the commerce of large sections of our country. In order to maintain this commercial dominion the railways have crushed companies, firms, and individuals who have tried to operate vessels in competition with them. They have bottled up the harbors of cities and laid heavy commercial embargoes on communities. Their high-handed methods resulted in vigorous protest and finally led to the incorporation into the bill of a provision forbidding ships owned or controlled by the railroads from the use of the canal. The railroads thus seeing the dominion of the Panama route which they had so long enjoyed about to pass away from them fought the bill with dogged persistence and intense bitterness. Every device known to the ingenuity of professional lobbyists was employed to defeat those provisions that sought to free the commerce of the seas from their tyrannical grip. Their purpose was plain. The canal was about to become a great waterway to be used by ships free from their dominion, and genuine competition in transcontinental traffic was about to be realized by the American people. This the railroads were determined to prevent. They had destroyed effective water competition on all of our rivers and lakes. They had driven from the inland waterways of the country or whipped into submission every competing craft, and they were determined not to lose control of the Panama route after the canal was constructed. But, be it said to the honor of the American Congress, they failed. The provisions which they fought were retained in the bill, and the canal was freed from their stifling grip.

THE CANAL-TOLLS ACT INDORSED BY ALL PARTIES AND CANDIDATES.

It was ordained by the law to be a free and independent water highway. Railroad-owned and trust-controlled ships, those modern pirates of the sea, were barred from the use of the canal, and independent ships in our coastwise trade that compete with the railroads were given free passage. Defeated in Congress, the railroads then shifted their line of battle. They joined their English allies—the Canadian Pacific and the Mexican National Railway, which is operated by an English company—and moved on our Government through diplomatic channels. Great Britain was induced to protest against the bill, but her protest was met by Secretary Knox and Mr. Taft with patriotic firmness. They refused to accede to her demands and resisted her unwarranted assumption. The bill passed, was signed, and met the approval of the American people. It was accepted by all political parties. The Democratic national convention indorsed the policy by the following clear-cut and conclusive declaration in its platform. It said:

> We favor the exemption from tolls of American ships engaged in coastwise trade passing through the Panama Canal. We also favor legislation forbidding the use of the Panama Canal by ships owned or controlled by railroad carriers engaged in transportation competitive with the canal.

Mr. Wilson, the candidate for President nominated by that convention on that platform, in the campaign commended the policy. In a speech at Washington Park, N. J., to the farmers, August 25, 1912, he said:

> One of the great objects in cutting that great ditch across the Isthmus of Panama is to allow farmers who are near the Atlantic to ship to the Pacific by way of Atlantic ports; to allow all the farmers on what I may, standing here, call this part of the continent to find an outlet at ports of the Gulf or the ports of the Atlantic seaboard, and then have coastwise steamers carry their products down around through the canal and up the Pacific coast or down the coast of South America.
>
> Now, at present there are no ships to do that, and one of the bills pending—passed, I believe, yesterday by the Senate, as it had passed the House—provides for free tolls for American ships through that canal and prohibits any ship from passing through which is owned by any American railroad company. You see the object of that, don't you? We don't want the railroads to compete with themselves, because we understand that kind of competition. We want water carriage to compete with land carriage, so as to be perfectly sure that you are going to get better rates around the canal than you would across the continent. * * *
>
> Our platform is not molasses to catch flies. It means business. It means what it says. It is the utterance of earnest and honest men, who intend to do business along those lines and who are not waiting to see whether they can catch votes with those promises before they determine whether they are going to act upon them or not.

THE PRESIDENT'S CHANGE OF POLICY.

This declaration of the Democratic platform and the unequivocal indorsement from Mr. Wilson, the record that Mr. Taft, the Republican candidate for the Presidency, and his Secretary of State, Mr. Knox, had made, and Mr. Roosevelt's

well-known views on the subject gave those of us who had been fighting for freedom of transportation by way of the canal reason to believe that we had won for the people a substantial victory. However, the forces of evil never sleep. Greed is always alert. Avarice is relentless in its efforts. And right-thinking people who understood the significance of the fight that had been won were amazed when it was recently announced that President Wilson had changed front; that while he formerly had declared the canal act good, he now pronounced it bad; while he had been against the railway and English contention before the election, he was now favorable to it.

On March 5, 1914, he read a message to Congress, in which he said:

I have come to ask you for the repeal of that provision of the Panama Canal act of August 24, 1912, which exempts vessels engaged in the coastwise trade of the United States from payment of tolls, and to urge upon you the justice, the wisdom, and the large policy of such a repeal with the utmost earnestness of which I am capable.

* * * * * * *

We ought to reverse our action without raising the question whether we were right or wrong, and so once more deserve our reputation for generosity and for the redemption of every obligation without quibble or hesitation.

I ask this of you in support of the foreign policy of the administration. I shall not know how to deal with other matters of even greater delicacy and nearer consequence if you do not grant it to me in ungrudging measure.

Compare this utterance with the Democratic platform and Mr. Wilson's New Jersey speech, and then tell me what you think of the declaration of the President that "our platform is not molasses to catch flies. * * * It means what it says." Mr. Wilson now demands that Congress reverse its action, but does not say why he has changed his mind nor give us any reason why we should change ours. He says the law is a violation of the Hay-Pauncefote treaty, but it seems strange to us that his keen and analytical mind did not discover that before the election. Why should we accept this newborn opinion of Mr. Wilson without any reason assigned or argument produced?

THE TREATY OF 1815 AND ITS INTERPRETATION BY THE SUPREME COURT.

But, regardless of the vacillating views of the President, let us consider the language of the treaty and the construction that must be placed upon it in the light of history.

In 1815 the United States and Great Britain made a treaty, which, among other things, contained the following provision:

No higher or other duties or charges shall be imposed in any of the ports of the United States on British vessels than those payable in the same ports by vessels of the United States.

The construction of this language ordinarily would be that all vessels of the United States and of Great Britain should pay exactly the same port charges in United States ports. But the provision has never been so applied to the coastwise commerce of either country; that is, commerce between the ports of the United States and between the ports of Great Britain. Happily, the meaning of this provision of this treaty has been judicially determined by the Supreme Court of the United States. In 1895 the State of Texas passed a law exempting vessels engaged in the coasting trade of the United States from port charges. An English vessel claimed that such law infringed upon the treaty, and went into court. The case is known as Olsen versus Smith, and is found in One hundred and ninety-fifth United States Supreme Court Reports, page 332. It was heard and determined by the Supreme Court of the United States, and the decision was rendered by Mr. Justice White, now Chief Justice. In that decision Mr. Justice White said:

Neither the exemption of coastwise steam vessels from pilotage, resulting from the law of the United States, nor any lawful exemption of coastwise vessels created by the State law, concerns vessels in the foreign trade, and therefore any such exemptions do not operate to produce a discrimination against British vessels engaged in foreign trade and in favor of vessels of the United States in such trade.

That is, the Supreme Court decided that since our navigation laws do not permit any foreign ships to engage in coastwise commerce, the exemption of coastwise ships from port charges was not a violation of the treaty.

The result is that two ships—one American and one English—may leave Liverpool en route to New York and they sail into the harbor side by side; both pay the same harbor charges, and no discrimination can be made against the English ship and no favor can be extended to the American ship. But an American ship bound from Boston to New York can enter the harbor side by side with these two other ships, and the Boston ship is permitted to enter free from any port charges. Such is the interpretation of that treaty by the highest judicial authority in the land. The language contained in the treaty of 1815 was more specific and definite as to equal charges than is the language found in the Hay-Pauncefote treaty. England accepted this decision without protest; in fact, she herself for a hundred years had practiced the same discrimination in favor of her own vessels engaged in her coastwise commerce.

ARTICLE 3 OF THE HAY-PAUNCEFOTE TREATY.

Now, with that decision in force, and such being the uniform and universal practice of the nations, the diplomatic officers of the two Governments in 1901 entered into a treaty in regard to the construction of the Panama Canal. In article 3 of this treaty, which contains the subjects in controversy, certain stipulations were agreed upon and the following rules were adopted by us for the government of the canal:

ARTICLE 3.

The United States adopts as the basis of the neutralization of such ship canal the following rules, substantially as embodied in the convention of Constantinople, signed the 28th October, 1888, for the free navigation of the Suez Canal—that is to say:

1. The canal shall be free and open to the vessels of commerce and of war of all nations observing these rules, on terms of entire equality, so that there shall be no discrimination against any such nation, or its citizens or subjects, in respect of the conditions or charges of traffic or otherwise. Such conditions and charges of traffic shall be just and equitable.

2. The canal shall never be blockaded, nor shall any right of war be exercised nor any act of hostility be committed within it. The United States, however, shall be at liberty to maintain such military police along the canal as may be necessary to protect it against lawlessness and disorder.

3. Vessels of war of a belligerent shall not revictual nor take any stores in the canal except so far as may be strictly necessary, and the transit of such vessels through the canal shall be effected with the least possible delay, in accordance with the regulations in force, and with only such intermission as may result from the necessities of the service.

Prizes shall be in all respects subject to the same rules as vessels of war of the belligerents.

4. No belligerent shall embark or disembark troops, munitions of war, or warlike materials in the canal except in case of accidental hindrance of the transit, and in such case the transit shall be resumed with all possible dispatch.

5. The provisions of this article shall apply to waters adjacent to the canal, within 3 marine miles of either end. Vessels of war of a belligerent shall not remain in such waters longer than 24 hours at any one time, except in case of distress, and in such case shall depart as soon as possible; but a vessel of war of one belligerent shall not depart within 24 hours from the departure of a vessel of war of the other belligerent.

6. The plant, establishments, buildings, and all works necessary to the construction, maintenance, and operation of the canal shall be deemed to be part thereof, for the purpose of this treaty, and in time of war, as in time of peace, shall enjoy complete immunity from attack or injury by belligerents and from acts calculated to impair their usefulness as part of the canal.

These are the rules which we have adopted for the control of the canal. The United States is the proprietor, the owner, and operator of this great international highway, and in its management it has agreed to prescribe these rules and has assumed the responsibility of enforcing them. Let us consider the rules in detail. First, we agree that—

The canal shall be free and open to the vessels of commerce and of war of all nations observing these rules on terms of entire equality, so that there shall be no discrimination against any such nation or its citizens or subjects in respect of the conditions or charges of traffic or otherwise. Such conditions and charges of traffic shall be just and equitable.

England claims that the term "all nations" in this paragraph includes the United States itself, and that we have no right to pass our own ships engaged in domestic commerce, a traffic in which under our navigation laws the ships of no other nation can engage, through the canal for any less toll charges than are charged English ships engaged in any kind of commerce. If the same rule of construction is applied to this language that is applied to that of the treaty of 1815, it can not be held that the term includes our coastwise trade. That has been settled by our Supreme Court and accepted by Great Britain.

THE PHRASE "ALL NATIONS" DOES NOT INCLUDE THE UNITED STATES.

The reading of the rules demonstrates that by their nature the term "all nations" can not include the United States, but refers to all nations other than the United States, it being the proprietor who prescribes the rules for all of the nations to comply with; and it agrees that all who do comply with the rules so prescribed shall be treated with entire equality. A careful reading of the rules forces us to this conclusion. Let me repeat the first clause of rule 1:

The canal shall be free and open to the vessels of commerce and of war of all nations observing these rules on terms of entire equality.

This language applies to "vessels of war" as well as to "vessels of commerce"; both kinds of vessels are mentioned in the clause. If under this provision the vessels of commerce of all nations are to have the same privileges as those of the United States, then the vessels of war of all nations must be accorded the same treatment. Let us consider to what this construction will lead. If we were engaged in a war with Japan, if we accept the English interpretation of this treaty as Mr. Wilson asks us to do, it inevitably follows that we have agreed that Japan's battleships shall pass through the canal "on terms of entire equality" with our own; that they shall enjoy every privilege that our battleships enjoy. From the English point of view we have agreed in this treaty that the canal, which

has been constructed on American territory by American genius and paid for wholly by the American people, shall be used by the fleets of our enemies when seeking to attack us upon exactly the same terms as our own fleets. Does any sane man believe that the American people will tolerate such a policy?

Why have we made the great sacrifice necessary in the construction of the canal? Why have we poured into it hundreds of millions of the people's money and sacrificed the lives of some of our best citizens? Was this great sacrifice made to give our enemies a military advantage in attacking us in time of war? That is the inevitable result of England's claim, as she insists that we can enjoy no privilege that is not accorded to every other nation, though the other nations have not contributed a dollar nor made any sacrifices in its construction.

THE FORTIFICATION OF THE CANAL.

Let us consider the other rules that we have adopted, remembering that in interpreting rule 1, if the term "all nations" includes the United States, then the term must be applied to all of the other rules in the same way, for one rule is just as binding as another. The treaty specifically states that the nations using the canal shall observe not this rule but "these rules"—not one rule, but all of them—and then proceeds to set forth the "rules" that are to be observed. Rule 2 is as follows:

The canal shall never be blockaded, nor shall any right of war be exercised nor any act of hostility be committed within it. The United States, however, shall be at liberty to maintain such military police along the canal as may be necessary to protect it against lawlessness and disorder.

The English construction is that not only must the vessels of commerce and of war of all nations, including the United State, be permitted to use the canal upon "terms of entire equality," but that the United States can not blockade it nor exercise in connection with it any right of war. The rule provides that the canal shall never be blockaded, yet we are erecting at both ends of the canal probably the most powerful fortifications in the world. The guns that guard the Pacific entrance are protected by a breastwork of a thousand feet of solid granite, and these powerful engines of war can hurl seaward for a distance of more than 20 miles shells weighing over 2,000 pounds. When these fortifications are completed, if properly manned and handled, the combined navies of the world could not force an entrance into the Pacific mouth of the canal. The Atlantic defenses are no less powerful. Are these tremendous fortifications made under the provision which permits us to "maintain such military police along the canal as may be necessary to protect it against lawlessness and disorder"? Every intelligent human being knows that these fortifications are there to be used by us to protect the canal and exercise our dominion over it in times of war; to defend it against enemies and to protect our national rights. They are there for the purpose of enabling us to maintain its neutrality and to enforce the rules which we have adopted for its government. England has made no protest against these fortifications; she admits that they are necessary so that we can protect and defend the canal. Under this treaty we assume the entire responsibility for its defense, while under the former treaty, which this supersedes, England agreed to defend it jointly with us. While she admittedly is released from all responsibility of its defense, still she claims that she relinquishes none of her rights or privileges in its use.

Rule 3 reads as follows:

Vessels of war of a belligerent shall not revictual nor take any stores in the canal, except so far as may be strictly necessary; and the transit of such vessels through the canal shall be effected with the least possible delay in accordance with the regulations in force, and with only such intermission as may result from the necessities of the service.

Prizes shall be in all respects subject to the same rules as vessels of war of the belligerents.

If the English interpretation, which Mr. Wilson accepts, is correct, then the United States, if at war with any other country, could not revictual its warships in the canal or on its own territory adjacent to the canal. It could not take on stores, and its vessels would have to be passed through with the least possible delay. The very statement of the case demonstrates its absurdity.

RULE 4. No belligerent shall embark or disembark troops, munitions of war, or warlike materials in the canal, except in case of accidental hindrance of the transit, and in such case the transit shall be resumed with all possible dispatch.

That is, from the English point of view, we have agreed that we shall never embark or disembark troops, munitions of war, or warlike materials in the canal, except in case of accidental hindrance in the transit, and in such case the transit shall be resumed with all possible dispatch. If that is the correct interpretation, we are violating this provision of the treaty now, because we are continuously embarking and disembarking troops and munitions of war on canal-territory.

RULE 5. The provisions of this article shall apply to waters adjacent to the canal, within 3 marine miles of either end. Vessels of war of a belligerent shall not remain in such waters longer than 24 hours at any one time, except in case of distress, and in such case shall depart as soon as possible, but a vessel of war of one belligerent shall not depart within 24 hours from the departure of a vessel of war of the other belligerent.

That is, the English construction requires that if we were at war with Japan and a Japanese fleet should appear at Panama, we would by this treaty be compelled to allow it to pass through the canal unhindered; and if we had on the Atlantic side a powerful fleet, we have agreed to let the Japanese men-of-war have 24 hours' start en route to our Atlantic ports before our fleet shall follow them. If the English construction is right, then that is what we have pledged the nations of the earth that we will do. Of course it is absurd.

An analysis of these five rules demonstrates to any open mind that our Government would never have entered into such an agreement as is indicated by the English contention. If such an interpretation had been suggested to the American people when the proposition was before them for consideration, it would never have been ratified. The people would never have consented to the expenditure of such an enormous amount of money for its construction if they had known that they were to have no control over it when completed. This is the testimony of many Senators who were Members of the Senate when the treaty was approved.

Those rules by their very nature must apply to all nations other than the United States, and by them we have agreed to treat such nations with entire equality in the use of this canal; we have agreed to give none of them a preference over the others in time of peace or war. If France and England should be engaged in hostilities, English vessels and French vessels would enjoy exactly the same privileges in the use of the canal. If Japan and Germany were engaged in a war, we have agreed that Japanese and German vessels shall be treated with absolute equality. And we have also agreed that the merchant ships of all nations that are competing in the trade of the world shall be given exactly the same treatment as to charges, and so forth. These things we, as proprietor of the canal, have agreed to do. These rules we have agreed to maintain, and we are preparing to be able to enforce them.

THE INTERPRETATION OF COMMON SENSE.

The interpretation which I have indicated was put upon this treaty by Mr. Roosevelt, during whose administration it was agreed to and ratified. It has been so interpreted by President Taft, Mr. Roosevelt's successor, who was familiar with the events at the time. It has been so interpreted by Senator LODGE, of Massachusetts, who was the member of the Committee on Foreign Relations who reported the treaty to the Senate for ratification. It has been so interpreted by Secretary Knox, who was Attorney General under the administration of Mr. Roosevelt, and afterwards a Member of the Senate, and later Secretary of State under Mr. Taft. It is the interpretation that was put upon the treaty by both branches of the American Congress in the year 1912, when the present law was enacted. It is the interpretation put upon the treaty by the Democratic national convention, in which the present Secretary of State was a commanding figure. It is the interpretation put upon the treaty by the present President of the United States when he was a candidate for election. It is the interpretation of common sense, and it is the only interpretation consistent with patriotic Americanism.

By the Clayton-Bulwer treaty England assumed joint responsibility with us in the protection of the canal, and for such responsibility in the event that we constructed the canal she would have enjoyed equal rights with us in its use, though we would have provided all the money; she would have expended none.

The treaty was one-sided and very distasteful to the American people. It would have been abrogated if it had not been superseded. This England knows. Yet now she has the effrontery to claim that under the present treaty she has all the rights she had under that treaty and none of the responsibility. It certainly is an interesting proposition for the patriotic American to reflect upon when he is told that the Hay-Pauncefote treaty relieves England from all the responsibility for the defense of the canal which the Clayton-Bulwer treaty imposed, but forfeits to her none of the rights or privileges in its use. Such an astounding proposition is almost inconceivable, yet that is the English interpretation which Mr. Wilson asks us to accept.

THE ECONOMIC ASPECT INCIDENTAL.

I shall not discuss at length the economic question, because in this controversy it is only incidental. The great issue here

is our sovereignty over this canal, which will cost us $400,000,000, and is of vital importance to our national defense.

In the enactment of the existing law Congress has applied the same rule to the canal that it applies to all other domestic waterways. We have expended more than $700,000,000 on the improvement of our waterways and harbors. This vast sum has been spent for the aid of navigation and commerce. Of this amount approximately $300,000,000 has been expended on the Mississippi River and its tributaries. Millions have been spent upon canals. About 200 locks on our canals and rivers are now being operated by the Government, and hundreds of officers and men are being employed on that work. Yet not a dollar is charged American coasting vessels for the use of canals, rivers, or harbors.

American vessels engaged in the coastwise trade sail upon our rivers and pass through all of our canals free of tolls. They are permitted to enter every harbor in the United States without the payment of port charges. That has been our national policy. Whether we should change it or not is a proper question for the consideration of Congress. But there is no justification in changing that policy for the Panama Canal only because it is to be a real competitor with the transcontinental railways. The law of 1912 makes no distinction between the Panama Canal and the other canals which the Government has constructed and operates. It applies the same rule to Panama that is applied to all others. It is claimed by some that we should now change our policy, so far Panama is concerned; and they allege that this exemption of tolls is a subsidy to American ships and is only beneficial to a trust. This statement is made because our navigation laws require all vessels engaged in the coastwise trade to be built in American shipyards and manned and operated by American seamen. These provisions of the law therefore cut out of our domestic commerce foreign ships and give the business exclusively to Americans. However, they give no man or set of men a monopoly, because the field is open to all American citizens. You might as well say that officeholding in the United States is in the hands of a trust, because only American citizens are allowed to hold office.

The argument that free tolls benefits a trust can have no valid effect, however, because the law which it is sought to change makes it impossible for a trust to profit by free tolls, as it specifically provides that neither trust-controlled nor railroad-owned ships shall be permitted to use the canal. This waterway is the only one in the United States that is by law made free from monopoly, yet it is now proposed to tax its use while traffic on all others goes free. The fact is that there is no monopoly of coastwise trade, and all well-informed people know it. But if there were, its very existence would bar it from profiting by the use of the canal, because under the terms of the law its ships could not use it. The law provides that—

> No vessel permitted to engage in the coastwise or foreign trade of the United States shall be permitted to enter or pass through said canal if such ship is owned, chartered, operated, or controlled by any person or company which is doing business in violation of the provisions of the act of Congress approved July 2, 1890, entitled "An act to protect trade and commerce against unlawful restraints and monopolies."

The allegation of the "repealers" that free tolls benefits only a trust or monopoly is not an honest argument. The truth is that if railroad-owned and trust-controlled ships had not been barred from the canal we would never have had this repeal bill before us. That is where the shoe pinches, and that is where this controversy started. This ingenious and dishonest argument has been used by designing men to confuse the public mind and cover up the real purpose of this bill, and many sincere and patriotic people have been misled by their declarations.

OF ADVANTAGE TO THE FARMING INTERESTS.

As I have said, I shall not discuss at length the economic advantages of free tolls, because that is not the vital question. However, I will say in passing that the tollgate is a relic of the past, and it will never be restored upon American highways nor will it ever be permanently established on any American waterway. To anyone who will study the question, there is conclusive evidence that free tolls would be of inestimable advantage to all of the people, especially those engaged in agricultural pursuits, not only on the Pacific coast but from the foothills of the Rocky Mountains to the Atlantic seaboard. The greatest necessity of our vast farming region to-day is cheap transportation for its products, and the canal, if free, will become a powerful factor in bringing that about. Excessive freight rates is to-day the heaviest burden upon the farmers of the Middle West. In this era of free trade for farm products our own markets are open to the foreign farmer at cheaper freight rates than those charged our own people, and I will further suggest that it seems to me if this administration was as much interested in preserving and enlarging the markets for the American farmer as it seems to be in preserving and increasing the freight rates for the railroads, it would be rendering the country a far more valuable service. But I will not at this time pursue that branch of the subject further. Let the law stand as it now is, and if later we need the revenue that could be obtained by taxing our domestic commerce, then we can easily provide a system of tonnage tax via Panama and on all of our waterways so as to obtain the revenue desired. For the present it is not necessary.

The important question now is not "Shall we exempt coastwise commerce from tolls?" but "Have we the right to control our own canal constructed on our own soil with our own money?" Why does Great Britain complain of the exemption of tolls at Panama, while she has never complained of the exemption of port charges on coastwise vessels in American ports? Evidently because she has domestic ports and vessels of her own which she desires to favor and which she has favored for over a century, and she can not claim the right to favor her own vessels engaged in domestic trade in her ports and at the same time object to us favoring our vessels when engaged in domestic trade in our ports. However, she does not own an isthmian canal and we do, and she can claim the right to use our canal without danger of having to yield a similar privilege to us, so she insists that she has the same rights in the use of that canal which we have, though she has not expended a cent in its construction nor has she any responsibility as to its maintenance and defense. England owns about half the merchant vessels that sail the seas. She will therefore use this great waterway as much as all other nations. She is the greatest world empire; the sun never sets upon her widely extended dominions. These vast possessions that reach every quarter of the earth are bound together by commercial routes and business ties. Her ships mark out the paths of ocean commerce. This canal which we have built brings her in closer touch with all her enormous world-wide interests. It benefits her more than all the remainder of Europe. In its construction we have rendered her the greatest service ever rendered to one nation by another in the commercial history of the world, and this has been done without price or reward. Commercially, the canal will be of far greater advantage to her than to us. Probably five times as many English as American vessels will pass through it. In the face of this condition it certainly is an astounding proposition for England to ask us to incur all of the risk, bear all the burden of construction with the attendant dangers of failure, take all the chances of inadequate revenues for maintenance, make up the deficiencies, if any occur, from our Treasury, and then give her all the advantages in every detail that we have in the use of the canal. Yet that is what England asks, and Mr. Wilson proposes that we shall give it to her, "right or wrong," because she asks it. We have constructed the canal at our own expense on territory which we acquired and paid for, but she says, "You have no rights that I can not enjoy equally with you. 'Tis true you pay the bills—but I enjoy the fruits." And to add to the hilarity of the occasion the American ambassador at the English court in a public address recently declared that it gave us great pleasure to realize that this canal was to be of far greater benefit to England than to ourselves, which statement we are told was vociferously cheered by his English audience. Search the pages of modern history if you will, and where can another such illustration of nerve and burlesque be found? I have no unfriendly feeling toward the people of Great Britain. England was the home of my ancestors. I want our Nation to have the most cordial relations with the British Empire, but we owe a duty to our own country and her people that is superior to that of any other country on the earth. Let me ask in this connection, Why should we make such great national sacrifice for English welfare and profit? Has she ever endeared herself to us by acts of national generosity?

While thousands of the English people have always been friendly to this Republic, yet the Government of Great Britain has never found our country in a critical position but that she showed an unfriendly attitude. To win our national existence we had to defeat her armies; to establish our commercial freedom on the seas, we had to sink her ships of war; to maintain our national unity, we had to defend ourselves against her dishonorable diplomatic intrigues and the violations of her treaties; to protect the rights of our fishermen on the Atlantic waters, we were compelled to sacrifice an empire in the Northwest that was ours by every right. She has been our enemy in every hour of need, and never once since the Revolutionary patriots shed their blood at Bunker Hill has she not rejoiced when misfortune befell us. But never has the audacity of her selfishness been more manifest than at the present time, and unfortunately for this country we are represented at the British court by an

ambassador who, in his eagerness to obtain English smiles and flattery, apparently forgets the interests of his own country. Indeed, it seems to me that the present administration in its anxiety to please the foreigner is too willing to sacrifice the interests of our own people. It has opened up the home market of the American farmer to his foreign competitor; it now proposes practically to surrender the sovereignty of the canal to Great Britain without compensation; and, as the crowning act of this policy, it recommends that with humble apology we contribute twenty-five millions of the money of our own people to soothe the feelings of the political adventurers now in control of the Colombian Government.

ENGLAND PRACTICALLY CONCEDED OUR RIGHT.

The preposterous claim of Great Britain was rejected by Secretary Knox, and the right of the United States to exempt her coastwise vessels from tolls was practically admitted by Mr. Mitchell Innes, in charge of the British diplomatic office in Washington, in a letter, under date of July 8, 1912, in which he says:

> As to the proposal that exemption shall be given to vessels engaged in the coastwise trade, a more difficult question arises. If the trade should be so regulated as to make it certain that only bona fide coastwise traffic which is reserved for United States vessels would be benefited by this exemption it may be that no objection could be taken.

By this statement the English Government practically conceded the point at issue, and if certain Americans had not at that time rushed to her aid against their own Government, this controversy would not be now before the American Congress. Unfortunately, after this concession had been suggested by the English representatives; after this diplomatic victory had practically been won by Mr. Taft and Mr. Knox, and American sovereignty established, the senior Senator from New York [Mr. ROOT] made a vehement speech in the Senate in behalf of the English claim. Then began one of the most systematic efforts to develop a false American public opinion that has ever been made in the history of the United States.

This speech of Mr. ROOT, as well as other literature upon the English side was circulated by the hundreds of thousands and millions, and paid for out of the funds of the Carnegie Peace Foundation Association, an organization endowed by Andrew Carnegie. Thousands of dollars have been expended in disseminating this English view throughout the country and misleading public opinion. This campaign has been ingeniously carried on. This literature has been distributed to hundreds of thousands of teachers, professors in colleges, ministers, lawyers, and other professional men in a most insidious and skillful way. These thoughtful men and women, receiving but the one side of the argument, have been led to believe, in many instances, that we have been guilty of a wrong to Great Britain; that we have violated a sacred promise and obligation; that we have done a dishonorable act. This association, alleged to be organized for the promotion of peace, has used its enormous resources to slander its own Government and stir up strife in its own country. I have been advised that the Secretary of State, Mr. Knox, felt keenly this unwarranted interference when the negotiations between the two countries were in progress, and I am told that he believes that had it not been for such interference the incident would long since have been closed to the satisfaction of both nations, barring, of course, the selfish interests of the transcontinental railroads in the controversy. England quickly took advantage of her powerful American allies, and as a result we have this bill before us now. In all her diplomatic history, as varied and questionable as it has been, she probably has never won such a unique and surprising victory. And the American Republic, as weak and ineffective as has been her diplomacy, probably in all her disappointments has never experienced such a humiliating episode.

THE GREATEST ACHIEVEMENT OF THE CENTURY.

Senators, we are about to complete the construction of a canal severing the two American continents. It has been the dream of three centuries. Its accomplishment is the greatest achievement of the kind in the history of the human race. It has been worked out in a climate the most deadly in which white men have ever toiled. Others have tried and failed. France strove desperately for success. She searched the recesses of the earth for men who could withstand the deadliness of the climate, but all of her efforts ended in failure. Three out of four of the men who had been employed by her on this work were killed by climatic diseases. Yellow fever was a scourge, and malignant malaria was no less fatal. But through the genius, the patriotic industry, and the inflexible determination of the Medical Corps of the United States Army we conquered the climate itself and made Panama as healthy as Washington. This, the greatest engineering achievement of history, has been wrought by American engineers and accomplished by American genius. Some of our best men have given their lives to this mighty task, and now after these heroic sacrifices, which stir the patriotic ardor of every loyal American, are we to yield our sovereignty over its waters? Others may answer this question as they will, but for me I say, Never while the story of Bunker Hill is a cherished memory or the Mississippi River is an American possession. The canal is ours, the product of our industry and genius. Built with the hundreds of millions cheerfully contributed by our people, it is dedicated by us to the service of mankind upon terms that are just, but which we must prescribe independently of the coercive influence of any other nation. Let us not now blot the history of this heroic achievement by an act of subserviency to English arrogance or American greed. But let us stand upon our proprietary rights as the builder of the canal and invite the nations of the earth to profit by its use, pledging equal, just, and fair treatment to all, the weak as well as the strong.

Mr. O'GORMAN. I ask that the canal-tolls bill be temporarily laid aside.

The VICE PRESIDENT. Without objection, that will be done.

MIRICK BURGESS.

Mr. KERN. I move that the Senate proceed to the consideration of executive business.

Mr. GALLINGER. Will the Senator withhold the motion a moment?

Mr. KERN. I withhold the motion.

Mr. GALLINGER. I desire to ask unanimous consent for the consideration of the bill (S. 5065) to correct the military record of Mirick Burgess. It will take but a moment, and if it leads to debate I will withdraw it.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill had been reported from the Committee on Military Affairs with an amendment, to strike out all after the enacting clause and insert:

> That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers, Mirick Burgess, who was a private of Company I, Third Regiment New Hampshire Volunteer Infantry, and of Company H, Twelfth Regiment United States Infantry, shall hereafter be held and considered to have been discharged honorably from the military service of the United States as a member of the last-named company and regiment on March 28, 1863: *Provided*, That no pay nor bounty shall accrue or become payable by reason of the passage of this act.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill for the relief of Mirick Burgess."

CODIFICATION OF MINING LAWS.

Mr. SMOOT. I ask unanimous consent for the present consideration of Senate bill 4373, to provide for a commission to codify and suggest amendments to the general mining laws. I will say to the Senator from Indiana that if it leads to any discussion at all I will withdraw the request.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill had been reported from the Committee on Mines and Mining with amendments.

The first amendment was, on page 1, line 3, after the word "shall," to insert "nominate and, by and with the advice and consent of the Senate," and in line 5, after the word "members," to strike out "one of whom shall have had practical experience in the operation of mines, one a lawyer of experience in the practice of mining law, and the third a member of the United States Geological Survey," and insert "two of whom shall be lawyers of large experience in the practice of mining law and one a mining engineer who shall have had practical experience in the operation of mines," so as to make the section read:

> That the President shall nominate and, by and with the advice and consent of the Senate, appoint a commission of three members, two of whom shall be lawyers of large experience in the practice of mining law and one a mining engineer who shall have had practical experience in the operation of mines.

The amendment was agreed to.

The next amendment was, in section 2, page 2, line 8, after the word "laws," to strike out "*Provided*, That said code shall not deal with lands containing deposits of coal, oil, gas, phosphates, or soluble potassium salts," so as to make the section read:

> SEC. 2. That it shall be the duty of the commission so appointed to prepare for the information and use of the President and Congress a

tentative code of laws providing for the location, development, and disposition of mineral lands and mining rights in the lands of the United States, including the Territory of Alaska, as in the opinion of the commission are best adapted to existing conditions and will correct defects or supply deficiencies in existing general mining laws.

The amendment was agreed to.

The next amendment was, in section 3, page 2, line 15, after the word "desirable," to strike out "amendment" and insert "amendments," so as to make the section read:

SEC. 3. That the commission shall hold public hearings in the principal mining centers in the western United States and Alaska; invite and receive suggestions and opinions bearing upon or relating to existing mining laws or desirable amendments thereof; and may also consider the laws and experience of other countries with respect to disposition and development of mines and minerals.

The amendment was agreed to.

The next amendment was, in section 4, page 2, line 21, before the word "shall," to strike out "That on or before the 1st day of January, 1915, the commission" and insert "That within one year after the passage of this act, at which time the said commission shall expire, it"; and in line 24, before the word "tentative," to strike out "fully drafted," so as to make the section read:

SEC. 4. That within one year after the passage of this act, at which time the said commission shall expire, it shall submit to the President full report as to its operations, conclusions, and recommendations, including in or transmitting with said report a tentative code of mineral laws, as provided in section two hereof, and within 30 days from receipt thereof the President shall transmit the same to Congress with his recommendations.

The amendment was agreed to.

The next amendment was, in section 5, page 3, line 3, after the word "commissioners," to strike out "not in the Federal service," so as to make the section read:

SEC. 5. That each of said commissioners shall receive a salary of $500 per month, and for the payment thereof and of the actual and necessary expenses of the commission, including traveling expenses, the sum of $25,000, or so much thereof as may be necessary, is hereby appropriated out of any money in the Treasury not otherwise appropriated.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

GEORGE P. CHANDLER.

Mr. HITCHCOCK. I ask unanimous consent for the present consideration of the bill (S. 1703) for the relief of George P. Chandler.

The VICE PRESIDENT. Is there objection? The Secretary will read the bill.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It provides that in the administration of the pension laws George P. Chandler, who was a private of Company F, One hundred and ninety-first Regiment Pennsylvania Infantry Volunteers, shall hereafter be held and considered to have been discharged honorably from the military service of the United States as a member of said company and regiment on the 27th day of September, 1864. But no pension shall accrue prior to the passage of this act.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

POSTAL SAVINGS-BANK FUNDS.

Mr. KERN obtained the floor.

Mr. BRYAN. Mr. President——

Mr. KERN. I yield to the Senator from Florida.

Mr. BRYAN. I ask unanimous consent to take up the bill (H. R. 7967) to amend the act approved July 25, 1910, authorizing a Postal Savings System. I understand there is to be no further debate upon the bill. I have expected to get it up to-day and get it out of the way one way or the other. The Senator from New Hampshire [Mr. GALLINGER] was absent when the bill was last before the Senate. I apprehend that he does not desire to discuss it, and, so far as I know, no one else does. I should like to get the bill passed in whatever shape the Senate determines upon, so that it may get into conference and whatever legislation we propose to enact on the subject may be out of the way.

Mr. SMOOT. I will say to the Senator that I have no objection at all, but the Senator from Massachusetts [Mr. WEEKS], who is not in the Chamber, I understand desires to offer an amendment. For my own part, I would not object at all to the consideration of the bill at this time.

Mr. BRYAN. It was understood yesterday that the chairman of the Committee on Agriculture and Forestry, who has in charge the Agricultural appropriation bill, would not call it up to-day, and I think it was pretty well known that as soon as the speeches were delivered, for which notices had been given on the calendar, we would then take up the postal savings-bank bill.

Mr. SMOOT. I was not aware of that, and I suppose there may be Senators not now here who were not aware of it. Really I think we ought to try to get the Senators here who have signified their intention to offer amendments to the bill before its final passage.

Mr. BRYAN. The Senator will have time to do that.

Mr. SMOOT. Not if the bill is to be passed this afternoon.

Mr. BRYAN. I do not know, of course, where the Senator from Massachusetts is. I do not know where he has gone.

Mr. GALLINGER. Mr. President, I have offered an amendment to the bill.

Mr. BRYAN. That is the amendment which is pending.

Mr. GALLINGER. I am quite willing, so far as I am concerned, to have a vote taken upon that amendment at any time. I have no disposition to delay the bill. I hope my amendment will be agreed to. At any rate I will take my chances. But the Senators from Massachusetts are greatly interested in the bill, and I really think they ought to be present when it is considered. However, I do not speak for either of the Senators from Massachusetts except to make this suggestion.

Mr. BRYAN. I will say to the Senator from New Hampshire that both the Senators from Massachusetts have discussed the bill, and I notified the junior Senator from Massachusetts that at any opportunity which would occur I would call it up and he placed no objection in the way of the consideration of the bill whenever it could be reached.

Mr. NORRIS. Does the Senator expect to dispose of the bill this afternoon?

Mr. BRYAN. Yes; that is what I had hoped to do.

Mr. NORRIS. I should like to say to the Senator that I have no disposition to delay it and would just as leave go ahead with it now as at any time; but I have an amendment that I am going to offer as soon as the pending amendment is out of the way, and that amendment will probably bring on some debate. I anticipate that there will be some discussion upon the amendment, although, as far as I am personally concerned, I am just as willing to take it up now as at any other time.

Mr. KERN. The only difficulty I see about an immediate vote is that several Senators were informed there would be an executive session immediately upon the conclusion of the speeches which were to be made to-day. Whether any of those gentlemen desire to be present when the bill is considered I do not know.

Mr. GALLINGER. I will appeal to the Senator from Florida, who is always fair-minded, that those of us who desire to amend the bill, if he will allow it to go over, will assist him in getting early consideration.

Mr. BRYAN. Very well, Mr. President; but I want to give a general notice now that I shall expect to ask that the bill be taken up at any and every opportunity that may offer.

Mr. GALLINGER. I think it is proper the Senator should give that notice.

Mr. BRYAN. I withdraw the request for the present.

EXECUTIVE SESSION.

Mr. KERN. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 8 minutes spent in executive session the doors were reopened and (at 5 o'clock and 10 minutes p. m.) the Senate adjourned until to-morrow, Friday, May 8, 1914, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate May 7, 1914.

PROMOTIONS AND APPOINTMENT IN THE NAVY.

Lieut. Commander Frank H. Brumby to be a commander in the Navy from the 9th day of April, 1914.

Lieut. Frank R. McCrary to be a lieutenant commander in the Navy from the 5th day of March, 1914.

Ensign Kinchen L. Hill to be a lieutenant (junior grade) in the Navy from the 6th day of June, 1913.

Lieut. (Junior Grade) Weyman P. Beehler to be a lieutenant in the Navy from the 22d day of February, 1914.

Asst. Naval Constructor Roy W. Ryden to be a naval constructor in the Navy from the 30th day of April, 1914.

Asst. Naval Constructor Waldo P. Druley to be a naval constructor in the Navy from the 30th day of April, 1914.

William McKinney, a citizen of Kansas, to be an assistant surgeon in the Medical Reserve Corps of the Navy from the 1st day of May, 1914.

CONFIRMATIONS.

Executive nominations confirmed by the Senate May 7, 1914.

COLLECTORS OF INTERNAL REVENUE.

Edward D. McCabe to be collector of internal revenue for the fifth district of Illinois.

Julius F. Smietanka to be collector of internal revenue for the first district of Illinois.

UNITED STATES MARSHAL.

Christopher C. Gewin to be United States marshal for the southern district of Alabama.

PROMOTIONS IN THE NAVY.

ASSISTANT NAVAL CONSTRUCTORS.

Walter W. Webster.
Beirne S. Bullard.
Ernest L. Patch.

POSTMASTERS.

CONNECTICUT.

Andrew Leary, South Norwalk.

KANSAS.

L. L. O'Meara, Onaga.

KENTUCKY.

James D. Via, Clinton.
Frank K. Wylie, Princeton.

MONTANA.

Clemens H. Fortman, Helena.

NORTH CAROLINA.

James D. Babb, Murfreesboro.

OHIO.

William J. Murphy, Cleveland.

SOUTH DAKOTA.

George M. Barnett, Carthage.

TEXAS.

J. J. Evans, Bloomington.

HOUSE OF REPRESENTATIVES.

THURSDAY, *May 7, 1914.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

We bless Thee, infinite Spirit, our heavenly Father, for that germ of divinity which Thou didst implant in the heart of man which makes him a living soul and which has ever been pushing him out of darkness into light, out of ignorance into knowledge, out of error into truth, out of the animal into the spiritual; the earnest which promises victory for all who strive for the mastery under the spiritual leadership of Thy Son Jesus Christ. Amen.

The Journal of the proceedings of yesterday were read and approved.

CONTESTED-ELECTION CASE—GILL V. DYER.

Mr. GOLDFOGLE. Mr. Speaker, by direction of the Committee on Elections No. 3, I present a report (No. 629) in the case of Michael J. Gill versus L. C. Dyer, from the twelfth district of the State of Missouri. There was an understanding that the minority should have leave to present and file its views, and I should like to ask the gentleman from Illinois [Mr. MCKENZIE], the ranking member of the minority, whether he is prepared to file the minority views.

Mr. McKENZIE. Mr. Speaker, I will say to the gentleman from New York that we are not prepared, and I had the impression that when the majority report was filed that we then should have an understanding as to the number of days to which we would be entitled in which to prepare the minority views.

The SPEAKER. How many days does the gentleman wish?

Mr. McKENZIE. I would like to have 10 days, Mr. Speaker.

Mr. RUPLEY. Mr. Speaker, I would like to interrogate the gentleman from Illinois [Mr. MCKENZIE]. Do you recollect that at the last meeting of the Election Committee No. 3 you requested time in which to prepare minority views?

Mr. McKENZIE. Yes, sir.

Mr. RUPLEY. Was that not more than 20 days ago?

Mr. McKENZIE. As I remember it, I said at that time that I would desire at least a week's time in which to prepare the minority views.

Mr. RUPLEY. The thought of your fellow committeemen at the time was that during that interim the minority on that committee were to prepare the minority views and file them with the majority report at an early date in the House of Representatives.

Mr. McKENZIE. Is the gentleman speaking for the Republicans on that committee or for himself?

Mr. RUPLEY. I am speaking in answer and responsive to the declarations of the members of the minority on that committee at the time of our last committee meeting.

Mr. McKENZIE. I will say, Mr. Speaker, that the gentleman is not expressing my views nor my intention, and neither can he speak for me.

The SPEAKER. What the Chair wants to find out is how much time the gentleman desires, so that the Chair may put the question.

Mr. McKENZIE. I would like to have 10 days, Mr. Speaker.

The SPEAKER. The gentleman from Illinois [Mr. MCKENZIE] asks for 10 days in which to file the views of the minority in the case of Gill versus Dyer. Is there objection?

Mr. GOLDFOGLE. Mr. Speaker, reserving the right to object, I should like to ask the gentleman from Illinois [Mr. MCKENZIE] whether, in view of the attitude of the committee and of the expressed desire on the part of a number of the committee to bring this matter to an early conclusion, 8 days might not suffice, or 7 days?

Mr. McKENZIE. The chairman of the committee has been very gentlemanly in this matter; if satisfactory to him, I will try to do that in order to hasten this case along.

The SPEAKER. The gentleman from Illinois [Mr. MCKENZIE] asks for 8 days in which to file the views of the minority in the case of Gill versus Dyer. Is there objection?

Mr. BUCHANAN of Illinois. Mr. Speaker, reserving the right to object, I would like to ask the chairman of the committee about how much time will be taken to consider this report?

Mr. GOLDFOGLE. That is quite difficult to answer. I would, however, answer the gentleman from Illinois by saying, as I said here yesterday, that the testimony in the case is very voluminous. There are a number of questions of law arising, and that have been so far disposed of by the committee. The briefs were quite voluminous, and, of course, I am quite unable to answer the gentleman from Illinois as to the precise time it will take to dispose of the matter on the floor.

Mr. BUCHANAN of Illinois. I would like to ask my colleague if he could not prepare this minority report in about four days? Four days is a great deal of time at this period of the Congress, and probably after that we will have more important legislation before the House. It seems, due to the fact that delay has been so great in regard to this report, that four days ought to be sufficient.

Mr. MANN. Mr. Speaker, would the gentleman from Illinois [Mr. BUCHANAN], my colleague, permit me to make a suggestion? It has always been the custom of the House that the minority be given a reasonable time in election cases in which to file their views after the majority report has been presented to the House. Sometimes they have had two or three weeks. I think this is a very limited time proposed in comparison with the precedents heretofore.

Mr. BUCHANAN of Illinois. I do not want to be unreasonable, but I would like to see the work that is before the House expedited as much as possible.

Mr. UNDERWOOD. Will the gentleman from New York yield?

Mr. GOLDFOGLE. With pleasure.

Mr. UNDERWOOD. I think in the case where the right of a Member to a seat in this House was involved it has always been customary to allow the minority a reasonable time in which to present its views, and, with the pressure of other business, I do not see where it is going to be possible for the gentleman from Illinois [Mr. MCKENZIE] to get that report ready before 10 days, and I can not see any reason why the gentleman's request should not be granted, that his side of the House may have a full opportunity to present their views properly.

Mr. GOLDFOGLE. Mr. Speaker, I want to say that I thoroughly agree with the gentleman from Alabama [Mr. UNDERWOOD]. No one is more conscious than I of the difficulty that presented itself throughout this entire case in reaching a final conclusion; and, as the gentleman from Alabama very properly observed, in the case of a sitting Member it is customary to afford a reasonable time to prepare minority views. It is but fair that such opportunity be given him. It is true the gentle-

man from Illinois [Mr. McKENZIE] had a copy of the committee print of this report, but I can well understand the difficulty that possibly attends the preparation of the minority report. There was considerable difficulty in the preparation of the majority report.

The SPEAKER. Is there objection to the request of the gentleman from Illinois [Mr. McKENZIE], that he be permitted 8 days in which to file the views of the minority in the case of Gill versus Dyer?

Mr. BUCHANAN of Illinois. I have no objection.

The SPEAKER. The Chair hears no objection.

Mr. DONOVAN. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman from Connecticut rise?

Mr. DONOVAN. I reserve the right to object in order to ask the chairman of the committee a question. I would like to ask him when the majority came to a conclusion? How long ago was it?

Mr. GOLDFOGLE. I understand the matter has been disposed of, Mr. Speaker, so far as giving the minority the right to file their views is concerned.

The SPEAKER. Oh, no. The Chair tries to be fair about these things. The gentleman from Connecticut [Mr. DONOVAN] was on his feet claiming recognition.

Mr. GOLDFOGLE. Certainly.

The SPEAKER. Does the gentleman intend to answer the question of the gentleman from Connecticut [Mr. DONOVAN]?

Mr. DONOVAN. How long ago did they come to a conclusion?

Mr. GOLDFOGLE. The gentleman means how long ago they agreed upon the report?

Mr. DONOVAN. Yes.

Mr. GOLDFOGLE. Why the report was agreed upon, as nearly as memory serves me, a little over a fortnight ago. The understanding was that the report should be in print and sent to the different Members before submission. Our understanding was carried out.

Mr. DONOVAN. Was it not more than six weeks ago?

Mr. GOLDFOGLE. No.

Mr. RUPLEY. Mr. Speaker——

Mr. DONOVAN. You have had this nearly 14 months in your possession. Have you not found it out in 14 months?

Mr. GOLDFOGLE. No, Mr. Speaker. The gentleman is in error about the time the committee reached its conclusion and determined on the form of the report.

The SPEAKER. Does the gentleman from Pennsylvania [Mr. RUPLEY] desire recognition?

Mr. RUPLEY. Yes, Mr. Speaker. Reserving the right to object, in answer to the inquiry of the gentleman from Connecticut [Mr. DONOVAN], I desire to state that the committee reached a definite conclusion on the 13th of April, and after many hearings; and at this time the minority Members promised, as I understood, and agreed within a very short time to prepare a minority report. But now nearly a month has passed and nearly three weeks since the report of the majority was prepared and more than 10 days since that report was printed.

The SPEAKER. Is the gentleman seeking to object to the minority having the right to file a report here in the contested-election case?

Mr. RUPLEY. I do not object to the minority having the right to file a report, but I do object to any delay in this case, because we have decided that the electors of the twelfth district of Missouri have elected Michael J. Gill as their Representative, and that district has been represented for about 14 months by one who we have declared by a large vote in the committee was not elected by the electors of the twelfth Missouri district.

The SPEAKER. Is there objection to the request of the gentleman from Illinois [Mr. McKENZIE] that the minority shall have 8 days in which to file their views in the contested election case of Gill against Dyer? [After a pause.] The Chair hears none.

Now, the Chair wants to make a remark himself. From now on he is going to exercise whatever authority he has in recognition to crowd through the appropriation bills and the other necessary business of this House. [Applause.]

Mr. GOLDFOGLE. Mr. Speaker, I would like to ask the gentleman from Illinois [Mr. McKENZIE] whether he has any objection to setting down the consideration of this election case for the 20th of this month?

Mr. UNDERWOOD. Mr. Speaker, I would like to ask the gentleman from New York [Mr. GOLDFOGLE] to withhold his request. This is a privileged matter, and when the time comes of course it will be taken up and disposed of.

Mr. FITZGERALD. And it would delay Calendar Wednesday. [Laughter.]

Mr. GOLDFOGLE. Mr. Speaker, I accede to the request of the gentleman from Alabama [Mr. UNDERWOOD].

AMERICAN REFUGEES FROM MEXICO.

Mr. MURRAY of Oklahoma. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the treatment and condition of the refugees from Tampico, Mexico, by printing a letter written me by I. K. Berry, an orange and pineapple farmer of Tampico, but formerly a citizen of Oklahoma, a brother of Col. G. M. Berry, a very prominent citizen of Pawnee, Okla., and one of the strong members of the constitutional convention of our State.

The SPEAKER. The gentleman from Oklahoma [Mr. MURRAY] asks unanimous consent to insert in the RECORD a letter from one of his constituents, who is a refugee from Mexico. Is there objection.

There was no objection.

Mr. MURRAY of Oklahoma. The statement of the conditions and treatment of these refugees constitutes a very grave and sad incident, and one which I feel should not be condoned, excused, or extenuated, because it may affect the future protection of American citizens, their homes, and property in foreign lands.

The letter written me and the information sent is as follows:

GALVESTON, TEX., *May 4, 1914.*

Hon. W. P. MURRAY.

DEAR SIR: I have been a citizen of Oklahoma since 1875 until last January two years ago. I am a brother of G. M. Berry, who was in the constitutional convention with you at Pawnee, Okla. I went to Tampico, Mexico, and invested everything I had in an orange, pineapple, and fruit farm just 1 mile from the center of Tampico. From December 10 to the 13th the fight between the rebels and federals shot through my house and orchard and did me a great deal of damage, federals taking my horses and stock away from me after the fight was over. But on February 5 following, the Huerta soldiers tore down my fences and took possession of my orchard, dug trenches, tore down trees, and ruined my fruit, and there was from 200 to 250 camped there from February 5 up to the present, night and day, and about the 18th of April they ordered me to leave the place, broke open my house, and carried off and destroyed all the furniture I had. On the 20th I sent a Mexican boy out there to try to put up the fences and try to protect my house. He came back to Tampico and told me they were tearing my house down and threatened to kill him if he came back there again.

I was stopping with a friend in Tampico on Tuesday, the 21st of April, when news reached Tampico that the American soldiers had taken Vera Cruz. Mobs of Mexicans gathered on every corner shouting to kill the Americans, and a general mob marched up and down the streets, six or seven hundred strong, shooting through houses, smashing in windows, and yelling, "Death to the Americans!" We succeeded in getting to the gunboat about 10 miles out in the ocean under the German and English flags. I did not have time to make arrangements financially, or even to get a change of clothes for myself and son. I have a wife, two daughters, and a son here in Galveston, without the financial means of support. I have money in Tampico, but I can't get it in Galveston. If you can use your influence to have us returned to Tampico, either by water or rail, we will assuredly appreciate it. We have money in Tampico, but here we are paupers, and there are hundreds of others in the same condition. I wish to congratulate you on your remarks in regard to our President's policy in Mexico. If we had enough men in Congress with the backbone that you have, we would not have been dragged off from our homes and our property that we paid large prices for and have them destroyed by those Mexican villains or thieves.

I wish to thank you for what you have already done in our interest and assure you that we all appreciate it.

Yours, respectfully, I. K. BERRY.

Mr. Berry also sent me the following statement of himself and 371 other Tampico refugees, drawn up on landing in Galveston Harbor—a story of absolute and positive disgraceful conduct of the American Republic:

STATEMENT OF FACTS GIVEN TO THE PEOPLE OF THE UNITED STATES BY 372 TAMPICO REFUGEES ABOARD THE STEAMSHIP "ESPERANZA," LYING IN QUARANTINE IN GALVESTON HARBOR.

AMERICAN PROTECTION IN MEXICO.

During the battle between federals and rebels, which raged in the suburbs of Tampico from April 6 to 11, during which much American property was destroyed and Americans driven from their homes and occupations, bitter feeling on the part of the Mexicans toward Americans, whom they curiously blame for all of Mexico's troubles during the past three years, became so intense after the battle that many Americans with all kinds of business in the surrounding country considered it unsafe to move beyond the outskirts of Tampico, and could only do so on special passes issued by Gov. Zaragosa, which allowed them to pass the three federal gunboats anchored in the Paunce River, as most of the traffic for 100 miles in the vicinity of Tampico is handled on rivers. The railroads have been abandoned for months.

This bitterness in Tampico became general and nearly to the extent of viciousness, the Americans keeping as closely as possible to their homes and places of business, with self-reliance and confidence in themselves and that of their flag to protect their lives and property wherever they might be.

At nearly the height of this dangerous crisis, and through somebody's stupidity, the flagship *Dolphin*, cruiser *Chester*, and gunboat *Des Moines*, in the harbor and already stripped for action, raised anchor at 9 a. m. April 21 and sailed tranquilly out to sea, withdrawing the last vestige of American protection in Tampico, and with them went from the breasts of 2,000 Americans, men, women, and children, who witnessed it, the last hope, admiration, and pride in their American citizenship and the American flag.

The removal of these vessels and this protection at this crisis of extreme danger and exposure to the mercy of a population who have

only a thin crust of civilization, little reason, and no morals, was little short of an administrative and naval crime. On the Americans who were left behind it had the effect of a funeral procession, which might be followed by many others before the day was done.

No explanation for the withdrawal of the fleet was offered, none as to whether it would ever return. It was still lying tranquilly at anchor on the high seas on April 24, apparently waiting for the fragile Mexican gunboats to come out.

While Americans, at about 4 p. m. April 21, were anxiously discussing the misfortune caused by the removal of the fleet, and now that every man must be the protector of his own life and that of his family, his little interests having been already abandoned, the news of the Battle of Vera Cruz reached Tampico.

Brown, howling mobs, armed with clubs, stones, and pistols, immediately congregated all over the city, parading the streets and howling for "Gringo" blood.

To a Mexican everything with a white face is a hated "Gringo."

Americans immediately rushed to their homes or places of imaginary safety. Englishmen and Germans appealed to their consuls and were hurried aboard their cruisers and merchant ships near the customhouse.

There was but one small American ship in the harbor, a private yacht, which did not dare to display her American flag.

The American consul, Miller, working like a Trojan, with a serious and almost hopeless situation, to preserve the lives of his countrymen, was in consternation. Hundreds of Americans could not reach him through the mobs to ascertain his plans for their protection, if he had any.

Poor Miller, the United States consul, deserted by the American fleet like the rest, left Tampico on a British ship, under the British flag, with the last of the American refugees. American women were refused asylum on British ships until British women were all aboard.

Some 150 Americans, men, women, and children, assembled at the Southern and Imperial Hotels, locked themselves in, and made the best, hurried preparations they could to sell their lives as dearly as possible.

A mob of approximately 600 infuriated Mexicans smashed the windows of American hotels and residences and wrecked Sanborn's American drug store in the corner of the Southern Hotel, beat the hotel doors for two hours in their quest for American blood and possession of the American flag which floated over the hotel. The flag remained and was still floating there when the imprisoned refugees finally left the hotel at midnight.

The American administration, not content with subjecting 2,000 of their citizens and countrymen to these dangers and insults, must force them to drink the cup of its dregs, to assassinate the last vestige of pride for their citizenship and flag by permitting, if they knew it at all, the spectacle of two German officers from the German cruiser *Dresden* coming ashore and notifying the Mexican authorities that if the mobs did not disperse immediately German marines would disperse them, and rescuing the fortified American inmates of the Southern and Imperial Hotels, and taking them at midnight in a drenching rainstorm aboard the German cruiser *Dresden*, where they finally arrived in safety with the exception of a few cut heads and bruises, thankful to God and the German officers that it was nothing worse.

With shame to American manhood, American administration, and naval capacity, and sense of responsibility, be it said, that every American man, woman, and child, abandoned by the only force that should have protected them, was sneaked out of Tampico on ships flying the German and British flags, commanded by German and British officers.

The American yacht *Wakiva*, of the Huastoca Petroleum Co., anchored 2 miles below Tampico, was notified by the Mexican gunboat that if she moved she would be sunk. She finally left the harbor flying the British flag.

The American yacht *Wild Duck*, to which many of the Americans were transferred from the German cruiser *Dresden*, were taken out to the large American fleet at sea, flying the German flag and in command of a German naval officer from the cruiser *Dresden*.

The spectacle of the American administrative blundering stupidity and humiliation at Tampico is ended, and 2,000 disgusted Americans who experienced it are on their way to their own country, with all their little worldly possessions abandoned to the mercy of semisavages. Many of these refugees are without friends or resources in the United States, too old to secure occupation in the already crowded field of competition, and with only the clothing they, their wives, and children wore in the hurried flight from their homes in the endeavor to preserve their lives.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. BROWN of New York, for three days, on account of illness in his family.

To Mr. JACOWAY, for five days, on account of illness in his family.

To Mr. SMITH of Texas, indefinitely, on account of important business.

To Mr. KIRKPATRICK, for three weeks, on account of important business.

MEMORIAL EXERCISES, BROOKLYN NAVY YARD, N. Y.

The SPEAKER. There being a large attendance here, the Chair will repeat the statement that he made last night, that he intends to appoint the 18 men on this honorary committee from the 18 districts where the sailors and seamen who were killed at Vera Cruz lived, and the gentlemen will please hand in their names.

ALBIN ERIC STREAM.

Mr. GRIFFIN. Mr. Speaker, I ask unanimous consent to insert in the RECORD a eulogy of Albin Eric Stream, a youth of 17, residing in my congressional district, who on the 22d of April, 1914, was killed at Vera Cruz, Mexico, in the defense of his country's honor.

The SPEAKER. The gentleman from New York [Mr. GRIFFIN] asks unanimous consent to extend his remarks in the RECORD on the subject indicated. Is there objection?

There was no objection.

MOTHERS' DAY.

Mr. HEFLIN. Mr. Speaker, I ask unanimous consent for the present consideration of a resolution that I have sent to the Clerk's desk. It is similar to the resolution passed last year in May on the subject of Mothers' Day. As I wish to leave the city this afternoon after the vote on the naval bill, I would like to have consent to have this resolution considered now by the House.

The SPEAKER. The gentleman from Alabama [Mr. HEFLIN] asks unanimous consent for the present consideration of the resolution, which the Clerk will report.

The Clerk read as follows:

House joint resolution 263.

Whereas the service rendered the United States by the American mother is the greatest source of the country's strength and inspiration; and

Whereas we honor ourselves and the mothers of America when we do anything to give emphasis to the home as the fountainhead of the State; and

Whereas the American mother is doing so much for the home, the moral uplift, and religion, hence so much for good government and humanity: Therefore be it

Resolved, etc., That the President of the United States is hereby authorized and requested to issue a proclamation calling upon the Government officials to display the United States flag on all Government buildings and the people of the United States to display the flag at their homes or other suitable places on the second Sunday in May as a public expression of our love and reverence for the mothers of our country; and be it further

Resolved, That the second Sunday in May shall hereafter be designated and known as Mothers' Day, and it shall be the duty of the President to require its observance as provided for in this resolution.

The SPEAKER. Is there objection to the present consideration of the resolution?

There was no objection.

The joint resolution was passed.

CONTESTED-ELECTION CASE—GILL V. DYER.

The SPEAKER. The report presented by the gentleman from New York [Mr. GOLDFOGLE] this morning in the contested-election case of Michael J. Gill against L. C. Dyer, on behalf of Committee on Elections No. 3, will be referred to the House Calendar.

Mr. MANN. I take it that it will be printed.

The SPEAKER. The Chair orders the majority report and the views of the minority to be printed.

NAVAL APPROPRIATION BILL.

Mr. PADGETT. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of H. R. 14034, the naval appropriation bill.

The motion was agreed to.

The SPEAKER. The gentleman from Kentucky [Mr. JOHNSON] will take the chair.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 14034) making appropriations for the naval service for the fiscal year ending June 30, 1915, and for other purposes, with Mr. JOHNSON of Kentucky in the chair.

The CHAIRMAN. The question is on the adoption of the amendment offered by the gentleman from Pennsylvania [Mr. MOORE] to the amendment of the gentleman from New York [Mr. MAHER].

Mr. MANN. Mr. Chairman, I ask that the amendment be reported.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from New York [Mr. MAHER] and also the amendment to the amendment offered by the gentleman from Pennsylvania [Mr. MOORE].

The Clerk read as follows:

Amendment offered by Mr. MAHER:

On page 53, line 12, after the word "each," insert the following: "At least one of the said battleships hereby authorized shall be built and constructed at a Government yard."

Amendment offered by Mr. MOORE to the amendment of Mr. MAHER:

Add the following to the Maher amendment: "Unless it shall be found that but one Government yard is equipped to build a battleship."

Mr. ROBERTS of Massachusetts. Mr. Chairman, I ask that the substitute for those two amendments offered by myself be read.

The CHAIRMAN. There is a substitute offered by the gentleman from Indiana [Mr. GRAY], and the gentleman from Michigan [Mr. J. M. C. SMITH] offered an amendment to that substitute.

Mr. ROBERTS of Massachusetts. The RECORD for last Tuesday does not show that the gentleman from Indiana [Mr. GRAY] offered any substitute. He offered an amendment to the bill

and then an amendment to the amendment, but it nowhere appears that he offered his proposition as a substitute for the amendment of the gentleman from New York [Mr. MAHER]. I call the attention of the Chair to the fact that I did offer a substitute for the amendment of the gentleman from New York [Mr. MAHER] as proposed to be amended by the gentleman from Pennsylvania [Mr. MOORE]. If the Chair will turn to pages 8417 and 8418 of the RECORD of last Tuesday he will see, at the bottom of the first column, on page 8417, that the gentleman from Indiana [Mr. GRAY] secured recognition and said:

Mr. Chairman, I wish to offer an amendment to the amendment offered by the gentleman from New York [Mr. MAHER].

The Chairman had the Clerk report the amendment. Then the following occurred:

Mr. MANN. I make a point of order that that is not an amendment to the amendment offered by the gentleman from New York [Mr. MAHER].
Mr. GRAY. I offer it, then, simply as an amendment, if you make your point of order.
The CHAIRMAN. Does the Chair understand the gentleman from Indiana to withdraw his amendment?
Mr. GRAY. I will withdraw it to offer it again.
Mr. MANN. Does he offer it as an amendment to the amendment or an amendment to the bill?
The CHAIRMAN. The gentleman offers it now as an amendment to the bill.
Mr. GRAY. I do not care how I offer it, so long as it is offered.
Mr. MANN. Under the order that was entered, is debate on this amendment in order? This is an amendment proposing to build in a navy yard.
Mr. GRAY. Have I the right to offer it as a substitute if this amendment is not in order?

Then the gentleman from Illinois [Mr. MANN] answered him as follows:

Mr. MANN. I think so. I think the gentleman has the right to offer the amendment. Is debate on this amendment closed or not?

The gentleman from Indiana merely inquired if he had the right to offer his amendment as a substitute, and was informed by the gentleman from Illinois [Mr. MANN] that he had, but it nowhere appears that he did offer it as a substitute.

Mr. FITZGERALD. What does the Journal show?

The CHAIRMAN. The Journal does not show anything about it, because it was in Committee of the Whole; but the gentleman from Massachusetts [Mr. ROBERTS] will see that on page 8421 an inquiry was propounded by the gentleman from Wisconsin [Mr. STAFFORD]; that in the meantime the gentleman from Indiana [Mr. GRAY] was endeavoring to offer his substitute, and the Chair was clearly of the opinion and is now that the substitute was offered.

Mr. ROBERTS of Massachusetts. Does the Chair have in mind the inquiry made by myself, which appears on page 8418?

Mr. ROBERTS of Massachusetts. Mr. Chairman, a parliamentary inquiry.
The CHAIRMAN. The gentleman will state it.
Mr. ROBERTS of Massachusetts. Is the amendment of the gentleman from Indiana [Mr. GRAY] pending before the committee?

Not the substitute.

The CHAIRMAN. A substitute is an amendment.

Mr. ROBERTS of Massachusetts. Then—

Mr. MANN. It is pending; it was reported.
Mr. ROBERTS of Massachusetts. If so, I desire to offer an amendment to that amendment.
The CHAIRMAN. The Chair is of the opinion that the amendment offered by the gentleman from Indiana [Mr. GRAY] is pending—

And the chair put my amendment to the amendment of the gentleman from Indiana.

The CHAIRMAN. A very plain statement of the situation is this: The gentleman from Indiana [Mr. GRAY] offered his proposition first as an amendment. He next offered it in the shape of a substitute. The Chair will add, in explanation of what he has heretofore said, that the reading clerk informs the Chair that whether the paper offered by the gentleman from Indiana be an amendment or a substitute, it was not reported——

Mr. ROBERTS of Massachusetts. The RECORD shows that it was, Mr. Chairman. It was read on page 8417 as an amendment.

The CHAIRMAN. It was read as an "amendment," but the gentleman from Indiana [Mr. GRAY] afterwards changed it to a "substitute," and the clerk says that after he changed it from an amendment to a substitute it was not read.

Mr. BROWNING. Mr. Chairman, I reserved a point of order on that amendment.

The CHAIRMAN. Which amendment?

Mr. BROWNING. The amendment of the gentleman from Indiana [Mr. GRAY]. Now, what has become of that point of order?

The CHAIRMAN. It is not disposed of. It is still reserved. But we are now discussing matters that may not be reached at all. The Chair suggests that it is well enough to let it go until we get to it.

Mr. BROWNING. I want to make the point of order when the proper time comes.

The CHAIRMAN. The Chair does not know of anybody or any condition that has disposed of the point of order which the gentleman says he has reserved.

Mr. GRAY. Mr. Chairman——

The CHAIRMAN. In one minute.

Mr. ROBERTS of Massachusetts. It seems to me it makes considerable difference——

The CHAIRMAN. The Chair wishes to hear the gentleman from New Jersey [Mr. BROWNING]. What does the gentleman from New Jersey wish to say?

Mr. BROWNING. I reserved that point of order, and when the proper time comes I want to make it. If this is the proper time, I want to make it now.

The CHAIRMAN. The Chair does not think this is the proper time. The gentleman has reserved it, and his rights in that respect will be respected.

Mr. ROBERTS of Massachusetts. If the Chair will permit me a moment, it seems to me it makes considerable difference whether the proposition of the gentleman from Indiana [Mr. GRAY] is considered as a substitute for the amendment of the gentleman from New York [Mr. MAHER] as amended by the gentleman from Pennsylvania [Mr. MOORE]. If it is considered a substitute, then it is not possible to amend the proposition of the gentleman from Indiana as I have proposed to do, and it is not possible to offer the amendment to the amendment of the gentleman from New York [Mr. MAHER] as amended by the gentleman from Pennsylvania [Mr. MOORE], as I have proposed in a substitute for those two motions.

The CHAIRMAN. The Chair will explain by saying that when the committee rose on day before yesterday afternoon the amendment offered by the gentleman from New York [Mr. MAHER] was pending; and that pending with it was the amendment thereto offered by the gentleman from Pennsylvania [Mr. MOORE], and also that the paper offered by the gentleman from Indiana [Mr. GRAY] was pending as a substitute. That was the understanding of the Chair. If the RECORD shows something else, the Chair does not know just what disposition can be made of it. That was certainly the understanding of the Chair.

Now, the Chair will hear the gentleman from Indiana.

Mr. GRAY. To clear up the parliamentary situation and to conform to the parliamentary situation brought about by reason of numerous amendments pending, I will withdraw my amendment, which was offered as a substitute, and accept the amendment offered by the gentleman from Massachusetts [Mr. ROBERTS], and then offer my amendment again as a substitute for the amendment offered by the gentleman from New York [Mr. MAHER], which is as follows:

Page 53, line 12, substitute for the amendment offered by the gentleman from New York [Mr. MAHER] and all amendments thereto the following:

"Both of the battleships hereby authorized shall be built and constructed at a navy yard by the Government, and the Secretary of the Navy is hereby authorized to equip such navy yards as he may designate in which the battleships herein authorized are to be built with the necessary building slips and equipment, and the sum of $200,000, or such part thereof as may be necessary, is hereby appropriated for each navy yard designated by the Secretary of the Navy in which the battleships are to be constructed."

May I briefly state here that the object of this amendment providing for the construction of all battleships at a navy yard by the Government itself is not only to secure all the profits flowing from these appropriations to the workingmen constructing these vessels instead of going to a special few ship contractors, long shown and now admitted to be operating under an agreement among themselves, stifling all competition, but it is also for the purpose of taking the profits and financial inducements out of war and preparations for war and confining naval appropriations to the legitimate and necessary requirements for adequate and proper national defense.

Mr. ROBERTS of Massachusetts. I suggest to the gentleman from Indiana that he ask unanimous consent to modify his substitute by adding to his original motion my amendment to it. That will cover the point that both he and I have in mind.

Mr. GRAY. I have already rewritten my amendment and put it in on paper and made the same include the amendment of the gentleman from Massachusetts [Mr. ROBERTS], and I now ask unanimous consent to withdraw my amendment pending and offer this in lieu thereof.

The CHAIRMAN. The gentleman from Indiana can not withdraw his amendment except by unanimous consent, neither can he accept the amendment of the gentleman from Massachusetts except by unanimous consent. Does the Chair understand the gentleman to withdraw the substitute he heretofore offered?

Mr. GRAY. Yes.

The CHAIRMAN. Is there objection?

Mr. FITZGERALD. I object for the present.

The CHAIRMAN. The question is then on the adoption of the amendment offered by the gentleman from New York [Mr. MAHER], with an amendment offered by the gentleman from Pennsylvania [Mr. MOORE]. The question will come first on the adoption of the amendment to the amendment offered by the gentleman from Pennsylvania [Mr. MOORE].

Mr. BUCHANAN of Illinois. Mr. Chairman, can we have that amendment reported?

The CHAIRMAN. Without objection, the amendment will be once more reported.

Mr. MOORE. Mr. Chairman, I ask the indulgence of the Chair for a half a minute. This amendment is about to be acted upon, and I do not think Members fully understand it. I merely want to say——

Mr. FITZGERALD. I object to any debate.

The CHAIRMAN. Debate is exhausted, and the question is on the amendment to the amendment.

Mr. BUCHANAN of Illinois. Mr. Chairman, I thought the Clerk was to report the amendment.

The CHAIRMAN. The Clerk will report the amendment to the amendment.

The Clerk read as follows:

Add to the amendment of Mr. MAHER the following:
"Unless it shall be found that but one Government yard is equipped to build a battleship."

The CHAIRMAN. The question is on agreeing to the amendment to the amendment.

The question was taken, and the amendment to the amendment was rejected.

The CHAIRMAN. The question which now arises is: Has the gentleman from Indiana [Mr. GRAY] a substitute before the House? He sent one up, which he offered as a substitute, and which the Clerk will report. The situation is this: On day before yesterday the gentleman from Indiana offered an amendment, which he afterwards, as the Chair understood, changed and offered as a substitute.

Mr. MANN. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. MANN. Did the gentleman from Indiana withdraw his amendment?

The CHAIRMAN. He endeavored to, but the gentleman from New York [Mr. FITZGERALD] objected.

Mr. MANN. Did not the gentleman from Massachusetts offer a substitute?

The CHAIRMAN. The Chair understands that the gentleman from Indiana [Mr. GRAY] desires to withdraw his substitute offered day before yesterday and offer in lieu thereof a substitute embodying his own ideas as well as those of the gentleman from Massachusetts [Mr. ROBERTS].

Mr. MANN. Did not the gentleman from Massachusetts offer a substitute on Tuesday, which is still pending?

The CHAIRMAN. The gentleman from Massachusetts [Mr. ROBERTS] offered a substitute when the Chair was under the impression—and the Chair is still under that impression—that a substitute offered by the gentleman from Indiana was pending, and therefore held that the substitute offered by the gentleman from Massachusetts [Mr. ROBERTS] was in the third degree and not in order.

Mr. MANN. Of course a substitute is not in the third degree; but I understood that the Chair held that the amendment offered by the gentleman from Indiana was an amendment, and that he was now seeking to withdraw it and offer it as a substitute. If that was the case, unless the Chair ruled it out of order——

The CHAIRMAN. The gentleman from Indiana desires to withdraw the former substitute offered by himself and offer one in lieu of that embodying both his idea and the amendment offered by the gentleman from Massachusetts [Mr. ROBERTS].

Mr. JONES. I reserve the right to object.

Mr. MANN. I was not here all of Tuesday, but I understood the Chair to say that there was an amendment offered to the Gray amendment also.

The CHAIRMAN. That is correct. The gentleman from Michigan [Mr. J. M. C. SMITH] offered an amendment to what is known as the Gray substitute.

Mr. ROBERTS of Massachusetts. The RECORD shows clearly and my recollection is clear that I asked the Chair if the amendment of the gentleman from Indiana was pending and was informed by the Chair that it was. That appears on the bottom of page 8418 of the RECORD. Thereupon I offered the amendment, and it is the amendment which the Chair ordered reported, and the point of order was reserved. That was an amendment to the amendment, but it has not been decided yet and held out of order. That is the parliamentary situation.

The CHAIRMAN. The amendment offered by the gentleman from Michigan was to the bill.

Mr. ROBERTS of Massachusetts. And my amendment had no reference to that. My amendment was to the amendment offered by the gentleman from Indiana [Mr. GRAY].

The CHAIRMAN. The amendment of the gentleman from Massachusetts was read only for information.

Mr. ROBERTS of Massachusetts. It does not say so. It says:

The CHAIRMAN. The Clerk will report the amendment.

The CHAIRMAN. The Chair and the gentleman from Massachusetts are somewhat at cross purposes, because the gentleman from Massachusetts offered two amendments. Much of the difficulty between the Chair and the gentleman from Massachusetts has been caused by his reference to one amendment and the Chair's to another.

Mr. ROBERTS of Massachusetts. That is what I am trying to straighten out.

Mr. MANN. Mr. Chairman, there is a very simple way out of it. The gentleman can offer the amendment over again.

Mr. ROBERTS of Massachusetts. Mr. Chairman, what I wanted to call to the attention of the Chair was what I thought was the agreement at the time when we entered the debate on battleships, and that was that amendments could be offered, to be pending, on the proposition as to where the ships should be constructed.

The CHAIRMAN. The Chair is still of the opinion that his first statement straightened the matter out, and that is that the Maher amendment is before the committee, and then that the Moore amendment to that came next. That has been disposed of. The Chair is of opinion that the Gray amendment is next in order.

Mr. ROBERTS of Massachusetts. Mr. Chairman, it depends on whether the Chair holds that to be an amendment or a substitute.

The CHAIRMAN. That is the question we have to get over, whether the gentleman offered it as a substitute or as an amendment. The gentleman first offered it as an amendment and afterwards changed it, as the paper itself shows, to a substitute.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I desire to make a parliamentary inquiry. I desire to know if I am right in my understanding of the parliamentary situation. I understood, and I think many of the Members also understood, that when we fixed the time for debate upon the number of battleships, the question was left open as to when or where or how battleships should be constructed, and at that time it was understood that amendments should be offered and be pending.

The CHAIRMAN. The Chair agrees with that statement.

Mr. ROBERTS of Massachusetts. And that opportunity would be given to further offer amendments before the matter was concluded. In other words, that amendments did not have to be offered at that particular time.

The CHAIRMAN. The Chair agrees with that statement.

Mr. ROBERTS of Massachusetts. I now ask the Chair whether it is in order to offer an amendment at this time?

The CHAIRMAN. The Chair thinks so.

Mr. FITZGERALD. An amendment where?

Mr. ROBERTS of Massachusetts. To this provision where and when the ship shall be built.

The CHAIRMAN. The Chair believes the whole matter will be facilitated if we now take up the proposition offered by the gentleman from Indiana and first vote upon the amendment offered by the gentleman from Massachusetts to that substitute. If the Chair is permitted to go along, he will direct that the vote be taken on the amendment offered by the gentleman from Massachusetts to the substitute offered by the gentleman from Indiana.

Mr. ROBERTS of Massachusetts. Mr. Chairman, that is satisfactory.

Mr. BROWNING. Mr. Chairman, I make the point of order against the amendment.

The CHAIRMAN. Upon what ground?

Mr. BROWNING. That it is new legislation and is not germane.

Mr. JONES. Mr. Chairman, the amendment has not been read. I reserve the point of order.

The CHAIRMAN. That is true, but we have before the committee the substitute offered by the gentleman on Tuesday last.

Mr. FITZGERALD. Mr. Chairman, let it be reported, as well as the amendment offered by the gentleman from Massachusetts.

The CHAIRMAN. Without objection, that will be once more reported.

The Clerk read as follows:

Substitute by Mr. GRAY for the Maher amendment:
"Page 53, line 12, after the word 'each' strike out the period and insert:
"'Both of the battleships hereby authorized shall be built and constructed at a Government navy yard.'"

Mr. BROWNING. Mr. Chairman, I make the point of order that that is new legislation and curtails the authority of the Secretary of the Navy or the President.

The CHAIRMAN. On Tuesday last the Chair ruled upon the amendment offered by the gentleman from New York [Mr. MAHER], and this amendment, in the nature of a substitute, is practically parallel with that.

The Chair therefore overrules the point of order. The Clerk will now report what is known as the Roberts amendment to the Gray substitute.

The Clerk read as follows:

Add to the amendment of Mr. GRAY the following:
"And the Secretary of the Navy is hereby authorized to equip such navy yards as he may designate in which the battleships herein authorized are to be built with the necessary building slips and equipment, and the sum of $200,000, or such part thereof as may be necessary, is hereby appropriated for each navy yard designated by the Secretary of the Navy in which the battleships are to be constructed."

Mr. JONES. Mr. Chairman, I make the point of order against that amendment or substitute. The Chair has practically decided that question heretofore.

Mr. MANN. Mr. Chairman, just a word upon the point of order. The Chair first decided that an appropriation as an appropriation item in the bill was not in order for the purpose of constructing these building slips, a decision which, I think, was entirely correct; but here is a legislative item in the bill not making any appropriation at all and simply giving authorization for the construction of battleships. The Chair has ruled that we may insert as an amendment to that a provision that one of the ships or both of the ships may be built in a navy yard or navy yards, because the item is not an appropriation, but it is an authorization—a legislative item. The amendment of the gentleman from Massachusetts is germane, as it seems to me; and if you can direct a battleship to be built at a navy yard, then I think it is germane to provide the facilities at the yard with which to build the battleship.

Mr. JONES. Mr. Chairman, may I ask the gentleman a question?

Mr. MANN. Just one moment. It is true it is legislation, but legislation is in order, because the whole paragraph is legislation.

Mr. JONES. Did I understand the gentleman to say that this does not make any appropriation?

Mr. MANN. It does not.

Mr. JONES. It does specifically appropriate $200,000.

Mr. MANN. I refer to the paragraph in the bill. I say that it does not make any appropriation.

Mr. JONES. The amendment does, and it is to that that I make the point of order. It specifically appropriates $200,000.

Mr. MANN. Yes; but when there is a paragraph that is legislation in a bill, it is subject to a germane amendment which makes an appropriation. But the Committee on Naval Affairs has gotten into the habit—maybe a correct one; I expect it is—that instead of making an appropriation for battleships it makes an authorization for battleships, which is pure legislation; but because it was legislation the Chair held that you could add a germane amendment to it, a provision that one of the ships should be built in a navy yard. You could also add that one of the ships could be built in a private yard, because it is legislation, and when you have entered upon the domain of legislation any germane amendment to it is in order.

Mr. JONES. But, Mr. Chairman, that is with reference to the ships; this is in reference to a navy yard.

Mr. MANN. I understand.

Mr. JONES. This is legislation in reference to ships. Now, this proposes new legislation with reference to several navy yards in the United States.

Mr. MANN. If the gentleman claims that the amendment is not germane and the Chair should hold it is not germane, of course it is not in order——

Mr. JONES. It is not germane in the first place, and, in the second place, it is new legislation.

Mr. MANN. But the whole paragraph is legislation. Now, it seems to me that if we direct that a ship shall be built in a navy yard, it is a germane amendment to provide the facilities at the yard for building, as a matter of legislation. Certainly if the committee should report a bill as a legislative bill in the House to provide for the building or authorization to the Secretary to have the battleships built in a navy yard, it would be germane to add to the legislative bill a provision fixing facilities at the navy yard ample to equip it so that it could build the battleships.

Mr. JONES. At the outset, let me say, Mr. Chairman, that this is a most preposterous proposition. This is a proposition to authorize the Secretary of the Navy to expend $200,000 to equip any navy yard not now so equipped to build the battleships provided for in this bill. Now, the chairman of the Committee on Naval Affairs made it absolutely plain on the last day upon which this bill was under discussion that there was no such navy yard which could be so equipped at anything like this sum. He quoted from a communication from the Secretary of the Navy to the effect that it would cost more than $600,000 to equip the Mare Island yard to build one of these battleships. This yard, as is well known, is the only navy yard aside from the New York yard that now has a building way and equipment of sufficient capacity to build a large ship, and it will require, according to naval authority, an expenditure of more than $600,000 to provide the necessary equipment to enable it to build a modern battleship. No other yard, save only the New York yard, which now has the necessary equipment, can be equipped to build one of these ships for less than $1,000,000. For these reasons the adoption of this amendment would not accomplish the purpose of those who advocate it.

Mr. FALCONER. Will the gentleman yield?

Mr. JONES. Certainly.

Mr. FALCONER. Since there is something like $12,000,000 or $14,000,000 invested at the Mare Island yard, why not invest $600,000 more to put that Government yard in shape so as to build a Government battleship?

Mr. JONES. I will answer the gentleman by saying that no proposition to expend $600,000 to equip the Mare Island yard is before the House. The proposition before the House is to expend $200,000, and not a cent more, to equip some navy yard, to be designated by the Secretary of the Navy, to build one of these battleships, and I am endeavoring to point out that there is no navy yard which can be so equipped for anything like this sum. It will require more than $600,000 to equip even the Mare Island yard, and yet this amendment limits the expenditure to $200,000.

Mr. ROBERTS of Massachusetts. Will the gentleman yield?

Mr. JONES. I will.

Mr. ROBERTS of Massachusetts. Does not the gentleman recall the appropriation made for the Brooklyn yard for the construction of the *Connecticut* there of $175,000, and that with the expenditure of that money the *Connecticut* was built at that yard?

Mr. JONES. Mr. Chairman, the gentleman knows perfectly well that the New York yard was partially equipped before this $175,000 was appropriated. He also knows, I think, that the Secretary of the Navy has informed us, and that as late as two days ago, that it will cost more than $600,000 to equip the Mare Island yard to build one of these battleships. If the Mare Island yard can not be equipped for $600,000, no other yard can be save only the New York yard, which already has the necessary equipment.

The CHAIRMAN. The Chair will be glad to hear the gentleman on the point of order.

Mr. JONES. I wish to speak to the point of order. Mr. Chairman, the gentleman from Illinois [Mr. MANN] made a very ingenious argument, but it is the same that has been made from the beginning of the discussion of this bill to the present time. In the first place, the amendment is not germane. It is, moreover, new legislation. The paragraph which it is proposed to amend relates to the building of battleships. The amendment seeks to increase the amount named in the paragraph by $200,000, that additional sum to be expended in equipping a navy yard to be selected by the Secretary of the Navy at which to build one of the battleships. An amendment that relates to, or provides for, the improvement of a navy yard is not, in my opinion, germane to a provision that relates wholly to ships. It is new legislation, because it is not authorized by existing law, and the appropriation which it carries is not to continue any work now in progress. The Chair held an item to equip the Philadelphia yard so as to enable it to build a transport out of order, and if that ruling is to be followed, then this amendment must also be held to be out of order.

The CHAIRMAN. The Chair does not agree with the gentleman from Virginia that the case which he has just stated is parallel to the one which is now before the committee. The amendment offered by the gentleman from Massachusetts [Mr. ROBERTS] reads as follows:

And the Secretary of the Navy is hereby authorized to equip such navy yards as he may designate in which the battleships herein authorized are to be built with the necessary building slips and equipment, and the sum of $200,000, or such part thereof as may be necessary, is hereby appropriated—

Mr. JONES. May I ask the Chair a question right there?

The CHAIRMAN. Yes.

Mr. JONES. It was stated when that other item was under consideration that the law, and the law was cited, permitted the Secretary of the Navy to designate the navy yard in which that transport should be built. And the argument was predicated upon that statute. And then the item proceeded to appropriate $200,000 to equip the yard. I can not see, with all deference to the Chair, why this is not exactly the same.

The CHAIRMAN. If the gentleman from Virginia had indulged the Chair for just a moment longer the Chair would have read an amendment which was at one time offered by the gentleman from Massachusetts [Mr. ROBERTS] to the same paragraph in this bill, which can be found in section 3837 of Hinds' Precedents, volume 4, and which reads as follows:

Provided, That the Secretary of the Navy shall build at least one of the battleships, one of the armored cruisers, and one of the gunboats herein authorized in such Government navy yard or navy yards as he may designate; and for the purpose of preparing and equipping such navy yard or navy yards as may be so designated for the construction of such ships the sum of $175,000, or so much thereof as may be necessary, is hereby appropriated for each of the navy yards in which the Secretary of the Navy may direct any such ship or ships to be built.

To that a point of order was made. The occupant of the chair at that time, Mr. Sherman, sustained the point of order. An appeal was made to the committee, and the committee overruled the Chair. The present occupant of the chair is of the opinion that these two amendments are practically the same, and will adhere to the former judgment of the committee as expressed on that occasion. The Chair will also further state that he holds that this amendment is germane, and upon the two points made overrules the point of order.

The question is on the adoption of the amendment offered by the gentleman from Massachusetts [Mr. ROBERTS] to the substitute offered by the gentleman from Indiana [Mr. GRAY].

The question was taken, and the Chair announced that the ayes seemed to have it.

Mr. JONES. Division, Mr. Chairman.

The committee divided; and there were—ayes 97, noes 11.

So the amendment was agreed to.

Mr. PADGETT. Mr. Chairman, I wish to offer an amendment to the amendment offered by the gentleman from Indiana [Mr. GRAY] as amended by the recent vote, to strike out the word "two" and insert the word "one," so that it will read "one of the battleships."

The CHAIRMAN. The motion made by the gentleman from Tennessee——

Mr. BUCHANAN of Illinois. Mr. Chairman, I raise a point of order on the amendment. The amendment that this is a substitute for provides for that amendment.

Mr. PADGETT. I can move to amend a substitute.

Mr. FITZGERALD. The rule is that there may be but one amendment offered to a substitute.

Mr. BUCHANAN of Illinois. I make the point that there can be only one amendment to a substitute.

Mr. PADGETT. This amendment offered by the gentleman from Indiana [Mr. GRAY] provides that both of the ships shall be built in a navy yard. I move to strike out the word "both" and insert "one."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend the Gray amendment by striking out the word "both" and inserting the word "one."

Mr. PADGETT. I can move to amend the substitute.

Mr. FITZGERALD. The rule is that there may be but one amendment offered to a substitute.

Mr. BUCHANAN of Illinois. I make the point that there can be only one amendment to a substitute.

The CHAIRMAN. The Chair will not pass upon the question at this time as to whether or not it is an amendment in the third degree, because he does not feel that it is now necessary to do so. But the amendment offered by the gentleman from Tennessee [Mr. PADGETT] is the Maher amendment in substance, which is pending.

Mr. MANN. I think the amendment offered by the gentleman from Tennessee [Mr. PADGETT] is in order. It is true that by itself it would be in effect the Maher amendment, but the committee has the right to take a substitute. Take the actual case, and the House has added to the Gray substitute a provision it may wish to incorporate in the bill. Now, the House may wish to change "two" to "one," and do it on this substitute, and if the Chair should rule it could not do it this way then they would have to go to the trouble of voting another amendment to the Maher amendment.

The CHAIRMAN. The Chair sees the reason suggested by the gentleman from Illinois [Mr. MANN]. The Chair would like to suggest to the gentleman from Tennessee that his amendment is not complete in striking out "both" and inserting "one." It would be one battleship, at least.

Mr. PADGETT. I move, Mr. Chairman, to strike out the words "both of the battleships" and insert "one of the battleships."

Mr. MANN. That is all right.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Strike out the words "both of the battleships" and insert "one of the battleships."

Mr. GRAY. The committee has already voted and decided upon the construction of one battleship at a Government navy yard. Can we now go back and make another decision on the same proposition? If this is true, then there is no final determination of any question considered by the House.

Mr. PADGETT. We have voted down the one.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Tennessee [Mr. PADGETT].

The question was taken, and the Chair announced that the noes seemed to have it.

Mr. PADGETT. Division, Mr. Chairman.

The committee divided; and there were—ayes 90, noes 50.

Mr. GRAY and Mr. BUCHANAN of Illinois demanded tellers.

Tellers were ordered. Mr. PADGETT and Mr. GRAY took their places as tellers.

The committee again divided; and the tellers reported—ayes 102, noes 55.

So the amendment was agreed to.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I ask unanimous consent that the amendment offered by myself to the Gray amendment and adopted be changed by the Clerk so that it will read in the singular. The Chair and the committee will recall that the Gray amendment provided for the building of two battleships in navy yards, and by the action of the House they have just limited the number to one, and my amendment was adopted when the proposition was before the House to build two. So it will be necessary to change the words that are plural to the singular, and change the verbs to correspond.

The CHAIRMAN. Without objection, the change will be made. [After a pause.] The Chair hears no objection. The question now is on the adoption of the Gray substitute as amended.

The question was taken, and the Chair announced that the ayes seemed to have it.

Mr. JONES. Division, Mr. Chairman.

The committee divided; and there were—ayes 111, noes 17.

So the substitute as amended was agreed to.

The CHAIRMAN. The question now is on the Maher amendment as modified by the substitute.

The amendment was agreed to.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Michigan [Mr. J. M. C. SMITH].

The Clerk read as follows:

Page 53, add to the paragraph, at the end of line 12, the following: "That all material used in the battleship or battleships authorized shall be purchased and secured in the United States."

Mr. PADGETT. Mr. Chairman, a point of order was reserved against the amendment, but I want to call attention to the fact that it can not be placed in the bill at that point, for the reason that the House has already adopted an amendment going at the end of line 12, page 53, following the word "each," so that it would have to be at the end of the amendment that has just been agreed to.

Mr. J. M. C. SMITH. Mr. Chairman, I ask, then, that it be transposed to the end of the substitute just adopted.

The CHAIRMAN. The gentleman from Michigan [Mr. J. M. C. SMITH] asks leave to modify his amendment so as to place it at the end of the Gray amendment. Is there objection?

Mr. PADGETT. I make a point of order against it as being legislation, and I ask for a ruling. We must make some progress. I ask for a ruling of the Chair on the point of order.

The CHAIRMAN. The Chair will hear the gentleman on the point of order.

Mr. PADGETT. I do not care to discuss it. I had just as lief the Chair would rule one way as the other.

The CHAIRMAN. The Chair would like to hear the gentleman.

Mr. PADGETT. It is subject to a point of order because it is limiting the department in its power to purchase material, and it is not authorized on the ship. This is a direction as to the purchase of material. It is legislation. I want to get along with this bill and have the committee vote on it one way or the other.

Mr. MOORE. Mr. Chairman, will the gentleman yield for a suggestion?

Mr. PADGETT. Yes.

Mr. MOORE. If this were made a part of the bill, it would limit the right of the Government to purchase from foreign countries materials entering into the ship, would it not?

Mr. PADGETT. Yes.

Mr. MOORE. Would it also prevent the Secretary of the Navy from buying abroad bunting or material of that kind that goes into the manufacture of American flags?

Mr. PADGETT. It would limit him in the purchase of all materials that go into the ship.

Mr. MOORE. The gentleman is aware of the fact that orders are now pending abroad for bunting out of which flags are to be made, is he not?

Mr. PADGETT. I do not know as to that.

Mr. MOORE. I call the gentleman's attention to the fact that that question is involved, and I hope it will have some bearing on the decision of the Chair.

The CHAIRMAN. The Chair is ready to rule.

Mr. STAFFORD. Mr. Chairman, I do not think there is any question but that it is in order, in consonance with the prior ruling of the Chair. It has been held that the paragraph of which this is a part is distinct legislation. This amendment is legislation, but it is a germane amendment, and therefore it is in order. From my standpoint, I do not think there could be any question, in view of the prior ruling of the Chair.

The CHAIRMAN. The Chair will say to the gentleman from Tennessee that, while the Chair is in sympathy with him as to his attitude toward the amendment, yet the Chair feels constrained to overrule the point of order. The point of order is overruled.

Mr. PADGETT. Now, Mr. Chairman, I simply want to say this with reference to the amendment, that it is simply taking a step in aid of the trusts. The Government of the United States ought to have an open market and be able to buy wherever it can get what it requires, and to limit the purchases to the United States is simply to provide that the Government shall be placed at the mercy of a few bidders.

Mr. CALDER. Mr. Chairman, a point of order. I make the point that debate on the amendment is exhausted.

Mr. HARDY. Mr. Chairman, I wish to offer an amendment to the amendment.

The CHAIRMAN. The Clerk will report it.

The Clerk read as follows:

Amend the amendment by adding: "*Provided*, That such material can be bought as cheaply in the United States as elsewhere."

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Texas to the amendment offered by the gentleman from Michigan [Mr. J. M. C. SMITH].

The question was taken, and the Chairman announced that the noes seemed to have it.

Mr. HARDY. Mr. Chairman, I ask for a division.

The CHAIRMAN. The question is on the adoption of the amendment offered by the gentleman from Michigan.

The affirmative vote was taken.

Mr. HARDY. Mr. Chairman, I called for a division on my amendment.

The CHAIRMAN. The Chair will say to the gentleman from Texas that in the first place he did not demand tellers soon enough, and in the next instance he made his request for tellers without rising.

Mr. HARDY. I have not made any request for tellers.

The CHAIRMAN. For a division the Chair means to say, and therefore the Chair must consider it as though no request for a division had been made. The question is on the adoption of the amendment offered by the gentleman from Michigan.

The question was taken, and the Chairman announced that the noes seemed to have it.

Mr. ROBERTS of Massachusetts and Mr. BROWNING demanded a division.

The CHAIRMAN. A division is demanded.

The committee divided; and there were—ayes 47, noes 79.

Mr. MANN. I ask for tellers, Mr. Chairman.

Tellers were ordered, and the Chairman appointed Mr. PADGETT and Mr. J. M. C. SMITH to act as tellers.

The committee again divided; and the tellers reported—ayes 52, noes 82.

So the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Six torpedo-boat destroyers, to have the highest practicable speed, to cost, exclusive of armor and armament, not to exceed $925,000 each.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the paragraph.

The CHAIRMAN. The gentleman from Wisconsin [Mr. STAFFORD] reserves a point of order on the paragraph.

Mr. STAFFORD. Mr. Chairman, my purpose in reserving the point of order is to obtain a ruling of the Chair as to whether this phraseology is in continuation of that carried in the prior paragraph. If it is an appropriation, it is not subject to a point of order; but if it is merely a continuation of the phraseology, then it must be considered that it is legislation and subject to a point of order. I inquire of the Chair whether this section is to be read in connection with the preceding paragraph. For instance, is it to be understood that the language in the first paragraph is to be considered as a part of all these succeeding paragraphs, or is it a distinct appropriation? That language is:

That for the purpose of further increasing the Naval Establishment of the United States the President is hereby authorized to have constructed—

And so forth. Then, continuing the words of the present paragraph—

six torpedo-boat destroyers, to have the highest practicable speed, to cost, exclusive of armor and armament, not to exceed $925,000 each—

And in the following paragraph—

one seagoing submarine torpedo boat—

And so on, down through the remainder of the page. If that language in the preceding paragraph is to be taken as a part of the present paragraph under consideration, then it is legislation. If it is merely an authorization of an appropriation for these six torpedo-boat destroyers, that style of ship having been previously authorized and being at present an established arm of the Navy, it is not subject to a point of order.

The CHAIRMAN. The Chair is of the opinion that the present language of the bill is subject to a point of order because it is an authorization; but if there was a direct appropriation for that purpose, it would not be subject to a point of order.

Mr. PADGETT. This is the same language that has always been carried in the bill, and it has always been considered to be a part of the program; and the authorization of the President to construct so many torpedo boats and to increase the Navy——

The CHAIRMAN. The Chair finds a slight distinction between the authorization and the direct appropriation, notwithstanding the fact that the same language may have been carried in former bills. The language carried in former bills would only make the law for those years.

Mr. PADGETT. But this is to authorize the President to increase the Naval Establishment.

That for the purpose of further increasing the Naval Establishment of the United States, the President is hereby authorized to have constructed—

Two battleships, six torpedo-boat destroyers, and one seagoing submarine torpedo boat.

The CHAIRMAN. Right there, if the gentleman will permit, the Chair will say to him that if it were simply an appropriation it would be in continuation, but this language is an authorization.

Mr. STAFFORD. We can readily make it an appropriation instead of an authorization.

The CHAIRMAN. The Chair has indicated to the gentleman from Tennessee that the Chair will hold a direct appropriation to be in order.

Mr. PADGETT. Will the Chair indulge me a moment?

The CHAIRMAN. The Chair has practically ruled upon the reservation of the point of order without the point of order being made.

Mr. STAFFORD. My purpose is to inquire first whether it is legislation——

The CHAIRMAN. Does the gentleman make the point of order?

Mr. STAFFORD. I make the point of order. I have no objection to an appropriation for this purpose, but I do object to the present phraseology.

The CHAIRMAN. Does the gentleman make the point of order?

Mr. STAFFORD. I make the point of order.

The CHAIRMAN. The Chair sustains the point of order.

Mr. PADGETT. Before the Chair rules let me make a statement. The appropriation for this is carried on page 55 of the bill under consideration. It has always been held in order to authorize, in the naval appropriation bill, the construction of battleships, the construction of torpedo boats, the construction of submarines, and the construction of the other craft in the Navy. The appropriation is carried on page 55 of the bill. This is a continuation of the authorization and is a part of the preceding paragraph authorizing the President to increase the Naval Establishment. It has always been held to be in order

to authorize, on the naval appropriation bill, an increase of the Naval Establishment by adding facilities to it.

Mr. STAFFORD. There will be no difficulty if the gentleman will merely make this an appropriation, rather than an authorization, which is legislation and subject to a point of order.

The CHAIRMAN. The Chair for information will ask the gentleman from Tennessee, if the appropriation is made on page 55, lines 5, 6, and 7, then what is the use of the paragraph we now have before us in lines 13, 14, and 15 on page 53?

Mr. PADGETT. Simply because there must be an authorization to the department to build the ships.

The CHAIRMAN. Then the gentleman is seeking to authorize and appropriate in the same bill.

Mr. PADGETT. Yes; we are authorizing in the bill, and that has always been done; and it has been held expressly in order.

The CHAIRMAN. Will the gentleman cite the Chair to some place where it has been held in order?

Mr. PADGETT. The point of order has not been raised of late years against authorizations in the naval appropriation bill.

The CHAIRMAN. The gentleman will bear in mind, however, that on a bill recently considered we received a very serious object lesson, where items had been carried in an appropriation bill for many years, and yet the gentleman from Illinois [Mr. FOWLER] made points of order against them, and they were all sustained.

Mr. PADGETT. That may be; but it has been held expressly that it is in order to increase the Naval Establishment. That is one of the well-recognized exceptions to the rule. It is the continuation of a public work. It is the continuation of a work in progress, that work being the creation of a navy. The increase of the Navy is an increase of an existing work or object.

The CHAIRMAN. Yes; but the gentleman is not now discussing the thing to which the mind of the Chair is directed, and that is the difference between an authorization and an appropriation.

Mr. PADGETT. But there must be an authorization, and it has been held to be in order——

The CHAIRMAN. Has the committee the right to authorize?

Mr. PADGETT. It has been held in order to authorize battleships and to authorize colliers and to authorize submarines, and that authorization is carried regularly in the naval bill.

The CHAIRMAN. Under section 823 of the Manual the Chair finds this language:

By a broad construction of the rule an appropriation for a new and not otherwise authorized vessel of the Navy is held to be for continuance of a public work; but this interpretation is confined to naval vessels and does not apply to vessels in other services, like the Coast Survey or Lighthouse Department.

This language says that by a "broad construction" of the rule an "appropriation" for a new and otherwise unauthorized vessel is in order; but the gentleman has sought to make, first, an "authorization," and, later, an "appropriation."

Mr. PADGETT. But, if the Chair please, this is to fix the limit of cost and to authorize the department to build these vessels, and later carries an appropriation. But as the construction of the vessel requires nearly three years we do not put into the bill in any one year the full amount of the authorization. We put in an appropriation adequate for the first year, and then the next year we put in the amount sufficient for that year, and then the third year we put in the remainder; and to destroy this language here is simply to bring confusion and to force us to put into the appropriation three times as much as we should. I hope the gentleman will not insist upon his point of order. This has been the custom, and it has been carried in the bill from time immemorial.

Mr. STAFFORD. If the committee is willing to consider this merely as an appropriation and not an authorization, I am willing to withdraw the point of order; but if it is to be considered as legislation to which can be attached all kinds of amendments, then for the purpose of expedition I am going to continue to press my point of order.

Mr. PADGETT. I do not know of any amendment to be offered to this.

Mr. MANN. Mr. Chairman, if the gentleman from Tennessee [Mr. PADGETT], chairman of the Committee on Naval Affairs, would do what no chairman of one of the appropriating committees ever does—that is, read the rules of the House—he would not have any difficulty about this matter. Now, the rule is:

No appropriation shall be reported in any general appropriation bill, or be in order as an amendment thereto, for any expenditure not previously authorized by law, unless in continuation of appropriations for such public works and objects as are already in progress.

Now, the ruling is that the appropriation for a battleship or vessel of the character used in the Navy for fighting purposes is an appropriation for a work and object already in progress, but, as the Chair has suggested, this item has no appropriation in it.

Mr. PADGETT. For the reason——

Mr. MANN. It is not in there, and it does not make any difference what the reason is. It is not an appropriation. Now, the gentleman referred to the fact that this is a work in progress, but that language of "work in progress" only occurs in the rule in reference to appropriations. This paragraph does not come within that, because it is not an appropriation. Now, the subsequent language that forbids legislation does not refer to work and objects in progress.

Nor shall any provision in any such bill or amendment thereto changing existing law be in order.

And then follows the Holman rule. The authorization is a change of existing law, because it makes law. The authorization is not in order upon a naval bill, and an appropriation is in order if the gentleman would offer an amendment for an appropriation. I am inclined to think—although I do not wish to commit myself on that subject—that the language in the bill might be considered as merely descriptive of the torpedo boats if the gentleman would add an appropriation to it, but there is no appropriation in this; it is a pure case of authorization.

Mr. MADDEN. Will the gentleman yield?

Mr. MANN. Certainly.

Mr. MADDEN. If the appropriation is made, as my colleague suggests, would it not be necessary to state definitely what it is for?

Mr. MANN. That is what this says. The language is:

Six torpedo-boat destroyers, to have the highest practicable speed, to cost, exclusive of armor and armament, not to exceed $925,000 each.

Now, the gentleman from Tennessee connects that with the language in the preceding paragraph which authorizes the President to have constructed six torpedo boats. It might be treated as a separate paragraph, simply making an appropriation, if the gentleman would add an appropriation, and then the Secretary of the Navy would have the power under the law to expend the money. But this as it is is purely an authorization—legislation, as suggested by the chairman of the committee.

Mr. PADGETT. I will ask the gentleman from Wisconsin if he will not withdraw the point of order and let us proceed?

Mr. STAFFORD. If there is going to be no amendment to this or the subsequent paragraph, I would not press the point of order.

Mr. PADGETT. I know of no amendment, and do not expect any.

Mr. STAFFORD. Could not we have this and the subsequent paragraph considered as one, providing for the increase of the Navy?

Mr. PADGETT. I am perfectly willing.

Mr. STAFFORD. Down to line 6, page 54.

Mr. PADGETT. I do not know of any amendment to be offered to these paragraphs.

Mr. STAFFORD. Well, Mr. Chairman, I do not see any Member on the floor who desires to offer an amendment, and I will withdraw the point of order.

Mr. BUCHANAN of Illinois. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Page 53, line 15, after the word "one," insert the following: "To be constructed in Government navy yards."

Mr. BUCHANAN of Illinois. Mr. Chairman, the Government is equipped with navy yards to do a great deal more work than they are doing. The overhead charges are enormous, and I believe it is to the interest and great advantage of the Government to have all the work done in the navy yards that they can take care of. It will result in work being done better and cheaper, and it seems to me there ought to be no objection to it.

Mr. PADGETT. I will ask the House not to adopt this amendment. We have provided for one battleship to be built in a Government yard. It involves an immense increase of cost. The present Secretary of the Navy has stated in a letter which I put in the RECORD that it was his purpose to place all the work he could in the navy yards, and do it judiciously, but to put an absolute direction that these shall be built in navy yards would involve a large increase in the cost.

Mr. BUCHANAN of Illinois. I would like to ask the gentleman if he thinks it is judicious to have the navy yards idle and let contract work out that could be done in those yards? That has been the practice in the past and will be in the future, unless Congress takes some action in regard to it.

Mr. PADGETT. The navy yards have not been idle. The gentleman assumes a state of facts that does not exist. I will ask the House to vote down the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois [Mr. BUCHANAN].

The question was taken; and on a division (demanded by Mr. BUCHANAN of Illinois) there were 26 ayes and 52 noes.

So the amendment was rejected.

Mr. PETERS of Massachusetts. Mr. Chairman, I move to strike out the last word.

Our Nation is about to pay its tribute to the memory of Commodore John Barry. In a few days the statue to Commodore Barry will be unveiled, and our National Capital will be enriched by the traditions which surround his memory.

Born in Wexford, Ireland, Barry was as a boy poor in worldly possessions but rich in the possession of the best of inheritances. His nature was strong and firm and full of the characteristic vigor of his race. His blood was red and never changed.

Barry was driven from home by the shortsighted policy of oppression which England adopted toward his native country. Like thousands of other Irishmen, he turned his eyes toward that haven of liberty that was looming up in the Western world. The immigrant ship brought Barry.

Deprived by law in his native land of all opportunity for study, John Barry found in America the chance for self-improvement. His keen mind soon mastered the arts of navigation. A born leader of men, he became, at the age of 30, master of the *Black Prince*, one of the finest merchantmen flying the American flag.

At the breaking out of the first movement for the Revolution Barry's services were offered without hesitation to his adopted country. His eager patriotism was rewarded by his securing the first prize. The first command by Barry, the *Lexington*, bears the distinction of being the first ship which bore the Continental flag to victory on the ocean.

Washington recognized the importance to the country of a well-organized Navy, and early picked Barry as a born commander. So great was Gen. Washington's confidence in him that in the last three years of the Revolution Barry was first officer of the Navy.

The honor of fighting the last as well as the first naval battle in the Revolutionary War fell to Commodore Barry. It was on the *Alliance*, the last and best ship of the Continental Navy, that Barry distinguished himself in this final engagement by personal bravery that will always be a model for the American Navy.

Seriously wounded, the valiant commander had been taken below. He was told that the *Alliance* was about to strike her colors. The shell of the enemy might maim the body, but it could never impair the valor of John Barry.

He ordered that he be carried to the deck. The appearance of their commander on deck, wounded and weak, but determined to fight, proved an inspiration for his powder-blacked crew. With their battle cry "We'll stick by Jack," they fought with a renewed vigor that saved the day.

It remained for the British commander, Gen. Howe, to bring out the staunch patriotism of our commodore. Appreciating the importance of Barry to the American cause, Gen. Howe sent to him an offer, giving him command of the best frigate in the British fleet and what amounted to $100,000 in cash. Maddened by this insult, Barry replied with all the indignation of his injured patriotism:

> I have devoted myself to the cause of my country, and not the value and command of the whole British fleet could seduce me from it.

At one time, without a ship, Barry enlisted on Gen. Washington's staff in New Jersey, and there fought until his new vessel, the *Raleigh*, was in commission.

After peace was declared Barry still gave his services to his country. To him President Washington turned when he wished to organize the Continental Navy, and the first act of Washington as President toward the establishment of a Navy was to commission John Barry commodore. Under his supervision the new Navy which Congress authorized took shape.

Of this new Navy John Barry was commander. Both Washington and John Adams early perceived the importance to our country of a well-established Navy, and to make that Navy effective they must have commanders who combined fearless character with good judgment and experience in handling vessels. That Barry combined these his record in the Navy will prove. Though dashing and reckless, he yet was an exceptionally skillful seaman, and his handling of his vessels in action brought praise from all sides. As a born fighter he inspired his crews with confidence that they had a leader who would handle them effectively and stick in the fight to the end. After one of his boldest victories Washington himself wrote to Barry as follows:

> I congratulate you on the success which has crowned your gallantry * * * in the late attack upon the enemy's ships. Although circumstances have prevented you from reaping the full benefit of your conquests, yet there is ample consolation in the degree of glory which you have acquired. With my wishes that a suitable recompense may always attend your bravery.

John Barry dedicated himself to his country's service, and never left it until he went to the last field of honor, wrapped in his country's flag.

The Irish race has furnished many distinguished warriors for our flag, and, great as their services are, to none have we more cause to show gratitude than to John Barry. Generous and loyal was Barry's response to the call of the Revolution. His services were offered among the first, and through all the war his generous spirit seemed to stimulate all around him.

Barry's daring exploits have been frequently celebrated in verse, especially his last fight of the Revolution, on the *Alliance*. The poetic description of Barry's reply to the hail of the *Alliance* deserves to be commemorated:

> This is the ship *Alliance*
> From Philadelphia town,
> And proudly bids defiance
> To England's King and Crown.
> As captain on her deck I stand
> And guard her banner true,
> Half Yankee and half Irishman,
> What tyrant's slave are you?

This shows the dashing spirit of Barry and shows that the love of his native country, which always remained with him, was the solid foundation for his devotion and loyalty to his adopted country.

This monument is a fitting recognition of the services of John Barry to his country. It will serve to stimulate study into the character and services of Barry. His memory can not fail to prove an inspiration to all who study his life. Commodore John Barry, by his life of service, welded one more link to tie together in admiration and friendship the people of Ireland and America. [Applause.]

Mr. SIMS. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Tennessee?

Mr. MANN. Reserving the right to object, I would like to ask the gentleman if he intends to insert his speech in the middle of the debate on the naval appropriation bill. The other day we gave some one leave to do something of this sort with the expectation that it would not interfere with the reading of the debate, and a long speech was sandwiched into the debate, just as though it had been delivered on the floor.

Mr. GARNER. Mr. Chairman, I would like to ask if we did not issue an order not long ago against that very thing?

Mr. MANN. No; we could not issue an order about it.

Mr. GARNER. It was generally understood that the extension of remarks should go in the latter part of the RECORD.

Mr. SIMS. I want mine to go in the latter part of the RECORD, where it will be read.

Mr. ROBERTS of Massachusetts. The gentleman ought to make it a part of his request that it shall follow at the end of the day's proceedings.

The CHAIRMAN. Is there objection to the request of the gentleman from Tennessee to extend his remarks in the RECORD?

Mr. MANN. I do not object.

The CHAIRMAN. The Chair hears no objection, and the leave is granted.

The Clerk read as follows:

> One seagoing submarine torpedo boat, to cost not to exceed $1,100,000; and the sum of $500,000 is hereby appropriated for said purpose.

Mr. BUCHANAN of Illinois. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

> Page 53, line 18, after the word "purpose," insert the words "to be constructed in a Government navy yard."

Mr. BUCHANAN of Illinois. Mr. Chairman, I am in favor of the Government manufacturing all its munitions of war—battleships, steel armor plate, and everything pertaining thereto—because I know that if the Government would do that and cut out the influence of these profit-seeking corporations throughout the country, influencing Congress to expend large sums of money for naval defense, which they do not now need or never will—if we could do that, and add to it a tax on large incomes to pay the expense for this naval defense, you would see some of these trust newspaper editorials and other influences that are

working for these extravagant expenditures turn tail and oppose these large and unnecessary expenditures instead of being in favor of them. If the Members of this House believe in work being done under conditions that are more favorable to labor, under conditions where we will get better work and more perfect work done, to greater advantage of the people of the country; if they are sincere in desiring this expenditure for the purpose of helping the working men, then they will support this kind of an amendment. If they are not, of course they will vote it down, as they did the other one. I note here that my good friends from New York, after they were satisfied in regard to one battleship, oppose the amendment that provided that two battleships might be built in some other navy yard. Is the Brooklyn Navy Yard the only navy yard this Congress is interested in, in utilizing the equipment with which they are prepared, for the manufacture of munitions of war? I favor the New York Navy Yard being kept employed in the manufacture of these battleships and other munitions of war, but I also believe that we ought to utilize other navy yards, those on the Pacific coast and elsewhere, at Boston, and throughout the country. As long as we have this work to do, let us employ that equipment that costs the Government so much money and which can do the work more efficiently and, in my judgment, much more cheaply.

Mr. MOORE. Mr. Chairman, I desire to oppose the amendment of the gentleman from Illinois [Mr. BUCHANAN]. I wish to do so upon the merits of the argument that he has presented. He wants Government ownership. He wants the Government to become the sole employer of everybody who works, whether he works in a shipyard or on the farm. I am not prepared to go that far with him. I do not think labor demands that of this Congress. When he speaks of those of us who have stood for the construction of one battleship or one transport in the navy yards, he refers to those who have done the best they could for the navy yards in their vicinity, as they ought to do as true representatives of the people. But the gentleman utterly fails to see the thousands of men employed, earning honest livings by honest toil, outside of the navy yards. I will stand for the navy yard in the city which I have the honor in part to represent as long as the navy yard is there, and men are employed in it, and I will do everything possible to get ships built there, but at the same time——

Mr. BUCHANAN of Illinois. Mr. Chairman, will the gentleman yield?

Mr. MOORE. Not now—but at the same time I have in mind a picture of a great hive of industry directly across the river, which employs 5,000 men, building ships, not only ships of the Navy but ships of commerce, and at the same time I have in mind a great shipyard in my own district, not far from the navy yard, where over 4,000 men are employed this very day building ships, not for the Government but for private enterprise, which I want to encourage. I do not propose at this time to vote out of employment 5,000 men employed in the New York Shipbuilding Co.'s yards, sustaining by the honest wage they earn 25,000 men, women, and children. I do not propose to vote with the gentleman from Illinois for the proposition to vote out of employment 4,000 employees working in Cramp's shipyard, sustaining by their honest wage, honestly earned outside of the Government employment, at least 20,000 people. The gentleman has a second think coming on this Government ownership business, and if he attempts to stampede this House, as he has frequently done on other occasions, he has got to take into account the independent voters of the land, whether they belong to labor unions or not—I am in favor of labor unions, which have a right to express themselves in favor of their own wages and their own employment—but I do not intend to vote 9,000 men out of work in this instance, nor any part of them.

Mr. BUCHANAN of Illinois. Mr. Chairman, will the gentleman yield?

Mr. MOORE. Yes.

Mr. BUCHANAN of Illinois. Is the gentleman in favor of the Government owning the navy yard at Philadelphia?

Mr. MOORE. Certainly.

Mr. BUCHANAN of Illinois. Would he be opposed to building this ship in that navy yard?

Mr. MOORE. I would, if it throws out of employment thousands of men who would not be employed otherwise.

Mr. BUCHANAN of Illinois. He would oppose it if it took away profits from contractors.

Mr. MOORE. Oh, does the gentleman favor the turning out of employment 9,000 men who are working for the New York Shipbuilding Co. and the Cramps? Does he propose to turn these men out of employment to carry on his fad of Government ownership? Let the gentleman rise and tell me whether he is in favor of our labor or not?

Mr. BUCHANAN of Illinois. Mr. Chairman, I am in favor of employing men in Government yards, under better conditions and for better wages, which the gentleman is opposing now when he is opposing this amendment. He is in favor of their being worked longer hours for the profit of corporations.

Mr. MOORE. Oh, I have heard the gentleman sing that song before, but he does not want to sing it to these people who are working in independent yards, who are members of labor unions, who are paying their dues to these unions, and who work under the eight-hour rule. How did the gentleman vote on the question of shipbuilding ways? Against it, did he not?

The CHAIRMAN (Mr. HOUSTON). The time of the gentleman from Pennsylvania has expired.

Mr. HENSLEY. Mr. Chairman, I desire to heartily support the amendment offered by my colleague, Mr. BUCHANAN of Illinois. It seems to me that the gentleman from Pennsylvania [Mr. MOORE] is shortsighted when he makes the character of argument he has just made. It does require a certain amount of labor in the construction of these ships, whether built in a Government yard or a private yard.

I can see no reason, no logic, to the drift of the gentleman's argument. However, the question of the amount of labor involved, whether constructed in a Government or a private yard, is not the real issue. That is a distinction without a difference. Mr. Chairman, I desire to call the attention of Members of the House to what these authorizations mean to these profit-making concerns who are pressing Congress all the time for increases. I believe in Government construction, as that will eliminate the tremendous profits from excessive war preparations. Even then we are warranted, at least comparatively speaking, in assuming that it will require the same amount of labor to construct a ship in a Government yard as in a private yard. I have before me a paper known as "The Navy," containing a picture of a magnificent banquet given by the Navy League at New York City at the Waldorf-Astoria. At that banquet was the present Secretary of the Navy of the United States. I desire to call the attention of Congress to some of the things the Secretary said on that occasion. He quoted from an examination made before the Committee on Naval Affairs, and in this connection I will read from his speech:

> I quote from page 617, hearings of the Secretary of the Navy before the House Naval Committee this year. I had mentioned meeting Gen. Porter at the Navy League meeting last spring. This prompted the following question from Congressman HENSLEY:
> "You do not realize the fact that that institution is organized for the very purpose of disseminating the sentiment in the country for bringing about a larger navy?"
> To which I answered:
> "Undoubtedly."
> Then this question follows:
> "Mr. HENSLEY. They insist all the time that they are actuated wholly and solely from patriotic and noble purposes as against fellows like Judge WITHERSPOON and myself and others who have not the good of our country at heart?"

I want the committee to note this, as it shows that these people who are urging increases in the Navy are at all times engaged in an effort to influence Members of this House and men in high positions in this Government.

Mr. ROBERTS of Massachusetts. Mr. Chairman, will the gentleman yield?

Mr. HENSLEY. No; I will not yield; I have not the time.

In this speech the Secretary of the Navy pleads for the support of the Navy League. He asked them to support him. He refers to the fact that they have been criticizing some of his policies, and in that connection I desire to say that I do not withhold my approbation of many things the Secretary has done, but, to the contrary, there are a great many things for which I give him my hearty approbation. But some of the things I do not approve and never will approve so long as I continue to think as I do. Now, then, let us go a little further. The Secretary said:

> I will not read the whole dialogue, but I want to call your attention to the remark later on by Congressman HENSLEY.
> Mr. HENSLEY. These people who are making that character of campaign are the ones who are being materially benefited, the fellows who expect to get something direct out of it. That is what I complain of.

And the Secretary, as the hearings will show you, replied:

> If that is true I complain of that as much as you.

At that banquet he did not quote this last sentence. Seated around the table at that banquet were gentlemen to whose names I will call your attention. There were present a number of admirals and rear admirals, Gen. Horace Porter, Col. Robert M. Thompson, representatives of great banking institutions, and

others. The connection of these gentlemen with the Navy League and their relation to the great supply concerns of the country was explained to this House a few days ago by the gentleman from Nebraska [Mr. BARTON], and I desire to refer to them more particularly later on.

There were a number of seats vacant at this banquet. On previous occasions I have observed among the list of guests of the Navy League the names of various Members of Congress, and if those gentlemen present at this banquet had thought that the Secretary of the Navy would in his speech place the stamp of disapproval upon a campaign of this kind there would have been more vacant seats at this banquet than this picture shows.

Mr. MANN. Will the gentleman yield for a question?

Mr. HENSLEY. In just half a second. Each Member of the House, I take it, has received a copy of this publication. If so, I ask you to read the speech made by the Secretary and the speeches made by the other gentlemen gathered at that banquet.

The CHAIRMAN. The time of the gentleman has expired.

Mr. WITHERSPOON. Mr. Chairman, I ask unanimous consent that the gentleman may proceed for five minutes.

The CHAIRMAN. The gentleman from Mississippi asks unanimous consent that the gentleman from Missouri may proceed for five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. HENSLEY. Now I yield to the gentleman from Illinois.

Mr. MANN. Did not the Secretary of the Navy in that banquet speech state that he had been defending the Navy League, and hence he thought in fairness they ought to support him in reciprocation of his defense?

Mr. HENSLEY. I think that is practically true, I will say to my friend from Illinois. I can not quote the entire speech, but I want to appeal to the membership of the House to read the speech carefully and then pass judgment upon it.

Mr. MANN. Fortunately the Navy League sent a copy of that paper to me, and I read the speech. A speech of that kind would be forgiven because it was made at a banquet, but it would not be at any other place.

Mr. HENSLEY. It is impossible to blow both hot and cold.

Mr. MADDEN. They do not drink at those banquets now, do they?

Mr. LANGLEY. They drink grape juice.

Mr. HENSLEY. I desire to say I am keeping a record of these magnificent banquets. I am trying to single out and know the Members of this House and men in high positions in this Government who are accepting invitations to these banquets and play the part that is carefully mapped out for them.

I think sometime it will be a very valuable contribution to some paper like the Saturday Evening Post, so that the people may know what is being done; what purpose these people connected with these banquets have behind them; what is intended to be accomplished by inviting Members of Congress; not because of their splendid talents; not because they want them to be present at these banquets for the enjoyment of their company and association, but it is because those gentlemen are Members of Congress and hold places here as members of important committees. Oh, we are told that they merely desire to be sociable and courteous and that they do not mean to improperly influence Members and others. Do you suppose that the magnificent banquets, which cost thousands of dollars, would be given by those paying the bills if they did not expect returns upon the investment? Do you suppose that those of us who receive invitations to these banquets would be noticed by these great bankers and others who are connected with the Armor Plate, Powder Trust, or some other supply concern if we were not Members of Congress and did not possess something they are looking for? No; not by any means. They are looking after "suckers"; and I am sorry to say that too frequently they string them through the use of just such bait. It is claimed there is no wrong intended. Oh, no. This reminds me of what an old Member told me a few days ago. He said, as I have previously stated, that when he first came to Congress a representative of certain railroads was stationed in Statuary Hall, issuing passes to Members and their families over those roads. They argued then that giving Members passes was not intended to influence them; but the people said, "We will put a stop to such transactions," and Congress put a law upon the statute books making it an offense for the railroad to issue or for a Member of Congress to receive a pass. I say to you that the people will not stand for such conduct as this on the part of our trusted officers any longer than they can get to them after they once understand the facts.

Mr. CALDER. Were any Members of Congress present at that banquet?

Mr. HENSLEY. So far as I have observed I believe not, but I am not sure. I will look that over further later on, I will say to my friend from New York.

Mr. CALDER. I have looked it over, and I did not see the names of any Members of Congress present.

Mr. HENSLEY. Now, Mr. Chairman, I desire to refer more particularly to the speech of the gentleman from Nebraska [Mr. BARTON], in which he called the attention of the House to the personnel of the Navy League and its purpose. Now listen:

Mr. J. Pierpont Morgan was until his death one of the directors, and intensely interested in the league's work, to which he was a liberal contributor. Mr. Herbert L. Satterlee, general counsel for the league, is a son-in-law and heir of Mr. Morgan.

Gen. Horace Porter is president of the league. He was for many years an officer of the Pullman Co., which is a Morgan corporation.

Mr. Charles G. Glover is treasurer of the league. He is president of the Riggs National Bank, which is closer to Wall Street than any other bank in Washington.

Col. Robert L. Thompson is chairman of the executive committee of the league. He is an eminent financier of New York, whose great interests generally coincide with the colossal undertakings of the Morgan group. He is also the head—being chairman of the board—of the International Nickel Co. and holds the honorable post of president of the New York Metal Exchange.

Mr. J. Frederick Pams is director of the league. He is a New York society and yachting man, a friend of Mr. Morgan and a member of Mr. Morgan's yacht club.

Mr. George von L. Meyer is a director of the league. Mr. Meyer was Secretary of the Navy in the Taft administration and on March 3 signed the remarkable contract for the *Pennsylvania's* armor that has been the subject for unpleasant comment in Congress and elsewhere. He is a considerable stockholder in the New Haven Railroad, which is a Morgan concern, and is also a director in the Amoskeag Manufacturing Co., at Manchester, N. H., and has on the board as his associates Mr. F. C. Dumine, who helped Mr. Morgan to incorporate the Boston Railroad Holding Co., by which the New Haven was enabled to hold the Boston & Maine in spite of certain provisions of the Massachusetts law. Mr. Dumine is also a director of the Fore River Shipbuilding Co., which is on friendly terms with the Morgan group and affiliated with United States Steel.

With a board of directors containing all of these wise and experienced men that are on terms of friendship with our greatest captains of industry our defenseless condition may be believed to be in safe hands and the activities of the Navy League to be unremitting.

Does anyone here believe that these gentlemen are actuated by altruistic motives? Whether these ships are constructed in Government or private yard, is not the labor item infinitesimal as compared with the amount expended for armor plate which is furnished by these great supply concerns?

Let me say right here that in the last Congress I called the attention of the House to the fact that J. P. Morgan, jr., was secretary and treasurer of the Navy League. Shortly thereafter he resigned from that position.

Gentlemen, my position is this: That if the honest sentiment of our country calls for 10 battleships to defend the Nation's honor, then I am ready to vote for them. But I say to you here and now, when pressure is brought to bear upon Congress by these gentlemen and by associations of this character to induce Congress to respond to increases because of the profits they derive out of the business, I stand here and say it is unpatriotic, it is un-American, for a Member of Congress to support such increases. [Applause.]

But aside from the question as to whether we really need additional battleships now, or whether wisdom and experience suggest that we make provision for arming and manning, making effective, the battleships we already have constructed and lying idle, certainly, in view of all the facts adduced, we should all cooperate in an effort to take private interests out of the construction of battleships. The tax burden, after having utilized every economy and provided every safeguard in behalf of the public, is even then heavy enough. My colleague, Mr. BUCHANAN of Illinois, submitted the other day a copy of a resolution from certain labor organizations in his State. He appealed to the House especially in behalf of the laboring people. I desire here to read the resolution:

DANVILLE, ILL., *February 28, 1914.*

Hon. FRANK BUCHANAN, M. C.,
Washington, D. C.

DEAR SIR: I notice by the papers that you voted in the negative on the two-battleship program.

Allow me to extend to you my heartiest congratulations for so doing, as that expresses the sentiments of the labor organizations in this community.

I have inclosed a copy of resolutions, which were passed by the Danville Trades and Labor Council, and unanimously indorsed by Vermilion Lodge 473, International Association of Machinists, which was in response to a circular letter sent out by Lodge 174, International Association of Machinists, Washington, D. C., requesting all local lodges to urge their respective Congressmen and Senators to support the two-battleship program.

Again thanking you for the support rendered in the interest of the working class as a whole, and assuring you that if the opportunity ever presents itself whereby we could give you any assistance we would be glad to do so, I am,

Yours, for anything that is to the interest of the working class,

[SEAL.] W. T. RIZER,
Recording Secretary Local 473, I. A. of M., Danville, Ill.

This is the resolution in response to the request:

INTERNATIONAL ASSOCIATION OF MACHINISTS,
VERMILION LODGE, NO. 473,
Danville, Ill., January 23, 1914.

Whereas the legislative committee, Columbia Lodge, No. 174, of the International Association of Machinists, has appealed to the Danville Trades and Labor Council and Local 473, International Association of Machinists, for moral support, wherein they ask that we favor the construction of more battleships instead of lessening battleship construction, giving as a reason to obtain said support that at a time when work is becoming slack throughout the country it is unwise to aggravate the condition by adopting a policy of naval construction that will throw thousands of workingmen out of employment; and

Whereas we know that the construction of battleships is intended for war purposes, and that all the expenses of all the wars in all the world in all times have been paid with the results of productive labor, always resulting in the working class paying all the expenses of all wars; and

Whereas we realize that in war soldiers cease to produce wealth, and finally soldiers actually destroy wealth; and

Whereas we believe that war appropriations could be applied in a more beneficial way to society in general; for instance, the cost of the Civil War amounted to $31,521,815,230.60. This sum, if applied to another way, would pay for a $1,700 home and also for $400 worth of furniture for each house for a total population of 90,000,000 people, estimating 6 per family in each home. Or this sum would pay all the salaries of 25,000 school-teachers, at $625 per year, from the birth of Christ to the year 1909, and leave sufficient to establish 50 universities, each institution provided with $10,000,000 worth of buildings and equipment, and each institution provided also with a $10,000,000 endowment fund for running expenses; and

Whereas we believe the members of the aforesaid lodge are promoting war, even though they would have it appear to the contrary, by asking for increased construction of battleships; and

Whereas we believe that whoever would understand war must give special attention, first, to the economic interpretation of history; second, to the class struggle, considered historically and currently; and, third, to surplus value, produced by the workers, but legally escaping from their control to the capitalist class, as a result of the institution of private ownership and private control of the collectively used means of production: Therefore be it

Resolved by the Danville Trades and Labor Council and Vermilion Lodge, No. 473, International Association of Machinists, That we disapprove of the appeal made by the aforesaid Lodge No. 174, believing that occasional literary and oratorical snowballs ignorantly, gracefully, and grammatically tossed in the direction of hell (for war is hell) will have no effect on the general temperature of that warlike region; and be it further

Resolved, That the two inclosed petitions intended for to be sent to our Congressmen and Senators be left blank, and that a copy of these resolutions be sent to Lodge No. 174 and the monthly journal of the International Association of Machinists for publication.

DANVILLE TRADES AND LABOR COUNCIL,
JOHN F. DEMLOW,
P. R. CHRISTENSON,
GEO. W. BERRY,
Resolution Committee.

Adopted by Local No. 473, International Association of Machinists, January 26, 1914.

H. A. WISE, *President.*
W. T. RIZER, *Recording Secretary.*
EDWARD M. METHE,
PERCY MOLYNEAUX,
FRED WITTIG,
Resolution Committee.

But, Mr. Chairman, for the comforting assurance and for the peace of mind of the gentlemen connected with these great supply companies, who profess such a deep concern regarding our national defense and who are financing these magnificent banquets, inviting Members of Congress, the Secretary of the Navy, and others, for the purpose of urging and promoting increases in the naval-construction program, the materials for which are furnished by their respective concerns, if they desire additional battleships after we have enacted the bill introduced by the gentleman from Pennsylvania [Mr. BAILEY] which provides for a battleship tax on incomes of over $20,000 annually, then I shall favor permitting these gentlemen to indulge their tastes to any extent whatsoever in battleships. But, Mr. Chairman, just as quickly as we can pass this bill, and I favor its passage, these identical gentlemen, like Judge WITHERSPOON, myself, and others, will then be found inquiring into the necessity for these authorizations. Under such a system these expenditures will have been transformed from a source of profit to them to a liability. You will then find fewer banquets, less agitation in favor of additional battleships, and no opposition to Government construction of the necessary ships for defensive purposes. Then, you will also find that our naval bill each year will be formulated with a view of obtaining the greatest possible efficiency in the Navy with the very lowest possible expenditure.

Mr. PADGETT. Mr. Chairman, I have only a word or two to say in addition to what I said a while ago in reference to the torpedo boats. These submarines are all under patent, and if the Government would undertake to buy them it would have to pay on each submarine somewhere from $50,000 to $75,000 for the use of the patent. There is no use in discussing the matter further. It means an additional cost of many hundreds of thousands of dollars.

Mr. BUCHANAN of Illinois. Will the gentleman yield?

Mr. PADGETT. Yes.

Mr. BUCHANAN of Illinois. Does the gentleman contend that this is a submarine?

Mr. PADGETT. Yes, sir. It is one seagoing submarine, subject to patents. Mr. Chairman, I ask for a vote.

Mr. BARTON. Mr. Chairman, I have sat through this bill up to this time without making any remarks, and I would like to be recognized for five minutes.

Mr. PADGETT. Mr. Chairman, I ask unanimous consent that debate on this paragraph and all amendments thereto close in 15 minutes, 5 minutes to the gentleman from Nebraska [Mr. BARTON], 5 minutes to the gentleman from Pennsylvania [Mr. GRAHAM], and 5 minutes to the gentleman from Illinois [Mr. MANN].

Mr. CARY. Mr. Chairman, I would like to ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

The CHAIRMAN. The gentleman from Tennessee [Mr. PADGETT] asks unanimous consent——

Mr. BUCHANAN of Illinois. I would like to add to that three minutes if I should want to use them.

Mr. PADGETT. The gentleman has already discussed the matter.

Mr. BARTON. I will yield him two minutes of my time.

Mr. BUCHANAN of Illinois. I do not want to ask the gentleman's time. I want time of my own.

The CHAIRMAN. The gentleman from Tennessee [Mr. PADGETT] asks unanimous consent that all debate on the pending amendment close in 15 minutes.

Mr. BUCHANAN of Illinois. I object, Mr. Chairman.

Mr. PADGETT. I move that all debate on this paragraph and all amendments thereto close in 15 minutes.

The CHAIRMAN. The gentleman from Tennessee [Mr. PADGETT] moves that debate on this paragraph and all amendments thereto close in 15 minutes.

Mr. BUCHANAN of Illinois. Mr. Chairman, I desire to amend that motion by making it 18 minutes.

The CHAIRMAN. The gentleman from Illinois [Mr. BUCHANAN] offers to amend the motion by making it read 18 minutes. The question is on agreeing to the amendment.

The amendment was agreed to.

The CHAIRMAN. The question is on the motion of the gentleman from Tennessee as amended.

The motion as amended was agreed to.

Mr. BARTON. Mr. Chairman, I have regularly attended every session of this body since becoming a Member, and I have listened, as the membership will observe, much more than I have spoken. I recognize the fact that Members who have been here for a longer term of years hold over me in experience and maybe, sometimes, in judgment; but I will yield to no man, be he young or old, in this body, loyalty to my country and the right, if you may please to call it, to settle in my own mind and conscience matters that are for the good of my country.

There is one skeleton that has been trotted out here every time we have talked about doing any business for the Government. I have read back into the history of the fight of the powder factories, and found that skeleton was almost worn threadbare at that time, and it was that old bugaboo of Government ownership. We heard it when we were talking about the Alaskan railroad. We heard it when we were discussing the bill to provide for the making of our own powder, and we are now hearing about it when we contemplate building our own ships in our own navy yards. And the gentleman from Pennsylvania [Mr. MOORE], who is usually mighty clear in his reasoning, has not satisfied me yet as to how the erection of this ship by the Government is going to displace workmen.

The statement has been made on the floor of the House that all the men at the navy yards are now engaged and that those who work in private plants are engaged. If we build the ships ourselves, it will simply be the Government employing those laborers instead of the big shipbuilding companies employing them, so if I have my way as to whether or not the ships shall be built by the Government or by great organizations that we commonly call "trusts," I am in favor of the Government building them.

As to banquets, not long ago we received a very facetious lecture by the leader of the minority on the subject of banquets. I gave his statements serious consideration, although I said but little about it. I do not believe that a banquet would change any Member here who had settled convictions on a question. And yet there is in these banquets a subtle influence that has convinced me that the Government should pay the expenses on Government business and banquets by people who want Government money expended should be tabooed. [Applause.]

Mr. CALLAWAY. Mr. Chairman——

The CHAIRMAN. Will the gentleman from Nebraska yield to the gentleman from Texas?

Mr. BARTON. Yes, sir.

Mr. CALLAWAY. I want to know if the gentleman does not think that the men giving these banquets really believe they are a good investment or they would not put their money out in this way?

Mr. BARTON. I most certainly do. [Applause.] And as to the banquets of the Navy League, in the limited time I have here, and having listened to remarks that have been made relative to the Navy League, it seems to me that the actions of that body have been of such a nature that this body should look closely into the actions of the league through a committee that had nothing else to do. I believe that whenever a banquet is given, while it may not be intended to bribe men, there is an influence used to bring about the result the banquet is given for, and you are breaking bread with the men you intend to help or hinder. In my judgment, our public men should not receive favors from men or bodies that are seeking appropriations or favors from this Government.

I want to say another thing while I am discussing this matter, and that is as to the resolution introduced by my friend from Missouri [Mr. HENSLEY], which passed this body almost by a unanimous vote. I would like to know where that is reposing now. I would like to know why the voice of this body to the nations of this earth is not worth something. I would like to know where that resolution is at the present time, and whether anybody outside the confines of the office where it is now resting has ever heard of the Hensley resolution. We are entitled to have that resolution go to the countries of this world and do what we proclaim we want done—establish for the Governments of this world peace and stop the battleship business. [Applause.]

Mr. MANN. Mr. Chairman, I think I can tell the gentleman where the Hensley resolution is. It is at one of two places. It is either on one of the battleships down at Vera Cruz [laughter], or else it is transmitted to the new capital of the country in London to find out whether the British Government will permit us to suggest to the world that we have the right to make a request. [Applause.]

Now, I do not think that people are to be criticized for attending banquets. I do not think that the Navy League is to be criticized because it endeavors to build up a Navy. I wonder sometimes how it is that so many gentlemen in the House are approached, as they say, by these influences which they describe as improper. I have been here now nearly 18 years, and no one has ever endeavored to influence my action upon such matters. Sometimes somebody comes to see me about a private bill, but that is an easy matter to dispose of.

Mr. BARTON. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Illinois yield to the gentleman from Nebraska?

Mr. MANN. Very briefly.

Mr. BARTON. I simply say that I know the gentleman would not want to misquote me. I never made the remark that I had been approached during my service in this House.

Mr. MANN. I am not referring to the gentleman. I am not referring to improper approaches. I am speaking of the practice of gentlemen outside seeking you out to influence your judgment. I know that from my position in the House I have some influence in the House. The Navy League has never bothered me, and they have never known how I was going to vote. I received, I suppose, through their courtesy, a copy of the paper which the gentleman from Missouri [Mr. HENSLEY] held in his hand a moment ago, and I should have supposed that an enemy of the Navy League rather than a friend had sent it out, after reading part of it.

I do not believe that these people outside have so very much influence on the inside of the House. I see the page boys running around with a great many telegrams. I suppose I know what they are about, although I have instructed the people where I live to present me no telegrams except in the morning, and then they are brought over and are given to my secretary. I have instructed my secretary to give me no telegrams in reference to prohibition or suffrage. [Laughter.]

Now, that is an easy way out of it. Everybody knows that you can flood Congress with such things, but who pays attention to them who has nerve or backbone? A Member of Congress who has neither nerve nor backbone ought to be retired. [Applause.]

Mr. HENSLEY. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Illinois yield to the gentleman from Missouri?

Mr. MANN. Certainly.

Mr. HENSLEY. And it is the gentleman's opinion that these investments in banquets given by these men, like Thompson, who get profits out of them, are not good investments?

Mr. MANN. Oh, I am not afraid of a courtesy. The gentleman, if he rides on a street car with me, will pay my fare, or else I will pay his fare; but that does not mean that I am trying to bribe him or that he is trying to bribe me. That is courtesy. I go to a banquet or a dinner in this town very frequently. I do not consider that I am bound by any influence that could be brought to bear upon me, or that I am supposed to be bound, and nobody else does. It is only the gentlemen with vivid imaginations who are always afraid they will be corrupted. [Laughter and applause.] There is no such thing as corruption of Congress, either through attending banquets or otherwise. A gentleman ought to be able to extend courtesies and receive courtesies, to break bread and eat meat with friends, without feeling that thereby they have absolved themselves from the proper performance of their duty or that they have turned over their judgment to some man who has invited them to participate in that entertainment.

Mr. HENSLEY. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Illinois yield to the gentleman from Missouri?

Mr. MANN. I yield.

Mr. HENSLEY. Is not that the same character of argument that was made before we passed the law prohibiting the issuance of passes over railroads?

Mr. MANN. I did not hear the gentleman.

Mr. HENSLEY. Was not that the same character of argument that was made against the passage of the law prohibiting the issuance of passes by railroads—certainly not by my friend from Illinois, but by others?

Mr. MANN. I do not know. I never made an argument on the subject of passes one way or another. But that is an entirely different proposition. A pass under the present construction is not a courtesy. At one time it was. Does the gentleman believe that because gentlemen of the House accept the hospitality of the Government and go down to Panama, as most of them have done, they are obliged to do what the Government or the executive department wants in reference to Panama? Is that it? Not at all. Gentlemen who go have the right to receive that hospitality, but it is personal. It is much the same way with respect to banquets. I am not afraid of banquets. The gentleman need not be afraid to extend an invitation to me to a banquet. I might not go, but if I went I would still be able to do what I think is right, regardless of the banquet.

Mr. HENSLEY. I will say to the gentleman that I never will invite him to my home and after I get him there ask him to favor some proposition that means profit to me.

Mr. MANN. Well, the gentleman will never invite me, and under his conception of it I would be afraid to go, if I supposed that in inviting me the gentleman thought he could thereby influence my judgment. I would not let him think that. [Applause.]

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. GRAHAM of Pennsylvania rose.

The CHAIRMAN. The gentleman from Pennsylvania is recognized for three minutes.

Mr. GRAHAM of Pennsylvania. Mr. Chairman, I do not know that I care to occupy that much time. What has been so ably said by the gentleman from Illinois [Mr. MANN] has expressed fully the sentiment that was in my thought with reference to this discussion.

I would only add a word deprecating this style and manner of discussion in this great legislative body. Why is it that upon a question of this kind there must always appear to be such a diversity of interest that it looks as if it were almost a declaration of war between classes, sections, and interests in our country? Why can we not, as Americans, consider the welfare of the whole community, and not every man be grabbing for an advantage for the particular interest that he represents, or thinks he represents?

I wish to say, in answer to the gentlemen who referred to the Navy League, that I regard the Navy League as one of the patriotic institutions and voluntary gatherings of good people in this country who have only one thought in mind, and that is the maintenance of a navy that shall comport with the dignity and the greatness of this splendid Republic of ours. For many years before I became a Member of this House I was a contributing member of the Navy League, simply and solely from a sense of patriotic duty. I personally believe in a big Navy, because I believe it speaks for peace and that it will help to maintain peace.

Mr. TAVENNER rose.

Mr. GRAHAM of Pennsylvania. Mr. Chairman, I do not wish to be interrupted in the few minutes I have.

The CHAIRMAN. The gentleman declines to yield.

Mr. GRAHAM of Pennsylvania. I am for a big Navy, because I believe it helps to maintain the dignity of my country. I am for it in the interest of peace and as an American. I am also one of those who do not believe in the Government declaring itself at war with every big interest that may be created by thrift and skill in our midst. I am opposed to making war on everything because it simply has grown through the skill and ability of those who have had it in charge. European nations show us how they treat their successful business. We attempt to crush it at every step and in every stage. When citizens have been invited to invest their money in an enterprise like the great Cramp shipyard in Philadelphia, with a diversified stock ownership scattered through the community—upon which not one penny of dividend has been paid for 12 years, yet an organization has been kept up which has turned out battleships that are the pride and the glory of this country—why should we attempt to destroy an establishment like that and take the work from the workmen who are employed there and transfer it elsewhere simply upon the one cry against it that the contractor might make some profit out of the building of a ship. [Applause.]

Mr. BUCHANAN of Illinois. Mr. Chairman, I do not desire to take up much more time of the House, but I believe there ought to be something said in reply to the subterfuge in the form of an argument that has been made by the gentleman from Pennsylvania [Mr. MOORE] and also the gentleman from Pennsylvania [Mr. GRAHAM]. Some subterfuge is the only argument that anyone can make for profit-seeking criminal corporations.

Now, the gentleman from Pennsylvania [Mr. MOORE] has a navy yard in Philadelphia. I do not know whether it is in his district or not. I have heard him proclaim here what he wants to do for the people in that navy yard. I suppose his statements here have been printed in Philadelphia. We have to-day $100,000,000 invested in navy yards throughout the country, and the greater proportion of them are not being utilized. An amendment like this will help to make use of those navy yards on which the Government has expended so much money. I never heard the gentleman from Pennsylvania or any of the other gentlemen who are so much interested in keeping the profits in the pockets of these trusts and corporations make any protests against spending money in these navy yards to equip them; but after it is spent there, and oftentimes wasted to satisfy some one in those districts, then these gentlemen want them to lie idle and not be utilized.

Mr. MOORE. Mr. Chairman——

Mr. BUCHANAN of Illinois. I do not yield to the gentleman.

Mr. MOORE. I yielded to the gentleman from Illinois several times.

Mr. BUCHANAN of Illinois. I do not yield. You will find them all the time opposing remedial legislation for labor, such as the seaman's bill, eight-hour bills, and other measures of like sort that the laboring people throughout the country want. At least, if they can do it under cover, if they can do it by some subterfuge, you will find them everywhere and all the time exercising their influence to that extent. So it is that I expect such arguments from such men, making a subterfuge argument about Government ownership, when we have already got Government ownership of navy yards without any protest against it. But when it comes to putting something into those navy yards so that they may be utilized, to help to absorb some of the overhead charges and other useless expenditures, then you hear some one who is opposed to Government ownership. I favor it, as far as I am concerned. I favor the Government doing those things that it can do, and manufacturing its own supplies, and I repeat again, that if the Government would manufacture its own war munitions altogether and have an income tax on large incomes to pay expenses, you would see the gentlemen who are in this so-called Navy League turning tail, and opposing large expenditures; because they are the men with large incomes, and they are the people who are getting profit by these contracts that the Government is letting out for naval supplies.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois.

Mr. TAVENNER. Mr. Chairman, am I permitted to use the remaining time?

The CHAIRMAN. All time has expired.

Mr. TAVENNER. I ask unanimous consent for three minutes.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent for three minutes. Is there objection?

There was no objection.

Mr. TAVENNER. Mr. Chairman, the gentleman from Pennsylvania [Mr. MOORE] is an able and conscientious Representative, and I have sincere admiration for him. But he has been on both sides——

Mr. MOORE. Mr. Chairman, I should like to hear the gentleman if he is going to address his remarks to me.

The CHAIRMAN. The committee will be in order.

Mr. TAVENNER. I desire to repeat that the gentleman from Pennsylvania has been on both sides of this argument.

Mr. MOORE. No; the gentleman from Pennsylvania has not.

Mr. TAVENNER. Only a short time ago the gentleman made a speech on the floor of this House asking that the Frankford Arsenal at Philadelphia be increased, so that it could do some work that is now going to private manufacturers. I have before me the figures that the gentleman from Pennsylvania [Mr. MOORE] placed in the RECORD, stating that at the Frankford Arsenal at Philadelphia they were manufacturing 3-inch shrapnel cases for $1.75 that under private contract had been costing $3.06; that they were manufacturing 3.8-inch common shrapnel for $7.94, and that the very lowest price at which private manufacturers had ever done that work was $17.50.

The speech of the gentleman from Pennsylvania [Mr. MOORE] showed on the whole that on a $2,000,000 contract given to the Frankford Arsenal the Government had saved $979,000, or practically $1,000,000 on a $2,000,000 contract. The gentleman from Pennsylvania did not contend at that time that if the Frankford Arsenal was increased it would take work away from private manufacturers. I think that when he was on the Government side he made the most convincing argument by far. [Applause.]

Mr. MOORE. Mr. Chairman, I ask unanimous consent to speak for two minutes.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent for two minutes. Is there objection?

There was no objection.

Mr. MOORE. Mr. Chairman, I have not been on both sides of the question. I did put some figures in the RECORD which I am perfectly willing to stand by, that munitions of war could be made at the Frankford Arsenal cheaper than by outside manufacturers. I have stood up for the Philadelphia Navy Yard and for a transport to be built there. I do not believe that the gentleman from Illinois [Mr. BUCHANAN] voted to give us building ways on which to construct a ship. I believe he voted against it. I believe that he hocus-pocused this proposition to build a ship and then took away from us the means for building it.

Mr. BUCHANAN of Illinois rose.

Mr. MOORE. I can not yield. The gentleman from Illinois, Mr. TAVENNER, and the gentleman from Illinois, Mr. BUCHANAN, fail to grasp the very substance of this proposition, which is that if there is a navy yard that builds a ship and a private yard or a private shipbuilding company that builds a ship the result is competition.

Mr. DONOVAN. Will the gentleman yield?

Mr. MOORE. No; I have refused to yield. If there is a navy yard to build a ship and a private yard to build a ship, and two ships to be built, there will be more workmen to be employed, and there will be resulting competition. The gentleman wants to build all the ships under Government direction and have everybody in the navy yard. He wants a monopoly of Government control, and I want a fair competition between the Government manufacturing shops and manufacturers making the munitions of war to which the gentleman from Illinois [Mr. TAVENNER] refers.

Mr. BUCHANAN of Illinois. Mr. Chairman, I ask unanimous consent for three minutes more for the gentleman from Pennsylvania.

Mr. PADGETT. I object. Mr. Chairman, I ask for only one minute.

The CHAIRMAN. The gentleman from Tennessee [Mr. PADGETT] asks unanimous consent for one minute. Is there objection?

There was no objection.

Mr. PADGETT. I want to invite the attention of the House to the amendment that is pending, which is to build submarines at navy yards. We have no organization for that purpose, and it would cost a great deal more to build them in navy yards, as shown by the estimates. These submarines are under patents, and we would have to pay the patentee from $50,000 to $75,000 on each boat. I hope the amendment will be voted down.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois.

The question was taken, and the amendment was rejected.

The Clerk read as follows:

Four submarine boats, in an amount not exceeding in the aggregate $1,500,000; and the sum of $800,000 is hereby appropriated for said purpose.

Mr. BUCHANAN of Illinois. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

On page 54, line 5, after the word "purpose" insert "to be constructed in Government navy yards."

Mr. BUCHANAN of Illinois. Mr. Chairman, there is no reason why the navy yards can not be organized to construct submarines as well as private yards can organize, and the patents which the chairman of the committee speaks of cuts no figure, because those who have the patents no doubt charge it into the contract price and the Government pays for the patent. That goes without saying.

The fact is, of course, that there has been no effort on the part of the Navy Department to organize for the purpose of utilizing the yards for the construction of the auxiliary vessels of the Navy. The management of these yards is not what it ought to be. If we had the proper management of the navy yards of the country there is no doubt that we would construct vessels cheaper than they could be constructed in private yards. We have already shown in the manufacture of powder and guns that we can manufacture cheaper, and there is no doubt in my mind, Mr. Chairman, that if a proper effort was made we could manufacture these auxiliary boats cheaper than in any private yard. As we all know, the working people there get better wages, work under better conditions; that they get time for vacations that those do not who work in private yards, and it seems that those who speak almost with tears in their eyes f their love for the working people and the large expenditures in the Navy that they are making to give those working people the benefit and which, they claim, is for their interest, when it comes to putting the work in the place where it can be done under the best conditions for the working people, they change their position in regard to the matter.

[Mr. WILLIS, by unanimous consent, was given leave to extend his remarks in the RECORD.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois [Mr. BUCHANAN].

The question was taken; and on a division (demanded by Mr. BUCHANAN of Illinois) there were 34 ayes and 61 noes.

So the amendment was rejected.

The Clerk read as follows:

The three coast-defense submarine torpedo boats herein authorized shall be built on the Pacific coast: *Provided*, That the cost of construction on the Pacific coast does not exceed the cost of construction on the Atlantic coast plus the cost of transportation from the Atlantic to the Pacific; and the Secretary of the Navy is requested to consider the advisability of stationing the four small submarine torpedo boats herein authorized on the coast of the United States in the Gulf of Mexico as a proper naval defense thereof.

Mr. MANN. Mr. Chairman, I reserve a point of order on the paragraph. I would like to ask what is the reason for inserting in the bill a request to the Secretary of the Navy to consider the advisability of stationing the four small submarine torpedo boats in the Gulf of Mexico. Since when did Congress commence to determine where naval vessels should be located in the service?

Mr. PADGETT. A provision of a similar character was inserted in the bill a year ago.

Mr. MANN. Where did the item get in?

Mr. PADGETT. In the House.

Mr. MANN. What were those, submarines?

Mr. PADGETT. Submarines.

Mr. MANN. What was the effect of that?

Mr. PADGETT. The boats authorized have not yet been completed.

Mr. MANN. Is not the Secretary of the Navy quite competent to determine these questions? At that time, I believe, I was in the Chair and could not raise the point of order. I can not conceive of anything more silly than to ask the Secretary of the Navy to take into consideration whether he will have a certain vessel put here or there. That is his duty.

Mr. PADGETT. I admit that it is the duty of the Secretary of the Navy, but people who felt interested in the matter asked for the location of these submarines.

Mr. MANN. Which particular gentleman had this done?

Mr. PADGETT. A number of gentlemen appeared before the committee, both from the Pacific coast and from the Gulf coast.

Mr. MANN. But these items are usually put in for the purpose of renominating or reelecting some Member of Congress; and, perhaps, if I knew who it is, I would not make any objection. [Laughter.]

Mr. PADGETT. If the gentleman will look in the hearings, he will see.

Mr. MANN. Yes; but I am not going to look in the hearings.

Mr. GARRETT of Tennessee. Is the gentleman going to make the point of order?

Mr. MANN. Mr. Chairman, I am trying to find out who the gentleman was. I thought, perhaps, the gentleman who was particularly interested would rise. However, I am not going to say that the Secretary shall not have the opportunity of receiving the combined wisdom of Congress requesting him to exercise his jurisdiction, which he is required to exercise anyway, and to think, which he is supposed to do in any event.

Mr. PADGETT. Mr. Chairman, does the gentleman make the point of order?

Mr. MANN. I have not made it.

Mr. FITZGERALD. Mr. Chairman, I reserve the point of order. I wish to inquire of the gentleman from Tennessee [Mr. PADGETT] whether these seacoast-defense submarine torpedo boats are to be constructed in private yards.

Mr. PADGETT. There is no limitation here.

Mr. FITZGERALD. That is the intention?

Mr. PADGETT. I do not know whether they will be or not. The Secretary has been talking about equipping the yard at Mare Island with a view of building submarines.

Mr. FITZGERALD. But the argument used against the amendments offered by the gentleman from Illinois [Mr. BUCHANAN] has been that these yards have not been equipped. The provision is that they shall be built on the Pacific coast, providing the cost of construction upon the Pacific coast does not exceed the cost of construction on the Atlantic coast, plus the cost of transportation.

Mr. PADGETT. Yes.

Mr. FITZGERALD. How is the cost of transportation from the Atlantic coast to the Pacific coast to be determined?

Mr. PADGETT. If the boat is constructed on the Atlantic coast, it would have to be carried around through the canal to the Pacific coast, and what the cost of carrying it around to the Pacific coast as a completed vessel would be would make the difference.

Mr. FITZGERALD. Can that be ascertained in advance?

Mr. PADGETT. I think so.

Mr. FITZGERALD. Particularly as there are no steamer lines routed through the canal from the Atlantic coast to the Pacific coast at this time, or within the time within which these boats will be authorized.

Mr. PADGETT. I understand that they can go through on their own steam.

Mr. FITZGERALD. Mr. Chairman, when the Union Iron Works were in existence at San Francisco and the Moran Bros. plant existed at Seattle, for some years it had been the custom to carry a provision that certain vessels authorized in the naval appropriation bill should be constructed upon the Pacific coast, if the bids did not exceed the lowest bids from builders on the Atlantic coast by more than 4 per cent.

Mr. PADGETT. Five per cent, I think.

Mr. FITZGERALD. No; 4 per cent. I took occasion to point out that the contracts for the construction of those vessels had been awarded for construction on the Pacific coast upon bids that were exactly 4 per cent higher than the lowest bid of the bidders on the Atlantic coast, and it was a notorious fact that that did not happen merely by accident, but that there was a prearrangement among the bidders in respect to the bids. Is this intended to help out some particular shipbuilding concern located in some particular part of the United States?

Mr. PADGETT. Not that I have any knowledge of.

Mr. ROBERTS of Massachusetts. Mr. Chairman, will the gentleman yield?

Mr. FITZGERALD. Yes.

Mr. ROBERTS of Massachusetts. The main purpose of this provision is to insure the stationing of these boats on the Pacific coast. If they are constructed on the Atlantic coast and then carried around, it will cost much more than it will if the boats are constructed originally on the Pacific coast, even if the price is a little greater for construction than on the Atlantic coast.

Mr. FITZGERALD. Oh, this whole paragraph is due to the vivid imagination of some gentlemen who think that unless we put submarines on the Pacific coast we will wake up some morning and find that Japan has captured the entire Pacific coast.

Mr. ROBERTS of Massachusetts. Is it not well to allay the alarm on the part of the people? I think I remember a time when the people of New York were somewhat alarmed.

Mr. FITZGERALD. Oh, the gentleman is thinking of the people of Boston, who moved their valuables into the Berkshire Hills because they were afraid the Spanish fleet would capture them. There was no such condition in New York.

Mr. MANN. The people of New York moved out of the city.

Mr. FITZGERALD. Oh, no; they did not.

Mr. CURRY. Mr. Chairman, I am from the Pacific coast, and I desire to say that I am not afraid of the Japs, whether there are torpedo boats stationed on the Pacific coast or not.

Mr. FITZGERALD. What I am trying to ascertain is whether this is designed to help some particular shipbuilding concern located in some particular part of the country.

Mr. MADDEN. Or some navy yard.

Mr. FITZGERALD. They do not build these vessels in navy yards.

Mr. MANN. The fact is that those ships are needed on the Pacific coast.

Mr. FITZGERALD. Yes.

Mr. MANN. And it may be cheaper to build them there than to take them around. It is not a matter that ought to be discussed very much on the floor of the House, but there are very good reasons for putting them there.

Mr. FITZGERALD. We might as well discuss it on the floor of the House, because naval attachés read these bills, and they understand their provisions just as well as we do.

Mr. MANN. Possibly they do.

Mr. FITZGERALD. Then why fool ourselves?

Mr. MANN. That is quite a little different, however, from a formal discussion here that may be reported in some other parliamentary body and excite too much feeling.

Mr. FITZGERALD. Well, too much attention should not be paid to statements made on the floor of parliamentary bodies, either in this country or others.

Mr. MANN. Oh, the gentleman is mistaken.

Mr. FITZGERALD. I said there should not be; I did not say it is not.

Mr. MANN. That is correct; it should not be.

Mr. STEPHENS of California. Mr. Chairman, I will say in answer to the gentleman from New York [Mr. FITZGERALD] that the first part of this paragraph was placed in the bill largely at my instance. It was done so that the three submarine torpedo boats, which are authorized in a previous paragraph, and which are intended for service on the Pacific coast, might be built where they are to serve. As the gentleman from Illinois [Mr. MANN] has just said, there are good reasons, which need not be gone into at this time, for additionally protecting the Pacific coast by placing battleships and more armored cruisers and more submarines of all kinds in our various harbors there. If we build them on that coast, we are sure of having them there. Again, we are entitled to have a fair share of the vessels authorized by this bill built and commissioned on the Pacific shores. Our Pacific coast shipyards, be they Government or private, can at small expense be fitted to construct these vessels. The Government shops at Mare Island can build one, the Bremerton yard another, and the third can go to some private shipbuilding firm if the bids so warrant.

Mr. Chairman, when I asked the committee to authorize this Pacific coast construction I had in mind only justice to the Pacific coast, and the keeping of our workmen busy throughout the year. No private shipbuilding concern had ever suggested anything of the kind to me. None are located in the congressional district which I represent in this House, yet, Mr. Chairman, I am patriotically interested in the continued growth of the three or four private shipbuilding concerns located near our largest cities. I had in view first the continued development of our western shipbuilding and repairing plants belonging to the United States Government, and next, additional work for our private concerns and their workmen. I hope the gentleman will withdraw his point of order.

Mr. PAYNE. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. PAYNE. Is there anything at all before the committee?

The CHAIRMAN. The point of order has been reserved.

Mr. PAYNE. The point of order has not been made?

Mr. FITZGERALD. It has been reserved.

Mr. PAYNE. I object to this discussion; it is out of order, and it has not added anything to the sum of human knowledge for some time.

Mr. MANN. It will be impossible to finish the bill by half past 3 o'clock.

Mr. PAYNE. I have had a number of offers to pair with me if I want to go to the ball game, if that is what the gentleman is getting at. I think the gentleman himself would pair with me if I desired it.

Mr. MANN. The gentleman will pardon my suggestion of going to the ball game. I was assuming that he would.

Mr. PAYNE. I will say to the gentleman from Illinois I am anxious to get through with this bill by Saturday.

Mr. FITZGERALD. Mr. Chairman, I withdraw the point of order so far as I am concerned.

The Clerk read as follows:

The Secretary of the Navy shall build any of the vessels herein authorized in such navy yards as he may designate, should it reasonably appear that the persons, firms, or corporations, or the agents thereof, bidding for the construction of any of said vessels have entered into any combination, agreement, or understanding the effect, object, or purpose of which is to deprive the Government of fair, open, and unrestricted competition in letting contracts for the construction of any of said vessels.

Mr. GRAY. Mr. Chairman, I want to say something on the question of Government construction, and I take advantage of this opportunity. We have repelled foreign foes, we have suppressed domestic insurrection, we have asserted our supremacy against the world, and yet to-day we are quailing before the Steel Trust and paying tribute to the monopoly engaged in the construction of warships and warship supplies.

Every taxpayer of this Nation should know of the extortionate profits which are wrung from the people on account of the increase of the Navy. Every taxpayer should know that the builders of warships and the manufacturers of armor plate, arms and armament, and warship supplies are all combined and operating under a trust agreement to avoid competition and to arbitrarily fix and maintain prices and that the Government is at their mercy and is compelled to submit to their charges, without regard to the value of the work performed or the materials or articles furnished.

Every taxpayer should know that upon the one article of armor plate alone the Government has been compelled to pay millions of dollars more than the fair and reasonable cost of producing armor plate and is to-day still paying these excessive profits and monstrous overcharges. They should know that when we build these two new dreadnaught battleships we will require 16,000 tons of armor plate; that we will be compelled to pay the Steel Trust for this armor plate at the rate of not less than $440 per ton, or not less than $7,040,000; that the Government can manufacture this armor plate at a cost not exceeding $279 per ton, or not more than $4,464,000, and thereby save to the taxpayers of this country $2,576,000, which the Steel Trust will otherwise levy and collect as a tribute off of the American people.

They should know that what is true of armor plate is true of other articles—materials, works, and equipments that go into the construction of battleships. They should know that the total cost of these two dreadnaught battleships will be when completed $15,000,000 each, or a total cost of $30,000,000, and that substantially one-third of this sum, excepting for such articles as the Government manufactures itself, will be excessive profits and overcharge, commonly known and understood in present-day language as "graft," which the taxpayers will be compelled to pay as a tribute to the Steel Trust to swell the millions of Carnegie, Schwab, and Frick.

The taxpayers should know that the Government has been at the mercy of these naval-supply companies for more than a quarter of a century, and I want to give here a table which I have prepared, showing these monstrous overcharges which the United States has been compelled to pay every year since 1887 on the one single item of armor plate alone, to say nothing of the tribute levied from other material and other articles of arms and armament and supplies and equipment used in the Navy during that time:

Year.	Company.	Tons.	Average charge.	Total charged.	$279 per ton, reasonable cost to manufacturer.	Overcharge or annual tribute collected off of taxpayer.
1887	Bethlehem	6,891	$604.85	$4,168,000	$1,819,589	$2,348,411
1890	Carnegie	6,054	671.15	3,475,000	1,688,066	1,786,934
1893	Bethlehem	3,882				
	Carnegie	3,120				
	Total	7,002	658.72	4,604,000	1,953,558	2,650,442

	Midvale	10,462				
	Carbon Steel Co. [1]	61				
	Total	15,876	457.50	7,204,977	4,429,404	2,802,901
	Total overcharge					30,734,125

[1] New company.

The above total is the tribute levied upon this Government and collected from the American taxpayers during the last 25 years upon the one item of armor plate alone, and which could have been saved to the people by the Government manufacturing its own armor plate.

From the reports of the different investigations ordered by Congress and the disclosures made by the different Secretaries of the Navy relative to the cost of producing armor plate and the overcharges exacted of the Government, among other facts, it has been found that in 1894, when the steel companies were charging the United States $616.14 per ton for armor plate, the same companies were selling armor plate to the Russian Government for $249 per ton, or, in other words, they were charging the United States $367.14 per ton more than the foreign Government of Russia; that before the armor-plate manufacturers of the United States combined with the foreign armor-plate manufacturers under a world-wide trust agreement the United States manufacturers were selling armor plate to Italy, Japan, and other foreign Governments at prices far less than the prices they were compelling the United States to pay for armor plate; and that subsequent to this world-wide trust agreement among the armor-plate manufacturers Russia, Japan, and France have built armor-plate plants to avoid the excessive and extortionate charges for armor plate; and that by thus manufacturing their own armor plate these Governments have been able to obtain armor plate for about $200 a ton less than the manufacturers have been demanding.

It has also been found that at a hearing before the Senate Committee on Naval Affairs, ordered in January, 1896, to investigate the prices of armor plate with a view to building an armor-plate factory, and reporting February 11, 1897, that Lieut. Commander John A. Rodgers, among other witnesses and experts examined, stated:

I am of the opinion that the average cost of labor and materials will not be more than $250 per ton of armor.

From the report of Secretary of the Navy Herbert, made January 5, 1897, it is shown that armor plate can be manufactured at prices far less than the prices charged the Government, and ranging from $167.30 to $197.78 per ton, and from which report the following is quoted:

The Secretary called together a board composed of Lieuts. Karl Rohver, Kossuth Niles, and A. A. Ackerman, two of whom had been inspectors of armor at the Bethlehem Co.'s Iron Works; the other, Lieut. Ackerman, had been connected with the manufacture and use of steel in its different forms for a number of years, during which time he had spent several months at both the Bethlehem and Carnegie works. These gentlemen made an exhaustive report upon the cost of labor and material entering into a ton of armor, showing in detail every little item, beginning with the cost of the several ingredients charged in the furnace for casting the ingot preparatory to the forging process and ending with the work on the finished plate. The result of their calculations was that the cost of the labor and material in a ton of single-forged Harveyed nickel steel armor, the Government supplying the nickel (nickel at $20 per ton), was $167.30.

* * * * * * *

Lieut. Commander Rodgers, who had been an inspector at Bethlehem Iron Works, was called upon to make an estimate of the cost of manufacturing armor, and his report, based upon observation in the manufacture of armor, makes the cost of labor and material in a ton of single-forged Harveyed nickel steel armor $178.59.

* * * * * * *

The inspector of ordnance at the Carnegie Steel Co., Ensign C. B. McVay, was also called upon for an estimate, and his report, though made separately without consultation with the other officers, is that the labor and material in a ton of single-forged Harvey nickel steel armor is $161.54.

* * * * * * *

Average for single forged of above estimate is $185.38, and $197.78 for reforged armor.

It has been found from the report of every investigation made to ascertain the cost of producing armor plate that the fair and reasonable cost of producing such plate is far below the prices which the United States has been compelled to pay and is still paying, the highest estimate submitted being from Admiral Strauss, of the United States Navy, who fixes the limit of cost at $279 per ton in an armor-plate factory of 20,000 tons capacity, and it is from this estimate that the foregoing table has been made.

The means and methods through which the steel manufacturers maintain these extortionate prices for armor plate and which enable them to levy and collect this tribute of millions annually from the taxpayers of the United States are simple enough when the facts are known and understood. There has been only three companies engaged in producing armor plate in the United States—the Carnegie Steel Co., the Bethlehem Steel Co., and the Midvale Steel Co. The Carbon Steel Co. is a new organization just entering the armor-plate field. When bids are advertised for all these companies have made almost identically the same bid, and have frankly admitted that no matter which company is awarded the contract the business is divided among all the companies. Not only this, but these companies have been called upon by the Secretary of the Navy to show the figures and data as to why the prices for armor plate should not be reduced to the fair and reasonable cost of producing armor plate in accordance with the facts ascertained from the investigations made for that purpose. They have refused to reduce the price or to present any figure or any data whatever to show that their charges are not extortionate or that the cost of producing armor plate as ascertained by the many investigations made is not correct. In addition to this it has been found that this understanding among the armor-plate manufacturers is no longer confined to the United States, but has been extended to include all the armor-plate manufacturers of the world; that no foreign manufacturer will enter the United States to bid against the armor-plate companies here; that the Armor-plate Trust has been made world-wide; and that the United States, as well as foreign nations, is entirely at their mercy and is compelled to pay the prices fixed under this trust agreement regardless of the cost of production.

The history of these extortionate charges exacted of the Government for armor plate is almost incredible for belief. It has not only been proven, but it has been admitted by these companies themselves, that no competition exists among them; that their bids are not only always the same, but that the business is actually divided out among all of the companies, no matter

which company is awarded the contract. Repeated investigations have not only confirmed these charges that the prices exacted for armor plate are excessive and far above the reasonable cost of production, but when called upon by the Secretary of the Navy to give facts and data to show why these prices should not be reduced they have absolutely refused to make any showing whatever in justification. The facts are both affirmatively proven and admitted; and yet, in the face of all this, the steel companies have been permitted to destroy competition and to proceed unmolested from year to year to exact these vast sums of money from the United States Treasury.

An investigation of the record shows that attempts have been made from time to time to relieve the Government from these extortions and overcharges and to prevent the further collection of this tribute from the American taxpayers, by providing for the manufacture of armor by the Government, but that some mysterious influence has each time intervened to defeat these efforts and to frustrate the plans and prevent the same from being carried out. Both committees of Congress and Secretaries of the Navy have repeatedly reported these extortionate charges and recommended the construction of a Government armor plant to secure relief from the further exactions of the Steel Trust. The money to construct a Government armor plant has three times been appropriated and made available for that purpose, and still the United States is paying this tribute of millions of dollars annually to the armor-plate manufacturers.

We have now authorized two more dreadnaught battleships, calling for 16,000 tons of armor plate, for which we will be compelled to pay to the Steel Trust at the rate of not less than $440 per ton, or $7,040,000, of which $2,576,000 will be excessive overcharge.

It should be known that this vast sum of $30,734,125 could have been saved to the taxpayers of this country on the one item of armor plate alone by the Government manufacturing its own armor, and that there could be now saved to the taxpayers of this country in the building of these two dreadnaught battleships on the one item of armor plate over $2,576,000.

The authorization of these two battleships without providing for an armor-plate factory for the manufacture of the armor required is a surrender of the taxing power of this Government over to the Steel Trust to further extort from the people, and is a condonation of the pillage of the Federal Treasury for the last quarter of a century.

We boasted in the War with Tripoli that we had millions for defense, but not a dollar for tribute; but in the authorization of these two battleships to-day, if we refuse to build an armor-plate plant we not only say we have had $30,000,000 for tribute and are willing to pay more, but we will say we have not a dollar for the defense of the Treasury and the relief of the American taxpayer.

An amendment will be offered to this bill providing for the erection of an armor plant by the Government, and this House will not perform its duties to the taxpayers of the country nor vindicate the confidence of the people if that amendment is not adopted.

After this Government has paid a tribute of more than a million dollars annually to the Armor Plate Trust for a quarter of a century, and in all more than $30,000,000; after repeated investigations by congressional committees showing the monstrous extortions exacted of the United States and the saving which can be made, amounting to more than a million dollars upon every battleship authorized; after recommendations by two Secretaries of the Navy for the erection of an armor plant to escape these excessive charges of the Steel Trust; after three appropriations have been made for an armor plant without securing its construction; after a conclusive and undisputed showing that more than $2,576,000 can be saved to the taxpayers of the Nation upon this one item of armor plate in the construction of the two battleships just authorized, the provision in the bill providing merely for an investigation for a site for an armor plant, without any appropriation or provision for its construction, will show a disregard of good faith and our pledges for economy in the administration of the affairs of the Government.

The authorization of these two battleships, without an appropriation and proper provision for the erection of an armor plant for the manufacture of the armor which will be required in their construction, is a crime against the taxpayers of this country. It is a breach of faith with the people. It is an appalling national scandal. It is a criminal waste of the public funds. It is a surrender of the taxing power of the Government for monopoly to extort from the people. It is a condonation of the pillage of the Public Treasury for a quarter of a century. [Applause.]

Mr. FOWLER. Mr. Chairman, I desire to offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend, page 54, at the end of line 23, by adding the following: "And the Secretary of the Navy is hereby authorized to offer and pay rewards to any person or persons who shall first furnish evidence that shall lead to recoveries in fines, penalties, or otherwise from such persons, firms, or corporations entering into such combinations, agreements, or understandings, such rewards to be 10 per cent of the amounts recovered by the Government, and to be paid therefrom."

Mr. MANN. I make the point of order against the amendment on the ground that it is legislation.

The CHAIRMAN. The point of order is sustained.

Mr. FOWLER. Mr. Chairman, before the Chair passes on the point of order I desire to be heard.

The CHAIRMAN. The Chair will hear the gentleman.

Mr. FOWLER. I desire to call the attention of the Chair to the fact that the paragraph itself is subject to a point of order, and had a point of order been made against it the Chair would have been compelled to have sustained it. That being true, then any amendment which is germane to the paragraph is not subject to a point of order. As the Chair will observe from the reading of the paragraph, it gives to the Secretary of the Navy some additional powers which are created by this paragraph and which the Secretary of the Navy does not have now. That being true, then an amendment which is germane to the paragraph for the purpose of perfecting it is certainly not subject to a point of order.

The CHAIRMAN. The Chair would be glad to hear the gentleman upon the question as to whether or not this amendment is germane.

Mr. FOWLER. The Chair will observe that the object of the paragraph is to confer a power upon the Secretary of the Navy to do certain things in the construction of war vessels, provided that in his opinion the circumstances are such as to justify him in believing that the persons, firms, or corporations who are the source of supply for the materials have entered into a combination or an agreement or an understanding for the purpose of preventing free and unrestricted competition in letting the contracts for the construction of these war vessels.

Now, Mr. Chairman, the paragraph dealing directly with the question of the combination in restraint of open, free, and unrestricted competition in letting these contracts imposes upon the Secretary of the Navy a duty which he must discharge before he can decide in what navy yard the warships shall be built. That is, that he shall collect in some way evidence sufficient for the purpose of arriving at a reasonable conclusion that these persons, firms, or corporations are engaged in an understanding, a mutual understanding, for the purpose of destroying unrestricted and free competition in the letting of the contracts for the construction of these vessels.

Now, Mr. Chairman, dealing with the question of evidence, it becomes necessary on the part of the Secretary of the Navy to collect the evidence which is sufficient to bring him to a just conclusion before he can act upon this section. The amendment seeks to aid the Secretary in getting at the evidence in order that he may arrive at a correct conclusion, and that is to offer a reward for the evidence. That is one of the most effective ways to secure evidence. Wherever the criminal has committed a deed and fled the country, or whenever the criminal has committed a deed in secrecy and covered up his crime so that it can not be detected readily, the most effective means of getting the evidence is to offer rewards. It is the weapon by which municipalities, States, and the Nation have procured the necessary evidence to convict the criminal.

Mr. Chairman, if this paragraph was originally subject to a point of order, which I presume nobody will deny, then the amendment is germane, because it deals with one of the essential elements in the paragraph, and that is with the question of evidence, and the reward which it proposes to offer is the very best means of securing the proper evidence upon which to determine as to whether there is an agreement or an understanding between the persons, firms, or corporations in restraint of a free and unrestricted opportunity for competition in letting these contracts. It may be said by some that that part of the amendment which seeks to limit the amount that may be paid in these rewards is new legislation. Mr. Chairman, that is just in harmony with the other part of the amendment, because it deals with a paragraph in itself subject to a point of order. It seeks nothing more nor less than the paragraph itself, with the exception of extending the powers of the Secretary of the Navy in order that he may procure the proper testimony.

I call the attention of the Chair to a recent ruling during this session of Congress. The Chair will remember that in the consideration of the executive, judicial, and legislative bill there

was an amendment offered by the chairman of the subcommittee, Mr. JOHNSON of South Carolina, in committee, to a certain paragraph which purported to repeal the laws inconsistent with the provisions of the bill. Those laws dealt with the salaries of various officers and employees of the Government. Mr. GARNER of Texas was in the chair, and when the amendment was offered it not only dealt with the question of repeal of laws fixing salaries, but it went to the extent of creating a new law fixing these salaries. And the Chairman, after listening to the debate, overruled the point of order.

Now, Mr. Chairman, in that instance the only thing the Chair in his ruling sought was the question as to whether the amendment was germane to the subject matter. He determined that the amendment which related to the question of the repeal of a law was germane to enact a new law instead of the laws that then existed on the statute books.

Now, Mr. Chairman, if the Chair on that occasion was correct in his rulings and it was accepted by the House, then this amendment to the paragraph under consideration only goes to the extent of perfecting that paragraph; and that is one of the rules, Mr. Chairman, that this House has always been governed by; that is, whenever a provision in a bill is subject to a point of order, yet no point of order being raised, then any amendment that is germane to the subject matter in the paragraph is not subject to a point of order. I have just gone through with and read over a long list of authorities passing upon this question, and in no instance have I found but that the rulings of this House present an unbroken line of authorities to the effect that whenever a paragraph in an appropriation bill carries with it new legislation subject to a point of order, then an amendment which is germane to that paragraph may be offered by any Member of the House, and it is not subject to a point of order.

The CHAIRMAN. There is no dispute between the Chair and the gentleman upon that subject. The question is, Is this germane?

Mr. FOWLER. Mr. Chairman, I think it is entirely germane. The paragraph—and I desire to get it in the RECORD—reads as follows:

The Secretary of the Navy shall build any of the vessels herein authorized in such navy yards as he may designate, should it reasonably appear that the persons, firms, or corporations, or the agents thereof, bidding for the construction of any of said vessels have entered into any combination, agreement, or understanding the effect, object, or purpose of which is to deprive the Government of fair, open, and unrestricted competition in letting contracts for the construction of any of said vessels.

Now, let us see what the amendment is. The amendment is:

Provided further, That no part of this——

The CHAIRMAN. The Chair has the amendment which the gentleman is looking for.

Mr. FOWLER. I thought I had a copy of it, Mr. Chairman. I will be glad to have the Clerk report the amendment again, Mr. Chairman.

The CHAIRMAN. The Clerk will report it.

The Clerk read as follows:

Amend, page 54, at the end of line 23, by adding the following: "And the Secretary of the Navy is hereby authorized to offer and pay rewards to any person or persons who shall first furnish evidence that shall lead to recoveries in fines, penalties, or otherwise from such persons, firms, or corporations entering into such combinations, agreements, or understandings, such rewards to be 10 per cent of the amounts recovered by the Government, and to be paid therefrom."

Mr. MANN. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MANN. Is this amendment now being offered again?

The CHAIRMAN. It is being read again. The gentleman from Illinois [Mr. FOWLER] asked that it be read again.

Mr. FOWLER. Mr. Chairman, I thought I had a copy of the amendment with me, but I see that I have not.

Now, Mr. Chairman, the amendment deals with the same subject matter that the paragraph does. And what is that? It deals with the question of evidence which may be necessary to enable the Secretary of the Navy to determine the question as to whether these persons, firms, or corporations have entered into a combination or understanding the object and effect of which are to destroy free and unrestricted competition in letting contracts for the building of any of these vessels.

Now, Mr. Chairman, it is impossible for the Secretary of the Navy to know whether there is such an understanding between these persons, firms, or corporations without getting the evidence; and this amendment provides a method to get the evidence, and that is to offer a reward for the evidence, bearing directly upon the same subject matter, and the amendment itself refers to the same subject matter that is dealt with in this paragraph.

And, Mr. Chairman, I can not understand that there is an element in the amendment that is not carried, either directly or indirectly, in the paragraph. And as the paragraph itself is subject to a point of order, and no point of order having been raised against it, then any amendment that is germane to the subject matter is in order, although the amendment may go further than the paragraph itself.

The CHAIRMAN. The Chair will hear what the gentleman may further have to say on that subject.

Mr. FOWLER. If there is any part of the amendment as to which the Chair has doubt in his mind I would be very glad to have him indicate it, if he thinks it is not germane.

The CHAIRMAN. The Chair will say that upon a somewhat casual listening to the first reading of the amendment as reported by the Clerk he arrived very quickly at the conclusion that the amendment was not germane, and therefore ruled that it was subject to the point of order. The Chair does not know that he has changed his opinion, but upon a careful reading of the amendment the Chair sees in it more from the gentleman's standpoint than he first thought was in it. The paragraph of the bill to which this is an amendment says:

The Secretary of the Navy shall build any of the vessels herein authorized in such navy yards as he may designate, should it reasonably appear that the persons, firms, or corporations, or the agents thereof, bidding for the construction of any of said vessels have entered into any combination, agreement, or understanding the effect, object, or purpose of which is to deprive the Government of fair, open, and unrestricted competition in letting contracts for the construction of any of said vessels.

Now, the gentleman's amendment seems to be germane down to a certain point in that amendment. In other words, the gentleman's amendment seeks to give the Secretary of the Navy ways and means by which to ascertain whether or not it appears that there is such a combination. The Secretary of the Navy, under the wording of the bill, may or may not wait for voluntary information to come to him for the purpose of ascertaining whether or not there is such a combination. But the gentleman's amendment goes further than that, and in the latter part of it says:

Such rewards to be 10 per cent of the amount to be recovered by the Government, and to be paid therefrom.

First, it provides for the payment of rewards; and then, in the latter part of the amendment, the language I have just read occurs. The Chair is apprehensive that that part of the amendment is not germane, inasmuch as it imposes a penalty, indirectly, of course; and it also necessarily takes into consideration some judicial finding thereafter to be made. The Chair is inclined to the opinion that that is too remote in order to be germane.

Mr. FOWLER. Well, Mr. Chairman, there is only one way that the Secretary of the Navy can make up his mind as to whether there is a combination or understanding in restraint of free and unrestricted competition.

The CHAIRMAN. Yes; but the gentleman couples a probable judicial finding with the manner in which the Secretary of the Navy may reach that conclusion.

Mr. FOWLER. The amendment does not impose any judicial finding, as I understand it.

The CHAIRMAN. It imposes a penalty of 10 per cent upon conviction. There must be some penalty and a conviction before this reward can be paid.

Mr. FOWLER. Well, Mr. Chairman, the offering of the reward necessarily means the payment of money or something of value for the evidence. That being true, to fix in the amendment the way in which the reward can be paid is germane, just as much germane as though it left out the means or the way in which the reward might be paid.

The CHAIRMAN. The Chair does not know whether or not some direct means may be found, but is inclined to the opinion that this means is too indirect. In other words, in order to be germane it must "intimately and directly" relate to the subject matter of the paragraph. Therefore the Chair sustains the point of order. The Clerk will read.

Mr. FOWLER. Mr. Chairman, I desire to reoffer the amendment and leave out that portion of it which relates to the question of the means whereby the funds may be raised for the reward.

The CHAIRMAN. The gentleman will please change the amendment to suit himself and offer it in writing. The Clerk will read the amendment which the gentleman from Illinois [Mr. FOWLER] sends to the Clerk's desk.

The Clerk read as follows:

Amend page 54, at the end of line 23, by adding the following: "And the Secretary of the Navy is hereby authorized to offer and pay rewards to any person or persons who shall first furnish evidence that shall lead to recoveries in fines, penalties, or otherwise from such persons, firms, or corporations entering into such combinations, agreements, or understandings.

Mr. PADGETT. Mr. Chairman, I make the point of order that carries the same matter that you ruled upon awhile ago.

The CHAIRMAN. The Chair is in doubt whether it does or not.

Mr. PADGETT. I will ask for a ruling by the Chair.

The CHAIRMAN. Without further light being thrown upon it, the Chair overrules the point of order.

Mr. PADGETT. Now, Mr. Chairman, I will ask for a vote. All I want to say is that this amendment would still allow the Secretary of the Navy to obligate the Government for any amount to an unlimited reward. There is no limitation placed upon it. He can obligate the Government to pay a reward of $1,000, $10,000, or $100,000.

The CHAIRMAN. The Chair will say to the gentleman, however, that the amendment is germane.

Mr. FOWLER. Mr. Chairman, I desire to be heard on the amendment, and I understand that there are other gentlemen who desire to be heard upon it.

The CHAIRMAN. The gentleman from Illinois is recognized for five minutes.

Mr. FOWLER. Mr. Chairman, in 1894 there was a resolution passed in the House authorizing an investigation by the Committee on Naval Affairs. In that investigation it turned out not only that there were combinations for the purpose of stifling competition, but that there were combinations for the purpose of increasing the price of armor and for the purpose of putting off on the Government a very inferior armor for our war vessels.

In that investigation President Corey, of the Bethlehem Co., was before the committee, and he was asked this question:

Did you ever know of plugging being done without the knowledge of the inspector?

That is, the plugging of armor plates. It had been rumored and charged that it had been the custom of those manufacturing concerns from which we got our armor to use rotten material, if I may use the word "rotten," to the extent that they could not make a homogeneous plate; that there were great blowholes in the plates, which endangered the lives of our seamen and endangered the efficiency of our Navy. President Corey, of that company, when asked if he knew of the plugging of those plates having been done without the knowledge of the inspector, answered "yes." He was further asked:

Can you specify the time and what plate it was?

He answered:

No; I can not; I do not know.

Then Charles Schwab came on the stand. He was then the superintendent, and he was asked this question:

Do you know whether the company did really conceal the fact of blowholes in the plates?

He answered:

I think likely that was done.

Another question:

Was it done with your knowledge?

He answered:

Well, the concealment was not; no; but I had knowledge of this fact, that they did not make any plates that did not have blowholes.

Samuel Sheriff testified:

The plugging and doctoring of plates was generally done at night, when no inspectors were about, but I seen one fixed one day at noon.

T. F. Farley, in an affidavit concerning the plates of the *Monterey*, testified:

They were frequently imperfect, full of deep blowholes and defects. They were frequently taken off the planer in the daytime and hidden or covered up until night, so as not to be seen by the inspectors, and then worked upon in the nighttime.

He adds that the holes would be filled up and plugged by orders of those in authority about the mill.

G. W. Kountz made affidavit:

I have known of heavy plates being plugged of holes from 4 to 6 inches, unknown to the Government inspector. This fraud has been practiced upon the Government since long before November, 1892, and since September, 1893.

T. F. Farley testified:

I have seen them long enough for a person to run three fingers into them.

Q. How were they plugged?—A. When I first went there they were plugged by taking cuttings from the same plates, and with a small hand hammer those cuttings were taken, and by pushing or placing small cuttings into these blowholes until they were full, then hammering them in with a punch and placing more and more in the hole until it was level, until it could stand no more plugging. * * *

Q. Did you never try to search them?—A. Yes, sir; I have used a small flexible wire, and run it in. I have run wires in to the depth of 18 inches into the plates, and I know that plates that I run a wire into 18 inches passed and are now somewhere.

This evidence shows that after making a series of imperfect plates full of blowholes these plates were put off on the Government. That means that they were concealed during the daytime and plugged and surfaced over during the nighttime, in order to deceive the authorities inspecting for the United States.

The Secretary of the Navy offered a reward for the purpose of getting evidence to convict the Carnegie Steel Co., and the investigation went on, and there was a finding by reputable citizens, men who were experienced in the work, men who had worked for the Carnegies, men who had worked for the Government as inspectors of armor, and these men came to the conclusion that there was something like from $300,000 to $600,000 damages to the American people and the American Navy by the fraud which had been perpetrated.

The CHAIRMAN. The time of the gentleman has expired.

Mr. FOWLER. Mr. Chairman, I ask unanimous consent to proceed for 10 minutes.

Mr. PADGETT. Mr. Chairman, I shall have to object; and I move that all debate upon the paragraph and amendments thereto be closed.

The CHAIRMAN. It is moved that all debate on this paragraph and amendments be closed.

Mr. TAVENNER. I want to object to that. We are now coming to the point where the armor ring are going to get $16,000,000 worth of contracts, and the gentleman wants to rush it through.

Mr. PADGETT. This amendment has nothing to do with armor.

Mr. TAVENNER. It has a great deal to do with it.

Mr. FOWLER. I desire to be heard on the motion.

Mr. PADGETT. It is not debatable.

Mr. MANN. The gentleman knows as well as anybody that the motion to close debate is not debatable.

Mr. FOWLER. I move to amend, to close debate in 25 minutes.

Mr. MANN. That is a substitute motion, as I understand.

The CHAIRMAN. It is either an amendment or a substitute.

Mr. MANN. I move to amend the substitute by making it 1 hour and 25 minutes.

The CHAIRMAN. The vote will first be on the longer time. The question is on the amendment of the gentleman from Illinois [Mr. MANN] proposing 1 hour and 25 minutes.

The amendment was rejected.

The CHAIRMAN. The next proposition is that offered by the gentleman from Illinois [Mr. FOWLER], to close debate in 25 minutes.

The question being taken, the Chairman announced that the noes appeared to have it.

Mr. FOWLER. Mr. Chairman, I ask for a division.

The committee divided; and there were—ayes 15, noes 58.

Mr. FOWLER. Mr. Chairman, I ask for tellers.

The CHAIRMAN. The gentleman from Illinois asks for tellers. Those favoring tellers will rise. Evidently not a sufficient number, and the motion is rejected.

Mr. FOWLER. I ask for the other side, Mr. Chairman.

Mr. MANN. There is no other side on the demand for tellers. It takes 20.

The CHAIRMAN. There is no other side. The result has been announced.

Mr. FOWLER. I make the point that there is no quorum present.

The CHAIRMAN. The gentleman makes the point of order that there is no quorum present. [After counting]. One hundred and forty-three Members present, a quorum. The question is on the motion of the gentleman from Tennessee [Mr. PADGETT] to close debate on the paragraph and amendments thereto.

The motion was agreed to.

The CHAIRMAN. Was a point of order made against the pending amendment?

Mr. PADGETT. The point of order was made, and the Chairman overruled it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois [Mr. FOWLER].

The amendment was rejected.

The Clerk read as follows:

Construction and machinery: On account of hulls and outfits of vessels and steam machinery of vessels heretofore and herein authorized, to be available until expended, $17,647,617.

Mr. VARE. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Strike out the paragraph and insert the following:

"Construction and machinery: On account of building slips and equipment, hulls and outfit of vessels, and steam machinery of vessels heretofore and herein authorized, to be available until expended, $17,647,617."

Mr. PADGETT. To that I make a point of order.

Mr. VARE. Will the gentleman reserve the point of order?

Mr. MANN. What is the point of order?

Mr. PADGETT. That it is not germane to the bill. This is for the construction of the ship, and the amendment is for yard improvement.

Mr. MANN. It all has to do with the construction of the vessel, as far as that is concerned. I do not see what point of order there is to that. Of course this would not authorize the construction of any slip, unless authorized by law.

The CHAIRMAN. The paragraph is for the construction of hulls, outfits of vessels, and steam machinery of vessels heretofore and herein authorized, to be available until expended. The amendment is for building slips and equipment, and so forth. The additional language of the amendment would add to the paragraph the words "slips and equipment." The Chair is of the opinion that it is germane.

Mr. JONES. I would like to be heard a moment on that.

The CHAIRMAN. The Chair will hear the gentleman from Virginia.

Mr. JONES. This paragraph relates solely to hulls and steam machinery for vessels herein or heretofore authorized. It appropriates $17,000,000 for hulls and machinery for vessels, and this amendment, if adopted, will authorize the expenditure of a part of this sum for building ways for navy yards. It does not relate to the equipment of vessels, but, on the contrary, to the equipment of navy yards. The Chair has already ruled a similar proposition out of order. The language of this amendment is substantially similar, or similar in principle, to that of the paragraph for a building way at the League Island yard. It is clearly not germane and is also new legislation. It is to enable the Secretary of War out of this appropriation of $17,000,000 for hulls and machinery for vessels to construct slips or building ways at navy yards.

Mr. MANN. How can the gentleman claim that this is legislation when this is confined to vessels hereinbefore authorized?

Mr. JONES. It is not confined to vessels at all. It is confined to navy yards.

Mr. MANN. It is confined to what has been authorized.

This paragraph is on account of hulls, outfit of vessels, and steam machinery of vessels herein or heretofore authorized, and the language of the amendment is precisely the same; it is for building slips and ways heretofore authorized.

Mr. JONES. And the building slip is no part of the outfit or the steam machinery of a vessel, as the gentleman knows perfectly well. It is not germane to the subject matter of the paragraph, and it is new legislation.

The CHAIRMAN. The Chair would like to invite the attention of the gentleman from Virginia to the fact that this is for slips and equipment heretofore authorized. It refers to slips and equipment heretofore authorized as much as it refers to ships heretofore authorized.

Mr. JONES. What equipment and slips have been heretofore authorized?

The CHAIRMAN. That is not for the Chair to determine.

Mr. JONES. But the burden rests upon the author of the amendment to show that building slips have been authorized.

The CHAIRMAN. The Chair would say that whether the slips and equipment have heretofore been authorized is not for the Chair. If they have not been authorized, the Secretary of the Navy would not be authorized to make an expenditure for them.

Mr. JONES. I understand that it is the opinion of the Chair that unless there are building slips and equipment already provided——

The CHAIRMAN. Already authorized.

Mr. JONES. That this authorization could not possibly avail.

The CHAIRMAN. The Chair has not put it as strong as that, because he has not seen the necessity for so doing. This amendment provides for slips and equipment, hulls, outfit of vessels, and so forth, heretofore and herein authorized.

Mr. MANN. It is perfectly plain that it could not be expended unless the slip had been authorized.

Mr. JONES. Gentlemen ought to be able to point out some slips that have been authorized somewhere to which this would apply.

Mr. MANN. That has nothing to do with the point of order.

The CHAIRMAN. That is not a parliamentary question; it is one of fact to be ascertained hereafter by the Secretary of the Navy.

Mr. SAUNDERS. Mr. Chairman, it strikes me that the question of authority for the slips is vital. When the point of order is made to this amendment it puts the burden on this gentleman to show that his amendment is in order and that there have been slips authorized.

The CHAIRMAN. That would come directly up to the Secretary of the Navy. If they are not authorized, he has no authority to expend the money for them.

Mr. SAUNDERS. When any item of appropriation in this bill is under consideration and the point of order is directed to the item, you do not refer it to the department to show authority for the item, but to the chairman of the committee.

The CHAIRMAN. It is either a judicial or a quasi judicial question, which is not for the Chair.

Mr. JONES. I would like to ask the chairman if it is not true——

Mr. GREENE of Massachusetts. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman from Virginia can not be taken off his feet by a parliamentary inquiry.

Mr. SAUNDERS. Mr. Chairman, I believe I have the floor, because I was yielded to by the gentleman from Virginia [Mr. JONES].

The CHAIRMAN. The gentleman from Virginia will proceed.

Mr. SAUNDERS. I want to proceed with the argument on the point of order.

Mr. GREENE of Massachusetts. Mr. Chairman, I make a point of order.

The CHAIRMAN. The gentleman will state it.

Mr. GREENE of Massachusetts. I make the point of order that this discussion is not allowable, as the Chair has already decided it.

The CHAIRMAN. The Chair will either withdraw or withhold his former decision for the purpose of hearing the gentleman from Virginia.

Mr. SAUNDERS. Mr. Chairman, I wish to repeat in connection with what I was saying, that it does seem to me that this is not a question of authority referable to the Secretary of the Navy, but a question of authority to be passed on by the Chair in connection with the proposed amendment. Suppose that with reference to a section of the bill offered by the gentleman from Tennessee, a point of order is made to the effect that the appropriation ordered is not supported by some existing authority of law, would not the burden fall upon the chairman of the committee to furnish the authority for the appropriation? That is precisely the situation here. The gentleman from Pennsylvania offers an amendment providing for an appropriation for a slip that has been authorized, and in that connection if he can furnish the authority for such a slip, his amendment is clearly in order.

But if he can not show anywhere that such a slip has been authorized, then how does he bring himself within the rule requiring authority of law to justify an appropriation? This question is not referable to the Secretary of the Navy at all. It is referable to the Chair, because the parliamentary status of the amendment is in question. This seems to me to be unquestionably the situation presented.

Mr. PADGETT. Mr. Chairman, will the gentleman yield?

Mr. SAUNDERS. Yes.

Mr. PADGETT. Under the language of the amendment it would apply not to any particular yard, but to slips in any yard in the United States.

Mr. SAUNDERS. Certainly.

Mr. PADGETT. Well, we have slips at other places.

The CHAIRMAN. Are there not slips authorized?

Mr. SAUNDERS. That is exactly what I wish to develop. I wish to develop by the gentleman who offers the amendment, the slips to which this appropriation may be appropriately applied. If there are any slips authorized to which it may be applied, then I concede at once that the amendment is in order, but when I raise the point of order to the gentleman's amendment, the burden is instantly put upon him, to show some slip or slips to which this appropriation can be properly applied.

Mr. PADGETT. There are a number of slips in New York.

Mr. LOGUE. Does the gentleman mean to say that it is within the power of the House to take away from the Secretary of the Navy the use of money and for us to designate it instead of him?

Mr. SAUNDERS. Unless there is authority for an appropriation, the appropriation can not be made.

Mr. LOGUE. Will the gentleman permit me to call his attention to the fact that this very day this committee has authorized such an appropriation.

Mr. SAUNDERS. An appropriation for something not authorized?

Mr. LOGUE. The committee authorized an appropriation of $200,000 for any yard to which the Secretary of the Navy may designate the construction of a battleship.

Mr. SAUNDERS. That was because there was authority for the appropriation. There is no legislative authority here. This is a direct appropriation of money for something said to be authorized by law. If there is a slip to which this appropriation can be applied and expended, then the gentleman offering the amendment should state where that slip or slips may be found. This statement will then determine the application of this appropriation. If there is a slip authorized by law somewhere in this bill, or elsewhere, then this $200,000 may be appropriately voted for the construction of that slip, but you can not vote an appropriation for a slip for which there is no authority, and then allow the Secretary of the Navy to apply the fund in a manner not authorized by law. The Chair passed on that question the other day. If these gentlemen have in mind that this appropriation can be applied to the slip in the navy yard at Philadelphia by the Secretary of the Navy, such an application would be in direct contravention of the ruling of the Chair. He held that there was no authority of law under which $200,000, or any other amount could be applied to the slip at the Philadelphia Navy Yard. Hence I am calling on these gentlemen to show the slip to which this appropriation could be applied.

The CHAIRMAN. There is no authority in this proposed amendment on which the Secretary of the Navy could expend any money on any slip not authorized.

Mr. SAUNDERS. No, and that is the reason why I call on the gentleman from Philadelphia to explain what slip there is on which this fund can be expended. As a result of the point of order, I have a right to require the gentlemen to furnish me with the whereabouts of the slip or slips to which his amendment can relate.

Mr. PADGETT. Mr. Chairman, I will state that there are slips in the New York Navy Yard and in the Mare Island Navy Yard and some at Boston.

Mr. SAUNDERS. Then it is developed that this money may be expended either at New York, or Mare Island, or at Boston, but no other application can be made of it. If that be true, I desire to offer an amendment.

The CHAIRMAN. The Chair is of opinion that this money can be used, in part at least, by the Secretary of the Navy, if there is an authorized slip; and the Chair has a recollection, only a few days old, that there is a slip at least at Boston, Mass.

Mr. SAUNDERS. Yes. I do not gainsay the proposition that this money may be expended at the Boston Navy Yard, but it can not be put into this bill to be expended at the Philadelphia yard.

The CHAIRMAN. The Chair is ready to rule.

Mr. JONES. Mr. Chairman, I yielded the floor to the gentleman, and I do not wish to take up any more of the time of the Chair. I simply wish to add that when a point of order is made against an amendment on the ground that the proposition which it embodies is not authorized by existing law, and that the burden is placed upon those who supported it to point out the existing law. If it is objected that the appropriation carried in the amendment is not to continue any work already in progress, then those who claim to the contrary must show that there is a work in progress.

The CHAIRMAN. This amendment provides for slips and other kinds of equipment that are heretofore or herein authorized.

Mr. JONES. Yes.

The CHAIRMAN. The Chair takes legislative, if not judicial, notice of the fact that a slip is authorized in this very bill.

Mr. JONES. At Boston.

The CHAIRMAN. Yes.

Mr. JONES. I understand that to be true, and yet I do not think that affects the rule that the burden rests upon the author of the amendment to show the law which, in his judgment, authorizes the construction of the building slip which his amendment seeks to provide the money to build.

The CHAIRMAN. The law happens to be in this bill, and it is in that part of the bill which has been passed on.

Mr. JONES. With the understanding that it has already been held by the Chair that there was no authorization for a slip at Philadelphia——

The CHAIRMAN. But the Chair does not decide that.

Mr. JONES. When the Chair ruled out the paragraph for the Philadelphia yard the Chair put it upon the ground that there was no law authorizing a building slip there.

The CHAIRMAN. That was a proposition for a naked appropriation.

Mr. JONES. Yes; and I can have no objection to this amendment if I correctly understand the ground upon which he would hold it in order.

The CHAIRMAN. Well, the Chair will base the ruling he now contemplates making for the reasons he has given and not upon the conclusions which the gentleman has reached.

Mr. JONES. Of course, I understand that perfectly well, Mr. Chairman, and I feel assured the Chair's ruling will be consistent with that he made in regard to the transport.

The CHAIRMAN. The Chair will endeavor to have it consistent.

Mr. MANN. I want to ask the gentleman from Virginia a question, and I would like to make one observation on the point of order.

Mr. JONES. I will be glad to answer it if I can.

Mr. MANN. I do not think the gentleman will be glad, and I do not think he can——

Mr. JONES. I said, "if I could." I have no doubt the gentleman can ask a great many questions I can not answer.

Mr. MANN. I am not endeavoring to criticize the gentleman. The gentleman's position is that the author of this amendment must show when and where a slip was authorized. If that be the case, then the chairman of the committee which reported the bill must show when and where and how outfits of vessels and the steam machinery of vessels, amounting to $17,647,617, was authorized. I would like to hear the gentleman answer that question.

Mr. JONES. My answer is that the chairman of the committee will have to show that they are authorized by law if a point of order is made against the paragraph, and I have no doubt but that he will be able to do so. But I do not understand that any point of order has been made against the paragraph, and therefore it is not necessary for him to show it. Had such a point been made, the burden would have been cast upon the chairman of the committee to show that the hulls and machinery had been authorized.

Mr. MANN. But that is in the same amendment, so that he would call upon the gentleman from Pennsylvania to show exactly how this $17,000,000 is to be expended—and the very reason that it is not done is because it is so absurd it can not be done. You put in a provision if it is authorized by law. You can not expend money unless it has been authorized by law. No one can tell exactly how this $17,000,000 will be expended—on hulls or outfits of vessels or steam machinery. All the information all the men in the world have will not answer that question in advance.

The CHAIRMAN. The Chair overrules the point of order.

Mr. SAUNDERS. Mr. Chairman, I desire to offer the following amendment. Mr. Chairman, it having been developed in the course of this discussion that there are slips which have been authorized by law and with respect to which therefore this money can be appropriately expended, I desire to offer an amendment to the amendment of the gentleman from Pennsylvania.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

To wit, at New York, Boston, or Mare Island.

Mr. SAUNDERS. Now, Mr. Chairman, a word in that connection——

Mr. MANN. Where does that come in?

Mr. SAUNDERS. At the end of the amendment offered by the gentleman from Pennsylvania.

Mr. MANN. The gentleman from Pennsylvania offered it to the paragraph.

Mr. PADGETT. That limits the appropriation of $17,000,000 that is for ships to those yards, and should have no application to it.

Mr. SAUNDERS. Oh, no.

Mr. PADGETT. Yes; it does; it limits the whole thing.

Mr. SAUNDERS. I will ask the Clerk to report the amendment again. Let us have the amendment read again.

The Clerk read as follows:

Add to the amendment the following: "To wit, at New York, Boston, or Mare Island."

Mr. SAUNDERS. I wish the Clerk to read the amendment offered by the gentleman from Pennsylvania.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Construction and machinery: On account of building slips and equipment, hulls, and outfits of vessels and steam machinery of vessels heretofore and herein authorized, to be available until expended, $17,647,617.

Mr. SAUNDERS. I see I will have to modify my amendment a little.

The CHAIRMAN. The Clerk will report the amendment and then report the amendment to the amendment.

The Clerk read as follows:

Amend the amendment by inserting after the word "equipment" the words "at New York, Boston, Mare Island, and."

The CHAIRMAN. So it will read when amended.

The Clerk read as follows:

Construction and machinery: On account of building slips and equipment at New York, Boston, Mare Island, and hulls and outfits of vessels and steam machinery of vessels heretofore and herein authorized, to be available until expended, $17,647,617.

Mr. PADGETT. Now, Mr. Chairman, I simply want the attention of the committee for just a minute or two. Under either the original amendment as offered, or if it should be amended as proposed by the gentleman from Virginia, you would make available the whole sum of $17,647,617 for building slips and equipment at the yards of this country mentioned, and they could use any amount of the $17,000,000 and then come back here next year and say they need all this money to finish the hulls and the machinery and the equipment of the ship.

Mr. MANN. Will the gentleman yield for a question?

Mr. PADGETT. Yes.

Mr. MANN. They do not expend any money unless they are authorized by law.

Mr. PADGETT. But they could expend it at these yards where they have these slips.

Mr. MANN. Not unless the slips were authorized or the equipment was authorized by law or in this bill.

Mr. PADGETT. That is true. There is one authorized in this bill, but there are slips at Brooklyn, there are slips at Mare Island and at Boston, and they could use any amount of this $17,000,000 to build any character of equipment and slips at those yards, and——

Mr. MANN. Will the gentleman yield for another question?

Mr. PADGETT. Yes.

Mr. MANN. And he could also use $17,000,000 for purchasing outfits of vessels if it was authorized, and not expend a dollar for hulls or steam machinery of vessels. He could make a fool of himself, but is he likely to do it?

Mr. PADGETT. He could spend it for vessels heretofore or herein authorized.

Mr. MANN. The gentleman's whole argument goes against the whole paragraph.

Mr. PADGETT. No. He must spend it upon vessels heretofore authorized or herein authorized, on the hulls, and those only that have been authorized or are herein authorized could he spend it upon—on the hulls and the machinery.

But I was calling attention to it to show that you are injecting into this appropriation matter that does not belong to it, and you are taking money that is available for the hulls and the machinery and the building of ships, and you could take any amount of this $17,000,000 and make yard improvements with it.

Mr. BUCHANAN of Illinois. Does the gentleman think the Secretary would use an unreasonable amount?

Mr. PADGETT. I do not know; but I do not believe in legislation of that character. When we define it in the bill we ought to define it as to the purposes for which it is intended.

Mr. SAUNDERS. Mr. Chairman, I do not take any issue with the gentleman from Tennessee [Mr. PADGETT] as to the contention which he raises. The amendment offered by the gentleman from Pennsylvania ought to be defeated. But if the amendment offered by the gentleman is to be adopted at all, it ought to be adopted with my amendment, which simply provides that if any portion of this $17,000,000 is to be used on building slips, it shall be used in the three yards designated in the amendment, these being the only yards in which there are slips at present. So that if the amendment is to be adopted, it should be adopted with the amendment that limits the application to the yards where the money may be properly expended.

Mr. BRYAN. Mr. Chairman, I am opposed to the amendment proposed by the gentleman from Virginia [Mr. SAUNDERS]. If, under this bill and under the interpretation of this naval appropriation bill, it is found that a building slip has been authorized, for instance, for the Puget Sound Navy Yard, there is no reason why the Secretary of the Navy should not use so much of this money as is necessary in connection with that slip as well as the Boston slip. The Puget Sound Yard can be equipped for the building of a dreadnaught for about $450,000 less than Mare Island. Estimates show that it will take about $650,000 to equip Mare Island, where a floating crane at a cost of $450,000 will have to be installed. This equipment already exists at the Puget Sound Yard. So that in fact Mare Island is away behind the Puget Sound Yard on this feature, as well as on so many others.

Under the amendment we adopted to-day it is provided that any yard that gets one of these contracts for the building of a battleship may be equipped with a building slip and building ways for the purpose of building that battleship, and so, if, on accepting estimates from the various yards, it should be found that the Puget Sound Naval Station, for instance, could construct one of these battleships in a manner satisfactory to the Secretary of the Navy and the Navy Department, a part of this $17,000,000 could be spent for building ways for that yard. I think it is absolutely unreasonable to think that the Secretary of the Navy is going to spend it all for building slips or hulls or machinery. Of course he has that authority, and he has a certain amount of leeway in the making of these expenditures, but there is no reason, so far as I can see, why we should limit it to two or three yards; and I hope the amendment to the amendment will be voted down and that the Secretary of the Navy will have discretion and authority to spend this money wherever building slips have been authorized. I want to commend this situation to the business interests and the people generally of Seattle, Tacoma, and the Puget Sound Navy Yard cities.

There is a great deal that can be done by cooperation among the friends of the Puget Sound yard, and I hope to see a new era instituted, which will cause that yard to come into its own and be recognized for what it is worth on its merits as one of the leading naval stations in the world.

Mr. PADGETT. Mr. Chairman, I move to close debate upon the paragraph and all amendments thereto.

Mr. MANN. Mr. Chairman, the gentleman who offered the amendment has not had an opportunity to get the floor at all yet.

Mr. PADGETT. I will say 10 minutes, then. The gentleman from Pennsylvania [Mr. VARE] wants five minutes and the other gentleman from Pennsylvania [Mr. LOGUE] five.

The CHAIRMAN. The gentleman from Tennessee moves that all debate on the paragraph and pending amendments be closed in 10 minutes. Is there objection? [After a pause.] The Chair hears none.

The gentleman from Pennsylvania [Mr. VARE] is recognized.

Mr. VARE. Mr. Chairman, I hope the amendment to the amendment offered by the gentleman from Virginia [Mr. SAUNDERS] will not prevail. Under the act of March 4, 1913, the Secretary of the Navy was authorized and directed to build certain transports. There was at that time an appropriation of $1,850,000 for that purpose. To-day we adopted an amendment on the ruling of the Chair in connection with our battleships, to the effect that there should be $200,000 set aside, under the direction of the Secretary of the Navy, to build shipways or slips. The authority for the building of this ship having been given in the appropriation last year, we are asking for legislation in order that the Secretary of the Navy can carry out the purpose of the Congress. The Secretary has awarded the building of it to the Philadelphia Navy Yard.

I as a Republican Member am willing to trust to the good judgment of the Secretary of the Navy as to where he should make these improvements and as to where he increases the facilities for shipbuilding purposes. And I am surprised that the gentleman from Virginia wants to deny the Secretary of the Navy the right to say which yard he shall equip and increase with additional facilities. I as a Republican Member and coming from a Republican district have sufficient confidence in the Secretary of the Navy to trust to his judgment, but I find on this floor the two gentlemen from Virginia, both Democrats, apparently lacking faith in the Secretary who represents the party to which they belong.

I hope there will not be any discrimination against the goodly city of Philadelphia. I might cite a few lines from the Philadelphia Inquirer of a few days ago, giving an account of the leaving of the marines for Vera Cruz on the ship *Morro Castle*. It said:

Ten thousand cheer as vessel departs from League Island. * * * The vessel manned, provisioned, and equipped in 22 hours at the local navy yard.

The commander of that yard, Capt. Benson, said that he did not want to appear boastful, but "I think it was pretty quick work, and I doubt if any other yard on the Atlantic coast could have accomplished the supplying of the ship in such a short time."

We have a great navy yard there. It was given to the Government for the purpose of making a shipyard, for the purpose of making a proper naval station, and I appeal to this committee that there should be fair play and there should be no discrimination against the goodly city of Philadelphia. There-

fore, I hope the amendment to the amendment will not prevail. [Applause.]

The CHAIRMAN. The gentleman from Pennsylvania [Mr. LOGUE] is recognized.

Mr. LOGUE. Mr. Chairman, I trust the amendment of the gentleman from Virginia [Mr. SAUNDERS] to the amendment of the gentleman from Pennsylvania [Mr. VARE] will not prevail. It is with exceeding regret that a Member on this side of the House finds special mention made time and time again in the debate and arguments this afternoon regarding the city of Philadelphia and the navy yard of Philadelphia in connection with an expression of fear upon the part of people that there may be some development at Philadelphia. As a Member of this side of the House I wish to say that Philadelphia need offer no apologies whateyer for its action toward the National Government.

It gave to the United States over 900 acres of land, worth to-day over $10,000,000; the free gift of the city of Philadelphia to the Federal Government for the establishment of the present League Island Navy Yard; and to find here to-day references to this yard and that yard and the other yard so as to inveigh against, so as to restrict against, so as to make impossible the exercise of the judgment of the head of the Navy Department as to what he shall do, strikes me as being in the line of class work, and strikes me as being in the line of departing from the wish and expection expressed by my good colleague [Mr. GRAHAM] to-day when he said that the spirit that ought to prevail here in this House touching legislation is a spirit animated for the country's good, and not for the benefit of any particular locality. And that is what I stand for. [Applause.]

I take it to be little short of an insult for the Secretary of the Navy, constituted head of a great department—the greatest department we have at this time in connection with our Government—to be restricted by an amendment thrown into the amendment of the gentleman from Philadelphia, coupled with it, so that it will not be possible for this work to be done at Philadelphia should he deem it best. For the purpose of this argument, I could say, I do not care whether it helps Philadelphia or advances it or not; it verges close to an insult when you try to hedge and restrict when you appropriate $17,000,000 and say to the Secretary of the Navy exactly where he must put certain sums of money that may be necessary for shipways.

I feel that this original amendment should prevail. I feel, as has been suggested by the gentleman from Illinois [Mr. MANN], that there is not an item in that $17,600,000 but that can be picked out and questioned as being authorized by law. It is closely and well coupled and well restricted to what has been herein or hereinbefore provided. Let us say that we exist in a time and in an hour when the Secretary of the Navy will not, especially for any particular city, go outside of the line of his duty and attempt to draw from the United States Treasury a single dollar unless in his judgment it is authorized by law.

I feel, therefore, Mr. Chairman, that this amendment to the amendment should be voted down. Let us rest satisfied, we of this side—and I say it as one humble in his position, but as a Member from the good old State of Pennsylvania and from the city of Philadelphia, that only occasionally and spasmodically sends one of our party here—let us be satisfied to rest upon the assurance that in the party, in the person of the Secretary of the Navy, we have a fair man, a just man, a discreet man, a careful man, and that not a single dollar will be drawn out of the United States Treasury by the Secretary of the Navy unless herein or hereinbefore authorized by law. The amendment to the amendment, sir, I say, should be defeated. [Applause.]

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired. All time has expired. The question is on agreeing to the amendment offered by the gentleman from Virginia [Mr. JONES] to the amendment offered by the gentleman from Pennsylvania [Mr. VARE].

The question was taken, and the amendment to the amendment was rejected.

The CHAIRMAN. The question now is on the adoption of the amendment offered by the gentleman from Pennsylvania [Mr. VARE].

The question was taken, and the Chairman announced that the "ayes" seemed to have it.

Mr. PADGETT. A division, Mr. Chairman.

The CHAIRMAN. A division is asked for.

The committee divided; and there were—ayes 64, noes 31.

Mr. JONES. I demand tellers, Mr. Chairman.

The CHAIRMAN. Tellers are demanded. [After counting.] Three gentlemen have arisen, not a sufficient number. The ayes have it, and the amendment is adopted.

Mr. CARY. Mr. Chairman, I offer an amendment, which I send to the Clerk's desk.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Wisconsin [Mr. CARY].

The Clerk read as follows:

Insert, after line 4, page 55, after the figures "$17,647,617":
"And the Commissioner of Corporations is hereby authorized and directed to make inquiry whether any persons, firms, or corporations furnishing armor, armament, or other materials for the Navy under the provisions of this act or any previous act of Congress have been or are engaged in any combination or conspiracy to violate the antitrust law of 1890, or to defraud the Government in the quality or price of armor, armament, or other materials, or to obtain extortionate or excessive prices for the same; and the Secretary of the Navy is authorized and directed to offer and pay rewards to any person or persons who shall first furnish evidence that shall lead to recoveries, in fines, penalties, or otherwise, for such violations of law, said rewards to be 10 per cent of the amounts recovered by the Government, and to be paid therefrom."

Mr. PADGETT. Mr. Chairman, I make a point of order against the amendment.

The CHAIRMAN. The Chair holds that the amendment is not germane to the section under consideration, and therefore sustains the point of order. The Clerk will read.

The Clerk read as follows:

Increase of the Navy; torpedo boats: On account of submarine torpedo boats heretofore authorized, to be available until expended, $1,685,617.

Mr. SAUNDERS. Mr. Chairman, I make a point of order against that.

The CHAIRMAN. The gentleman from Virginia [Mr. SAUNDERS] makes a point of order against the paragraph.

Mr. SAUNDERS. The language there, "to be available until expended," very clearly makes it contrary to law.

Mr. PADGETT. I will state, Mr. Chairman, that that language is usually carried in the bill. It takes three years to construct these boats. I appeal to the gentleman to withdraw his point of order.

Mr. SAUNDERS. It is bad policy to appropriate money in that way. So far as this House is concerned, and so far as the Congress is concerned, we ought to retain control over our appropriations. This is an exception to the way in which appropriations are usually made in other portions of this bill as well as in other bills.

Mr. PADGETT. Mr. Chairman, "Increase of the Navy" is a continuing appropriation, and I think it is not subject to a point of order. It is a continuing appropriation, and the Treasury has so held.

The CHAIRMAN. The Chair is inclined to the opinion that it is subject to a point of order. The point of order is sustained.

Mr. PADGETT. Then I move to amend, Mr. Chairman, by inserting, in line 5, the following:

Increase of the Navy; torpedo boats: On account of submarine torpedo boats heretofore authorized, $1,685,617.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. BAILEY. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

Mr. MANN. On what subject?

Mr. BAILEY. On this bill.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

The Clerk read as follows:

Increase of the Navy; equipment: Toward the completion of equipment outfit of the vessels heretofore and herein authorized, to be available until expended, $421,000.

Mr. SAUNDERS. Mr. Chairman, I make the same point of order.

The CHAIRMAN. The gentleman from Virginia makes the point of order against the paragraph.

Mr. PADGETT. The point of order is conceded.

Mr. SAUNDERS. In order to save time, I will make it only against the words "to be available until expended." That will save the necessity of offering an amendment.

The CHAIRMAN. The point of order is sustained. The Clerk will read.

The Clerk read as follows:

Increase of the Navy; armor and armament: Toward the armor and armament for vessels heretofore and herein authorized, to be available until expended, $14,877,500.

Mr. SAUNDERS. Mr. Chairman, I make the same point of order against the words "to be available until expended."

The CHAIRMAN. The point of order is sustained.

Mr. TAVENNER. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The gentleman from Illinois offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend, by adding after the figures "$14,877,500," line 14, page 55, the following: "*Provided*, That the Secretary of the Navy is hereby authorized to procure by contract armor of the best quality for any or all vessels heretofore or herein provided for, provided such contracts can be made at a price which, in his judgment, is reasonable and equitable; but in case he is unable to make contracts for armor under the above conditions, he is hereby authorized and directed to procure a site for and to erect thereon a factory for the manufacture of armor and gun forgings, and the sum of $4,000,000 is hereby appropriated toward the erection of said factory and the purchase of a site therefor."

Mr. MANN. I make a point of order against the amendment.

Mr. TAVENNER. Will the gentleman reserve his point of order?

Mr. MANN. No; it is too late in the day. I make the point of order. We ought to finish this bill to-day, if possible. If we are going to adjourn before next August or September, we will have to finish these bills.

Mr. TAVENNER. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. That motion is not in order until the point of order is disposed of.

The Chair will say to the gentleman from Illinois that the item of the bill under consideration relates only to armor and armament. Laying aside whatever other objections there may be to the gentleman's amendment, it contains a provision for the acquirement of a site for an armor-building factory.

Mr. TAVENNER. Mr. Chairman, that is almost the exact language that has already been enacted into law in a naval bill. I copied it from the naval appropriation bill of June 7, 1900.

The CHAIRMAN. The Chair was about to say, when interrupted by the gentleman from Illinois, that part of his amendment is so clearly legislation that it is subject to the point of order, and the point of order is sustained.

Mr. TAVENNER. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman is recognized for five minutes.

Mr. TAVENNER. Mr. Chairman, the amendment that I have offered is, as I have said, practically a duplicate of a provision contained in the naval appropriation bill of 1900, and the mere fact that that bill carried this provision resulted in the Government saving millions of dollars in the cost of armor plate. The Secretary of the Navy was able to say to the three firms having a monopoly of the manufacture of armor in this country that if they were not willing to sell armor to the Government at a fair and reasonable price he was authorized by law to go ahead and manufacture his own armor. Let us see whether the insertion of the amendment I have just offered proved of value in the naval bill of 1900.

Back in 1893 the Government was paying an average of $658 a ton for armor. Some time later Senator TILLMAN, of South Carolina, started in to fight the high price and to oppose the armor ring, and he forced the Armor Trust gradually to reduce its price, until in 1900 he got the price down to $413 a ton.

Then the naval appropriation bill of 1900 was amended to carry the provision I have just submitted, which provided that if the Secretary of the Navy were unable to obtain a square deal from the Armor Trust he was authorized and directed to build a Government armor plant.

What was the result? The three concerns manufacturing armor, rather than have Uncle Sam build a plant, gradually reduced their prices from $413 in 1900 to $345 in 1906, which meant a saving of millions of dollars to the Government. Such was the result of the insertion in the naval bill of 1900 of the provision that I have just presented. Without spending a dollar for a plant or doing anything further than simply providing that the Secretary of the Navy was authorized to build a plant if he could not obtain fair treatment from the trust, the Government saved millions.

But when Congress failed to continue the provision in the naval bill it gradually lost its moral effect upon the armor ring, and the price of armor plate to the Government was steadily advanced from $345 a ton in 1906 to $454 a ton at the present time.

If this Congress will replace this amendment in the naval bill, I predict it will save every penny of $1,000,000 a year, even if the Government never further considers the advisability of a Government plant.

If the Government builds an armor plant and a padlock is placed on its doors as soon as it is completed, and it is never used, it will, in the opinion of Secretary of the Navy Josephus Daniels, pay for itself simply by enabling the Secretary to obtain a square deal from the armor manufacturers.

This bill carries an appropriation of $14,877,500 for armor and armament alone. If the Government had its own armor and gun-forging plant I believe I am well within the bounds of conservatism when I say that 30 per cent of this sum, or, in round numbers, $4,000,000, could be saved to the taxpayers. Is $4,000,000 a year on armor and armament alone worth the saving? I, for one, believe it is.

The chairman of the Committee on Naval Affairs has admonished us to confine ourselves to facts.

The fact is the Secretary of the Navy, Hon. Josephus Daniels, in his annual report to Congress recommended an "appropriation" for a Government armor plant, and the committee provided only for an "investigation," which is wholly unnecessary, because there have been ample investigations in the past, each of which demonstrated the wisdom of a Government armor plant.

In his last annual report the Secretary of the Navy asked for an "appropriation" in the following words:

IMPORTANCE OF ARMOR-PLATE FACTORY.

I desire to recommend the passage at the earliest moment of a sufficient appropriation to begin the construction of a Government armor plant to relieve a situation which, in my estimation, is intolerable and at total variance with the principle of economy in spending Government money. It is evident that without an armor plant of its own the Government in time of war or impending war would be entirely at the mercy of these three manufacturers and obliged to pay practically whatever price they asked. History does not warrant an assumption that the patriotism of these companies would prove superior to their desire for profits, inasmuch as during the time that war with Spain was imminent these companies refused to accept the price fixed by Congress after investigation as a just rate, and declined to manufacture any armor until they got their own price of $100 a ton more than that which Congress had determined on. In this connection it is well to note that the love of country possessed by these companies did not prevent them from furnishing armor to Russia, as reported to Congress, in 1894 at $249 a ton, while they were charging the United States $616.14 a ton.

* * * * * * *

I do not see how it is possible for Congress to justify to the people a refusal to erect a Government plant, nor how it can answer the charge that will invariably be brought up—that the same mysterious Providence which saved this profitable business to the steel companies three times in the past, even after money for a Government plant had actually been appropriated, is not still at work exercising its beneficent protection over these lusty specimens of infant industries, who are even now under Government investigation as violators of the antitrust law.

I would favor enthusiastically the provision in the pending bill providing for an investigation of the cost of armor and a site for an armor factory but for the fact that numerous and adequate and very thorough investigations have been made in the past, and this provision for an unnecessary additional investigation impresses me as being merely an excuse to avoid making an appropriation in this Congress for an armor plant, as recommended by the Secretary of the Navy.

I hold in my hand a 464-page report of an investigation made in 1896–7, which shows that armor can be manufactured for $300 per ton, and in this estimate a profit of 33⅓ per cent was included for the manufacturers.

I also hold in my hand another very thorough report prepared by a board of naval experts in 1906 in response to the provision requiring an investigation of the cost of armor contained in the naval bill of 1905, which, by the way, in my opinion, was inserted to sidetrack an appropriation for an armor plant in that bill. This report found that armor plate could be manufactured by the Government for $230.36 per ton.

Nor were these all the investigations. The hearings of the Naval Affairs Committee on the pending bill, as any Member can ascertain for himself by sending for a copy of the hearings, contain a most exhaustive report as to the cost of armor, compiled by the Bureau of Ordnance of the Navy Department within the last six months, which estimates that the Government can manufacture armor in a plant of 20,000 tons capacity at a cost of $279 per ton.

The average of nine estimates made by various investigating committees of the Senate and Navy Department and of individual officers and experts of the Navy is that armor can be manufactured in a Government plant at a cost of $247.17 per ton.

Yet we are now paying the armor ring $454 per ton. In all, we have purchased 192,995 tons of armor from the armor ring at an average price of $441.42. I believe that it is a very conservative statement to say that of the $85,193,248 that we have paid the armor ring for this armor, at least $30,000,000 could have been saved to the taxpayers had this armor been manufactured by the Government itself.

I submit, therefore, it is time for Congress to stop dodging and to give the House an opportunity to vote on the proposition of an armor plant upon its merits. I feel confident a majority of the Members of this House are in favor of a Government armor-plate factory, but we can not get a vote on it. I believe there was a time when the armor ring dominated the House, but I do not believe it to-day dominates the membership of the Republican Party or of the Democratic Party, and it goes without saying that it does not dominate the members of the Progressive

Party. [Applause.] And yet, because there are a few men in this House who want the armor ring to remain in business we can not get a vote on it. I have done everything I could, and if I was not of an optimistic temperament I would be tempted to conclude that, regardless of what party is in power, the armor ring is going to stay in the saddle and that it is impossible to get it out. [Applause.]

I have prepared for extension in the RECORD a detailed account of the various investigations of the cost of armor.

Mr. DIES. Mr. Chairman, at the risk of trying the patience of the committee, I want to say a word about this attempted amendment for the Government to go into the armor-plate business. So far as I am concerned I am not controlled by any armor-plate trust, and yet I am not in favor of the Government going into the business of manufacturing armor plate.

Mr. TAVENNER. Will the gentleman yield?

Mr. DIES. Not in the five minutes; it is impossible. The other day one of these Progressives whom my friend has extolled so eloquently introduced a bill for the Government to own the mines of the country.

Mr. BRYAN. Has the gentleman any letters from his district about it?

Mr. DIES. Mr. Chairman, I hope the gentleman from Washington will address the Chair. The gentleman, as I say, introduced some sort of a resolution for the Government to go into the mining business throughout the country. I am not in control of the mine owners or the miners, and yet I would not vote for his proposition. Not long ago a gentleman proposed that the Government should go into the oil business and produce oil. I am not in control of the oil interests of the country, but it does not follow that I want the Government to become an oil producer.

Not long ago a Member introduced a bill to provide that the Government should own the radium mines. The radium people do not control me, and still I had the temerity to oppose Government ownership of radium mines.

There are gentlemen in this House who are in favor of the Government owning everything from railroads to hen's nests, and they imagine that all Democrats opposed to socialism, opposed to Government ownership in all the activities of the country are controlled by some special interest.

Why, I understand from what I consider is good authority, that the Navy requires a good deal of beef. Presently some modern statesman will rise and propose that the Government buy out the beef-packing business and go into the business of making pork sausage and canning liver. Why not? There is a Beef Trust, there is a Navy. The Navy requires beef, and without beef the armor plate would be practically useless.

Moreover, I am told that the sailors and jackies on these magnificent vessels require boots and shoes, and hats and caps and shirts. Why not let these Moseses of Democracy, who seek to lead the country into the camp of paternalism and socialism, propose that the Government should take over the boot factories and the shoe factories and the hat factories and the shirt factories. Some of these admirals wear glasses on their noses. It is a pity that they should be required to buy them of the Spectacle Trust. Why should not the Government go into the business of making spectacles?

I understand that on these battleships they use sweet potatoes and bacon, and they use corn meal, and it is said that in some sections of the country prices are too high. I have no doubt that the Government could raise corn cheaper than the farmers of Illinois. I have no doubt the Government, with its superior capital and organization, could make shirts cheaper than they make them at Lowell. Why should we not let the Government take over all business, raise the bacon, raise the corn, grind the coffee, make the shirts—do it all? Why leave anything to the individual in this country, if these modern Moseses of political economy are to be believed, and we are to lay aside the old democracy and the old republicanism based on the Constitution and representative democracy?

Mr. Chairman, this is all I wanted to say. I have secured an hour in the general debate on the pension bill, which will be called up in the morning, in which I shall enlarge somewhat on these socialistic tendencies, upon some of the false doctrines being taught to this country of the rights of labor and the rights of capital, and this miserable propaganda of paternalism and socialism that comes with the Dead Sea fruit of anarchy in its wake, offering itself to the stalwart democracy of this country as a substitute for our Constitution and representative democracy under the Constitution. [Applause.]

Mr. BROWNING rose.

Mr. PADGETT. Mr. Chairman, will the gentleman yield for a moment?

Mr. BROWNING. Yes.

Mr. PADGETT. Mr. Chairman, I move to close debate on the paragraph and all amendments thereto in—does the gentleman from Illinois [Mr. FOWLER] desire time?

Mr. FOWLER. Mr. Chairman, I desire to offer an amendment.

Mr. PADGETT. Will the gentleman accept five minutes?

Mr. FOWLER. I do not have to accept anything, because my amendment has not been offered. I would like to have 10 minutes.

Mr. PADGETT. Mr. Chairman, I move to close debate on the paragraph and all amendments thereto in 10 minutes.

Mr. FOWLER. Mr. Chairman, I raise the point of order against the motion because there is a motion already before the committee.

The CHAIRMAN. The motion is not debatable. The question is on the motion made by the gentleman from Tennessee.

Mr. FOWLER. But I raise the point of order against the motion.

The CHAIRMAN. The point of order is overruled.

Mr. FOWLER. But there is a motion before the committee, and under the rules we are entitled to debate.

Mr. PADGETT. We have already debated the paragraph. [Cries of "Vote!"]

The CHAIRMAN. The gentleman from Texas [Mr. DIES] just debated the question.

Mr. MANN. Mr. Chairman, a parliamentary inquiry. What is the paragraph before the committee?

The CHAIRMAN. Lines 11 to 14, page 55.

Mr. MANN. Mr. Chairman, my colleague from Illinois [Mr. TAVENNER] has already debated that.

Mr. FOWLER. But I have not debated it.

Mr. MANN. But the gentleman is not the only colleague I have from Illinois.

Mr. FOWLER. I have asked for recognition three different times to offer an amendment.

Mr. PADGETT. The gentleman can offer his amendment later. Mr. Chairman, I call for a vote.

The CHAIRMAN. The question is on the motion of the gentleman from Tennessee to close debate on the paragraph and all amendments thereto in 10 minutes.

The motion was agreed to.

Mr. BROWNING. Mr. Chairman, one of the reasons given on the floor of the House why battleships should be constructed in Government navy yards is that the navy yards build better ships than the private yards build. I have some figures in my hand, compiled by Admiral Watt, as to the cost of repairs upon sister ships since they were commissioned down to March 1, 1914.

The battleship *Connecticut* was commissioned in 1906. It was constructed in the New York Navy Yard. The repairs on that ship have amounted to $917,610.06. The *Louisiana*, her sister ship, was constructed at the Newport News yard, under contract, and the cost of repairs on that ship has been $885,915.75.

Mr. FITZGERALD. Mr. Chairman, will the gentleman yield?

Mr. BROWNING. Yes.

Mr. FITZGERALD. How much of the $917,610.06 expended for repairs on the *Connecticut* went to repair the hole in the *Connecticut* which was caused by her bumping on a rock?

Mr. BROWNING. I do not know. I am citing the actual repairs on the ship *Connecticut*.

Mr. FITZGERALD. How much of that was occasioned by the fact that the *Connecticut* ran on a rock?

Mr. BROWNING. I decline to yield further to the gentleman, as I have only five minutes.

Mr. FITZGERALD. I thought the gentleman wanted information.

Mr. BROWNING. I am giving information which I received from Admiral Watt.

The battleship *Florida* was commissioned in 1911. She was constructed in the New York Navy Yard. There has been expended for repairs on this ship $151,175.68. The battleship *Utah*, her sister ship, was constructed at the Camden, N. J., shipbuilding yard under contract, and the repairs on her have amounted to $95,363.03.

Mr. Chairman, it does not seem to me that there is much economy in building battleships in Government navy yards.

The gentleman from Illinois [Mr. BUCHANAN], in his remarks this afternoon, stated that the reason why our ships should be built in navy yards is because of better wages and shorter hours. I want to say to the gentleman that the New York Shipbuilding Co. have a wage scale equal to that of any establishment in the country, and the hours of labor there are eight hours a day, which has been the case for some years, not only on Government work, but on all work in the yard.

Mr. Chairman, I very much deplore the desire on the part of some Members of the House to build all our ships in Government yards. I believe such a course would be unwise from a business standpoint and unfair to those whose capital is invested in the shipbuilding industry of the country and a great hardship to the many thousands of men who depend on the industry for a livelihood if private concerns are driven out of business because of failure to receive Government contracts. Only a small percentage of these men could hope to find employment in the navy yards, as it has been stated many times during this debate that the object of those who favor Government construction is to keep the present employees of the yards busy.

Mr. FOWLER. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Amend, page 55, at the end of line 14, by striking out the period and inserting a colon, and by adding the following:

"*Provided*, That no more than $14,500,000 shall be used for the procuring of armor or armament until after the Secretary of the Navy, through the Commissioner of Corporations, in public hearings shall have made an investigation to determine whether any persons, firms, or corporations are in a combination or conspiracy to defraud the Government of the United States in the price and quality of armor, armament, and other materials."

Mr. PADGETT. Mr. Chairman, I reserve the point of order against the amendment.

Mr. FOWLER. Mr. Chairman, if the amendment is subject to the point of order, I would be very glad to have the point made now, because I do not think it is.

Mr. PADGETT. Well, I will make the point of order, Mr. Chairman, and let the Chair rule on it.

Mr. FOWLER. Mr. Chairman, it is an absolute limitation upon the expenditure——

Mr. MANN. Mr. Chairman, I would like to be heard for a moment on the point of order.

Mr. FOWLER. I desire to say to the Chair that the gentleman from Illinois [Mr. MANN] was in the chair in 1910, and the gentleman from Wisconsin [Mr. STAFFORD] made a point of order against an amendment that the gentleman from Alabama [Mr. HOBSON] had offered to the naval appropriation bill. I presume that the Chair a few days ago——

The CHAIRMAN. What volume has the gentleman?

Mr. FOWLER. I read from series 45, Volume IV, page 4295, CONGRESSIONAL RECORD of 1910. An amendment was offered by Mr. HOBSON, as follows:

Provided, That no part of this appropriation shall be expended in experiments unless, in the development of armor-piercing projectiles and high explosives, an attack on heavy turret armor and heavy belt armor is made by armor-piercing projectiles at a battle range not less than 8,000 yards and by explosive gelatin in quantity not less than 200 pounds, exploded against the heavy belt armor and heavy turret armor of an actual vessel.

That was an amendment offered to an appropriation which provided simply for experiments. The amount provided for in the paragraph was not a very large sum, but a limitation was placed on its expenditure by the amendment which I have just read. The gentleman from Illinois [Mr. MANN] was in the chair at the time when the point of order was raised, and in passing upon the question——

Mr. MANN. If the gentleman is through——

The CHAIRMAN. The gentleman has not yielded the floor yet.

Mr. FOWLER. The Chairman at that time used the following language:

It is perfectly within the power of the House, under the rule, to adopt an amendment that is a limitation upon the appropriation, and it seems to the Chair that this is a mere limitation upon the appropriation. It is true that the department has authority to make any experiment it pleases, but the amendment may provide that the money of this appropriation shall be withheld from experiments in developing the armor-piercing projectiles which do not meet the specified conditions as to range and amount of explosive. The Chair therefore overrules the point of order.

Mr. Chairman, the paragraph here provides for $14,877,500. The amendment provides that no more than $14,500,000 of said appropriation shall be used to procure armor or armament until after the Secretary of the Navy, through the Commissioner of Corporations, in public hearings, shall have made an investigation to determine whether any persons, firms, or corporations are in combination or conspiracy to defraud the Government of the United States in the price or quality of the armor, armament, or other materials. The amendment undoubtedly, Mr. Chairman, is a limitation upon the expenditure only. It seeks only one thing, and that is that a certain portion of the money appropriated shall not be expended until it is determined as to whether there is an armor trust and acting in a way to defraud the American people either as to the quality or the price of the armor. Now, Mr. Chairman, that being a limitation upon the expenditure and dealing with the same subject matter as is dealt with in this paragraph, I can not understand but what it is perfectly germane in every sense of the word, because the only rule that applies to it is Rule XXI, and that rule provides that a limitation may be placed upon the expenditure in three different ways. If the amendment seeks a retrenchment on expenditures as to the number of officers of the United States or the salaries paid to them or the amount carried by the paragraph, then the amendment is not subject to a point of order. I think, Mr. Chairman, the amendment which was offered by me a few days ago, and against which the Chair overruled a point of order, with the gentleman from Illinois [Mr. MANN] at that time claiming that the point of order would lie against the amendment, is just like that amendment in effect. Its force and effect are just the same in this instance as in the other instance and as was urged by the amendment offered by Mr. HOBSON to the naval bill in 1910. And for these reasons, Mr. Chairman, I think the amendment is not subject to a point of order.

Mr. MANN. Mr. Chairman, I think the ruling my distinguished colleague has cited was a very good ruling. Considering the author, I do not see how it could otherwise have been [applause]; but there was a question where there was a requirement that the Navy Department should do something which it had the power to do, and the limitation was that unless the Navy Department did that, then the appropriation should not be available; but here is a purported limitation limiting the expenditure of money unless the Navy Department does something which it does not have the power to do unless this is legislation, because the Secretary of the Navy has no more jurisdiction over the Commissioner of Corporations than my colleague, the gentleman from Illinois.

The Commissioner of Corporations is the chief of the bureau in the Department of Commerce and is not subject to the directions or instructions of the Secretary of the Navy. Now, if the Secretary should construe that he could not expend the money, that might be very well; but the Secretary would have to take, and the Commissioner of Corporations would have to take, this special legislative enactment giving to the Secretary of the Navy authority to require the Commissioner of Corporations to make an investigation, and it would have to be considered as legislation, because the departments would not suppose we were inserting a limitation which meant nothing at all, and hence they would assume it was legislation and be right about it. And we would be conferring an authority which is not now given to the Secretary of the Navy and fixing a requirement on the Commissioner of Corporations which does not now exist.

The CHAIRMAN. The Chair is of the opinion that there is legislative direction in the amendment offered by the gentleman from Illinois [Mr. FOWLER], and therefore sustains the point of order.

Mr. FOWLER. Mr. Chairman, I move to strike out the paragraph.

The CHAIRMAN. The gentleman from Illinois [Mr. FOWLER] moves to strike out the paragraph. The question is on the motion——

Mr. FOWLER. I desire to be heard.

Mr. PADGETT. There is no debate on the paragraph.

Mr. MANN. My colleague has five minutes which he did not use.

Mr. PADGETT. That is right. He did not use his five minutes.

Mr. BROWNING. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. FOWLER. Mr. Chairman, first, the trust furnishes the Government armor not up to the specifications; second, false reports of the treatment of the plates are made to the Government inspectors; third, deliberate suppression of facts as to most important tests of armor and shells at Government proving grounds; fourth, the Armor Trust by its monopoly exacts from the Government extortionate prices for armor of more than $200 per ton above what the armor is worth; fifth, the Armor Trust defrauds the Government of several million dollars annually by fraudulently furnishing inferior armor not made according to contract specifications.

VIOLATION OF ARMOR CONTRACTS.

[H. Rept. No. 1468, 53d Cong., 2d sess.]

Hon. Amos Cummings, of New York, chairman of the Committee on Naval Affairs, submitted the following report August 23, 1894, of its investigations since the House, on May 22, 1894, adopted the resolution ordering an investigation of the Carnegie Co.'s furnishing of inferior or damaged armor, etc., to the Government. "and the amount of compensation which should be paid to the Government in settlement for such damaged or inferior armor," etc. The report says:

"The committee has taken a large mass of testimony. It has visited the works of the Carnegie Co. and has carefully analyzed the testimony taken. The alleged frauds as elicited by the testimony are specific. They are as follows.

THE CHARGES AGAINST THE COMPANY.

"First. The plates did not receive the uniform treatment required by the specifications of the contracts. In many cases the treatment was irregular, and in other cases it was practically inefficient. The specifications of the contract of February 28, 1893, required that each plate should be annealed, oil tempered, and again annealed, the last process being an annealing one.

"Second. False reports of the treatment of the plates were systematically made to the Government inspectors. This was in violation of paragraph 95 of the circular concerning armor-plate appurtenances, dated January 16, 1893, which was made a part of the contract. Paragraph 95 says:

"'The contractor shall state for each article, in writing, the exact treatment it has received.'

"The specifications of the contract of November 20, 1890, paragraph 164, say:

"'A written statement of work and contractor's tests, to be commenced and in progress each day, must be furnished to the chief inspector.'

"Third. No bolts received the double treatment provided for in the specifications of either contract. A report of a double treatment, however, was made to the Government inspectors.

"Fourth. Specimens taken from the plates both before and after treatment, to ascertain the tensile strength of each plate, were stretched without the knowledge of the Government inspectors, so as to increase their apparent tensile strength when actually tested.

"Fifth. False specimens taken from other plates were substituted for the specimens selected by the Government inspectors.

"Sixth. The testing machine was repeatedly manipulated, by order of the superintendent of the armor-plate mill, so as to increase the apparent tensile strength of the specimens. These specimens were jugged in measurement, so as to increase their apparent ductility.

"Seventh. Various specimens selected by Government inspectors were re-treated without their knowledge before they were submitted to test.

"Eighth. Plates selected by the Government inspectors for ballistic test were re-treated, with the intention of improving their ballistic resistance, without the knowledge of the Government inspectors. In one case, at least, the conclusion is almost irresistible that the bottom of another plate was substituted for the top half of plate A 619 after it had been selected by the Government and while awaiting shipment to Indianhead. Upon this ballistic test a group of plates containing 348 tons, valued at about $180,000, were to be accepted or rejected. In three cases, at least, the plates selected by the Government inspectors were re-treated in this manner without their knowledge. These ballistic plates represented 779 tons of armor, valued at over $410,000. The groups represented by these three plates had all been submitted for premium of $30 per ton if they passed a more severe test than required for acceptance.

"Ninth. In violation of the specifications of the contact, pipes or shrinking cavities, erroneously called blowholes, in the plates were plugged by the contractors and the defects concealed from the Government inspectors. These cavities in some cases diminished the resistance and value of the plate.

"Tenth. The inspector's stamp was either duplicated or stolen, and used without the knowledge of the Government inspectors.

"Eleventh. The Government inspector in inspecting bolts was deceived by means of false templets or gauges."

On page 647, C. M. Schwab, superintendent of the Carnegie Works, testified: "I have knowledge of this fact, that they did not make any plates that did not have blowholes."

Mr. Corey testified, page 560: "The inspectors rejected the plates, and then we would turn them over to the Bureau of Ordnance, who would accept them."

The finding of the Navy Board, consisting of W. T. Sampson, Chief of the Bureau of Ordnance; Philip R. Alger, professor, United States Navy; and A. A. Ackerman, lieutenant, United States Navy, was: "We therefore conclude that the Government has been damaged by the Carnegie Co. to the extent of (p. 23)—

"(1) All premiums paid to this company, because wrongfully obtained.

"(2) Fifteen per cent of the value of all armor furnished by them.

"(3) The value of all plates containing serious blowholes, or other defects which have been concealed.

"This company was paid $7,682.79 in premiums and $1,846,445.16 for armor."

Report of the House Committee on Naval Affairs, page 16, says: "Criminality."

"If the criminality of the wrongful act is to be measured by the deliberation with which it is committed, the magnitude of the evil likely to result from its perpetration and the want of provocation with which it is done, the frauds which your committee have found are worthy to be called crimes."

Opinion of Attorney General Olney that an agreement on the part of the Secretary of the Navy to pay rewards of 25 per cent of the amounts recovered by the Government to the witnesses furnishing evidence is valid (p. 16).

The witnesses (informants) were paid a reward of $35,000, or 25 per cent of the $140,000 penalty recovered by the Government from the Carnegie Co. (Pp. 18–38, H. Doc. 160, 53d Cong., 2d sess.)

The Secretary of the Navy estimates damage to the Government by the Carnegie Co. between $300,000 and $400,000 (p. 18). I estimate total damage, according to the report of the Navy Board, to be:

Premiums	$7,682.79
15 per cent of armor furnished	276,966.75
Value of damaged plates (p. 18)	316,640.00
	601,289.54

The former investigation of the armor frauds was voted by the House of Representatives on May 22 1894, and finished and its report made to this House on August 23, 1894, finding the Carnegie Co. guilty of gross and criminal frauds on the Government on its armor contracts.

Now, if we turn to the table of armor contracts, page 839 of the Navy Yearbook, we find that previous to this investigation the Armor Trust, then composed of the Carnegie and the Bethlehem Cos., was charging the Government from $574 to $671 per ton for armor, and that immediately after the report of the investigating committee of this House the Government was able to contract for the great bulk of the armor for $411 per ton, an average of about $200 per ton less than we were paying before the investigation.

We find, then, the interesting fact that this saving to the Government on armor contracts, as a direct result of the investigation by a committee of this House, from 1894 to the present time, amounts in round figures to considerably over $30,000,000. A decidedly profitable investigation that; and since in recent years the Armor Trust has begun pushing up the price of armor on the Government, it is reasonable to suppose that another investigation might prove equally profitable to the Government. In fact, it is, I understand, asserted by competent experts that better armor than we are now buying for $440 per ton could be got for $240 per ton if another investigation is ordered by Congress, a saving of $200 per ton and a reduction of over $3,200,000 on the cost of two ships provided for in this bill alone.

Mr. Chairman, Secretary Daniels in the hearings before the Committee on Naval Affairs, in 1914, used the following language:

Though you can not establish it in black and white, there is no doubt of an Armor Plate Trust all over the world.

Secretary Daniels in speaking of his effort to secure competitive bids for certain material for the construction of the dreadnaught *Pennsylvania* found that the bids were absolutely identical, as he testified before the committee. He wound up on that subject with the following language:

In other words, they held us up.

Mr. Chairman, who was it that Secretary Daniels referred to when he said that "they held us up"? Who was it that they held up? This evidence reveals that it was the Armor Trust that had held up the American people in their efforts to secure competitive bids for furnishing armor and other materials for our Navy. Who is it that holds people up? Is it the man whose heart is bent on good or is it the man who has sold his soul to the devil? Who is it that holds up the passengers on the train? Who is it that goes into the house of the honest man at night and holds up the landlord? Who is it that stands in the dark corners on the streets in the dead of night and holds up the pedestrian?

It is the man who has sold his soul to Satan. And we can not excuse ourselves by hurrying over these trust paragraphs as is undertaken to be done by the chairman of this committee and allow such "holdups" to continue. If we are to have relief from the Armor Trust, I am persuaded that we will be compelled to look elsewhere than at the hands of the chairman of this committee. When we examine the paragraphs carrying these trust provisions, and find him actively trying to skip over them without giving an opportunity to discuss them, we are compelled to conclude that relief under his leadership is impossible. You can not cover up the crimes committed by this trust against the American people by saying that it is late and we want to pass this bill to-night. You can not evade the duty which we owe to the American people by saying we want to pass this bill and adjourn before next August. We can not cover up the solemn duty that we took upon our souls under oath when we became Members of this great body by haste and indifference, thereby allowing the slimy fingers of corporate greed to take hold of our work and deprive the American people of the legislation which we took upon ourselves to enact when we became Members of this body.

We can not, under the guise of rushing this bill through, exonerate ourselves before the people of this country when it is proven that Secretary Herbert and Secretary Daniels have both said in solemn form that there is a world-wide Armor Trust; that the three and the only armor-manufacturing plants in this country are in a combination in restraint of trade, in a combination to defraud the American people in the price and quality of the material furnished by them for our Navy. It is criminal, it is outrageous, for us to allow it to go on, and if we do not take the proper steps to check and prevent it we can not go back to the people, to our constituents, and tell them that we have done our whole duty. [Applause.]

The CHAIRMAN. The question is on the adoption of the amendment of the gentleman from Illinois [Mr. FOWLER] to strike out the paragraph.

Mr. FOWLER. Mr. Chairman, I withdraw the pro forma amendment.

The CHAIRMAN. Without objection, the amendment offered by the gentleman to strike out the paragraph is withdrawn. [After a pause.] The Chair hears none. The Clerk will read.

The Clerk read as follows:

The Secretary of the Navy is hereby authorized and directed to investigate and report at the next regular session of Congress upon the selection of a suitable site for the erection of an armor plant to enable the United States to manufacture its own armor plate and special-treatment steel capable of standing all ballistic and other necessary tests required for use in vessels of the Navy at the lowest possible cost to the Government, taking into consideration all of the elements necessary for the economical and successful operation of such a plant, such as the availability of labor, material, and fuel, and transportation facilities to and from said plant. Said report shall contain the cost of a site sufficient to accommodate a plant having an annual output capacity of 20,000 tons and a site for an output of 10,000 tons, and also an itemized statement of the cost of the necessary buildings, machinery, and accessories for each, and the annual cost and maintenance of each, and the estimated cost of the finished product.

Mr. MANN. Mr. Chairman, I make a point of order on the paragraph.

Mr. SHARP. Will the gentleman withhold his point of order?

Mr. PADGETT. I ask for a ruling, Mr. Chairman. The paragraph is subject to a point of order. I call for the regular order.

The CHAIRMAN. The gentleman from Illinois [Mr. MANN] makes a point of order, and the gentleman from Tennessee [Mr. PADGETT] asks for the regular order.

Mr. SHARP. Will the gentleman reserve it for a moment?

Mr. MANN. For what purpose?

Mr. SHARP. I want to speak upon it.

Mr. MANN. Oh, the gentleman will have an opportunity to speak to-morrow in general debate probably. What is the use in speaking on it when the chairman of the committee has conceded that it is subject to a point of order? This bill is a week later than it ought to be, anyway.

The CHAIRMAN. Does the gentleman insist upon his point of order?

Mr. PADGETT. I concede it is subject to a point of order.

Mr. MANN. I make the point of order.

The CHAIRMAN. The point of order is sustained.

Mr. FOWLER. Mr. Chairman, I hope the gentleman will not make a point of order on the paragraph. [Cries of "Vote!" "Vote!"]

Mr. MANN. I will. I am afraid the gentleman from Illinois [Mr. FOWLER] will detain us for another five-minute speech, and I am tired hearing from him.

Mr. FOWLER. It is the only paragraph, Mr. Chairman, that offers relief in this bill. I protest against a man taking it out on a point of order. [Cries of "Vote!" "Vote!"]

Mr. MANN. We are tired of hearing so much hot air. [Laughter.]

The CHAIRMAN. The Chair sustains the point of order. The Clerk will read.

The Clerk read as follows:

Total increase of the Navy heretofore and herein authorized, to be available until expended, $36,456,734.

Mr. SAUNDERS. I make a point of order against that paragraph, Mr. Chairman.

Mr. ROBERTS of Massachusetts. It is too late.

Mr. SAUNDERS. No; it is not too late. I can not outrun the Clerk in reading.

Mr. PADGETT. The gentleman makes the point of order against the language, "to be available until expended"?

Mr. SAUNDERS. Yes.

Mr. PADGETT. I concede that the point of order is well taken.

The CHAIRMAN. The point of order is sustained. The Clerk will read.

The Clerk read as follows:

Of each of the sums appropriated by this act, except such amounts as may be required to meet obligations authorized in previous acts and for which contracts have been made, no part shall be used to procure through purchase or contract any vessels, armament, articles, or materials which the navy yards, gun factories, or other industrial plants operated by the Navy Department are equipped to supply, unless such Government plants are operated approximately at their full capacity for not less than one regular shift each working day, except when contract costs are less than costs in said Government plants, and except when said Government plants are unable to complete the work within the time required, and except in cases of emergency.

Mr. BROWNING. Mr. Chairman, I make a point of order against the paragraph.

Mr. MANN. I do not think it is subject to a point of order.

The CHAIRMAN. The gentleman from New Jersey [Mr. BROWNING] makes a point of order on the paragraph. The Chair overrules the point of order. It is merely a limitation. The Clerk will read.

The Clerk read as follows:

That no part of any sum herein appropriated shall be expended for the purchase of structural steel, ship plates, armor, armament, or machinery from any persons, firms, or corporations who have combined or conspired to monopolize the interstate or foreign commerce or trade of the United States, or the commerce or trade between the States and any Territory or the District of Columbia, in any of the articles aforesaid, and no purchase of structural steel, ship plates, or machinery shall be made at a price in excess of a reasonable profit above the actual cost of manufacture. But this limitation shall in no case apply to any existing contract.

Mr. FOWLER. Mr. Chairman, I offer the following amendment: On page 57, line 5, after the word "plates", insert the words "armor, armament," so that the paragraph will read:

Ship plates, armor, armament, or machinery.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Illinois [Mr. FOWLER].

The Clerk read as follows:

Amend, page 57, line 5, by inserting after the word "plates" the words "armor, armament."

Mr. PADGETT. Mr. Chairman, I want to call the attention of the gentleman to the language at the beginning of the paragraph on page 56. If he will look there he will see that that is already in the paragraph—

That no part of any sum herein appropriated shall be expended for the purchase of structural steel, ship plates, armor, armament, or machinery from any persons, firms, or corporations who have combined or conspired to monopolize the interstate or foreign commerce or trade of the United States.

That is simply inserting what is already in the law.

Mr. FOWLER. Why do not you accept it, then, if it does not do any harm? [Cries of "Vote!" "Vote!"] Mr. Chairman, I desire to be heard on the amendment. [Cries of "Vote!" "Vote!"]

The CHAIRMAN. The gentleman from Illinois [Mr. FOWLER] is recognized.

Mr. FOWLER. Mr. Chairman, there is a provision in the first part of this paragraph to the effect that "no part of any sum herein appropriated shall be expended for the purchase of structural steel, ship plates, armor, armament, or machinery from any persons, firms, or corporations who have combined or conspired," and so forth. But the other part of the paragraph—and I shall read all of it—is:

Corporations who have combined or conspired to monopolize the interstate or foreign commerce or trade of the United States, or the commerce or trade between the States and any Territory or the District of Columbia, in any of the articles aforesaid, and no purchase of structural steel, ship plates, or machinery shall be made at a price in excess of a reasonable profit above the actual cost of manufacture. But this limitation shall in no case apply to any existing contract.

The two ideas are not alike at all. In effect the provision in the bill gives an opportunity to buy armor and armament at a price with unreasonable profits. [Cries of "Vote!" "Vote!"] And that is the reason I want this amendment placed in this paragraph. [Cries of "Vote!" "Vote!"] Now, gentlemen, we should not slip over this paragraph by yelling "Vote," and at the same time give a benefit to this trust that has already been shown to be a slimy, most obnoxious, and most villainous combination for the purpose of robbing the people of the United States, giving them an opportunity to sell their product, the most costly to the United States, at an unreasonable profit. We can not discharge our whole duty by treating this question lightly and refusing to consider this amendment. [Cries of "Vote!" "Vote!"]

Now, Mr. Chairman, I desire to say to the gentlemen who are yelling "Vote!" over this House, that I presume when Gabriel shall set one foot on the land and the other on the sea and summon mankind to final judgment, and when the great angel shall roll back the door of heaven like a mighty scroll, some fellow away down on earth who was once a Member of the Congress of the United States will not yell to the Eternal Judge "Vote!" but "Don't vote!" He will be afraid of the vote. [Laughter.] I want you gentlemen to understand that I am not here to kill time. Were it not for the responsibility which I feel hanging over me and hanging over every Member of this body I would not have opened my mouth, because to me personally it will not amount to anything. I am able to earn enough of this world's goods to keep me and my family as long as I expect to live, but I am working now for my constituency and for my country.

The CHAIRMAN. The time of the gentleman has expired.

Mr. PADGETT. Mr. Chairman——

Mr. MADDEN. Mr. Chairman, I ask unanimous consent that my colleague be given five minutes more.

The CHAIRMAN. The gentleman from Tennessee is recognized.

Mr. PADGETT. In order that we may finish this bill before the Angel Gabriel stands one foot on the land and one foot on the sea and blows his horn, I move to close debate on this paragraph and all amendments thereto now.

Mr. GREGG. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman from Texas rise?

Mr. GREGG. I rose for the purpose of being recognized.

The CHAIRMAN. The Chair has recognized the gentleman from Tennessee, and he has moved to close debate. The question is on the motion made by the gentleman from Tennessee [Mr. PADGETT].

The motion was agreed to.

Mr. GREGG. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The question is on the adoption of the amendment offered by the gentleman from Illinois [Mr. FOWLER]. The Chair will ask the gentleman from Texas [Mr. GREGG] for what purpose he now rises?

Mr. GREGG. I move to strike out the last word, if it is in order.

The CHAIRMAN. That is not in order. Debate is closed.

Mr. GREGG. I withdraw the pro forma amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois [Mr. FOWLER].

The question being taken, the Chairman announced that the noes appeared to have it.

Mr. FOWLER. Mr. Chairman, I ask for a division.

The committee divided; and there were—ayes 50, noes 66.

Accordingly the amendment was rejected.

The Clerk read as follows:

That no part of any sum herein appropriated under "Increase of the Navy" shall be used for the payment of any clerical, drafting, inspection, or messenger service, or for the pay of any of the other classified force under the various bureaus of the Navy Department, Washington, D. C.

Mr. GREGG. Mr. Chairman, I move to strike out the last word. The amendment that was proposed a few moments ago by the gentleman from Illinois [Mr. FOWLER] was not given proper consideration, and I am inclined to believe that a majority of this House voted under a misapprehension, growing out of the statement made by the chairman of the committee [Mr. PADGETT] that the substance of the amendment of the gentleman from Illinois [Mr. FOWLER] was already incorporated in the bill. Such is not true. Now, I want to call your attention for just a moment. The section which the gentleman sought to amend has two provisions, the first of which is:

That no part of any sum herein appropriated shall be expended for the purchase of structural steel, ship plates, armor, armament, or machinery from any persons, firms, or corporations who have combined or conspired to monopolize the interstate or foreign commerce or trade of the United States.

Or, in other words, from a trust.

It provides that armor and armament and the other items, structural steel, ship plates, and machinery, shall not be purchased from a trust. There is another provision of this section—and here is where the gentleman from Illinois [Mr. FOWLER] offered his amendment, which ought to have been adopted, and doubtless would have been but for the fact that the gentleman has consumed so much of the time to-day that due consideration was not given to his amendment—he offered his amendment to that provision of the bill which is as follows:

And no purchase of structural steel, ship plates, or machinery shall be made at a price in excess of a reasonable profit above the actual cost of manufacture.

You will notice it prohibits the purchase only of structural steel, ship plates, and machinery at an unreasonable price, but does not provide that armor and armament shall not be purchased at a price above a reasonable profit; and the object of the gentleman's amendment was to include armor and armament in this provision so as to prohibit its purchase at an unreasonable price. This Committee of the Whole House has made a mistake. Why should we say that the department shall not buy structural steel, ship plates, or machinery at an unreasonable price and permit them to buy armor and armament at an unreasonable price? I submit that to the consideration of this committee; and I say there is no reason why we should not limit the purchase of armor and armament to a reasonable price, but there is every reason why we should do it; because the records show and the hearings clearly demonstrate that on those particular items is where the Government has been robbed in the past. I submit that a great injustice has been done and that a wrong has been perpetrated by this committee. I submit further that the provision cited by the chairman of this committee does not apply, but that it simply prohibits this purchase from a trust. This provision here prohibits this purchase at an unreasonable price, and we ought to prohibit the purchase at an unreasonable price not only of structural steel, ship plates, and machinery, but also of armor and armament. [Applause.]

Mr. BURKE of Wisconsin. Mr. Chairman, to me it is a pleasure to support this naval appropriation bill. It contains among other essential things a provision for the increase of the Navy by authorizing the construction of two first-class battleships. These ships are to carry as heavy armor and as powerful armament as any vessel of their class, and are to have the highest practicable speed and the greatest desirable radius of action. Each is to cost, exclusive of armor and armament, not to exceed $7,800,000. The armor and armament of the proposed battleships herein provided for are to cost $8,438,750 each. Each vessel when completed, including its armor and armament, is to cost $15,238,750.

In addition to these two first-class battleships, the bill provides for the construction of six torpedo boat destroyers having the highest practicable speed and costing, exclusive of armor and armament, $925,000 each. Provision is also made for one seagoing submarine torpedo boat costing not to exceed $1,100,000, and also for three coast defense submarine torpedo boats costing not to exceed in the aggregate $1,860,000. Another provision is for four submarine boats costing in the aggregate $1,500,000.

INCREASE OVER NAVAL BILL OF 1913.

Last year's naval appropriation bill carried the following new construction for the Navy: One battleship, 6 destroyers, 4 submarines, 1 transport, and 1 supply ship, while the bill recommended this year carries 2 battleships, 6 destroyers, and 8 submarines; yet there is a reduction in this bill under last year's bill of $836,309.99, notwithstanding that the present bill contains provision for the construction of one additional battleship with armor and armament, and several minor increases.

TOTALS.

The total amount carried in the naval appropriation bill of 1913 amounted to $140,800,643.53. The Navy Department submitted estimates for this year, including supplemental estimates and all other estimates, amounting to $144,492,453.53. The amount recommended for all naval purposes in this bill is $139,964,433.61, a reduction in the estimates for this year, in round numbers, of $4,500,000. From this it must be apparent to all that the House Committee on Naval Affairs has not allowed itself to be blinded and rushed by the enthusiasm of the Navy Department. It also proves that our committee is thoroughly familiar with the naval situation of the Nation, and that its recommendations, in the whole and in detail, are based upon substantial facts.

FORMER NAVAL PROGRAM.

For several years prior to and including 1911, the Congress of the United States had in its annual naval appropriation bill made provision for the construction of two first-class battleships and for their armor and armament. In 1912 and 1913, in a spasm of economy, Congress made provision for only one first-class battleship, with armor and armament. Under the naval program, which provided for two first-class battleships annually, the strength of the American Navy increased and forged ahead until it ranked second among the naval powers of the world. Failure to continue that program of two battleships each year in 1912 and 1913 has reduced our rank to that of third among the naval powers.

MY PREVIOUS VOTES ON THE NAVY.

A caucus of the Democratic Members of the House of Representatives in 1912 decreed that the naval appropriation bill for that year should contain provision for the construction of no new battleships. At that caucus a dream of universal peace and adherence to an impracticable party platform declaration of economy seems to have blinded the Democratic membership to the necessity of upholding and continuing the Navy of the United States second in rank of naval powers. At that time I said to my party colleagues that when it came to the honor and defense of our Nation, I owed no allegiance to my party, but that my sole allegiance was to our country. I then and there bolted the decree of the Democratic caucus and voted upon this question of national defense as my conscience dictated, which was for two battleships. Finally, in that year a compromise was effected and provision was made for one battleship only. The party caucus, having learned something by experience, did not attempt in 1913 to dictate the number of battleships, if any, that should be built for that year. In 1913, however, I again had the pleasure and honor of voting for an amendment to the naval appropriation bill which provided for the construction, armor, and armament of two first-class battleships, but again cheap economy blinded the majority of my party colleagues to the necessity of an adequate Navy, and but one battleship, with armor and armanent, was provided for. My attitude and vote upon the last two annual naval appropriation bills were well known to my constituents and to the people of my State. No constituent and no paper in my district has criticized me for openly and boldly voting for such naval appropriations as were considered necessary by experienced naval officials for the maintenance of the second position in rank among the naval powers by the United States. On the other hand, I have received many favorable expressions of opinion for the position which I took upon those two measures.

GLAD FOR RETURN TO OLD NAVAL PROGRAM.

It was indeed a pleasure to me to learn early this year that the present Democratic Secretary of the Navy, Hon. Josephus Daniels, intended to include in this year's naval estimates a two-battleship program for the coming fiscal year. This pleasure was increased when I learned that his intentions to recommend such an increase in battleships, had the approval of our Democratic President. Here, at least, we have two Democratic officials high in authority who consider an adequate national naval defense far more important than mere economy. I am sure that the wisdom and patriotism of the country commend them for their wise and sound judgment and their patriotic attitude. History will place them in the ranks of patriots first and in economy second.

In view of this change of attitude on the part of the Democratic Party in favor of an adequate Navy, it is natural that I should rejoice. It is my fond hope that the Secretary of the Navy and the President may continue to urge the upbuilding and maintenance of an American Navy which will be suitable, efficient, and adequate to protect our national interests the world over. I feel that this turn in administration sentiment, justifies me in having previously bolted my party caucus on this matter, and in boldly and openly voting for the maintenance of the efficiency of the American Navy.

INTEREST OF CONSTITUENTS.

In 1912, when I bolted the decree of the Democratic caucus on the question of battleships and voted for two first-class battleships, I was accosted by one of my genial Democratic friends, who belonged to the small-Navy contingent, with the remark that my constituents were not interested in the Navy, and that not one in a thousand of them had ever seen or ever would see a battleship. I promptly told him that I represented an unselfish and patriotic district; I pointed out to him that at that very time the commandant of the Philadelphia Navy Yard was no less an official than Rear Admiral Albert Mertz, a native of my home county of Dodge and a legal resident of my native and home city of Beaver Dam; and I flushed with pride as I told him the additional fact that this admiral and his father before him were loyal and patriotic Democrats. I called his attention to the fact that my district was the district that for five terms had been represented in Congress by the distinguished patriot and Democrat Gen. Edward S. Bragg. I pointed out to him that at that very hour the corridors of the Capitol were being traversed by a lady in mourning, who was the daughter of Gen. Bragg and the widow of Commodore Sherman. Last, but not least, I told him of the two bright, gallant, and patriotic young men from my district that were then and now are cadets in the Annapolis Naval Academy, placed there by me, who are standing near the head of their respective classes, and whom I fondly look forward to see in due time occupying and enjoying high positions in our Navy; and then I asked him if he expected a district with such a record to be represented by a small-Navy Democrat, or by a Democrat who believed in the progress and enlargement of our Navy.

FARMERS HAVE AN INTEREST.

I am aware of, and view with pride, the fact that my dairy constituents now and for many years past have under contract, supplied all the condensed milk used by the United States Navy. It is a compliment of no small magnitude to be thus favored by the Navy, whose judgment is so sound and so excellent in such matters. It is appreciated by my constituents, and I know that they do not look with a frown upon my support of an adequate Navy.

NAVAL PROGRAM OF THE WORLD.

The naval programs of the leading powers of the world are and have of recent years been increasing in tonnage and power. Their programs even this year show a steady increase as compared with those of preceding years. The battleships now under construction are all to be equipped with the largest and most powerful cannon and of increased tonnage.

The 12-inch gun for new battleships has now been almost universally discarded in favor of a 13.4-inch or larger gun. England, Germany, and Italy have adopted a 15-inch weapon. France adheres to the 13.4-inch gun, but has increased the number in each turret to four. Submarines are receiving marked attention, and their size and speed have been greatly increased.

GREAT BRITAIN.

The total naval appropriations of Great Britain for the year ending June 30, 1914, amounted to $235,213,498, as compared with appropriations of that nation for naval purposes in the previous year of only $228,430,065. It will be remembered that the appropriation carried by this bill for naval purposes is, in round numbers, only $139,000,000.

GERMANY.

The total naval appropriations of Germany for the year ending June 30, 1914, amount to $112,037,576. This is an increase of nearly a million and one-half over the total German naval appropriations for the previous year.

FRANCE.

The total naval appropriations of France for the year ending June 30, 1913, amount to $90,164,989, an increase of $8,472,157 over the appropriations of that country for 1912.

JAPAN.

The total naval appropriations of Japan for the fiscal year of 1914 amount to $48,105,152, which is an increase over the naval appropriations of that country for the preceding year of $1,195,811.

RUSSIA.

The naval estimates for Russia for the year of 1913 amount to $118,643,820. This is an increase over the naval appropriations of 1912 of $36,624,187.

ITALY.

The naval estimates of Italy for the year 1914 amount to $49,550,147, an increase of $7,656,727 over the estimates for the preceding year.

It will be observed that there is a pronounced tendency to increase the naval strength of each nation. I venture at this time to include in these remarks the following statistics, in hope that the same may be instructive and interesting:

Relative order of warship tonnage.

Present order (tonnage completed).		As would be the case if vessels now building were completed.	
Nation.	Tonnage.	Nation.	Tonnage.
Great Britain	2,072,711	Great Britain	2,611,291
Germany	943,338	Germany	1,228,208
United States	760,002	United States	921,844
France	645,891	France	876,155
Japan	497,199	Japan	702,099
Russia	283,681	Russia	685,373
Italy	259,136	Italy	452,089
Austria	198,351	Austria	258,740

SEA STRENGTH.

[Office of Naval Intelligence, Navy Department, December 1, 1913.]

In order to answer the frequent inquiries of societies and persons throughout the country interested in the maintenance of the Navy and its relative strength and importance in comparison with foreign navies, the following information has been compiled:

SHIPS.

TABLE I.—*Vessels built.*

	Battleships, dreadnaught type.[1]	Battleships.[2]	Battle cruisers.[3]	Armored cruisers.	Cruisers.[4]	Destroyers.	Torpedo boats.	Submarines.	Coast defense vessels.[5]
England	18	40	9	34	72 (*k*)	143 (*k*)	49	72	.....
Germany	13	20	4	9	40	130	.....	24	2
United States	7	24	.....	11	14	46	18	25	4
France	2	18	.....	20	10	81	139	75	1
Japan	2	13	1	13	14	54	28	13	2
Russia	.....	8	.....	6	9	93	14	30	2
Italy	2	8	.....	9	7	28	68	19	.....
Austria	2	6	.....	2	5	15	36	6	6

[1] Battleships having a main battery of all big guns (11 inches or more in caliber).
[2] Battleships of (about) 10,000 tons or more displacement, and having more than one caliber in the main battery.
[3] Armored cruisers having guns of largest caliber in main battery and capable of taking their place in line of battle with the battleships. They have an increase of speed at the expense of carrying fewer guns in main battery, and a decrease in armor protection.
[4] Includes all unarmored cruising vessels above 1,500 tons displacement.
[5] Includes smaller battleships and monitors. No more vessels of this class are being proposed or built by the great powers.

TABLE II.—*Vessels building or authorized.*

	Battleships, dreadnaught type.	Battle cruisers.	Cruisers.	Destroyers.	Torpedo boats.	Submarines.
England[1]	14	[2]1	[2]20	[2]44	.....	[2]22
Germany[3]	6	3	4	12	.....	[4]12
United States	5	.....	.....	16	.....	26
France	9	.....	.....	5	.....	18
Japan[5]	4	3	.....	2	.....	2
Russia[6]	7	4	8	45	.....	25
Italy	7	.....	3	19	2	.....
Austria	2	.....	2	3	27	8

[1] England has no continuing shipbuilding policy, but usually lays down each year 4 or 5 armored ships with a proportional number of smaller vessels.
[2] Includes vessels of colonies.
[3] Germany has a continuing shipbuilding program, governed by a fleet law authorized by the Reichstag. For 1913 there are authorized 2 battleships, 1 battle cruiser, 2 cruisers, 12 destroyers. Eventual strength to consist of 41 battleships, 20 armored cruisers, 40 cruisers, 144 destroyers, 72 submarines.
[4] $4,760,000 authorized for experiments and further construction.
[5] $78,837,569 authorized to be expended from 1911 to 1917 for the construction of war vessels.
[6] Russian shipbuilding program provides for the completion by 1918 of 4 battle cruisers, 8 small cruisers, 36 destroyers, and 18 submarines.

The following vessels are not included in the tables:

Ships over 20 years old from date of launch, unless they have been reconstructed and rearmed within five years.

Torpedo craft over 15 years old.

Transports, colliers, repair ships, converted merchant vessels, or any other auxiliaries.

Vessels of less than 1,500 tons, except torpedo craft. Torpedo craft of less than 50 tons.

Recent battleships and armored cruisers of over 17,000 tons displacement built or proposed by the United States:

Names.	Type.	Tonnage.	Date of order.	Keel laid.	Launched.	Commission.
Delaware	B...	20,000	1907	Nov., 1907	Feb., 1909	Apr., 1910
North Dakota	B...	20,000	1907	Dec., 1907	Nov., 1908	Do.
Florida	B...	21,825	1908	Mar., 1908	May, 1910	Sept., 1911

[1] Trials, 1913.

ARGUMENTS OF THE OPPOSITION.

Those who are opposed to any increase of the Navy contend that it is a useless and wasteful expenditure of the public funds to provide for two battleships in this bill, or to provide for additional increases in construction and armament. This is so, they say, because there is no probability of our Nation becoming involved in war. They point to the increase in the number of advocates, and to the growing sentiments of peace among the civilized nations of the world. They refer to the work of the International Parliamentary Union, and to The Hague Tribunal as great instruments of peace. The increased use and popularizing of arbitration among nations is urged as a reason why a further increase in the American Navy should not be made.

I am aware that stronger, more numerous, and widespread sentiments of international peace exist on the part of both individuals and nations than ever before in human history. All sincere and right-thinking men are delighted to see the rapid advances made in the interest of the peace of nations, and we all hope that the time may come when war will be practically impossible and unknown.

I have no sympathy, however, with certain movements in the interest of peace. The dream of universal peace, near or remote, is a visionary thought and impracticable to realize. I have but contempt for those advocates of peace who allow their ideas of peace to be worked into dreams. Why, we have among us peace advocates who even urge the prevention of the singing by the youth of our country of its battle hymns and patriotic songs; we have dreamers of peace who would prevent the reading of the Declaration of Independence on the Fourth of July, because they fear that some of the stirring language of that glorious declaration may instill thoughts of war in young America. These belong to the class of mollycoddles that our Teddy has so frequently and justly referred to with contempt and ridicule. I have no use whatsoever for such peace societies as the Carnegie Peace Endowment Foundation, whose practical efforts in the direction of promoting peace lie, in a sort of treachery and treason to their own country.

POSSIBILITIES OF WAR.

All history has shown that the majority of wars have come unexpectedly. This has necessarily been so, because wars are the product of the collective passion of the people of a nation.

History shows us that up to less than a century ago, the most civilized nations of the world for centuries spent over one-third of their time in wars. From 1688 until 1815, a period of 127 years, 54 of those years were spent in savagery of 12 different wars between France and England. Other nations during the same time were engaged a good part of the time in warfare. Then we did not have great battleships with the greatest of armor and armament. For thousands of years previous to the building of modern battleships there were no battleships, and yet wars were more frequent then than in these days of battleships, and yet we have peace advocates among us who say that if we did not have any battleships we would not have any war. History shows us that in the centuries when there were no battleships, war was the rule instead of the exception. Wars will be prevented in the proportion that we are prepared to prevent them, and the time is rapidly coming when no nation can afford to go into a war. I believe and hope that the time is near at hand when some inventive genius will succeed in inventing some power, which will make it too dangerous and ruinous for any nation to go to war. But until that time we must prepare in the same proportion that other nations who are our rivals in commerce and power, are preparing.

In common with all right-thinking men, I believe in peace, and believe in the utmost efforts to preserve peace. It affords me pleasure and satisfaction to see the increasing diversified forces in the different civilized nations working in the interest of peace; but the forces of peace, like the forces engaged in all praiseworthy matters, may, and do, make mistakes and movements in the wrong direction at times. Until human nature shall have changed it will be necessary for us at all times to be prepared to meet those who may become our adversaries in war. It is true that man is improving and getting better and more peaceful, yet it is a slow process, and in my belief the time will never come when all dangers of the possibilities of war will be over. Dynamite of passion is planted in every human bosom by nature, and when the fuses of honor and patriotism are lighted, there will always be an uncontrolled explosion in both individuals and nations. You can not eliminate from human beings individually, or from human beings forming a nation, the fuses of honor and patriotism, and you can not avoid the consequences of this natural fact.

POSSIBILITIES OF WAR.

Our much-boasted civilization is and has been making progress, but it is still millions of years from the millennium. It is only skin deep. Until that is reached, brutal war will be the final arbitrator of our international troubles. At no time in the history of the world have the forces of universal peace been as strong as during the last six or seven years, and especially during the present administration. Peace treaties galore have been entered into by our State Department and have lined the vaults of the Senate. No such eloquent, forcible, and brilliant apostles of peace, has the world ever seen as in our present Secretary of State and our President. Their best efforts have been devoted to the preservation and maintenance of peace between our Nation and other nations. Yet where do we find ourselves to-day? We little thought a month ago that our Nation would be to-day with armed forces on the soil of Mexico. It shows that no matter how willing men may be to avoid the savagery, sorrow, and brutality of war, yet events and conditions in the most advanced civilization are much more forcible and controlling than the dreams of peace apostles. The world's history and our history, as well as our present unpleasant experience in Mexico, conclusively demonstrate the necessity of being prepared for war in order to keep at peace with the world.

TRUSTS, COMBINATIONS, AND FRAUDS.

The opponents of a well-prepared and adequate Navy, during the discussion of this bill, have alleged that in the purchase of armor and armament, the Steel Trust and other trusts have imposed upon the Government; and sold it armor and armament and other ship supplies at prices far in excess of those charged foreign nations. It is alleged that much of the domestic armor and armament, and other naval material sold to our Navy has been defective, and a combination is said to exist to extort unreasonable and exorbitant prices from the Government for this Navy material. These opponents hold up their hands in holy horror and denounce all appropriations in this bill which the Government may be forced to use in constructing battleships and purchasing material from American trusts and combinations as criminal waste and public robbery.

No one is more opposed to these trusts and combinations, as well as to other trusts and combinations, than I am. No one views with more indignation and remonstrance than myself the wicked imposition of these trusts and combinations upon the Government, not only in battleship matters, but also in other governmental directions. Whether these charges be true or not, I do not know. They have been repeated so often that it is time they were investigated and relief provided in case they are found to exist. It is strange that if such frauds are practiced upon the Government, that they have not been ascertained; but whether the Government is fleeced by these domestic trusts and combinations in purchasing armor and armament material, the remedy is not by abolishing the Navy or leaving it in a state of unpreparedness. It would be as sensible to advise the abolition of the entire merchant marine because disaster overtakes human life, as in the sinking of the *Titanic*, as to advise a small, unequipped, and unprepared Navy. It would be upon the same principle as advising a man to cut off his nose because at times it offends by detecting stench. It would be just as sensible to advise people to go naked because clothing is adulterated.

When our Democratic Department of Justice gets time and reaches this subject, the country may depend upon it that if there are any trusts and combinations which have been guilty of imposing upon the Government by selling it defective Navy material, or by selling Navy material at a greater price to this country than abroad, that there will be something done to promote justice on the one hand, and to prosecute criminals on the other hand. That department has been extremely busy since this Democratic administration came into power in investigating the

numerous criminal trusts and combinations, which during previous Republican administrations were permitted to grow so numerously and extravagantly in this country. All things, whether just or unjust, can not be done at once. I venture the prophecy, although I am not a prophet nor the son of a prophet, that before the present term of the Wilson administration shall have expired, a legal investigation into these alleged unlawful acts, extortions, and deceptions will have been made, and the guilty ones, if any, duly prosecuted, convicted, and sentenced.

ALLEGED WASTE.

The apostles of peace and the champions of little or no Navy find great satisfaction, however, in pointing out that in 15 or 18 years, as a rule, the most up-to-date battleships and Navy armor and armament will be worn out and become obsolete and out of date, and will be replaced by more modern and improved up-to-date battleships and naval armor and armament. They are forever ringing in our ears the present reduced power, rank, and effectiveness of the battleship *Oregon*. This historic battleship, once the greatest pride of the American Navy, has in 16 years, by reason of use, the elements, and age on the one hand, been reduced in power, rank, and effectiveness, and on the other hand, by reason of improved battleships, has been outranked, until now it is properly placed in the ranks of third-class battleships. Presumably for the same reasons it will soon be reduced to a still lower rank and to a less degree of power, rank, and efficiency. Our opponents say that in about the same length of time the present, and most effective and up-to-date battleships will be reduced in efficiency and class.

This condition of the battleship *Oregon*, and of other battleships, is true not only of such battleships in our own Navy, but of the navies of other civilized nations, and because of this natural decay on the one hand and natural improvement on the other hand, our opponents say that money invested in war vessels at the present time is only a criminal and needless waste, for they say there is nothing to show for these millions so spent in 18 or 20 years. But let these advocates of no Navy, and small Navy men be reminded that Government appropriations made for and used in the construction and maintenance of a Navy are not the only Government appropriations or private moneys that by reason of years of use and elements on the one hand and improvements on the other hand become, in a short time, apparently a needless waste. When we look back at the taxes paid in towns, cities, villages, counties, and States last year they all appear to be a waste. When we look back upon the clothing worn by ourselves in the last and previous years they all appear to be a waste in the sense in which our opponents contend present battleship appropriations are now a waste. The millions which we spend annually for river and harbor improvements appear also to be a needless waste, and in fact a good many millions spent by the Government on the last subject are actually waste all the time, yet these millions keep our harbors and rivers in a state of navigation sufficient to accommodate the commerce of the country and of the world. The millions spent upon the Army for this year, when looked upon in future years to come, will appear to be a waste in the same sense.

It is only by preparing and using the revenues of the Government in just proportions in the different branches, that the Government can be sustained and the Government itself live. All use is in time waste, but it is useful if it accomplishes the purpose for which it is designed and spent. The proudest and most magnificent merchant-marine ships of last year, are superseded and outclassed and reduced in tonnage, class, and rank by the improved leviathans of the present year. Is it a criminal waste for persons and corporations to invest their money in the construction this year of the most improved, efficient, and up-to-date steamships when in all probability next year or the year after steamships of greater tonnage and greater magnitude will probably be constructed and operated? No private concern looks upon these matters as a waste. This is true not only in the direction of building ships but in every other line of industry. How, then, can our opponents consistently say that we should not appropriate money at present for the construction of up-to-date battleships which may be out of date 15 or 18 years from now?

NAVY LEAGUE.

It appears that there is and has been for a long number of years past a society composed of retired and active officers of the United States Navy. They have formed this society for their own welfare. It is composed exclusively of officers and former officers of the Navy, who have in common the same likes and dislikes, aims, purposes, interests, and ambitions. It appears that among the matters that this society manifests an active interest in is the Navy of the United States. They are naturally as such interested in the Navy. It is not a crime that they are. It is not proof of indiscretion that they manifest an interest in their country's Navy. They would be unnatural and ungrateful if they acted otherwise toward our Navy.

At an expense of between $18,000 and $19,000 each of our naval officers who graduate from the Annapolis Naval Academy have been trained and educated by the Government. They have voluntarily entered this branch of the Government service. They do so because it is to their liking and for the reason that it affords an avenue for satisfying their activities and ambition. It is natural that they should form such a society among themselves and take an active interest in the future welfare of the Navy. They would be a most unnatural and ungrateful set of men who, after having been trained and educated at a great expense by the Government, would simply content themselves with their routine duties and the drawing of their salaries. The Nation expects them to not only perform their required duties, but to consider the present and future welfare of our naval service.

It is no more reprehensive for this branch of the service to unite and study, investigate, and publish their views of the necessities and methods of improving this branch of the Government's service, than it is for the teachers of every county, State, and Nation to form teachers' associations and to annually meet and discuss the problems of education and to make known to the country their views of education. Even the rural mail carriers and the employees of nearly every branch of the Government have their State and National organizations to study, consider, and improve not only their own conditions but the service of the Government in which they are engaged. The officers of the United States Navy, who, in their society, study, consider, and make known the necessities and methods of improving the defenses of the United States from a naval standpoint, are deserving of the congratulations of their countrymen, and not to condemnation, such as the no Navy or small Navy men attempt to bestow upon them.

PREPAREDNESS FOR WAR IS AN ASSURANCE OF PEACE.

About a year ago this Nation witnessed a humiliating spectacle. In all our history we can find no such spectacle of humiliation as confronted us at the time of the anti-Japanese land laws in California. Japan had made her protests in vigorous terms. We know what Japan can do in a naval war. We saw our naval forces, such as we had, divided by reason of there being no direct communication between the Atlantic and Pacific Oceans, owing to the canal at Panama not being completed. Fear of war with Japan was manifested by nearly everyone who had observed the trend of affairs. We witnessed the spectacle of that great apostle of peace, the honorable Secretary of State, tiptoeing to California to advise its legislature against the passage of land laws depriving the Japanese residents of that State of the right to own land. The Californians knew what they wanted, and they were right in it; yet the high officials of our own Government realized the dangers of war with Japan and the risks which this country would be running in case of such a war, because of the ineffectiveness of our Navy by reason of inability to concentrate it on the Pacific Ocean so as to be able to meet the forces of Japan. Every intelligent and impartial observer of national affairs realized that we were at the mercy of Japan. Why? Because we did not have a Navy large enough in power and so situated as to be able to overcome the navy of Japan at that time. We all remember the direful consequences of a war with that nation which were pointed out at that time. For myself, I have never witnessed nor have I read in all our history so humiliating a situation as that in which our Government was placed at that time. Such would not have been the case, however, if we had in the past maintained and carried out a naval policy sufficient to meet our responsibilities.

INEFFECTIVENESS OR INSUFFICIENCY OF LAND DEFENSES.

The advocates of a small or no Navy policy are continually calling attention to the strong natural defenses of the Nation. They point to the Atlantic Ocean on the east, separating us by over 3,000 miles from the nearest nation. They point to the Pacific Ocean on the west, separating us by 6,000 miles from Japan; to Canada on the north and Mexico on the south, with little or no navies. They preach eloquently and courageously that we could drive into the sea the armies of the strongest nation on earth which may land upon our shores, even if we had no Navy. That may be true. But at what an enormous and appalling cost and disgraceful and shameful humiliation.

While our foreign merchant marine is insignificant, yet on the other hand we have next to the largest coastwise merchant marine in the world, running in value to billions of dollars. It is true that we have a sufficient Army to protect our shores from invasion and that we can live in this country, at least for a time, without commerce with foreign nations; but while we

are so living and defending ourselves the navy of any first-class foreign power will capture and destroy our entire merchant marine, second in size in the world and valued at billions of dollars. What patriotic American citizen desires to defend and safeguard our Nation in such a humiliating manner? When our merchant marine shall have been swept from the ocean, when our unprepared and small Navy shall have been destroyed, it is then that the citizens of my district in far-off Wisconsin, who even if there may not be more than one in a thousand who ever sees one of our country's battleships, will bear their share of the Nation's disgrace and humiliation. What consolation will it then be to my constituents, or to the constituents of any Member of Congress on the floor of this House, to remember that the country may have saved the greater part of $140,000,000 a year for a score or more of years? In view of such deplorable and humiliating circumstances, the people will gladly and unanimously support a policy of insurance against war, consisting of an adequate Navy, even though it costs $140,000,000 a year.

GOVERNMENT ARMOR PLANT.

The pending bill contains, among other wise provisions, an authorization and direction to the Secretary of the Navy to investigate and report at the next regular session of Congress upon the selection of a suitable site for the erection of an armor plant to enable the United States to manufacture its own armor plate, and special-treatment steel required for use in vessels of the Navy. His report is to contain the cost of a site sufficient to accommodate a plant having an annual output of 20,000 tons, and another site for an annual output of 10,000 tons, together with an itemized statement of the cost of buildings, maintenance and accessories of each, and the annual cost of maintenance of each, and the estimated cost of finished product. This is a long step in the right direction. The Government for the last six or seven years has had, and now has, one or more navy yards properly equipped for the construction by the Government of some of its battleships and other war vessels. The experience of the Government with such navy yards has proven satisfactory from the standpoint of economy, efficiency, convenience, speed, and construction. The Government ought to have sufficient navy yards thus equipped to do the constructing and building of all its vessels.

Complaints have repeatedly been made of the extortions practiced upon the Government in the sale of armor plate by domestic trusts and combinations. Charges have been made that defective plate has been supplied the Government, and further charges have been made that our domestic armor-plate manufacturers are in a trust and combination, by means of which our Government is forced to pay more for armor plate than these same domestic trusts sell the same products to foreign nations for. All of these extortions, frauds, and impositions can be avoided by the construction, maintenance, and operation of a Government-owned armor plant. There is no reason why such a plant can not be operated as economically as one privately owned, and the product manufactured at such a plant will then be certain to be genuine and adapted to the purpose for which it is purchased. The Government should own all the navy yards and manufacturing plants necessary to build all the ships and produce all the material used in the manufacture of armor and armament of naval vessels. Government ownership and operation of such a plant is the true way in which to force the trust octopus to release its death hold on the manufacture of products necessary for building and equipping an adequate navy, free and purged from all extortion, fraud, and deception.

AN EFFICIENT NAVY IS A DEMOCRATIC DOCTRINE.

The Democratic national platform adopted at Baltimore in 1912 contains a warrant and express direction to the representatives of the Democratic Party upon naval matters. It is a clear, concise, and ringing declaration in conformity with the past history and traditions of the Democratic Party. There is no ambiguity or uncompleteness about it. It is direct and positive. It is not a newly created doctrine, but is found in the ancient faith and practice of the party.

All Americans remember with just pride the glorious victories won by our Navy in the Spanish-American War. Those victories cheered patriotic Americans, and will continue to be cherished by all loyal Americans for centuries to come. So long as the Stars and Stripes continue to float, the victories of Manila Bay and Santiago will be held in glorious remembrance by all true Americans. The American fleets that won these great naval battles were not the result of a hasty gathering of ships, but they constituted a Navy, the foundation of which was laid in the administration of President Cleveland by that able, genuine, and honorable Democratic statesman, Hon. William C. Whitney, then Secretary of the Navy. It is due to his genius that a plan for building an American Navy was devised and inaugurated. Without the work in naval matters and upon the naval program done by Whitney, there would have been no American fleet to win those glorious victories in the Spanish War; but, on the contrary, the American forces would have been at the mercy of the Spanish, according to all intelligent authorities upon that subject. In his great work of building an American Navy, Secretary Whitney had the active and loyal support of the Cleveland Democratic administration. Our party has just reason to feel proud of its share in the planning and building up of the American Navy, and the only regrets that are due from the Democratic Party on the subject of the American Navy, is its refusal to authorize the construction of two battleships in each of the years of 1912 and 1913. With such a patriotic history to its credit and in mind, at the time of the Baltimore convention, our party in that convention could not and did not forget its duty to the American Navy.

DEMOCRATIC PLATFORM, 1912—AN EFFICIENT NAVY.

We approve the measure reported by the Democratic leaders in the House of Representatives for the creation of a council of national defense, which will determine a definite naval program with a view to increased efficiency and economy. The party that proclaimed and has always enforced the Monroe doctrine and was sponsor for the new Navy will continue faithfully to observe the constitutional requirements to provide and maintain an adequate and well-proportioned Navy sufficient to defend American policies, protect our citizens, and uphold the honor and dignity of the Nation.

The present Democratic Secretary of the Navy and the President are to be congratulated by all Americans, and especially by Democrats, in faithfully adhering not only to the spirit but the letter of the Democratic platform upon the question of an efficient Navy. This bill, the first one presented under this Democratic administration, is clear notice to the people of America, that we have a Democratic administration that believes in providing for a Navy sufficient to defend American policies, protect our citizens, and uphold the honor and dignity of the Nation.

Mr. MANN. Mr. Chairman, I think the statement made by the gentleman from Texas [Mr. GREGG] deserves some consideration. This paragraph has been in the bill for a number of years. It does not amount to as much as the difference between tweedledum and tweedledee. Some bright genius suggested it some years ago, and some bright genius, perhaps, added to the provision that it should not apply to any existing contracts. What does it apply to? It has been in the law for years. What has it ever accomplished; what has it ever done? If anybody on the Naval Affairs Committee can find out or give us the information, I will yield for that purpose.

Now, the gentleman from Texas says that he wants to restrict the right of the Secretary of the Navy to purchase this armor. The Secretary of the Navy now has the authority to reject any bids for armor. He now has authority to refuse to buy armor.

I am very largely with the gentlemen who are sometimes called the "little Navy" men, and I do not take any exception to it, but I am unwilling to endeavor to strangle the Navy indirectly. The Secretary of the Navy now can reject a bid for armor or armament which he thinks is too high. But if you endeavor to fix it so that he can not buy armor at all, what is the use of making any provision for an armored vessel? It is an indirect effort to accomplish what my friend from Texas would prefer to accomplish directly—make no appropriation at all for the construction of armored vessels.

Mr. GREGG. Will the gentleman yield?

Mr. MANN. For a question.

Mr. GREGG. If the gentleman's proposition is true as to armor and armament, why is it not true as to structural steel, ship plates, and machinery?

Mr. MANN. It is true, the whole thing was put in as pure buncombe. It was buncombe in the beginning, and it remains in the bill as buncombe. It does not amount to a row of pins.

Now, the gentleman from Texas is on the Committee on Naval Affairs, and I will ask him if during all this time that it has been in the law it has effected any purpose?

Mr. GREGG. I am not a member of the Committee on Naval Affairs, I will say to the gentleman.

Mr. MANN. The gentleman used to be, and he was a member when this was put in the bill.

Mr. GREGG. I assume that the officers of the Government have acted honestly, and it has had some effect.

Mr. MANN. What does it apply to?

Mr. GREGG. It applies to what it specifies.

Mr. MANN. These appropriations in the main are for vessels already authorized for which contracts have already been let. You make an appropriation for it and say it shall not apply to contracts in existence. Bring in a provision some time as a matter of legislation and say that it shall not apply to any contracts to be made, and it will amount to something. [Applause.]

The Clerk completed the reading of the bill.

Mr. PADGETT. Mr. Chairman, I move that the committee rise and report the bill with amendments to the House, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

Mr. FOWLER. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD on this subject.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. PADGETT. Mr. Chairman, on yesterday afternoon the gentleman from Wisconsin [Mr. STAFFORD] asked about the cost of the Arlington high-power radio station. I have a letter here which I want to put in the RECORD in regard to it.

Mr. MANN. How much did it cost?

Mr. PADGETT. Two hundred and sixty-seven thousand two hundred and four dollars.

The CHAIRMAN. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

The letter is as follows:

NAVY DEPARTMENT,
BUREAU OF STEAM ENGINEERING,
Washington, D. C., May 7, 1914.

Hon. LEMUEL P. PADGETT, M. C.,
Chairman Committee on Naval Affairs,
United States House of Representatives.

MY DEAR MR. PADGETT: The following is the cost of Arlington station:

Towers	$114,007
Buildings	72,883
Equipment	73,514
Ground wiring	2,300
Roads, grading, water and sanitary system	4,500
Total	267,204

I think I explained to you about six months ago that we don't contemplate building one of these high-power stations in Samoa, and that we couldn't build six stations for a million dollars; nor do I think that we could build five; but we are going to come pretty close to it if our hope is realized, which is that we may get long-distance communication between Honolulu and Manila and thus render unnecessary one of these expensive high-power stations for Guam.

Trusting that this covers the information you wish,

I am, very truly, yours,

R. S. GRIFFIN,
Engineer in Chief, United States Navy.

The motion of Mr. PADGETT was agreed to.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. JOHNSON of Kentucky, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 14034) making appropriations for the naval service for the fiscal year ending June 30, 1915, and for other purposes, and had directed him to report the same back with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

Mr. PADGETT. Mr. Speaker, I demand the previous question on the bill and amendments to final passage.

The previous question was ordered.

The SPEAKER. Is a separate vote demanded on any amendment? If not, the Chair will put them in gross.

There was no demand for a separate vote, and the amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

Mr. WITHERSPOON. Mr. Speaker, I move to recommit the bill with instructions.

The SPEAKER. The Clerk will report the motion.

The Clerk read as follows:

Mr. WITHERSPOON moves to recommit the bill H. R. 14034, the naval appropriation bill, to the Committee on Naval Affairs, with the following instructions: To amend the bill as follows: In line 8, page 53, strike out the word "two" and insert the word "one"; strike out in the same line the word "battleships" and insert "battleship"; in line 10, same page, strike out "their" and insert "its"; line 12, same page, strike out the word "each"; and to report the same back to the House forthwith.

Mr. PADGETT. Mr. Speaker, I move the previous question on the motion to recommit.

Mr. MANN. Will the gentleman yield?

Mr. PADGETT. Yes.

Mr. MANN. Assuming that this motion might prevail, there are some other amendments that might go in, but I suppose that could be done afterwards. I refer to amendments of some language inserted to-day.

Mr. PADGETT. If this motion prevails, we can take care of that later.

The SPEAKER. The gentleman from Tennessee moves the previous question on the motion to recommit.

The question was taken, and the previous question was ordered.

The SPEAKER. The question now is on the motion to recommit.

Mr. WITHERSPOON. And on that, Mr. Speaker, I ask for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 106, nays 202, answered "present" 13, not voting 112, as follows:

YEAS—106.

So the motion to recommit was rejected.

The Clerk announced the following pairs:

For the session:

Mr. HOBSON with Mr. FAIRCHILD.

Mr. METZ with Mr. WALLIN.

Until further notice:

Mr. BROWN of West Virginia with Mr. WOODS.

Mr. ASHBROOK with Mr. ANTHONY.

Mr. BALTZ with Mr. BARCHFELD.

Mr. BARNHART with Mr. BARTHOLDT.

Mr. BATHRICK with Mr. DUNN.

Mr. BRODBECK with Mr. DYER.

Mr. BROWN of New York with Mr. HAYES.

Mr. CARLIN with Mr. HELGESEN.

Mr. CLARK of Florida with Mr. HULINGS.

Mr. CONNOLLY of Iowa with Mr. KIESS of Pennsylvania.

Mr. COVINGTON with Mr. KREIDER.

Mr. DRISCOLL with Mr. LAFFERTY.

Mr. EVANS with Mr. LANGHAM.

Mr. FIELDS with Mr. LEWIS of Pennsylvania.

Mr. GODWIN of North Carolina with Mr. LINDQUIST.

Mr. GOEKE with Mr. MCGUIRE of Oklahoma.

Mr. HARDWICK with Mr. MCLAUGHLIN.

Mr. HAY with Mr. MARTIN.

Mr. HOWARD with Mr. MERRITT.

Mr. MOON with Mr. MILLER.

Mr. LEVY with Mr. MOTT.

Mr. O'HAIR with Mr. MORIN.

Mr. PALMER with Mr. PATTON of Pennsylvania.

Mr. ROTHERMEL with Mr. MOSS of West Virginia.

Mr. SHACKLEFORD with Mr. NELSON.

Mr. SHERLEY with Mr. TREADWAY.

Mr. SMALL with Mr. PORTER.

Mr. SPARKMAN with Mr. PROUTY.

Mr. STEPHENS of Mississippi with Mr. TEMPLE.

Mr. TAYLOR of Colorado with Mr. VOLSTEAD.

Mr. WALKER with Mr. YOUNG of North Dakota.

Mr. GLASS with Mr. SLEMP.

Mr. TAYLOR of Alabama with Mr. HUGHES of West Virginia.

Mr. GUDGER with Mr. GUERNSEY.

Mr. SLAYDEN with Mr. BURKE of Pennsylvania.

On the vote:

Mr. GOODWIN of Arkansas (for one battleship) with Mr. REILLY of Connecticut (for two battleships).

Mr. HUGHES of Georgia (for one battleship) with Mr. LINTHICUM (for two battleships).

Mr. KEATING (for one battleship) with Mr. DERSHEM (for two battleships).

Mr. COX (for one battleship) with Mr. CALDER (for two battleships).

Mr. HUMPHREYS of Mississippi (for two battleships) with Mr. SISSON (against).

Mr. WILLIAMS (for two battleships) with Mr. DOUGHTON (for one battleship).

Mr. GORDON (for one battleship) with Mr. WILSON of Florida (for two battleships).

Mr. GARNER (for one battleship) with Mr. GARDNER (for two battleships).

Mr. BARTLETT (for one battleship) with Mr. BUTLER (for two battleships).

Mr. CARTER (for two battleships) with Mr. ELDER (for one battleship).

Mr. MOORE (for two battleships) with Mr. JACOWAY (against).

Mr. ANSBERRY (for two battleships) with Mr. HARRISON (against).

Mr. CAREW (for two battleships) with Mr. SMITH of Texas (against).

Mr. LEE of Pennsylvania (for two battleships) with Mr. SUMNERS (for one battleship).

Mr. BARTLETT. Mr. Speaker, did the gentleman from Pennsylvania, Mr. BUTLER, vote?

The SPEAKER. He did not.

Mr. BARTLETT. Mr. Speaker, I desire to withdraw my vote of "yea" and answer "present." I am paired with the gentleman.

The name of Mr. BARTLETT was called, and he answered "Present."

Mr. SISSON. Mr. Speaker, did the gentleman from Mississippi, Mr. HUMPHREYS, vote?

The SPEAKER. He did not.

Mr. SISSON. Mr. Speaker, I desire to withdraw my vote of "yea" and answer "present."

The name of Mr. SISSON was called, and he answered "Present."

Mr. COX. Mr. Speaker, did the gentleman from New York, Mr. CALDER, vote?

The SPEAKER. He did not.

Mr. COX. Mr. Speaker, I voted "yea." I have a pair with the gentleman, and I desire to withdraw that vote and answer "present."

The name of Mr. Cox was called, and he answered "Present."

Mr. BRYAN. Mr. Speaker, I desire to vote "no."

The SPEAKER. Was the gentleman in the Hall listening for his name to be called?

Mr. BRYAN. Mr. Speaker, I had stepped out of the Hall and was just coming in the door when my name was called.

The SPEAKER. The gentleman does not bring himself within the rule. He must be across the line.

Mr. WILSON of Florida. Mr. Speaker, did the gentleman from Ohio, Mr. GORDON, vote?

The SPEAKER. He did not.

Mr. WILSON of Florida. Mr. Speaker, I voted "nay." I desire to withdraw that vote and answer "present," as I am paired with the gentleman from Ohio.

The name of Mr. WILSON of Florida was called, and he answered "Present."

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the passage of the bill.

The question was taken, and the bill was passed.

On motion by Mr. PADGETT, a motion to reconsider the vote by which the bill was passed was laid on the table.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Tulley, one of its clerks, announced that the Senate had passed bills of the following titles, in which the concurrence of the House of Representatives was requested:

S. 3886. An act to repeal sections 2588, 2589, and 2590 of the Revised Statutes of the United States; and

S. 5291. An act to authorize Edmund Richardson, or the parishes of East Carroll and West Carroll, La., or both, to construct a bridge across Macon Bayou, at or near Epps Ferry, La.

The message also announced that the Senate had passed without amendment bill of the following title:

H. R. 12291. An act to increase the limit of cost for the extension, remodeling, and improvement of Pensacola (Fla.) post office and courthouse, and for other purposes.

The message also announced that the President had approved and signed bills of the following titles:

On May 2, 1914:

S. 656. An act granting to the trustees of the diocese of Montana of the Protestant Episcopal Church, for the benefit of "Christ Church On-the-Hill," at Poplar, Mont., lots 5, 6, and 7, in block 30, town site of Poplar, State of Montana; and

S. 3403. An act to abolish the office of receiver of public moneys at Springfield, Mo., and for other purposes.

ENROLLED BILL SIGNED.

The Speaker announced his signature to enrolled bills of the following titles:

S. 540. An act for the relief of Joseph Hodges;

S. 1922. An act for the relief of Margaret McQuade;

S. 1808. An act for the relief of Joseph L. Donovan; and

S. 3997. An act to waive for one year the age limit for the appointment as assistant paymaster in the United States Navy in the case of Landsman for Electrician Richard C. Reed, United States Navy.

SENATE BILL REFERRED.

Under clause 2 of Rule XXIV, Senate bill of the following title was taken from the Speaker's table and referred to its appropriate committee as indicated below:

S. 5291. An act to authorize Edmund Richardson, or the parishes of East Carroll and West Carroll, La., or both, to con-

struct a bridge across Macon Bayou, at or near Epps Ferry, La.; to the Committe on Interstate and Foreign Commerce.

ENROLLED BILL PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. ASHBROOK, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States, for his approval, the following bill:

H. R. 5998. An act authorizing the city of Montrose, Colo., to purchase certain public lands for public-park purposes.

PENSION APPROPRIATION BILL.

Mr. BARTLETT. Mr. Speaker, I call up the bill H. R. 15280, the pension appropriation bill, and ask for its immediate consideration.

Mr. MANN. Mr. Speaker, what will the Clerk report it for?

The SPEAKER. The Chair did not understand the gentleman from Illinois.

Mr. MANN. There is nothing for the Clerk to report. If the gentleman wishes to go into the Committee of the Whole House on the state of the Union, that is one thing.

Mr. BARTLETT. I will make that motion, and then I will move that the committee immediately rise.

The SPEAKER. The bill ought to be reported by title.

Mr. MANN. No; the gentleman can not call up the bill; all he can do is to make a motion.

Mr. BARTLETT. Then, Mr. Speaker, I move to go into the Committee of the Whole House on the state of the Union for the purpose of considering the bill H. R. 15280, known as the pension appropriation bill.

The SPEAKER. Before the Chair puts the question he wishes to announce that when this bill is out of the way the Chair will recognize the Rules Committee to call up the bill about the election of United States Senators, and after that is out of the way the Chair will recognize the gentleman from Virginia [Mr. FLOOD] to call up the diplomatic and consular appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the purpose of considering the bill H. R. 15280, the pension appropriation bill, with Mr. MURRAY of Oklahoma in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the purpose of considering the bill H. R. 15280, the pension appropriation bill, which the Clerk will report by title.

The Clerk read as follows:

A bill (H. R. 15280) making appropriations for the payment of invalid and other pensions of the United States for the fiscal year ending June 30, 1915, and for other purposes.

Mr. BARTLETT. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. The gentleman from Georgia asks unanimous consent that the first reading of the bill be dispensed with. Is there objection? [After a pause.] The Chair hears none.

Mr. BARTLETT. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. MURRAY of Oklahoma, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 15280, the pension appropriation bill, and had come to no resolution thereon.

ADJOURNMENT.

Mr. BARTLETT. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 26 minutes p. m.) the House adjourned to meet to-morrow, Friday, May 8, 1914, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, dated May 6, copies of reports from Col. W. C. Langfitt, Corps of Engineers, dated July 7 and December 30, 1913, with maps of preliminary examination and survey of Ware River, Va. (H. Doc. No. 969); to the Committee on Rivers and Harbors and ordered to be printed with illustrations.

2. A letter from the Acting Secretary of the Treasury, transmitting additional estimates relative to public-buildings service in connection with projects for which there are not now sufficient funds on hand to carry on the work, etc. (H. Doc. No. 968); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. GOLDFOGLE, from the Committee on Elections No. 3, to which was referred House resolution 504, relating to the contested-election case of Michael J. Gill against L. C. Dyer, from the twelfth congressional district of the State of Missouri, submitted a report thereon (No. 629), which said report was referred to the House Calendar.

Mr. QUIN, from the Committee on Military Affairs, to which was referred the concurrent resolution (H. Con. Res. 34) authorizing the Secretary of War to return to the State of Louisiana the original ordinance of secession adopted by said State, reported the same without amendment, accompanied by a report (No. 634), which said concurrent resolution and report were referred to the House Calendar.

Mr. SUMNERS, from the Committee on Public Buildings and Grounds, to which was referred the bill (H. R. 13815) to increase the limit of cost for the construction of a public building at Marlin, Tex., reported the same with an amendment, accompanied by a report (No. 636), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. ADAMSON, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 16133) to amend section 20 of an act to regulate commerce, reported the same with an amendment, accompanied by a report (No. 637), which said bill and report were referred to the House Calendar.

Mr. HAMILTON of Michigan, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 1818) to regulate the interstate transportation of immature calves, reported the same without amendment, accompanied by a report (No. 638), which said bill and report were referred to the House Calendar.

Mr. TAYLOR of Colorado, from the Committee on Mines and Mining, to which was referred the bill (H. R. 15288) to provide for a commission to codify and suggest amendments to the general mining laws, reported the same with amendment, accompanied by a report (No. 639), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. SMITH of Maryland, from the Committee on Pensions, to which was referred the bill (H. R. 16345) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors, reported the same without amendment, accompanied by a report (No. 628), which said bill and report were referred to the Private Calendar.

Mr. McKELLAR, from the Committee on Military Affairs, to which was referred the bill (H. R. 10271) to remove the charge of desertion from the record of Edward Whiteside, reported the same with amendment, accompanied by a report (No. 630), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (H. R. 816) to correct the military record of Abraham Hoover, reported the same with amendment, accompanied by a report (No. 631), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (H. R. 5474) to correct the military record of Patrick McGee, alias Patrick Gallagher, reported the same with amendment, accompanied by a report (No. 632), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (H. R. 9615) correcting the military record of Benjamin F. Richardson, reported the same with amendment, accompanied by a report (No. 633), which said bill and report were referred to the Private Calendar.

Mr. POU, from the Committee on Claims, to which was referred the bill (S. 4053) for the relief of the Atlantic Coast Line Railroad Co., reported the same with amendment, accom-

panied by a report (No. 635), which said bill and report were referred to the Private Calendar.

Mr. KEY of Ohio, from the Committee on Pensions, to which was referred the bill (S. 4657) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and of wars other than the Civil War, and to certain widows and dependent relatives of such soldiers and sailors, reported the same with amendment, accompanied by a report (No. 640), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (S. 4260) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and of wars other than the Civil War, and to certain widows and dependent relatives of such soldiers and sailors, reported the same with amendment, accompanied by a report (No. 641), which said bill and report were referred to the Private Calendar.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 9127) granting a pension to John H. Caldwell; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 14016) granting a pension to Ebb Workman; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. ALEXANDER: A bill (H. R. 16346) to amend section 4131 of the Revised Statutes of the United States of America as amended by the act of Congress approved May 28, 1896, relating to the renewal of licenses; to the Committee on the Merchant Marine and Fisheries.

By Mr. KETTNER: A bill (H. R. 16347) authorizing the preliminary survey of the Mojave River watershed, and for other purposes; to the Committee on Rivers and Harbors.

By Mr. CLAYTON: A bill (H. R. 16348) to establish a fish-cultural station in the State of Alabama; to the Committee on the Merchant Marine and Fisheries.

By Mr. BROUSSARD: A bill (H. R. 16349) to recognize the value of certain ingredients in baking powder, establishing standards therein, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. WATKINS: A bill (H. R. 16350) to authorize the construction of a bridge across the Sabine River in the States of Louisiana and Texas, about 2 miles west of Hunter, La.; to the Committee on Interstate and Foreign Commerce.

By Mr. ADAMSON: Resolution (H. Res. 505) to make privileged H. R. 16133; to the Committee on Rules.

By Mr. CARY: Resolution (H. Res. 506) authorizing and directing the Speaker of the House of Representatives to appoint a committee to investigate certain matters; to the Committee on Rules.

By Mr. HAY: Joint resolution (H. J. Res. 262) authorizing the President to detail Lieut. Frederick Mears to service in connection with the proposed Alaskan Railroad; to the Committee on Military Affairs.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. SMITH of Maryland: A bill (H. R. 16345) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors; to the Committee of the Whole House.

By Mr. ANDERSON: A bill (H. R. 16351) granting a pension to Louisa M. Sabin; to the Committee on Invalid Pensions.

By Mr. ANSBERRY: A bill (H. R. 16352) granting a pension to Frank Clark; to the Committee on Pensions.

By Mr. AUSTIN: A bill (H. R. 16353) granting a pension to John G. Burns; to the Committee on Pensions.

By Mr. BROWN of West Virginia: A bill (H. R. 16354) granting an increase of pension to Allen J. Freeland; to the Committee on Invalid Pensions.

By Mr. CONRY: A bill (H. R. 16355) granting a pension to Mary Carroll; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16356) granting an increase of pension to Catharine Doty; to the Committee on Invalid Pensions.

By Mr. EDMONDS: A bill (H. R. 16357) granting a pension to Mary C. Gulliford; to the Committee on Pensions.

By Mr. FESS: A bill (H. R. 16358) for the relief of Abraham Kauffmann; to the Committee on Military Affairs.

By Mr. FIELDS: A bill (H. R. 16359) granting an increase of pension to James McCue; to the Committee on Invalid Pensions.

By Mr. GOULDEN: A bill (H. R. 16360) granting an increase of pension to George D. Brooks; to the Committee on Invalid Pensions.

By Mr. HAMILTON of Michigan: A bill (H. R. 16361) granting an increase of pension to Lewis S. Goshorn; to the Committee on Invalid Pensions.

By Mr. HAYES: A bill (H. R. 16362) for the relief of Owen F. Barnes; to the Committee on Military Affairs.

Also, a bill (H. R. 16363) granting an increase of pension to George A. Kogle; to the Committee on Invalid Pensions.

By Mr. IGOE: A bill (H. R. 16364) for the relief of Reuben W. Pavey; to the Committee on War Claims.

By Mr. KENNEDY of Connecticut: A bill (H. R. 16365) granting a pension to Joseph Monaghan; to the Committee on Invalid Pensions.

By Mr. KEY of Ohio: A bill (H. R. 16366) granting a pension to Florence Woodward; to the Committee on Invalid Pensions.

By Mr. J. R. KNOWLAND: A bill (H. R. 16367) granting a pension to Carl Henry Epple; to the Committee on Pensions.

By Mr. LONERGAN: A bill (H. R. 16368) granting an increase of pension to Anna E. Corbin; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16369) to remove the charge of desertion against John Starkey; to the Committee on Military Affairs.

By Mr. MONTAGUE: A bill (H. R. 16370) for the relief of the Richmond, Fredericksburg & Potomac and Richmond & Petersburg Railroad Connection Co.; to the Committee on Claims.

By Mr. MOSS of West Virginia: A bill (H. R. 16371) granting an increase of pension to John W. Bush; to the Committee on Invalid Pensions.

By Mr. NEELY of West Virginia: A bill (H. R. 16372) granting an increase of pension to Benjamin F. Sutton; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16373) granting an increase of pension to Isaac W. Johnston; to the Committee on Invalid Pensions.

By Mr. O'HAIR: A bill (H. R. 16374) granting an increase of pension to Elizabeth F. Hannah; to the Committee on Invalid Pensions.

By Mr. PATTEN of New York: A bill (H. R. 16375) to correct the military record of Chester H. Southworth; to the Committee on Military Affairs.

By Mr. PLATT: A bill (H. R. 16376) granting an increase of pension to Catherine Terwilliger; to the Committee on Invalid Pensions.

By Mr. RAYBURN: A bill (H. R. 16377) for the relief of the heirs of Robert H. Burney and C. J. Fuller, deceased; to the Committee on Claims.

By Mr. SELLS: A bill (H. R. 16378) granting a pension to Alvin Rainbolt; to the Committee on Pensions.

Also, a bill (H. R. 16379) granting an increase of pension to William Trent; to the Committee on Invalid Pensions.

By Mr. J. M. C. SMITH: A bill (H. R. 16380) granting a pension to George Zederbaum; to the Committee on Pensions.

By Mr. SAMUEL W. SMITH: A bill (H. R. 16381) granting an increase of pension to G. W. Darling; to the Committee on Invalid Pensions.

By Mr. STEVENS of Minnesota: A bill (H. R. 16382) granting an increase of pension to Gilbert R. Whitbeck; to the Committee on Invalid Pensions.

By Mr. STONE: A bill (H. R. 16383) granting a pension to William S. Montgomery; to the Committee on Pensions.

By Mr. TAGGART: A bill (H. R. 16384) granting an increase of pension to Samuel Fox; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16385) for the relief of Malinda Johnson; to the Committee on War Claims.

By Mr. VAUGHAN: A bill (H. R. 16386) granting an increase of pension to Martha A. Hardin; to the Committee on Invalid Pensions.

Also, petition of various voters of the eighth congressional district of New Jersey, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. J. R. KNOWLAND: Petition signed by numerous residents of Oakland, Cal., favoring the passage of certain resolutions now pending in Congress providing for the prohibition of the sale, importation for sale, and manufacture for sale of intoxicating liquors for beverage purposes in the United States; to the Committee on the Judiciary.

Also, petition signed by numerous residents of Oakland, Cal., favoring the passage of a constitutional amendment prohibiting the manufacture and sale of alcoholic liquors for beverage purposes; to the Committee on the Judiciary.

Also, resolutions passed by the Alameda County (Cal.) Central Labor Union, requesting the President to withdraw the State troops from the coal mines in Colorado; to the Committee on Mines and Mining.

By Mr. LANGHAM: Petition of various voters and the Lutheran Church of Indiana and sundry citizens of Apollo, Pa., favoring national prohibition; to the Committee on the Judiciary.

Also, memorial of the Erie (Pa.) Foundrymen's Association, favoring more time to consider bills to regulate interstate business; to the Committee on the Judiciary.

By Mr. LONERGAN: Petition of Union Grange, No. 25, Patrons of Husbandry, of Southington, Conn., favoring national prohibition; to the Committee on the Judiciary.

By Mr. McCLELLAN: Protests of James R. Hughes, James Purcell, P. J. Cunningham, John Rutz, Fred Barford, James Hogan, F. S. Becker, and Charles P. Drumm, all of Columbia County, N. Y., against national prohibition; to the Committee on the Judiciary.

Also, protests of P. A. Canfield, president Rondout National Bank, of Rondout; John G. Van Etten, of Kingston; W. M. Schwenker, of Woodstock; Sam Bernstein, president Chamber of Commerce, of Kingston, all in Ulster County, N. Y., against national prohibition; to the Committee on the Judiciary.

Also, petition of A. D. Pardu, of Kingston, N. Y., protesting against national prohibition; to the Committee on the Judiciary.

By Mr. MAGUIRE of Nebraska: Petition of the Men's Bible Class of the Bethany Bible School, of Lincoln, Nebr., favoring national prohibition; to the Committee on the Judiciary.

By Mr. MURRAY of Oklahoma: Petition of sundry citizens of Muskogee, Okla., and the Methodist University of Guthrie, Okla., favoring national prohibition; to the Committee on the Judiciary.

By Mr. NEELY of West Virginia: Petitions of Philip Moore and 124 others, of Shinnston, W. Va., favoring national prohibition; to the Committee on the Judiciary.

By Mr. O'LEARY: Petitions of sundry citizens of the second congressional district of New York, against national prohibition; to the Committee on the Judiciary.

By Mr. O'SHAUNESSY: Petition of the Old Colony Advertising Co., of Providence, R. I., against national prohibition; to the Committee on the Judiciary.

Also, petition of the League of Improvement Societies in Rhode Island, relative to half-and-half plan for the District of Columbia; to the Committee on the District of Columbia.

Also, petition of the Second Baptist Church of East Providence, R. I., favoring national prohibition; to the Committee on the Judiciary.

By Mr. PALMER: Resolution of the Erie Foundrymen's Association, of Erie, Pa., protesting against passage of measures intended to regulate the conduct of interstate business, etc.; to the Committee on Interstate and Foreign Commerce.

Also, petition of the Board of Trade of Chester, Pa., against Government ownership of public utilities; to the Committee on the Judiciary.

Also, petition of the churches of Delaware Water Gap, Pa., favoring national prohibition; to the Committee on the Judiciary.

By Mr. PETERS of Maine: Petitions of sundry citizens of the third congressional district of Maine, against national prohibition; to the Committee on the Judiciary.

Also, petition of sundry citizens of the third congressional district of Maine, favoring national prohibition; to the Committee on the Judiciary.

By Mr. PLATT: Petition of sundry citizens of Blue Bush, Clinton Corners, Bangall, Stamfordville, and the Woman's Christian Temperance Union and sundry citizens of Circleville, all in the State of New York, favoring national prohibition; to the Committee on the Judiciary.

Also, petition of Journeymen Barbers' Union, No. 332, Poughkeepsie, N. Y., protesting against national prohibition; to the Committee on the Judiciary.

By Mr. POU: Petition of 26 citizens of North Carolina, favoring national prohibition; to the Committee on the Judiciary.

By Mr. RAINEY: Petition of the Lick Creek General Baptist Church and 24 citizens of Lick Creek, Ill., favoring national prohibition; to the Committee on the Judiciary.

Also, petition of the Christian Endeavor Union of Jacksonville, Ill., favoring national prohibition; to the Committee on the Judiciary.

By Mr. REILLY of Connecticut: Petition of sundry citizens and the Woman's Christian Temperance Union of Meriden, Conn., favoring national prohibition; to the Committee on the Judiciary.

By Mr. ROGERS: Petitions of sundry citizens of Massachusetts, against national prohibition; to the Committee on the Judiciary.

By Mr. RUPLEY: Memorial of the Merchants' Association of New York, protesting against bills to regulate interstate business; to the Committee on the Judiciary.

Also, petition of the United Societies for Local Self-Government of Chicago, Ill., protesting against national prohibition; to the Committee on the Judiciary.

Also, petition of sundry citizens of Carlisle, Pa., protesting against passage of the Sunday observance bill; to the Committee on the District of Columbia.

Also, petition of the Erie (Pa.) Foundrymen's Association, relative to extending time for considering bills to regulate interstate business; to the Committee on the Judiciary.

Also, petition of sundry citizens of Carlisle, Pa., favoring passage of House bill 12928, retaining section 6, relative to Sunday work in post offices; to the Committee on the Post Office and Post Roads.

Also, petition of Washington Camp, No. 58, Patriotic Order Sons of America, of Johnstown, Pa., protesting against any change in the American flag; to the Committee on the Judiciary.

By Mr. SELDOMRIDGE: Petition of Kiowa County Grange, No. 206, Patrons of Husbandry, favoring passage of the Bathrick farm credit bill (H. R. 11897); to the Committee on Banking and Currency.

Also, petition of sundry citizens of La Junta, Colo., protesting against passage of the Sunday-observance bill; to the Committee on the Judiciary.

By Mr. SELLS: Petition of the Grand Army of the Republic Post of Greenville, Tenn., protesting against any change in the American flag; to the Committee on the Judiciary.

By Mr. SLOAN: Petition of the Spanish War Veterans of Beatrice, Nebr., favoring monthly payment of pensions; to the Committee on Pensions.

Also, petition of the Civil War Veterans of Beatrice, Nebr., favoring monthly payment of pensions; to the Committee on Invalid Pensions.

By Mr. SMITH of Maryland: Petitions of sundry citizens of Savage, Langham, Springfield, Bowie, Annapolis, Baltimore, Eastport, and Howard County, Md., favoring national prohibition; to the Committee on the Judiciary.

By Mr. STEPHENS of Nebraska: Petitions of 100 citizens of Wayne, 1,100 citizens of Fremont, and 400 citizens of Central City, Nebr., favoring national prohibition; to the Committee on the Judiciary.

By Mr. STEVENS of New Hampshire: Petitions and protests of Fred S. Crawford and sundry citizens of Woodsville, Manchester, and Benton; N. M. Nutte and sundry citizens of Woodsville, Bath, and Lancaster; 47 citizens of Keene; 107 citizens of Concord; Berlin Central Labor Union; 38 citizens of Hillsboro; 464 citizens of Nashua; 49 citizens of Franklin, all in the State of New Hampshire, against national prohibition; to the Committee on the Judiciary.

Also, petitions of the Congregational Church of North Weare; the St. James Protestant Episcopal Church, the Unitarian Congregational, the First Baptist, the Grace Methodist Episcopal, the First Congregational, and the Court Street Congregational Churches of Keene; and Congregational Church of Acworth, all in the State of New Hampshire, favoring national prohibition; to the Committee on the Judiciary.

By Mr. TUTTLE: Petitions of sundry citizens of Cranford and Chatham, N. J., favoring national prohibition; to the Committee on the Judiciary.

Also, memorial of the Essex County Bankers' Association, of New Jersey, relative to bill No. 15657; to the Committee on Banking and Currency.

Also, petition of sundry citizens of Plainfield, N. J., favoring national prohibition; to the Committee on the Judiciary.

Also, petition of various voters of the fifth congressional district of New Jersey, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. UNDERHILL: Petitions of sundry citizens of Elmira and Elmira Heights; the Horseheads Methodist Protestant Church, of Arkport; sundry citizens of Ithaca; 1,421 citizens of Hornell; and 150 citizens of Wayne Village, all in the State of New York, favoring national prohibition; to the Committee on the Judiciary.

Also, petition of sundry citizens of Massachusetts, approving stand taken by the President relative to Mexican situation; to the Committee on Foreign Affairs.

Also, petition of 50 voters of the thirty-seventh New York congressional district, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. WALLIN: Petitions of various residents of Amsterdam, N. Y., against national prohibition; to the Committee on the Judiciary.

Also, petition of various members of the Schenectady (N. Y.) Typographical Union, favoring the enactment of Senate bill 927, making lawful certain agreements, limiting injunctions, etc.; to the Committee on the Judiciary.

Also, petition of sundry citizens of Amsterdam, N. Y., favoring national prohibition; to the Committee on the Judiciary.

By Mr. WILLIS: Petition of John Buehrle, of Bellefontaine, Ohio, protesting against the adoption of House joint resolution No. 168, relating to national prohibition; to the Committee on the Judiciary.

SENATE.

FRIDAY, *May 8, 1914.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, we come to Thee in prayer that we may faithfully and well discharge the duties of this day. May we be enabled to establish and make permanent that which is true, change that which is false, and bring all facts and all ideals to the measurement of Thine own divine will as revealed to us in Thy Word. May we get Thy point of view, and as stewards of God discharge the duties which are upon us. Above all things, may we have the charm and blessing not only of fellow citizenship but of brothers in a common cause, working in the interests of humanity for the glory of God's Name. We ask for Christ's sake. Amen.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. GALLINGER and by unanimous consent, the further reading was dispensed with, and the Journal was approved.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed a joint resolution (H. J. Res. 263) designating the second Sunday in May as Mothers' Day, in which it requested the concurrence of the Senate.

The message also announced that the House had passed a bill (H. R. 14034) making appropriations for the naval service for the fiscal year ending June 30, 1915, and for other purposes, in which it requested the concurrence of the Senate.

ENROLLED BILL AND JOINT RESOLUTIONS SIGNED.

The message further announced that the Speaker of the House had signed the following enrolled bill and joint resolutions, and they were thereupon signed by the Vice President:

S. 5445. An act for the relief of Gordon W. Nelson;

S. J. Res. 97. Joint resolution authorizing the President to extend invitations to foreign governments to participate in the International Congress of Americanists; and

S. J. Res. 142. Joint resolution authorizing the Vocational Education Commission to employ such stenographic and clerical assistants as may be necessary, etc.

PETITIONS AND MEMORIALS.

The VICE PRESIDENT presented petitions of sundry citizens of McKean, New Castle, Pittsburgh, and Verona, in the State of Pennsylvania; of New York City, N. Y.; of Rockford and Marietta, in the State of Ohio; of Cloquet, Minn.; and of

Wheeling, W. Va., praying for the adoption of an amendment to the Constitution to prohibit polygamy, which were referred to the Committee on the Judiciary.

Mr. GALLINGER. I ask that a telegram which I send to the desk may be read.

There being no objection, the telegram was read, as follows:

[Telegram.]

PORTSMOUTH, N. H., *May 7, 1914.*

Hon. JACOB H. GALLINGER,
Washington, D. C.:

Please oppose HOBSON'S proposed prohibition amendment to the Constitution, as it will confiscate great wealth and throw many people out of employment.

HARRY ROSE.

Mr. GALLINGER. I have also telegrams of a similar nature, all from Portsmouth, N. H., from George Klump, Charles Ingram, Seth Hanson, Joseph Hassett, Charles Eastman, Harry Wendell, George French, R. L. Costello, J. G. Parsons, Clifford W. Bass, Albert Tilton, Thomas Parsons, John Leary, Valentine Sett, August F. Neschke, Charles E. Johnson, C. H. R. Woodward, Frederick Drew, Arthur Freeman, D. J. Tracy, Fred Gray, Dr. M. A. Higgins, John Kilroe, James Whitman, James Harvey, George Murray, and Norman Beane, remonstrating against national prohibition.

I have also memorials opposing the proposed constitutional amendment for national prohibition of the manufacture and sale of intoxicating liquors signed by 1,647 citizens of Manchester, 102 citizens of Concord, 400 citizens of Nashua, 36 citizens of Walpole, 36 citizens of Hillsborough, 131 citizens of Somersworth, and 24 citizens of Rockingham and Strafford Counties, all in the State of New Hampshire.

I ask that the telegrams and memorials may be referred to the Committee on the Judiciary.

The VICE PRESIDENT. That action will be taken.

Mr. GALLINGER presented the petition of A. H. Thayer, of Monadnock, N. H., praying for the enactment of legislation making a liberal appropriation for the enforcement of the so-called migratory-bird law, which was ordered to lie on the table.

He also presented a petition of Concord Lodge, No. 537, Brotherhood of Railroad Trainmen, Concord, N. H., praying for the enactment of legislation to provide a literacy test for immigrants to this country, which was ordered to lie on the table.

Mr. ROBINSON presented a petition of sundry citizens of Prescott, Ark., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

Mr. SHEPPARD. I present resolutions adopted at the sixth biennial convention of the Texas legislative boards and committees of the Brotherhood of Locomotive Firemen and Enginemen, Order of Railway Conductors, Brotherhood of Locomotive Engineers, Brotherhood of Railway Carmen, and Brotherhood of Railway Trainmen, held at Fort Worth, Tex., April 18, 1914, which I ask may lie on the table and be printed in the RECORD.

There being no objection, the resolutions were ordered to lie on the table and to be printed in the RECORD, as follows:

Whereas the dumping of more than a million of immigrants into this country annually is proving a menace to American institutions, the American home, and the American laborer, and the resulting competition with the working people of our land is causing bitterness and even anarchy in our industrial life; and

Whereas it has been well said that "charity begins at home," and while the United States has opened its gates to the earth's millions and offered an asylum to the oppressed and a home for the unfortunate, still this great country has no right to carry its hospitality one step over the line where American institutions and American workingmen and the American standard of wages and living are brought into serious peril; and

Whereas the National House of Representatives has passed the Burnett bill (H. R. 6060), containing a literacy test and other provisions which we believe will properly restrict immigration into this country, and will repeal the inadequate and farcical law now on the statute books relating to this subject: Therefore be it

Resolved by the sixth biennial convention of the Texas legislative boards and committees of the Brotherhood of Locomotive Firemen and Enginemen, Order of Railway Conductors, Brotherhood of Locomotive Engineers, Brotherhood of Railway Carmen, and Brotherhood of Railway Trainmen, at Fort Worth, Tex., April 18, 1914, That we respectfully ask our United States Senators and the President of the United States, Hon. Woodrow Wilson, to complete the enactment of this just and greatly needed measure.

Mr. GRONNA. I present petitions signed by a large number of citizens of Manfred, Stanley, Fargo, Park River, and Robinson, in the State of North Dakota, praying for the adoption of a national constitutional prohibition amendment. I ask that the petitions may be received and referred to the Committee on the Judiciary.

The VICE PRESIDENT. The petitions will be referred to the Committee on the Judiciary.

Mr. GRONNA. I present a petition signed by 200 citizens of Aneta, N. Dak., which I ask may be printed in the RECORD and referred to the Committee on the Judiciary.

There being no objection, the petition was referred to the Committee on the Judiciary and ordered to be printed in the RECORD, as follows:

Resolution suggested for adoption by churches, young people's societies, clubs, and other organizations, and by public meetings generally. Woman's Christian Temperance Union speakers are urgently requested to secure from all meetings which they address the adoption of this resolution:

"*Resolved,* That we are in hearty favor of national constitutional prohibition, and will do all within our power to secure the adoption of an amendment to the Constitution forever prohibiting the sale, manufacture for sale, transportation for sale, importation for sale, and exportation for sale of intoxicating liquors for beverage purposes in the United States, in accordance with the joint resolution introduced in the United States Congress by Congressman RICHMOND PEARSON HOBSON."

Adopted by mass meeting representing 200 people, April 2, 1914.

PEARL KIRK,
Aneta, N. Dak.

Mr. CHILTON presented the petition of J. M. Mason, of Charles Town, W. Va., praying for payment of damages caused to him by a preliminary injunction obtained by the United States under a mistake of facts, which was referred to the Committee on Claims.

Mr. GRONNA presented an affidavit in support of the bill (S. 5281) for the relief of Wiley W. Houston, which was referred to the Committee on Military Affairs.

Mr. WORKS presented a telegram in the nature of a petition from sundry citizens of Martinez, Cal., and a petition of sundry citizens of Oakland, Cal., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented a telegram in the nature of a petition from Joseph Grinnell, Harold C. Dryant, and F. Martens, of the University of California, Berkeley, Cal., praying for a peaceful settlement of the difficulties between this country and Mexico, which was referred to the Committee on Foreign Relations.

Mr. POINDEXTER presented a memorial of the Trades Council of Everett, Wash., remonstrating against the conditions existing in the mining districts of Colorado, which was referred to the Committee on Education and Labor.

Mr. OLIVER presented petitions signed by members of the Young People's Christian Union of the Monongahela Presbytery of the United Presbyterian Church of North America, residing within the counties of Allegheny and Washington, and of sundry citizens of Pennsylvania, praying for national prohibition, which were referred to the Committee on the Judiciary.

He also presented memorials of sundry citizens of Pennsylvania, remonstrating against national prohibition, which were referred to the Committee on the Judiciary.

He also presented petitions of sundry unions of the United Mine Workers of Pennsylvania, praying for an investigation into the conditions existing in the mining districts of Colorado, which were referred to the Committee on Education and Labor.

He also presented a memorial of the Board of Trade of Chester, Pa., remonstrating against the enactment of legislation providing for Government ownership of the telephone and telegraph systems, which was referred to the Committee on Interstate Commerce.

Mr. LODGE presented memorials of 2,600 citizens of Boston, Mass., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. CRAWFORD presented petitions of the Epworth League of Elk Point, of the Sunday School of Athol, and of sundry citizens of White, all in the State of South Dakota, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. JOHNSON presented petitions of sundry citizens of Corinth and East Hebron, in the State of Maine, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. BURLEIGH presented petitions of sundry citizens of Maine, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. NORRIS presented a petition of the Nebraska Church Federation, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

Mr. PERKINS presented memorials of sundry citizens of California, praying for the adoption of an amendment to the Con-

stitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. BRANDEGEE presented petitions of the congregation of the Baptist Church of Stafford, Conn., and of Union Grange, No. 25, Patrons of Husbandry, of Milldale, Conn., praying for national prohibition, which were referred to the Committee on the Judiciary.

REPORTS OF COMMITTEES.

Mr. BRYAN, from the Committee on Claims, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

H. R. 11040. A bill to carry out the findings of the Court of Claims in the case of James Harvey Dennis (Rept. No. 496); and

H. R. 11381. A bill for the relief of the estate of T. J. Semmes, deceased (Rept. No. 495).

Mr. LEA of Tennessee, from the Committee on Military Affairs, to which was referred the bill (S. 2472) to correct the military record of Herman von Werthern, reported it with an amendment and submitted a report (No. 497) thereon.

Mr. CLARK of Wyoming, from the Committee on Public Lands, to which was referred the bill (S. 819) providing for the homestead entry of certain lands in the State of Washington, and for other purposes, reported it with amendments and submitted a report (No. 499) thereon.

Mr. LANE, from the Committee on Fisheries, to which was referred the bill (S. 4946) to establish an additional fish-cultural station in the State of Texas, reported it without amendment and submitted a report (No. 498) thereon.

Mr. ASHURST, from the Committee on Indian Affairs, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

S. 1758. A bill for the relief of Warren E. Day (Rept. No. 500); and

S. 2661. A bill for the relief of the administrator and heirs of John G. Campbell, to permit the prosecution of Indian depredation claims (Rept. No. 501).

MEMORIAL EXERCISES, BROOKLYN NAVY YARD.

Mr. WILLIAMS. From the Committee to Audit and Control the Contingent Expenses of the Senate I report back favorably without amendment House concurrent resolution No. 39, providing for the representation of the Congress at the exercises to be held at the navy yard in Brooklyn, N. Y., and I ask unanimous consent for its present consideration.

The VICE PRESIDENT. Is there objection to the present consideration of the concurrent resolution?

There being no objection, the concurrent resolution was considered by unanimous consent and agreed to, as follows:

"Resolved by the House of Representatives (the Senate concurring), That for the representation of the Congress at the exercises to be held at the navy yard in Brooklyn, N. Y., on Monday, May 11, 1914, in honor of the men of the Navy and Marine Corps who lost their lives at Vera Cruz, Mexico, there shall be appointed by the Vice President 7 Members of the United States Senate and by the Speaker 21 Members of the House of Representatives.

"SEC. 2 That the expenses of the committee shall be defrayed in equal parts from the contingent appropriations of the Senate and House of Representatives."

ON THE RETURN OF THE DEAD SAILORS AND MARINES WHO FELL IN MEXICO AND RESOLUTION FOR APPOINTMENT OF COMMITTEE OF SENATE AND HOUSE TO ATTEND CEREMONIES IN NEW YORK.

Mr. LEWIS. Mr. President, on yesterday afternoon my attention was attracted to a concurrent resolution brought into the Senate, having passed the House, requesting the appointment of Members of this body to accompany Members of the other House to attend the ceremonies incident upon the arrival of the ship bearing the bodies of the American seamen. The resolution is now reported for passage. I am sure that I lay no vain flattery to myself if I assume that in what I now purpose to say I speak for every Senator who is honored with a place in this Chamber. This morning there comes a favorable report upon that resolution.

Mr. President, the news of the hour brings us the intelligence that a United States warship is solemnly bearing to our shores the Nation's dead, who died at the command of duty in Mexico.

Mr. President, these men were of the many who from humble places in life's assignment stepped forth to dedicate their lives to their country's need. No sordid pursuit of money for riches' sake blighted their usefulness. No selfish purpose to prosper upon the sacrifice of others possessed their dreams. No undertaking promising ease, exempt from burdens, was their aspiration. No. These heard their country's trump calling for valiant sons to protect and defend their common mother. From the farm they leaped to obedience. From the workshop they came with hands outstretched for service. From humble and obscure homes each joyously went his way to dedicate his young life to the destiny of America. With a father's blessing and a mother's parting kiss, with a "God bless you, my boy," they came. No riches softened their lot. No birth gave them privilege. Their endowment was the consolation that their honest lives were worthy the love of those left behind them and their inspiration in the hope that their service might earn the approval of their countrymen.

In loftiness of soul but in humility of duty they consecrated their lives to the honor of their flag and to the glory of their Nation. At the command they stepped out and forward, then, with face to the foe, fell in death.

Behold them, the four who were the first to fall completing the ever-present mystic square, personifying the all: Daniel Haggerty, an Irishman, a descendant of those who marched with Patrick Cleburne from the South and Phil Sheridan from the North; John Schumacher, the German, the offspring of those who fought for us under Steuben; George Poinsett, of the race of those who marched with Lafayette; and then Samuel Meisenberg, the Jew, the child of a people without a country, but now a son claimed by a nation.

Mr. President, as the stately ship bearing their silent forms turned toward the motherland she was saluted by the dipped colors of the greatest nations of the world. This was the homage which power and glory ever pays to the high purposes and sublime uses of heroic lives. Nor monarchs nor captains ever had nobler tribute in death than these humble and valiant dead. The salutations of the powerful of earth, sanctified by the requiem of the moaning waves and sweetened by the chant of the singing winds, consecrated the grandeur of their sublime homecoming.

Now, sir, they are to be met on their own native shores by the outpouring of the thousands who will greet them as those who gave honor to American seamen and victory to American arms.

The President of the United States, the officers of the Cabinet, Members of Congress, and the officials of honor in every avenue of distinction all will assemble to receive these returning children of their proud mother. They are taken to the heart of their countrymen in tears, to remain revered by their Nation. Surely it is sweet and noble to die for one's country.

Now, sir, I as an American present this exhibition of the world's testimonial to these beloved sons as an answer to those who by false accusation demean patriotic defense of the flag and condemn as servile those who engage for the protection of the Republic. I present this majestic march of the Nation's mourners against the false assertions that to enlist for the Army of America is degradation and to fight for the country's honor is a service rewarded only with contempt. I present this array of historic tribute to refute the calumny sent about by those who would desert their country in its peril and sacrifice it in its danger as they perpetrate the slander upon our patriotism that to die for America is but to be ignored in rewards and buried in forgetfulness. Sir, as against the attempt to slay the ardor of the young and to cheat the Nation of the protection by her manhood through maligning the spirit of American valor and falsifying the gratitude of the American people I present these proofs of the Nation's sublime affection for her sons, and I tender the presentation of these glorifying honors paid to their memory and renown.

Mr. President, we summon the watching world to attest to mankind the attachment of America for her children and to witness the tribute and triumph she pays to the hero, however lowly, who serves her cause.

So to-day from the Senate we send to the sad ones who await their beloved dead our sympathy and sorrow, as we certify to civilization that these who have fallen fulfilled the complete measure of man—THEY LIVED FOR DUTY, GAVE SERVICE TO GOD, AND DIED FOR COUNTRY. May their souls rest in heaven.

MEMORIAL EXERCISES, BROOKLYN NAVY YARD.

The VICE PRESIDENT. In compliance with the provisions of House concurrent resolution No. 39, the Chair appoints Mr. SAULSBURY, Mr. ROBINSON, Mr. O'GORMAN, Mr. VARDAMAN, Mr. GALLINGER, Mr. KENYON, and Mr. BRADY as the committee on the part of the Senate to attend the exercises to be held in Brooklyn, N. Y., May 11, 1914, in honor of the men of the Navy and Marine Corps who lost their lives at Vera Cruz, Mexico.

EMPLOYMENT OF STENOGRAPHERS.

Mr. WILLIAMS, from the Committee to Audit and Control the Contingent Expenses of the Senate, to which was referred Senate resolution 350, submitted by Mr. O'GORMAN on the 6th

instant, reported it without amendment, and it was considered by unanimous consent and agreed to, as follows:

Resolved, That the provisions of resolution of April 6, 1914, authorizing the Committee on Interoceanic Canals to employ temporarily a stenographer, be extended for 30 days from the adoption of this resolution.

Mr. WILLIAMS. By direction of the Committee to Audit and Control the Contingent Expenses of the Senate, I report back favorably Senate resolution 348, submitted by the Senator from Wisconsin [Mr. LA FOLLETTE] on the 4th instant. I ask unanimous consent for the immediate consideration of the resolution. I will state, in explanation, that this is rather emergent, and it is for that reason I ask for its immediate consideration.

The VICE PRESIDENT. Is there objection to the present consideration of the resolution?

The resolution was read, considered by unanimous consent, and agreed to, as follows:

Resolved, That the Committee on Corporations Organized in the District of Columbia be, and hereby is, authorized to employ an additional stenographer, at the rate of $100 a month, the term of services of such stenographer to conclude two weeks after the final adjournment of the second session Sixty-third Congress.

SOUTHERN COALING STATION FOR NAVY.

Mr. WILLIAMS. By direction of the Committee to Audit and Control the Contingent Expenses of the Senate, I report back favorably, with amendments, Senate resolution 291, and I call the attention of the Senator from South Carolina [Mr. TILLMAN] to it.

Mr. TILLMAN. I ask unanimous consent for the immediate consideration of the resolution.

Mr. OVERMAN. As I understand, the resolution includes all the ports on the Atlantic from Norfolk to Jacksonville?

Mr. WILLIAMS. Yes.

Mr. OVERMAN. Very well.

The VICE PRESIDENT. Is there objection to the present consideration of the resolution?

Mr. LODGE. Mr. President, I do not object, of course, to having the resolution read, but it involves a very important matter, and I should like to reserve the right to object to its consideration.

The VICE PRESIDENT. The Secretary will state the amendment reported by the committee.

The SECRETARY. As reported originally from the Committee on Naval Affairs, all the text of the resolution was stricken out and the following inserted:

Whereas in view of the early completion of the Isthmian Canal and of its importance to the United States Navy and the national defense generally, and to the development of trade with Central and South American countries, the establishment of adequate coal-supplying facilities south of Cape Hatteras is deemed imperative; and

Whereas the usefulness and efficiency of any harbor as a coaling station must depend upon the facilities (first) of the coal producers for reaching it and (second) of the coal carriers in the matter of assembling the product at said port, including coal docks and other facilities for loading and handling, which should be accessible to all shippers and carriers alike on the same terms and conditions; and

Whereas it appears from numerous complaints now before the Interstate Commerce Commission, as well as from other sources, that the power and influence of the so-called Coal Trust is being persistently used through the management of the railroads reaching South Atlantic ports to prevent the free movement of coal not belonging to said Coal Trust, and it is alleged that practically all of such roads are actually dominated by the same financial interests that control the great coal combines finding outlet chiefly through New York Harbor, Philadelphia, and the Chesapeake Bay ports: Now, therefore, be it

Resolved, That the Committee on Naval Affairs be, and it is hereby, authorized and instructed to investigate the natural and strategic advantages for naval purposes of ports south of Hatteras as compared with Norfolk and other Chesapeake Bay ports as a permanent point for coal distribution, and included and embraced in the scope of said investigation the said committee is further authorized and instructed to investigate into the character and proximity of the coal supply, and the rates obtainable on coal from the coal fields near by; and the committee is further instructed to ascertain as far as it is practicable—

First. What quantity of bituminous coal is consumed or used at Charleston, Savannah, Brunswick, Fernandina, and Jacksonville, and in their vicinities, and what proportion of this coal is supplied from mines located on the Pennsylvania Railroad system, including the Baltimore & Ohio, Norfolk & Western, and Chesapeake & Ohio, and what proportion is supplied by mines on the Southern Railway.

Second. Whether the United States Navy, including the naval stations, now pays a higher freight rate for coal supply at any or all Atlantic seaports than is charged to commercial ships for bunkerage or for coastwise distribution; and whether all coal for naval supply, at the Atlantic seaports, is not supplied by the so-called Coal Trust; that is, by the mines that have a common ownership or control with the coal carriers; and whether present conditions prevent competitive bidding for the United States Navy coal supply, or any part thereof, by independent coal operators.

Third. The mileage from mine groups located on the Southern Railway in Virginia, Kentucky, Tennessee, Georgia, and Alabama to Wilmington, Charleston, Savannah, Brunswick, Fernandina, and Jacksonville; and the mileage to these same ports, the way the coal is moved from the mines on the Pennsylvania Railroad system and on the Baltimore & Ohio, Norfolk & Western, and Chesapeake & Ohio Railroads and all connecting lines in West Virginia; and in all cases show the freight rates on coals to the cities named, both by rail and rail and water; and where two or more carriers participate, ascertain the proportion of the rate (or service charge) each receives; and also compare these rates with those at seaport towns and cities from Norfolk to New York for local use, for tidewater shipment, and for naval use.

Fourth. Why the Southern Railway has built no wharves or made no provision for handling tidewater coal at any of the South Atlantic ports, and whether the riparian rights and water frontage of South Atlantic harbors is not now being bought up by the parties in the interest of the Coal Trust, while the Southern Railway is taking no active steps to build for itself an independent outlet.

Fifth. Whether trustees for the stockholders and members of the board of directors of the Southern Railway are financially interested in coal-mining industries on the Pennsylvania Railroad system, the Baltimore & Ohio, the Norfolk & Western, or the Chesapeake & Ohio, and to what extent; and whether they, or any of them, are financially interested in any coal-mining industries tributary to any of said railways. And if found to be interested, ascertain whether such mines have been allowed preference or advantages not allowed to all other shippers (shown by cases already decided by the Interstate Commerce Commission or State commissions). And in all coal-mining operations tributary to the Southern Railway in which any director of the Southern Railway or director of any railroad controlled by it, or allied with the Southern Railway, is financially interested, ascertain the division of through rates with other railroads, and in all cases where a coal operation tributary to the Southern Railway controls a local railroad, or when such local railroad is controlled in common with a coal operation, for assembling and distributing its own coal, ascertain just what proportion of rates it receives, if any, from the carriers, or what compensation other than a division of the rates it may receive.

Sixth. Whether the rate making for the Southern Railway, or other southern carriers of coal, is dominated by the Pennsylvania Railroad or Norfolk & Western; or whether the freight rates of the Southern Railway and any of the other southern coal carriers are made and fixed and maintained by the traffic men of the Southern Railway and other southern carriers; or whether the Pennsylvania Railroad, the Norfolk & Western Railway, the Baltimore & Ohio, and Chesapeake & Ohio, exercise any influence either through a rate-making or traffic association or otherwise, in the matter of making the rates for the Southern Railway and other southern carriers.

Seventh. Whether or not there is any discrimination now existing in favor of any one port on the Atlantic seaboard as against another port, and, if so, in what does such discrimination consist; and whether or not any coal trust or combination of railroads and coal companies control the coal tonnage to any port or ports, and, if so, how; and whether or not the coal supply of West Virginia, Virginia, Pennsylvania, Tennessee, and Kentucky flows naturally and without unnecessary obstruction to their respective natural ports upon the Atlantic seaboard; and whether or not there is any discrimination in rates against any coal operators.

Eighth. The coal rates to thirty or more representative cities on the Southern Railway in Virginia, North Carolina, South Carolina, Georgia, and Florida, and compare these rates with the rates enjoyed by the cities of relative importance and location, with regard to mines, in Pennsylvania, Ohio, Indiana, and Michigan on the Pennsylvania Railroad system, including the cities whose rates are compared in the letter read into the CONGRESSIONAL RECORD by Senator TILLMAN on April 8.

Ninth. What actual ownership each director of the Southern Railway Co. has in that company, and what ownership, if any, is held in it by the individuals composing the trustees for the stockholders.

Said Committee on Naval Affairs is authorized to sit during the sessions of the Senate and during any recess of Congress, and its hearings shall be open to the public, and it is authorized and empowered to employ counsel, coal experts, railroad-rate experts, and such other clerical and stenographic and expert assistants as it may deem necessary. Said committee shall have power to compel witnesses to testify, to send for persons and papers, to administer oaths to witnesses, and do anything necessary to arrive at all the facts.

The expenses incident to the investigation herein authorized, not to exceed $10,000, shall be paid out of the contingent fund of the Senate upon vouchers signed by the chairman of the Committee on Naval Affairs and approved by the Committee to Audit and Control the Contingent Expenses of the Senate. The said Committee on Naval Affairs may, in its discretion, conduct this investigation by a subcommittee of not less than five members, to be appointed by the chairman, and shall make its report as soon as possible.

The VICE PRESIDENT. Is there objection to the present consideration of the resolution?

Mr. GALLINGER. Let the amendments first be read as reported.

The VICE PRESIDENT. The Secretary will state the amendments to the amendment.

The SECRETARY. On page 9, line 4, after the word "employ," to strike out the word "counsel"; in lines 5 and 6, to strike out the words "such other clerical and stenographic and expert assistants as it may deem necessary" and insert "to employ a stenographer at a price not to exceed one dollar per printed page"; in line 11, before the word "exceed," to strike out the words "not to" and insert "shall not"; and in the same line, after the word "exceed," to strike out "$10,000" and insert "$5,000."

The VICE PRESIDENT. Is there any objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The VICE PRESIDENT. The question is on agreeing to the amendments.

The amendments to the amendment were agreed to.

The amendment as amended was agreed to.

The resolution as amended was agreed to.

HENRY LA ROQUE.

Mr. CLAPP. A few days ago there was received from the House of Representatives the bill (H. R. 14229) for the relief of Henry La Roque, and it was inadvertently referred to the Committee on the Judiciary. It is merely to give the man the

right to an appeal, and it clearly ought to go to the Committee on Indian Affairs. I would ask the Senator from North Carolina [Mr. OVERMAN], the acting chairman of the Committee on the Judiciary, to have that committee discharged from its further consideration, and to have the bill referred to the Committee on Indian Affairs, where it properly belongs. I think there can be no objection to that course.

Mr. OVERMAN. I move that the Committee on the Judiciary be discharged from the further consideration of the bill, and that it be referred to the Committee on Indian Affairs.

The motion was agreed to.

MOTHER'S DAY.

The joint resolution (H. J. Res. 263) designating the second Sunday in May as Mother's Day was read twice by its title.

Mr. SHEPPARD. I ask unanimous consent that the joint resolution be immediately considered and put on its passage. It authorizes the President to proclaim the second Sunday in May as Mother's Day throughout the United States, and it will have to be passed this morning if at all.

Mr. SMOOT. If the Senator will have it referred to the committee now, it can be reported right back, before the close of the day, and have unanimous consent granted for its consideration. I think that is the proper way.

Mr. SHEPPARD. If the Senator prefers me to take that course, I will do so. Does the Senator think that I may poll the committee on the floor?

Mr. SMOOT. There is not any question about it.

Mr. SHEPPARD. Very well. Let the joint resolution be referred to the Committee on Education and Labor.

The VICE PRESIDENT. It will be so referred.

Mr. SMITH of Georgia subsequently said: From the Committee on Education and Labor I report back with an amendment the joint resolution (H. J. Res. 263) designating the second Sunday in May as Mother's Day.

Mr. SHEPPARD. Mr. President, I have secured the signatures of a majority of the Committee on Education and Labor in behalf of the joint resolution which was received from the House of Representatives this morning, and I ask for its immediate consideration.

The VICE PRESIDENT. Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution.

The amendment of the Committee on Education and Labor was, in section 2, page 2, line 5, before the words "its observance," to strike out "require" and insert "request," so as to make the joint resolution read:

Whereas the service rendered the United States by the American mother is the greatest source of the country's strength and inspiration; and

Whereas we honor ourselves and the mothers of America when we do anything to give emphasis to the home as the fountainhead of the State; and

Whereas the American mother is doing so much for the home, the moral uplift, and religion, hence so much for good government and humanity: Therefore be it

Resolved, etc., That the President of the United States is hereby authorized and requested to issue a proclamation calling upon the Government officials to display the United States flag on all Government buildings, and the people of the United States to display the flag at their homes or other suitable places, on the second Sunday in May, as a public expression of our love and reverence for the mothers of our country.

SEC. 2. That the second Sunday in May shall hereafter be designated and known as Mother's Day, and it shall be the duty of the President to request its observance as provided for in this resolution.

The amendment was agreed to.

The joint resolution was reported to the Senate as amended and the amendment was concurred in.

The amendment was ordered to be engrossed and the joint resolution be read a third time.

The joint resolution was read the third time and passed.

The preamble was agreed to.

The title was amended so as to read: "A joint resolution designating the second Sunday in May as Mother's Day, and for other purposes."

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. OVERMAN:

A bill (S. 5511) for the relief of the heirs of Gaston H. Wilder, deceased (with accompanying paper); to the Committee on Claims.

By Mr. SHERMAN:

A bill (S. 5512) granting an increase of pension to Felix M. Wheat; and

A bill (S. 5513) granting a pension to John N. Calvin; to the Committee on Pensions.

By Mr. POINDEXTER:

A bill (S. 5514) granting an increase of pension to Loucette E. Glavis; to the Committee on Pensions.

By Mr. JOHNSON:

A bill (S. 5515) authorizing the Secretary of War to donate to the Caribou Board of Trade, in the town of Caribou, State of Maine, one bronze or brass cannon or fieldpiece, with its carriage and cannon balls; to the Committee on Military Affairs.

By Mr. BRADLEY:

A bill (S. 5516) granting an increase of pension to Leona B. Haucke (with accompanying papers); to the Committee on Pensions.

By Mr. LEWIS:

A bill (S. 5517) to reduce night work in post offices; to the Committee on Post Offices and Post Roads.

By Mr. MARTIN of Virginia:

A joint resolution (S. J. Res. 147) to provide for legally determining the ownership of and title to the fire-alarm system and appliances, apparatus, and connections heretofore placed and installed in the Government buildings of the Government Hospital for the Insane, and to determine such other questions as are provided for in the following resolution; to the Committee on the Judiciary.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. JOHNSON submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

Mr. SHERMAN submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

Mr. SMITH of Maryland submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

Mr. McCUMBER submitted an amendment intended to be proposed by him to the Agricultural appropriation bill, which was ordered to lie on the table and be printed.

Mr. OLIVER submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

PANAMA CANAL TOLLS.

Mr. OLIVER. I submit an amendment to the Panama Canal tolls bill, which I ask to have read.

The VICE PRESIDENT. The Secretary will read as requested.

The Secretary read as follows:

On page 1, line 10, strike out the word "repealed" and insert "amended to read as follows: No tolls shall be levied upon vessels of the United States or of any of the citizens thereof."

Mr. OLIVER. I ask that the amendment may be printed and lie on the table.

The VICE PRESIDENT. That action will be taken.

MILL NOTES—BRADFORD'S EXPORTS.

Mr. GALLINGER. Mr. President, I have a brief article from the Daily Trade Record of May 2, 1914, in reference to the mill situation in the city of Fall River, Mass., and also a brief article showing the exports from Bradford, England. I ask that the two articles may be printed in the RECORD.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

[From the Daily Trade Record, May 2, 1914.]

MILL NOTES.

FALL RIVER.

The mill situation: Mills are continuing to report further losses of skilled help and a more extended reduction of production. Idle machinery throughout the mills has been estimated this week at approximately 85 per cent, and it is expected that the enforced curtailment will reach one-fifth of the total production within a short time.

The exodus to outdoor employment has already begun, and it is affecting mostly the weaving department, where the skilled operatives are employed. Yet the treasurers are not apparently disturbed, and in many cases they are even satisfied to shut down a fifth of their machinery. They point out that goods are now piling up, and the idle machinery affords a curtailment that will keep down the accumulation. Conditions for the next few weeks will be watched with keen interest by the treasurers, because of the general feeling that failure to improve will result in a curtailment policy. Such a plan will be taken up only as a last resort, because the mill men realize that the labor shortage is a serious problem here, and every effort is to be made to keep all the skilled help possible in the mills and in the city.

Textile union officials are also viewing the situation with interest, but whatever plans were considered for a renewal of the agitation for a wage increase have been abandoned for a time at least. They realize that conditions do not warrant steps toward an increase in wages, and this matter will probably not be taken up by the textile council until some marked improvement in the trade is apparent.

BRADFORD'S EXPORTS TO UNITED STATES—INCREASE 280 PER CENT.

Writing under date of April 22, the regular Bradford, England, correspondent of the Daily Trade Record says:

"At last the figures relating to the Bradford exports to the United States for March are available. Augustus E. Ingram, the United States consul, explains the lateness of publication by the fact that there has been such a pressure of work in the preparation of the returns, and when one considers that both the total value of the exports and the total increase are easily the highest recorded since the new tariff took effect, one is compelled to admit that the consul has ample excuse for a few days' delay.

"The total value is £634,391, and the total increase over March of last year £470,238; in other words, an increase of over 280 per cent. The chief rise in the total is due to America's increased purchases of colonial and foreign wool, amounting to some £218,258 in value, and larger than the January and February exports of this description combined. The increase in this case is £183,192, or about 520 per cent; but English wools only show an increase of some £35,882, the total being £52,802.

"So much for the raw material. Tops have been sent out valued at £24,343, compared with none at all last March. In February the total was about £27,000. Noils and wastes are declared at £23,116, showing an increase of £21,825. It thus appears that England and the States are exchanging their noils. Worsted and mohair yarns (worsted, £21,704; mohair, £8,804) show a combined increase of £26,206, and about £13,000 worth more of these yarns has been exported than in February. Completion of the season's deliveries is given as the reason for lower values of stuffs (dress goods, £43,654; linings, £60,075), but worsted coatings seem to be affected very slightly by the season, as they have been about £40,000 value during the last three months.

"MARCH EXPORTS.

"The exports to the United States during last March, outside of those previously published in this paper, are:

Articles.	March, 1914.	March, 1913.
Cotton cloths:		
Dress goods	£18,116	£9,952
Linings	41,094	12,640
Yarns:		
Silk	17,733	16,026
Cotton	4,324	4,708
Wool tops	24,343	.....
Wool noils and waste	23,116	1,290
Silk noils and waste	13,057	1,062
Sheepskins, packed	2,781	6,444
Carpets and rugs	1,803	2,167
Hair:		
Mohair goat	978	3,212
Alpaca	148	.....
Hair cloths	728	87
Silk goods:		
Silk and silk and cotton piece goods	177	36
Silk seals, plushes, etc	414	98
Tapestry, damasks, etc	422	651
Total	634,391	164,152

"QUARTERLY RETURNS.

"It is interesting, also, to note the quarterly returns. The total is £1,739,286, which is easily £1,000,000 more than in 1913 or 1912, whose totals, respectively, were £540,871 and £696,315. In the quarterly returns the attitude of the American wool trade is clearly reflected. Tops, yarns, and pieces are going out, but the figures for wool overwhelm them all (£628,392). It is another indication that the new tariff has worked wonders in the Bradford trade."

ADDRESS BY EX-GOV. W. A. M'CORKLE.

Mr. CHILTON. I ask to have printed as a public document an address by ex-Gov. W. A. MacCorkle before the West Virginia Coal Mining Institute, at Charleston, W. Va., December 8, 1913, on the relation of West Virginia coals to the Panama Canal. I ask that the copy of the address, which I have, may be referred to the Committee on Printing, for the purpose of having it printed as a Senate document.

The VICE PRESIDENT. Without objection, that action will be taken.

FRUIT EXPORTATION.

Mr. CHILTON. I present a communication from William Campbell, of Charles Town, W. Va., secretary and manager of The Virginias Fruit Exchange, transmitting resolutions adopted at the last meeting of the Eastern Fruit Growers' Association. I ask that the communication and accompanying resolutions may be printed in the RECORD.

There being no objection, the communication and accompanying resolutions were ordered to be printed in the RECORD, as follows:

THE VIRGINIAS FRUIT EXCHANGE,
Charles Town, W. Va., April 27, 1914.

Hon. WILLIAM E. CHILTON,
United States Senate, Washington, D. C.

DEAR SIR: Inclosed I hand you a communication which I would like you to have read into the CONGRESSIONAL RECORD in its entirety as soon as you conveniently can. Thanking you, I am,

Faithfully, yours,

WM. CAMPBELL.

THE VIRGINIAS FRUIT EXCHANGE.
Charles Town, W. Va., April 27, 1914.

Hon. WILLIAM E. CHILTON,
United States Senate, Washington, D. C.

DEAR SIR: I beg to communicate the following excerpt from the minutes of the last meeting of the Eastern Fruit Growers' Association:

"Resolution offered by William Campbell, of Charles Town, W. Va., manager of The Virginias Fruit Exchange.

"Whereas the fruit planted acreage of the United States has been very largely increased within the past few years; and

"Whereas the orchards and groves which are beginning to come into bearing will increase the fruit output of the country to an extent which renders it both desirable and necessary that new outlets be found for the increased production; and

"Whereas the opening of the Panama Canal and improved trans-Atlantic and trans-Pacific steamship transportation offer great possibilities for the export of American fruits under quick transit and adequate refrigeration facilities, not only to South American, but to European, Asiatic, Australian, and African markets at present unavailable to the fruit growers of the United States: Be it

"*Resolved*, That we commend the efforts of the administration to extend our foreign commerce under the plans now being formulated, and respectfully petition the Congress of the United States to provide such fair and liberal appropriations as may be necessary for the accomplishment of that purpose.

"Indorsed by Eastern Fruit Growers' Association at meeting January 6, 1914.

"THOMAS B. SYMONS,
"*Secretary.*"

The resolutions are self-explanatory and indicative of the attitude of eastern fruit growers toward the efforts of the Government to increase the exportation of their product.

Kindly make such disposition of this report as may be helpful in the premises, and oblige,

Yours, very truly,

WM. CAMPBELL, *Secretary.*

PANAMA CANAL TOLLS.

Mr. SMOOT. Mr. President, I desire to give notice that on Tuesday, May 12, following the routine morning business, I shall address the Senate on the Panama Canal tolls question.

HOUSE BILL REFERRED.

H. R. 14034. An act making appropriations for the naval service for the fiscal year ending June 30, 1915, and for other purposes, was read twice by its title and referred to the Committee on Naval Affairs.

PANAMA CANAL TOLLS.

Mr. O'GORMAN. I ask to have the canal tolls bill laid before the Senate in order that the Senator from West Virginia [Mr. GOFF] may address the Senate.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 14385) to amend section 5 of "An act to provide for the opening, maintenance, protection, and operation of the Panama Canal and the sanitation of the Canal Zone," approved August 24, 1912.

Mr. TOWNSEND. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Hollis	Norris	Smith, Md.
Borah	Hughes	O'Gorman	Smoot
Brady	James	Oliver	Sterling
Bristow	Johnson	Overman	Sutherland
Bryan	Kenyon	Page	Swanson
Burleigh	La Follette	Perkins	Thomas
Chamberlain	Lane	Pomerene	Thompson
Chilton	Lea, Tenn.	Robinson	Townsend
Clark, Wyo.	Lee, Md.	Root	Vardaman
Clarke, Ark.	Lewis	Saulsbury	Walsh
Crawford	Lippitt	Shafroth	Warren
Dillingham	Lodge	Sheppard	Weeks
Gallinger	McCumber	Sherman	West
Goff	McLean	Shively	Williams
Gronna	Martin, Va.	Simmons	
Hitchcock	Martine, N. J.	Smith, Ga.	

Mr. WALSH. I wish to announce that the absence of my colleague [Mr. MYERS] is due to illness.

Mr. TOWNSEND. I wish to announce the absence of my colleague [Mr. SMITH] on important business. He is paired on all votes with the junior Senator from Missouri [Mr. REED]. I desire this announcement to stand for the day.

The PRESIDING OFFICER (Mr. POMERENE in the chair). Sixty-two Senators have answered to their names. A quorum of the Senate is present.

Mr. GOFF. Mr. President, we are considering to-day a bill the object of which is to repeal legislation that has had the unqualified approval of the voters of this Nation. The people have fully considered, accurately weighed in the balance the domestic and international question involved, and have by an overwhelming majority—a regular avalanche of ballots—decided that they are not wanting in merit, that the Congress was wise and patriotic when it exempted from tolls our coastwise ships when passing through the Panama Canal.

Our situation as a Nation is most peculiar, altogether anomalous, really distressing, verging even on the pitiful. Like a

mighty vessel upon a stormy sea without a navigator, our Ship of State is drifting, carried along by a political current pregnant with disaster at home and frightful entanglements abroad.

In November, 1912, at a general election held throughout the Nation, 15,034,800 votes were cast, of which Woodrow Wilson received 6,293,120, William H. Taft 3,485,082, Theodore Roosevelt 4,119,588, Eugene V. Debs 901,839, Eugene W. Chafin 206,427, and Arthur E. Reimer 28,750. Of these votes 13,897,784—the Wilson, Taft, and Roosevelt votes—were polled openly, enthusiastically, patriotically, in approval of the act exempting our coastwise vessels from the payment of tolls, and I am warranted in saying that the other votes were cast with like intention. In fact, rather marvelous, most unusual, it was 15,034,800 unanimous votes polled in behalf of a great cause—a most unique and inspiring tribute to the loyal sentiment of the Nation.

Diverse and distracted as our citizenship was on other questions of political thought and economic policy, paradoxical as it may seem, the candidate who received 6,293,120 votes, and against whom 8,741,608 votes were cast, was elected, and is now our President. The convention that nominated him adopted a platform containing a plank which declared for free tolls, such declaration receiving the full approval of the candidate.

When the Democratic national convention met in Baltimore and promulgated that platform the situation was different from what it is now, for it was then popular and regarded as a patriotic duty to advocate the exemption from tolls of coastwise vessels. It was not then considered as a subsidy, but as an honest, legitimate effort to aid our merchant marine, and to restore our flag to the seas from which it had been driven. The Democratic Party solemnly pledged its policy and its candidates to the legislation that granted free tolls to coastwise ships. It was not an oversight; it was not a mistake; it was not "just slipped in." It was duly considered and regularly adopted. The distinguished gentlemen who composed that convention, shining lights in the management of that great party into the keeping of which the destinies of this Nation are now confided, are not highly honored by those who now say that when that convention read into its creed the words, "We favor the exemption from tolls of American ships engaged in coastwise trade passing through the Panama Canal," it did not appreciate the importance and magnitude of the matter involved.

It is with pleasure that I note quite a number of those to whom I have just made reference have emphatically repudiated this suggestion. The Democratic convention was right, wonderful as it may seem, when it incorporated those words into its platform. The Democratic candidate for President, speaking in favor of those words, was right; but when he, as President, says to the Congress in substance, that the words are vicious and that the provision should be ungrudgingly repealed, he is everlastingly wrong.

If the convention promises then so made are now to be disregarded, what confidence will the people have in the plighted faith of party platforms? In plain words, Mr. President, if they were made to be disregarded at will, if party platforms are not now binding as once they were, then our system of government for the people and by the people has received such a blow that it will require the adoption of other rules, of better methods, before the voters will again trust those who have so deceived them.

Mr. President, let me call attention to what some of our Democratic friends, some of them Members of the Senate, all of them men of character and well-earned renown, have said concerning this plank in their platform. I read from statements purporting to come directly from them, published in reputable journals, and, so far as I am advised, no one has denied or corrected them.

I find in the New York Evening Journal, March 30, 1914, the following interview with Senator J. K. VARDAMAN. I regret he is absent.

Senator J. K. VARDAMAN, of Mississippi, member of the Democratic platform committee at the Baltimore convention, made this statement in connection with the fight for free tolls:

"I have no more respect for the integrity of a man who will violate a pledge made in the performance of a public duty than I have for a man who accepts a bribe to control his official conduct.

"I agree with Mr. Bryan 'that a certain man who would win office on a platform and then violate it is an embezzler of power and guilty of a crime of as great moral turpitude as a soldier who would betray his country in time of war.'

"When the question of repealing the law permitting American ships engaged in the coastwise trade to pass through the canal free of tolls came up I was curious to know what the President was going to say in explanation of his change of front. I thought he would take the Congress into his confidence and that we would reason together about this matter.

"But when he simply said that we should do this because he asked us to do it, and do it ungrudgingly, I thought that message an affront to the intelligence and patriotism of every Member of Congress."

I see the distinguished Senator from Mississippi [Mr. VARDAMAN] now honors me with his presence, and if this publication is not correct I beg that he will advise me.

Mr. VARDAMAN. I do not know what the Senator reads.

Mr. GOFF. I read from what purports to be a statement of yours made March 30, published in the New York Evening Journal.

Mr. VARDAMAN. I did not hear the article. Will the Senator state what it is?

Mr. GOFF. I am reading it now.

Mr. VARDAMAN. I will listen to the Senator.

Mr. GOFF. I have already read a portion of it, which I will hand the Senator.

"It reminded me"—

Still quoting from my brother Senator—

"It reminded me of the schoolmaster who tells his pupils to go to their classroom, ask no questions, but leave the matter to the superior intelligence and patriotism of the professor.

"I was a member of the platform committee of the Baltimore convention"—

Pardon me for a moment when I say that I think the entire statement is an admirable one.

"This canal-toll question was considered carefully, and it was as much the mature judgment of the convention as any other plank in the platform.

"After the convention the President approved it. Mr. Bryan approved it. The American people approved it.

"Now, to ask Democrats elected on that platform to betray their constituents and violate instructions given by them in their votes at the Baltimore convention is asking a little more than my sense of right and loyalty to my constituents will permit me to do.

"It is most unfortunate that this great problem can not be discussed without imputing improper motives to the men who made it possible for Mr. Wilson to be elected President.

"I believe the Government has the right to pass through the canal free of tolls not only our coastwise shipping but our own ships engaged in international commerce. I do not believe free tolls to all American ships would be an injustice to any other nation.

"But I am much more interested in deserving the commendation of my own people than I am in earning the applause of foreign nations by maintaining 'our reputation for generosity.'

"The President's position—

Still quoting—

"is absolutely indefensible. The proposition to yield to the dictation of a European power in this matter is humiliating. Rather than violate the pledge I have made to my constituents, I would resign my seat in the Senate. I want to say that it is no justification for the perfidious and sycophantic betrayal of constituents to say that the President advises it. The President is as much the creature of the voter as I am, and he can never rise superior to his creator.

"I dissent emphatically from certain gentlemen that Senators and Representatives are called upon to follow the President. The ideas expressed by the President are accepted by me at their intrinsic value.

"I am not going to criticize Mr. Bryan. His great desire to work in harmony with the President seems to have operated as a kind of hypnotic spell. Instead of the strong voice I expected him to be, he seems to be content to play the part of the echo."

So endeth the chapter.

I quote now from another distinguished Member of the Senate, Senator WALSH, also a delegate to the Baltimore convention, who always is candid, knowing well how to clearly express his views. He is reported in the American Economist of March 6, 1914, in these words:

While I have regarded the transactions within the resolutions committee as more or less confidential, I am willing to give my recollection of the steps by which the free-tolls plank became a part of the Baltimore platform. Recent imputations in the newspapers may tend to create the impression that there was something disingenuous, mysterious, or sinister in respect to the matter. There was not. On the contrary, there was nothing connected with it which affords the slightest foundation for such a charge or suspicion. The plank was offered in the subcommittee of eleven by Senator O'GORMAN. Opinion in its favor seemed so unanimous that there was practically no debate. At the suggestion of Mr. Bryan, ships owned by railroad companies were barred from using the canal, and the fact that this latter suggestion was found in the Baltimore platform, along with the approval of free tolls for coastwise vessels, shows plainly that the subcommittee was fully cognizant of the existence of the free-tolls plank.

These matters—

Still quoting now from Senator WALSH—

along with others, were then referred to a subcommittee of four. The four were Mr. Bryan, Senator POMERENE, Senator O'GORMAN, and myself. We reported back on all the planks now in the Baltimore platform, and I was assigned to put the sections in their proper sequence. I did this, including the tolls provision. The subcommittee of four heard and approved them. The subcommittee of 11 heard and approved them, and then the entire resolutions committee was called together, the platform was read, approved, and later adopted by the convention. Thus each plank passed through several stages of preparation and could not have failed to be known to all attending the meeting of the committee or the various subcommittees.

Now, I want to read a statement that was made and submitted by the distinguished leader of the House of Representatives, Mr. UNDERWOOD. I quote:

I believe that the Democratic Party was both wise and patriotic when it announced a policy in favor of discriminating in favor of our coastwise ships in the Panama Canal.

There is no reason at this time why we should abandon a solemn promise made to the American people in one of the most prominent planks in our party platform.

But we are told that we are violating a solemn treaty made with another nation, and in good faith should abandon the canal to foreign rivals without contest or dispute in order that we may keep our standing in the family of nations.

Not for one moment do I believe that we have violated a treaty right and not for one moment do I believe that the English Government seriously contends that we have violated a treaty right.

Our whole difficulty in the matter arises from the un-American spirit of surrender.

A letter was written a short time since by a distinguished citizen of the Nation, the editor of a great Democratic journal. It is addressed to an unknown Senator, or, at least, the name of the Senator to whom the letter was sent has not been made public. Let me read it:

MY DEAR SENATOR ———:

You advocate cloture. All of the opponents of such a method call it gag rule. You believe, as you say, in the will of the majority, and maintain that it is only through cloture that the will of the majority can find expression.

Undoubtedly you are right in the abstract. We are all for majority rule in the abstract. But let us take a concrete case now before the Senate, and see if gag rule means majority rule.

Suppose, by a chain of circumstances, a party is in power which is in reality a minority party, which was elected by less than a majority of the votes cast, which was elected because the opposition was divided, which represents the sentiment of a minority of the voters and does not even accurately or, sometimes, even honestly, represent that sentiment.

Supppose that all three parties in the late election, representing the vast majority of the citizens, and practically the sum total of the citizens, had pledged themselves to a certain measure. Suppose that the party elected had pledged itself to that measure specifically and definitely and positively in its platform. Suppose that the leader of the party in his speeches had committed himself to that particular plank of the platform, and had distinctly stated that the plank was not inserted in the platform merely as molasses to catch flies, but to be honestly and sincerely carried out by the party if elected.

Then suppose that this traitorous party should repudiate its own platform, and this dishonest leader should ignore his own personal pledge. Suppose those elected representatives of the people should defy the will of the people as expressed in the platform of the three parties appealing to the people for their votes, and should act contrary to the will of the people and contrary to the specific pledges of the individuals elected and the definite declaration of their platform.

Ought not some obstacle be put in the way of this betrayal of public trust until the citizens of the country shall have an opportunity to express their opinion of such treachery, and to repudiate such a perjured party at the polls?

Personally I think that every effort should be made to prevent such a conscienceless party from violating its pledges and from betraying the people's trust and the people's interests, and I think that the party will have reason to thank the men who, by means of deliberate debate or any other method, can prevent this party from taking a course so suicidal to itself, so harmful and humiliating to the country.

Assuredly, if it is not prevented from taking such a course, every man in this country who believes in the sanctity of a party pledge or in ordinary honorable dealings between man and man, will do his best to punish such a party and rebuke such a betrayal of popular government, which is government in accordance with the will of the majority of the people.

I, too, believe in majority rule, in genuine majority rule, in a platform which appeals honorably to the support of the people and abides honorably by the expressed will of the people, and I am going to labor for such majority rule and for some party which honestly represents it, not only in its professions, but in its practice.

Sincerely,

WILLIAM RANDOLPH HEARST.

Ex-President Roosevelt, referring to this matter, said:

I believe that the position of the United States—as to the Panama Canal—is proper as regards this coastwise traffic. I think that this does not interfere with the rights of any other nation. No ships but our own can engage in coastwise traffic, so that there is no discrimination against other ships when we relieve the coastwise traffic from tolls. I believe that the only damage that would be done is to the Canadian Pacific Railway. * * * We are benefiting the whole world by our action at Panama, where every dollar of expense is paid by ourselves. In all history I do not believe you can find such great and expensive work as the Panama Canal, undertaken not by a private corporation but by a nation, as generously put at the service of all mankind.

In his message of August 18, 1912, written after receipt of the first formal British protest against tolls exemption, after the passage of the bill by the House of Representatives, President Taft said:

After full examination of the treaty and of the treaty which preceded it, I feel confident that the exemption of the coastwise vessels of the United States from tolls and the imposition of tolls on vessels of all nations engaged in the foreign trade is not a violation of the Hay-Pauncefote treaty.

I am sure that it is not the intention of Congress to violate the Hay-Pauncefote treaty or to enact anything inconsistent with its provisions, and that it certainly is not its purpose to repeal, by subsequent enactment, the treaty in so far as it represents the law of the land.

The President, then a candidate, had carefully considered this platform and found it to correctly enunciate the policy of the Democratic Party as well as his own views. I would not for one moment do him the injustice of intimating to the contrary. In his letter of acceptance he said:

They say—

Referring to the platform—

It is a very practical document. We are now about to ask the people of the United States to adopt our platform. We are about to ask them to intrust us with office and power and the guidance of their affairs.

I can but wonder why the President changed his views, why he discarded his platform as to this particular matter, why he asked for the repeal of the legislation the essence of which his party had approved. We all were surprised and we all continued to wonder, waiting for the President or for time to advise us of the urgent reasons that actuated him. From the fact that in his message to the Congress he declares that the legislation we are considering clearly violates the Hay-Pauncefote treaty, and that he asks for its repeal in support of the foreign policy of the administration, are we not justified in concluding that our differences with Great Britain had some connection with the "other matters of even greater delicacy and nearer consequence"?

In this connection, Mr. President, I also call attention to the action of the President recently, when a committee representing the suffragettes called upon him asking his assistance to their cause. He then said he was unable to grant the request of our petitioning sisters because the Baltimore convention was silent so far as woman suffrage was concerned. At that time he, as the head of his party, was bound also by the fact that the platform did not advocate suffrage—so he said—but on the question of tolls, though the platform favored their exemption, he refuses to follow it. "Consistency, thou art a jewel."

The message which the President submitted to Congress, to which I have just made reference, was eloquent, feelingly made, extremely smooth and graceful, superb in diction, strong in expression; all in all, it was decidedly the most remarkable state paper ever submitted to the judgment of this Nation.

The distinguished Senator from Missouri, the chairman of the Committee on Foreign Relations, judging from his recent address on this subject, is not in accord with the Executive. He does not believe that the act of the Congress exempting coastwise vessels from tolls is in violation of the treaty, and he is of opinion that under the treaty the Congress has the right to exempt from tolls all vessels that carry our flag; and he is right. I was surprised at one statement that the chairman of the Committee on Foreign Relations made, and that was this:

We have now taken up this question on our own initiative. No foreign country is making any effort or in any wise attempting to exercise an influence, so far as I know, intended to affect the legislation upon which we are now engaged.

Without detaining the Senate by reading it, let me state the fact that our diplomatic correspondence reveals, what the country well knows, that over a year since Great Britain made her personal protest against the Panama Canal act, insisting, in effect, that it discriminates against Canadian vessels doing business with Pacific ports, because Canadian shippers would send their goods to American ports and to American vessels, and also because it would increase the rates which all other vessels would have to pay in order to make the canal meet expenses.

Mr. President, what does our President mean when he says in his said message, speaking of the treaty—

Its meaning is not debated outside the United States. Everywhere else the language of the treaty is given but one interpretation, and that interpretation precludes the exemption I am asking you to repeal.

It is not often that President Wilson is mistaken on questions relating to existing facts, but when he says that "everywhere else the language of the treaty is given but one interpretation," it is quite evident that he has not been correctly advised. In England, in Germany, in France, eminent legal authorities have not hesitated in saying, in substance, that the tolls exemption is in entire harmony with our treaty obligations. The London Law Review, a publication of acknowledged authority in England, commanding the respect of the English bar, discussing this matter, concludes as follows:

To sum up, it is reasonably arguable:

(a) That the United States can support its action on the precise words of the material articles of the treaty; that its case is strengthened by reference to the preamble and context, and that its case is difficult to challenge on grounds of general justice;

(b) There is no international obligation to submit the construction of its legislative act by any process of arbitration; and

(c) That any aggrieved party has an appropriate, and impartial, and a competent tribunal in the Supreme Court of the United States.

Other authorities, learned lawyers, constitutional writers, international authors, in London and in Germany have expressed the same view.

Mr. President, the canal-tolls question, as it presents itself to me, is one of supreme importance to all of our industrial enterprises, for, if we pass this repeal bill, we strike a terrible blow to our home factories, mills, industries, and labor. President Wilson has inaugurated it, but all of the shipping interests of all foreign lands are interested, and are engaged in endeavoring to bring about the repeal of the tolls-exemption act. Why? Because it would give to foreign manufactures and foreign ships

the entire market of all the Pacific coast—ours and southward of ours. Why? Because it would enable them to reach Pacific coast ports and sell their products at prices that would make it impossible for our manufactures, for our industries of every kind and description, including iron, coal, lumber, and all the products of the factories and mills of our eastern States, of Virginia, West Virginia, Alabama, Texas, and Louisiana—and really the entire Mississippi Valley—to ever reach the markets of the Pacific coast, or to compete for the wonderful trade the construction of the canal will inevitably open up to the west thereof. Why? English, German, French, and other foreign shipowners are enlarging their tonnage, building new vessels, organizing new crews. Why? Because they are calculating to carry heavy cargoes from the Pacific coast and beyond over to Europe, cargoes from Pacific lands as well as our Pacific ports, consisting of wheat, flour, lumber, and fruit. When going for these cargoes it will pay them handsomely if they will carry the manufactured goods of England and the Continent at a very moderate rate on the outward-bound trip, expecting to reap a rich harvest on the homeward journey, and in addition to that, all those vessels will be aided by the fact that their governments pay their tolls, while our ships engaged in over-seas commerce will have to pay tolls for going through our canal. I hope such may not long be the result of our legislation.

Mr. President, for a short time I want to discuss the Clayton-Bulwer treaty, and what I shall say referring to it is equally applicable in many respects to the Hay-Pauncefote treaty. I am not going to read those treaties now, but I ask that certain portions of them may be incorporated in my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

EXTRACTS FROM THE CLAYTON-BULWER TREATY OF APRIL 19, 1850.

The Governments of the United States and Great Britain hereby declare that neither the one nor the other will ever obtain or maintain for itself any exclusive control over said ship-canal, agreeing that neither will ever erect nor maintain any fortifications commanding the same or in the vicinity thereof, or occupy, or fortify, or colonize, or assume or exercize any dominion over Nicaragua, Costa Rica, the Mosquito Coast, or any part of Central America.

The Governments of the United States and Great Britain, having not only desired, in entering into this convention, to accomplish a particular object, but also to establish a general principle, they hereby agree to extend their protection, by treaty stipulations, to any other practicable communications, whether by canal or railway, across the Isthmus which connects North and South America, and especially to the interoceanic communications, should the same prove to be practicable, whether by canal or railway, which are now proposed to be established by the way of Tehuantepec or Panama.

Mr. GOFF. Mr. President, by this treaty the United States departed for the first time from the principles enunciated in the Monroe doctrine, and I indulge the hope that no such deviation will ever hereafter be made. Had the treaty not included the language of the second extract from it, to which I have referred, the United States would have been relieved of a great deal of controversy and of a wonderful amount of vexatious correspondence. That doctrine, announced by President Monroe, but in fact formulated by John Quincy Adams, was simply a notice to all European powers that the United States would not permit any of them to interfere on this hemisphere and would not tolerate colonization by any of them on any portion of South American soil.

The fact is that the Clayton-Bulwer treaty, from the very time of the exchange of ratifications, has been persistently and continuously violated by Great Britain. Will anyone controvert it? The United States intended by this treaty to obtain from Great Britain a surrender of all her claims to territory in or sovereignty over any part of Central America, and yet almost immediately after the ratification of said treaty we find that Great Britain was extending her colony on the Honduras coast, as well on the Mosquito Islands, and was also claiming jurisdiction over the islands near by. The United States protested, Great Britain continued to disregard the treaty, and finally, in 1856, at the suggestion of the United States, a convention was held in London for the purpose of adjusting, if possible, the then existing differences. The claim of Great Britain was not sustained, and a new treaty substantially in accord with the insistence of the United States was prepared and ratified by the United States, but finally rejected by Great Britain, and the old controversy thus restored continued to disturb our diplomatic relations with that country.

On October 22, 1857, Lord Napier, in writing to Lord Clarendon concerning the Clayton-Bulwer treaty, said, relating to an interview he had had with President Buchanan:

The President commenced his observations by referring to the Clayton-Bulwer treaty as a fruitful source of misunderstanding between the contracting parties. Without that treaty the United States and Great Britian might long since have cooperated for the welfare of Central America. That treaty had never been acceptable to the people of the United States, and would not have obtained a vote in the Senate, had the least suspicion existed of the sense in which it was to be construed by Great Britain; yet if it were now the intention of Her Majesty's Government to execute it according to the American interpretation, that was as much as he could insist upon.

* * * * * * *

I added that his excellency was well aware of the convictions conscientiously held in England respecting slavery, and of the respect which Her Majesty's Government owed to public feeling on that subject. I might plainly affirm that a principal motive in framing securities for the after government of the Bay Islands had been the apprehension that, when relinquished by the English authorities, those islands would be settled by planters from the United States, who would bring their negroes with them, and thus establish slavery on soil which had, justly or unjustly been declared to be a colonial dependency of Great Britain.

This is what President Buchanan says about it in his message of December 8, 1857:

Since the origin of the Government we have been employed in negotiating treaties with that power, and afterwards in discussing their true intent and meaning. In this respect the convention of April 19, 1850, commonly called the Clayton and Bulwer treaty, has been the most unfortunate of all, because the two Governments place directly opposite and contradictory constructions upon its first and most important article. Whilst in the United States we believe that this treaty would place both powers upon an exact equality by the stipulation that neither will ever "occupy, or fortify, or colonize, or assume, or exercise any dominion" over any part of Central America, it is contended by the British Government that the true construction of this language has left them in the rightful possession of all that portion of Central America which was in their occupancy at the date of the treaty; in fact, that the treaty is a virtual recognition on the part of the United States of the right of Great Britain, either as owner or protector, to the whole extensive coast of Central America, sweeping round from the Rio Hondo to the port and harbor of San Juan de Nicaragua, together with the adjacent Bay Islands, except the comparatively small portion of this between the Sarstoon and Cape Honduras. According to their construction, the treaty does no more than simply prohibit them from extending their possessions in Central America beyond the present limits. It is not too much to assert, that if in the United States the treaty had been considered susceptible of such a construction, it never would have been negotiated under the authority of the President, nor would it have received the approbation of the Senate. The universal conviction in the United States was, that when our Government consented to violate its traditional and time-honored policy, and to stipulate with a foreign government never to occupy or acquire territory in the Central American portion of our continent, the consideration for this sacrifice was that Great Britain should, in this respect, at least, be placed in the same position with ourselves.

Whilst we have no right to doubt the sincerity of the British Government in their construction of the treaty, it is at the same time my deliberate conviction that this construction is in opposition both to its letter and its spirit.

Under the late administration negotiations were instituted between the two governments for the purpose, if possible, of removing these difficulties; and a treaty having this laudable object in view was signed at London on the 17th October, 1856, and was submitted by the President to the Senate on the following 10th of December.

Mr. Blaine, Secretary of State, writing to Mr. Lowell, minister to England, under date of November 19, 1881, says:

SIR: In pursuance of the premises laid down in my circular note of June 24 of this year touching the determination of this Government with respect to the guaranty of neutrality for the interoceanic canal at Panama, it becomes my duty to call your attention to the convention of April 19, 1850, between Great Britain and the United States, commonly known as the Clayton-Bulwer treaty.

According to the articles of that convention the high contracting parties, in referring to an interoceanic canal through Nicaragua, agreed "that neither the one nor the other will ever obtain or maintain for itself any exclusive control over said ship-canal, and that neither will ever erect or maintain any fortifications commanding the same or in the vicinity thereof." In a concluding paragraph the high contracting parties agreed "to extend their protection by treaty stipulations to any other practical communications, whether by canal or railway, across the Isthmus * * * which are now proposed to be established by way of Tehuantepec or Panama."

This convention was made more than thirty years ago under exceptional and extraordinary conditions which have long since ceased to exist—conditions which at best were temporary in their nature and which can never be reproduced.

The remarkable development of the United States on the Pacific coast since that time has created new duties for this government, and devolved new responsibilities upon it, the full and complete discharge of which requires in the judgment of the President some essential modifications in the Clayton-Bulwer treaty. The interests of Her Majesty's Government involved in this question, in so far as they may be properly judged by the observation of a friendly power, are so inconsiderable in comparison with those of the United States that the President hopes a readjustment of the terms of the treaty may be reached in a spirit of amity and concord.

The respect due to Her Majesty's Government demands that the objections to the perpetuity of the convention of 1850, as it now exists, should be stated with directness and with entire frankness. And among the most salient and palpable of these is the fact that the operation of the treaty practically concedes to Great Britain the control of whatever canal may be constructed.

The insular position of the home government, with its extended colonial possessions, requires the British Empire to maintain a vast naval establishment, which in our continental solidity we do not need, and in time of peace shall never create. If the United States binds itself not to fortify on land, it concedes that Great Britain, in the possible case of a struggle for the control of the canal, shall at the outset have an advantage which would prove decisive, and which could not be reversed except by the expenditure of treasure and force. The presumptive intention of the treaty was to place the two powers on a plane of perfect equality, with respect to the canal, but in practice, as I have indicated, this would prove utterly delusive, and would instead surrender it, if not in form, yet in effect, to the control of Great Britain.

The treaty binds the United States not to use its military force in any precautionary measure, while it leaves the naval power of Great Britain perfectly free and unrestrained; ready at any moment of need to seize both ends of the canal, and render its military occupation on land a matter entirely within the discretion of Her Majesty's Government.

The military power of the United States, as shown by the recent Civil War, is without limit, and in any conflict on the American continent altogether irresistible. The Clayton-Bulwer treaty commands this government not to use a single regiment of troops to protect its interests in connection with the interoceanic canal, but to surrender the transit to the guardianship and control of the British navy. If no American soldier is to be quartered on the Isthmus to protect the rights of his country in the interoceanic canal, surely, by the fair logic of neutrality, no war vessel of Great Britain should be permitted to appear in the waters that control either entrance to the canal.

In speaking of this treaty, ex-Secretary of State John W. Foster says (pp. 456-458, A Century of American Diplomacy, 1901):

Mr. Clayton, then Secretary of State, entered into negotiations with the British minister, the result of which was the treaty by which the two governments stipulated for a joint guaranty of the canal to be constructed; and agreed not to occupy, fortify, colonize or assume or exercise any dominion over any part of Central America. The treaty was ratified without much discussion, in the belief that it would insure at once the construction of the canal and would exclude British colonization and protectorates from Central America; but it was no sooner published than it began to be a source of dispute as to its scope and meaning. Secretary Blaine, in 1881, described it as "misunderstandingly entered into, imperfectly comprehended, contradictorily interpreted, and mutually vexatious." President Buchanan said, in 1857, that if in the United States the treaty had been considered susceptible of the construction put upon it by Great Britain, it never would have been negotiated, nor would it have received the approbation of the Senate. Mr. Cass, who was a member of the Senate at the time it was ratified, has made a similar declaration.

The American expectation as to the early construction of the canal, with the aid of British capital, was disappointed; and for the next ten years our secretaries of state were occupied in bringing the British Government to an observance of its engagements respecting colonization and protectorates. The treaty marks the most serious mistake in our diplomatic history, and is the single instance, since its announcement in 1823, of a tacit disavowal or disregard of the Monroe doctrine, by the admission of Great Britain to an equal participation in the protection and control of a great American enterprise. The wisdom of that doctrine is most signally illustrated in the effects of this single disavowal, the heated discussion engendered, and the embarrassments which the treaty has brought to this Government, and from which it still suffers.

The Clayton-Bulwer treaty was, in my judgment, a fearful mistake, as unfortunate in what it omitted to say as well as in what it did say. As I read it, the United States was bound not to use its military force in matters relating to the canal, while Great Britain was free and unrestrained as to the use of her naval power. Had the canal been built she could at any time have seized both ends of the canal with her battleships, but if an American soldier was needed to protect the interests of his country, he was prohibited from doing so.

Why that treaty was not declared abrogated is to me one of the mysteries of diplomacy. Likely our representatives deemed it best by convention and treaty distinctly to abrogate it rather than to submit to questions that might have been raised in an international controversy. But, nevertheless, the treaty was dead, and there are many who think it should have been so declared by congressional enactment. A careful consideration of the correspondence between Mr. Webster, Mr. Lawrence, Lord Malmesbury, Mr. Marcy, Mr. Buchanan, Lord Clarendon, Lord Napier, the Earl of Clarendon, Gen. Cass, Mr. Fish, Mr. Lowell, Lord Granville, and Mr. Blaine, commencing in 1851 and terminating in 1882, will, I think, compel concurrence with the view I have expressed—that it would have been entirely proper, eminently just and honorable, for the Congress to have so legislated.

Mr. President, there are a number of methods by which treaties may be abrogated or amended, and sometimes they work their own repeal. Charles Henry Butler, in his standard work entitled "Treaty-making Power of the United States," volume 2, page 129, section 384, discussing this matter, says:

In the cases cited which have involved treaty stipulations and Federal statutes, treaties have either been, or have not been, carried into effect by subsequent legislation of Congress; or statutes subsequently passed in conflict with treaties have been held to be constitutional, and to have superseded or modified the treaty, although in many instances clearly in violation of the stipulations therein contained. There are other instances, however, in which the court has held that the treaty is not superseded or modified, but is entirely abrogated and ceases to bind either nation or the citizens and inhabitants thereof. Treaties, which expressly so provide, may expire by limitation of time, determined by the treaty itself; they may also be abrogated, so far as the United States is concerned, by congressional action in several different methods.

First. Either by a formal resolution or act of both Houses of Congress approved by the President, or, in case of his refusal to approve it, passed over his veto by two-thirds of both Houses, in which case it becomes the latest expression of the Legislative department of the Government, and, therefore, the supreme law of the land, and the Executive department is bound to carry out the wishes of the Legislature in express terms.

Second. By legislation, not abrogating the treaty in terms, but terminating the relations existing thereunder, or rendering them impossible of continuance, by enacting legislation hostile thereto, or conflicting therewith, and which may supersede the treaty as to the special stipulations affected, or in effect abrogate it altogether.

Third. By legislation, which, while it does not directly, in terms, abrogate the treaty, either in whole or in part, or by direct words suspend the operation of any of the provisions, so conflicts therewith that the doctrine of repeal by implication applies thereto as it would to statutory provisions similarly affected; it having been held by the Supreme Court that when a statute can not be rationally construed without repealing conflicting clauses of a previously existing treaty, the treaty must fall and the statute must remain as the latest expression of the legislative will.

Fourth. By a declaration of war in which case treaties with the hostile power are either by force of the declaration suspended during the war or abrogated altogether.

In the same work, volume 1, page 405, section 266, the author, referring to treaties, quotes from "Story's Commentaries on the Constitution," a work that from 1833 has been a standard authority and guide, as follows:

It is, therefore, indispensable that they should have the obligation and force of a law, that they may be executed by the judicial power, and be obeyed like other laws. This will not prevent them from being canceled or abrogated by the Nation upon grave and suitable occasions; for it will not be disputed that they are subject to the legislative power, and may be repealed, like other laws, at its pleasure, or they may be varied by new treaties.

In "Treaties, Their Making and Enforcement," by Samuel B. Crandall, pages 116-7, it is stated:

That a treaty may repeal a prior act of Congress, has been frequently affirmed in individual opinions both of the justices of the Supreme Court and of the attorneys-general. Mr. Justice Harlan, in the recent case of the United States v. Lee Yen Tai, while holding the treaty of March 17, 1894, with China and the act of May 5, 1892, relative to judicial procedure in the deportation of Chinese laborers, to be not inconsistent, observed, "That it was competent for the two countries by treaty to have superseded a prior act of Congress on the same subject, is not to be doubted; for otherwise the declaration in the Constitution that a treaty, concluded in the mode prescribed by that instrument, shall be the supreme law of the land, would not have due effect. As Congress may by statute abrogate, so far at least as this country is concerned, a treaty previously made by the United States with another nation, so the United States may by treaty supersede a prior act of Congress on the same subject."

Another and perhaps the most notable example of the apparent violation of treaties by the United States through congressional action was the exclusion of the Chinese from our ports, notwithstanding treaty stipulations as to reciprocal rights of subjects of the Chinese Empire and citizens of the United States to freely come and go, each in the territory of the other. The Chinese exclusion acts were claimed by many to be in direct violation of these treaty stipulations, and the various acts were tested in the courts and numerous decisions were rendered as to their validity and constitutionality. The courts uniformly sustained the acts as constitutional. In 1889 Judge Field delivered a leading opinion of the Supreme Court on this subject in one of the Chinese cases, from which the following extract is taken:

The validity of this act, as already mentioned, is assailed as being in effect an expulsion from the country of Chinese laborers in violation of existing treaties between the United States and the government of China, and of rights vested in them under the laws of Congress. The objection that the act is in conflict with the treaties was earnestly pressed in the court below, and the answer to it constitutes the principal part of its opinion. Here the objection made is, that the act of 1888 impairs a right vested under the treaty of 1880, as a law of the United States, and the statutes of 1882 and of 1884 passed in execution of it. It must be conceded that the act of 1888 is in contravention of express stipulations of the treaty of 1868 and of the supplemental treaty of 1880, but it is not on that account invalid or to be restricted in its enforcement. The treaties were of no greater legal obligation than the act of Congress. By the Constitution, laws made in pursuance thereof and treaties made under the authority of the United States are both declared to be the supreme law of the land, and no paramount authority is given to one over the other. A treaty, it is true, is in its nature a contract between nations, and is often merely promissory in its character, requiring legislation to carry its stipulations into effect. Such legislation will be open to future repeal or amendment. If the treaty operates by its own force, and relates to a subject within the power of Congress, it can be deemed in that particular only the equivalent of a legislative act, to be repealed or modified at the pleasure of Congress. In either case the last expression of the sovereign will must control.

The effect of legislation upon conflicting treaty stipulations was elaborately considered in the Head Money Cases, and it was there adjudged "that so far as a treaty made by the United States with any foreign nation can become the subject of judicial cognizance in the courts of this country, it is subject to such acts as Congress may pass for its enforcement, modification, or repeal." This doctrine was affirmed and followed in Whitney v. Robertson (124 U. S., 190, 195). It will not be presumed that the legislative department of the government will lightly pass laws which are in conflict with the treaties of the country; but that circumstances may arise which would not only justify the government in disregarding their stipulations, but demand in the interests of the country that it should do so, there can be no question. Unexpected events may call for a change in the policy of the country. Neglect or violation of stipulations on the part of the other contracting party may require corresponding action on our part. When a reciprocal engagement is not carried out by one of the contracting parties, the other many also decline to keep the corresponding engagement. In 1798 the conduct toward this country of the government of France was of such a character that Congress declared that the United States were freed and exonerated from the stipulations of previous treaties with that country.

Relating to this treaty, Butler, in his work on "The Treaty-making Power of the United States," supra, says, on page 138, volume 2:

> This question may come before the people of the United States at any time, in regard to the Clayton-Bulwer treaty of 1850 with Great Britain. By this treaty this country and Great Britain are apparently pledged to a joint ownership and control of any trans-Isthmian canal connecting the Atlantic and Pacific Oceans. The treaty contains no provision for its abrogation. It was entered into under peculiar circumstances, at a time when the condition of this country was very different from what it is to-day, and the events which were anticipated in 1850, in view of which the treaty was made, have never transpired. It was undoubtedly a mistake on the part of the Executive to make the treaty and of the Senate to ratify it. The question of its abrogation, however, is one which involves consideration of all of the elements enumerated in the preceding section. To the author it seems as though it is purely a political act wholly within the domain of Congress; that if the Executive can not obtain the abrogation or proper modification of the treaty through friendly diplomacy, that Congress must eventually determine the question; and if, in the best judgment of the Legislative department of the Government, the present and future safety of the country demands the abrogation of that treaty, Congress has not only the legal power but also the moral right to abrogate it, and the judicial department of the Government could not, and would not interfere to prevent it.

Now we come to the Hay-Pauncefote treaty.

The part of that treaty really in controversy—and the controversy is a most serious one—reads as follows:

> The canal shall be free and open to the vessels of commerce and of war of all nations observing these rules, on terms of entire equality, so that there shall be no discrimination against any such nation, or its citizens or subjects, in respect of the conditions or charges of traffic or otherwise. Such conditions and charges of traffic shall be just and equitable.

This was an agreement between the United States and Great Britain; no other nation or country was a party to it. The United States stipulated with Great Britain that they, subject to the provisions of the present treaty, shall have and enjoy all the rights incident to such construction, *as well as the exclusive right of providing for the regulation and management of the canal.* The United States, therefore, had the sole and absolute control of the canal, and to me it is inconceivable that they should have deliberately taken into partnership with them concerning the canal—especially in the light of the Monroe doctrine and the experiences under the Clayton-Bulwer treaty—the one nation they had been endeavoring to eliminate from all rights and claims in Central America.

I think it entirely safe to say that the Hay-Pauncefote treaty would never have been ratified by this Senate had there existed the least doubt that the United States was to be master of the situation that would exist after the completion of the canal, with the exclusive right to establish the rules by which it was to be governed, subject only to the understanding that all nations observing said rules should be treated with entire equality in such way as would not discriminate against any of such nations in respect to the conditions or charges relating to traffic, which were to be just and equitable. Are not the rules established by the United States relating to tolls just and equitable to all the nations of the world?

Mr. President, there is only one Nation to which they are not just and equitable, and that Nation is the United States of America. At an enormous expense—in all, nearly $500,000,000—the United States have constructed the canal, and yet the tolls they have provided for its use will for years to come yield a revenue that will be but little more than what will be required to pay current annual expenses, ignoring even interest on the investment and utterly disregarding the matter of profit. Some of the nations of the world expected a toll rate that would not only have provided for the upkeep of the canal, but that also would have yielded an income to the United States at least sufficient to have paid a reasonable interest on the sum expended for its construction. But the United States, in building the canal, intended primarily to provide for their own national convenience and protection, the late Spanish-American War having conclusively demonstrated that it would be the part of wisdom so to do; and secondarily, the desire of the United States was to advance the interest of their own commerce, as also to accommodate and benefit the commerce of the world; hence the low rate of tolls imposed. I doubt if there is another nation that would have so acted. Great Britain, if we judge the present by the past, would not have done so, for she has imposed tolls for the use of the Suez Canal that not only pays all expenses but also handsome dividends. French money built the Suez Canal, but on its completion English money held a controlling interest in its stock and has always dominated it. But the United States, desiring to be fair and equitable, opens the Panama Canal to the vessels of the world, saying to them all, "Partake freely of the advantages we tender you, subject only to our right of absolute control, with the understanding that our flag is forever to float from the point where you enter to the place where you leave the canal and over its fortifications, a signal of ownership, of power, and of sovereignty."

My insistence is that, so far as her own vessels are concerned, her cruisers, transports, and battleships, as well as the ships of commerce carrying her flag, the United States have the right under the treaty to pass them all through the canal without imposing tolls on any of them. Mr. President, will you tell me, will any Senator here advise me, of the method that will or can be adopted for the United States to pay toll on their own vessels passing through their own canal? Will the officials of the canal impose the usual toll, then draw on the Treasury at Washington for the amount thereof, charging the canal with the same, and then at stated times remit to said Treasury the amount in the hands of said officials due the owner of the canal? By that process how much will it cost the United States to pay their tolls?

I can see how there is ground for difference of opinion as to the expediency of passing some of the vessels of commerce free, but I, for one, conclude that it is not only proper but absolutely necessary that we do so, for the purpose of encouraging our own commerce and building up our merchant marine. Unless we do this it is quite evident that our vessels engaged in the over-seas trade will soon disappear from all ports and all waters.

The statements of some of those who took part in and who had personal knowledge of what took place when the treaty was being formulated have been filed with the Committee on Foreign Relations and submitted for our consideration.

Such evidence has been heretofore offered when contentions similar to the one we are now to dispose of were before conventions and arbitrators. A rule has been established concerning them. They are only pertinent when the language of the treaty in question is confusing, when it forces the mind to doubt, and are never considered if the intent of the contracting parties can be ascertained without resorting to them. In our controversies with Great Britain we have heretofore encountered this same method of disposing of contentions relating to our treaties. In "Treaties, Their Making and Enforcement," by Samuel B. Crandall, we find on pages 225–6 the following:

> An interesting use of negotiators' testimony may be found in the proceedings of the mixed commission under Article V of the treaty of November 19, 1794, with Great Britain to determine the St. Croix River and its source under Article II of the treaty of peace. The boundaries of the United States as therein defined began with "that angle which is formed by a line drawn due north from the source of St. Croix River to the Highlands." There proved to be no river in that region then known by that name. Under these circumstances President Adams and John Jay, the surviving American negotiators, made depositions, which were duly admitted in evidence, as to the map used by the negotiators. Likewise a letter written by Franklin was introduced as evidence. Extrinsic evidence of intention can not, however, be accepted in contradiction of a literal and natural interpretation.

Another illustration as to the use of the testimony of those acting as negotiators is found in the action instituted to dispose of certain contentions of Great Britain relating to the Clayton-Bulwer treaty. After the ratification of this treaty, and preceding the exchange or communications of the respective governments relating thereto, statements were filed by the negotiators, in which it was said that the language of article 1 of that treaty was not understood to include the British settlement at Honduras and the small islands adjacent thereto. It was in substance held that such statements could not have the effect intended, as they were prepared after the ratification of the treaty by the Senate, and had not been considered by the treaty-making power. It was stated in said proceedings—which repudiated the claim of Great Britain—that if the facts desired to be ascertained could not be found from the language of the treaty that the statements by the negotiators would be considered, but as the words used clearly expressed the original intent the statements must be excluded. (Crandall, supra, p. 226.)

It will be interesting and instructive, I think, to quote from "Treaties, Their Making and Enforcement," supra, page 224, relative to still another controversy we have had with Great Britain as to the construction of a treaty:

> Article 1 of the treaty of June 15, 1846, between the United States and Great Britain for the establishment of a boundary between their territories west of the Rocky Mountains, provided for the continuation of the forty-ninth parallel westward to the middle of the channel which separates the continent from Vancouver's Island, and "thence southerly through the middle of the said channel, and of Fuca's Straits to the Pacific Ocean." As a matter of fact there proved to be two principal navigable straits—the Canal de Haro and Rosario Strait—leading from the middle of the channel through the archipelago to the Strait of Juan de Fuca. In favor of the British contention for the Rosario Strait, the one nearer the continent, was the fact that a line through the Canal de Haro must proceed for some distance in a westerly direction, instead of southerly, as provided in the treaty. In favor of the American contention was the

general purpose of the treaty, which, as indicated by the treaty itself, had without doubt been to adopt the forty-ninth parallel as the line for the division of the disputed territory, and to allow a deflection from that line only in order to avoid dividing Vancouver's Island. This view had been expressed in the Senate at the time of the ratification of the treaty. William I, German Emperor, acting as arbitrator under Article XXXIV of the treaty of May 8, 1871, after seeking the advice of eminent German jurists, rendered a decision favorable to the United States.

John Hay and Lord Pauncefote, who represented their respective Governments in the negotiation of the Hay-Pauncefote treaty, are dead, and can speak only by the record they have made. The Hon. Joseph H. Choate, who was ambassador to Great Britain, and who aided the two distinguished statesmen referred to in the preparation of said treaty, who is, I am glad to say, still living, has given us his recollection on the subject. Others somewhat familiar with the facts connected with the formulation of said treaty have advised with us concerning the same. It will be observed that respectively they give it as their *opinion* that if Mr. Hay and Lord Pauncefote were alive they both would say that the exemption of coastwise ships from the payment of tolls would be in conflict with the treaty. The *opinions* of such eminent men, able and honest as all will concede, are entited to great weight and due consideration, as also *are the words of the treaty* used to express the intent of the parties thereto, which, when taken in connection with the statement of Mr. Choate, which I now quote, "I venture to say that in the whole course of the negotiations of this particular treaty no claim, no suggestion, was made that there should be any exemption of anybody," demonstrates that the usual meaning of said words should be resorted to in order to properly construe the treaty.

Mr. President, let us bear in mind that the canal is not open to all nations, and never was intended to be open to all nations, but open only to those nations "observing these rules." How is that to be ascertained? I presume before the canal is thrown open to the traffic of the world that our Government will have some understanding relating to that subject with the nations desiring to use the canal. The nations of the world engaged in over-seas commerce will express to our Government their intention to observe these rules. Has any of them as yet done so? Not one; and under existing circumstances the only nation in all the world that will not be entitled to the use of the Panama Canal is Great Britain, because in advance she has objected to the rules and indicated that she does not intend to observe them.

Mr. President, as I read the Panama Canal act which we are asked to repeal, it was and is most commendable legislation. Its object, so far as it relates to tolls, is to force real competition in freights, which will aid our producers and shippers and assist in the reduction of the cost of living, at the same time fostering our domestic commerce and forcing the reduction of rates by excluding entirely from the canal all vessels owned and operated by railroads.

Now, Mr. President, it is quite apparent that but for this last provision relating to railroads Great Britain would never have raised this contention. As a matter of fact, she had acquiesced in the releasing of our coastwise vessels, stipulating only for proper regulations regarding them, and she had agreed that they should go through the canal free, but when the Congress in its wisdom saw proper to include with that to which she had so consented a provision that ships owned by Canadian railroads should be prohibited from entering the canal, Great Britain, on the appeal and demand of Canada, presented the contention we are now considering.

The Canadian railroads were affected and the Canadian managers thereof were greatly disturbed, as were those who controlled our own transcontinental railroads. They protested in vain. I commend the Congress for the wisdom it displayed in resisting them. Great Britain felt "constrained" in behalf of her Canadian Provinces to submit this contention, and the Congress felt constrained to decide that it was without merit.

As the law now stands, as it will remain, even should this repeal bill pass, the ships of the United States engaged in the commerce of the world—all of their ships excepting only those engaged in our coastwise trade—will be the only ships that sail "over seas" that will pay toll for passing through the Panama Canal. Why do I say that? Because England, Germany, France, and Italy now pay all tolls charged against the ships of their respective countries for using the Suez Canal and are arranging to do the same concerning like tolls imposed upon them for passing through the Panama Canal. And Japan is preparing to do the same, as the Senator from Utah [Mr. SMOOT] advises me, for which I thank him. Our ships are struggling now under a burden that I wonder they bear so well as they do. Yet they must pass through the canal owned by their country, and whose flag they carry, branded as the only vessels that, in fact, will pay tolls.

It seems, then, Mr. President, that we have built this canal for the benefit of all the nations of the earth, save only one; for the tonnage of all lands, save only one; for the glory of all flags, except only one, and that one the flag of our country. Mirabile dictu!

I believe the day is coming, Mr. President, fast coming, when all our ships will go through free. If this Congress does not so speak, then, after the people of this Nation have spoken, there will be a Congress that will.

You may call such legislation a subsidy if you please, which, technically, it is not, but it will not scare me, for I believe that by and through such governmental policy all other nations have prospered, and I know, also, that their prosperity has driven our ships from the waters of all oceans. I want to encourage our ships, to add to their number, so that in time they will equal in tonnage and dignity those of any other nation of the world.

I would aid our shipbuilders and our shippers as I have just indicated. I would encourage individuals and companies to employ their capital in building ships and in sending them out on the seas, and I would want them to indulge the hope that they would meet with success and be able to declare reasonable dividends on the money they so invest. Such legislation should not, and would not, be permitted to encourage the formation of trusts, for it will always be under the control of the Congress, and will be simply a just recognition of the difficulties under which our ships and our commerce now contend.

Mr. President, I, for one, believe that it is right that the policy of this Government should be such as to indicate to those of our citizens who have the daring to assume the risks of continuous struggles with nature's elements upon the seas, as also the dangers they will encounter upon the land at home by hostile legislation, that they will at least have the sympathy and encouragement of the Government whose flag their ships will float, as do the vessels of all other nations of civilization. If we but hasten the construction of additional ships, and then by legislation speed their going and their coming, then the Nation that built it will realize some of the advantages that the Panama Canal offers to the world.

Mr. President, am I wrong when I intimate that the time has come for us to speak plainly, to have no further misunderstandings? Is not our experience as to this matter, as shown by our diplomatic troubles relating thereto from 1850 to 1914, sufficient? For me it is. From the early formation of our Government we have been confronted with questions similar to this. By the adoption of our Constitution it became our duty to dispose of others very like them, to which we were obligated by colonial agreements. Is there no way by which we can escape them? Have we not faithfully endeavored to respect our promises? Our fathers knew how to proceed under like circumstances. Washington, Adams, and Jefferson approved of the abrogation of some treaties by congressional legislation. The Supreme Court has repeatedly held that method to be proper and constitutional. It may not be best to adopt such methods as a rule, but there are instances, and this is one of them, where the exhibition of patience has ceased to be a virtue and where additional delay will be a national crime.

I have already referred to the decisions of the Supreme Court sustaining the abrogation of treaties by congressional enactments. Has not the time come for another abrogation? I do not believe that it will be dishonorable to so act, as some have intimated it would be. That which is authorized by the Constitution of the United States and suggested by those who made it can but be honorable. If by our legislative acts anyone has cause of action against us, we will not endeavor to evade our responsibility, but will bow obedience to the decree of the Supreme Court of the United States or willingly yield to the judgment of a properly constituted international tribunal.

The time has come for us to declare that this contention with the subtle diplomacy of Great Britain, now over half a century old, should cease. We ought not longer to submit to the uncalled-for interference of a foreign nation in our domestic affairs. Let us throw off the yoke, the burden of which we never should have borne. Let us declare our commercial and industrial independence in a manner that will not admit of doubt, so that all the world will know that it is our intention to hereafter manage our own affairs as to us seems right and just, inviting no outside suggestions and permitting no foreign interference. Let us proclaim that the Monroe doctrine is not dead; that it is no longer sleeping; that it will in the future be en-

forced by the United States as they declared it would be when it was promulgated.

Let us abrogate the Hay-Pauncefote treaty by an act of this Congress. Should this Congress refuse so to do; should it, instead of so acting, repeal the provision of the statute of 1912, exempting coastwise vessels from the payment of tolls, thereby continuing our embarrassing and humiliating entanglements with a nation that has been unjust to us from the landing of the Pilgrims and the coming of the Cavaliers; that has been jealous of us from our Declaration of Independence; that has always sought to retard our progress as we have journeyed along the pathway leading from colonial weakness to national greatness, then the voice of the people will be heard when next the ballots fall and a Congress will convene here that will heed the demands made upon it.

Mr. President, if it be true that our Panama Canal tolls act is in conflict with the Hay-Pauncefote treaty, then that act, so far as that question is concerned, abrogates that treaty. You can not escape that conclusion. I submit it to the consideration of those who claim that the legislation of 1912 is in violation of the Hay-Pauncefote treaty. In that connection I have called attention to the decisions of the Supreme Court, in which that great tribunal has held that if a legislative enactment passed subsequent to the ratification of a treaty is in conflict with the treaty, the treaty stands abrogated. Suppose we repeal the act, would that restore the treaty?

Does the repeal of an act, without words in the repealing act, the effect of which is to restore former legislation, have such an implied effect? You can find no authority for any such contention. Mr. President, what a Pandora's box is to be opened up if this Congress indorses the request of the President!

Mr. President, from the time that Columbus landed on a point near where the city of Colon now is, in the year 1502, searching for the great passage about which he had dreamed; from the time the Portuguese navigator Galvão, after exploring the Isthmus, concluded that a canal could be constructed and presented his scheme to the King of Spain, and his majesty, profoundly impressed, as he was, felt himself constrained for political reasons to suppress that scheme, questions relating to a canal through the Isthmus have attracted world-wide attention. It seems strange to say, but it is a historical fact, that for long years in Spain the suppression of schemes looking to the construction of a canal across the Isthmus was resorted to, and the severest penalties imposed upon anyone who would dare suggest it. At that time Spain had dominion over the Isthmus, but Spain feared revolution, as well as interference by other nations. While she so hesitated, while she imposed these penalties, she was quietly working to commence the construction of the canal. In the history of Spain it clearly appears that a fund was being provided which the Government believed would justify it in commencing the construction of a canal in 1521.

Before that time arrived the revolution in the Isthmus resulted in the independence of New Granada, and Spain lost her possessions in Central America. For many years thereafter questions relating to a canal were not discussed. Then came the time when there were grants, subgrants, concessions, subconcessions, and treaties, here, there, and everywhere, relating to the construction of an isthmian canal.

After this, in 1878, Colombia gave permission for the construction of a canal virtually from the bay, where Colon is now located, to the Gulf of Panama. Recall that year, 1878, and remember that the Clayton-Bulwer treaty was supposed to be then in force. With that grant De Lesseps, under French auspices, commenced the work of the canal. There was no serious objection to that by either Great Britain or the United States. During that period of French effort we had the first hiatus in our contentions with Great Britain about the Clayton-Bulwer treaty, and that period of respite lasted down to the time when the French made a miserable failure of it; when the reorganized company also failed, and the courts appointed a receiver for it. The appointement of the receiver had a revivifying effect upon our British friends, relative to diplomatic correspondence. It has really always been a surprise to me, and I have been unable to account for the fact, that the authorities of this Government having in charge our foreign relations ever consented to the revival of that correspondence, or ever admitted that there was a breath of international life in the Clayton-Bulwer treaty.

Mr. President, we own the Canal Zone; it is ours for all time for purposes relating to the canal; and no nation will be permitted to question our right or our title to it. We will fortify and defend it against the world, and should there ever arise an issue concerning our right so to do, there are other nations that *quoad* that matter will be our allies. We will have but one flag there, but we will float many of that one kind. It will float as the ships enter, and will greet them all along the way. Let it fly, Mr. President, from that lofty summit now in the Canal Zone—then part of Darien, afterwards a portion of Panama—where in 1511 Balboa, traversing the interior of that wilderness, believing that he would find the way that led to the northwest outlet, stood upon a lofty peak, which he and his adventurous friends had ascended and in wonder and exaltation looked for the first time upon the waters of the great Pacific. That pinnacle should float our flag, and I trust it will. Our flag should not only greet the incoming vessel, but it should at the exit cheer it on its journey to the marts of the world.

Mr. President, think of the many ships that our flag will welcome, of the many salutes that it will receive! That flag, Mr. President, will speak to the men who man those ships as no other flag can speak. That flag is not dumb; it talks; it typifies much, and many understand what it says and what it means. There will be many men of many minds, of many lands and many climes, of many colors and of many creeds, passing on ships flying many flags, and many of them, seeing our flag for the first time, will greet it with bounding hearts and brimming eyes, for in the distant lands from whence they come they have heard talismanic legends and wonderful stories of it, for the glories of that flag are everywhere known, and its fame has gone forth to the uttermost parts of the earth.

Last summer, Mr. President, I found myself in Naples, that beautiful, busy port on the Mediterranean. To see and to learn and to know, I passed considerable time along its numerous docks and wharves, where many, many ships of all kinds come and go to many, many lands. I found numerous nationalities represented there, strange crafts with strange crews, and I heard a bewildering babel of voices. I gazed upon apparently a countless number of flags, floating from ships loading and unloading wonderful cargoes. I saw thousands of men toiling in that work that goes on day and night, season in and season out. I went here, there, and everywhere looking for a flag that my eyes were longing for, but were not permitted to gaze upon, for I found it not. In all that multitudinous array of ships and flags I did not see a vessel that carried our flag.

Why was that so? Mr. President, we will talk about the cause of it at another time.

But during one of my visits along the coast line of that wonderful harbor, admiring those magnificent quays where the commerce of the world is landed and exchanged, I realized that something was profoundly moving that great heterogeneous multitude, toiling that those composing it might live. I did not understand it. I could see nothing that explained it. I could hear nothing that would account for it. At last I understood it. Work ceased, whistles blew, bells were ringing, men were seeking positions controlling a view of the outer harbor of the Mediterranean Sea. A great steamer is approaching. I looked and the picture was lovely. It filled my soul with joy, for it was altogether beautiful and fair to gaze upon. High aloft, floating proudly, representing power and dignity, was the emblem of our Union, the starry banner of our country, the flag among flags, the one indescribable and indestructible!

I had heard that flag cheered before, but never, Mr. President, with wilder enthusiasm than that motley crowd gave it in that far-away port. They waved at it, they shrieked at it, they threw kisses at it; they were deeply moved, and so was I.

Mr. President, under such circumstances one's heart beats very loud, and his pulses are apt to run wild. Such tribute to his flag, such honor to his country, such recognition of its greatness and its justness indicated that in all lands there is appreciation of the fact that among all nationalities ours is the hope of civilization, and that there is one flag—your flag, Mr. President, our flag, my flag—that stands for all that is worth living for, that speaks for all that is grand of human thought and all that is great of human action. Glorious, exalted beyond description, is that flag—the only flag, Mr. President, that should control the destiny of the grandest gift that, since God said "Let there be light," and there was light, a nation has ever given to the nations of the world—the Panama Canal.

CHESAPEAKE & DELAWARE CANAL.

Mr. SAULSBURY. Mr. President, it has seemed to me that while we are all so much interested in matters relating to canals it might be well for us to familiarize ourselves somewhat with those canals in which we have a large interest which are nearer home. I have had the honor to introduce and have referred to the Committee on Commerce a proposed amendment to the river and harbor bill, which provides for the purchase by the Government of the United States of the present small canal between the Delaware and Chesapeake Bays and its enlargement to provide for the great commerce now existing there. It has been somewhat of a pleasure to me to go into the history

of this canal, and I feel it my duty to the people who reside in this great section of the country on the eastern seaboard that I should lay before the Senate the facts which justify the Government of the United States in acquiring this canal, if necessary, by process of condemnation.

Mr. President, the great desirability of connecting the Delaware and Chesapeake Bays was recognized in Colonial times. The second survey for a canal in the American Colonies was made of a route between the Chesapeake Bay and the Delaware River in 1764 and a new survey for this proposed canal under the auspices of the American Philosophical Society was made in 1769. In 1799 a charter was secured for a company to dig the canal, and some work was done, I think, in 1804, but this was suspended, a resurvey made in 1822, the work of constructing the present canal actively begun in 1824, and on July 4, 1829, water was let into the canal, which, when constructed, was 13§ miles in length, with a width at water line of 66 feet, at its bottom of 36 feet, and a depth of 10 feet. The canal had cost $2,250,000, and of this amount the United States Government had contributed $450,000, the State of Pennsylvania $100,000, the State of Maryland $50,000, and the State of Delaware $25,000, making a total of $625,000. The balance was obtained from citizens of these States.

CANAL GREAT TIMESAVER.

A mere glance at the map of the Delaware, Maryland, and the Virginia Peninsula and the location of the great cities of Philadelphia, of Wilmington, and of Baltimore will show how desirable this canal, less than 14 miles long, was for the purpose of trade and transportation. Railroads were yet to be constructed. The only method of travel between Baltimore and Philadelphia was by stage coach along the turnpikes or by water out and in the Delaware and Virginia Capes. The distance to Philadelphia from Baltimore by water was 420 miles. The route through the canal reduced this to 112 miles, shortening the distance by 308 miles, and the dangers of ocean navigation were avoided.

The saving of time, even now, in the transportation of freight through this canal between Philadelphia or Wilmington and Baltimore is almost as great as it was in 1829, for freight delivered to the small steamers in Philadelphia at 5 o'clock in the afternoon is carried through the canal and landed at Baltimore at 7 o'clock the next morning—only 14 hours—while the average delivery of freight by the railroads between Philadelphia and Baltimore is something like 3 days. It seems strange that, with all our modern appliances and the boasted management of two of the great railroad systems of the East, we have not been able in 80 years to better much the means of freight transportation in one of the most thickly populated portions of the Union and that we have failed to this time to take advantage of the natural opportunities for traffic and the easy distribution of the necessities of life which lie just at our doors.

On the Delaware Bay and tributaries and on Chesapeake Bay and its tributaries we have a combined traffic, as shown by the report of the Chief of Engineers of the United States Army, exceeding 50,000,000 tons annually; and if to this the undocumented and unregistered tonnage is added, which includes the vast amount handled daily by thousands of local trading boats, the tonnage is estimated to exceed 100,000,000 tons; and this tonnage is almost equally divided between the two bays, the tonnage of Delaware Bay and River and tributaries for 1912, as I compile it from the Engineer's report, aggregating 26,267,335 short tons, while the tonnage on the Chesapeake Bay and tributaries, which I am not sure is as accurate as the other figures, and in some respects is possibly duplicated, amounts to 36,333,489 tons.

In 1904 (H. Rept. No. 2725, 58th Cong., 2d sess.) the combined tonnage of the two bays and tributaries was stated to be almost exactly 50,000,000 tons, and from a statement of the Department of Commerce, Bureau of Navigation, the registered tonnage, represented by 4,391 sailing vessels, steam vessels, and barges, was six hundred and ninety-two thousand and some hundred tons.

The population of the States to be immediately benefited by the canal is about one-sixth of the total population of the United States and estimated at 14,092,627 people.

A LONG-CONSIDERED PROJECT.

The project of an adequate canal connecting the waters of Delaware and Chesapeake Bays has been considered so long that there is a vast mass of official information readily available from which to obtain all information desired on the subject. In 1812, when the Madison administration projected a comprehensive system of internal and coastwise canals, both for commercial and defensive purposes, such canal was approved.

A committee appointed at the first session of the Fifty-seventh Congress reported that the Chesapeake & Delaware Canal, as built in 1829, was encouraged and completed largely because of the realization at that time of the great advantage it would have been during the War of 1812, when the English fleets ravaged the shores of Delaware and Chesapeake Bays and destroyed this Capitol itself.

UNTOLD VALUE IN TIME OF WAR.

Its adaptation for national defense has never been questioned, and this line is now practically assured against attack by foreign fleets because on the Delaware end two new forts have been constructed with modern guns commanding the entrance to the Delaware River below the eastern terminus of the canal, while its western end is protected by the defenses of the Chesapeake Bay.

In 1886 Col. Craighill, of the United States Engineer Corps, reported:

> No argument is necessary to show the great value in time of war with a maritime power of such an interior line of communication between the great Chesapeake and Delaware Bays and their tributary streams as this canal would be.

The Committee on Railways and Canals of the House in that year said:

> Its entire feasibility has been definitely determined by three Government surveys ordered by Congress.

And President Arthur, in forwarding the report of the Secretary of the Navy, invited the attention of Congress to his recommendations, in which the Secretary said:

> To secure the combined commercial and military advantages which these avenues for merchant and naval vessels would afford, the work should be immediately begun and deliberately and economically prosecuted, and not left to be done hastily and expensively in an emergency.

The committee of the House in 1886 recommended the appropriation of $1,000,000 to begin the work on this canal, and in its report quoted from the report of Capt. Turtle, made to the Forty-second Congress, second session, as follows:

> It will be doubted by no one that a deep-water connection between the two bays would be of vast importance in the contingency of war with a maritime nation. Such a connection would provide a means of concentrating the floating defenses of the two bays, and, besides, would render more secure the communication between the naval stations at Philadelphia, Norfolk, and Washington. Vessels defending ports have two offices to perform, the one being to assist in the direct defense, or to prevent capture or occupation by a hostile force, the other being the prevention or breaking up of the blockades.
>
> Without a canal a blockade at the Capes of the Delaware would close the port of Philadelphia, or the blockade at the Capes of Virginia would close the outward commerce of Baltimore and the other ports of the Chesapeake. With the canal built where communication would be secure, neither the ports of Philadelphia nor of Baltimore would be closed, unless an effectual blockade were established both at the Delaware and Virginia Capes. It may be assumed that if a war with one of the great naval powers should arise, and the mere appropriation of the money could provide such a channel of communication between the bays, the amount would be at once provided without hesitation. That would, however, be too late.

Col. Craighill, in forwarding the report from which the above is quoted, said:

> The main objects of such a canal are supposed to be two—the greater facilitation of the defense of a part of the territory of the United States by the opening of an interior short line of communication between the great bays, Chesapeake and Delaware, and the shortening of a great route of foreign and coastwise commerce. Both of these objects seem to be of national importance.

In 1894 the President, under authority given by Congress, appointed a board, among the members of which were Brig. Gen. Casey, Col. Craighill, and Admiral Dewey, then a captain in the Navy, and this board, having exhaustively considered the subject, reported:

> The most feasible route * * * is substantially located upon the line of the existing Chesapeake & Delaware Canal. In the judgment of the board, this route will be best adapted for national defense and will give the best facility to commerce.

The Committee on Railways and Canals of the House, in submitting its report, April 21, 1904, on House joint resolution 137, reported:

> The construction of this ship canal would certainly be the least expensive and most effective method of improving the defense of this locality.

And while treating of the possibility of a coalition of the great naval powers in an attack on the United States with a giant consolidated fleet, reviewed the occurrences of April, 1861, when the present shallow and narrow Chesapeake & Delaware Canal played an important part in the defense of Washington and aided military operations during the whole Civil War.

What occurred in April, 1861, when the railroad bridges north of Baltimore were burned and troops could not be thus sent to Washington, was related before the committee of the Senate recently investigating the value of this canal, and was known to the committee reporting in 1904. Light-draft vessels able to pass through the canal were seized in Philadelphia and along the Delaware River; they were sent through the canal to Perryville, Md.; from there troops were taken by boat to

Annapolis, and thence Washington received reenforcements by rail, which possibly prevented its threatened capture by the Confederate forces. During the whole war the canal was utilized for military purposes and aided greatly in the prosecution of military operations. The committee on the commercial value of the Delaware Ship Canal reported as follows:

The importance and value of the Delaware Ship Canal to facilitate commerce, especially coastwise commerce, will be as great as its military and naval necessity.

WILL ENCOURAGE COASTWISE COMMERCE.

The report showed that 10,000 registered boats were engaged in commerce on the two great estuaries—Delaware and Chesapeake Bays and their tributaries—which had a shore line of 2,500 miles; that the canal would furnish the needed link between the Atlantic coast, north and south, to accommodate both sections, and would be a short and cheap route for the exchange of their products; that it would be of great benefit to the markets of both the North and the South, "stimulating production in the South and cheapening the cost of living in the North"; that it would cheapen the cost of coal to New England, and compared the traffic on the canal favorably with that on the great canals of the world. It showed that the tolls on the canal "are practically prohibitory to most of the commerce that would otherwise use the present canal," and cited the case of the purchase by the Government of the Monongahela Navigation Co., for which it paid the sum of $3,761,615.46 "to liberate the coal of the West Virginia and Connellsville Basin, and which was fully justified by the stimulus it gave to manufactures along the Ohio and Mississippi Rivers." And, continued the report:

The immense commerce involved, as shown by the above table, and which is overburdened or entirely obstructed by the high tolls or the lack of a ship canal of adequate size, would seem to justify Congress in appropriating sufficient money to immediately acquire the franchises and property of the Chesapeake & Delaware Canal, or rather the interests therein not now owned by the United States Government, which will cost much less than the Monongahela investment, and at once throw it open to all commerce free of tolls, so far as the same is carried in boats small enough to pass through the canal, thereafter treating the canal as a navigable stream, to be improved and enlarged by Congress until it assumes the rank of a ship canal of sufficient depth and width to pass the largest vessels afloat.

The committee recommended that action be taken without delay to secure all data and information available to guide such further action as might appear desirable.

By joint resolution of Congress (public resolution No. 37, 1906) the President was authorized to appoint a commission to examine and appraise the value and works and franchises of the Delaware & Chesapeake Canal, and an appropriation made for that purpose.

This caused the appointment of the so-called Agnus commission, which consisted of Gen. Felix Agnus, of Baltimore, as chairman; Maj. C. A. F. Flagler, now Col. Flagler, of the United States Army, who appeared before the Committee on Coast and Insular Survey at its recent investigation; and Mr. F. T. Chambers, civil engineer, of the United States Navy. The commission reported January 1, 1907. (S. Doc. No. 215, 59th Cong., 2d sess.)

AGNUS COMMISSION FAVORS PROJECT.

This commission obtained and brought together a vast amount of information and reported in favor "of acquiring the Chesapeake & Delaware Canal at an early date, if practicable, and if it can be done at a cost not to exceed $2,514,289.70," which sum was reached by appraisement of the works and franchises of the canal, and the commission considered the works and franchises of the canal in three ways:

The canal company valued its property at $5,348,071. The commission, basing its estimate on cost of reproduction, valued the property at $3,708,186. The itemized estimate of values found at page 18, Senate Document No. 215, Fifty-ninth Congress, second session, is as follows:

Dry excavation, 15,000,000 cubic yards, at 16 cents	$2,400,000
Dredging, 1,435,760 cubic yards, at 14 cents	200,906
Revetment, 80,000 linear feet	70,000
Masonry, 44,000 perches, at $3	132,000
Lock at Delaware City	120,000
Lock at St. Georges	118,220
Lock at Chesapeake City	147,970
Land holdings, 8,000 acres, at $50	400,000
Summit level supply	5,000
Bridges	31,000
Houses, offices, etc	30,000
Tools, machinery, etc	1,000
Telephone line	2,000
Total "cost of reproduction," 1907	3,708,186

The commission then valued the stocks, bonds, and securities of the canal company, but was unable to reach any satisfactory conclusion regarding value of the securities, and it seems certain now that these securities are so widely held and the market value thereof so uncertain that no satisfactory conclusion could then or can now be reached.

Its third method of valuation was the amount of capital required to earn at a reasonable percentage the net income of the company, and it reached the conclusion that on this basis, taking the net income at $104,118, a fair price for the canal would be $2,083,600.

It may be well here to state that the net earnings of the canal from figures obtained by the committee recently investigating the subject showed that the net income for the last year exceeded this amount by some $14,000.

The conclusion as to value reached by the Agnus committee was that the Government should not pay the amount stated as the cost of reproduction, $3,708,186, but at a fair valuation, deducting the outside holdings of securities by the company, the Government could profitably pay the amount recommended, $2,514,289.70.

The gross and net earnings of the canal and cost of operation are shown fully in the tables furnished by the Agnus report and in the supplementary report of the Committee on Coast and Insular Survey obtained at its hearings, and for the fiscal year of 1913 exceeded any year since 1888, before which date they averaged much higher than at present, for 1870 having reached $414,000, for 1880 being $189,000, as against $186,000 for the last fiscal year.

The time of the greatest prosperity for the canal, as shown by the short tons of freight passing through the canal, was from 1865 to 1888, when the traffic carried exceeded on an average a million tons per annum, which was carried in boats, barges, or vessels numbering from 16,394, practically the maximum, to 9,000, the minimum.

During the last fiscal year the total tonnage through the canal was 908,594 tons, the number of passages through the canal for the past year being 5,773 (p. 35, hearings, S. Res. 304).

The Agnus commission reported that for military as well as commercial advantage the line of the Delaware & Chesapeake Canal would be most advantageous, and that for military and naval purposes the proposed canal would be of "great strategic value as an adjunct to our land and naval forces." That—

It was the commission's opinion that the deep-water canal across the upper end of the peninsula would be of very great advantage to commerce. It would give the West a seaboard more than a hundred miles nearer the ocean than it now has. It would relieve hundreds of vessels of a dangerous sea route, which in years gone by has cost tens of millions of dollars in wrecks. It would save time and expense to the trade movements of the whole country. It would immediately affect the 11,000,000 people upon the two bays and their tributaries, and would contribute to the interests of all the population. In increasing commerce and reducing the cost of transportation it would stimulate production and be of direct financial benefit to American industries. The commission believes the commercial advantages will fully justify the expenditure of the funds necessary to complete the work.

Concluding its report, the commission said:

The present Chesapeake & Delaware Canal is the most important link in the proposed waterway from the Gulf to the city of Philadelphia for barge traffic, and its purchase and improvement by the Government would be a benefit of extraordinary value.

PURCHASE RECOMMENDED BY UNITED STATES BOARDS OF ENGINEERS.

On December 12, 1911, the Board of Engineers for Rivers and Harbors reported to the Chief of Engineers of the United States Army recommending the purchase of the Chesapeake & Delaware Canal for the sum of $2,514,289.70, and its condemnation if necessary. (H. Doc. No. 391, 62d Cong., 2d sess., pp. 273–275.)

It recommended the line of the present canal as the most available and that a tide-level canal, being cheaper to construct, operate, and maintain than a lock canal, would be the most desirable. No damage to banks or interference with navigation being apprehended on account of tidal currents, not even a guard lock is required. The saving in distance for all the water traffic of Baltimore to New York and points in New England would be 184 miles, and the saving by a free canal on existing commerce when the canal should be deepened to 25 feet would be $1,414,442 annually.

The Chief of Engineers of the Army, January 2, 1912, reported to the Secretary of War that the average saving of lives by the inside passage would be 10 per year, finding this fact from the reports of 32 vessels, in which 49 lives had been lost. During the five years reported on by the Chief of Engineers, 32 coastwise vessels had been lost, and the average annual loss in life was 10; average loss on vessels and cargo, $100,000.

Without considering savings in insurance, the Chief of Engineers stated that the average saving in coastwise commerce which would use a free canal would be not less than $1,229,242, and probably would be considerably in excess of that amount.

On February 14, 1912, a special board of engineers, consisting of W. M. Black, colonel, Corps of Engineers, senior member of board; Frederick V. Abbot, colonel, Corps of Engineers; J. C. Sanford, lieutenant colonel, Corps of Engineers; Mason M. Patrick, lieutenant colonel, Corps of Engineers; and R. R. Raymond, major, Corps of Engineers, reported to the Chief of Engineers United States Army (H. Doc. No. 196, 63d Cong., 1st sess.), on the cost of construction, maintenance, and so forth, of the Delaware River-Chesapeake Bay Canal as follows:

	Sea level.		2 locks.	3 locks.
	Width, 125 feet; depth, 25 feet.	Width, 90 feet; depth, 12 feet.	Width, 90 feet; depth, 12 feet.	Width, 90 feet; depth, 12 feet.
Cost of construction plus 10 per cent	$12,424,500	$7,902,007	$7,803,914	$7,767,380
Annual interest at 3 per cent on first cost of construction	$372,735	$237,060	$234,117	$233,021
Cost of annual maintenance	$104,220	$104,220	$306,420	$310,020
Annual expenditure	$476,955	$341,280	$540,537	$543,041
Comparative expenditures capitalized at 3 per cent per annum, taking cost of a sea-level canal 125 feet wide and 25 feet deep as 100 per cent.....per cent..	100	72	113	120
Time required for a boat with a draft of 10 feet and a beam of 36 feet to pass through the canal, calculated from formula, hours	1.2	2.9	3.9	4.4
Time required for a boat with a draft of 16 feet and a beam of 40 feet to pass through the canal—from formula.....hours..	1.3	Impassable.	Impassable.	Impassable.
Time required for a boat with a draft of 20 feet and a beam of 45 feet to pass through the canal—from formula.....hours..	1.7	Impassable.	Impassable.	Impassable.

Two-lock canal: The two-lock canal has locks at Chesapeake City and at St. Georges, the summit level being the same as in the existing canal. From St. Georges to the Delaware River the canal is at sea level. * * *

Three-lock canal: The three-lock canal has locks as above and one near Reedy Point, the lifts being the same as those of the existing locks.

The route followed is that heretofore selected for this section of the intracoastal waterway.

The first costs of the three types of a 12-foot canal considered are practically equal because of the great cost of locks and the pumping plant required to supply the water for the summit level.

Delaware River-Chesapeake Bay section: As shown by the estimates, the saving of cost by constructing a lock canal 12 feet deep, as compared with a sea-level canal of the same dimensions, is about equal to the difference between cost of operating and maintaining the lock and sea-level types for six months. The sea-level type is therefore much cheaper in the end.

Since a sea-level canal is preferable to a lock canal from every point of view, for the Delaware River-Chesapeake Bay section, there would be little gained by deepening the present lock canal to 12 feet as an intermediate step toward a 25-foot sea-level canal. Special barges for a 12-foot depth would not be built for temporary use. The existing locks will accommodate traffic during enlargement of the canal and the change to sea level.

Therefore the sea-level canal 12 feet deep should be the first step. Its construction involves:

(1) Deepening and widening the present summit level and bringing its bottom to the same level as that of the lower reach, including flattening the slopes in the Deep Cut.

(2) Removal of the lock at St. Georges (10-foot lift), making a single level throughout 10 feet deep, with locks of 7 feet lift at each end.

(3) Deepening the whole canal to bring its bottom to reference —12.

(4) Removal of the locks at both ends of the canal, making a 12-foot sea-level canal.

The depth and width can thereafter be increased to the maximum desired.

The board believes that as outlined above the work can be carried on progressively and recommends that early provision be made for its inception and completion to a depth of 25 feet.

On July 22, 1912, the Board of Engineers for Rivers and Harbors reported (H. Doc. 196, 63d Cong., 1st sess.) on the Chesapeake & Delaware Canal as follows:

The Board of Engineers for Rivers and Harbors in its report on the proposed work commented in part upon these two sections as follows (H. Doc. 391, 62d Cong., 2d sess.):

"The Board of Engineers for Rivers and Harbors concurs with the special board as to the desirability of a free waterway connecting Delaware River and Chesapeake Bay. Aside from its future value as a link in a through waterway connecting northern and southern ports, it will be of great value to existing commerce and will yield immediate benefits. The board therefore recommends the purchase of the Chesapeake & Delaware Canal, at a price not exceeding $2,514,289.70, or its acquirement by condemnation proceedings, if necessary. It believes that the question of the enlargement of this canal should receive further study with a view to determining whether a less depth than that proposed by the special board would not adequately meet the requirements of commerce and navigation, and recommends the preparation of an estimate of the cost of a 12-foot canal, which is the depth recommended by the special board, as well as by this board, for the Norfolk-Beaufort section. This can be done under the present authorization [p. 275]."

Delaware River-Chesapeake Bay Canal—Estimates of cost of construction and maintenance of 25-foot and 12-foot canal.

	Sea level.		2 locks.	3 locks.
	Width, 125 feet; depth, 25 feet.	Width, 90 feet; depth, 12 feet.	Width, 90 feet; depth, 12 feet.	Width, 90 feet; depth, 12 feet.
Cost of construction and purchase of Chesapeake & Delaware Canal	$12,424,500	$7,902,007	$7,803,914	$7,767,380
Annual maintenance	104,220	104,220	306,420	310,020
Annual interest at 3 per cent on cost of construction	372,735	237,060	234,117	233,021
Total annual cost	476,955	341,280	540,537	543,041

3. After discussing the advantages and disadvantages of a 12-foot waterway * * * the special board * * * recommends, for the Delaware River-Chesapeake Bay section, the construction of a sea-level canal 12 feet deep and its progressive enlargement and completion to a depth of 25 feet. * * *

The Board of Engineers for Rivers and Harbors, July 22, 1912, concurred in the views of the special board that—

The Chesapeake & Delaware Canal should be enlarged to a sea-level canal 12 feet deep and 90 feet wide at bottom, but it does not believe that the further enlargement to a depth of 25 feet should be undertaken until there has been an opportunity to observe the commercial changes resulting from the freeing of this canal and its first enlargement, and a new investigation has been made to determine the advisability of any further modification that may be suggested by the changed conditions. The board therefore does not recommend the 25-foot depth at the present time, but reports that in its opinion it is advisable to purchase the Chesapeake & Delaware Canal and enlarge it to a sea-level canal 12 feet deep and 90 feet wide at bottom at a total estimated cost of $7,902,007. The initial appropriation should be sufficient to buy the existing canal, whose value is estimated at $2,514,289.70.

And on August 9, 1913, Gen. W. H. Bixby, the Chief of Engineers, United States Army, reported to the Secretary of War (H. Doc. No. 196, 63d Cong., 1st sess.)—

(b) In favor of the immediate purchase of the existing canal between Chesapeake Bay and Delaware River and its early enlargement to about 12 feet in depth and appropriate width.

The report was submitted to Congress, August 12, 1913, by the Acting Secretary of War, and included the following:

REGARDING THE FURTHER IMPROVEMENT OF THE ALREADY RECOMMENDED WATERWAY BETWEEN CHESAPEAKE BAY AND DELAWARE BAY, THE CHIEF OF ENGINEERS CONCURS WITH BOTH THE SPECIAL BOARD AND BOARD OF ENGINEERS FOR RIVERS AND HARBORS IN THE OPINION THAT IT IS ADVISABLE FOR THE UNITED STATES TO BUY THE CHESAPEAKE & DELAWARE CANAL AT A COST TO THE UNITED STATES NOT EXCEEDING $2,514,290 AND TO THEN ENLARGE IT TO A SEA-LEVEL CANAL OF 12 FEET DEPTH AND 90 FEET BOTTOM WIDTH, WITH THE LEAST INTERFERENCE PRACTICABLE TO EXISTING TRAFFIC, FOLLOWING, IN GENERAL, THE METHODS INDICATED BY THE SPECIAL BOARD, AT A COST WHICH, INCLUDING THE FIRST YEAR'S MAINTENANCE, AMOUNTS IN ROUND NUMBERS TO $8,000,000, OF WHICH $3,000,000 SHOULD BE MADE AVAILABLE BY THE FIRST APPROPRIATION, AND ECONOMICAL WORK WILL THEN REQUIRE SUBSEQUENT APPROPRIATIONS OF FROM $500,000 TO $1,000,000 PER YEAR.

The Chief of Engineers concurs with the Board of Engineers for Rivers and Harbors in the view that further deepening to 25 feet of the Chesapeake & Delaware Canal at an extra cost of $4,500,000 should await further observation as to the commercial changes resulting from the first increase in canal depth and especially the release from canal tolls. Moreover, the Chief of Engineers is of the opinion that the general public benefit will be that due to the increase of commerce by use of barges in tows and of medium-draft boats; and that the added benefits accruing from heavy-draft boats will be mainly local and consequently should await cooperation by the local States or those most directly benefited. As the work to be done is progressive and, as under present Federal laws, the engineer department can always receive and expend local funds for such purposes, it will always be possible to increase the project depth above 12 feet up to 25 feet as fast as local cooperation furnishes the funds.

RIVER AND HARBOR COMMITTEE OF HOUSE REPORTS FAVORABLY.

On February 24, 1914, the House Committee on Rivers and Harbors reported (Rept. 300, pt. 1, 63d Cong., 2d sess.) on the Chesapeake & Delaware Canal, as follows:

The purchase and enlargement of this canal, however, are very strongly recommended by the engineers, which, in the opinion of the committee, is one of the most important links in the proposed system, as it connects two great highways of commerce, the Chesapeake and Delaware Bays, and would, if completed as outlined in the project, save in distance between Baltimore and Philadelphia, it is estimated, about 320 miles, and between Baltimore and the mouth of the Delaware Bay 184 miles, which, together with other advantages claimed, caused the committee to look with favor upon the proposition and to authorize the purchase of the canal at a cost not to exceed $1,300,000, which is believed to be a fair valuation of the property. There is an alternative route considered by the engineers which may be used if the canal can not be purchased within the above figures, or resort may, of course, be had to condemnation proceedings, as Congress may deem best. On account of engineering difficulties which may be encountered in the enlargement of the canal it may be even better to adopt this alternative route, but that is a feature upon which we will naturally look largely to the engineers for advice.

The canal is owned by the Chesapeake & Delaware Canal Co., and appears to have outstanding 37,618 shares of stock, par value $50, held by numerous parties, including the United States Government, which originally paid $450,000 on the project, and the States of Pennsyl-

vania, Maryland, and Delaware, which contributed, respectively, $100,000, $50,000, and $25,000 to the enterprise.

It should be added that the original estimates for the cost of this canal and its subsequent enlargement to a 12-foot depth, with suitable widths, were $8,000,000 to complete, but in those estimates the maximum cost of purchasing the canal was fixed at $2,514,290. As, however, the committee fixed the maximum amount to be paid for the existing canal at $1,300,000, the estimated cost by the engineers is thereby reduced to $6,785,710, the difference between $8,000,000 and the amount of the reduction in the cost of the canal.

REPORT OF COAST AND INSULAR SURVEY COMMITTEE OF SENATE.

The last report on matters concerning the Chesapeake & Delaware Canal is that of the Coast and Insular Survey Committee, made April 25, 1914 (Senate Rept. 452, 63d Cong., 2d sess.).

That committee was charged with investigating some of the corporate affairs and the value of the canal, having in view its possible acquisition by the United States, as recommended by the various boards of engineers from time to time.

The committee reported that the stock of the canal had no value, but its bonds, amounting to $2,602,950, have a real and substantial value, the interest on such bonds having been regularly paid at 4 per cent, and, continued the committee—

Unless some unusual and unexpected damage shall occur to the works and property of the canal, it may fairly be presumed that its earnings will be sufficient to pay the interest at 4 per cent on the outstanding bonds, although the average annual net income of the canal company from all sources during the past 10 years (after paying interest and its operating expenses) has been only $2,989.24. This gives to these bonds a real value which is in some degree indicated by the last sale referred to at 68 per cent of the par. Under the law of the State of Pennsylvania the insurance companies of that State are permitted by its insurance department to invest funds in these bonds at 64 per cent, as shown by a letter of the insurance commissioner of that State sent your committee, dated April 8, 1914.

The company has averaged annually for the past four years for tolls earned	$175,000
Its cost of operation has averaged during said year	65,000
Its average net income from operation has therefore been for four years	110,000
Interest on its bonds at 4 per cent	104,118
Leaving a net average annual income for last four years of	5,882

which by comparison with the income of the company for a period of 10 years shows a substantial increase in its net receipts from operation.

* * * * * * *

Many official reports concerning the canal and its value have been made from time to time by engineers of the United States Army and others. In 1906 a special commission was appointed for the purpose of ascertaining the most feasible route for a canal between the Delaware and Chesapeake Bays. Your committee had before them Gen. Felix Agnus, of Baltimore, the chairman of that commission; Col. C. A. F. Flagler, at the time engineer in charge of that district; and Gen. William H. Bixby (retired), late Chief of Engineers of the United States Army. These gentlemen have as close and intimate knowledge with the Chesapeake & Delaware Canal as it is possible for the officials who have been charged with the duty of ascertaining the value of the canal to obtain from close study of the physical condition of the canal itself and investigation of all its affairs and property, as well as the value of the canal to the Government for military and naval purposes and as an aid to commerce.

The Agnus commission, when Col. Flagler (then major of Engineers, United States Army) had charge of the Wilmington (Del.) district, made a detailed valuation of the works and property of the canal, which may be found at page 18, Senate Document 215, Fifty-ninth Congress, second session. The value there given is $3,708,186.

Gen. Bixby, in his testimony before this committee (p. 126), confirmed this valuation, and showed that no new appraisement was necessary, as the appraisement made in 1906 was confirmed by present cost prices of materials. Gen. Bixby's statement regarding the value of the canal was as follows:

"While the cost per unit might differ a little bit to-day, the total cost, if we were making a new appraisement based on the figures of quantities that the commission verified, would go over $3,000,000 all the same, which is a price that is greater than the price which has been previously recommended for payment to the canal company. In other words, the price at which the Agnus Board and the other boards have concluded was best to stand by as a payment to the canal company was a price based upon its value as a going concern, which is less than what it might cost to reproduce the properties, and therefore they have all concurred with them that the recommendation which has been made for $2,500,000 was not too high, and if it erred anywhere it was perhaps too low, because we know that to do the same work to-day in that locality we can not get it for any less money (p. 126)."

And at page 123 Gen. Bixby, referring to the benefits which would be derived to commerce by making the canal a free canal under governmental control, said:

"The board, in figuring out the net benefit of $1,414,000 a year, figured on shipments from northern points estimated at 1,430,000 tons, shipments from southern points estimated at 1,107,000 tons, making a total of 2,537,000 and odd tons."

The former Chief of Engineers in giving his testimony showed the great benefit which had been derived in various sections with which he was personally familiar, where somewhat similar improvements had been made.

Col. Flagler, in his testimony, stated that the cost of building another canal reasonably near the Chesapeake & Delaware Canal would largely exceed the estimates on which the purchase was recommended by the commission for the amount of $2,514,000, and stated (p. 117), "The distance from Baltimore to Philadelphia will be shortened by 323 miles; from Baltimore to the mouth of the Delaware Bay, by 184 miles," should the canal be properly deepened and controlled. To shorten the distance between Baltimore and the mouth of the Delaware Bay was given to show how much less the distance would be from Baltimore to New York and New England points.

Ever since the Agnus report in 1907, wherein the cost of reproduction, estimate of properties and appurtenances of the canal, and other elements entering into its value were carefully considered, the conclusion reached by that commission that the Government could afford to pay and should acquire the canal for the sum of $2,514,289.70 has been concurred in by all Government officials, Army engineers, and persons reporting on the canal as a fair price to be paid. This amount was reached by the commission after careful consideration given the matter, being shown on pages 17 to 20, inclusive, of the Agnus report.

After full consideration by your committee of all official reports on this canal, the testimony taken by it and information which it has obtained regarding the possible value of the canal to the owners and holders of its stock, bonds, and obligations, your committee has reached the conclusion that while the stock and obligations of the company by the expenditure of some millions of dollars might be made much more valuable, the present value of the canal, as shown by its earning capacity, does not exceed $2,100,000, and that its bonds are not worth, considering the value of the property by which they are secured and the present and prospective earnings of the property mortgaged to secure them, more than 80 per cent of their face value, which would be approximately $2,100,000.

* * * * * * *

Your committee believe that the acquisition of the canal by the Government without resort by it to condemnation proceedings is practically impossible, because in addition to holding the securities with the hope that the Government will at least pay the par value of the bonds, the owners and holders of the stock and bonds are so widely scattered as to render it impracticable to deal with them individually and thus acquire their holdings.

We therefore conclude that the appropriation carried in the present river and harbor bill will prove insufficient to acquire the canal, that condemnation proceedings must be resorted to ultimately and should be provided for in any appropriation made with the expectation of acquiring the canal, and that the amount necessary to pay an award in condemnation proceedings will not be less than $2,000,000 and may reach $2,500,000.

MANIFEST ADVANTAGES TO THE PEOPLE.

Of necessity, Mr. President, I have been compelled in proving by the opinions of the best engineers the advisability of the acquisition by the Government of the Delaware & Chesapeake Canal to quote extensively from the many official reports which have been made from time to time on this subject. The advantages of its acquisition by the Government to the people of a great section of the country appears so manifest that the work of bringing together the extracts from these opinions and reports seems almost unnecessary.

Those who labor upon the great Chesapeake Bay and its tributaries will have opened to them, by quick water transportation, the markets where millions of people in the great cities of Trenton, Camden, Philadelphia, Chester, Wilmington, and the surrounding territory purchase their food. The people of these great communities will have opened to them, by quick water transportation, the great markets where the people of Baltimore, Annapolis, Norfolk, and the South purchase the manufactured articles necessary for their daily use. Millions of tons of freight will be interchanged and enhanced in value by the readiness with which customers can obtain the necessaries of life. Millions of people will be benefited by the lessened cost of articles they daily use.

If those who know best about this great work are not absolutely and entirely mistaken, the military and naval defenses of a great portion of our eastern seaboard will be more than doubled and the strength of this Government can be readily concentrated at any point where attack is to be feared. The cost of making such concentration possible will only be that of one or two ships of war, and from 10 to 20 per cent—possibly a greater percentage than that—on its cost will be saved to the commerce of the country annually.

The canal completed in accordance with the estimate of the engineers will prove an automatic regulation of railroad rates, and at the same time relieve the railroads of their congested traffic, to the great benefit of all their customers.

Resolutions of public bodies have been passed year after year urging this improvement upon Congress.

FAVORED IN NATIONAL PLATFORMS.

The acquisition of this canal by the Government will be in accord with the last two platforms of the now dominant party in this country. In its platform at Denver, in 1908, the Democratic Party declared:

Water furnishes the cheaper means of transportation, and the National Government, having control of navigable waters, should improve them to their fullest capacity. * * * We favor, when practicable, the connection * * * of the navigable rivers with each other, by artificial canals, with a view of perfecting a system of inland waterways to be navigated by vessels of standard draft.

At Baltimore, in 1912, its declaration was as follows:

We favor the adoption of a liberal and comprehensive plan for the development and improvement of our inland waterways with economy and efficiency, so as to permit their navigation by vessels of standard draft.

SUMMARY.

There can be no better place found in the Union to test the value of a modern canal than by the purchase and enlargement of the now small waterway between the Delaware and Chesapeake Bays. A great traffic already exists, and the amount of its

interchange between producer and consumer will thoroughly test out the great project of an intracoastal waterway.

The Government, according to the letter of the Secretary of the Treasury of April 4, 1914 (S. Doc. No. 462, 63d Cong., 2d sess.), has already invested in this project $472,309.62. The Maryland Board of Public Works, as long ago as November, 1906, declared it to be the sense of that board that the State, owning $81,250 of the stock of the canal company, should contribute its holdings toward the project if the Government would purchase the canal and make it a free and open waterway.

Wide markets where millions of consumers will be benefited will open to the people of Maryland and Virginia engaged in producing the necessities of life. Exchange of manufactured goods for foodstuffs will be increased for the benefit of all.

It is difficult—indeed, impossible—to accurately estimate the great advantage which will flow from unfettering the commerce of the two sections and making easy the free interchange of between fifty and a hundred millions of tons annually, which is the combined commerce of the two bays.

The Government can obtain this waterway at less than its actual cost and with a certainty that no loss will be incurred. The character of the project is not a new one. A similar but smaller project of this character was carried through when the Government purchased the Chesapeake & Albemarle Canal, and the advantages of that purchase have already been proven in some measure.

The Seattle canal now being constructed from the Sound to a lake furnishes another example.

Another instance where the Government entered upon a more comprehensive and profitable project was in the case of the Monongahela Navigation Co., which opened the coal fields to the commerce of the Ohio River, and the wisdom of that project was quickly realized. Still another was in the case of the Soo Canal, where the United States instituted condemnation proceedings to unfetter the commerce of the Lakes, so that there is no new proposal here and no new field of national effort is proposed.

The entire project of linking together the North and the South by a system of intracoastal canals depends for its success upon the acquisition and improvement of this comparatively small canal in the most thickly settled portion of the Union. It has been recommended so often and its benefits so widely advertised by resolutions of boards of trade and waterways conventions that there are no two opinions among those who know the situation.

It is no small thing to take into consideration that approximately 10 human lives will be saved each year, now sacrificed to the fury of the sea on the outside passage between the Delaware and Virginia Capes, if this waterway should be properly opened.

Existing as it now does, it may be said to be almost an obstruction to commerce rather than a benefit, for if it did not exist at all the short barrier to the interchange of the great commerce of the two bays and their tributaries would not be allowed long to exist.

The people of my own State, while they are interested in the project, are not, in my opinion, those who will be the most greatly benefited. The great commercial center of Baltimore and the great body of wage earners at Philadelphia will obtain the chief benefits and advantages which will flow from this great but at the same time comparatively inexpensive public work. But I realize, I think, Mr. President, how great a benefit the people of the great middle section of the Atlantic seaboard will receive, and if, by agitating the project and bringing together in connected form the expert opinions, the technical knowledge, the expression of those of great experience, I may have been able in some slight degree to further this work, the labor which it has entailed will not be without its reward.

Mr. BANKHEAD. Mr. President——

Mr. GALLINGER. Will the Senator permit me to give a notice?

Mr. BANKHEAD. I yield for that purpose.

PANAMA CANAL TOLLS.

Mr. GALLINGER. Mr. President, I desire to give notice that on Tuesday, May 12, following the address of the Senator from Utah [Mr. SMOOT], I will briefly address the Senate on certain phases of the bill relative to Panama Canal tolls.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by D. K. Hempstead, its enrolling clerk, announced that the House had passed the joint resolution (S. J. Res. 145) authorizing the President to detail Lieut. Frederick Mears to service in connection with proposed Alaskan railroad.

The message also announced that the House agrees to the amendment of the Senate to the bill (H. R. 13770) to consolidate certain forest lands in the Sierra National Forest, Cal.

The message further announced that the House agrees to the amendments of the Senate to the joint resolution (H. J. Res. 263) designating the second Sunday in May as Mother's Day, and for other purposes.

ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bills and joint resolution, and they were thereupon signed by the Vice President:

H. R. 12291. An act to increase the limit of cost for the extension, remodeling, and improvement of the Pensacola (Fla.) post office and courthouse, and for other purposes;

H. R. 13770. An act to consolidate certain forest lands in the Sierra National Forest and Yosemite National Park, Cal.; and

H. J. Res. 263. Joint resolution designating the second Sunday in May as Mother's Day, and for other purposes.

EXECUTIVE SESSION.

Mr. BANKHEAD. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After two hours and fifteen minutes spent in executive session the doors were reopened.

Mr. SHIVELY. I move that the Senate adjourn until to-morrow at 11 o'clock a. m.

The motion was agreed to; and (at 5 o'clock and 55 minutes p. m.) the Senate adjourned until to-morrow, Saturday, May 9, 1914, at 11 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate May 8, 1914.

RECEIVERS OF PUBLIC MONEYS.

Edmund James, of Carson City, Nev., to be receiver of public moneys at Carson City, Nev., vice Earl W. Tremont, deceased.

William H. Edley, of Powell, Wyo., to be receiver of public moneys at Lander, Wyo., vice Marvin B. Rhodes, term expired.

CONFIRMATIONS.

Executive nominations confirmed by the Senate May 8, 1914.

UNITED STATES MARSHAL.

William R. Waller to be United States marshal for the middle district of Alabama.

POSTMASTERS.

KANSAS.

Celia Hughes, Weir.

KENTUCKY.

W. C. Sleet, Middlesboro.

LOUISIANA.

E. O. Lalande, Napoleonville.
Washington J. P. Prescott, Garyville.

MAINE.

Alfred T. Hicks, Auburn.
Morrill McKenney, Richmond.

MISSOURI.

Henry S. Hook, Jamesport.

MONTANA.

Samuel Hilburn, Kalispell.

NEBRASKA.

J. O. Blauser, Diller.
Claude J. Brown, Lynch.
Thomas T. Osterman, Blair.
Edward W. Roche, Kimball.

NEW JERSEY.

George N. Smith, Wildwood.

SOUTH DAKOTA.

J. W. Applegate, Edgemont.
E. W. Babb, Wakonda.
Matthew F. Ryan, Mobridge.

HOUSE OF REPRESENTATIVES.

FRIDAY, *May 8, 1914.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

We lift up our hearts in gratitude to Thee, our Father in heaven, for the intellectual, moral, and spiritual gifts with which Thou hast endowed us. Yet we realize how great is the responsibility in their use. The spirit is willing, but the flesh is weak; hence we seek Thee for light to guide, strength to sustain, and courage to do in all the relationships of life, private and public, the right as it is given us to see the right, that we may increase our talents and prove ourselves worthy of the trust reposed in us. May we realize that there are but two things worthy of a man, namely, service and character. May it be ours to serve, ours to grow after the manner of the Christ. Amen.

The Journal of the proceedings of yesterday was read and approved.

QUESTION OF PERSONAL PRIVILEGE.

Mr. MANAHAN. Mr. Speaker, I rise to a question of personal privilege.

The SPEAKER. The House will be in order, and the gentleman will state his question of personal privilege.

Mr. MANAHAN. When I filed House resolution No. 424, asking for an investigation of the grain exchanges of the Northwest, the Minneapolis Journal editorially accused me of being an interested party in a rival exchange, and questioned my motives in filing this resolution. I think my privileges have been impugned, and I desire to address the House briefly.

Mr. MANN. How much time does the gentleman want?

Mr. MANAHAN. About 10 minutes. I ask unanimous consent, in order that there may be no question as to time, for 10 minutes.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. MANAHAN. Mr. Speaker, when I filed House resolution 424, asking for an investigation of certain grain exchanges in the Northwest, the Minneapolis Journal questioned the sincerity of my motives. In the editorial I refer to the following statements are made:

> It is doubtful if Mr. MANAHAN has been in Congress long enough to expect the House to repair his fences and build new ones by ordering a local investigation for which it can see no public reason.
>
> But if Congress really wants to investigate the Minneapolis Chamber of Commerce and the Duluth Board of Trade on a serious and sound basis, there is no reason, except useless expense of money and time, why it shouldn't. These are State corporations, have been under close State supervision, and have come with clean hands out of a series of legislative investigations provoked in the same spirit by politicians.
>
> Congress might save time and money, however, by first examining the report of the last legislative investigation instigated by Mr. MANAHAN and Mr. Loftus in behalf of the rival business in which they are interested. The motive actuating Mr. MANAHAN might well be investigated along with the organizations. An improper motive is to be feared as much in government as improper conduct in any other relation.

Mr. Speaker, my motive in urging an investigation of the Minneapolis Chamber of Commerce appears clearly in the resolution itself. That organization is an intolerable monopoly. It has controlled prices and robbed the farmers of the Northwest for many years. My purpose was and still is to destroy that monopoly. But, says the Journal, I do this "in behalf of a rival business" in which I am "interested." That charge is doubly false, and the writer knew it when he penned the lines. He knew that my whole public career had been one of unwavering hostility to monopoly in every form. He knew that the only "rival business" to be benefited by breaking up the grain combine was the farmers' cooperative concerns. He knew that I did not own a dollar's worth of stock in any of those cooperative concerns. He knew, of course, that these farmers looked upon me as their advocate and general counsel. They never gave me a retainer, never paid me nor promised me a fee. My connection as attorney was nominal, and so understood by everybody. My connection with these farmers as a public man, interested in protecting them from exploitation by either the grain combine or the railroads, was and is real and vital. My father was a farmer. My brothers are all farmers.

I am on their side in this fight for an honest and cooperative market. Every householder in the country is interested as well as I am. I hope I can impress it upon the aristocratic intelligence of the cultured proprietor of the Journal that I am very much "interested" in the farmers' cooperative movement for marketing their produce, and that I am very much determined to smash, if I can, the grain combine that stands in their way. I have asked this Congress to act. I have urged action by the Department of Justice. I expect to do what I can to get the State of Minnesota to exert all the power it has to destroy the vicious grain-gambling monopoly which for years, like a festering sore, has drained the resources and sapped the strength of agriculture in the Northwest.

But, Mr. Speaker, when a publisher uses the cruel weapon of the press to strike a public man, he invites a careful scrutiny of himself. The publisher of the Journal dare not accuse me of an improper or dishonest act, but resorts to the cowardly method of striking from behind and in the dark. He insinuates what he dare not say. Posing as a saint, he tries to suggest that I am a sinner. I am, sir, somewhat of a sinner, but Phariseeism is not my sin. Possibly that is the reason why the saintly Journal of Minneapolis does not like me.

My motives are questioned when I assault the Grain Trust and its gambling, and I am tempted to inquire into the motives of my critic in defending the gambling grain graft. Mr. Speaker, who is this H. V. Jones, the publisher of the Journal, who suggests that Congress should investigate my motives? Are his own motives above suspicion?

Has he any personal experience in this gambling and speculating about which he writes so glibly?

Is he in the service of selfish big business?

Does Jim Hill own his pen and his paper?

The Journal Printing Co. was capitalized at $200,000. There were 4,000 shares of stock at $50 per share. On August 31, 1908, H. V. Jones and his brother paid $1,000,000 in cash for these 4,000 shares of stock. Where did they get the money, and did they pledge their pens when they got it?

Just about a year before this purchase, H. V. Jones, Hal P. Watson, and Lou Watson, doing business in New York and Minneapolis as Watson Bros. & Co., were ruined by the slump in the stock of the Hill railroads. The firm had been James J. Hill's brokers, and their statement showed that they could not pay 50 cents on the dollar. What did they pay their creditors, either before or after H. V. Jones and brother paid $1,000,000 for the Journal? And who gave the bankrupt, while yet in mourning for his busted brokerage business, credit for one big million dollars with which to buy a paper and preach to the people like a Pharisee? Who gave the cash or the credit?

Will Mr. Jones specifically deny that it was Mr. Hill's credit that enabled him and his brother to pay $1,000,000 for the Journal? He has stated that the deal was financed by a trust company, but he has never given the name of that company. A trust company is a wonderful thing. It is like charity, "it covereth a multitude of sins." But whoever or whatever the trust that financed the Journal, the fact remains that ever since its invisible ownership has been represented by Mr. H. V. Jones, it has posed as a great moral force and has assumed a "holier than thou" attitude on all issues that do not affect the Hill interests or disturb the easy grind of the grain graft.

To meet the vice of the invisible ownership of the press, Congress has enacted a law requiring newspapers to make certain disclosures, and I am advised that under this law Mr. Jones has made affidavits to the effect that the Journal has no bonded indebtedness and that he and his brother own the stock. Under date of October 3, 1913, the Minneapolis Journal published its statement, which was sworn to as an affidavit, in which, in compliance with the request to state the paper's "known bondholders, mortgagees, and other security holders holding 1 per cent or more of total amounts of bonds, mortgages, or other securities," the answer was made, "There are none."

During the same month and a few days later—October 25, 1913—Mr. Clifford, the advertising manager of the Journal, in a speech before the Advertising Men's League, of New York, is quoted in the Editor, Publisher, and Journalist, as follows:

> The story of this publisher, Herschel V. Jones, epitomizes opportunity. A comparatively few years ago he came to Minneapolis from a stony farming country in New York State—Scoharie County. He went to work as a reporter on the paper he now owns. He was later assigned to market reports—not a much sought-for position on an editorial staff. But he saw in the market reporting opportunity. He put enthusiasm into it—honest enthusiasm. He became a market expert, later he became a national figure as a crop expert, so thoroughly did he do his market reporting. He founded a financial and commercial paper. Later he engaged in the grain-brokerage business; met with unfortunate reverses. He saw an opportunity to buy this paper on which he had started as a reporter. He went out and borrowed a million dollars with a stroke of the pen, because his integrity, his honesty, his ability, had been established with men of finance. Men believed in him.

And later in the same speech, Mr. Clifford said, after discussing certain kinds of advertising, which the Journal refused to take:

> Because we do not believe it is right to accept it and because we do not believe it is good business to accept it, even though a good, big piece of that borrowed million is staring this publisher in the face.

Now, I ask, who holds the "good big piece of that borrowed million" that is "staring this publisher in the face"? Does James J. Hill, whose railroads' extortion of freight-rate payers, whose railroads' underpayment of laborers and officers and trainmen the Minneapolis Journal has always defended, own any part of that "good big piece of that borrowed million" that is still staring Mr. H. V. Jones in the face? Or does the grain combine of Chicago—Armour and his crowd—control the trust company which Mr. Jones says financed his million-dollar deal? Mr. Clifford, his advertising manager, says that Mr. Jones became a "national figure as a crop expert." Had he, I wonder, furnished these Chicago wheat dealers the crop estimates and advice as a market expert on which they gambled in grain in the Chicago pit? Do these grain gamblers own any part of that "good big piece of that borrowed million staring this publisher in the face"?

Does the Journal refuse "tainted advertising" to make more effective its service to the selfish and invisible owners who still hold "a good big piece of that borrowed million" staring Mr. H. V. Jones out of countenance as a journalist and poisoning the pen with a stroke of which, Mr. Clifford says, he borrowed the million?

Mr. Clifford doubtless speaks the truth when he says that Mr. Herschel V. Jones borrowed a million dollars to buy the Minneapolis Journal, and that the largest part of that million has not yet been paid. Doubtless the capital stock is pledged or put in escrow by some sort of legal device undisclosed to secure the debt. The Minneapolis Journal obviously has evaded the clear purpose of the law requiring the publication of its real ownership.

Is this dummy proprietor of an invisibly owned newspaper in a position to question the motives of any public man?

His own motives are reprehensible. He seeks to discredit me as a Member of this House. But that is only incidental. His real purpose is to divert attention from the grain monopoly with which he was associated in the past and which he knows is still robbing the producers of the Northwest. He serves as a debtor the selfish purposes of the owners in hiding of his sanctimonious sheet.

Mr. Speaker, I deliberately state these facts concerning this publisher, who by miserable insinuation regarding my motives tries to defeat the reforms I am fighting for in Minnesota. The reform of the grain markets, which he and his paper strive to defeat, is of nation-wide importance, and therefore I place these facts in the permanent records of the Nation. [Applause.]

LIEUT. FREDERICK MEARS.

Mr. HAY, Mr. CHURCH, and Mr. SHERWOOD rose.

The SPEAKER. The gentleman from Virginia [Mr. HAY] is recognized.

Mr. HAY. Mr. Speaker, will the Speaker lay before the House the joint resolution of the Senate, No. 145?

The SPEAKER. The Chair will state that there are several little things here of some importance that we can get out of the way before we reach the pensions. We have plenty of time for pensions.

Mr. HAY. I am not asking for pensions.

The SPEAKER. I understand; but the Chair would rather clear these little matters up now. The Clerk will report the joint resolution.

The Clerk read as follows:

Senate joint resolution (S. J. Res. 145) authorizing the President to detail Lieut. Frederick Mears to service in connection with proposed Alaskan railroad.

Resolved, etc., That the President of the United States be, and he is hereby, authorized to detail and require Lieut. Frederick Mears, United States Army, to perform service in connection with the location and construction of the railroad or railroads in the Territory of Alaska provided for in act of Congress approved March 12, 1914.

Mr. HAY. Mr. Speaker, I will state that there is a similar joint resolution which has been reported by the Committee on Military Affairs of the House.

Mr. FOSTER. Mr. Speaker, will the gentleman permit an interruption?

Mr. HAY. I will.

Mr. FOSTER. Would the gentleman mind stating to the House the necessity for this joint resolution designating this Army officer for duty in Alaska in connection with the building of the railroad?

Mr. HAY. Under the law an Army officer of any rank now below that of brigadier general can not be placed on detached service. Lieut. Mears has been on detached service as chief engineer of the Panama Railroad, and under the law, unless this resolution is passed, he can not be used for the service of taking charge of the construction of this railroad. It is very important that he shall be detailed at once if any work is to be commenced on this railroad this season.

Mr. FITZGERALD. He is in the line, is he not?

Mr. HAY. He is in the line of the Army.

Mr. FITZGERALD. The Alaska railroad bill——

Mr. HAY. The Alaska railroad bill only provides for an officer of engineers. He is not an officer of engineers.

Mr. FOSTER. Is this officer to be transferred from the work in Panama to the work in Alaska because his work has been finished in Panama?

Mr. HAY. I understand this officer is now chief engineer of the Panama Railroad.

Mr. MANN. He is superintendent, is he not?

Mr. FITZGERALD. He is superintendent.

Mr. HAY. He is to be sent at once to Alaska.

Mr. FOSTER. Is he the officer or superintendent or engineer who was in charge of rebuilding the Panama Railroad?

Mr. HAY. He is.

Mr. MANN. I think not.

Mr. FITZGERALD. Mr. Speaker, if the gentleman will permit, he was appointed superintendent of the Panama Canal Railroad.

Mr. MANN. How long since?

Mr. FITZGERALD. Some two or three years ago, I think, and had charge of the building of the relocation of the Panama line and the concrete piers at Colon; and I think it was because of his work there that he was recommended to the Secretary of the Interior by Col. Goethals.

Mr. MANN. I understood that to be the case, but I did not understand that he was superintendent.

Mr. HAY. He is to begin the survey of the railroad in Alaska.

Mr. HAMILTON of Michigan. Has the line been selected which he is to survey?

Mr. HAY. He has to go there for the purpose of locating that line.

Mr. HAMILTON of Michigan. The gentleman stated he was to survey the line. I wanted to know if a line had been determined upon preliminary to the survey.

Mr. HAY. I do not think it has.

Mr. MANN. A commission has been appointed consisting of three members, of which this gentleman is one, for the purpose of locating where the line shall be.

Mr. HAY. Where it shall be.

Mr. BARTLETT. May I ask the gentleman a question?

Mr. HAY. Certainly.

Mr. BARTLETT. Is this Army officer to be given additional compensation?

Mr. HAY. He is not.

Mr. BARTON. I understand that Lieut. Mears is superintendent of the railroad at the present time, but previous to that time that he was a Cavalry officer; and I would like the gentleman to state the reason he is considered superior to a man who had worked for seven years, as did Col. Sibert.

Mr. HAY. Col. Sibert is an officer of engineers and is employed on the construction of the Panama Canal. This officer has been in charge of the Panama Canal Railway.

Mr. BARTON. Has he done any practical engineering on the railroad work?

Mr. HAY. For the last three years.

Mr. BARTON. On the Panama Railroad?

Mr. HAY. Yes.

Mr. FITZGERALD. Col. Sibert, the gentleman should state, is known as a builder of dams. This man, Lieut. Mears, every time the Committee on Appropriations has visited the canal, has had charge of the party when they went over the relocated line of the railroad. My impression is he had charge of the building of the relocated line.

Mr. BARTON. The reason I asked the question is that I have heard criticisms along the line that he was a Cavalry officer and had had but little to do with engineering, and that Col. Sibert had devoted his life to it.

Mr. HAY. I take it that he displayed a good deal of aptitude in this work; otherwise he would not have been thought of for taking charge of the work in Alaska.

The SPEAKER. The question is on the third reading of the Senate joint resolution.

The resolution was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. HAY, a motion to reconsider the vote by which the resolution was agreed to was laid on the table.

The SPEAKER. Without objection, House resolution 262, of similar tenor, will lie on the table.

There was no objection.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Tulley, one of its clerks, announced that the Senate had passed bills and a joint resolution of the following titles, in which the concurrence of the House of Representatives was requested:

S. 5065. An act for the relief of Mirick Burgess;

S. 4373. An act to provide for a commission to codify and suggest amendments to the general mining laws; and

S. J. Res. 145. Joint resolution authorizing the President to detail Lieut. Frederick Mears to service in connection with proposed Alaskan railroad.

S. 1703. An act for the relief of George P. Chandler;

S. 5066. An act to increase the authorization for a public building at Osage City, Kans.; and

S. 4158. An act to reduce the fire limit required by the act approved March 4, 1913, in respect to the proposed Federal building at Salisbury, Md.;

The message also announced that the Senate had passed, with amendment, bill of the following title, in which the concurrence of the House of Representatives was requested:

H. R. 13770. An act to consolidate certain forest lands in the Sierra National Forest, Cal.

FOREST LANDS IN THE SIERRA NATIONAL FOREST, CAL.

Mr. CHURCH. Mr. Speaker, I ask unanimous consent that the bill (H. R. 13770) to consolidate certain forest lands in the Sierra National Forest, Cal., be taken from the Speaker's table, and that the Senate amendment be concurred in by the House.

The SPEAKER. The gentleman from California [Mr. CHURCH] asks unanimous consent that the bill H. R. 13770 be taken from the Speaker's table and the Senate amendment be concurred in. The Clerk will report the bill.

The Clerk read the title of the bill, as follows:

An act (H. R. 13770) to consolidate certain forest lands in the Sierra National Forest, Cal.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report the Senate amendment.

The Senate amendment was read.

The SPEAKER. The question is on agreeing to the Senate amendment.

The Senate amendment was agreed to.

LEAVE OF ABSENCE.

Mr. TALCOTT of New York, by unanimous consent, was granted leave of absence for five days on account of illness in his family.

PENSIONS.

Mr. SHERWOOD. Mr. Speaker, I desire to call up House bill 16294, reported from the Committee on Invalid Pensions, granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war.

The SPEAKER. The Clerk will report it.

The Clerk read the title of the bill, as follows:

A bill (H. R. 16294) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war.

Mr. SHERWOOD. Mr. Speaker, I ask unanimous consent that the bill may be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman from Ohio [Mr. SHERWOOD] asks unanimous consent that the bill be considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

Mr. SHERWOOD. Mr. Speaker, I ask unanimous consent that the first reading of the bill be dispensed with.

The SPEAKER. The gentleman from Ohio asks unanimous consent that the first reading of the bill be dispensed with. Is there objection?

There was no objection.

Mr. MANN. You would only read the bill for amendment, anyhow, when it is considered in this way.

The SPEAKER. The Clerk will read the bill for amendment.

The bill was read.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. SHERWOOD, a motion to reconsider the vote whereby the bill was passed was laid on the table.

The foregoing bill is a substitute for the following House bills referred to the Committee on Invalid Pensions:

H. R. 946. James M. Kirk.
H. R. 1043. Hans P. Nielson.
H. R. 1161. Mary A. Brown.
H. R. 1247. John Beazan.
H. R. 1388. Charles W. Bowman.
H. R. 1393. Isaiah Roberts.
H. R. 1395. Barney Stone.
H. R. 1398. William G. Miller.
H. R. 1400. Ezekiel Probus.

Mr. SHERWOOD. Mr. Speaker, I desire to call up Senate bill 4168.

The SPEAKER. The Clerk will report it.

The Clerk read the title of the bill, as follows:

S. 4168. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors.

Mr. SHERWOOD. Mr. Speaker, I ask unanimous consent that the bill be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman from Ohio asks unanimous consent that the bill be considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

The SPEAKER. The Clerk will read the bill for amendment.

The Clerk read as follows:

The name of Mary Hammack, widow of Andrew J. Hammack, late of Company H, Seventh Regiment Kentucky Volunteer Cavalry, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

With a committee amendment, as follows:

On page 2 strike out lines 1 to 4, inclusive.

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The Clerk read as follows:

The name of Norman P. Wood, late of Company D, Forty-ninth Regiment Wisconsin Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

With a committee amendment, as follows:

On page 7, line 1, strike out "$30" and insert in lieu thereof "$24."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The Clerk read as follows:

The name of Mahala E. Warmoth, widow of George M. Warmoth, late assistant surgeon Forty-first Regiment, and surgeon Fifty-third Regiment, Illinois Volunteer Infantry, and pay her a pension at the rate of $25 per month in lieu of that she is now receiving.

With a committee amendment, as follows:

On page 7, line 20, strike out "$25" and insert in lieu thereof "$20."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The Clerk read as follows:

The name of Mary A. V. Sanger, widow of Austin T. Sanger, late of Company B, Second Regiment New Hampshire Volunteer Infantry, and pay her a pension at the rate of $30 per month in lieu of that she is now receiving.

With a committee amendment, as follows:

On page 16 strike out lines 12 to 15, inclusive.

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The Clerk concluded the reading of the bill.

The SPEAKER. The question is on the third reading of the Senate bill as amended.

The Senate bill as amended was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. SHERWOOD, a motion to reconsider the vote whereby the bill was passed was laid on the table.

Mr. SHERWOOD. Mr. Speaker, I desire to call up Senate bill 4352.

The SPEAKER. The Clerk will report it.

The Clerk read the title of the bill, as follows:

S. 4352. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors.

Mr. SHERWOOD. I ask unanimous consent, Mr. Speaker, that the bill be considered in the House as in Committee of the Whole.

The SPEAKER. Is there objection to the consideration of this bill in the House as in Committee of the Whole?

There was no objection.

The SPEAKER. The Clerk will read the bill for amendment.

The Clerk read as follows:

The name of Jacob A. Shrode, late of Company A, One hundred and forty-third Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

With a committee amendment, as follows:

On page 5, line 17, strike out "$30" and insert in lieu thereof "$24."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The Clerk read as follows:

The name of Julia A. Bachus, widow of Lucius A. Bachus, late second lieutenant Company C, Twentieth Regiment Kentucky Volunteer Infantry, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

With a committee amendment, as follows:

On page 9 strike out lines 11 to 15, inclusive.

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The Clerk read as follows:

The name of William G. Brown, late of Company G, One hundred and eighteenth Regiment Illinois Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

With a committee amendment, as follows:

On page 16, line 1, strike out "$30" and insert in lieu thereof "$24."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The Clerk concluded the reading of the bill.

The SPEAKER. The question is on the third reading of the Senate bill as amended.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. SHERWOOD, a motion to reconsider the vote whereby the bill was passed was laid on the table.

Mr. SHERWOOD. Mr. Speaker, I call up Senate bill 4552.

The SPEAKER. The Clerk will report it by title.

The Clerk read the title of the bill, as follows:

S. 4552. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors.

Mr. SHERWOOD. Mr. Speaker, I ask unanimous consent to consider the bill in the House as in Committee of the Whole.

The SPEAKER. The gentleman from Ohio asks unanimous consent that the bill be considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report the bill for amendment.

The Clerk read as follows:

The name of Abbie A. Upson, widow of Henry Upson, late chaplain, Thirteenth Regiment Connecticut Volunteer Infantry, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

With a committee amendment, as follows:

On page 2, strike out lines 13 to 16, inclusive.

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The Clerk read as follows:

The name of William Redding, late of U. S. S. *Great Western* and *Collier*, United States Navy, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

With a committee amendment, as follows:

On page 3, line 19, strike out "$30" and insert in lieu thereof "$24."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The Clerk read as follows:

The name of John Marsh, late of Company B, Ninth Indiana Legion, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

With a committee amendment, as follows:

On page 6, strike out lines 7 to 9, inclusive.

On page 19, line 11, strike out "$30" and insert in lieu thereof "$24."

The Clerk concluded the reading of the bill.

The SPEAKER. The question is on the third reading of the Senate bill as amended.

The Senate bill, as amended, was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. SHERWOOD, a motion to reconsider the vote whereby the bill was passed was laid on the table.

Mr. KEY of Ohio. Mr. Speaker, I desire to call up the bill (H. R. 16345) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors.

The Clerk read the title of the bill.

Mr. KEY of Ohio. Mr. Speaker, I ask unanimous consent that this bill be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman from Ohio asks unanimous consent to consider this bill in the House as in Committee of the Whole. Is there objection?

There was no objection.

The SPEAKER. The Clerk will read the bill for amendment.

The Clerk read as follows:

The name of Mrs. Joseph B. Milbee, widow of Joseph B. Milbee, late of Company A, Second Regiment, West Virginia Volunteer Infantry, War with Spain, and pay her a pension at the rate of $12 per month and $2 additional for each of the five minor children of the said Joseph B. Milbee until they reach the age of 16 years.

Mr. KEY of Ohio. Mr. Speaker, I offer a committee amendment.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Page 5, line 1, strike out the words "Mrs. Joseph B." and insert in lieu thereof the words "Esther A."

The amendment was agreed to.

The Clerk resumed and completed the reading of the bill.

The foregoing bill is a substitute for the following House bills referred to the Committee on Pensions:

The bill was ordered to be engrossed and read a third time, and was accordingly read the third time and passed.

On motion of Mr. KEY of Ohio, a motion to reconsider the last vote was laid on the table.

Mr. KEY of Ohio. Mr. Speaker, I call up the bill (S. 4657) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and of wars other than the Civil War, and to certain widows and dependent relatives of such soldiers and sailors.

The Clerk read the title of the bill.

The SPEAKER. This bill is on the Private Calendar.

Mr. KEY of Ohio. Mr. Speaker, I ask unanimous consent that the bill be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman asks unanimous consent to consider the bill in the House as in Committee of the Whole. Is there objection?

There was no objection.

The Clerk read as follows:

The name of Carrie H. Travis, widow of Pierce M. B. Travis, late major, Eleventh Regiment United States Infantry, and pay her a pension at the rate of $35 per month in lieu of that she is now receiving.

The following committee amendment was read, considered, and agreed to:

Page 1, strike out lines 6 to 9, inclusive.

The Clerk read as follows:

The name of Katherine D. Augur, widow of Jacob A. Augur, late colonel Tenth Regiment United States Cavalry, and pay her a pension at the rate of $40 per month in lieu of that she is now receiving.

The following committee amendment was read, considered, and agreed to:

Page 2, strike out lines 1 to 4, inclusive.

The Clerk read as follows:

The name of Sarah J. Burke, widow of Daniel W. Burke, late major, Twenty-third Regiment United States Infantry, and brigadier general, United States Army, and pay her a pension at the rate of $40 per month in lieu of that she is now receiving.

The following committee amendment was read, considered, and agreed to:

Page 2, strike out lines 9 to 13, inclusive.

The Clerk read as follows:

The name of Edward M. Stevens, late of Company E, Tenth Regiment Pennsylvania Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The following committee amendment was read, considered, and agreed to:

Page 2, strike out lines 20 to 22, inclusive.

The Clerk read as follows:

The name of John Cooper, late of Company C, One hundred and sixty-first Regiment Indiana Volunteer Infantry, War with Spain, and pay him a pension at the rate of $16 per month.

The following committee amendment was read, considered, and agreed to:

Page 3, strike out lines 10 to 13, inclusive.

The Clerk read as follows:

The name of Zera F. Etheridge, late hospital apprentice, first class, United States Navy, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The following committee amendment was read, considered, and agreed to:

Page 3, line 20, strike out "$30" and insert "$12."

The Clerk read as follows:

The name of Annie La T. Romeyn, widow of Henry Romeyn, late captain, Fifth Regiment United States Infantry, and major, United States Army, retired, and pay her a pension at the rate of $40 per month in lieu of that she is now receiving.

The following committee amendment was read, considered, and agreed to:

Page 4, line 6, strike out "$40" and insert "$30."

The Clerk read as follows:

The name of Robert B. Courts, late of Company D, First Regiment North Carolina Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The following committee amendment was read, considered, and agreed to:

Page 4, strike out lines 22 to 25, inclusive.

The foregoing bill is a substitute for the following Senate bills referred to the Committee on Pensions:

S. 79. Carrie H. Travis.
S. 83. Katherine D. Augur.
S. 386. Elizabeth K. Norton.
S. 534. Sarah J. Burke.

S. 4379. Charlotte Perry.

The bill as amended was ordered to a third reading, and was accordingly read the third time and passed.

On motion of Mr. KEY of Ohio, a motion to reconsider the last vote was laid on the table.

Mr. KEY of Ohio. Mr. Speaker, I desire to call up the bill (S. 4200) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and of wars other than the Civil War, and to certain widows and dependent relatives of such soldiers and sailors.

The Clerk read the title of the bill.

The SPEAKER. This bill is on the Private Calendar.

Mr. KEY of Ohio. I ask unanimous consent to consider this bill in the House as in Committee of the Whole.

The SPEAKER. The gentleman from Ohio asks unanimous consent to consider the bill in the House as in Committee of the Whole. Is there objection?

There was no objection.

The SPEAKER. The Clerk will read the bill for amendment.

The Clerk read as follows:

The name of Augustus R. Dixon, late of Company C, First Battalion, Twelfth Regiment United States Infantry, and pay him a pension at the rate of $12 per month.

The following committee amendment was read, considered, and agreed to:

Page 3, strike out lines 4 to 6, inclusive.

The Clerk read as follows:

The name of Henry F. Baldwin, late first lieutenant Company A, First Regiment Wisconsin Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The following committee amendment was read, considered, and agreed to:

Page 4, strike out lines 3 to 6, inclusive.

The foregoing bill is a substitute for the following Senate bills referred to the Committee on Pensions:

S. 238. William Guhl.
S. 589. Mary E. Macklin.
S. 1083. William Llewellyn.
S. 1211. Buford E. De Vall.
S. 1312. Gilbert Barnett, jr.
S. 1566. Charles E. Stanley.
S. 1586. Arthur G. Bosson.
S. 2305. Henry Koehler.
S. 2432. Augustus R. Dixon.
S. 2537. William N. Russell.
S. 2566. Mary E. McAuley.
S. 2827. Sarah Ann Jones.
S. 3480. Elizabeth A. Tice.
S. 3481. Henry F. Baldwin.
S. 3670. Gertrude M. Phares.
S. 3857. Michael Reynolds.
S. 3896. Mary E. High.
S. 4010. George W. Goodman.

The bill as amended was ordered to a third reading, and was accordingly read the third time and passed.

On motion of Mr. KEY of Ohio, a motion to reconsider the last vote was laid on the table.

PRINTING AND BINDING FOR COMMITTEE ON ELECTION OF PRESIDENT, VICE PRESIDENT, ETC.

Mr. RUCKER. Mr. Speaker, I ask unanimous consent for the present consideration of a resolution which I send to the Clerk's desk, which relates to printing for the Committee on Election of President, Vice President, and Representatives in Congress.

The SPEAKER. The gentleman from Missouri asks unanimous consent for the present consideration of a resolution which will be reported by the Clerk.

The Clerk read as follows:

House resolution 509.

Resolved, That the Committee on the Election of President, Vice President, and Representatives in Congress be authorized to have such printing and binding done as may be necessary for the use of said committee during the Sixty-third Congress.

The SPEAKER. Is there objection to the present consideration of the resolution?

Mr. MURDOCK. Mr. Speaker, will the gentleman yield?

Mr. RUCKER. Yes.

Mr. MURDOCK. Has not this authorization been granted before?

Mr. RUCKER. No, sir. If it had been I would not ask for it now. I had overlooked it.

Mr. MURDOCK. What printing and binding do you want done?

Mr. RUCKER. I do not know that we want any binding done; but we have had some hearings, and the committee have ordered the hearings printed. They can not have them printed without the passage of a resolution authorizing it.

The SPEAKER. Is there objection to the present consideration of the resolution?

There was no objection.

The resolution was agreed to.

PENSION APPROPRIATIONS.

Mr. BARTLETT. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 15280) making appropriations for the payment of invalid and other pensions of the United States for the fiscal year ending June 30, 1915, and for other purposes; and pending that motion I wish to see if we can agree on some time for general debate. I would inquire of the gentleman from Minnesota [Mr. DAVIS] if he has any suggestions to make as to the time he will need on that side of the House for general debate, to see if we can agree before we go into Committee of the Whole.

Mr. DAVIS. Mr. Speaker, at the present time I have the small amount of seven hours and a half requested on this side, including one hour for the gentleman from Illinois [Mr. HINEBAUGH], who is a member of the subcommittee.

Mr. BARTLETT. I recognize the propriety of giving the gentleman an hour.

Mr. DAVIS. Aside from that hour, six hours and a half are apparently the least we can do with.

Mr. BARTLETT. Mr. Speaker, I will say to the gentleman that I have application on this side for about 2 hours and 40 minutes, not including any time for myself. I should say we wanted two hours and a half on this side. Can the gentleman get along with three hours on that side and give the gentleman from Illinois [Mr. HINEBAUGH] one hour; that is, say, three hours for your side, three hours for this side, and an hour for the gentleman from Illinois [Mr. HINEBAUGH]?

Mr. DAVIS. Mr. Speaker, this is a very important matter, a bill involving an appropriation of $169,000,000 and the final passage of the bill will not take very long. It would seem as if the gentleman ought to consent to a liberal time for general debate.

Mr. BARTLETT. The gentleman from Minnesota understands that, as far as I am concerned, I try to be liberal in dealing with Members of the House. I do not desire to be at all illiberal.

Mr. MANN. Let me make this suggestion. I think we ought to pass this bill before we adjourn to-morrow. I doubt if we would do anything else if we passed it early in the afternoon, for to-morrow is Saturday. Why not let general debate run without limit to-day and then agree to-morrow to close debate in time to pass the bill? There are a number of gentlemen who desire to speak, and it is undoubtedly true that you could not bring up anything new with satisfaction to-morrow afternoon.

Mr. BARTLETT. I realize that what the gentleman from Illinois says is true, and I also realize that Members ought to be permitted to have some leisure on Saturday afternoon. The gentleman's suggestion is that we do not limit debate to-day, but agree to limit it to-morrow?

Mr. MANN. Not to limit it now, but do it to-morrow.

Mr. BARTLETT. Can we agree as to the control of the time?

Mr. MANN. I think so. I think the gentleman from Georgia ought to control the time on that side.

Mr. BARTLETT. Can we agree that general debate shall close to-morrow afternoon at 3 o'clock?

Mr. DAVIS. It will not take over half an hour to pass the bill.

Mr. MANN. I think to-morrow you can fix the time for closing debate without any trouble.

Mr. RUCKER. Mr. Speaker, will the gentleman yield?

Mr. BARTLETT. Yes.

Mr. RUCKER. I do not want to make a useless objection, but I want to appeal to the good judgment of gentlemen here. Ten or fifteen hours' debate does not mean one hour of debate on the pension bill.

Mr. DAVIS. A part of it on our side will be on the bill.

Mr. RUCKER. I want to suggest, Mr. Speaker, that there are other matters of great national importance pressing for consideration in this House. It does seem strange that we must sit here hour after hour, day after day, listening to political debate at the sacrifice of public business.

Mr. MANN. I think that is hardly a fair statement.

Mr. RUCKER. Well, I mean to be fair; I do not mean to be unfair.

Mr. MANN. There are many Members of the House who have the right to be heard in debate in the House who do not interfere very much in the five-minute debate, and they ought to have an opportunity at some time to be heard on the many questions of public interest.

Mr. RUCKER. I heartily concur in that.

Mr. MANN. They ought to have an opportunity to be heard on personal, political, and other matters of public interest. The gentleman has a bill that I am as anxious should pass as he is, but I do not think it would pass to-morrow afternoon.

Mr. RUCKER. If the gentleman has the same apprehension I have, he must at least fear we will not get it passed at this session at all.

Mr. MANN. Oh, I do not think so.

Mr. RUCKER. We must pass it in time to get it to the Senate and give the Senate an opportunity to consider and pass it.

Mr. MURDOCK. If the gentleman will pardon me, the gentleman from Missouri may not have been present and heard the Speaker say yesterday that after the disposition of this pension appropriation bill the gentleman from Missouri was to have recognition.

Mr. MANN. Recognition of the chairman of the Committee on Rules.

Mr. RUCKER. He said he would recognize the chairman of the Committee on Rules.

Mr. MANN. To report a rule for the consideration of the gentleman's bill.

Mr. RUCKER. Unquestionably; but as far as that bill is concerned, the gentleman from Missouri will not consume more than 15 minutes. If time is consumed, it will be by others.

Mr. MANN. The gentleman might. We can not always tell.

Mr. RUCKER. If you will let the gentleman from Missouri have his way, he will not.

Mr. MANN. Mr. Speaker, I ask unanimous consent that time for general debate be equally divided between the gentleman from Georgia [Mr. BARTLETT] and the gentleman from Minnesota [Mr. DAVIS], with the understanding that the gentleman from Illinois [Mr. HINEBAUGH] gets at least one hour.

Mr. RUCKER. Mr. Speaker, I am going to do that which I never did before in my life and which I am ashamed to do.

Mr. MANN. Then do not do it.

Mr. RUCKER. I will do it. If the time of the House is to be wasted for the purpose, possibly, of defeating other legislation, I am going to have a quorum here to transact business.

Mr. MURDOCK. And hold it here all through general debate?

Mr. RUCKER. Yes.

Mr. MURDOCK. That is quite a job.

Mr. MANN. I hope the gentleman will not do that.

Mr. RUCKER. I want to say that I do not always answer the gentleman from Kansas seriously.

Mr. BRYAN. Mr. Speaker, will the gentleman yield? I want in a way to support the gentleman from Missouri as to important business pressing for consideration by reading a telegram from the governor of Washington to myself. It is as follows:

OLYMPIA, WASH., *April 30, 1914.*

Hon. J. W. BRYAN, M. C.,
House Office Building, Washington, D. C.:

Unless bill providing method for direct election of United States Senators is passed by Congress within a short time our State will be under necessity of calling special session of legislature to make proper provision. Will it be possible to get early action?

ERNEST LISTER, *Governor.*

Now, that is the situation. A number of States will have to call a special session of the legislature unless this measure of the gentleman from Missouri is passed.

The SPEAKER. The Chair has stated three different times that as soon as we get through with the pension appropriation bill he will recognize the chairman of the Committee on Rules to call up this bill, or bring in a rule providing for it, and after that is finished he will recognize the chairman of the Committee on Foreign Relations to call up the diplomatic and consular bill.

Mr. RUCKER. Mr. Speaker, I want to make this suggestion to the gentleman from Georgia and other gentlemen interested: The rule which the Committee on Rules will offer will provide for one hour's general debate. I do not believe anybody will want to extend that time. Would not the gentleman consent, under the circumstances, involving the interests of so many States, to dispose now of the Senate bill providing temporarily for the election of Senators? If that is done, I will not object to 20 hours' general debate.

Mr. MANN. The gentleman is not reasonable, and I know he does not want to be unreasonable.

Mr. RUCKER. I am glad the gentleman adds the latter part of his statement.

Mr. MANN. I did not think it was necessary.

Mr. BARTLETT. Mr. Speaker, I do not desire at the present time to say anything with respect to the bill referred to by the gentleman from Missouri [Mr. RUCKER].

Mr. RUCKER. Mr. Speaker, will the gentleman consent to the suggestion which I make?

Mr. BARTLETT. No; I will not consent. This bill has been on the calendar for a month, and it is an important appropriation bill and ought to be passed.

Mr. RUCKER. Mr. Speaker, will the gentleman yield?

Mr. BARTLETT. Yes.

Mr. RUCKER. Mr. Speaker, the bill which I have reference to has been on the calendar for more than a month, is a very important bill, and ought to be passed, and if it had not been for the exercise of the inalienable rights of certain gentlemen by virtue of which time has been absolutely wasted, it would have been a law to-day.

Mr. BARTLETT. Mr. Speaker, I do not consider that I have wasted any time.

Mr. RUCKER. Oh, I did not mention the gentleman. I am surprised that the gentleman thought I had reference to him.

The SPEAKER. Has the gentleman from Georgia any request to make?

Mr. BARTLETT. Mr. Speaker, I request that the time for general debate be divided equally between the gentleman from Minnesota [Mr. DAVIS] and myself, one hour of the time to be allotted to the gentleman from Illinois [Mr. HINEBAUGH].

The SPEAKER. How much time does the gentleman ask for?

Mr. BARTLETT. Mr. Speaker, I have not asked for any definite time.

The SPEAKER. The gentleman from Georgia asks unanimous consent that the time for general debate on the pension appropriation bill be controlled one-half by himself and one-half by the gentleman from Minnesota [Mr. DAVIS], with the understanding that the gentleman from Illinois [Mr. HINEBAUGH] is to have one hour out of the time of the gentleman from Minnesota [Mr. DAVIS]. Is there objection?

Mr. DAVIS. Mr. Speaker, I do not think it is the intention of the gentleman from Georgia to provide that the hour granted to the gentleman from Illinois should come out of the time that I shall control.

Mr. BARTLETT. No, Mr. Speaker.

The SPEAKER. Then the request is that the time be divided equally between the gentleman from Georgia and the gentleman from Minnesota, except that the gentleman from Illinois [Mr. HINEBAUGH] is to have one hour. Is there objection?

Mr. RUCKER. Mr. Speaker, reserving the right to object, that means that there is no limit fixed on general debate.

Mr. MANN. We will fix a limit to-morrow.

Mr. RUCKER. And to-morrow being Saturday, and few Members being on the floor, possibly, because nobody wants to hear some of this debate, therefore they will go on and probably fix the time to close debate some time next Saturday following.

Mr. MANN. Next Saturday is to-morrow. We will do that, and pass the bill.

Mr. RUCKER. Mr. Speaker, for the present I object.

Mr. MANN. Oh, I will ask the gentleman not to object. We will pass the bill to-morrow.

Mr. GARNER. Does the gentleman mean that we will pass the bill referred to by the gentleman from Missouri [Mr. RUCKER]?

Mr. MANN. Oh, no.

Mr. RUCKER. Mr. Speaker, I have some responsibility here, and I am trying to discharge my duties. I do not intend to allow the performances of gentlemen to prevent an effort on my part to discharge my public duty.

Mr. MURDOCK. The gentleman has gone to the limit now.

The SPEAKER. Is there objection?

Mr. MURDOCK. Mr. Speaker, I say to the gentleman that he has gone to the limit already. He has obtained the help of the Committee on Rules.

The SPEAKER. Is there objection?

Mr. RUCKER. Mr. Speaker, I have already objected.

The SPEAKER. The gentleman from Missouri objects.

Mr. BARTLETT. Then, Mr. Speaker, I ask unanimous consent that general debate be concluded not later than 3 o'clock to-morrow, and that the time be equally divided between the gentleman from Minnesota and myself.

Mr. DAVIS. Would not the gentleman make that 4 o'clock?

Mr. BARTLETT. Very well; I will make it 4 o'clock.

The SPEAKER. The gentleman from Georgia asks unanimous consent that general debate upon this bill shall close not later than 4 o'clock to-morrow afternoon, one-half of the time to be controlled by himself and one-half to be controlled by the gentleman from Minnesota [Mr. DAVIS], one hour of the time to go to the gentleman from Illinois [Mr. HINEBAUGH]. Is there objection?

Mr. RUCKER. Mr. Speaker, the gentleman from Illinois [Mr. MANN] is so very persuasive that I will withdraw my objection.

The SPEAKER. The Chair hears none. The question is on the motion of the gentleman from Georgia [Mr. BARTLETT] that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the pension appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 15280) making appropriations for the payment of invalid and other pensions of the United States for the fiscal year ending June 30, 1915, and for other purposes, with Mr. MURRAY of Oklahoma in the chair.

Mr. BARTLETT. Mr. Chairman, this is the annual pension appropriation bill and carries $169,000,000. The last general pension appropriation bill carried $180,000,000. There was a deficiency of some $15,000,000, caused by the enactment of the bill known as the Sherwood bill on June 12, 1912. According to the report of the Commissioner of Pensions there will be required for the fiscal year ending June 30, 1915, $169,000,000 for the payment of pensions. There will be required $150,000 for the payment of fees of examining surgeons. The decrease of $11,000,000 from the amount carried in the bill of last year is due to deaths, which number between 36,000 and 40,000 pensioners a year, or at the rate of 98 and a fraction a day. The decrease in the amount necessary for the fees of examining surgeons is due to the fact that under the service-pension bill and the age fixed for obtaining a pension or an increase in pension examining surgeons are not required to be consulted in order that a place upon the pension roll or an increase of pension may be secured. Ostensibly there will be an unexpended balance of about $6,000,000. We have not seen fit to reappropriate that, because the Commissioner of Pensions, before the Committee on Appropriations, stated that it might be that it would run the amount required too close, and we did not care to reappropriate the amount and then have to come to Congress at the next session and ask for a deficiency.

In the matter of fees of the examining surgeons, Mr. Chairman, the Secretary of the Interior desires a change in that method, and I will put that correspondence in the RECORD so as to show the correspondence, my reply, and while there has been no action of the committee upon it, the members of the committee who have been consulted do not feel inclined to permit the amendment to be incorporated in the bill.

Mr. Chairman, the gentleman from Alabama [Mr. HEFLIN] desires to leave the city at an early hour, and in order to accommodate him I yield him eight minutes, and will take up the discussion of the bill later.

The correspondence referred to is as follows:

DEPARTMENT OF THE INTERIOR,
Washington, May 1, 1914.

Hon. CHARLES L. BARTLETT,
Chairman Subcommittee on Appropriations,
House of Representatives.

MY DEAR MR. BARTLETT: I earnestly recommend that a change be made in the method of payment of examining surgeons of the Pension Bureau for examinations made at the homes of the claimants by substituting a fixed mileage allowance instead of the present method of payment of actual traveling expenses, for reasons which will be fully stated herein

It is suggested that an amendment be placed in the pension appropriation bill, H. R. 15280, reported by you on April 1, 1914, and now pending in the House of Representatives, by inserting on page 2, after line 11, the following:

"And hereafter the fee for each examination made at the claimant's residence shall be $5, and in lieu of actual traveling expenses there shall be paid 20 cents per mile for the distance actually traveled each way, but not exceeding the distance by the most direct route between the surgeon's office and the claimant's home."

The present law on this subject is found in the pension appropriation act approved May 28, 1908 (Stat. L. 35, p. 419):

"And the fee for each examination at the claimant's residence, provided his residence is outside of the corporate limits of the place of the regular meeting of the examining board or of the place of residence of the surgeon making the examination, shall be $5 in addition to the payment of the actual traveling expenses of the surgeon."

The reasons for the amendment desired are these:

As the law now stands, an examination fee of $3 is paid to a surgeon making an examination within the corporate limits either of the place of the regular meeting of the board or of the place of residence of the surgeon making the examination, and an examination fee of $5 is paid to the surgeon when the examination is made outside of said corporate limits.

Under this provision of the law it has been found that a surgeon sometimes travels from 16 to 20 miles to make an examination within the corporate limits and receives a fee of $3, and in other cases he travels less than a mile to make an examination outside of said corporate limits and receives an examination fee of $5. It would therefore seem equitable to fix a definite fee for every home examination and to allow, in addition thereto, a fixed sum for every mile of actual travel required to make the examination, to compensate the surgeon for his actual traveling expenses.

In a decision dated March 18, 1914, the Comptroller of the Treasury states that under the present law a surgeon can not lawfully be paid for the use of his own conveyance. He says: "Payment to the surgeon for the official use of his conveyance, which is not limited to expenses actually incurred by reason of such official use, is not a lawful charge against the United States."

Train schedules are often such that a surgeon in order to make the trip by railroad must be away from his practice for a full day or longer. If a fixed allowance per mile were made in lieu of "actual traveling expenses," the surgeon could travel by any means most convenient to him. Under the proposed law it would be necessary only to ascertain the total distance traveled in making the trip, and this would simplify matters in every way and enable the surgeon to save valuable time.

Under the present law the surgeons find it very difficult to render their accounts properly, as it requires the securing of subvouchers and making notes of every item of expenditure. Every item must be stated separately and the amount expended shown, for the reason that the bureau must report the amount expended for "transportation of persons," "subsistence and support of persons," "subsistence and care of animals," "miscellaneous items," etc., each amount to be reported separately.

I am aware of the growing inclination in Congress to avoid mileage allowances in lieu of actual expenses, and to substitute as far as practicable a per diem basis of payment, but the latter is wholly impracticable in the case of examining surgeons, because the home examination in nearly every case consumes less than one day, and in many cases only a few hours.

Obviously the proposed law would simplify the matter and much time would be saved in various ways. Unless the law be changed, it will probably be difficult to induce the surgeons to leave their practice to make home examinations, and it will be necessary for the bureau to depend upon surgeons who have had no familiarity with the requirements of the bureau.

Cordially,

FRANKLIN K. LANE.

COMMITTEE ON APPROPRIATIONS,
HOUSE OF REPRESENTATIVES,
Washington, D. C., May 2, 1914.

Hon. FRANKLIN K. LANE,
Secretary of the Interior.

MY DEAR MR. SECRETARY: I am in receipt of your letter of the 1st instant relative to a change in the law governing the traveling expenses of examining surgeons in the Pension Bureau.

The paragraph which you suggest is pure legislation and does not contain any provisions which would make it in order on an appropriation bill by retrenching expenditures. A point of order would eliminate it from consideration, and I feel quite certain that in view of the attitude of the House, such an objection would undoubtedly be made. Under these circumstances, I believe that it is not worth while for me to offer it as an amendment. I will, however, bring it to the attention of the committee, so that they may be familiar with it.

I would suggest that you take the matter up with the Committee on Pensions of the Senate, where the rules governing the consideration of appropriation bills are not so stringent as they are in the House.

Very truly, yours,

C. L. BARTLETT.

Mr. HEFLIN. Mr. Chairman and gentlemen of the House, on yesterday the House of Representatives passed unanimously the resolution introduced by me requesting the President to call upon the Government officials and the people of the United States to display the Nation's flag on next Sunday in honor of the mothers of our country. By that act this House has officially recognized and designated the second Sunday in May as Mother's Day. [Applause.] I want to compliment and congratulate the membership of the House for this tender and loving tribute to the mothers of our country.

Within a few minutes Senator MORRIS SHEPPARD, of Texas, will secure the passage of the resolution by the Senate, and before the day is done, Mr. Speaker, the President of the United States will affix his signature to this Mother's Day resolution. [Applause.]

With your indulgence I desire to speak briefly about the mother, the home, and the flag. [Applause.]

The world at times has beat me back in battles I have fought,
Not always has the god, success, touched tasks in which I wrought.
Full oft has fortune dealt a blow instead of bent to bless,
And heartaches followed close upon the heels of happiness.
And often when a solemn woe or grief my heart intoned,
And often when my spirit writhed and all my nature groaned,
There stole refrain that softened pain not born of mortal tongue,
But born of memories old and sweet, the songs my mother sung.

[Applause.]

Mr. Chairman, state government and church government derive their strength and glory from family government, and the good angel of the fireside, the queen of the American home, the American mother, is the most important and best beloved personage in all the world. [Applause.]

John Howard Payne uttered a great truth when he said, "Be it ever so humble, there's no place like home." [Applause.] The man who loves his fireside best is the Nation's best patriot.

The home man's heart turns to, though humble, 'tis fair.
'Tis yearned for the more because woman is there.

[Applause.]

Rome retained her power and prestige until she removed the emphasis from the home and the gods of the fireside fled. The South's eloquent and beloved son, Henry W. Grady, said truly, "The strength of the Republic is lodged in the homes of the people." [Applause.]

Gen. Fitzhugh Lee when asked what is the most beautiful thing in southern social life replied, "Family love in the home." [Applause.]

Mr. Chairman, his answer, though short, is true. The word "home" with us means more than a place to eat and a place to sleep. It is that sacred place where a woman dwells to comfort and to cheer; where husband and wife dwell together in the bonds of a loyal love, and their children are the priceless jewels of the household, where love for right principles is fostered and genuine affection is the wellspring of life. [Applause.] I care not whether it be in a cabin on the hillside or a marble mansion on the mountain top, if sobriety, love, and contentment are there all is well. [Applause.] It should be the ambition of every father and mother, of every son and daughter, to make home the happiest and most attractive place on earth. It is the duty of every man to be diligent in business, to provide well for those dependent upon him, but this alone will not constitute happiness in the home. A woman's heart hungers for more than food and shelter. It craves kind treatment, and the sweet little courtesies of life. It hungers for soul food—sympathy and love. [Applause.] Man delights to look upon the finished product of his own skill and genius. He is pleased to see all about him the evidences of material prosperity, but there is a hunger in his heart that these will not satisfy. It is that soul yearning for the soft exquisite music of a woman's voice and the tender touch of a woman's hand. [Applause.]

Mr. Chairman, beyond society's fashionable halls in the sacred precincts of home, there the real potency of her life is felt; there the splendor of her reign is brightest and best; there she plucks the white feather from the wing of truth and wears it in the crown of gentle modest womanhood. [Applause.]

The ideal home is the Christian home. It may not possess the costly furnishings that grace the palaces of the rich. It may not have in it the sculptor's masterpieces of marble. It boasts of things dearer far than these. It has in it the living statuary carved in God's own image—human beings voyaging toward eternity. [Applause.] The head of the family is a sacred person and the wife of that person, the mother of his children, is the noblest work of God. [Applause.]

If the time should ever come when religion is driven from the courts and capitals of the country, from all designated places of public worship, its last retreat will be the fireside, its last altar place a woman's heart, its last lovely scene a mother with an infant at her knee as she teaches him to lisp the eternal name of God. [Applause.]

The most beautiful thing this side of Heaven is the mother's love for her child. It is the only love amongst mortals that will suffer all things and endure all things. Through poverty and good fortune, through sickness and health, through life to death, it is the same beautiful, unselfish, unchangeable mother love. [Applause.]

And he who harking back to youth goes forth and nobly tries
To color life to match the light that shines from mother's eyes,
And he who with an earnest faith his after life attunes
To those old songs of honest love his mother softly croons,
Will not pride his faltering feet upon the race they've made,
But search his heart and bless the part that mother love has played.

[Applause.]

The mother service is the unheard whisper that speaks aloud in human character. The echoes of her gentle tongue have reached the highest peak and her smile has shed a radiance in the lowliest cabins of earth. [Applause.] All honor to the mothers of our country and all hail to our flag on Mother's Day. [Applause.]

Mr. Chairman, a few days ago some of the boys in blue died for that flag at Vera Cruz. Every one of them was the son of an American mother. They were her contributions to her country and her country's flag. [Applause.] If her boys can fight and die for Old Glory in a foreign land, we can put it to no higher use nor exalt it more than to unfurl it and reconsecrate it in the homeland on Mother's Day. [Applause.]

Mr. Chairman, this patriotic and loving act will give further emphasis to the fact that the strength of the Republic is lodged in the homes of the people; that the hearthstone is the true altar of liberty [applause]; that "the hand that rocks the cradle rules the world." [Applause.] Then, on next Sunday—Mother's Day—let us unfurl the Stars and Stripes, and from every rooftree fly the flag of the Republic. [Loud applause.]

Mr. BARTLETT. Mr. Chairman, I will now further proceed to discuss the bill.

The Secretary of the Interior, in the letter which I shall print, has requested that the committee shall change the manner of payment of fees to examining surgeons, which involves legislation upon this bill, and which, instead of paying them fees limited to $3 and $5, proposes to pay them 20 cents a mile for the distance that they should have to travel in going to see the person examined—the applicant for pension. I did not feel that I could offer that amendment for two reasons: First, because it was legislation upon a general appropriation bill, and therefore subject to a point of order; and, second, because I did not feel that I could call upon the House, which has so recently and on various occasions heretofore expressed its disapproval of that manner of payment for services rendered, even by Members of Congress. And I decline to offer the amendment or recommend its adoption by the committee or the House.

Mr. Chairman, this is a large amount of money to be appropriated for any purpose. We are now nearly 50 years away from the end of the Civil War, out of which the greater amount of pensions carried in this bill grew. It will be observed upon examination of the report that the amount we have paid since 1866 for pensions is $4,586,966,346.09. It is true that embraced in that sum are pensions which we paid up to eight years ago for the Revolutionary War, and up to last year to a pensioner of the War of 1812, and there now remain upon the pension roll 199 pensioners, widows and children of the men of the latter war. It is, Mr. Chairman, to say the least of it, rather peculiar to find myself in a position as reporting from the Appropriations Committee, as I have done heretofore since I have been a member of that committee, the bill which carries this large amount for the payment of pensions, the greater part of which are to be paid to soldiers or dependents for services rendered in the War between the States in 1861 to 1865.

It has always been the policy of the Government, demonstrated by the acts of Congress after the various wars in which we have engaged, to pay liberal pensions to those who have fought the war and to the children and the widows who may have survived them. For myself, Mr. Chairman, I do not carry in my heart any animosity, any dislike, for a real soldier of the Federal Army who fought against the Confederate forces. I am the son of a Confederate officer who gave four years of service to the war between the States upon the Confederate side. I realize it to be a fact that if the Confederate forces had succeeded there would have been no doubt liberal pensions provided for the survivors of that war. The various States composing the Southern Confederacy tax themselves very burdensomely in order to pay pensions to men who served in the Confederate Army and to their survivors. The people of Georgia willingly and cheerfully bear the burden of that taxation. I was myself a member of the legislature which provided for a constitutional amendment granting pensions to the widows of Confederate soldiers. We in the South—at least I believe that to be the sentiment—have no opposition to pensions being paid to real soldiers. It was my pleasure the other day to meet for the first time a Federal soldier who left both his legs upon a battle field in Virginia and who had to get about upon artificial limbs. He was a real soldier. I refer to the present register of wills, Corp. Tanner, whom I had never met before. I would not begrudge a dollar or vote against giving a soldier of that kind and that character a liberal pension. I think he is entitled to it and ought to have it. I would not vote against appropriating money that would pension a soldier who had re-

ceived wounds or incurred diseases or disability in the service of his country. I would not vote in the Legislature of the State of Georgia against giving pensions to Confederate soldiers who were of the one hundred and twenty and odd thousand that Georgia sent to the war. I do not believe, however, that the mere fact of a service of 60 or 90 days ought to entitle a man to a pension unless he is destitute or indigent. I do not know whether this pension roll is a roll of honor or not. I do know, from statements made and charges and evidence, that there are those upon it who were not entitled to be upon it by reason of the services that they rendered. I have nothing to say and no animosity in my heart against and nothing but admiration and love for the real soldier who bore the brunt of the fight for four years and who now receives a pension.

I resided in that locality which was swept by Sherman's march to the sea. My family and my friends suffered desolation and destruction of property and hunger and want by reason of that march. And yet I have no opposition to pensioning the real soldiers of the Federal Army who were wounded or received disabilities and who are indigent; but I do object and protest that those who were camp followers, destroyers, and plunderers, who received large bounties and then jumped them and were again enlisted in the Army, and who followed in the wake of the Army, should not by special provision or other provision be provided with a pension by this Government merely for enlisting and being on the rolls for 90 days.

The animosities of the war, so far as I am concerned and so far as my people are concerned, have died out, and this very week there is assembled in a southern city, near the sea, in Florida, the meeting of the United Confederate Veterans. And one of the things that is to be celebrated is the return of a Federal battle flag taken by a Confederate regiment or company in one of the battles, and the governor of Ohio has sent a special messenger to receive from that old Confederate company the battle flag of an Ohio regiment, to be returned to Ohio.

The real soldiers on both sides of that great struggle honor and respect each other. They march arm in arm and hand in hand when they meet together. It is only those who never smelt gunpowder except to run away from it who undertake to keep alive the animosities of the war.

Mr. CLINE. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Georgia yield to the gentleman from Indiana?

Mr. BARTLETT. Yes, sir.

Mr. CLINE. I want to inquire if another fact does not evidence the dying out of any animosity, and that is the fact that the governor of Ohio has invited the Confederate veterans to hold their next reunion at the city of Columbus?

Mr. BARTLETT. Yes; I was going to state that. That is a fact. I know the governor of Ohio personally, and I know that that sentiment comes from his heart, and that it is representative of the governor of Ohio and the old Union veterans of Ohio who really took active part in the Civil War.

Mr. Chairman, I do not know when this great pension roll will be decreased, except by the natural decreases in the death of those now upon the roll. I would be glad if I could see some suggestion that it would be decreased. But if we will have war, if we will have foreign wars and civil wars and civil strife, we must pay for them in pension rolls. The Spanish-American War to-day has been the cause of a pension roll amounting to something like $29,000,000. So, if we must have armies and navies, if we must fight wars, we must pay the penalty, not only in outright blood and treasure, but history shows that we must mortgage posterity as well to pay the pensions that men receive from having engaged in war or from receiving wounds or contracting diseases.

It has been the policy of the country to do that—to take care of them by pensions. I do not approve of the entire policy. I did not vote for the Sherwood bill. I did not vote for these other bills. My idea is that a pension should be based upon service, upon wounds and disease contracted, and should be given to those who are unable to make a livelihood for themselves. I do not believe that a pension should be paid to those who are not in want or in need. I do not believe that the American soldier would be less patriotic and perform his duty with less valor and heroism if he did not, as has been suggested sometimes, know that he was to receive a pension.

Mr. Chairman, there are some other things that I desire to say with reference to another matter, but I shall reserve my time, and now yield to the gentleman from Minnesota [Mr. HAMMOND]. I yield him 45 minutes. I will resume my remarks at some time later.

The report on this bill will give full information as to this bill.

[House of Representatives, Report No. 486, Sixty-third Congress, second session.]

PENSION APPROPRIATION BILL.

Mr. BARTLETT, from the Committee on Appropriations, submitted the following report, to accompany H. R. 15280:

The Committee on Appropriations, in presenting the bill making appropriations for the payment of invalid and other pensions for the fiscal year 1915, submit the following in explanation thereof:

The estimates on which the bill is based will be found on page 357 of the Book of Estimates for 1915, and amount to $169,150,000.

The accompanying bill appropriates $169,150,000.

The following statement gives, by appropriate title of expenditure, the amounts appropriated for 1914, the estimates for 1915, and the amounts recommended in the accompanying bill for 1915:

Title of expenditure.	Appropriations for 1914.	Estimates for 1915.	Recommended for 1915.
Payment of pensions	$180,000,000	$169,000,000	$169,000,000
Fees of examining surgeons	300,000	150,000	150,000
Total	180,300,000	169,150,000	169,150,000

The reduction, from $180,000,000 for 1914 to $169,000,000 for 1915, in the appropriation for payment of pensions is in accordance with the annual estimates submitted to Congress and is approved by the Commissioner of Pensions in statements made by him to the committee.

The reduction in the amount for payment of fees of examining surgeons in pension cases is also in accordance with the estimates and the recommendation of the Commissioner of Pensions from $300,000 for 1914 to $150,000 for 1915; this service is largely diminished, for the reason that many who are put on the pension roll now because of age and service are not required to submit to medical examination.

TOTAL EXPENDITURES FOR PENSIONS.

The following table, taken from the report of the Commissioner of Pensions, shows the amounts paid by the Government in pensions to soldiers, sailors, and marines, their widows, minor children, and dependent relatives, on account of military and naval service since the foundation of the Republic:

War of the Revolution (estimated)	$70,000,000.00
War of 1812 (service pension)	45,923,014.46
Indian wars (service pension)	12,241,273.61
War with Mexico (service pension)	47,632,572.34
Civil War	4,294,596,944.47
War with Spain and Philippine insurrection	42,185,230.84
Regular Establishment	28,461,369.52
Unclassified	16,499,419.44
Total	4,557,539,824.68

The following table, also compiled from the annual reports of the Commissioner of Pensions, shows the number of pensioners on the roll, the annual value of pensions, the disbursements on account of pensions, the number of original applications filed, and the number of original claims allowed each fiscal year from 1879 to 1913, inclusive:

Fiscal year.	Number of pensioners on the roll.	Annual value of pensions.	Disbursements on account of pensions.	Total number of applications filed, original.	Total number of claims allowed, original.
1879	242,755	$25,493,742.15	$33,664,428.92	57,118	31,346
1880	250,802	25,917,906.60	56,689,229.08	141,466	19,545
1881	268,830	28,769,957.46	50,583,405.35	31,116	27,394
1882	285,697	29,341,101.62	54,313,172.05	40,939	27,664
1883	303,653	32,245,192.43	60,427,573.81	48,776	38,162
1884	322,756	34,456,600.35	57,912,387.47	41,785	34,192
1885	345,125	38,990,985.28	65,171,937.12	40,918	35,767
1886	365,783	44,708,027.44	64,091,142.90	49,895	40,857
1887	406,007	52,824,641.22	73,752,997.08	72,465	55,194
1888	452,557	56,707,220.92	78,950,501.67	75,726	60,252
1889	489,725	64,246,552.36	88,842,720.58	81,220	51,921
1890	537,944	72,052,143.49	106,094,250.39	105,044	66,637
1891	676,160	89,247,200.20	117,312,690.50	696,941	156,486
1892	876,068	116,879,867.24	139,394,147.11	246,638	224,047
1893	966,012	130,510,179.34	156,906,637.94	119,361	121,630
1894	969,544	130,120,863.00	139,986,726.17	57,141	39,085
1895	970,524	130,048,365.00	139,807,788.98	45,361	39,185
1896	970,678	129,485,587.00	138,215,174.08	42,244	40,374
1897	976,014	129,795,428.00	139,949,717.35	50,585	50,101
1898	993,714	130,968,465.00	144,651,879.80	48,732	52,648
1899	991,519	131,617,961.00	138,335,052.95	53,881	37,077
1900	993,529	131,534,544.00	138,462,130.65	51,964	40,645
1901	997,735	131,568,216.00	138,531,483.84	58,373	44,868
1902	999,446	132,152,800.00	137,504,267.99	47,965	40,173
1903	996,545	133,029,090.00	137,759,653.71	52,325	40,136
1904	994,762	134,130,203.00	141,093,571.00	55,794	44,296
1905	998,441	136,745,295.00	141,142,861.33	52,841	50,027
1906	985,971	138,237,749.00	139,000,288.25	37,212	34,974
1907	967,371	140,850,880.60	138,155,412.46	43,619	29,945
1908	951,687	159,495,701.00	153,093,086.27	46,619	37,691
1909	946,194	160,682,870.32	161,973,703.50	35,789	45,086
1910	921,083	158,332,391.82	159,974,056.08	31,777	28,027
1911	892,098	154,834,237.80	157,325,160.35	30,601	25,519
1912	860,294	151,558,141.40	152,986,105.22	27,692	22,777
1913	820,200	171,490,784.82	174,171,660.80	27,856	19,346

The first payments made on new certificates each year for the past five years, with the averages, and the averages of first payments by classes during the past year are shown in the commissioner's report as follows:

First payments during the last five years.

Fiscal year.	Number.	Amount	Average.
1913	433,995	$18,250,225	$42.05
1912	78,781	4,096,502	53.00
1911	93,632	4,842,925	51.72
1910	91,448	4,858,504	52.13
1909	124,634	6,489,416	52.07

Average first payments in each class.

Average value of first payments:	
In original cases	$88.78
In original Regular Establishment cases	104.46
In original act May 11, 1912, cases	74.47
In original act Feb. 6, 1907, cases	192.98
In original general law, Civil War cases	136.45
In original act June 27, 1890, cases	261.20
In original act Apr. 19, 1908, cases	62.53
In original War with Spain cases	254.90
In increase and reissue cases	39.83
In original War with Mexico cases	150.03
In original Indian wars cases	192.54
In all cases	42.05

REFERENCES.

Navy pension fund: Section 4755 of the Revised Statutes provides that Navy pensions shall be paid out of the "Navy pension fund," upon an appropriation by Congress, so far as the same may be sufficient.

The naval pension fund at present amounts to $14,000,000, bearing interest at the rate of 3 per cent per annum, and is created under the provisions of sections 4751 and 4752 of the Revised Statutes.

The payments on account of Navy pensions during the fiscal year 1913 aggregated $6,021,684.84.

Number of pensioners in each State and Territory, each insular possession, and each foreign country on the rolls June 30, 1913, and the amounts paid therein during the fiscal year 1913.

[Report of Commissioner of Pensions, p. 27.]

State or Territory.	Number.	Amount.	Country.	Number.	Amount.
Alabama	3,230	$685,825.90	INSULAR POSSESSIONS.		
Alaska	80	16,986.40

SUMMARY.

	Pensioners.	Payments.
Pensioners residing in States and Territories and payments to them	814,502	$172,950,861.51
Pensioners residing in insular possessions and Canal Zone and payments to them	203	43,102.99
Pensioners residing in foreign countries and payments to them	5,495	1,166,753.35
Total	820,200	174,160,717.85
Payments by Treasury Department (Treasury settlements)		10,942.95
Total payments on account of Army and Navy pensions, 1913		174,171,660.80

The number of Civil War survivors on the roll at the end of the fiscal year 1912 was 497,263, and at the end of the fiscal year 1913 was 462,379.

The number of Civil War survivors on the pension roll who died during the fiscal year ended June 30, 1912, was 33,891, and the number who died during the fiscal year ended June 30, 1913, was 36,064.

Disbursements for pensions and for maintenance of pension system, 1866 to 1913.

[Report of the Commissioner of Pensions, p. 9.]

SPECIAL ACTS.

[Report of Commissioner of Pensions, p. 9.]

Since 1861 there have been allowed by special acts of Congress 42,337 pensions and increases of pensions, of which 22,016 are now on the roll, with an annual face value of $6,699,096. Only a part of this is properly chargeable to special acts, as most of the beneficiaries had been previously pensioned under general laws at lower rates.

From June 30, 1912, and thereafter during the Sixty-second Congress, 2,871 persons were included in the special acts passed at the rates specified in the summary following:

Pensions granted by special act during the Sixty-second Congress subsequent to June 30, 1912.

Rates specified.	Number granted.	Rates specified.	Number granted.	Rates specified.	Number granted.
$100	3	$20	398	Inoperative:	
$50	98	$18	6	$50	8
$46	1	$17	6	$40	4
$45	2	$16	32	$36	9
$40	116	$15	20	$30	33
$36	164	$14	2	$24	16
$35	2	$12	403	$20	3
$30	972	$10	15	$16	4
$25	16	$8	9	$12	4
$24	518	$6	7	Total	2,871

Of the above, 461 were granted to persons not in receipt of a pension and 2,410 to persons then receiving smaller pensions.

The annual value of said special-act pensions is $864,624, and the annual increase due to the same is $407,157.

The following statement shows the number of pensions and increases of pensions granted by special acts during each Congress since March 4, 1861:

Number of pensions granted by special acts each Congress since Mar. 4, 1861.

Congress.	Number.	Congress.	Number.
Thirty-seventh (1861-1863)	12	Fifty-first (1889-1891)	1,388
Thirty-eighth (1863-1865)	27	Fifty-second (1891-1893)	217
Thirty-ninth (1865-1867)	138	Fifty-third (1893-1895)	119
Fortieth (1867-1869)	275	Fifty-fourth (1895-1897)	378
Forty-first (1869-1871)	85	Fifty-fifth (1897-1899)	694
Forty-second (1871-1873)	167	Fifty-sixth (1899-1901)	1,391
Forty-third (1873-1875)	182	Fifty-seventh (1901-1903)	2,171
Forty-fourth (1875-1877)	98	Fifty-eighth (1903-1905)	3,355
Forty-fifth (1877-1879)	230	Fifty-ninth (1905-1907)	6,030
Forty-sixth (1879-1881)	96	Sixtieth (1907-1909)	6,600
Forty-seventh (1881-1883)	216	Sixty-first (1909-1911)	9,649
Forty-eighth (1883-1885)	598	Sixty-second (1911-1913)	6,350
Forty-ninth (1885-1887)	856		
Fiftieth (1887-1889)	1,015	Total	42,337

The CHAIRMAN. The gentleman from Minnesota [Mr. HAMMOND] is recognized for 45 minutes.

Mr. HAMMOND. Mr. Chairman, before the passage of the Underwood tariff bill it was generally known that the rates would be reduced, and many importers ordered and purchased goods and produce for delivery after the passage of the legislation. The bill itself became a law on the 3d day of October, 1913, and for the next two or three months imports were exceedingly heavy.

I intend this afternoon to call your attention to some of the importations during the four months following its enactment—October, November, and December of 1913 and January of 1914—one-third of a year. I take it that I will not underestimate the importations for the year if I assume that they will be three times as great as the amount received during those four months, and upon that basis I have made some calculations to which I invite your attention.

Now, gentlemen, I suppose no political party can frame a tariff bill that will be satisfactory in all particulars to all of the people of the United States, or even satisfactory to all the members of the party fashioning it. There are things in the recent tariff bill objectionable to me. The bill was made for the entire country—for the West and the East and the South and the North.

The State of Minnesota differs in many respects from other States. It has different interests, and naturally they appeal strongly to one who comes from that State. For instance, during the last three years, both in quantity and in value, more than one-half of all the iron ore produced and marketed in the United States came from the State of Minnesota. It by far outranks any other State in the production of iron ore.

Minnesota, too, is a great agricultural State, not so great as the greatest agricultural State of all, Illinois, but a State that ranks high. I notice that in the production of oats last year Illinois stood first; Iowa, second; Minnesota, third; in the production of wheat North Dakota stood first; Kansas, second; and Minnesota, third; in the production of barley Minnesota stood first.

I speak of these things simply to indicate the importance that a representative from Minnesota may attach to the particular things in which that State is so prominent. It has been called the bread-and-butter State of the Union. Its flour, from which the bread is made, is sold all over the world, and its dairy butter is famous throughout the country. The largest flour mill in the world is located in the metropolis of the State—the Pillsbury A flour mill, with a capacity of 15,000 barrels a day, and actually making 11,000 barrels of flour every day. One-fourth of the entire flour output of the United States goes out of the city of Minneapolis. I spoke of its being the leading State in the production of barley. The enormous amount of 49,727,130 bushels of that cereal were produced there in 1913; more than the total production of Canada.

I said that the tariff bill was made for no particular State, but for all of the States of the Union. Of course there were a great many people who were dissatisfied with it because some privilege or some benefit or some favor that they had enjoyed under former tariff laws had been taken away. Some of us may have unduly exaggerated its importance because it was a measure of our political party. Others were bound to find fault with it, bound to quarrel with it, because it was a measure of our party and not of theirs. It has its enemies; and while I would not charge anyone, no matter how partisan he may be, with desiring panics, hard times, and business depression in order that some political advantage may be worked out of them, I can not but believe that the persistent attempts to decry the bill and to misrepresent its effects cause apprehension and distrust throughout the country, and apprehension and distrust usually breed industrial stagnation and disaster.

Out through the Northwest it has been stated repeatedly that it is a bill which discriminates against the North and favors the South. I take it no one really believes that the persons who made the bill attempted to favor any particular section of the country or attempted to injure any section of it.

An examination of the items of the bill gives little color for any such charge. For instance—and I shall refer to this but briefly, for I have other matters to discuss—an effort was made to put upon the free list the things entering into the production of manufactured products—the raw materials. Raw silk is not produced in this country. It is on the free list. Cotton in the South and wool in the North are on the free list. Flax in the North and hemp in the South have been treated just alike. They are on the free list. Iron ore produced in the North and in the South, lumber on the Pacific coast and in the South, and cattle raised in the West, the North, and the South were put upon the free list. The barley of Minnesota and the rice of Louisiana were treated just the same, the duty being reduced 50 per cent. The potatoes of Maine and the sweet potatoes of the South were treated exactly the same.

Not all of those who opposed tariff reduction gave themselves over to denunciation, however. It gives me pleasure to read here to-day the words of one who was perhaps as much opposed to the present tariff law as any one in this Chamber, and who is not converted yet. He accepted it as an American business man and patriotic citizen should accept it. I read what William M. Wood, head of the American Woolen Co., said concerning this tariff bill after its passage. He was opposed to it, is opposed to it to-day, but I commend to you the spirit in which he received the enactment of the American Congress:

OPTIMISTIC.

We have a new tariff. All criticism of the bill, pro and con, is of the past. The matter is settled—it is as desired by the majority—it is the law.

American people are accustomed to taking conditions as they find them and forcing their way to success. Our forefathers hewed the forests, quarried the rock, and dammed the streams. Their sons developed the land, raised their livestock, and manufactured what was required for their simple needs. Succeeding generations tilled the soil, worked the mines, and manufactured goods to a degree never before known to man.

American industry typifies a genius which has no equal throughout the world.

To excel in manufacture is a birthright handed down to every American by his forefathers—and to-day, with conditions changed, with temporary annoyances balking our endeavors, we mean to claim our birthright.

Now, after words such as these, it is refreshing to read this news item under date of March 26, 1914:

WOOLEN MILLS BOOM UNDER LOWER TARIFF.

BOSTON, *March 25.*

The American Woolen Co.'s gross business thus far this year is nearly twice that of a year ago, and although the prices named on its goods to stimulate this activity have been very close, the outlook is more promising than at any time since the new tariff came into being.

It is noticeable that the bulk of 1914 orders has been of staples which form the output of the big Lawrence mills.

[Applause.]

When you find a man who does not like tariff reduction, but realizes that it is the law of the land, and instead of barking and howling about it says, "I will do the best I can under it," it is pleasant to learn of his success and to hear that his business has nearly doubled.

Another thing that has been said about this tariff bill is that it discriminates against the farmer of the country, and that he suffers greatly because of it. Early in March of this year the steamship *Empress of Asia* brought 12,000 cases of eggs from China to Vancouver. Six thousand cases were consigned to San Francisco and 6,000 to Vancouver. During the months preceding there had been importations of eggs from China, and although I have made no investigation I believe there were few eggs imported from that country prior to the passage of the tariff act. This was not on account of the amount of the tariff duty, but because it was a specific duty. The eggs exported from China are very small and inferior. They command a low price in the market. Sixty per cent of them go to Germany. Our duty upon eggs was a specific duty of 5 cents a dozen; it made no difference whether the eggs were large and fair or whether they were small and inferior. The very duty itself, because it was a specific duty, discriminated against the poorer product. Had the duty of 5 cents a dozen been changed to 30 per cent ad valorem Chinese eggs would have come in here, because then there would have been no discrimination. Five cents a dozen on eggs worth 10 cents a dozen is 50 per cent

ad valorem; on eggs worth 30 cents a dozen only 25 per cent ad valorem. But the Payne-Aldrich tariff men thought they could make capital out of these importations of eggs. There went up a cry throughout the country "China with its millions of people, and presumably billions of hens, is attacking the United States egg market, and the American hen will be driven out of business." Not long after that the Philadelphia Public Ledger, on April 17 of this year, announced the loss by the western farmer of the corn trade in the East.

The article stated that the seaboard markets are either chockfull of corn from Argentina or that corn is coming in in large amounts. We produce in the United States 75 per cent of all the corn raised in the world, and yet because corn comes here from Argentina they tell us our corn trade is ruined. Argentina with a total population less than twice the population of a single American city. They will send their corn here and drive our farmers out of business. We are told that chilled or frozen beef is coming into the United States from Argentina at the rate of 9,000,000 pounds monthly. What a wonderful country that is, sending corn here to destroy our corn market and sending beef here to destroy our beef market.

Now, we do not export a large percentage of our corn, even though twice as many bushels as Argentina will send here. We feed it to steers, and market corn-fed beef. There is nothing better on the market. In Argentina they do not do it that way. They ship the corn—practically all of it—they do not themselves eat, and feed their cattle on alfalfa. We are in no serious danger from the competition of alfalfa-fed cattle against corn-fed cattle.

But I have some figures. I may as well confine myself to these three things—eggs, corn, and beef. Eggs carried a duty of 5 cents a dozen; now they are on the free list. Corn, 15 cents a bushel; now on the free list. Beef, 1½ cents a pound; also on the free list. On these products the duty was entirely removed. Wheat, from a duty of 25 cents a bushel, was reduced to 10 cents a bushel. Potatoes, from a duty of 25 cents a bushel, was reduced to 10 per cent ad valorem. Oats, from a duty of 15 cents a bushel, was reduced to 6 cents a bushel. Barley, from a duty of 30 cents a bushel, was reduced to 15 cents a bushel. Cleaned rice, from a duty of 2 cents a pound, was reduced to 1 cent a pound. Butter, from a duty of 6 cents, was reduced to 2½ cents. So I have selected the three that are on the free list where the greatest importations might be expected.

I am particularly struck with the fact that nearly all these dreaded importations come from Argentina. The Argentine Republic, with a large area, about one-third of the United States, has an approximate population of seven and a half million people. Thirty thousand of them are Indians and one million and a quarter of them live in one large city, the capital, Buenos Aires, where the cost of living is higher, I am informed, than in any other place in the western world. How many of the remainder of this population are farmers I do not know, but there are numerous cities and towns. The agricultural population is not very large. Do you think they can capture the American markets?

Now, gentlemen, we endeavored to make what is called a competitive tariff, and by a competitive tariff we mean one that will permit the importation into the markets of this country of things that will compete with things produced in this country but sold in noncompetitive markets. If a dozen men or a dozen corporations control the output of an article, and they make an agreement to sell it at a certain price, there is no competition, and we ought to have importations from abroad, if we can get them, in order to secure competition, so that there may be a fair and competitive market in which the American consumer can trade.

We admit that wherever prices are controlled by combinations or agreements or by monopoly and we can bring in like products from other countries uncontrolled by any such agreement or monopoly, there will be a tendency toward price reduction. But where we have competition at home, where there is strong domestic competition, then the importation of other products from abroad will not materially affect the prices unless the quantity is so great as to create an oversupply.

The farmers of this country are in no combination; they have no agreement; they constitute no monopoly; they are competitors and always have been competitors and always will be competitors. A man who raises wheat or who raises corn or who brings eggs to the market is in no combination, and he sells under no agreement as to price. There is full and free competition, and the price at which he sells is not affected by the increase or the decrease of importations unless such increase or decrease be large enough either to create an oversupply or to bring about a scarcity.

Mr. BURKE of Wisconsin. Will the gentleman yield?

Mr. HAMMOND. I will.

Mr. BURKE of Wisconsin. I want to call the attention of the gentleman from Minnesota to the fact that American beef this spring is as high as it has been for several years past, notwithstanding the importation of Argentine beef.

Mr. HAMMOND. I am going to give to the House what seems to me to be an absolute demonstration that the prices of beef and of farm products are higher this spring than one year ago.

Mr. GOOD. Will the gentleman yield?

Mr. HAMMOND. Yes.

Mr. GOOD. I want to ask the gentleman if he thinks that is a fair comparison?

Mr. HAMMOND. Yes.

Mr. GOOD. Take, for instance, corn. We had last year only about a three-quarters crop, and, as the gentleman well knows, when there is a shortage of a crop as a general rule it is followed by an increase in the price of that article. For instance, in Kansas last year they produced 23,000,000 bushels of corn. If it sold at 60 cents a bushel, that would mean $13,000,000. The year before they produced 180,000,000 bushels of corn, which, if sold at 60 cents, would have yielded them more than $100,000,000. Does the gentleman think that the farmers of Kansas ought to be satisfied last year with $13,000,000 for the corn crop when they had $100,000,000 the year before?

Mr. HAMMOND. Permit me to answer. There was a shortage of the corn crop last year, a shortage so great that it would take 30 years of the Argentine importations to make it up. The gentleman's reasoning is very good, but let me tell the gentleman that during the same year we did not have a shortage in the wheat crop, but we had a bumper crop, and the price of wheat is higher than it was a year ago. There is no shortage about that. Now, I will yield to the gentleman from Michigan.

Mr. HAMILTON of Michigan. Pardon me for calling attention to the Democratic platform, which has been somewhat discredited lately in spots, but was it not a declaration of that platform that protection was the cause of high prices and that you proposed to reduce high prices by reducing duties?

Mr. HAMMOND. I think I understand the gentleman's question. The Democrats have always claimed that the prices to the consumer would be reduced somewhat by the reduction of tariff duties.

Mr. HAMILTON of Michigan. But they have not been so reduced.

Mr. HAMMOND. I will come to that in just a moment, if the gentleman will wait.

Mr. CLINE. Mr. Chairman, will the gentleman yield?

Mr. HAMMOND. Yes.

Mr. CLINE. Mr. Chairman, I have taken occasion to make an investigation of the prices on 12 leading farm articles for the last 10 years in the markets of Chicago and New York, and of those 12 leading farm articles for 10 years, on the 1st day of March 9 of them are higher this 1st day of March than they have been any time in the last 10 years. I shall put that in the RECORD as soon as I have an opportunity.

Mr. HAMMOND. Mr. Chairman, I am very glad the gentleman intends to do that. I come to the gentleman from Michigan [Mr. HAMILTON] now. The question may be asked, in view of what I said, How is it that the farmers can get better prices for all of their products and still the high cost of living be reduced?

Mr. Chairman, I have stated our purpose was to write a competitive tariff bill, a bill that would restore competition where there is no competition. We do not expect, and can not expect by competition, to reduce prices where there is competition now, but we might expect that there would be a reduction of prices where there is no competition. There is a vast difference between the amount the farmer receives for his product and the amount the ultimate consumer pays for the same product. I think it was a Senator from North Dakota who made an estimate not very many years ago that, according to the prices charged to you and to me in the restaurant in this building, a $75 steer would bring about $2,000. Where market men get together and fix the prices to be charged the consumer of farm products, we hope by importation of products from abroad to beat the combination and make the price less to the man who has to buy. That does not affect the price at which the farmer sells.

Mr. KELLEY of Michigan. Mr. Chairman, will the gentleman yield?

Mr. HAMMOND. Yes.

Mr. KELLEY of Michigan. Referring to the question of the importation of beef from Argentina, the gentleman stated it was about 9,000,000 pounds per month?

Mr. HAMMOND. It has been so stated.

Mr. KELLEY of Michigan. That would be about 100,000,000 pounds of beef per year?

Mr. HAMMOND. I do not know how long it is intended to keep it up.

Mr. KELLEY of Michigan. That would be 1 pound per annum for each person in the United States?

Mr. HAMMOND. That is a mathematical computation. What is the gentleman's question?

Mr. KELLEY of Michigan. Does the gentleman think that would seriously reduce the price of beef to the consumer? Is that sufficient competition, in the gentleman's judgment, to reduce the price to the consumer?

Mr. HAMMOND. No; it is not sufficient competition to reduce the price materially to the consumer; neither is it sufficient competition or importation upon which the opponents of tariff reduction can base a claim that we are upon the verge of ruin because of importations from Argentina.

Mr. HAMILTON of Michigan. Mr. Chairman, will the gentleman yield?

Mr. HAMMOND. Yes.

Mr. HAMILTON of Michigan. Did not your Democratic President hold out to the people who live in cities the prospect of cheaper commodities to go into the market basket?

Mr. HAMMOND. Yes.

Mr. HAMILTON of Michigan. Was not that the constant argument in the last campaign; and did you not, therefore, pursuant to that policy, reduce duties on farm products in order to make the things that go into the market basket cheaper?

Mr. HAMMOND. Mr. Chairman, I will state again to the gentleman, as I have stated several times, that we endeavored to make a competitive tariff bill, a bill that would bring competition where no competition existed, a bill that would not seriously affect the prices for which our products were sold in markets where competition did exist.

Mr. HAMILTON of Michigan. One more question and then I shall not trouble the gentleman further. Does not the gentleman concede that the importation of Argentine corn, some of which has already gone to Chicago, the very heart of the corn belt, some of which has already gone to Oklahoma—does not the gentleman concede that the importation of this corn must force down the price of corn to the western farmer?

Mr. HAMMOND. No; I do not concede that. I answer the gentleman somewhat abruptly, if he will pardon me, simply because I wish to hurry on.

Mr. RAINEY. Mr. Chairman, is it not a fact that only one carload of corn has reached Chicago, and that was sent there for experimental purposes, to see if it could be fed to chickens?

Mr. HAMILTON of Michigan. Mr. Chairman, 240,000 bushels of corn have——

The CHAIRMAN. The gentleman must first get permission of the gentleman who has the floor. The gentleman is out of order.

Mr. HAMILTON of Michigan. I addressed the Chair.

The CHAIRMAN. Will the gentleman from Minnesota yield to the gentleman from Michigan?

Mr. HAMMOND. I yield to the gentleman.

The CHAIRMAN. The gentleman may proceeed.

Mr. HAMILTON of Michigan. I asked the gentleman to permit me to interpose at this place this statement in answer to the chicken-feed suggestion of the gentleman from Illinois [Mr. RAINEY], that already 240,000 bushels of Argentine corn has been contracted for to arrive in Chicago by way of Montreal, and that corn has also——

Mr. RAINEY. I said that only one carload has gone there.

Mr. HAMILTON of Michigan. The gentleman should first address the Chair, as the Chair is insisting upon it.

The CHAIRMAN. The Chair will state that when he rapped for order he was trying to prevent the gentleman from Illinois from interrupting the gentleman from Minnesota without permission.

Mr. HAMILTON of Michigan. I thank the Chair for his consideration.

Mr. GOOD. Mr. Chairman, will the gentleman yield for a brief question?

Mr. HAMMOND. Yes.

Mr. GOOD. Right along the line of the gentleman's answer to another question, in Cedar County, Iowa, a farmer wrote me that he had been offered 65 cents a bushel for his corn in the field early in November. In December, after notice had been published of the importations of large quantities of Argentine corn, he hauled it to town and sold it for 53 cents a bushel. He did not sell for 65 because he thought it was going to 75. Now, I would like to have the gentleman tell me why corn dropped that much in the course of a month in the face of the great shortage of the corn crop in the State of Iowa, if it was not due to the importation of corn from Argentina.

Mr. HAMMOND. The gentleman knows as well as I do that prices fluctuate from month to month. I have here a list of prices, and I think the gentleman sold his corn perhaps fairly well. I notice in a little country market——

Mr. GOOD. He did not think so.

Mr. HAMMOND. Well, I can not help that. I notice in a little country market in Minnesota the price of corn the 6th of March was 50 cents; on the 20th of March it was 53 cents. Now, I do not suppose any news had reached that market of the loss of a cargo of corn bound from Argentina to the United States, and that the reported loss of such a cargo caused corn to go up 3 cents. Markets fluctuate, but not on account of Argentine activity. The prices of farm products are much better since this tariff law went into effect than before. I am not going to deal in buncombe. I do not claim the tariff has made farm prices better, but I do claim that it has not affected them.

Mr. HAMILTON of Michigan. I would like to ask the gentleman a question——

Mr. HAMMOND. I think I will have to decline to yield to the gentleman. I am very sorry.

Mr. HAMILTON of Michigan. Very well.

Mr. HAMMOND. The Payne-Aldrich tariff advocates say when importations come into this country the supply is greater and the price is less. I will grant you that importations of any product would naturally decrease the price.

If, first, there is but one market for the domestic product, because if there are dozens of other markets then the product will find the market where the demand exists. If Argentina, for instance, should, instead of exporting her products to the countries of Europe, send them all here, then the countries of Europe would find some market in which to purchase the things formerly obtained from Argentina. Increased importations may reduce the price if there is but one market in which to sell the commodity. *If, second*, the supply is very largely increased—I might carry a cupful of water from Lake Champlain and throw it into Lake Superior. It would increase the amount of water in Lake Superior, but the result would not be appreciable. It would not affect navigation of the lake, and so it is true that infinitesimal importations are not going to affect prices. *If, third*, the demand or the consumption is not correspondingly increased, of course if there is a greater demand in the country than there was formerly, then the importations would not affect prices; they would simply meet the demand.

Mr. THOMAS. Will the gentleman yield?

Mr. HAMMOND. In just a moment. Will the chairman of the committee give me 15 minutes more?

Mr. BARTLETT. Yes; I will yield 15 minutes additional to the gentleman. I believe I told the gentleman that if it was needed I would give him an hour.

Mr. HAMMOND. I will now yield to the gentleman from Kentucky [Mr. THOMAS].

Mr. THOMAS. As I understand the gentleman from Michigan [Mr. HAMILTON], he complains that 240,000 bushels of corn are threatened to be imported into Chicago. That would be, upon the basis of about 3,000,000 of population which the city of Chicago has, a little over a quart of corn to each inhabitant of Chicago. I wish to ask the gentleman if he thinks that that quart of corn to each inhabitant would glut the market and decrease the price of corn?

Mr. HAMILTON of Michigan rose.

Mr. HAMMOND. I must decline to yield. I will answer the question of the gentleman from Kentucky by saying that I think——

The CHAIRMAN. Does the gentleman yield to the gentleman from Michigan.

Mr. HAMMOND. Mr. Chairman, I must decline to yield further.

Mr. HAMILTON of Michigan. I really would enjoy answering——

The CHAIRMAN. The gentleman declines to yield.

Mr. HAMMOND. I do not think that we will be seriously affected by the importation of corn from Argentina.

Mr. RAINEY. Will the gentleman yield for just one remark?

Mr. HAMMOND. I will.

Mr. RAINEY. I want to say I have investigated the question of the shipment of Argentine corn to Chicago, and it costs 22 cents a bushel for freight alone to ship from the upper Plate corn from the Argentine Republic to Chicago. I have investigated the question, and I find this feed store over on the

corner, which is the largest in the city, reports that they can not bring Argentine corn here and sell it as cheaply as they can bring in Ohio yellow corn, and this market in Washington is supplied at the present time with Ohio yellow corn cheaper than it can be brought from Argentina.

Mr. HAMILTON of Michigan. Will the gentleman yield?

Mr. HAMMOND. I will yield now.

Mr. HAMILTON of Michigan. Concerning first the observation of the gentleman——

Mr. HAMMOND. I can not yield for a statement.

Mr. HAMILTON of Michigan. Then I will ask the gentleman a question. Is it not true that the water rate on corn from Argentina to New York is from 5 to 7½ cents a bushel?

Mr. HAMMOND. Yes; I think so.

Mr. HAMILTON of Michigan. And the water rate on corn from Argentina to Chicago by way of Montreal is a little over 7 cents instead of being 24 cents. The gentleman from Illinois [Mr. RAINEY] is just the same sort of a lightning calculator as the gentleman from Kentucky [Mr. THOMAS]. Is it not true, also, that this Argentine corn has taken all the New England market away from the corn growers of the West, and that the New York, New Haven & Hartford Railroad has made a new freight rate from tidewater to New England ports? And is it not true that for several months past little corn has gone from the corn belt to New York? And is it not true, further, that the Corn Products Co. is buying 75 per cent of the Argentine corn?

Mr. HAMMOND. The gentleman is in error as to the rate from Argentina to Chicago. Argentine corn has not captured the New England markets. I can not remember all his questions, but with the exception of his first statement in reference to the rate from Argentina to New York the statements are incorrect.

Mr. HAMILTON of Michigan. And that is the only one you undertake to answer?

Mr. HAMMOND. I state that they are not so, and I know of no other way to answer incorrect statements.

Mr. HAMILTON of Michigan. Have you any figures with which to refute them?

Mr. HAMMOND. I have them; yes.

I proposed taking up as well as I might three things—eggs, corn, and beef. I am trying to be fair about this. I am assuming that the importations for the first four months after the tariff passed, for the reasons I have given, are as large or larger than they will be in any other four months of the year. So in calculating the importations for a year I have multiplied the amount for the four months by three. We imported in October, November, December, 1913, and January, 1914, 2,885,561 dozen eggs into this country. They were worth $612,759. At the same rate for the year the total value of our importations would be $1,838,277. Now, we exported in 1912 $3,395,953 worth. Our exports of eggs, therefore, are double our imports. The average price paid for the eggs we exported in 1912, the average price paid to us, was 22 cents a dozen, and the average import price on eggs brought into the United States was 13.7 cents a dozen. I submit there is not very much harm in importing eggs at about 14 cents a dozen if we can export twice as many at 22 cents a dozen.

But a little more in connection with this matter. The consumption of eggs in the United States in 1910 was an amount valued at $320,739,375. The imports for this year are about one-half of 1 per cent of our consumption. I said a little while ago that I could put more water in Lake Superior by carrying a cupful from Lake Champlain, but it would not materially affect Lake Superior. Now, gentlemen, do you think, with our consumption of $320,000,000 worth of a product, we are going to be seriously affected by importations of one-half of 1 per cent? Why, we produced in the United States in 1910 1,591,000,000 dozens of eggs. In 1900, 10 years before, we produced 1,293,000,000 dozens of eggs. The gain in 10 years was 297,000,000 dozens; and during that period the State of Missouri alone, which produced more eggs than any other State in 1910, gained in production 26,613403 dozens. The 26,000,000 dozens gained in the State of Missouri in 10 years is a greater number than the total exports of eggs from China to the entire world, and 60 per cent of those exports go to the German Empire.

In the course of marketing eggs in the United States three-tenths of them are damaged from bad handling and one-tenth are broken; that is, one egg out of every ten is broken; and we can not do what the king and all his men could not do—we can not put it together again. It is lost. If the American people would exercise a little more care and, instead of breaking as many eggs as they break now, would break only half as many we would save each year 79,000,000 dozen eggs, and it would take nine years for the importations of eggs coming from China and from all other places to this country to make up that number.

Now, in reference to corn. The total corn importations in October, November, and December, 1913, and January, 1914, were 7,034,159 bushels. That would make for a year 21,102,477 bushels. Our exports in 1912, including corn meal, were 41,797,291 bushels; so our exports are just about double our imports. In 1912 we had an enormous production—3,124,746,000 bushels. But while that production was enormous, it was not abnormal. Our exports and our imports combined are only about 2 per cent of that production.

The importations are about two-thirds of 1 per cent, so we are in no immediate danger of having our markets taken away from us. A gentleman asked me if it is not true that certain markets—I do not remember where they were—had been taken away from the western farmer by the Argentine corn. What nonsense! Taken away by some portion of two-thirds of 1 per cent. Of course it is not true. The statement is based upon some such article as that which appeared in the Philadelphia Ledger, stating that the seaboard markets are chock full of corn and more is on the way.

The gentleman from Iowa [Mr. GOOD] spoke about the corn shortage. Our shortage in 1913 was 677,748,000 bushels, a tremendous amount. But even with that shortage the United States of America produced 68 per cent of all the corn raised in the world.

In North and South America there are 130,000,000 acres of land planted to corn—105,000,000 in the United States, 13,000,000 in Mexico, and 10,000,000 in Argentina.

Argentine corn brings a less price in our markets than does American corn. I am told that it responds to chemical tests and is good corn. But in our country we like the yellow dent corn. It looks the best. I believe it is the best. Anyway it commands a price in the market that the Argentine corn does not often reach. Argentine corn is largely of the flint variety.

That is not alone true in the United States. We have been sending our corn to Great Britain and Argentina has been sending its corn to Great Britain, one the competitor of the other, and three years out of five the American corn brought the better price.

Before I refer to the importations of beef, let me say a word concerning wheat: Notwithstanding the statements industriously circulated by those who desire to create a prejudice among the farmers against the present tariff law, and who do not hesitate to use misrepresentations in their attempts to arouse such prejudice, wheat imported into this country is subject to a duty of 10 cents a bushel, except wheat from Argentina. Russia, including Asiatic Russia, is the greatest wheat-raising nation of the world, but should any of its product come to American ports a duty of 10 cents a bushel would be levied upon it. The Canadian wheat crop is, perhaps, one-third of our own, and the wheat raised in Western Canada is of excellent quality. During the past year, much of the time, the Canadian price was better than our own. Just how they compare now I can not say, but, generally speaking, the Minneapolis price is better than the Winnipeg price. American farmers, as a general thing, receive a better price for their wheat than do their Canadian neighbors. The difference in price, or the spread between the markets, is less than 10 cents a bushel, save in exceptional cases, but the Canadians can not bring their wheat into our markets without paying a duty of 10 cents a bushel on it. The tariff law levies a duty of 10 cents a bushel on wheat imported into this country from any country that imposes a duty upon wheat or products of wheat imported from this country into it. Now, under this provision wheat might be imported free of duty into the United States from Finland, the Netherlands, Denmark, Great Britain, and Argentina. The wheat raisers of this country were told that so valuable is the American market that the Canadian Government would hasten to remove all of its duties on wheat and wheat products, so that it might send its wheat free of duty into the United States. In a speech by me in April, 1913, in support of the present tariff law, I said:

> But certain gentlemen say: "Do not you know that just the moment this bill becomes a law Canada, through her governor general or some other official who has the power, with one stroke of the pen will strike out the duty now imposed on American flour, so that Canadian flour may come into the United States?" No, Mr. Chairman; we do not know it, nor does anyone else know it, but those acquainted with the history of recent tariff enactments have good reason to believe that Canada will do nothing of the kind.

Mr. Collins, the editor of an agricultural paper published in Minnesota, who champions the Payne-Aldrich tariff law and loses no opportunity to make statements he thinks may discredit the present tariff law, in a letter written to the American Economist—the organ of high protection—under date of December 27, 1913, stated:

> There is not one chance in a million of Canada's failing to remove her tariff on American grain, since it is protection only on paper and

not in reality, for, of course, we are not sending American grain over into Saskatchewan or Manitoba.

We might send wheat into Saskatchewan and Manitoba, but it would not ruin the Canadian wheat market if we did. So Argentina may send some wheat to the United States, but it would not ruin the American wheat market if it does.

But to continue with Canada. On January 30 of this year a free-wheat amendment was proposed to the address in reply to the speech from the throne in the Canadian Parliament and was defeated by a vote of 102 to 57. This was in the nature of a test vote and clearly indicated that the Canadians had no intention of removing their tariff duties in order to send wheat into the United States. On April 7 of this year the minister of finance of the Canadian Government made his annual budget statement, and the proposition to remove the duty on wheat and wheat products was finally rejected. So unless there is a decided change of opinion in Canada wheat coming from the Dominion into the United States will pay a tariff duty of 10 cents a bushel.

So free-wheat importations must come from Argentina. The wheat crop of Argentina for 1912–13 was 198,000,000 bushels. I can not give the exports for that year, but for 1911 83,993,460 bushels were exported. The wheat production of the United States for 1912 was over 730,000,000 bushels, and for 1913 it was 763,380,000 bushels. Our exports of wheat in 1912 were 30,160,212 bushels, valued at $28,477,584. Now, the wheat we exported was sold in the markets of the world in competition with the wheat from Argentina and wheat from other parts of the world. If we can sell over $28,000,000 worth of this cereal in the world's markets in competition with the wheat raised in other countries, is it not reasonable to suppose we can successfully market our crop in our own markets, even though we were obliged to meet such competition? The farmer who sells his wheat does not receive any less for it because it is exported; the market price of wheat is the same whether it is retained for home consumption or is sent abroad to supply a foreign demand.

The statistical department of the Argentine ministry of agriculture gives the production cost of wheat on a farm of 618 acres, 6 miles from a railroad; 484 acres of the farm were sowed to wheat and the balance was pasturage. The cost of production was 66 cents per bushel and the yield 15 bushels to the acre—a trifle less than the Minnesota yield for 1912, which was 15.5 bushels per acre. Farm labor in Argentina is nearly as high as it is in our wheat belt.

Of course, we may expect importations of wheat from Argentina and from Canada. We imported wheat before the enactment of the Underwood tariff bill, and we will continue to import it. Our consumption is increasing, and year by year we send less of our wheat abroad, and in the natural course of things the imports will be greater and greater as the consumption in this country increases, because the increase in production is not keeping up with the increase in consumption.

The gentleman from Iowa who referred to the shortage in the corn crop attributed the better prices of corn this year over last year to that shortage. The tables I am submitting show that wheat is selling at a better price this year than last year, and that can not be due to a wheat shortage, for we raised last year the biggest crop of wheat ever produced in this country.

The importations of wheat have not affected the price, nor have the importations of corn affected the price; that is, they have not affected the price the man who raises the wheat and the corn receives for his product. If wheat or corn in a given market place is cornered or monopolized, and the price thereby raised, then importations may tend to bring down that price. Then there will be competition where there was no competition.

Since Argentine wheat may come into this country free of duty we may look for increased importations from the southern Republic, but every bushel of the wheat, manufactured or unmanufactured, coming here, lessens Argentina's exports to other countries by just one bushel, and those other countries will seek to purchase that bushel somewhere else.

In 1911 the importations of wheat into the United Kingdom from Argentina were a little larger than from the United States, but the next year—1912—the Argentine importations, although considerably greater than the year before, were less than those from the United States. The United Kingdom must have wheat, either made into flour to feed the English people or for its great port mills, where it is made into flour. Let the importations from Argentina fall off, the greater will be the demand for American wheat; let the American supply fail, the greater will be the demand for the Argentine crop. As I said before, it matters not to the farmer, when he hauls his wheat to the elevator and receives his pay for it, whether that wheat remains in the United States or goes out of the United States; there is always a market somewhere for the staff of life.

Potatoes, too, like wheat, are subject to duty when imported into the United States, if they come from a country that imposes duties upon potatoes imported from the United States. Canada has a tariff upon potatoes, so when imported from Canada they are subject to an ad valorem tariff charge of 10 per cent. During the first four months under the new tariff law there were imported into the United States 3,261,705 bushels of potatoes. This would indicate a total annual importation of somewhat less than 10,000,000 bushels. The advocates of special privilege, in their attacks upon the Underwood law, will try to make the farmers believe that such a tremendous importation as 10,000,000 bushels will compel them to sell their potatoes for less than heretofore, and probably some farmers will believe them; but they would take little stock in the argument of these opponents of low tariff if they knew that during the year 1912 the United States imported nearly 14,000,000 bushels of potatoes. If the farmers could prosper with so large an amount of potatoes coming in here, it is quite likely they will get along comfortably under the new tariff law with importations nearly a third less.

I now present market statements of St. James, Minn., March 7, 1913, March 6, 1914, and March 20, 1914. They are taken from a weekly paper published there.

It appears that in nearly every instance the prices are better this year than last year. These are the prices the farmer receives:

Comparative statement of market prices for March, 1913, and March, 1914, at St. James, Minn., and market prices at Slayton, Minn., for April, 1913, and April, 1914.

[1] Not shown on report quoted. [2] Not quoted. [3] 3 cents lower than 1913.

Just a word about importations of meat. We must import meat, tariff or no tariff. The gentleman from Michigan [Mr. KELLEY] asked me if I thought the importations of meat would reduce its cost to the consumer, and I said that I feared they would not materially reduce the cost. I had in mind importations of beef from Argentina. The export business of that country is mainly controlled by American packers. There are nine establishments for slaughtering, chilling or freezing, and exporting beef located in or near Buenos Aires; five are owned or operated by Chicago houses. We would indeed be credulous were we to believe that these Chicago-controlled companies in Argentina will bring their Argentine beef to the United States for the purpose of lowering the price of their American beef. As I have stated several times, we may look for reduced prices when importations will give us competition, but there is no competition between Chicago packers in the United States and Chicago packers in Argentina.

Why do I say, "We must have importations"? This is the reason: In 1910 there were 41,178,000 meat cattle in the United States; in January, 1914, 35,855,000. During the last four years there has been an average annual decrease of 1,330,000, or 3.3 per cent. In 1910 there were in the United States 52,448,000 sheep; in January, 1914, 49,719,000; an average annual decrease since 1910 of 682,000, or 1.3 per cent. In 1910 there were in this country 58,186,000 swine; January 1, 1914, there were 58,933,000, an increase for the four years of 1.3 per cent. Now, during that time, from 1910 to 1914, the population of the United States increased from 91,972,000 to 98,646,000. Compared with our population—that is, taking into account the increase of population and the decrease of sheep and cattle and the small increase in swine, and comparing their number to each 100 of the population in 1914 with the number to each 100 of the population in 1910—there is a shortage in milch cows of 4.4 per cent; in other meat cattle, 19.2 per cent; in sheep, 11.6 per cent; and in swine, 5.2 per cent.

These statements, if not in themselves alarming, certainly are reasons enough why we must have importations of meat into the United States, and we may look for such importations from Argentina.

I have been unable to find reliable statistics of the number of cattle and sheep in Argentina during the last few years, but from December, 1909, to December, 1910, the number of neat cattle increased less than 4 per cent, but the number of sheep increased about 25 per cent.

I called the attention of the House a year ago to our great increase of exports of manufactured articles and the great decrease in our exports of farm products. Our urban population is increasing much more rapidly than our rural population, and unless we materially increase the yield per acre of our land the time is not far distant when we must look beyond our own boundary lines for food. Irrespective of tariff rates or tariff changes our importations of food products are likely to increase.

From 1900 to 1910 the United States increased in population 21 per cent. In that same period the average of our cereal production increased but 3.5 per cent, and the yield in 1909 was only 1.6 per cent greater than in 1899. In 1899 we produced of cereals 58.4 bushels per head, in 1909 49.1 bushels per head. The demand for importations will bring importations, but, as I have tried to show, it does not follow that on account of the importations of farm products the farmers will receive less for the things they raise.

I have already presented market reports from two small towns in Minnesota showing that practically everything the farmer raises brings a better price this year, after the enactment of the Underwood tariff law, than last year under the Payne-Aldrich tariff. I now present a table showing the Chicago market prices. They are taken from the files of the Daily Trade Bulletin in the office of J. R. Whitney & Co., and were prepared by the Carroll Times, an Iowa paper. The quotations of prices were taken for commodities on the Chicago Board of Trade on the dates specified.

February, 1913, came in on Saturday. The dates for which quotations are given are, therefore, February 1, 8, 15, and 21. There was no session of the board of trade on Saturday, February 22, a public holiday. The Saturdays of 1914 most nearly corresponding to these were January 31, February 7, 14, and 21. These are the dates for which the following quotations were reported in the Daily Trade Bulletin, and we invite doubters to consult the files themselves for verification or refutation of the figures given by us. The corn prices quoted are the cash prices for No. 3 mixed, on track, Chicago, which is selected as a standard grade. Any other grade might be chosen, but the lesson taught by the quotations would be the same. The prices given on wheat are for No. 2 spring. The prices quoted on hogs are the lowest and highest, including both light and heavy grades, but excluding "pigs." The quotations on cattle are for "steers, medium to choice."

CORN—NO. 3 MIXED, ON TRACK, CHICAGO.

	Low.	High.
1913.		
Feb. 1	48	50
Feb. 8	49½	50½
Feb. 15	47½	49½
Feb. 21	47½	49
1914.		
Jan. 31	60½	63
Feb. 7	60	64
Feb. 14	59½	63
Feb. 21	59½	64

WHEAT—NO. 2 SPRING.

	Low.	High.
1913.		
Feb. 1	88	90
Feb. 8	88	90½
Feb. 15	87	89
Feb. 21	87	89½
1914.		
Jan. 31	88½	90
Feb. 7	89½	91½
Feb. 14	91	92
Feb. 21	93	95

LIVE HOGS—LIGHT AND HEAVY.

1913.		
Feb. 1	7.30	7.70
Feb. 8	7.85	8.10
Feb. 15	8.00	8.35
Feb. 21	8.15	8.40
1914.		
Jan. 31	8.25	8.50
Feb. 7	8.45	8.72½
Feb. 14	8.25	8.60
Feb. 21	8.40	8.75

CATTLE—STEERS, MEDIUM TO CHOICE.

1913.		
Feb. 1	7.50	8.25
Feb. 8	7.60	8.25
Feb. 15	7.90	8.50
Feb. 21	7.90	8.50
1914.		
Jan. 31	7.85	8.85
Feb. 7	7.85	8.65
Feb. 14	7.75	8.65
Feb. 21	7.85	8.60

The Chicago prices for eggs in February, 1913, ranged from 15 to 24 cents. The prices for February, 1914, have thus far ranged from 24½ to 27 cents.

Next, I present a table showing the comparative wholesale prices of 12 commodities selected from 106. In connection with this table let me say that Bradstreet's index number of commodity prices has followed a downward course this year for the third time. The fall is only three-tenths of 1 per cent for the interval between February 1 and March 1. The present index number is the lowest reported since October, 1911, and it is lower than the numbers reported on March 1, 1913, 1912, 1910, and 1907.

Now, notwithstanding this general downward tendency of prices, the 12 articles selected, being all of the farm products listed, with the exception of butter, indicate prices this year higher than those of a year ago.

Comparative wholesale prices of 12 commodities.

TWELVE QUOTATIONS RULING FOR STANDARD GRADES AT THE HIGH POINT ON DEC. 1, 1912, MAR. 1, 1913, AND MAR. 1, 1914.

[From Bradstreet's.]

Commodities.	Dec. 1, 1912.	Mar. 1, 1913.	Mar. 1, 1914.
Wheat, No. 2, red winter, in elevator	$1.06	$1.10	$1.05
Corn, No. 2, mixed, in elevator	.66	.61	.725
Oats, No. 2, mixed, in elevator	.37	.38	.455
Barley, No. 2 (Milwaukee)	.72	.70	.70
Rye, western	.68	.70	.685
(All of above per bushel.)			
Beeves, best, native steers (Chicago)	11.00	9.00	9.65
Sheep, prime (Chicago)	4.65	6.85	6.25
Hogs, prime (Chicago)	7.65	8.50	8.55
(All of above per 100 pounds.)			
Milk (New York) per quart	.050275	.04275	.0475
Eggs, State, fresh (New York) per dozen	.42	.25	.31
Butter, creamery, State, best per pound	.37	.36	.315
Potatoes, eastern per 180 pounds	1.75	1.87	2.75

Last of all I present a table showing the prices paid to farmers for corn, wheat, oats, barley, rye, buckwheat, potatoes, flaxseed, hay, and cotton on the 1st day of April 1914, and the 1st day of April, 1913. The average for the United States shows higher prices this year for all of these products. This table has been prepared by the Department of Agriculture:

Prices to producers of agricultural products Apr. 1, 1914 and 1913.

[Cotton in cents per pound; hay, dollars per ton; other products, cents per bushel.]

State.	Corn.		Wheat.		Oats.		Barley.		Rye.		Buckwheat.		Potatoes.		Flaxseed.		Hay.		Cotton.

From the tables which have been presented the conclusion reached is a conclusion of fact. Notwithstanding the reductions in the new tariff law and the importations which have followed its enactment, the farmers of the United States are receiving better prices for their products than they received a year ago. From the statistics which have been presented a conclusion may be reached based upon facts, and that is that there is no occasion for the farmers to fear that importations from other countries will affect the prices they can secure for their products.

The Payne-Aldrich tariff bill was denounced in the platform of the Democratic Party and in the platform of the Progressive Party; it received but faint praise in the platform of the Republican Party; it was repudiated by the people of the United States. The Democratic Party was delegated to write a new tariff law; it has accomplished its task. It promised to reduce the tariff duties; it has done so. Last October the question was squarely put to the Members of this body, "Will you vote for a tariff law reducing tariff duties, or will you stand for the Payne-Aldrich tariff schedules?" There was no other proposition; it was a choice between the Underwood tariff law and the Payne tariff law. Those who voted for the Underwood bill voted against the Payne bill, and those who voted against the Underwood bill voted for the Payne bill. The supporters of the Payne-Aldrich bill have heretofore attempted to make the farmers of the country believe that the Underwood bill discriminated against their products; they will probably continue their efforts. Some farmers may believe them, but those who read and those who think will not believe them. Here are the demonstrations proving that since the new tariff law was enacted the prices of the things they sell have increased and the prices of much that they buy have decreased, and they can look forward to the certainty of good markets without fear of low prices. [Applause on the Democratic side.]

Mr. AUSTIN. Mr. Chairman, may I ask the gentleman a question?

The CHAIRMAN. Does the gentleman from Minnesota yield to the gentleman from Tennessee?

Mr. HAMMOND. Yes; if the gentleman will be quick.

Mr. AUSTIN. Does the gentleman mean to tell us that the result of the tariff bill is to increase the cost of the necessaries of life?

Mr. HAMMOND. I explained that fully.

Mr. AUSTIN. I was not in the Chamber at the time. I simply wanted to know if that is the gentleman's opinion, that the result of the tariff bill has been to increase the cost of the necessaries of life?

Mr. HAMMOND. I made the statement that I was not trying to deal in buncombe.

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

Mr. BARTLETT. Mr. Chairman, will the gentleman from Minnesota use some of his time?

Mr. DAVIS. Yes. I yield to the gentleman from Illinois [Mr. HINEBAUGH] one hour, or so much thereof as he desires to consume.

The CHAIRMAN. The gentleman from Illinois [Mr. HINEBAUGH] is recognized for one hour.

Mr. HINEBAUGH. Mr. Chairman, I would like to have it understood that the part of the hour which I do not use is reserved by me.

The CHAIRMAN. The Chair understands that the time belongs to the gentleman from Illinois in his own right.

Mr. DAVIS. That is the understanding.

Mr. BARTLETT. He has the hour to dispose of as he sees fit.

Mr. DAVIS. Yes.

Mr. HINEBAUGH. Mr. Chairman, I fully realize that the subject of the recall of judicial decisions and the growth of the power of the judicial branch of our Government is a dry subject, and that very probably I shall not be able to present it to you in an entertaining manner. But the platform of the Pro-

gressive Party, upon which I was elected to this body, provided among other things as follows:

THE COURTS.

The Progressive Party demands such restriction of the power of the courts as shall leave to the people the ultimate authority to determine fundamental questions of social welfare and public policy. To secure this end, it pledges itself to provide:

1. That when an act, passed under the police power of the State, is held unconstitutional under the State constitution, by the courts, the people, after an ample interval for deliberation, shall have an opportunity to vote on the question whether they desire the act to become a law, notwithstanding such decision.

Mr. Chairman, my purpose in addressing the House on this subject at this time is only to show that the basic principle of the doctrine of recall of decisions is very old, and that the protest against the ever-increasing power of the judicial branch of the Government originated with the Marbury decision, and has continued unabated ever since.

There are now eight States in which the recall has been adopted by constitutional amendment—Oregon, California, Arizona, Arkansas, Nevada, Idaho, Washington, and Colorado.

Two methods are used. The Oregon plan, which means that an official sought to be recalled appears on the ballot as a candidate for reelection. A plurality vote elects. The California plan under which the question of recall is voted on separately. If a majority of those voting vote for recall, the plurality candidate succeeds to the office. The voter, however, must vote on recall before voting for the candidate.

The doctrine of recall as applied to administrative offices is rapidly becoming popular in every State, and is not violently opposed by any political party.

The recall as sought to be applied to judges and judicial decisions is strenuously opposed by the two old parties as being revolutionary and subversive of good government. They say it is an attack on the check and balance theory of our forefathers, when they established the executive, legislative, and judicial branches of the Government with the view of constitutional independence for each department.

Alexander Hamilton, the brilliant leader of the Federalist Party, saw that his ideas of concentrating the powers of Government could not be carried out successfully under the Constitution by means of the executive and legislative departments, because they were too responsive to the people and too easily reached by them. Hamilton did not believe in the rule of the people. He did not believe they were capable of self-government.

The defeat of Adams and the triumphant election of Jefferson, who stood for the rule of the people and the sovereignty of the State, made plain to Hamilton that the Constitution was a "frail and worthless fabric," and he immediately turned to the judicial branch of the Government as to an ark of safety, which the Constitution had placed beyond the reach of public opinion and the people.

John Marshall, who had been Secretary of State for Adams, was selected for Justice of the Supreme Court as the strongest and best equipped Federalist to carry forward Hamilton's idea of a powerful judiciary. It should be remembered that the Federalists had just been expelled, root and branch, from all those departments of the Government which under the Constitution could be reached by the people, and that Hamilton, Adams, Marshall, and their followers actually believed that the rights of persons and property and all the interests which they regarded as sacred were put in jeopardy by the election of Jefferson. Jefferson believed in the people. They feared the power of the people at the ballot box.

It is only natural to suppose that under such impressions the leaders of the Federalist Party would make haste to strengthen that branch of the Government to which they now turned to preserve their theories. Immediately after it became certain that the people had turned them out of power they availed themselves of their authority under the Constitution to establish new courts in all the States of the Confederacy and in the District of Columbia. Adams appointed three judges for each court for life or during good behavior—21 judges in all outside of the District of Columbia—every one of whom was placed beyond the power of the new Government under Jefferson that had been selected by the people to succeed the Federalists. Among the midnight appointments which Adams made were 42 magistrates for the District of Columbia, all of whom were to hold their offices for a period beyond that for which the President himself had been elected.

Adams sent the nominations to the Senate on the 2d of March. They were confirmed during the night of the 3d and Jefferson found them on the table in the Department of State the next morning. The commissions had not been delivered. Jefferson held that delivery was necessary to make them effective, and at once directed Madison, his Secretary of State, to destroy them.

Jefferson's course in refusing to sanction the appointments made by Adams furnished the desired opportunity to the Federalists to institute proceedings for mandamus to compel Madison to deliver the commissions. Out of this controversy grew the celebrated case of Marbury *v.* Madison (1 Cranch, U. S. Reports, 137).

The judges of the Supreme Court were all Federalists and the Chief Justice was none other than President Jefferson's old-time political enemy, John Marshall, the ablest judge that ever occupied a seat upon the bench of the Supreme Court. No man perhaps was ever more strictly just or legally honest; but he entertained during his whole public life as a Member of Congress, Secretary of War, Secretary of State, and supreme judge Federal principles and prejudices of the most intense character, and consequently no man in the Nation better equipped to carry out Hamilton's ideas of government could have been found.

Jefferson was advised that steps would be taken by the friends of Adams to compel him to deliver the commissions to the judges who had been appointed, and he at once took measures to defend and maintain the dignity of the Executive Department of the Government. Madison, as Secretary of State, was advised not to make himself a party to any act which could be construed as a recognition of the authority of the judicial branch of the Government to meddle in the affair.

Hamilton directed a motion to be entered at the December term of the Supreme Court, asking for a rule on Madison to show cause why a writ of mandamus should not issue commanding him to deliver the commissions to the judges, whom Adams had nominated.

Notice of the motion was served on Madison, but he paid no attention to the matter and refused to appear in court. He also declined to answer any questions relative to the commissions, and did not in any manner recognize the right or power of the court to hear the questions involved, much less to pass judgment upon them.

The Supreme Court, however, with John Marshall as Chief Justice, proceeded to hold an "ex parte" hearing.

Three questions were presented for the consideration of the court: First, could the Supreme Court award the writ of mandamus in any case; Second, would the writ lie to a Secretary of State in any case whatever; Third, could the Supreme Court in the present case award a writ of mandamus to James Madison, Secretary of State?

Of course, every lawyer will now admit the very first question to have been determined was the question of jurisdiction. Did the Supreme Court have jurisdiction to hear and determine the case?

If the court determines that it is without jurisdiction to hear the case, then it should not attempt a hearing on the merits, and much less should the court attempt to render a decision on the merits.

Under the Constitution it was evident that the Supreme Court was without jurisdiction to try the case, and such was finally the unanimous opinion of the court; but Marshall reversed the order of consideration of the points involved in the case and actually wrote an opinion on the merits, in which he attempted to show that withholding the commissions was an act unwarranted by law and was a violation of a vested legal right, and then concluded by holding that the Supreme Court had no jurisdiction of the subject and no right to grant the writ of mandamus. The course pursued by Marshall in that case and sanctioned by all the associate judges was most exceptional and absolutely without precedent in English or American law. Under the Constitution it was certain that the court had no original jurisdiction of the subject matter and could not under any state of facts grant the writ of mandamus. Why, then, render a decision on the merits?

A decision on the merits, followed by a denial of the writ for want of jurisdiction, could have had no other purpose than to indicate to the courts of inferior jurisdiction what the Supreme Court would do if such a case was brought before it on appeal. The hearing had been "ex parte," and that was an additional reason for a determination of the question of jurisdiction without touching the merits. The truth is borne out by subsequent history—that the case of Marbury against Madison was a political legal battle between the Federalist and the anti-Federalist idea of government, with Marshall and Jefferson acting as the chief exponents of the contending political thought of the age.

It was the first inroad of the judicial branch of the Government on the power of the executive department, and it laid the foundation for a judicial superstructure that has become an

actual menace to the legislative and executive departments of the Government in State and Nation.

Hamilton, Marshall, and Adams foresaw the great power of the judicial department of the Government under such an interpretation of the Constitution as was laid down in the Marbury case, and knew it could not be checked by the people, for under the Constitution the people could not reach the judges.

The doctrine of the recall of judicial decisions and the limitation of the power of the judiciary found advocates then and there.

In the great fight of President Jackson against the Bank of the United States we see again a feeble effort to limit the controlling influence of the judiciary over the other departments of the Government in regard to questions of constitutional power. Andrew Jackson argued that the division of the powers of the Federal Government into distinct and independent departments was founded on well-established principles of tremendous importance to the welfare of the Nation, and his bank veto message contained the following language:

> If the opinion of the Supreme Court covered the whole ground of this act, it ought not to control the coordinate authorities of the Government. The Congress, the Executive, and the court must each for itself be guided by its own opinion of the Constitution. Each public officer who takes an oath to support the Constitution swears that he will support it as he understands it and not as it is understood by others.
>
> It is as much the duty of the House of Representatives, of the Senate, and of the President to decide upon the constitutionality of any bill or resolution which may be presented to them for passage or approval as it is of the supreme judges when it may be brought before them for judicial decision.
>
> The opinion of the judges has no more authority over Congress than the opinion of Congress has over the judges, and on that point the President is independent of both. The authority of the Supreme Court must not, therefore, be permitted to control the Congress or the Executive when acting in their legislative capacities, but to have only such influence as the force of their reasoning may deserve.

While we can not agree with all the reasoning of President Jackson in this declaration, it is nevertheless a notable fact that Webster assented to most of it, although bitterly opposing Jackson on his bank policy. Webster said:

> It is true that each branch of the legislature has an undoubted right in the exercise of its functions to consider the constitutionality of a law proposed to be passed. This is naturally a part of its duty, and neither branch can be compelled to pass any law or do any other act which it deems to be beyond the reach of its constitutional power. The President has the same right when a bill is presented for his approval, for he is doubtless bound to consider in all cases whether such bill be compatible with the Constitution and whether he can approve it consistently with his oath of office.

Webster, however, concluded, with great force and power, that the Constitution had constituted the Supreme Court a tribunal to decide great constitutional questions, and that when the court had decided such a question it was forever put at rest, and that every department of the Government must acquiesce. This was Hamilton's idea, and it was the principle sought to be established by Marshall in the Marbury case. The continued growth and development of this power of the judiciary has resulted in judicial legislation and a consequent demand by the people for a limitation of the powers of the judicial branch of the Government.

Senator White, in answering Webster, contended that the Constitution vests the judicial power in a Supreme Court and such inferior courts as Congress may from time to time ordain and establish, and that whenever a suit is commenced and prosecuted in the courts of the United States, of which they have jurisdiction, and such suit is decided by the Supreme Court—as that is the court of last resort—its decision is final and conclusive between the parties. But as an authority it does not bind either the Congress or the President of the United States. He argued that if either of these coordinate departments is afterwards called upon to perform an official act, and believes the performance of that act will be a violation of the Constitution, they are not bound to perform it, but, on the contrary, are as much at liberty to decline acting as if no such decision had been made. He declared that—

> If different interpretations are put upon the Constitution by the different departments of the Government, the people is the tribunal to settle the dispute. Each of the departments—executive, legislative, and judicial—is the agent of the people, doing their business according to the powers conferred; and where there is a disagreement as to the extent of these powers, the people themselves through the ballot boxes must settle it.

This is the true view of the Constitution. Beyond question it is the construction which those who framed and adopted it placed upon it. It was the origin of the doctrine of the recall of judicial decision by the people.

The more carefully the questions involved are examined the more apparent becomes the dangers to the well-being and the liberties of our people of the principle under which it is claimed that the judicial branch of our Government has a controlling power over the other departments of the Government relative to constitutional questions.

I contend that nowhere in the Constitution of the United States is the Supreme Court expressly authorized to declare an act of Congress unconstitutional. When it was proposed in the Constitutional Convention of 1787 to give the Supreme Court of the Nation a limited veto upon Congress, the convention refused four different times to permit it.

The Supreme Court for years claimed no such power and made no attempt to exercise it. Mr. Speaker, the Federal Supreme Court is the greatest court in the world. It enjoys jurisdiction and power not claimed by the supreme tribunal of any other nation on the globe. Such a court would not be tolerated in England, France, or Germany. When the legislative bodies of those nations enact a law no court can unmake that law. Measured by its tremendous power, our Supreme Court is unrivaled.

John Marshall, by his interpretation of our Constitution, made the Supreme Court of the United States the most powerful branch of our Government.

He was the Chief Justice of a court that Jefferson said was "advancing its noiseless steps like a thief over the field of jurisdiction," and yet Marshall as a lawyer in earlier years when arguing a case before the Supreme Court, in which the Virginia sequestration act was attacked as unconstitutional, used this remarkable language:

> The legislative authority of any country can only be restrained by its own municipal constitution. This is a principle that springs from the very nature of society, and the judicial authority can have no right to question the validity of a law unless such jurisdiction is expressly given by the Constitution.

The recall of judicial decisions is condemned by its enemies without rhyme or reason. Some men say it would lead to anarchy; that it is a new-fangled idea of Theodore Roosevelt, and, like all other theories of government advanced by Roosevelt and the Progressive Party, is inimical to the liberties of the people regulated by law. Harvey, who discovered the circulation of the blood in the human body, was almost burned at the stake by the enemies of human progress.

The direct primary, the initiative, the referendum, the recall, equal suffrage, and the short ballot have been and still are bitterly fought by the enemies of progress in government, by the men who fear the people, and yet those theories of government are as certain to become the practical means by which our people are to be governed as it is certain that our blood does circulate through our bodies.

Mr. Speaker and gentlemen, ridicule and unfair criticism will not answer the demand for the recall of judges or of judicial decisions.

Years after the Jeffersonian and Jacksonian contests for power between departments of the Government had ended, the doctrine of complete immunity from criticism of our courts took root and flourished until undeniable evils crept into the system and such outrageous wrongs were perpetrated by our courts in the name of justice that the people reluctantly came to believe the charge that their highest courts were influenced by great corporations and special interests. So many concrete examples and specific instances of laws being declared unconstitutional by our courts came to public notice that many men believed the supreme judges of our State and Federal courts were usurping powers that threatened the well-being of the people.

This usurpation has taken two forms: First, an attempt not merely to interpret the law, but to legislate; and, second, the exercise of the veto power on the lawmaking body—the too frequent exercise of the power to declare laws enacted by Congress and State legislatures unconstitutional and void. The solemn truth is we have too many courts and too much judge-made law. [Applause.]

It requires as much heart and brain for a judge to decide the fate of a poor devil charged with the theft of a loaf of broad as it does to determine what shall be done with the millionaire thief, whose manipulations of watered stocks have brought anguish and ruin to many homes.

The right of appeal is much too broad, and our legal procedure in nearly all our States is nothing less than an abomination.

The right to demur, to file special pleas and additional counts, the rebutter and the surrebutter have filled our reports with worthless technicalities and has cost litigants millions of dollars, for which they have received nothing, unless it was the knowledge that their lawyers were being educated in the intricacies and sophistries of technical pleading. Under our present judicial system a man of wealth and a cunning lawyer can delay the plainest and most simple lawsuit until the pocket and the patience of a poor man are exhausted.

A judge of the supreme court of one of our States, in a recent address, said:

Our laws are inadequate. They do not satisfy the popular conception of equal justice. The people clamor against the law, its delays, its discriminations, its inconsistencies; and with much reason. Something will happen. Unless judges will act, the people will act. If they do not resort to the recall, they will revise the Constitution; they will create new courts—courts to do rough justice, courts to do summary justice, courts close to the common people, courts without technicalities, sophistries, and delays, where substantial right prevails.

Mr. Taft said:

Of all the questions that are before the American people I regard no one as more important than this: The improvement of the administration of justice. We must make it so that the poor man will have, as nearly as possible, an equal opportunity in litigating as the rich man; and under present conditions, ashamed as we may be of it, this is not the fact.

Judge Clark, of the Supreme Court of North Carolina, has said that—

At the present time the supreme power is not in the hands of the people, but in the power of the judges, who can set aside at will any expression of the people's will made through an act of Congress or a State legislature. These judges are not chosen by the people nor subject to review by them. This is arbitrary power and the corporations have taken possession of it simply by naming a majority of the judges.

Mr. Speaker, this is strong language. Is it surprising that men in the shop and in the field should distrust our courts under these circumstances? And is it remarkable that the people should demand a change in the system? Let us examine the record more carefully and ascertain, if possible, whether or not there is any just cause for the recall of judicial decisions.

In 1884 the legislature of the State of New York passed an act entitled "An act to improve the public health by prohibiting the manufacture of cigars and the preparation of tobaccos in any form in tenement houses in certain cases." The New York court of appeals held the law unconstitutional. This decision, in effect, said to the people of New York, "You can not pass laws to safeguard the health and the lives of the citizens of your State where a question of property right is involved."

Gov. Aldrich, of Nebraska, in speaking of the decision in the well-known Minnesota rate case, said:

When any court, whether it be the United States Supreme Court or a court of inferior jurisdiction, continually makes effort by judicial decision to do that which the people and the people alone have a right to do, then I say that such a court is seeking to establish judicial tyranny. And if allowed to proceed unchallenged along the line of this unwarranted assumption of power, representative government will simply be that in name only.

Mr. DIES. Will the gentleman yield?

Mr. HINEBAUGH. Yes.

Mr. DIES. I should like to ask the gentleman who made the constitution of the State of New York, that he seems to think the courts ought not to protect the people in the enforcement of?

Mr. HINEBAUGH. Who made the constitution?

Mr. DIES. Who made the constitution of the State of New York, that the court was upholding for the people?

Mr. HINEBAUGH. It should have been made by the representatives of the people.

Mr. DIES. Well, who made it?

Mr. HINEBAUGH. I do not know. I was not there. Perhaps the gentleman can tell me who made it.

Mr. DIES. The people make all constitutions. Every constitution of a free State of this Union is made by the sovereign people of that State.

Mr. HINEBAUGH. I presume the people made it. They should have made it through their representatives.

Mr. DIES. Then the courts of New York merely sustained the people in upholding their organic law.

Mr. HINEBAUGH. I do not consider that the gentleman has asked me a question that I am to answer any further than I have answered it.

About 10 years ago the legislature of New York passed a law limiting the hours of labor in bakeries in that State in the interest of the health and lives of its citizens engaged in that work. The law had been given intelligent consideration by the members of the State legislature. It had been approved by the governor and sustained by the highest court of the State of New York, and yet in the case of Lochner *v.* New York, One hundred and ninety-eighth United States Reports, page 45, a divided court, five out of nine judges, declared that the law was unconstitutional.

Mr. Justice Harlan in a dissenting opinion said:

If there be doubt as to the validity of the statute, that doubt must therefore be resolved in favor of its validity, and the courts must keep their hands off, leaving the legislature to meet the responsibility for unwise legislation.

But the dissenting opinion of Mr. Justice Holmes strikes the very heart of the matter when he says:

This case is decided upon an economic theory which a large part of the country does not entertain. If it were a question whether I agree with that theory (limiting the consecutive hours of labor in bakeries which may be required of an employee), I should desire to study it further and long before making up my mind. But I do not conceive that to be my duty, because I strongly believe that my agreement or disagreement has nothing to do with the right of a majority to embody their opinions in law.

Mr. DIES. Mr. Chairman, will the gentleman yield?

Mr. HINEBAUGH. I yield for a question.

Mr. DIES. I understand the gentleman wants the Constitution of the United States enforced and interpreted; and since the Supreme Court is not to interpret it, according to the gentleman's statement, who is to interpret the written Constitution of the United States?

Mr. HINEBAUGH. If the gentleman will wait a few moments, I think I will answer that in my speech.

Mr. DIES. I am waiting patiently.

Mr. HINEBAUGH. Is there not just a gentle hint here that perhaps the majority of the court did not believe in the economic theory contained in the statute, and for that reason declared the act unconstitutional? In 1906 Congress passed an act, which was approved by the President, known as the employees' liability act. This law made common carriers engaged in interstate commerce liable for all damages resulting from the negligence of its officers, agents, or employees, or by reason of any defects, results from negligence in the cars, machinery, roadbed, and so forth. The Supreme Court, by a vote of 5 to 4, held this statute unconstitutional.

In August, 1894, Congress passed an income-tax law, which, in substance, provided for a tax of 2 per cent on net incomes above $4,000.

A man named Charles Pollock, a stockholder in the Farmers' Loan & Trust Co. of New York, brought an action to restrain or enjoin the collection of the tax, claiming that the law was unconstitutional.

When the first argument was made in the Supreme Court in March, 1895, Mr. Justice Jackson, on account of illness, took no part in the case. The lower court had held the act constitutional. The eight members of the court were equally divided on all questions involved in the constitutionality of the act with the single exception of the provision which imposed a tax upon rents and incomes from real estate. When the case was reargued Justice Jackson was present and voted to sustain the law, but for some reason one of the judges who at first had been in favor of sustaining the law changed his vote and the law was annihilated.

Justice Field, in his opinion declaring this law unconstitutional, said:

The present assault upon capital is but the beginning. It will be but the stepping-stone to others larger and more sweeping till our political contests will become a war of the poor against the rich.

Judge Clark, of the Supreme Court of North Carolina, in speaking of this decision, said:

One man nullified the action of Congress and the President and 75,000,000 living people. In 13 years that decision has taxed the property and labor of the country $1,003,000,000, which Congress in compliance with the public will, and relying upon previous decisions of the court, had decreed should be paid out of the excessive incomes of the rich.

Justice Jackson, in a dissenting opinion, said:

The decision (of the majority of the court) disregards the well-established canon of construction that an act passed by a coordinate branch of the Government has every presumption in its favor, and should never be declared invalid by the court unless its repugnancy to the Constitution is clear beyond all reasonable doubt.

And Justice Brown said:

While I have no doubt that Congress will find some means of surmounting the present crisis, my fear is that in some moment of national peril this decision will rise up to frustrate its will and paralyze its arm.

No matter which side of this controversy we may take, it is evident to any sensible man, from opinions of the judges which I have quoted, that the real question which controlled the court was the expediency or propriety of the income-tax law, and not whether it was in conflict with the Constitution.

Mr. Chairman, it is because of the growing belief that our courts declare laws unconstitutional, because they do not believe in the principle or economic ideas embodied in them rather than because they are in conflict with the Constitution, that the doctrine of recall of judges and judicial decisions has found a permanent place in the minds of our people.

Mr. Chairman, in conclusion I wish to refer briefly to two more decisions, The Trustees of Dartmouth College *v.* Woodward (4 Wheat., 517) and the case of Fletcher *v.* Peck (6 Cr., 87).

The Dartmouth College case was a great victory for the Federalists, but it was much more than that, for it established the doctrine that every charter, franchise, and privilege which any corporation could secure from a legislature was a contract and could not be impaired in any way by subsequent legislation.

Chancellor Kent, speaking with approval of the Dartmouth case, for he was an intense Federalist, said:

The decision in that case did more than any other single act proceeding from the authority of the United States, to throw an impregnable barrier around all rights and franchises derived from the grant of government.

And 50 years later Judge Cole, of the Iowa Supreme Court, said:

The practical effect of the Dartmouth College decision is to exalt the rights of the few above those of the many; and it is doubtless true that under the authority of that decision more monopolies have been created and perpetuated and more wrongs and outrages upon the people affected than by any other single instrumentality in the Government. (See Dubuque v. Rachard, A., 39 Iowa, 95.)

Mr. BARTLETT. May I say to the gentleman that it is a fact that the Dartmouth College case led every State in the Union, I believe, either to put in its constitution a prohibition against the granting of charters that were irrevocable, or to the putting into the act granting a charter to a corporation of the reservation of the right to alter, amend, or repeal?

Mr. HINEBAUGH. Yes.

Mr. BARTLETT. So that the decision in the Dartmouth College case is no longer law, either in the States or in the Nation.

Mr. HINEBAUGH. That is true. Under the rule laid down in the Fletcher case a charter or franchise procured by fraud can not be invalidated, no matter how brazen the fraud. Mr. Chairman, in view of all these things can we pretend surprise that the people should follow Theodore Roosevelt when he says:

I urge that in such cases, where the courts construe the Constitution as if property rights had a first mortgage on the Constitution, to the exclusion of human rights, the people, after careful deliberation, be given the right to vote and finally determine whether the law which was set aside shall be valid or not.

Mr. DIES. I should be glad to have a distinction drawn between human rights and property rights, if the gentleman will so favor us.

Mr. HINEBAUGH. If the gentleman can not draw a distinction between a human life and a mile of Pennsylvania Railroad track, why, I must confess that I fear I could not enlighten him.

Mr. DIES. I did not say human life. I said the distinction between human rights and property rights.

Mr. HINEBAUGH. It is common knowledge that the people have nothing to do with the appointment of a Federal judge or his retention in office; and it is just as generally understood that most Federal judges are nominated and appointed through the influence of special interests. Why should not the people, whose servants the judges are supposed to be, have power to recall them, and also their decisions, when those decisions are in conflict with a public need and a righteous public demand? Do you say the people will make mistakes in attempting to secure control of their judicial servants by means of the recall? I answer that throughout all history that same argument has been made against every attempt of the people to acquire some share in their government. Let the agents of special interests argue and protest as they may, the stubborn fact remains that the people intend to take such steps as may be necessary to compel the courts to serve the interests of the whole people, as was the original intent of the Constitution.

We have recently decided that United States Senators shall be elected by the people. The judges of our State supreme courts are elected by the people. Why should powerful special interests have the right to influence the appointment of Federal judges and the people, whose servants they are, be powerless to reach them or their decisions? [Applause.]

Mr. McKENZIE. Will my colleague yield?

Mr. HINEBAUGH. Mr. Chairman, how much time have I remaining?

The CHAIRMAN. The gentleman has 18 minutes.

Mr. HINEBAUGH. I reserve the balance of my time.

Mr. McKENZIE. Will my colleague yield for an interruption?

Mr. HINEBAUGH. I will yield for a question, although I would like to save the time for somebody else. I reserve my time unless the question the gentleman wants to ask is an important one.

Mr. McKENZIE. I want to ask a rather important question. We understand, of course, that all citizens stand on an equality before the law and the courts, the poor man as well as the great corporation. Now, the point I would like to have my colleague make plain to me, if possible, is this: In the case of the recall of judicial decisions does he believe that the poor and unfortunate of whom he has spoken in his excellent address would have an equal opportunity before the people in a contest with the powerful interests in the country that could use every means of advertising and carrying on a campaign in the interest of the recall of a decision that might be against them?

Mr. HINEBAUGH. I will answer that by saying that while the poor are always handicapped in a battle against the rich, still they would avail themselves of the opportunity to register their will, whereas under the present system they can not be heard at all.

Mr. McKENZIE. The point I am trying to have the gentleman make clear is——

Mr. HINEBAUGH. I do not concede, however, if the gentleman will pardon me, that before the law as it now exists, and under the present method of procedure in the most of the States, the poor man is on an equality with the rich man in our courts by any means.

Mr. McKENZIE. The gentleman has stated a few instances of where the court may be in error, but is it not true that in the thousands and thousands of cases that have been decided by the courts in the country but little criticism has been made?

Mr. HINEBAUGH. Undoubtedly that is so.

Mr. KELLEY of Michigan. Will the gentleman yield for a question?

Mr. HINEBAUGH. Yes; but I would like to reserve the balance of my time for my colleagues.

Mr. KELLEY of Michigan. I will take but a moment. Does not the gentleman think that the recall of judicial decisions would lead to the utter confusion of legal principles? For instance, under a certain state of facts there might be involved a certain legal principle, which, when submitted to the people, might receive favorable action. Under an entirely different state of facts, with the same legal principle involved, a totally different result might be reached when submitted to the popular vote. The same legal principle might thus be pronounced constitutional at one election and unconstitutional at another. Does not the gentleman think it would lead to great confusion of legal principles?

Mr. HINEBAUGH. No; I do not think it would any more than a question of public policy would if submitted to the people. I would like to add that it would not lead to any more confusion or hardship than the fact that more than one-half of the decisions rendered by the supreme courts on questions between litigants are decided, not upon the merits of the case in which the litigant is interested, but upon technical points of pleading for which the litigants pay and never know that the interests really involved in the case have been touched. In the State of Illinois one of the most eminent lawyers in the State has made the statement that out of 250 volumes of reports of decisions of the supreme court in that State the decisions on the actual merits of the cases could be put in one-third of the volumes; that the other two-thirds are decisions of the court on technical questions of pleading.

Mr. FITZHENRY. Will the gentleman yield?

Mr. HINEBAUGH. Yes.

Mr. FITZHENRY. I would like to clear up a point raised by the gentleman from Georgia [Mr. BARTLETT] referring to the Dartmouth College case not being the law in the United States on account of the State constitutions. In order that the gentleman's excellent speech may not be misinterpreted, I want to call attention to the fact that the Illinois constitution contains the provision prohibiting the making of an irrevocable grant or special privilege or immunity, and the Supreme Court of Illinois has held that that provision in the Bill of Rights or our Constitution applies to the legislature of a State, but that it does not apply to any of the agencies of the legislature. In other words, the legislature can not pass an act that will make an irrevocable grant or special privilege or immunity, but the Supreme Court of Illinois has held that a city council can do it.

Mr. HINEBAUGH. I am glad to have that go into the RECORD. I ought to state that it was not my idea in making this presentation of the Dartmouth College case to have anyone draw the conclusion from that that it was now the law in the different States, or that the different States had not taken action to the contrary, but as tending to show the development of that idea in our judicial system. [Applause.]

Mr. BARTLETT. Mr. Chairman, I will be recognized in my own time. I want to ask the gentleman from Illinois [Mr. FITZHENRY] a question. Does not the city in Illinois get its charter from the legislature?

Mr. FITZHENRY. They do.

Mr. BARTLETT. Could not the legislature prohibit the city from granting an irrevocable charter or special privilege or immunity?

Mr. FITZHENRY. It does not, and the supreme court has held that the legislature can not make an irrevocable grant or special privilege or immunity.

Mr. HINEBAUGH. Mr. Chairman, how much time have I remaining?

The CHAIRMAN. The gentleman has 12 minutes.

Mr. HINEBAUGH. I reserve the balance of that time.

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. HAMMOND having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Tulley, one of its clerks, announced that the Senate had passed without amendment the following resolution:

House concurrent resolution 39.

Resolved by the House of Representatives (the Senate concurring), That for the representation of the Congress at the exercises to be held at the navy yard in Brooklyn, N. Y., on Monday, May 11, 1914, in honor of the men of the Navy and Marine Corps who lost their lives at Vera Cruz, Mexico, there shall be appointed by the Vice President 7 Members of the United States Senate and by the Speaker 15 Members of the House of Representatives.

SEC. 2. That the expenses of the committee shall be defrayed in equal parts from the contingent appropriations of the Senate and House of Representatives.

PENSIONS.

The committee resumed its session.

Mr. DAVIS. Mr. Chairman, I yield 30 minutes to the gentleman from Kentucky [Mr. LANGLEY].

Mr. LANGLEY. Mr. Chairman, the proverbial ingratitude of Republics surely can not be charged against ours by the soldiers of the country and their dependents when it is remembered that we have paid them in pensions since the Government was established the vast sum of $4,500,000,000, aside from giving them nearly 69,000,000 acres of the public domain. Indeed, considering our population and resources and the size of our armies, it may be truthfully said that ours is the most liberal pension system of the world, notwithstanding the fact that it contains some inequalities and injustices, which I shall presently discuss. The legislative history of the evolution of that system, including the parts played in it by individuals and by parties, affords a most interesting illustration of political psychology and party expediency. I possess the somewhat unique status of one who has both an administrative and a legislative knowledge of the pension question, having had nearly a decade of training in the administration of the law and almost as long a period of service—part of the time as a member of the Invalid Pensions Committee—in a legislative body which deals almost constantly with the subject. I think, therefore, that I may be pardoned for assuming to speak with some authority.

Perhaps it would not be amiss for me to give at the outset a brief résumé of pension legislation. The Continental Congress, on the very threshold of our independence, realized what I regret to say some gentlemen do not seem to realize now—the unbounded debt we owe to the men who leave their homes and their families and endanger their health and lives in the hour of the country's peril.

Mr. DAVIS. Mr. Chairman, there was so much confusion I did not understand what the gentleman from Kentucky stated about his experience in pension matters. Did I understand him to say that he had had a good many years of experience in the executive branch of the pension work?

Mr. LANGLEY. I said that I had served in connection with the administration of the pension law for nearly 10 years.

Mr. DAVIS. What branch?

Mr. LANGLEY. I was an examiner in the Pension Bureau for over four years and a member of the Board of Pension Appeals for over five years.

CONTINENTAL CONGRESS.

One of the very first acts passed by that Congress, less than two months after the Declaration of Independence, was that of August 26, 1776, which promised half pay for life, or during disability, to every officer, soldier, sailor, marine, or seaman losing a limb in any engagement or becoming so disabled in the service as to render him incapable of earning a livelihood. Indeed, pensions were granted in this country long before the Declaration of Independence. While the first national pension law was the one to which I have just referred, many of the English colonies in America, early in the history of colonial legislation, provided for the relief of wounded and maimed soldiers.

PILGRIMS AT PLYMOUTH—FIRST PENSION LAW.

In 1636 the Pilgrims at Plymouth enacted in their courts that any man who should be sent forth as a soldier and returned maimed should be maintained competently by the colony during his life. According to history, this is the first pension law ever passed in America. Forty years later, in 1676, a standing committee of the General Court of Massachusetts Bay held regular meetings in "Boston toune house" to hear the applications of wounded soldiers for relief; and after this colony was united with Plymouth colony, under the charter of 1691, the province continued to make provision for the relief of disabled soldiers out of the public treasury. In 1644 the Virginia Assembly passed a disability pension law, and later it made provision for the relief of the indigent families of soldiers who were slain. Similar acts are found in the colonial statutes of Maryland and New York in the latter part of the seventeenth century. The colony of Rhode Island, in 1718, enacted a pension law which provided that every officer, soldier, or sailor employed in its service who should be disabled, by loss of limb or otherwise, for getting a livelihood for himself and family, or other dependent relatives, should have his wounds carefully looked after and healed at the colony's charge, and should have an annual pension for the maintenance of himself and family or other dependent relatives. This law further provided that if any person who had the charge of maintaining a wife, children, parents, or other relatives should be slain in the colony's military service, these relatives should be maintained while unable to provide for themselves.

Thus it will be seen that the custom of pensioning soldiers and sailors is not only as old as the English settlement on this continent, but that in some respects it went even further in the direction of liberality than the pension law of to-day.

BOUNTY LAND.

The same is true with regard to bounty-land legislation. From the earliest era of our history the policy of rewarding the defenders of the country by land bounties was marked with great liberality. Land bounties were even promised before the Nation possessed any public domain. Many instances are recorded of grants by the colonies before our independence. Enormous grants were made by the colonies of North Carolina and Virginia to that intrepid Yankee, Gen. Nathanael Greene, who became such an idol of the southern people. Gen. Lafayette was granted for his services and sacrifices the sum of $200,000 and one township of public lands, or about 23,000 acres, to be located by the President, which, however, as is well known, Gen. Lafayette declined to accept. A liberal annuity, payable semiannually, was also granted to the widow and each child, by name, of Commodore Perry.

The Continental Congress by resolution of September 16, 1776, provided a regularly graduated scale of land grants for service in the Revolutionary War, ranging from 800 acres for a colonel to 100 acres for a private. Later a major general was given 1,100 acres and a brigadier general 850 acres. Similar laws were passed for service in the War of 1812, Mexican War, and the various Indian wars, but no land grants have been made for service subsequent to 1855, legislation since that time giving preference to the country's defenders in connection with the public domain having been confined to the matter of shortening to the extent of the length of service the period of residence required to acquire a homestead, a minimum residence of one year being required in all cases, however. All these rights in connection with the public domain, it may be added, were also extended to the widow and other relatives practically in the same manner as title to pension is provided in the pension laws.

FIRST NATIONAL LAW PENSIONING WIDOWS AND ORPHANS.

The first national pension law in behalf of widows and orphans was the resolution of August 24, 1780, which extended to widows and orphan children the half-pay provision provided in the act of August 26, 1776, for officers, soldiers, sailors, and marines in cases where death was due to the service, although Margaret Corbin, a widow of a Revolutionary soldier, had been previously pensioned by the resolution of Congress passed July 6, 1779. This case is such an unusual and interesting one that I shall take the time of the committee to read the resolution by which that pension was given to her. It is taken from the Journals of the Continental Congress, and is as follows:

Resolved, That Margaret Corbin, who was wounded and disabled in the attack on Fort Washington, whilst she heroically filled the post of her husband who was killed by her side serving a piece of artillery, do receive, during her natural life, or the continuance of the said disability, the one-half of the monthly pay drawn by a soldier in the service of the States; and that she now receive out of the public stores one compleat suit of cloaths, or the value thereof in money.

On July 25 of the following year another resolution was passed for her relief, which read as follows:

Resolved, That Margaret Corbin receive annually, during her natural life, one compleat suit of cloaths out of the public stores, or the value thereof in money, in addition to the provision made for her by the act of Congress of July 6, 1779.

I mention these instances of the people's patriotic liberality in the early days of the Republic toward its defenders and their

dependents with the hope that they may teach a lesson to those gentlemen of to-day who are constantly inveighing against our present liberal pension system.

Congress from time to time passed laws for the relief of soldiers, sailors, and marines and their widows and orphans following the War of 1812, the Mexican War, and the various Indian wars in which the country was engaged prior to the beginning of the Civil War, and our pension system gradually grew more liberal during that period, although it is interesting to note the fact that a longer period of time elapsed after these wars before such relief was granted than was the case following the War of the Revolution.

THE CIVIL WAR.

The pension laws of the country did not, of course, assume very large proportions until the Civil War. This was necessarily true because of the enormous number of participants in that war as compared with previous wars. The act of July 22, 1861, authorizing the employment of volunteers to aid in enforcing the laws and protecting public property promised to those who were disabled in that service the same benefits that had been or might thereafter be conferred on persons disabled in the regular service, and to the widow and legal heirs of those who died or were killed in the service the sum of $100, "in addition to all arrears of pay and allowances." This was followed by the comprehensive act of July 14, 1862, which is the foundation of our present pension system. This act reenacted the provisions of the act of July 22, 1861, and specified the rates of pension for officers, soldiers, sailors, and marines disabled by reason of wounds received or diseases contracted in the service of the United States and in the line of duty.

These provisions were gradually broadened and liberalized by various subsequent enactments until the beneficiaries became entitled to rates varying from six to one hundred dollars a month, dependent upon the nature and extent of disability. That act also provided pension for the widow and minor children and in the absence of these for the dependent mother, father, orphan sisters and brothers, in the order named, where the death of the soldier, sailor, or marine was the result of his service. This is the first act that conferred a pensionable status upon dependent parents, sisters, and brothers. It may also be noted here that prior to the Civil War there never was any provision of law giving pensions to widows in cases where the death of the husband was due to his service in time of peace. All of the prior enactments for the relief of widows and orphans were confined to cases where death resulted from service during a war. This act of July 14, 1862, fixed the rate of pension for all of these dependent classes at the rate allowed invalids for total disability, which was $8 a month, except the higher rates provided for officers. The $2 additional for each minor child of the soldier under 16 years of age was added to the widow's pension by an act passed subsequent to the war, which became effective July 25, 1866. The rate of pension to the widow and to the minor children and dependent relatives in all cases, in which the act of July 14, 1862, limited it to $8 a month, was increased to $12 a month by the act of March 19, 1886. Pension for widows and minor children where the death of the husband was not due to his service was first provided in the act of June 27, 1890, which fixed the rate at $8 a month. This was increased to $12 by the act of April 19, 1908, the present law. A law has never been enacted granting a pension to dependent relatives other than widows and minor children unless death was due to the service.

FIRST GENERAL ACT FOR SERVICE ONLY.

The act of March 18, 1818, was the first general act passed which granted pension for service only, and it required proof that the beneficiaries were in indigent circumstances and in need of assistance. There were several later service-pension acts for participants in the earlier wars, but it was 25 years after the close of the Civil War before Congress departed from the rule that a pension for the participants in that war must be confined to disability of service origin. This was done by the act of June 27, 1890, which fixed the minimum pension at $6 and the maximum at $12 a month, regardless of rank, requiring proof only of inability to perform manual labor and without showing that the disability was of service origin. This was also a service pension in that a minimum service of 90 days was required.

Mr. BURKE of South Dakota. Will the gentleman yield?

Mr. LANGLEY. Certainly.

Mr. BURKE of South Dakota. Has the gentleman any figures or information as to how pensions ranged in the early history of the country with pensions that are granted now?

Mr. LANGLEY. The gentleman means the rates of pension then as compared with the rates of pension now?

Mr. BURKE of South Dakota. Yes.

Mr. LANGLEY. I should say that the rates of pension now, as a whole, are more liberal than they were in the earlier days of our history to which I have been referring, especially for disability contracted in service. There was not much difference as between different periods prior to the Civil War, but since then the rates have gradually grown more liberal. On the other hand, there was more liberality toward them in the earlier period with respect to the public domain, as I shall presently show.

AGE LAW.

The next important step in pension legislation was the act of February 6, 1907, known as the age law. The benefits of this act were confined to those who rendered the service. It was in fact both an age and a service pension act, because it fixed certain specific rates for certain ages and as in the act of 1890 a minimum service of 90 days was required. There was quite a division of sentiment in Congress on the question as to whether age or length of service should be the chief factor in fixing the rates of pension. This finally culminated in the enactment of the act of May 11, 1912, known as the Sherwood law, which was a compromise between the age and the service proponents, the act fixing rates which are governed both by age and by length of service.

Such in brief is what this Republic has done for its defenders and their dependents.

It is a splendid exhibit of the patriotism and generosity of a grateful people. I beg your indulgence now for a few moments while I discuss briefly the political history of this legislation. I earnestly desire that what I say may not be misunderstood. I speak with the utmost candor when I tell you that it always grieves me to hear the statement or the insinuation, in this body or out of it, that the thought uppermost in the minds of sworn public officials, as we are, who are dependent upon votes for retention in our places, or for advancement, as we are, is not what our duty is or what the right of the matter may be, but rather what is the most popular and calculated to get us the most votes. I undertake to say that there does not exist to-day a more insidious or a more dangerous enemy of the Republic than that sort of an estimate of public men, and I fear that it is not only too prevalent to-day for the good of the country, but that it is constantly growing. And, gentlemen, we are in a measure responsible for it ourselves—sometimes by merely indulging in a friendly and designedly harmless colloquy with each other and sometimes with sinister purpose. I share to an enthusiastic degree the estimate which our distinguished Speaker places upon the personnel of this body. It was my privilege as a public servant in an executive branch of the Government service to form the personal acquaintance of a majority of the Members of both branches of Congress, and during my service of nearly eight years here that acquaintance has necessarily been widened. I think I have had as good an opportunity as the average among you to know and to understand the motives of these men who are here earnestly toiling for the people who have honored them.

I am proud of the privilege of saying that I do not think I have come in contact with a single Member on either side of the House of any political party concerning whose honorable and patriotic purposes I have entertained the slightest doubt. I must admit that I have seen one once in awhile who was possessed of rather curious angles of vision, but they were always honest angles. I think, gentlemen, that if we were a little more just and a litttle more tolerant toward each other it would be better for us all and better for the country. So much by way of introduction to what I am now going to say on the political side of pension legislation. I shall endeavor to discuss it dispassionately, relying upon the cold facts of history to establish what I assert. I want to be fair to both sides. If there is one among us who can not appreciate the other fellow's side of a question, it is unfortunate that he was not broadened a little before he achieved the high honor of membership in this body.

DEMOCRATIC ANTIPATHY.

I am keeping in mind what I have just said when I make the assertion that the uniform, consistent, and unswerving course of the Republican Party has been in favor of liberal pension laws, and that since the Civil War the traditional, historical, and natural attitude of the Democratic Party as a party has been antagonistic to such laws.

Mr. BARTLETT. Mr. Chairman, will the gentlemen yield?

Mr. LANGLEY. Certainly.

Mr. BARTLETT. The gentleman does not think that applies to the Democratic majority of this House or of the last Congress?

Mr. LANGLEY. Mr. Chairman, if the gentleman will wait a few minutes, I think I will enlighten him on that very point. I think it does, to a large extent. I am coming to that directly.

I shall endeavor to show why this has been logically and necessarily true—the natural outgrowth of existing conditions and the inevitable result of human sympathies and passions. For many years succeeding the Civil War Congress in both branches consisted of men who had either participated in that war or whose opinions and sentiments were still strong on one side or the other. Naturally, therefore, the attitude of parties and of individuals on the subject of pensions—a subject so closely related to that conflict—was pronounced and well defined.

The bulk of the Republican membership, which was in the majority, came almost entirely from sections of the country that were loyal to the Union. A pension was a recognition of loyal service, and of necessity was originated and supported by Republicans. It is true that a very small minority of the Democrats, reflecting their individual sentiments, voted for these measures, but these did not reflect the sentiments of their party organization. This is conclusively evidenced by the fact that on 15 important pension measures passed between the close of the Civil War and 1890 every Republican vote, 1,068 in number, was cast for these bills and not a single Republican vote cast against them; while, on the other hand, there were 648 Democratic votes cast against them and only 417 votes for them. There was another incident during this period which corroborates the statement I have made regarding the attitude of the two parties on this question. The Forty-ninth Congress was Democratic in both branches and there was a Democratic President. The Hon. Courtland C. Matson, a northern Democrat, was chairman of the Committee on Invalid Pensions of the House. He brought in a dependent pension bill similar in its provisions to the act of June 27, 1890, enacted some three and one-half years later. This bill passed both Houses. Not a single Republican voted against it, the only votes that were cast against it having been cast by Democrats. President Cleveland vetoed the bill. An effort was made to pass it over the President's veto. Every Republican supported that effort, but enough Democrats voted the other way to sustain the veto, and the bill failed. When the Republicans regained control of Congress and the Presidency the act of June 27, 1890, was passed and signed by a Republican President.

The sad thought in that connection is that as a result of the delay in the enactment of that beneficent law many old soldiers and their widows suffered for the necessaries of life and many others passed on to the great beyond without the recognition and assistance which the Republican Party would fain have given them and which they were denied by the action of a Democratic President and the votes of Democratic Congressmen. If I had the time, I would like to refer to the language, so unfriendly to the old soldiers, used by President Cleveland in some of his veto messages and to the many instances that came under my personal observation where their pensions were reduced and many cut off entirely as a result of the rigid and unfriendly administration of the law during his incumbency of the Presidency. Suffice it to say that thousands of veterans still living remember all about that, and they remember, too, that these pension vetoes always emanated from the pen of a Democratic President.

After the failure of the Matson bill there was more discussion throughout the country on the pension question than had occurred in any previous period of the country's history. President Cleveland's veto aroused much criticism of him and his party. Grand Army posts all over the country took the matter up, and the question of the enactment of some additional relief for the veterans of the Civil War was fully discussed at its next national encampment. The matter figured extensively in the presidential election of 1888, and the attention of voters of all parties was sharply drawn to it. The vote in Congress on the act which was passed at the next session—act of 1890—is therefore quite significant. On the roll call on the original bill in the Senate, where the measure originated, not a single Republican vote was cast against it, while only 10 Democrats voted for it. On the roll call in the House not a single Republican voted against it, while only 38 Democrats voted for it. There were 71 Democratic votes cast against it, a majority of nearly two to one of that party in the negative. The Democratic vote in the Senate on the conference report was 3 ayes and 18 noes, while every Republican Senator who was present voted "aye." The vote in the House on the conference report was equally pronounced. Only 28 Democrats voted "aye," while 56, exactly two to one of those voting, were recorded against it. On the other hand, every Republican vote cast, 117 in number, was in the affirmative. There was no record vote in either House on the passage of the act of February 6, 1907, but the CONGRESSIONAL RECORD shows clearly that the opposition to the measure in both Houses came from Democratic sources.

Meanwhile the veterans of the Civil War were getting well advanced in years and less able to provide for themselves, while the cost of living was constantly increasing. As a result the conviction grew stronger and stronger, both in and out of Congress, that some additional relief should be given them. In the congressional elections of 1910 this question was made one of the leading issues, particularly in the northern and border States. It is well known to those of us who are familiar with the history of that campaign that the Republican Party lost many thousands of votes because of the prevalent opinion among many veterans of the Civil War and their relatives and friends that the Republican Party, then dominant in both the legislative and executive branches of the Government, had failed to preserve its previous record of being the special champion of these veterans in not giving them the relief which they needed. Whether there was any foundation for this I shall not stop here to discuss, except to say that, in view of all the Republican Party had done for them, I do not think they were justified in casting their votes for the party which had uniformly shown such unfriendliness to their cause.

Mr. MURDOCK. Mr. Chairman, will the gentleman yield?

Mr. LANGLEY. Certainly.

Mr. MURDOCK. Mr. Chairman, I am very much interested in this very thorough narrative history of pension legislation. The gentleman now speaks of the campaign of 1910, where the Republican Party was generally charged throughout the North with becoming a bit unfriendly to pension legislation. What I would ask the gentleman is this—and I am not sure whether I am right or not. Previous to 1910 was there not the appearance in Congress of Republican opposition to pension legislation, where it had not existed in the past?

Mr. LANGLEY. Mr. Chairman, perhaps that was the first time that any Republican in Congress showed opposition to pension legislation. I am going to show presently and frankly admit that there were a few—I will not say misguided Republicans, but a few Republicans who ought to have known better—who opposed the legislation which was then proposed, but they were merely a drop in the bucket as compared with the compact, organized opposition of Democracy, through all those years, to pension legislation.

Mr. MURDOCK. Is it not also true that as that slight showing on the part of some Republicans in opposition to pension legislation appeared simultaneously the solid phalanx of the Democracy which opposed pensions in the past began to break, and a great many Democrats stood for pension legislation?

Mr. LANGLEY. That was the political psychology and party expediency to which I referred in the outset. That was one thing I had in mind when I used that language.

Mr. MURDOCK. I want to say to the gentleman that I have been here a good many years, and I have never heard anyone give with completeness, such as he has, the history of pension legislation.

Mr. LANGLEY. Mr. Chairman, I thank the gentleman for that compliment. I have devoted much time and thought to the subject. In the last session of the Sixty-first Congress a bill known as the Sulloway bill, which, like the preceding enactments, was both an age and a service bill, a minimum service of 90 days being required, and which granted a very liberal increase in the rates allowed these veterans, was reported by the Committee on Invalid Pensions and passed by the Republican House. There was not a record vote on that bill, either, in the House, and I am willing to concede that there was less Democratic opposition to it than had been manifested toward previous pension bills. It has been contended by you Democrats that the Republican Party was responsible for the failure of that bill to pass the Senate, because, forsooth, that body had a Republican majority then; and you were able to convince many voters of the country that that contention was just. I here and now deny, and I can produce the record to sustain that denial.

It is true that there were a few Republicans in the Senate who were not favorable to the bill, just as there were in the House, but there were several test votes which showed clearly that the bill would have passed the Senate but for the rules of procedure which made it impossible with the formidable opposition to it in that body, which opposition I shall show emanated almost entirely from the Democratic membership. The CONGRESSIONAL RECORD shows repeated efforts of Republican

Senators to get the bill considered and passed and that these efforts were blocked by Democratic Senators. I ask you to look at page 2883 of the RECORD of February 18, 1911. Senator Scott, of West Virginia, a Republican, asked unanimous consent to take up the bill, and Senator OVERMAN, a Democrat, from North Carolina, objected. Thereupon Senator Scott moved to take up the bill notwithstanding the objection. There were 49 votes in favor of this motion, and 46 of them were Republicans; there were 35 votes against the motion, and 28 of them were cast by Democrats. The RECORD also shows that the action of the Democratic Senators prevented a final vote on the passage of the bill at that time. Again, on the 4th of March following (see pages 4320–4321 of the RECORD), the last day of the session, and the last chance the bill had to become a law in that Congress, a Republican Senator, Mr. Curtis, of Kansas, asked unanimous consent to take up the bill, and objection was made by Mr. GORE, a Democrat, from Oklahoma. A Republican Senator then moved to take it up notwithstanding this objection, and the vote on that motion showed practically the same political alignment as it did on the other occasion referred to, on February 18. I wish that every soldier in the country and their relatives and friends knew the exact truth about the entire procedure in connection with that bill.

But you Democrats say that these things are all in the past; that while it is true that in former years we were the friend and champion of the soldiers, we finally grew indifferent to their interests and that you are now their best friends; that you passed the Sherwood bill, which is more liberal than any bill we ever passed; and that in the future, if they expect anything more in the way of legislative and administrative favor, they must look to you and to your administration. Well, let us see about that. Let us examine the RECORD and see what it shows in connection with the passage of the Sherwood bill. You had 225 Democratic Members in the House at that time. You had a clear Democratic majority over all parties of 69. Keeping these figures in mind, I beg you to turn to pages 284 and 285 of the RECORD of the second session of the Sixty-second Congress. There you will find the roll call in the House on the passage of the original Sherwood bill. There were 229 votes cast in favor of it. Of these, 97 were Democrats, 1 Independent, 1 Socialist, and 130 Republicans. There were 93 votes cast against it, 90 of whom were Democrats. There were 6 who refused to vote and answered "present," all Democrats. There were 4 Republicans and 8 Democrats paired for the bill and 2 Republicans and 10 Democrats paired against it. In other words, counting the 8 Democrats paired in favor of the bill, you could only muster 105 out of your 225 Democratic votes in this House—less than half of them—who were willing to go on record as the friends of this measure; and I suspect from what I have heard since then that some of these afterwards wished that they had taken a different course.

Now, look at page 4015 of the Senate RECORD of the same session. There you will find the roll call on the House bill as amended in the Senate. Every Republican vote, 40 in all, was cast for the bill, while only 11 Democrats voted for it. There were 16 Democratic votes cast against it. There was no yea-and-nay vote in the Senate on the adoption of the conference report, but there was in the House. It appears on page 6242 of the RECORD. There was no longer any question about the adoption of the conference report, and there was a comparatively small attendance that day, but an analysis of the vote does not help the cause of Democracy any in this connection. Of the 176 votes cast for the report only 77 were cast by Democrats, while of the 57 negative votes 56 were Democrats. The other negative vote was cast by the gentleman from California [Mr. KENT], of whose present political alignment I am not advised. Every Republican who was present and voted voted for the report. There were 98 of these.

What a "magnificent and unanswerable" exhibit in support of your contention that you of Democracy have become the residuary legatee of the honor which once belonged to the Republican Party of being the special friend and champion of the soldier! Really, gentlemen, you ought to be ashamed of yourselves for having the effrontery to make such a claim and expect people versed in the history of our country to believe it, when the record shows that at no time when you had control of Congress could you muster enough votes to pass a pension bill without the aid of Republicans, and when it also shows that the Sherwood bill, for which you claim so much credit, received less than 100 Democratic votes, when it took 193 votes to make a quorum of the House, and that if the real friends of the soldiers, the Republicans, had not rallied to the support of the bill, it would have been overwhelmingly defeated in the House of its alleged friends.

Mr. AUSTIN. Mr. Chairman, will the gentleman yield?

Mr. LANGLEY. Certainly.

Mr. AUSTIN. Mr. Chairman, is it not a fact that while the House was Democratic the Senate was Republican and the President was Republican, and it was a Republican President who signed the bill?

Mr. LANGLEY. I am going to call attention to that in a moment in another connection.

The CHAIRMAN. The time of the gentleman from Kentucky has expired.

Mr. LANGLEY. Mr. Chairman, I will ask the gentleman from Minnesota to yield me 15 minutes more.

Mr. DAVIS. Mr. Chairman, I yield the gentleman 15 minutes more.

Mr. LANGLEY. I do not know what foundation you have for the contention that the soldiers of the country must look to a Democratic administration for favorable consideration hereafter. Surely there is nothing in the record of previous Democratic administrations to base it on. As to what the present Democratic President may do I can not, of course, foretell. He has not had occasion to do anything since he has been President to show his attitude on the pension question. He did, however, express himself upon it some years ago. Here is what he said in his book entitled "Division and Reunion" (p. 227):

> The other leading questions of those years were the granting of pensions and the regulation of immigration. Congress had hastened from one lavish vote to another in providing pensions for the soldiers who had fought in the Civil War, until at length generosity had passed into folly. President Cleveland, for the time, put a stop to the reckless process by a vigorous use of his veto power.

This is a little flash-light photograph of what was going on in the mind of Prof. Thomas Woodrow Wilson long after he had reached the age of maturity. I am tolerably familiar with his history during the ensuing years of his eventful progress from the college halls to the White House, and I know nothing that has occurred during that period that would reform the sentiments of his heart or revise the logic of his brain upon this question. [Applause.] He thought then that the pittance which was allowed these old heroes by the altogether too tardy action of Congress was "hastening from one lavish vote to another"; that the act of June 27, 1890, which he evidently had in mind and which allowed them 30 or 40 cents a day to support themselves and their families, was "generosity" to a degree that justified him in calling it "folly," and that Congress was engaged in a "reckless process" when it did this; and he was manifestly gratified over the fact that President Cleveland made such a "vigorous use of his veto power" in preventing them from getting a few more cents a day to help keep the wolf from the door. How proud I am that I never cast my vote for a man who could harbor in his heart such sentiments toward these helpless old men who did so much for our country.

I beg to remind you that not only the Sherwood bill would have failed to pass if it had not received the support of the Republicans, but that it was passed by a Republican Senate and signed by a Republican President. And yet you Democrats claim and made hundreds of thousands of people believe that President Taft was opposed to and would veto such a bill. I wonder if there is a soldier in the country, or anyone else for that matter, who believes that if the Sherwood bill had not been passed until Woodrow Wilson became President he would have signed such a bill, even if he had permitted Congress to pass it, which I very much doubt. [Laughter.]

No, Mr. Chairman; you can not change the facts of history any more than a leopard can change its spots, and those facts show beyond the possibility of contradiction that up to this good day your party as a party is not entitled to the credit which its leaders have claimed as the friend and champion of the soldiers of the country. They show, on the contrary, that the Republican Party, both in Congress and in the administration of the Pension Bureau, has steadfastly adhered to its unbroken policy of justice, equity, and liberality to the defenders of the Nation and their dependents, while the Democratic Party, as a party, has just as consistently adhered to its time-honored policy of opposition to pensions. As I have already conceded, there are some notable individual exceptions to this. These exceptions embrace several classes of Democrats. First, there are those Democrats who represent northern constituencies, where the soldier element and their relatives and friends are numerous. These men believe in pensions and honestly support a liberal pension system. They represent the wishes of their constituents, as it is their duty to do. Again, there are some old men from the South, whose views time has changed and whose hearts age has softened. These men have a genuine and hearty desire, unmixed with prejudice, to be just and liberal toward the old soldiers. Whatever of animosity these men may

have formerly felt has been buried. Then there are some young men from the South, who were either too young during the Civil War to remember its hardships and animosities or who were born since the war and are free, more or less, from its prejudices and passions.

These view the subject from a more practical standpoint and are actuated by mixed motives of generosity and political as well as governmental expediency. There is still another class who, while personally believing in the old-time Democratic policy of antagonism to pensions, are nevertheless willing for the sake of their Democratic brethren in soldier districts to yield their own judgment and forego their natural inclination to vote against pension measures for the supposed political advantage that will accrue to the Democratic Party as a whole. Such was not their attitude, however, when the great preponderance of Democratic voting strength came from the solid South. In making up this classification I have run across still another subdivision among the membership of this body. This consists of the gentleman from Texas [Mr. DIES], who on this subject is sui generis. [Laughter.] Judging from his various utterances, to which I have always listened attentively, he belongs in a class by himself. He has said many things in these pension debates with which I wholly disagree and some things that I thought were extremely unkind and unjust to the soldiers and pensioners of the country; but I am in hearty accord with what he has said about giving equal and exact justice to all of them, and if my time will permit me, I desire before closing to point out some instances in which this has not been done. There is another thing that I wish in all candor and fairness to say here. I want to give credit to the present Democratic régime in this body for not packing the Committee on Invalid Pensions, of which I have the pleasure and honor to be a member, so as to have a majority of it antagonistic to dealing justly and liberally with this question. Two or three of the Democratic membership of that committee have hardly ever attended any of its meetings and have taken practically no part in its work. As to these I can not speak with personal knowledge, but as to those who have actively participated with us in the work of the committee I cheerfully bear testimony that, almost without exception, they are men of broad and liberal minds and generous hearts, and in dealing with the various cases that have come before us they have exercised to the fullest the equitable jurisdiction with which the committee was vested when this House created it. I shall cherish throughout my life the memory of my cordial and most congenial association with them. [Applause.]

And, Mr. Chairman, I desire to be entirely just and fair toward all other Democratic Members of this body, and I should deeply regret it were I to inaccurately state any fact or draw any unwarranted conclusion as to their attitude on this great question. As in all other things, there are underlying conditions which account for the movements of congressional sentiment on this pension subject which are naturally and logically responsible for the results produced. I have already mentioned some of these—time's effect on the animosities and prejudices of the Civil War; the change in personnel, bringing a younger and newer element on the scene, and the obligation which some individuals feel to yield their personal inclination to party fealty. There are still other important and potential reasons for the changed attitude of individual Democrats. The population is shifting constantly and likewise the distribution of pension money, whereas formerly the beneficiaries of our pension law were nearly all located in the States that remained in the Union. Now they are scattered all over the land, the States of the South almost without exception containing thousands of pensioners, survivors and dependents of the soldiers of three wars. It may be surprising to some of you to know that there is nearly $400,000 more pension money paid to citizens of Texas than is paid to those of Vermont, more in Georgia than in Delaware, more in each of the States of Louisiana and Florida than in the State of Rhode Island, twice as much in the State of Virginia as in Rhode Island, and a million and a half more in Tennessee than in Connecticut. These figures show, I think, one reason for the greater liberality manifested toward the pension system by some of our younger Democratic friends from the South. They show, among other things, the political wisdom and economic foresight of some of our Democratic brethren either in voting for liberal pensions or else withholding their opposition thereto.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

Mr. LANGLEY. Yes.

Mr. BARTLETT. Did I understand the gentleman to say that there were more pensions paid in the State of Georgia than in the State of Connecticut?

Mr. LANGLEY. No; I said that there was more pension money paid in Georgia than in the State of Delaware, and more in Tennessee by a million and a half dollars than in the State of Connecticut.

Mr. BARTLETT. And more in Texas than in what State?

Mr. LANGLEY. More in Texas than in the State of Vermont.

Mr. EAGLE. You could put the whole population of Vermont into one county in Texas.

Mr. LANGLEY. That may be, but it does not affect the point that I am making, however.

Mr. BARTLETT. The gentleman knows that in comparing Georgia with Delaware, it was very difficult to get soldiers into the Army from Delaware, and very few went into the Army from that State. It is a very small State.

Mr. LANGLEY. Oh, I take it for granted that everybody knows the geography of the country and the relative size of the various States and their population. I am not seeking to conceal anything about that.

Mr. BARTLETT. You could put Delaware in the county in which I live.

Mr. LANGLEY. That may be true also. I am not advised as to that. I am simply trying to show an excuse for some of you changing your minds lately. More of the money is going south.

But shift as Democratic sentiment may, like the sands of the sea; shift as population and pension disbursements may, to account for much of the eleventh-hour change of heart of individual Democrats on this question; shift as sectional Democratic strength may, creating political exigencies to harass those who act for the sake of expediency alone, the large, overshadowing, convincing fact of the history of pension legislation remains unchanged and unchangeable, that the Republican Party, in season and out, in good and evil report, in power and out of power, has been the constant advocate of and has held tenaciously to the doctrine, policy, and practice of liberal pensions to those who fought under the Stars and Stripes in every conflict into which our flag has been carried. [Applause.]

On the other hand, taking the Democratic organization as a whole, the fact that the dominant power and influence of Democracy is and has always been, particularly since the Civil War, wielded against pension legislation stands uncontradicted and incontrovertible. The Sherwood bill, even, was wrung by political exigency from the unwilling hands of those of you who were really against it and could have prevented its passage. Upon the faces of many of you I could see written that sullen determination born of the resolve toward your Democratic brethren of the North which, put into polite English, meant: "This time, but no more—thus far shalt thou go, and no farther."

MONTHLY PAYMENT BILL.

If I had the time I should like to cite some things that have occurred during this Congress which confirm my contention that the Democratic Party is not as friendly to the soldier as it professes to be. I will mention an instance or two in passing. Pensioners all over the country are put at a disadvantage because they have to wait three months before getting their pension checks. They have to discount their quarterly payments, often at excessive rates, or keep running accounts with merchants, and it goes without saying that they do not always get articles on a cash basis. Moreover, there are a great many people who do not understand that accrued pension due at date of death is available to pay the expenses of the last sickness and burial, and many times an old soldier does not get the benefits of his pension during the last days of his life, when he most needs it. They have asked for a monthly payment law, but your Democratic leaders are holding it back because they say it will cost too much. Again the law gives preference to honorably discharged soldiers and sailors and their widows in the matter of appointment and retention in office, and yet it is a matter of common knowledge that this law is being flagrantly violated under the present administration. I shall, however, take occasion at another time to discuss this and to give specific instances.

There is a lesson to be learned from all this by the soldiers of the country, their relatives, and friends. I might say rather that it is an object lesson of what they may expect from the Democratic Party in the years to come if it should remain in power. That party controls both branches of Congress, and perhaps the Presidency also, because of an almost solid Democratic South added to the inroads it has made in the Northern States. Indeed, the Democratic membership of this House is now almost equally balanced between the North and the South. No conservative, well-informed student of the political history of our country will deny that sooner or later the political pendulum

will swing the other way—in fact, it has already begun to swing—and that this will result in the reduction in the Democratic membership almost entirely from the Northern States. As this process of reduction goes on the relative power of the South, already in the saddle in the councils of Democracy, will necessarily be increased. The South being the seat of antipathy to pensions will, of course, control the policy of the party on that question, and in view of the rapid, and I might add alarming, growth of the power of King Caucus the continued control of Congress by Democracy bodes no good for the future of our pension system. My advice to the soldiers of the country and to all those who are interested in or are advocates of the continuance of our liberal pension policy is to exercise the power which they have and see to it that while the Democracy of the South is thus returning to supreme control in the councils of that party it be likewise put in the minority in this and the other branch of Congress where it can not do any harm. [Applause on the Republican side.]

If time permitted, I would like to reply to some of the unjust things that have been said in this House during this session about the soldiers and pensioners of the country. Shame upon you gentlemen, and especially you of Texas whose people have been the greatest sufferers from the brutality and inhumanity of Mexicans, for what you have said about pension grabbers and about the pension roll being a roll of dishonor and of graft. Scarcely had the echo of your bitter invective died away before the blood of our brave young men was crimsoning the soil of Mexico. Well may you cease this unjust criticism in the face of this new evidence of the patriotism and valor of our soldiers and sailors. [Applause.]

Mr. Chairman, every dollar that a government spends for pensions makes that government just that much stronger among its citizenship. The money goes into every channel of trade, and in numerous instances prevents a ward of the nation from being placed upon the charity of the community or State in which he lives. I can think of nothing more deplorable than for a man who has defended his country's flag in his young manhood and vigor to enter a poorhouse after he has, by reason of age or disability, become unable to earn a livelihood. I hope to live to see the day when every man who has been a soldier, sailor, or marine, who has offered or stood ready to offer his life—the supremest of human sacrifices—for his country's honor, will be allowed a pension when he is unable to labor for his support, whether that condition resulted from his service or otherwise. Many young men went to Cuba and the Philippines and came back broken in health and have been invalids ever since, but on account of the technical requirements as to proof, the absence of hospital records, and his inability to find his scattered comrades who were with him in those distant lands he has been denied a pension on the ground of his inability to prove that his disability was of service origin.

PRACTICE TOO RIGID.

Some gentlemen seem to think that it is a very easy matter to get a pension allowed in the Pension Office. I worked as a clerk in that office for several years and I know better. Thousands of claims are rejected when there is no record in the War Department of the disability alleged and no medical evidence showing its existence at date of discharge or for some time thereafter. Many a faithful soldier has been denied a pension that he deserved because he stayed out of the hospital and therefore has no hospital record to sustain his claim. For several years it has been the practice in the Pension Office to reject claims on the ground I have just stated.

Frequently a soldier's statement at discharge that he was not disabled is quoted in contradiction of his subsequent allegation that he was, and his failure to claim pension promptly after he left the service is also made the basis of a presumption adverse to his claim refuting evidence that would otherwise be sufficient to establish it. I look upon the Pension Office as a great court. It ought to be a court of justice and liberality. It decides more cases than any other court in our land. It is supposed to decide a case upon the evidence alone, but I can show you wherein it often fails to do that. For example, take a claim for rheumatism. The claimant waited 40 years before filing. He alleges that during the Garfield campaign in 1862, on the Big Sandy River, near Pikeville, Ky., he underwent great exposure, resulting in rheumatism; that it affected his legs and arms and shoulders; that at times he could not walk on account of it; that he was not treated in a hospital for it, but that he got liniment and applied it himself; that this disease troubled him at times during the remainder of his service and continued after he got home; that it prevented him from following his occupation regularly; that he got treatment from two or three physicians from time to time, but that they are all dead; that for the remainder of the time he used home remedies; that he delayed applying for a pension because he did not need it then.

The Pension Office gives him an order to go before a board of surgeons for examination and at the same time calls on him for proof to establish the claim. The board examines him and finds rheumatism. He finally locates two or three of his comrades, who swear that they remember that he had rheumatism in the service about the time he alleges; that his limbs and joints were swollen; that they saw him using liniment; that he was excused at times on account of this trouble, which still existed at the time of his discharge. He furnishes the affidavits of neighbors who have lived near him and have known him ever since the war, and they swear that he has been troubled with rheumatism every year since the war. In due time he will receive a letter which reads something like this:

Your claim based on rheumatism is rejected on the ground of no record in the War Department; no medical or other satisfactory evidence showing origin in service, existence at discharge, or continuance since, and your evident inability to furnish such evidence.

Feeling the injustice of this action, he gets still other testimony to corroborate that already filed, but he is curtly advised in reply that this additional evidence has been considered and does not warrant a reopening of the claim. If the witnesses in support of such a claim are shown to be persons of credibility I contend that it is unjust to reject such a claim. There are many disabilities, like rheumatism, as to the existence of which a layman is a competent witness as well as a physician. I do not underestimate the importance of getting the best testimony possible in such cases, nor do I overlook the rule of evidence requiring it, but I am convinced that thousands of just claims have been rejected and stand rejected to-day because of the enforcement of this altogether too rigid rule.

Many years ago Congress passed a law providing for the employment of special examiners whose duty it was supposed to be to aid the claimants in locating witnesses, they being oftentimes unable to provide the expense of doing so themselves, and thereby help them to establish the claim when it was just. I have no hesitancy in saying that in my judgment a majority of those special examiners failed to try to do what Congress intended. They would catechize a witness in such a way as to frighten him and make him forget what he really did know. I know of cases in which they would tell a witness that he was not a physician, and was therefore not capable of diagnosing a disease, and would finally get from him and put in the report of his testimony virtually an admission that he knew nothing about the case. In this way many meritorious cases have been defeated when if due weight had been given to the testimony of a man's neighbors and associates, who could recognize rheumatism, sore eyes, and various other disabilities that I could name, just as well as a physician could, they would have been allowed. Of course, many special examiners did not do this, but tried their best to get at the actual merits of the claims. I am not charging that these things have happened under any particular administration. I mention them in support of my contention that the Government in administering the pension laws has not been as liberal or as just in pension cases as a court of justice in the circumstances ought to have been.

Mr. Chairman, I believe that Congress in waiting 25 years, as it did, before granting pensions to disabled soldiers and sailors without requiring proof of service origin of disability waited entirely too long. Judging from what some of our Democratic friends have said on the subject, it is evident that they think we should wait at least that long before pensioning our soldiers, sailors, and marines who have fought our battles since the Civil War. It has now been 16 years since our War with Spain. I know of many who participated in that war who are now unable to earn a support and who can not prove that their disability was contracted in the service. I think we have waited long enough in their cases, and I for one am ready to vote for a bill to pension these men who served their country and are now unable to work and are in need of assistance without requiring them to prove the origin of their disability. I am aware that the edict has gone forth from Democratic leaders in this body that no more general pension legislation is to be considered at this session, and therefore it is useless to take the matter up now; but I give notice that we will do so next winter. Gentlemen say that it will cost too much. I do not know how much it might cost; I have not figured on that. The first question is, do they need it and do they deserve it? I say they do, and I am willing to give it to them, regardless of its cost, and thus show to the nations of the world that our Treasury stands back of our needy and disabled defenders. To

those who are worrying about the cost of it let me say that at each stage of the expansion of our liberal pension policy the same worrying has been indulged in, and yet the country has met it all and still prospers.

I have said before in this House, and I want to say it again, that if for the time being our revenues should not be sufficient to meet the expense of providing adequately for all those who are so richly entitled to the Nation's gratitude and bounty, I would gladly vote for the issue of bonds to meet it, and when the next generation reads the glorious story of the struggles of these men, and when their hearts swell with pride and patriotism as they think of the rich heritage of which our Republic is possessed in consequence of their service, I know they will thank us for giving them the privilege and the honor of paying their share of tribute to these heroes and their dependents.

In connection with the cost of paying all these pensions, I beg to remind you that more than a hundred of the old soldiers of the Civil War are dying every day. Nearly 40,000 answered the last roll call in 1913. Nearly all of them have now reached three score and ten, the allotted life of man in Holy Writ. The death rate will be much greater this year than last, and it will grow greater year by year so rapidly that within a decade there will be but a tottering remnant left of that magnificent band of young men who returned gallantly and triumphantly to their homes after the news from Appomattox foretold the matchless destiny of a reunited Republic. [Applause.] Already the effect of this rapid death rate is manifest by the amount carried by this bill, which is over $11,000,000 less than the appropriation of last year. When I think of the old fellows and their widows who have passed away without getting what they needed for their comfort in the closing days of their lives, and of those who are yet tottering on the brink of the grave in need of attention and the necessaries of life, it grieves me to see the pension appropriation reduced. I would like to see it kept high enough and long enough to not only keep the wolf from the door of every veteran of the Civil War, his widow, and dependents, but to bring the sunshine of comfort into the home of every one of these old heroes and keep it there so long as we are honored with his presence in this world.

PUBLIC LANDS.

Mr. Chairman, I have already referred to the fact that the policy of our Government, originating in colonial days, of granting public lands to the defenders of the country has been abandoned, and that the only advantage given for service in our wars since 1855 has been to credit the service on the period of actual residence required. In other words, a Civil War veteran, however old and feeble he may be, has to establish an actual residence on the land, and maintain it for at least a year, and in many instances much longer, before he can acquire title to it. It is impossible for him to do this now, and this provision of law is therefore a nullity so far as the veterans of the Civil War are concerned. We have hundreds of millions of acres of public unappropriated lands, much of which the Government could easily spare. I am in favor of returning to the earlier policy of the Nation by making some feasible distribution of a part of these lands among the veterans of the Civil War without requiring them to establish a residence thereon.

CHARGE OF DESERTION.

There is a class of soldiers of the Civil War who are unjustly denied a pension. I refer to those who are charged with desertion, because of their failure to return to their commands when, as a matter of fact, they had not the slightest intention to desert. Scores of such cases have come to my personal attention of men who were absent from their commands under proper military authority and were taken sick, or cut off by the enemy, or prevented by some other insurmountable obstacle from returning to duty. I know of many cases in the mountains of Kentucky where conditions were such as to render return to duty impossible and where a report to the commanding officer was equally impossible, and yet these men stand charged with desertion and can not get a pension. You may answer that there is a general law under which this charge can be removed by the War Department; but what is that law?

It provides, for instance, that where a soldier was prevented from returning to duty by disability he must not only prove the fact that such disability prevented him from returning, but that the disability was incurred in the service and line of duty. He might prove conclusively that it was beyond human possibility for him to return, and yet that will not avail him anything. He might prove that after he got home on furlough he contracted typhoid fever and was bedfast and helpless until his command was mustered out of service, and yet the War Department, under the law, would not remove the charge, because he could not prove that he contracted typhoid fever in the service, and he could not prove it because it was not true. I could cite cases where soldiers were unable to return to duty because they were prisoners of war at the time, and I know of one instance where it was shown that the reason the soldier could not return to his command was because he was dead, and yet the charge of desertion still stood. Such a law is ridiculous and absurd, and yet it seems impossible to get it amended or to get relief for these men in any other way, and whenever we make the effort the cry that we are proposing to pension deserters is raised. Mr. Chairman, I am opposed to pensioning deserters myself, just as much as anyone else is, but I do not concede that Congress can not draft a law which would do justice without rewarding anyone unjustly. I, for one, would rather see a score of those not entitled receive a pension than to have one who is entitled denied that right.

WIDOWS MARRIED SUBSEQUENT TO JUNE 27, 1890.

Another instance of injustice in our present pension system is the provision which denies pension to those widows who married the soldier or sailor subsequent to June 27, 1890. I remember very well the discussion which led up to the enactment of that provision. It was well known that in many instances young women married soldiers who were well advanced in years and whose physical condition made it evident that they would not live for a great while, so that these young women acquired a pensionable status without having made the sacrifices which constituted the primary purpose of Congress in providing widows' pensions. It was to stop this practice of taking advantage of these old men that the provision referred to was enacted. The very fact that this law existed when marriages since that date took place eliminates the real reason for its enactment. It has now been in force for nearly a quarter of a century and there are thousands of cases of widows like this where they have lived with the soldier for many years, and in some cases, of course, nearly a quarter of a century, and have nursed and cared for him to the end. To deny pension in such cases is a great injustice. Indeed, Congress has repeatedly acknowledged that injustice by granting pension in many such cases by special act. But to grant pensions in some cases and deny them in others equally deserving only adds the injustice of discrimination to the injustice which the law itself does. We ought to repeal that limitation and make provision for the deserving cases of widows which it denies a pension. Moreover, Mr. Chairman, I have never felt that $12 a month is enough pension to give to those widows of the Civil War who married the soldier before or during the service and who had all of the anxieties and burdens that fell upon them while the husband was absent in the service of his country.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

Mr. LANGLEY. Mr. Chairman, I wish the gentleman would please excuse me at this time. At the conclusion of my remarks I would be very glad to yield to him.

The history of the Civil War is filled with soul-stirring instances of their trials and their heroism. We ought to give them a substantial increase. Indeed, I would support a proposition which would increase the pension of all Civil War widows, especially when they are disabled and needy and who therefore come within the class of those to whom we do grant relief by special act. That would be simply a matter of justice.

STATE MILITIA ORGANIZATIONS.

Mr. Chairman, I had intended to discuss the question of granting a pension to members of State militia organizations who aided in the suppression of the Rebellion, although never actually mustered into the service of the United States, and it is still my purpose to do so, but on a later date. I have addressed the House on this subject several times since I have been a Member of it, but I have always done so in connection with other pension matters. This time I propose to discuss that question alone, and in the near future I shall ask you to hear me upon it and I think I can convince you with the evidence that I have accumulated that the delay of Congress in recognizing the great service that these old men rendered the country is not only unpardonable, but an act of ingratitude that ought to put it to shame. [Applause.]

Now, Mr. Chairman, the gentleman from Georgia desired to ask me a question, I believe? I shall take pleasure in yielding, if I have any time left.

The CHAIRMAN. The gentleman from Kentucky has just half a minute remaining.

Mr. BARTLETT. Mr. Chairman, I can not ask the question in that time.

Mr. LANGLEY. Very well.

MESSAGE FROM THE SENATE.

The committee informally rose; and the Speaker having resumed the chair, a message from the Senate, by Mr. Tulley, one of its clerks, announced that the Senate had passed with amendments the following joint resolution:

H. J. Res. 263. Joint resolution designating the second Sunday in May as Mother's Day, and for other purposes.

PENSIONS.

The committee resumed its session.

Mr. BARTLETT. Mr. Chairman, I ask unanimous consent to etxend my remarks in the RECORD.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. DAVIS. Mr. Chairman, how much time has the gentleman from Georgia used?

The CHAIRMAN. One hour and thirty-six minutes.

Mr. DAVIS. Mr. Chairman, I yield 25 minutes to the gentleman from Michigan [Mr. J. M. C. SMITH].

The CHAIRMAN. The gentleman is recognized for 25 minutes.

Mr. J. M. C. SMITH. Mr. Chairman, I very much appreciate the opportunity to address the House at this late hour in the day, and while my remarks do not deal precisely with the bill we are now considering, they are upon a subject that is now engaging the attention of the American people and the American Congress, a subject that is not equaled by any other except the Mexican situation, and I refer to the contest now being waged for the repeal of the Panama tolls, with a slight reference to the bill we have just considered, the question of battleships.

PANAMA CANAL TOLLS.

Mr. Chairman, I am in favor of two battleships, and would vote for more. I do this in order to uphold our national dignity and to keep pace in a halting way with the leading nations of the earth which talk "peace" and build battleships. England at the present time is constructing 15 dreadnaughts and battle cruisers carrying large guns of the dreadnaught type and fit for first-line duty; Russia, 11; Germany, 9; France, 9; Japan, 7; and Italy, 7; while we are building and have under construction only 5 in the United States. As a sample of what negligence or inattention along this line means we have only to refer to China, with a population of 450,000,000 people and building no dreadnaughts. It is having its country divided and parceled out to the other stronger nations of the world.

I have another reason why I am in favor of more battleships. We are constructing the world's most famous engineering feat ever undertaken by the ingenuity of man. I want to see our battleships go through this canal tolls free, and then, according to the Hay-Pauncefote treaty, as voted by this House, under the claim of "entire equality" to all nations, have other nations try to get their battleships through this canal tolls free.

Mr. Chairman, I herewith incorporate the provisions of the Hay-Pauncefote treaty affecting the use of the canal, the law exempting tolls, and the bill to repeal that law, as a part of my remarks:

ARTICLE 3.

The United States adopts, as the basis of the neutralization of such ship canal, the following rules, substantially as embodied in the convention of Constantinople, signed the 28th October, 1888, for the free navigation of the Suez Canal, that is to say:

1. The canal shall be free and open to the vessels of commerce and of war of all nations observing these rules on terms of entire equality, so that there shall be no discrimination against any such nation, or its citizens or subjects, in respect of the conditions or charges of traffic, or otherwise. Such conditions and charges of traffic shall be just and equitable.

2. The canal shall never be blockaded nor shall any right of war be exercised nor any act of hostility be committed within it. The United States, however, shall be at liberty to maintain such military police along the canal as may be necessary to protect it against lawlessness and disorder.

3. Vessels of war of a belligerent shall not revictual nor take any stores in the canal except so far as may be strictly necessary; and the transit of such vessels through the canal shall be effected with the least possible delay in accordance with the regulations in force and with only such intermission as may result from the necessities of the service.

Prizes shall be in all respects subject to the same rules as vessels of war of the belligerents.

4. No belligerent shall embark or disembark troops, munitions of war, or warlike materials in the canal, except in case of accidental hindrance of the transit, and in such case the transit shall be resumed with all possible dispatch.

5. The provisions of this article shall apply to waters adjacent to the canal within 3 marine miles of either end. Vessels of war of a belligerent shall not remain in such waters longer than 24 hours at any one time, except in case of distress, and in such case shall depart as soon as possible; but a vessel of war of one belligerent shall not depart within 24 hours from the departure of a vessel of war of the other belligerent.

6. The plant, establishments, buildings, and all works necessary to the construction, maintenance, and operation of the canal shall be deemed to be part thereof for the purposes of this treaty, and in time of war, as in time of peace, shall enjoy complete immunity from attack or injury by belligerents and from acts calculated to impair their usefulness as part of the canal. (Entered into Nov. 18, 1901.)

Law passed by Congress:

SEC. 5. That the President is hereby authorized to prescribe and from time to time change the tolls that shall be levied by the Government of the United States for the use of the Panama Canal: *Provided*, That no tolls, when prescribed as above, shall be changed unless six months' notice thereof shall have been given by the President by proclamation. No tolls shall be levied upon vessels engaged in the coastwise trade of the United States. That section 4132 of the Revised Statutes is hereby amended to read as follows: (Approved Aug. 24, 1912.)

Section 1 of the act to repeal the exemption clause of the above statute passed the House March 31, 1914, and now being considered in the Senate provides:

An act to amend section 5 of "An act to provide for the opening, maintenance, protection, and operation of the Panama Canal and the sanitation of the Canal Zone," approved August 24, 1912.

Be it enacted, etc., That the second sentence in section 5 of the act entitled "An act to provide for the opening, maintenance, protection, and operation of the Panama Canal, and the sanitation and government of the Canal Zone," approved August 24, 1912, which reads as follows: "No tolls shall be levied upon vessels engaged in the coastwise trade of the United States," be, and the same is hereby, repealed.

I want to see if under the "entire equality provision" claimed by the majority, if we charge tolls to foreign battleships for passing through the canal whether we must also charge our own battleships tolls.

I want to see whether or not we can take tolls from our own battleships and merchantmen on entering the canal and pay that toll back to them at the other end when they come out, and then apply this rule of "entire equality" to all the nations of the earth, and see whether or not those nations will exact that this same ridiculous performance of charging vessels tolls on going in and giving it back to them on coming out will meet this "entire equality" to all nations in the use of our canal.

I want to see whether or not we can hold the warships of other nations for 24 hours before they will be permitted to pass through the canal, and we ad libitum under this "entire equality" of use to all nations of the canal pass our warships through.

I want to see whether or not under the "equalization" claim of the majority of this House if we can victual, unload, or embark soldiers on our boats in our canal and deny this right to other nations.

I want to see whether or not under the construction claimed by the friends of "equalization" we can land our troops in the Canal Zone from our own warships and unload our merchandise and war supplies in the zone and other merchandise belonging to the United States and deny this right to the other nations of the earth, conforming to the rules of the treaty. Mr. Chairman, it can not be done. In other words, who does the canal belong to anyway?

The President of the United States himself, before election, was unequivocally in favor of free tolls to our American coastwise shipping, and so stated.

Speaking of this provision in the Democratic platform, President Wilson, at Washington Park, N. J., on August 5, 1912, said:

"One of the great objects in cutting that great ditch across the Isthmus of Panama is to allow farmers who are near the Atlantic to ship to the Pacific by way of the Atlantic ports.

"Now, at present there are no ships to do that, and one of the bills pending—passed, I believe, yesterday by the Senate as it had passed the House—provides for free tolls for American ships through that canal, and prohibits any ship from passing through which is owned by any American railroad company.

"You see the object of that, don't you? We don't want the railroads to compete with themselves, because we understand that kind of competition. We want water carriage to compete with land carriage, so as to be perfectly sure that you are going to get better rates around the canal than you would across the continent.

"Our platform is not molasses to catch flies. It means business. It means what it says. It is the utterance of earnest and honest men, who intend to do business along those lines and who are not waiting to see whether they can catch votes with those promises before they determine whether they are going to act upon them or not."

It is no credit to the great President of the United States nor the high office he holds to change front, turn his coat, and want us to deliver up our sovereignty over the canal. To me it looks like a stain on our national honor and a blow at the dignity of the great American people.

I want to see what becomes of the plank in the Democratic platform upon which a great national election was won, which provides:

We favor the exemption from toll of American ships engaged in coastwise trade passing through the canal.

And this was the position of the other great parties supported strongly by the will and wish of a majority of the American people.

I would like to know whether or not the American people would have ever stood for the expense of building the Panama Canal at a cost of $400,000,000 if they knew it was to be supervised, dictated, controlled, or interfered with by any other nation on earth. The rate of tolls now charged will not pay one-half the upkeep; that is doing enough for other nations.

I want to know whether or not my colleague, Mr. SMITH of Maryland, would convey to Great Britain the Territory of Alaska in order to appease England or any other nation on earth to waive its interest in the Panama Canal?

Joint resolution (H. J. Res. 258) providing for the repeal of the Hay-Pauncefote treaty as one of the conditions of the proposed transfer of southeastern Alaska to Canada.

Whereas the Hay-Pauncefote treaty has proved to be, and will continue to be, a source of dispute, and therefore of irritation, to the people of the United States; and

Whereas the narrow coast strip of southeastern Alaska, keeping one-third of western Canada from free access to the Pacific, is a source of irritation to the people of Canada; and

Whereas in the interest of the peace movement, especially for the sake of example, it is desirable that all sources of international irritation be removed whenever possible: Therefore be it

Resolved, etc., That the President be, and he is hereby, requested to negotiate with the British and Canadian Governments regarding the transfer of southeastern Alaska to Canada by sale or exchange, or both, the repeal of the Hay-Pauncefote treaty being made one of the conditions of transfer.

Why does he not offer to convey or "cede" the great State of Maryland instead of Alaska? Maryland was named after a British Queen, and its principal metropolis, Baltimore, is named after one of the greatest of British lords, who obtained a proprietary right to this great State from Charles I. I do not think my colleague from Maryland voices the sentiment of all the "Smiths," not even of the "John Smiths." We bought Alaska from Russia for a mere pittance of $7,200,000, and we have already received from this rich Territory the stupendous sum of $464,000,000 in its products, without so much as even beginning to deplete its resources; in fact, the riches of Alaska are bewildering; and since it was ceded to us for such a pittance, it would be more in harmony with exact justice and "entire equality" to all nations on earth for us to give it back to Russia instead of to England.

I now see a merchantman loaded at New York or Galveston plying the Mississippi River duty free and unloading at St. Louis without tolls.

I want to see that same vessel and cargo loaded at the same ports and pass through the Panama Canal to San Francisco under "entire equality" to ourselves and to our own people, canal tolls free; that would look like "entire equality" to ourselves.

If a merchantman must pay tolls to ply the canal, then the rate paid must be added to the cost of the article and, in familiar Democratic vernacular, be paid by the consumer. The coastwise man can not pay the tolls of his ship and cargo out of his own pocket, but if he pays for transport through the canal he must get his money back, and this amount will be charged to the transport of the commodity and ultimately paid by the consumer.

I want to find out what nation, if any, is complaining about free tolls to our American coastwise shipping through our canal. I have listened attentively to the speeches and arguments made, and have concluded that there is not a nation on earth, England not excepted, that has made a formal protest against free use of the canal to our coastwise trade.

Mr. J. R. KNOWLAND. Mr. Chairman, will the gentleman yield for a moment?

Mr. J. M. C. SMITH. Yes.

Mr. J. R. KNOWLAND. I will also call to the gentleman's attention the fact that the Democratic chairman of the Foreign Relations Committee of the Senate in a speech the other day stated positively that there were no foreign complications, as far as he knew.

Mr. J. M. C. SMITH. I am very much obliged for the remark. I have read during the interim that a fund of $30,000 has been expended by Mr. Carnegie, and that 750,000 speeches of one of the most distinguished Senators in the Congress of the United States have been sent under Government frank, mailed free, broadcast throughout our land to work up a sentiment against free tolls to our coastwise American shipping. I would listen to the condemnation of the great American people if such a propaganda were carried on by the friends of free tolls; "it would resound to heaven."

I want to see how our Secretary of State, Mr. Bryan, can give free tonnage and free everything else to the State of Panama and to the State of Colombia, under this "entire equality" use of the canal to all nations of the earth, and deny this privilege to the United States.

I would like to know what nation on earth has subscribed to the rules allowing or permitting it to use the canal under the terms of the treaty on "entire equality," and what share of the expense and upkeep they agree to pay. It will not be Panama nor Colombia.

[From the Washington Post, Wednesday, May 6, 1914.]

COLOMBIA SPEEDS TREATY—PACT BY WHICH UNITED STATES IS TO PAY $25,000,000 PASSES FIRST READING.

BOGOTA, COLOMBIA, *May 5.*

The treaty between Colombia and the United States, settling the long-standing dispute over Panama, passed its first reading in the Colombian Senate to-day.

The treaty provides that Colombia shall enjoy freely and in perpetuity free passage through the Panama Canal for her troops and warships, and stipulates also that six months after the exchange of ratifications the sum of $25,000,000 shall be paid to Colombia.

Who is to determine and enforce these rules and requirements? Why should the American Nation construct the canal? Why should it police it, care for it, defend it in perpetuity, without sovereignty, privileges, or control?

Why did we permit 47,000,000 tons to pass through St. Marys Canal tolls free last year, and now complain because our American shippers would forsooth carry 1,000,000 tons duty free through the Panama Canal, which they likewise helped to construct?

Where is the exact and equal terms and that high and lofty justice, love of humanity, and regard toward all nations sitting, when England charges American vessels for entering her canal a much higher rate than we charge English merchantmen for entering ours? There were shipped through the Suez Canal 16,581,898 tons of merchandise in 1910. What great advantage, abuse, or hatred toward England is found in the fact that we pay $1.30 a ton for shipping merchandise through the Suez Canal and have fixed a rate of $1.20 a ton for merchandise to be shipped through our Panama Canal, although in that I might, if I adopt the "equalization" scheme, be more exact to call it "the American and English Panama Canal"? The question of ship subsidy has taken on great proportions in the consideration of the rates for this canal, but was voted without dissent in the Underwood tariff bill in allowing 5 per cent rebate to imports carried on American ships. Why is this not attacked for violation of ship subsidy?

That a discount of 5 per cent on all duties imposed by this act shall be allowed on such goods, wares, and merchandise as shall be imported in vessels admitted to registration under the laws of the United States.

Ship subsidy in 1914 was ship subsidy in 1912 when this tolls act was passed by a majority of this House voting for this bill, which it is sought to repeal now.

SUBSIDY.

Was it ship subsidy to expend $260,000,000 in the last six years for our rivers and harbors?

Is it river subsidy to expend $300,000,000 for the improvement of the Mississippi River?

Is it cotton subsidy to expend $1,000,000 for the eradication of the boll weevil?

Is it cattle subsidy to expend Government revenue for the eradication of the cattle tick?

Is expending $25,000,000 for highways an automobile subsidy?

Is everything a person opposes to be dominated "subsidy and graft"?

Is paying a duty to other nations on our exports while we admit their exports into our country free of duty a foreign subsidy?

When a State receives more revenue from the Government than the Government receives from the State, is that a State subsidy?

Is paying higher wages to American labor than is paid by foreign countries to their laborers a labor subsidy?

Mr. Chairman, much has been said about the way in which we secured the Panama Canal Zone. To those careful critics I refer them to a perusal of the way in which England secured control and sovereignty over the Suez Canal—to an article found in the Fortnightly Review of September, 1893, entitled "England's right to the Suez shares," by Mr. Whitehouse, which will tell the story. The canal strictly was an asset of the Egyptian Government. It was pawned in 1876 by Ismail Pasha, Khedive of Egypt, for the purpose of procuring a private loan, and taken over by England on a forfeiture of the pledge of $20,000,000. Mr. Whitehouse says the shares belonged to Egypt, but were pledged by Ismail, and further, that "the transaction of 1876 belongs to a class against which a court of equity has never failed to give relief." The use of public property to pay a private debt is not unquestionable, it can not be done. Mr.

W. S. Blunt, in his work entitled "Secret history of the English occupation of Egypt," in an eloquent plea for the rights of the Egyptians, denounces the robberies which the English Government has perpetrated on the Egyptians, and said:

If you do not think the Egyptian needs the money, which we as a nation have taken from him, go look at his ribs.

I would like to know what is secreted and covered up in the President's message to the great Congress of the United States when he told us to repeal the tolls law to our American coastwise shipping whether it is right or wrong, and I now insert that message:

PANAMA CANAL TOLLS—MESSAGE OF THE PRESIDENT OF THE UNITED STATES DELIVERED AT A JOINT SESSION OF THE TWO HOUSES OF CONGRESS MARCH 5, 1914.

GENTLEMEN OF THE CONGRESS: I have come to you upon an errand which can be very briefly performed, but I beg that you will not measure its importance by the number of sentences in which I state it. No communication I have addressed to the Congress carried with it graver or more far-reaching implications as to the interest of the country, and I come now to speak upon a matter with regard to which I am charged in a peculiar degree, by the Constitution itself, with personal responsibility.

I have come to ask you for the repeal of that provision of the Panama Canal act of August 24, 1912, which exempts vessels engaged in the coastwise trade of the United States from payment of tolls, and to urge upon you the justice, the wisdom, and the large policy of such a repeal with the utmost earnestness of which I am capable.

In my own judgment, very fully considered and maturely formed, that exemption constitutes a mistaken economic policy from every point of view, and is, moreover, in plain contravention of the treaty with Great Britain concerning the canal concluded on November 18, 1901. But I have not come to urge upon you my personal views. I have come to state to you a fact and a situation. Whatever may be our own differences of opinion concerning this much debated measure, its meaning is not debated outside the United States. Everywhere else the language of the treaty is given but one interpretation, and that interpretation precludes the exemption I am asking you to repeal. We consented to the treaty; its language we accepted, if we did not originate; and we are too big, too powerful, too self-respecting a Nation to interpret with a too strained or refined reading the words of our own promises just because we have power enough to give us leave to read them as we please. The large thing to do is the only thing we can afford to do, a voluntary withdrawal from a position everywhere questioned and misunderstood. We ought to reverse our action without raising the question whether we were right or wrong, and so once more deserve our reputation for generosity and for the redemption of every obligation without quibble or hesitation.

I ask this of you in support of the foreign policy of the administration. I shall not know how to deal with other matters of even greater delicacy and nearer consequence if you do not grant it to me in ungrudging measure.

Who would be so cowardly as to stand in the great halls of this the greatest legislative body in the world and say that he would vote in accord with that sentiment and to repeal a law that he knew to be right? Why does not the President come forward and take into his confidence the people whom he represents? Or else why not divulge his secret purpose to the great leaders of the affairs of our Nation? Why does he remain silent when one of the greatest legislative battles known to our history is being waged to maintain not only a law which Congress passed by a majority vote but a principle affecting the sovereignty of our Nation and our right to control our own affairs? It was Lincoln who said—

I stand with those who are right. I stand with them while they are right and leave them when they are wrong.

Mr. Chairman, I notice that the chairman of the Senate Committee on Foreign Affairs disclaims that the repeal of the exemption clause in any wise affects or pertains to the Hay-Pauncefote treaty. How does that square with the long, ardent, and patriotic speeches made in both branches of Congress that it does? This view is not shared in by those who voted or the public. How does that declaration coincide with the message of the President which expressly states:

Everywhere else the language of the treaty is given but one interpretation, and that interpretation precludes the exemption I am asking you to repeal.

It sounds irony and to me like a surrender, and that the honorable Senator from Missouri, as against the President, must be added to the list of the other distinguished and high authorities that we have a right to fix the toll rate of the canal irrespective of any treaty and for the very patent reason given by them. The construction of the treaty claimed by those wanting repeal is unworkable. When the statute fixing rates is repealed, under what law or right will they be fixed, and when?

I wish to put in the RECORD the explanation of the meaning of the Panama Canal treaty which John Hay gave to the Senate in transmitting the Hay-Pauncefote treaty to that body, taken from the Philadelphia Inquirer of April 13, 1914:

The whole theory of the treaty is that the canal is to be an entirely American canal. The enormous cost of constructing it is to be borne by the United States alone. When constructed it is exclusively the property of the United States and is to be managed and controlled and defended by it. The United States alone as the sole owner of the canal as a purely American enterprise adopts and prescribes the rules by which the use of the canal shall be regulated and assumes the entire responsibility and burden of enforcing, without the assistance of Great Britain or of any other nation, its absolute neutrality.

Look at the galaxy of great men championing the cause of free tolls.

Our distinguished Speaker, Mr. CLARK, who barely escaped sitting now in the White House [applause], and if he had been nominated would have saved much more than his annual salary in this very contest; besides, he would have sustained the dignity of our Republic; and the great leader of the majority, Mr. UNDERWOOD, takes the position that it is no violation of our treaty. The President himself, in his message, even half concedes that when he calls on us to "repeal the tolls law, whether it be right or wrong." It may be right. Our great Republican leader, Mr. MANN, yielding to no one in his forensic ability and legislative research, voted against repeal. And Secretary Bryan has already shattered the contention of the opponents of exemption by formulating a treaty for Panama, giving Panama the use of our canal in perpetuity for transport of all of its vessels and troops tolls free; and the able Mr. MURDOCK.

Article 19 of the treaty made with the Republic of Panama on November 18, 1903, provides:

The Government of the Republic of Panama shall have the right to transport over the canal its vessels, and its troops and munitions of war in such vessels, at all times, without paying charges of any kind.

This treaty was made after the ratification of the Hay-Pauncefote treaty, and discriminates in favor of Panama.

Add to the above eminent citizens the following distinguished and high authority as being in favor of free tolls—ex-Presidents Taft and Roosevelt, who do not think that we have violated the terms of the treaty by exempting our coastwise vessels.

I want to join in the imprecation by our honorable Speaker, in his great speech here on the floor of this House on this question, and with him, sink or swim, against all comers proclaim the sovereignty of the United States and their right to fix the charges for everything, animate and inanimate, that traverses the Panama Canal, which carries the Stars and Stripes, without the dictation or interference of any other nation on earth, or all the nations on earth.

Why must we divide the ownership of our canal? England has not asked this. No other nation has asked it. If done now, it is as a leap "in the dark." Who knows of any nation asking that we repeal the tolls act, or any portion of it? Let us set the canal to work first, and then see. [Applause.]

Mr. DAVIS. Mr. Chairman, I yield to the gentleman from California [Mr. J. R. KNOWLAND].

Mr. J. R. KNOWLAND. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. BARTLETT. Mr. Chairman, I yield to the gentleman from Pennsylvania [Mr. CARR] such time as he may desire to consume.

Mr. CARR. Mr. Chairman, the bill now under consideration appropriates for invalid and other pensions for the fiscal year 1915 the sum of $169,000,000. To this amount should be added the sum of $150,000, the amount appropriated for the fees of examining surgeons. The appropriation last year amounted to $180,000,000, the amount this year being a reduction of $11,000,000.

Mr. Chairman, according to the report of the Commissioner of Pensions the number of pensioners on the roll December 31, 1913, was 805,887. This is a decrease of 14,313 since July 1, 1913, a period of six months. The number of Civil War survivors on the roll December 31, 1913, was 448,138. There were on the rolls at the end of the fiscal year 1913 462,379, showing a loss in six months 14,241.

Since 1861 there have been allowed by special acts of Congress 42,337 pensions and increases of pensions, of which 22,016 are now on the roll with an annual face value of $6,699,096. Only a part of this is chargeable to special acts, as most of the beneficiaries had been previously pensioned under general laws at lower rates. The detailed statement of the apportionment of the pension rolls among the several States and Territories will be found in the report of the Committee on Appropriations. This report shows that the average annual value of each pension is $209.08 and the average value of the Civil War pension is $240.69.

The acts of Congress now in operation governing the granting of pensions to soldiers of the Civil War and their dependents are the acts of May 11, 1912, known as the Sherwood Act, and the special acts to which I have referred.

The Commissioner of Pensions states that the maximum number of new applications under the act of May 11, 1912, was attained last year, and beginning with this year the number will decrease. While the loss by reason of death has been very large, there has been no corresponding decrease in the amount of the appropriation for pensions, due to the fact of the increasing value of each pension from year to year. Nearly all the Civil War soldiers are now under the act of May 11, 1912. The report shows that under this act there are 401,792 Civil War soldiers, 13,063 Navy pensioners, and 1,110 Mexican War soldiers on the rolls.

Mr. Chairman, I append the following table showing the total expenditure for pensions to soldiers, sailors, and marines, their widows and minor children and dependent relatives on account of military and naval service since the founding of this Government. I think that this total will be found very interesting.

War of the Revolution (estimated)	$70,000,000.00
War of 1812 (service pension)	45,923,014.46
Indian wars (service pension)	12,241,273.61
War with Mexico (service pension)	47,632,572.34
Civil War	4,294,596,944.47
War with Spain and Philippine insurrection	42,185,230.84
Regular Establishment	28,461,369.52
Unclassified	16,499,419.44
Total	4,557,539,824.68

In addition, Mr. Chairman, to the pensions paid in this country we have 5,495 pensioners who reside abroad, the most of whom are not citizens of this country. The total amount paid to these nonresidents is $1,166,735.

Mr. Chairman, there are now no pensioners on account of the Revolutionary War on the roll. The last widow pensioner of the war was Esther S. Damon, of Plymouth Union, Vt., who died November 11, 1906, aged 92 years. The last survivor of the Revolution was Daniel F. Bakeman, who died at Freedom, Cattaraugus County, N. Y., April 5, 1869, aged 109 years, 6 months, and 8 days.

The last surviving pensioned soldier of the War of 1812 was Hiram Cronk, of Ava, N. Y., who died May 13, 1905, aged 105 years and 16 days. The names of 199 widows of the War of 1812 remained on the pension roll June 30, 1913.

The committee had under consideration the present method of paying pensions. There was some discussion as to whether it was better to make payment under the certificate and voucher system or the check system. The commissioner stated that the present system of paying by check had worked very satisfactory to the department and to everyone concerned. Under the old voucher or certificate system the pensioner would first get his voucher, which he would have to make out at an expense to himself. That voucher would be sent in to be checked up to ascertain if it were correct. If not correct, it would be sent back for correction and the pensioner would get his check, in any event, from 10 to 15 days after the time when it was actually payable. As the vast majority on the pension rolls are dependent, this delay was a matter of serious consequence to them. Under the check system payments are being made when the pensions are actually due, and the system is so arranged that pensioners living on the Pacific coast receive their checks at practically the same time as those residing in the city of Washington. This new system seems to meet with the approbation of the vast majority of old soldiers, and the department is to be congratulated that this method has been adopted. The only objection that thus far has been urged in this method of payment arises from the fact that under the present law, in the event of a check being lost, the pensioner is required to wait six months before he can be paid. This matter should be remedied, and I suggest to the committee an amendment to the present law permitting the bureau to make this payment as soon as possible after notification that the check has been lost.

Mr. Chairman, there was another matter brought to the attention of the committee at the time the hearings were held concerning the time of payment of these checks. It was suggested that perhaps it would be well to pay these pensions monthly instead of quarterly. The commissioner, who had interviewed quite a number of soldiers at various reunions, was of the opinion that sentiment was so divided upon this subject that the committee did not feel justified in recommending a change in the present law. The committee, as will appear from the hearings, was satisfied that the present method was working with entire satisfaction. It therefore comes with poor grace from the gentleman from Kentucky [Mr. LANGLEY] to charge the Democratic Party with opposition to any change. Mr. Chairman, let me read from the testimony.

Mr. WILLIS. Mr. Chairman, will the gentleman yield for a question?

Mr. CARR. With pleasure.

Mr. WILLIS. What argument was given by anyone against the method of payment of pensions monthly? I will say to the gentleman frankly I have talked with a great many pensioners, and all of them with whom I have talked are strongly in favor of it. I judge from what the gentleman says that some arguments were produced before the committee in reference to that. What were the arguments?

Mr. CARR. I prefer to answer the gentleman's question by reading from the testimony of the Commissioner of Pensions, who appeared before the committee. Mr. DAVIS, the distinguished gentleman from Minnesota and a member of the committee, brought to the attention of the committee this question regarding the payment of pensions monthly, and finally the commissioner was asked by Mr. DAVIS:

Mr. DAVIS. There is some agitation of the question of paying pensions monthly instead of quarterly, and that agitation may appear upon the floor of Congress in time. That would necessarily cause some additional expense and would require some additional clerk hire; but, in your opinion as Commissioner of Pensions and as an old soldier, would the additional expense, if any, be overbalanced, so to speak, by the benefits that would accrue to the pensioners if they could receive their pension checks monthly instead of quarterly? I ask your judgment on that as an old soldier and as the Commissioner of Pensions.

Mr. SALTZGABER. The Commissioner of Pensions is very slow about giving his opinion on proposed legislation, because he believes that it is the duty of the bureau of which he has charge to administer the law, and it is for Congress to determine when pensions shall be granted or paid.

Mr. DAVIS. But Congress usually acts upon information furnished by the bureau.

Mr. SALTZGABER. The monthly payment of pensions was at first favored by me, knowing that some of my old comrades in my immediate neighborhood at home, as I believed, would be benefited by that mode of paying pensions, because whenever they received their pensions for a period of three months, by reason of improvidence or other causes, they soon spent their funds. When they first received their pensions, they would have a period of feasting, and when it came along toward the end of the three months they would have a period of fasting. My notion was that if this money would come along more frequently the situation might be better. Then, I went down to the Ohio State encampment, and, by request, made an address to the comrades gathered there, and in the course of the address I said we were in favor of the monthly payment of pensions, but instantly they began to call out, "No, no; we don't want it." "Well," I said, "I hope you will appreciate the spirit that prompts the suggestion." They said, "Oh, yes; you are all right; but we do not want pensions paid monthly; we want them paid as they are now." Now, I asked the chairman if I could submit the question to those present, and he said, "Yes; go ahead." So I propounded the question to them, and a majority of them voted against it. At Chattanooga I did not discuss the subject with very many, but I understand that the executive council, which is the highest body next to the grand encampment itself—I am referring now to the national encampment held at Chattanooga—that executive council, after consideration of the subject, which was discussed in the address of the commander in chief, unanimously decided against it.

Mr. DAVIS. Decided against monthly payments?

Mr. SALTZGABER. Yes, sir. So I find a very great division of sentiment, and I am unable to determine whether the majority lies on one side or the other.

Mr. DAVIS. It would seem at first glance as though they would prefer monthly payments, just as the ordinary civilian is paid by the month.

Mr. SALTZGABER. So it struck me. I asked Mr. Campbell, at the request of some Congressmen, to make up an estimate of the additional expense that would be involved, and his estimate is that it would require an additional appropriation of at least $1,000,000 a year.

Mr. BARTLETT. To cover the additional expense?

Mr. SALTZGABER. Yes, sir; to provide the necessary force and equipment to make the monthly payments.

Now, we thought, in view of such information, that the committee was not in a position to make a recommendation one way or the other and that the present method was satisfactory.

Mr. DAVIS. Will the gentleman permit an interruption?

Mr. CARR. Yes; but I had yielded to Mr. WILLIS.

Mr. DAVIS. I would like to ask the gentleman, my colleague on the committee, if he does not think that it would be better to distribute that million dollars to the old soldiers than for it to be expended in such expense? I certainly do.

Mr. CARR. I would answer that, Mr. Chairman, that if the soldiers desire to be paid that way, I should certainly think so.

Mr. DAVIS. Certainly.

Mr. CARR. But until there is some expression of sentiment on the part of the soldiers to have the payments made monthly, I do not see that the committee is in any position to take up this matter and make a recommendation to the Congress.

Mr. DAVIS. But if that million dollars were to be spent, and the soldiers not particularly desiring the money to be paid monthly, I say I would rather give that money to the old soldiers in the way of pensions than to have it go to the expenses of paying monthly.

Mr. CARR. I concur heartily in what the gentleman from Minnesota has said, and I would rather add this additional

million dollars to the pension fund than to have it paid out in unecessary expenses in sending the money out monthly.

Mr. WILLIS. Will the gentleman yield further?

Mr. CARR. Yes.

Mr. WILLIS. I want to say I fully concur with the gentleman's statement; I would rather pay the million dollars out to the pensioners by adding it to the amount of pensions than to have it go as clerk hire. I am greatly interested in the information which the gentleman gave of the action of the soldiers, especially at the Ohio encampment and the national encampment at Chattanooga. I did not get from the gentleman's reading and his very lucid statement any expression of the argument as to why they would be opposed to it. What were the arguments given?

Mr. CARR. I do not recall that before our committee there were any arguments given one way or the other, or any argument advanced by the Commissioner of Pensions when he appeared before the soldiers at these reunions; but I take it from what he had stated that the matter had been thoroughly discussed by them and that the arguments that had been advanced were not sufficient to impel a change in the present policy of Congress.

Mr. DAVIS. The council at Chattanooga was unanimously in favor of leaving it as it was?

Mr. CARR. Yes.

Mr. WILLIS. Mr. Chairman, I was curious to know what the arguments were, because I have received many letters from ex-soldiers and have had personal solicitation from them in favor of the monthly payment of pensions, and it surprises me to find the facts as the gentleman has stated them.

Mr. CARR. I appreciate the fact that the gentleman from Ohio is anxious, as the members of the committee are, that the very best method be adopted for paying these pensions.

Mr. ADAIR. Will the gentleman yield to me?

Mr. CARR. I will be very glad to do so.

Mr. ADAIR. In view of the fact that it costs the Government less than $100,000 a year to pay the pensioners of the country four times a year, can the gentleman tell us how the commissioner figures it would cost $1,000,000 extra to pay them twelve times a year?

Mr. CARR. The commissioner stated in his report that he submitted this question to Mr. Campbell. "I asked Mr. Campbell," he said, "at the request of some Congressman, to make up an estimate of the additional expense that would be involved, and his estimate is that the additional expense involved would be $1,000,000." Now, Mr. Chairman, I do not know, of course, how he arrives at that.

Mr. BARTLETT. May I interrupt the gentleman?

Mr. CARR. Certainly.

Mr. BARTLETT. Mr. Campbell is the disbursing officer of the Pension Office?

Mr. CARR. Yes; he is the disbursing officer.

Mr. BARTLETT. And an employee of long experience and familiar with his duties.

Mr. ADAIR. Will the gentleman yield for a suggestion?

Mr. CARR. Certainly.

Mr. ADAIR. It occurs to me that a man would not have to be an employee of long experience to know it would not cost a million dollars a year to pay pensioners monthly. Personally, I think it costs too much to pay them monthly. I am not in favor of it, on that account, but I would have to scrutinize the books pretty carefully before anyone could lead me to believe it would cost a million dollars to pay them 12 times a year when it only costs $100,000 to pay them 4 times a year.

Mr. CARR. Of course, Mr. Campbell is an officer of the Government, and the figures he submits are the best available in ascertaining this cost. Neither am I certain that the statement of the gentleman from Ohio that it costs $100,000 per year to pay pensions four times a year includes all the cost.

The vast labor necessary to make up a pension roll containing 800,000 names 12 times a year can hardly be realized. Prior to the abolition of pension agencies there were employed 307 permanent clerks, and 162 clerks were employed for 10 days during each quarterly payment period. When the agencies were consolidated with the Pension Bureau the number of clerks were 251. On September 19, 1913, the Comptroller of the Treasury decided that the disbursing clerk for the payment of pensions was the disbursing clerk of the executive department and subject to the provisions of all laws governing disbursing clerks of the executive department. It had been held before that time in the bureau, based upon the decision of the comptroller dated October, 1912, that the disbursing clerk whose fee was provided for in the act of August 17, 1912, was not included within the general provisions of the law with reference to disbursing clerks of the executive department, but rather that he should be regarded as a pension agent before that time had been regarded. Before the decision of the comptroller the disbursing clerk prepared all vouchers, schedules, and pay rolls and was in possession of all the records of all the former pension agents. After the preparation of the schedules and pay rolls the disbursing clerk certified their correctness to the Commissioner of Pensions. The correctness of the schedules was then certified by the Commisioner of Pensions, and said schedules, with the accounts current, were transmitted to the Auditor for the Interior Department.

Under the present system the pension roll is now in charge of the Finance Division, where are prepared all vouchers or pay rolls or schedules containing the names of the pensioners, the rates of pension, and other essential information, the correctness of which is certified by the Commissioner of Pensions, and the same is placed in the hands of the disbursing clerk as needed for the purpose of pension payments. The disbursing clerk prepares and sends out to all pensioners proper checks, and then makes the necessary notices and certifications of his payments upon the schedules and submits the same and all other papers properly constituting his accounts of pension disbursements to the Finance Division, where the payments are entered upon the roll and the accounts given an administrative examination, after which they are prepared and submitted for the necessary certification and transmission to the Auditor for the Interior Department in accordance with the provision of the acts of July 31, 1894, and August 23, 1912. When the duties of the Disbursing Office was thus changed the number of employees was reduced from 251 to 156.

The Pension Bureau is now one of the busiest of all the departments of the Government. Considering the vast amount of business done, the number of people with whom the bureau is in constant touch, the character and scope of the work, the wonder is that the bureau is able to transact its business with such skill and dispatch as has been evidenced by facts that have come to the knowledge of your committee.

Mr. Chairman, the pension system of the United States commends itself to every American. [Applause.] No Government in this world has treated its soldiers and sailors and their dependents so liberally as this Government has treated its soldiers, sailors, and dependents. We believe that these men who preserved the Nation in time of war are worthy of their country's gratitude. [Applause.] We believe that those who have lost life, limb, or health in the service of the Nation and those dependent should in their own right or that of their legal representatives receive a reward commensurate with the service rendered, so far as the Nation's bounty may be able to measure that service. [Applause.] The pension roll is still "a roll of honor." The nations of the world have recognized the worth of heroic and valiant deeds. They have realized that war is attended with every horror that the human body can experience or the human mind can know. In our own Nation the pension system originated with the Revolutionary War, and the pension policy has been constantly followed since that time. The willing and cheerful spirit with which these appropriations are made by Congress should be a guaranty to every soldier that the Nation which accepted his services in time of its peril has not forgotten him in the days of his adversity. [Applause.]

Mr. BARTLETT. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. MURRAY of Oklahoma, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 15280, the pension appropriation bill, and had come to no resolution thereon.

MOTHER'S DAY.

Mr. HEFLIN. Mr. Speaker, I desire to call from the Speaker's table the House joint resolution 263, designating the second Sunday in May as Mother's Day, and for other purposes, and move to agree to the Senate amendments.

The SPEAKER. The gentleman from Alabama calls from the Speaker's table House joint resolution 263, with Senate amendments. The Clerk will report the amendments.

The Senate amendments were read.

Mr. HEFLIN. Mr. Speaker, I move that the House agree to the Senate amendments.

The Senate amendments were agreed to.

On motion of Mr. HEFLIN, a motion to reconsider the vote by which the amendments were agreed to was laid on the table.

BESSIE M'ALISTER M'GUIRK.

Mr. FINLEY. Mr. Speaker, by direction of the Committee on the Post Office and Post Roads, I desire to report back the bill (H. R. 4423) for the relief of Bessie McAlister McGuirk, which we think was improperly referred to that committee, and I ask that it be referred to the Committee on Claims.

The SPEAKER. The Clerk will report the title.

The Clerk read as follows:

H. R. 4423. A bill for the relief of Bessie McAlister McGuirk.

The SPEAKER. The gentleman from South Carolina asks that the Committee on the Post Office and Post Roads be discharged from the further consideration of the bill, and that it be referred to the Committee on Claims. Is there objection?

There was no objection.

EXTENSION OF REMARKS.

Mr. FOWLER. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. FOWLER. Will it be proper for me to ask unanimous consent to extend my remarks in the RECORD on the pension bill that is now under discussion? I desire to do so, and ask that the remarks may follow those of the gentleman from Kentucky [Mr. LANGLEY].

The SPEAKER. What was the last remark?

Mr. FOWLER. I desire to ask unanimous consent to extend my remarks in the RECORD on the pension bill that is now under consideration, following the speech of Mr. LANGLEY, of Kentucky.

The SPEAKER. The Chair will put the first part of it. Of course, the House could locate the place for the speech by vote. The make-up of the CONGRESSIONAL RECORD is under the control of the Public Printer, and one of the regulations is to the effect that the speeches which are not delivered in the House shall be printed at the end of the RECORD.

Is there objection to the request of the gentleman from Illinois, that he may extend his remarks in the RECORD? [After a pause.] The Chair hears none. Now, the gentleman asks that his speech follow the speech of the gentleman from Kentucky [Mr. LANGLEY], made to-day.

Mr. WILLIS. Mr. Speaker, reserving the right to object, I want to suggest to my friend from Illinois that it seems to me that that request is hardly a proper one. All the rest of us follow the usual rule. Speeches that are not delivered in the House go in at the back of the RECORD. I hope the gentleman will not make that request. I hope he will withdraw it, and thus save me from the necessity of objecting.

Mr. FOWLER. If any Member of this House thinks it unfair, Mr. Speaker, or has any doubt whatever about the propriety of it, certainly I would not request it.

Mr. WILLIS. I do not say it would be unfair, but it is not a proper request. Everybody else who desires to publish an extension of remarks goes into the back of the RECORD, as the Speaker stated.

Mr. FOWLER. Certainly, Mr. Speaker, I shall not make that request if any gentleman objects.

The SPEAKER. It was never a formal rule, but it was a matter of common consent. The reason that agreement was entered into was that if a debate was going on and A would make a remark and B would make a remark in answer to it and then get leave to extend his remarks and put in his speech, sometimes covering five or six pages, anybody trying to find out what really happened in the House that day would be considerably muddled in regard to it. That was the reason for the agreement. It was a gentleman's agreement.

Mr. FOWLER. Mr. Speaker, in order that the House may not misunderstand me, I desire in my remarks to extend a letter from Secretary of the Interior Fisher in 1911, during the pendency of the Sherwood pension bill in the Senate.

The SPEAKER. Does the gentleman make that request?

Mr. FOWLER. Yes. If the Speaker thinks I do not have that authority already, I desire to make the request.

The SPEAKER. The gentleman has a perfect right to print the letter. The Chair was referring to that part of the gentleman's request to print his speech after the remarks of the gentleman from Kentucky [Mr. LANGLEY].

Mr. FOWLER. I do not make that request.

Mr. WILLIS. Mr. Speaker, if I may be permitted to do so, I wish to call the attention of the gentleman from Illinois to the rules governing the publication of the RECORD, which he will find contained in the back of the RECORD itself. The seventh rule provides——

The Public Printer will arrange the contents of the RECORD as follows: First, the Senate proceedings; second, the House proceedings; third, the speeches withheld for revision.

Mr. FOWLER. Of course, it could be done with unanimous consent. I knew that.

Mr. Speaker, the gentleman from Kentucky [Mr. LANGLEY] delivered quite a lengthy speech to-day reviewing legislation in the past for pensions to the soldiers and sailors, their widows and minor and helpless children, in this country, the burden of which was intended to convey the idea that the Republican Party always has been and still is the friend of the soldier and sailor, and wedded to a uniform policy of the most liberal pensions for them, and that, on the contrary, the Democratic Party always has been, and still is, the enemy of the soldier and sailor, and committed to a uniform policy of opposition to liberal pensions for them, their widows and helpless and minor children. Had he gone no further than to extol the constancy of his party to the defenders of our national honor, and to a liberal support for pensions for them and those dependent upon them, I should not have engaged in this controversy at all; but when he charges that the Democratic Party is the enemy of these honorable men, and opposed to granting liberal pensions to them and their widows and children, then I think, in justice to all concerned, a reply should be made, so that the real friend to the soldier and liberal pensions for him and his dependents should be made known.

I desire to place in the RECORD some of the laws which were passed by a Democratic House and approved by a Democratic President.

I am indebted to Representative ADAIR, of Indiana, for assembling a large part of the following acts:

First. Act of August 15, 1876, providing for the issuance of artificial limbs, or commutation therefor, to disabled soldiers and seamen, and providing transportation for the purpose of having the same properly fitted.

Second. Act of February 28, 1877, increasing the pension of those who lost both an arm and a leg.

Third. An act of March 9, 1878, granting pensions on account of service in the War of 1812 and the Revolutionary War, requiring a service of but 14 instead of 60 days on the part of the survivors of the War of 1812, and granting pensions to widows, regardless of the date of the marriage to the soldiers of this war. It also granted pensions to widows of soldiers of the Revolutionary War on a service of 14 days. Former laws required a marriage prior to the treaty of peace in the case of widows of the War of 1812.

Fourth. Act of June 17, 1878, increasing to $72 per month the pensions of those who lost both hands, both feet, or the sight of both eyes incident to the service.

Fifth. Act of March 3, 1879, increasing to $37.50 all pensions on account of amputation at the hip joint. This sum was afterwards increased to $45 per month by a Democratic House.

Sixth. Acts of January 25 and March 3, 1879, granting arrears of pensions from the date of discharge, generous measures which benefited more than 225,000 pensioners at once and caused the annual pension rate to leap from $33,708,526.19 to $57,240,540.14. The Republican Party had control of both Houses of Congress for more than 10 years after the close of the war, but passed no legislation of this character.

Seventh. Act of June 21, 1879, abolishing biennial medical examinations and providing that in no case shall a pension be withdrawn or reduced except upon notice to the pensioner and a hearing upon sworn testimony.

Eighth. Act of June 16, 1880, giving $72 per month to all those who became totally helpless for any cause incident to the service.

Ninth. Act of February 26, 1881, for the protection of pensioners in the soldiers' homes.

Tenth. Act of July 4, 1884, which established the proper relation which should exist between attorneys and clients and fixed by law the fees to be allowed in pension cases. By this act a Democratic Congress placed the strong arm of the law between the helpless applicant and the rapacious agent.

Eleventh. Act of July 14, 1892, establishing an intermediate rate of pensions between $30 and $72 per month, and fixing the rate of $50 for all who required frequent and periodical though not regular and constant personal aid and attention.

Twelfth. Act of August 5, 1892, granting pensions to Army nurses and forbidding the demanding of a fee by claim agents for prosecuting this class of cases. This was a generous recognition of the noble heroines who, leaving home and loved ones behind, in self-sacrifice braved pestilence and hardship to minister to the sick in the hospitals of the Army.

Thirteenth. Act of December 21, 1893, making a pension a vested right.

Here are some other contributions to the pension laws which were either approved by a Democratic President or passed by a Democratic House of Representatives:

Fourteenth. Act of April 18, 1884, making it a felony for any person to falsely or fraudulently represent himself to be an officer of the United States.

Fifteenth. Act of March 19, 1886, increasing from $8 to $12 per month the pensions of 79,989 widows and dependents on the roll at the time as well as tens of thousands who have since been placed thereon. These certificates were issued by a Democratic Commissioner of Pensions, without any expense or unnecessary delay to those deserving beneficiaries.

Sixteenth. Act of May 17, 1886, amending the reports of the War Department, which discriminated against a large and worthy class of soldiers, relieving thousands of unfortunate veterans of the hardships worked by the resting of the charges against them, based upon technical errors in the records.

Seventeenth. Act of August 4, 1886, increasing the pensions of 10,030 cripples—armless and legless veterans.

Eighteenth. Act of January 29, 1887, benefiting about 30.000 survivors and widows of the Mexican War.

Nineteenth. Act of June 7, 1888, granting arrears to widows from the date of the death of the husband, and providing that all United States officials authorized to administer oaths should administer all oaths required to be made in pension cases in the execution of vouchers for pensions free of charge. This arrearage act benefited at once more than 200,000 soldiers' widows.

Twentieth. Act of August 27, 1888, increasing pensions on account of deafness.

Twenty-first. Act of February 12, 1889, granting an increase of pension from $72 to $100 per month to all persons who lost both hands in the service and line of duty.

Twenty-second. Act of March 1, 1889, relating to the payment of pensions to widows or dependent heirs where subsequent to the issue of the check the pensioner dies.

Twenty-third. Act of March 2, 1889, removing certain technical charges in the record and relieving a large and meritorious class of soldiers.

Twenty-fourth. Act of March 2, 1895, which abolished the rate of $2 and $4 and fixed the lowest rate of pension at $6 per month.

Twenty-fifth. Act of May 11, 1912, granting a service pension to certain defined veterans of the Civil War, increasing the pension of more than 400,000 soldiers, and which is the best pension law ever enacted by Congress, thereby increasing the annual pension roll from $153,686,500 to $180,240,145.84.

Mr. Speaker, I think this is a magnificent showing for a party which has been in power only 9 years during the last 54 years. It reveals that the Democratic Party has always had the best interest of the soldiers and seamen at heart. It is true that the Republican Party has been instrumental in the passage of some very good laws for the relief of soldiers, but they have always had within their ranks many bitter enemies to the extension of the pension roll. The money power has always fought such extension, and it must be conceded that this factor has had much to do with the pension policy of Republican administrations of the past. I have some evidence which shows to what length Republican administrations have been controlled by the money power, and I desire to place some of it in the RECORD.

Mr. Speaker, we are told by the public press than Hon. D. I. Murphy, former Commissioner of Pensions, made the following statement:

> During the national encampment of the Grand Army of the Republic at Philadelphia, one year ago, the pension question and the attitude of this administration—
>
> Meaning President McKinley's administration—
>
> toward the Civil War veterans was the principal topic under consideration. A special committee, consisting of R. B. Brown, of Ohio, chairman; John W. Burst, of Illinois; John Palmer, of New York; C. C. Adams, of Massachusetts; and H. B. Case, of Tennessee, had been previously appointed to wait upon the President and protest against the policy being carried out in the Pension Office. This committee called on President McKinley on the morning of September 4, 1899. They presented to him the complaints of their comrades and urged a change in the pension policy. They even went so far as to tell the President that the Grand Army of the Republic might even ask for the removal of the Commissioner of Pensions.
>
> Replying to the committee, the President gave them plainly to understand that he would sustain the commissioner, no matter how strongly the encampment might condemn him, and added this astounding declaration: "There is no use denying the fact, gentlemen, that the money power of the country is against any further expansion of the pension roll." The amazement and discomfiture of the committee were so complete that they quickly withdrew from the Executive presence.
>
> The money power—
>
> Says Mr. Murphy—
>
> how does it strike the men who left homes and families and staked their all for the perpetuity of the Government? * * * What has become of that Government of the people, by the people, and for the people, that Washington founded and our veterans fought to preserve?

Mr. Speaker, we are told from a clipping from the Associated Press that Secretary of the Treasury Franklin MacVeagh, in an address at the opening session of the American Academy of Political and Social Science at Philadelphia, on the 7th day of April, 1911, used the following language:

> We have a perfectly enormous Civil War pension list, which is not a credit to us. It never had a scientific or just basis, although a worthy motive gave it origin. It has lost its patriotic aspect and has become a political list, costing the Government about $160,000,000 a year.

Mr. Speaker, these clippings tell the true story of disloyalty of the Republican Party to the old soldier in his declining years. The money power furnished the campaign "barrel" for the Republicans, and rather than lose this sweet morsel they decided to dump the old soldiers, their widows, their minor and helpless children, and it was the fights which the Democrats put up in Congress that bore rich fruit for them in the passage of the Sherwood bill. In the Sixty-first Congress, Republican in both Houses and Republican in the White House, with all power over legislation, the Sulloway bill was defeated, and if the Democrats had failed in the elections of 1910 and 1912 I have no doubt but what no new legislation would have been enacted for the relief of the brave men of the sixties. Why try to rob the Democrats of the glory of the passage of the Sherwood bill?

Mr. Speaker, there is record evidence which can not be disputed by anyone, and which will settle the question of loyalty of the Democratic Party to the soldiers and seamen and their dependents. It is a record which Congress has made annually since the Civil War. It is known as the annual appropriation bill for pensions. I invite the attention of the gentleman from Kentucky [Mr. LANGLEY] to this record so that he can compare the appropriations enacted by Republican Congresses with those of Democratic Congresses. When he does this, he will find that during Mr. Cleveland's last administration more money was paid out for pensions than has been paid for that purpose in any administration either before or after his administration, until after the passage of the Sherwood bill. And they will conclusively show that the appropriations for pensions during Mr. Cleveland's administration excel all other administrations in this respect except Mr. Roosevelt's last administration. The appropriations during the three years since the passage of the Sherwood bill falls but little short of the entire appropriations for four years of Mr. Roosevelt's first administration, being only $420,998.15 short.

It must be admitted that the Sherwood bill as it passed the House was much more liberal than it was after it passed a Republican Senate. Secretary of the Interior, Mr. Fisher, estimated that the increase would reach $184,000,000 the first year of its operation and $236,000,000 the second year according to its provisions as it passed the House. But we have seen that the increase fell much short of this sum under the law as it now stands. It was $180,246,145.84 for the first year and $180,300,000 for the second year, and for this year it is only $169,150,000. This reveals that if the bill had become a law as passed by a Democratic House it would have carried an increase of from $30,000,000 to $50,000,000, whereas the law as shaped up in a Republican Senate carries an increase of about $20,000,000, on an average, for the three years. Mr. Speaker, I insert in the RECORD the annual appropriations for pensions since 1887, which is as follows:

Total appropriations for 1887	$76,075,200.00
Total appropriations for 1888 (including all deficiencies)	86,667,500.00
Total appropriation for 1889 (including all deficiencies)	89,758,700.00
Total appropriations for 1890 (including all deficiencies)	107,080,607.35
Total appropriations for 1891 (including all deficiencies)	127,793,059.34
Total appropriations for 1892 (including all deficiencies)	143,189,117.00
Total appropriations for 1893 (including all deficiencies)	160,581,787.35
Total appropriations for 1894	166,531,350.00
Total appropriations for 1895	151,581,570.00
Total appropriations for 1896	141,381,570.00
Total appropriations for 1897	141,328,580.00
Total appropriations for 1898 (including all deficiencies)	149,598,752.46
Total appropriations for 1899 (including all deficiencies)	141,483,830.00
Total appropriations for 1900	145,233,830.00
Total appropriations for 1901	145,245,230.00
Total appropriations for 1902	145,245,230.00
Total appropriations for 1903	139,842,230.00
Total appropriations for 1904 (including all deficiencies)	143,847,600.00
Total appropriations for 1905 (including all deficiencies)	142,860,700.00
Total appropriations for 1906 (including all deficiencies)	141,750,100.00

Total appropriations for 1907 (including all deficiencies)	141,245,500.00
Total appropriations for 1908 (including all deficiencies)	156,143,000.00
Total appropriations for 1909	163,053,000.00
Total appropriations for 1910	160,908,000.00
Total appropriations for 1911 (including all deficiencies)	158,258,000.00
Total appropriations for 1912 (includes $4,500 in deficiency act for rent of New York agency)	153,686,500.00
Total appropriations for 1913 (including all deficiencies)	180,246,145.84
Total appropriations for 1914	180,100,000.00
Amount in this bill	169,150,000.00

Mr. Speaker, I also insert in the RECORD a copy of a letter which I received from Secretary Fisher during the consideration of the Sherwood pension bill, so that the gentleman from Kentucky can see what a Republican Secretary of the Interior thought of the Sherwood bill, and his opinion as to the increase carried in its provisions. It is as follows:

DEPARTMENT OF THE INTERIOR,
Washington, December 16, 1911.

Hon. P. J. MCCUMBER,
Chairman Committee on Pensions,
United States Senate.

SIR: I have the honor to acknowledge the receipt of your inquiries of the 11th and 13th instant, relative to the cost of the bill H. R. No. 1, entitled "An act granting a service pension to certain defined veterans of the Civil War and the War with Mexico."

The number of pensioners, together with the length of service, present rate of pension, proposed rate per month, annual increase per pensioner, and total increase per annum, as regards the survivors of the Civil War and the War with Mexico, should the proposed bill be enacted into a law, is as follows:

Length of service.	Number of pensioners.	Present rate per month.	Proposed rate per month.	Annual increase per pensioner.	Total increase per annum.
3 months	143	$6	$15	$108	$15,444
	205	8	15	84	17,220
	185	10	15	60	11,100
	20,422	12	15	36	735,192
	702	14	15	12	8,424
6 months	124	6	20	168	20,832
	183	8	20	144	26,352
	165	10	20	120	19,800
	18,234	12	20	96	1,750,464
	627	14	20	72	45,144
	8,255	15	20	60	495,300
	189	16	20	48	9,072
	1,908	17	20	36	68,688
9 months	206	6	25	228	46,968
	305	8	25	204	62,220
	275	10	25	180	49,500
	30,391	12	25	156	4,740,996
	1,044	14	25	132	137,808
	13,758	15	25	120	1,650,960
	315	16	25	108	34,020
	3,180	17	25	96	305,280
	8,971	20	25	60	538,260
	182	22	25	36	6,552
	3,893	24	25	12	46,716
1 year and over	1,169	6	30	288	336,672
	1,732	8	30	264	457,248
	1,564	10	30	240	375,360
	172,621	12	30	216	37,285,136
	5,932	14	30	192	1,138,944
	78,148	15	30	180	14,066,640
	1,787	16	30	168	300,216
	18,063	17	30	156	2,817,828
	[1] 52,351	20	30	120	6,282,120
	1,036	22	30	96	99,456
	22,113	24	30	72	1,592,136
	958	25	30	60	57,480
	471,336				75,651,548

[1] Includes 1,398 survivors of the War with Mexico.

The total number who would be entitled to the benefits of the proposed bill, based upon the roll as it existed June 30, 1911, is 471,336. The estimated decrease in this number, due to deaths from July 1, 1911, to January 1, 1912, is about 15,000. The average increase per annum per pensioner is $160.50. This would cause a reduction in the above estimate, due to deaths, of $2,407,500, leaving the net increase in the value of the roll $73,244,048.

The following summary shows the number of pensioners on the roll who would be entitled to the respective rates provided in this bill:

Number.	Rate per month.	Amount per annum.
21,657	$15	$3,898,260
29,685	20	7,124,400
62,520	25	18,756,000
351,474	30	128,690,640
471,336		158,469,300
Deduct $336.21 x 15,000		5,043,150
		153,426,150

Average annual value of each pensioner under this act, $336.21.

It will be observed that the foregoing estimate does not differ materially from that furnished by the department to the chairman of the Committee on Invalid Pensions of the House of Representatives under date of April 11, 1911. The estimate at that time was based upon a copy of a proposed bill, which did not provide a rate of $25 per month for those who served nine months and less than one year. The bill as it passed the House makes provision for nine months' service at $25 per month, and the increased cost due to this provision practically overcomes any reduction which would naturally be expected on account of deaths among the survivors of the Civil War since July 1, 1910.

In the former estimate the pensioners who were receiving less than $12 per month were omitted because of the small number involved, as were likewise those pensioned at odd rates, such as $16, $22, and $25 per month, for the same reason. However, in order to make this estimate as accurate as possible, it has been thought advisable to include as nearly as practicable all those pensioners on the roll who may have title under this bill. The former estimate did not include the survivors of the War with Mexico, as the bill then under consideration made no provision for that class of pensioners.

The actual cost of the bill for the first year after its passage would depend upon the number of certificates issued. If 200,000 should be issued within the first year, the increase in the disbursements for pension would reach approximately $32,100,000 and make the total expenditures for pensions amount to about $184,000,000 for the first year. The maximum cost of this bill would occur in the second year after its enactment, provided the Bureau of Pensions would be able to settle all claims filed under the act in that time. The claims allowed the second year would carry on an average about one year's arrears—the increased rate commencing from the date of filing the application in the Bureau of Pensions. The cost for the second year after the enactment of the bill would very largely exceed that of the first year, being about $87,000,000, which would make necessary a total appropriation for pensions for that year of probably $236,000,000. However, the estimates for the third year would show a marked decrease as the arrears carried by the claims adjudicated the second year would no longer appear as a factor. This, in connection with the death rate, would cause a probable reduction in the disbursements for the third year of $30,000,000.

In the estimated cost of this bill the death rate for the first, second, and third years has been fully taken into consideration.

The enactment of this bill into a law would not, by implication, repeal any existing law or cause a reduction in the rate of any pensioner.

In regard to section 2, you are advised that under the act of March 3, 1883, any person who is so disabled by reason of any wound or injury received or disease contracted while in the military or naval service of the United States and in line of duty as to be incapacitated for performing any manual labor, is entitled to a pension of $30 per month, while under section 2 of H. R. 1 any person who served in the military or naval service of the United States during the Civil War and received an honorable discharge, and who was wounded in battle or line of duty and is now unfit for manual labor, through causes not due to his own vicious habits, or who, from disease or other causes, incurred in line of duty, resulting in his disability is now unable to perform manual labor, would be entitled to a pension of $30 per month.

It is a very difficult matter to give any accurate estimate as to the increased cost which would result from the second section of this bill, in view of the fact that each person entitled to the $30 rate thereunder must have been wounded in battle or line of duty or must have been disabled from some disease or other cause incurred in the line of duty, and be unfit for or unable to perform manual labor. It is not believed, however, that the number of beneficiaries under this section would exceed 15,000. The increase in the disbursements due to this section would probably, therefore, not exceed $2,500,000 per annum. Before the allowance of a claim under this section it would be necessary to have the applicant examined by an examining surgeon or a board of examining surgeons, and the increased cost due to such medical examinations would probably reach about $200,000 per annum.

Very respectfully,

WALTER L. FISHER, *Secretary.*

DEPARTMENT OF THE INTERIOR,
Washington, December 29, 1911.

Hon. H. ROBERT FOWLER,
House of Representatives.

SIR: In response to your request of December 26, 1911, I have the honor to inclose herewith a copy of a communication addressed to the chairman of the Committee on Pensions, United States Senate, under date of December 16, 1911, relative to the cost of the bill (H. R. 1) entitled "An act granting a service pension to certain defined veterans of the Civil War and the War with Mexico."

Very respectfully,

WALTER L. FISHER, *Secretary.*

ENROLLED BILLS AND JOINT RESOLUTION SIGNED.

Mr. ASHBROOK, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills and joint resolution of the following titles, when the Speaker signed the same:

H. R. 12291. An act to increase the limit of cost for the extension, remodeling, and improvement of the Pensacola (Fla.) post office and courthouse, and for other purposes;

H. R. 13770. An act to consolidate certain forest lands in the Sierra National Forest and Yosemite National Park, Cal.; and

H. J. Res. 263. Joint resolution designating the second Sunday in May as Mothers' Day, and for other purposes.

ADJOURNMENT.

Mr. BARTLETT. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 48 minutes p. m.) the House adjourned until to-morrow, Saturday, May 9, 1914, at 12 o'clock noon.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. THACHER, from the Committee on the Merchant Marine and Fisheries, to which was referred the bill (H. R. 14950) to authorize the city of Louisville, Ky., to open a parkway through the United States fish station and hatchery in Jefferson County, Ky., reported the same with amendment, accompanied by a report (No. 645), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. COADY, from the Committee on the District of Columbia, to which was referred the bill (H. R. 12844) for the relief of Spencer Roberts, a member of the Metropolitan police force of the District of Columbia, reported the same with amendment, accompanied by a report (No. 642), which said bill and report were referred to the Private Calendar.

Mr. HAY, from the Committee on Military Affairs, to which was referred the joint resolution (H. J. Res. 262) authorizing the President to detail Lieut. Frederick Mears to service in connection with the proposed Alaskan railroad, reported the same without amendment, accompanied by a report (No. 643), which said bill and report were referred to the Private Calendar.

Mr. GREENE of Vermont, from the Committee on Military Affairs, to which was referred the joint resolution (H. J. Res. 230) to authorize the appointment of Clifford H. Tate as a cadet in the United States Military Academy, reported the same without amendment, accompanied by a report (No. 644), which said bill and report were referred to the Private Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. BUCHANAN of Illinois: A bill (H. R. 16390) to regulate the hours of labor in continuous working plants of the United States; to the Committee on the District of Columbia.

By Mr. GREGG: A bill (H. R. 16391) to provide for the purchase of a site for customhouse at Galveston, Tex.; to the Committee on Public Buildings and Grounds.

By Mr. HARDY: A bill (H. R. 16392) to better regulate the serving of licensed officers in the merchant marine of the United States and to promote safety at sea; to the Committee on the Merchant Marine and Fisheries.

By Mr. ESTOPINAL: A bill (H. R. 16393) to repair, re-cover, and otherwise improve the public building at New Orleans, La., known as the customhouse; to the Committee on Appropriations.

By Mr. NORTON: A bill (H. R. 16412) authorizing the Secretary of Agriculture, in his discretion, to sell and convey a certain tract of land to the Meridan Town and Country Club; to the Committee on Agriculture.

By Mr. FLOOD of Virginia: Joint resolution (H. J. Res. 264) authorizing the President to accept an invitation to participate in the Sixth International Congress of Chambers of Commerce and Commercial and Industrial Associations; to the Committee on Foreign Affairs.

Also, resolution (H. Res. 507) providing for the consideration of H. R. 15503; to the Committee on Rules.

Also, resolution (H. Res. 508) providing for the consideration of H. R. 13667; to the Committee on Rules.

By Mr. BARNHART: Resolution (H. Res. 510) that the bill (H. R. 15902) to amend, revise, and codify the laws relating to the public printing and binding and the distribution of Government publications shall be held and recognized as privileged at evening sessions; to the Committee on Rules.

By Mr. ALEXANDER: Resolution (H. Res. 511) authorizing the printing of 500 copies of volumes 1, 2, and 3 of the Proceedings of the Committee on the Merchant Marine and Fisheries in the investigation of shipping combinations; to the Committee on Printing.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ALEXANDER: A bill (H. R. 16394) granting a pension to Martha Hutchings; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16395) granting a pension to Maranda Perkins; to the Committee on Invalid Pensions.

Mr. BELL of Georgia: A bill (H. R. 16396) granting a pension to John H. Mathews; to the Committee on Pensions.

By Mr. EAGLE: A bill (H. R. 16397) for the relief of S. Aral; to the Committee on Claims.

By Mr. GILLETT: A bill (H. R. 16398) granting a pension to Frances L. Skillings; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16399) granting an increase of pension to Edgar L. Newell; to the Committee on Invalid Pensions.

By Mr. GRIEST: A bill (H. R. 16400) granting an increase of pension to Walter Haldeman; to the Committee on Invalid Pensions.

By Mr. GUERNSEY: A bill (H. R. 16401) granting a pension to Walter E. Swett; to the Committee on Pensions.

By Mr. HAWLEY: A bill (H. R. 16402) granting an increase of pension to Abner R. Bradney; to the Committee on Invalid Pensions.

By Mr. HINDS: A bill (H. R. 16403) for the relief of Thomas T. Rideout; to the Committee on War Claims.

By Mr. HUMPHREY of Washington: A bill (H. R. 16404) for the relief of Fanny A. Crocker; to the Committee on Claims.

Also, a bill (H. R. 16405) for the relief of Samuel Deschamps; to the Committee on Claims.

By Mr. JOHNSON of Kentucky: A bill (H. R. 16406) granting an increase of pension to Thomas F. Lankford; to the Committee on Invalid Pensions.

By Mr. LEVER: A bill (H. R. 16407) granting a pension to Louis L. Jones; to the Committee on Pensions.

By Mr. O'SHAUNESSY: A bill (H. R. 16408) granting an increase of pension to Eliza Hutchinson; to the Committee on Invalid Pensions.

By Mr. PETERS of Maine: A bill (H. R. 16409) granting an increase of pension to Reuel A. Hollis; to the Committee on Invalid Pensions.

By Mr. REED: A bill (H. R. 16410) for the relief of George A. Tarbox; to the Committee on Military Affairs.

By Mr. WILLIS: A bill (H. R. 16411) for the relief of F. D. Bain; to the Committee on War Claims.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Memorial of the Socialist Party of the District of Columbia, relative to mining troubles in Colorado; to the Committee on the Judiciary.

Also (by request) memorial of sundry citizens of New York City; New Castle, Pa.; Cloquet, Minn.; McKean, Pa.; Marietta, Ohio; and Verona, Pa., protesting against the practice of polygamy in the United States; to the Committee on the Judiciary.

By Mr. AINEY: Petition of 51 citizens of Warren Center, Pa., and 68 citizens of Laceyville, Pa., favoring national prohibition; to the Committee on the Judiciary.

Also, petition of the Manufacturers' Association and the Erie Foundrymen's Association, of Erie, Pa., protesting against passage of measures intended to regulate the conduct of interstate business, etc.; to the Committee on the Judiciary.

Hoffman, F. B. Hetrick, Chalmer Bechtel, T. M. Meyers, J. B. Myers, J. N. Byers, C. W. Bulger, I. H. Bulger, J. G. Kuch-

baum, D. N. Byers, George Y. Replogle, Amos Johnson, Irvin Stayer, M. D., C. B. Hetrick, J. T. Hetrick, C. R. Streamer, J. N. Smith, William Henry, jr., R. R. Stayer, Hiram Feltan, all of Woodbury, Pa, for passage of House joint resolution 168, relative to national prohibition; to the Committee on the Judiciary.

Also, (by request), petitions of Jacob D. Brown, Samuel Keagy, Jacob Detwiler, Adam Guyer, E. H. Wyles, George E. Croft, C. C. Ritter, D. J. Reininger, A. C. Negley, J. C. Kensinger, C. E. Little, H. H. Baker, A. B Hoffman, G W. Mertzer, Charles Miller, Luther Johnson, L. A. Croft, J. W. Reininger, Herman Clouse, John Ullery, all of Maria, Pa., for the passage of House joint resolution 168 relative to national prohibition; to the Committee on the Judiciary.

Also, petition of Chapter No. 721, Patriotic Order Sons of America, favoring literacy test in immigration bill; to the Committee on Immigration and Naturalization.

Also, petition of the Manufacturers' Association of Erie, Pa., relative to antitrust legislation; to the Committee on the Judiciary.

By Mr BAKER: Petition of sundry citizens of the second congressional district of New Jersey against national prohibition; to the Committee on the Judiciary.

Also, petition of sundry citizens of New Jersey, favoring national prohibition; to the Committee on the Judiciary.

By Mr. BARCHFELD: Petitions of the Ninth United Presbyterian Church, the Chartiers United Presbyterian Church, the Eleventh United Presbyterian Church, the Mount Washington United Presbyterian Church, all of Pittsburgh, Pa.; the United Presbyterian Churches of Woodville, Crafton Heights, Rennerdale, Ingram, Carnegie, and Oakdale; the First Baptist Church and sundry citizens of Homestead, all in the State of Pennsylvania, favoring national prohibition; to the Committee on the Judiciary.

By Mr. BURKE of Wisconsin: Petitions signed by 102 voters of Ozaukee County, Wis., protesting against the passage of House joint resolution 168 and Senate joint resolutions 50 and 88 and all similar prohibition measures; to the Committee on the Judiciary.

By Mr. CARTER: Petition of the Socialists of Byron County, Okla., protesting against war with Mexico; to the Committee on Foreign Affairs.

By Mr. CARY: Petitions of a large number of citizens of Milwaukee, Wis., against national prohibition; to the Committee on the Judiciary.

Also, petition of the Manitowoc Malting Co. and sundry citizens of Manitowoc, Wis., against national prohibition; to the Committee on the Judiciary.

Also, petition of the Merchants and Manufacturers' Association, of Milwaukee, Wis., against Johnson amendment to Federal pure-food law (H. R. 9418); to the Committee on Interstate and Foreign Commerce.

By Mr. COVINGTON: Petitions of sundry citizens of Rock Hill, 15 citizens of Chestertown, 80 citizens of Crisfield, and 33 citizens of Talbot County, all in the State of Maryland, favoring national prohibition; to the Committee on the Judiciary.

By Mr. DALE: Petition of the Sonoma Wine & Brandy Co., of Brooklyn, N. Y., and the Manufacturers and Dealers' League of New York City and State, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. DEITRICK: Petition of Oscar II Lodge, No. 81, Order of Vasa, of Cambridge, Mass., favoring erection of memorial to John Ericsson; to the Committee on the Library.

Also, petition of sundry citizens and voters of the State of Massachusetts, protesting against national prohibition; to the Committee on the Judiciary.

Also, petition of sundry citizens of Massachusetts, approving position taken by the President relative to Mexican conditions; to the Committee on Foreign Affairs.

By Mr. DOOLITTLE: Petition of 966 citizens of Emporia, Kans., favoring national prohibition; to the Committee on the Judiciary.

Also, petition of sundry citizens of the State of Kansas, favoring passage of House bill 11755, relative to Bureau of Farm Loans; to the Committee on Banking and Currency.

By Mr. DRUKKER: Petition of the Italian Liquor Dealers' Association, of Ellison, N. J.; the Retail Liquor Dealers' Association; the German Retail Liquor Association of New Jersey; the S. J. Asbell Co., of Paterson, N. J.; and sundry citizens of the seventh congressional district of New Jersey, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. EAGLE: Petitions of sundry citizens of Houston, Tex., against national prohibition; to the Committee on the Judiciary.

By Mr. EDMONDS: Petition of George Staehle, of Philadelphia, and other citizens, protesting against the prohibition amendments; to the Committee on the Judiciary.

By Mr. ESCH: Petition of the Racine (Wis.) Suffrage Association favoring equal suffrage; to the Committee on the Judiciary.

Also, petition of various members of the University Club of Racine, sundry citizens of Baraboo and La Crosse, all in the State of Wisconsin, relative to franchise for women; to the Committee on the Judiciary.

By Mr. FLOOD of Virginia: Petition of 25 citizens of Springwood, Va., and 140 citizens of Eagle Rock, Va., favoring national prohibition; to the Committee on the Judiciary.

By Mr. GALLIVAN: Petition of sundry citizens of Boston, Mass., protesting against national prohibition; to the Committee on the Judiciary.

By Mr. GARDNER: Petition of sundry citizens of Beverly, Mass., favoring national prohibition; to the committee on the Judiciary.

Also, petition of the Massachusetts Board of Trade against House bill 13492 to prohibit the labeling of any goods with any other name than that of the actual manufacturer; to the Committee on Interstate and Foreign Commerce.

Also, petition of the Massachusetts Board of Trade favoring House bill 12292, the Federal child-labor bill; to the Committee on Labor.

Also, petition of the Young Men's Literary Society of Tacoma Park, D. C., favoring immigration bill; to the Committee on Immigration and Naturalization.

Also, petitions of the Massachusetts Liquor League and sundry citizens of Massachusetts, against national prohibition; to the Committee on the Judiciary.

By Mr. GILLETT: Petitions of various churches representing 280 citizens of Springfield, 90 citizens of Deerfield, 40 citizens of Amherst, 25 citizens of Whately, all in the State of Massachusetts, favoring national prohibition; to the Committee on the Judiciary.

Also, petition of 850 citizens of the second congressional district of Massachusetts, protesting against national prohibition; to the Committee on the Judiciary.

Also, petition of 169 citizens of the second congressional district of Massachusetts, against national prohibition; to the Committee on the Judiciary.

Also, petition of 400 citizens of Springfield, Mass., and 35 citizens of Warwick, Mass., favoring national prohibition; to the Committee on the Judiciary.

By Mr. GILMORE: Petition of Local No. 914, Machinists' Helpers, of Hyde Park, Mass., relative to strike conditions in Colorado; to the Committee on the Judiciary.

Also, petition of the Massachusetts State Board of Trade, against House bill 13492, the Rogers misbranding bill; to the Committee on Interstate and Foreign Commerce.

Also, petition of the Massachusetts State Board of Trade, favoring House bill 12292, the Federal child-labor bill; to the Committee on Labor.

By Mr. GRIFFIN: Petitions of sundry citizens of the eighth congressional district of New York, against national prohibition; to the Committee on the Judiciary.

By Mr. HAWLEY: Petition of the Union Fishermen's Cooperative Packing Co., of Astoria, Oreg., relative to House bill 12292, to regulate employment of children; to the Committee on Labor.

By Mr. HINDS: Petition of the Maine annual conference of the Methodist Episcopal Church of Portland, various voters of Lebanon, the Methodist Episcopal Church of West Scarboro, 200 citizens of Wilton, and 100 citizens of Montswray, all in the State of Maine, favoring national prohibition; to the Committee on the Judiciary.

By Mr. HINEBAUGH: Petitions of sundry citizens of Rockford, Ill., and Local Unions Nos. 11 and 37, United Mine Workers of America, in Coal City, Ill., relative to strike conditions in Colorado; to the Committee on the Judiciary.

By Mr. JOHNSON of South Carolina: Papers to accompany House bill 16333, granting a pension to Joanna C. Roper; to the Committee on Pensions.

By Mr. KEISTER: Petition of sundry citizens of Westmoreland County, Pa., protesting against national prohibition; to the Committee on the Judiciary.

Also, petition of the United Presbyterian Church of Fairview, Pa., representing 129 persons, and the Salem Methodist Episco-

pal Church, of Pine Township, Allegheny County, Pa., representing 60 persons, favoring national prohibition; to the Committee on the Judiciary.

Also, petition of sundry citizens and the Men's Bible Class of the Methodist Episcopal Church of Scottdale, Pa., favoring national prohibition; to the Committee on the Judiciary.

By Mr. KENNEDY of Rhode Island: Petition of 650 citizens of the third congressional district of Rhode Island against national prohibition; to the committee on the Judiciary.

Also, petition of sundry citizens of Burrillville, R. I., favoring national prohibition; to the Committee on the Judiciary.

By Mr. KINKEAD of New Jersey: Petition of sundry citizens of Essex County, N. J., favoring national prohibition; to the Committee on the Judiciary.

Also, petition of sundry citizens of New Jersey against national prohibition; to the Committee on the Judiciary.

By Mr. LEWIS of Maryland: Petition of the First Brethren Church, Men's Bible Class of the First Christian Church, Men's Bible Class of Hagerstown, the Christ Worship Society of the Church of Brethren, the Senior Men's Bible Class of the Church of Brethren, the Sunday School of the Church of Brethren, the Young Men's Bible Class of Hagerstown, and sundry citizens of Hagerstown, all in the State of Maryland, favoring national prohibition; to the Committee on the Judiciary.

Also, petition of the Young Men's Bible Class of the Methodist Episcopal Church, of Eckhart; sundry citizens of Eckhart mines, Garrett County, and Selbysport; the Epworth League of Selbysport; the Methodist Episcopal Church of Carlos; and the Epworth League of Friendsville, all in the State of Maryland, favoring national prohibition; to the Committee on the Judiciary.

By Mr. LEWIS of Pennsylvania: Petition of sundry citizens of Pennsylvania, against national prohibition; to the Committee on the Judiciary.

Also, petition of the Manufacturers' Association of Erie, Pa., against antitrust legislation; to the Committee on the Judiciary.

Also, petition of the Board of Trade of Chester, Pa., against Government ownership of public utilities; to the Committee on the Judiciary.

Also, petition of sundry citizens of Pennsylvania, favoring national prohibition; to the Committee on the Judiciary.

By Mr. LLOYD: Petition of sundry citizens of Plevna, Mo., favoring national prohibition; to the Committee on the Judiciary.

By Mr. McKENZIE: Petition of the Woman's Christian Temperance Union of Polo, Ill., favoring national prohibition; to the Committee on the Judiciary.

By Mr. MAGUIRE of Nebraska: Memorial of the Nebraska Church Federation, favoring national prohibition; to the Committee on the Judiciary.

By Mr. MANAHAN: Petitions of churches representing 191 citizens of Madelia, 50 citizens of Hinckley, 55 citizens of Lafayette, 115 citizens of Fairmont, 75 citizens of Adrian, 125 citizens of Beaver Creek, 115 citizens of Lake Crystal, 50 citizens of Minneapolis, 75 citizens of Hills, all in the State of Minnesota, and the First District Lodge of the Scandinavian Independent Order of Good Templars, with a membership of 1,200, favoring national prohibition; to the Committee on the Judiciary.

By Mr. MAPES: Petition of sundry citizens of Byron, Kent County, Mich., protesting against the Sabbath-observance bill; to the Committee on the District of Columbia.

Also, petition of sundry citizens of the fifth congressional district of Michigan, favoring national prohibition; to the Committee on the Judiciary.

Also, petition of sundry citizens of Byron, Kent County, Mich., favoring passage of House bill 12928, retaining section 6; to the Committee on the Post Office and Post Roads.

By Mr. MARTIN: Petition of the directors of the Deadwood Business Club, protesting against national prohibition; to the Committee on the Judiciary.

Also, petitions of 25 citizens of Oelrichs, 15 citizens of Edgemont, 336 citizens of Hot Springs, and 25 citizens of Caste, all in the State of South Dakota, favoring national prohibition; to the Committee on the Judiciary.

By Mr. MERRITT: Petition of sundry citizens of Madrid, Burke, Gouverneur, Plattsburg, and the Woman's Christian Temperance Union of Richville, all in the State of New York, favoring national prohibition; to the Committee on the Judiciary.

By Mr. MITCHELL: Petition of sundry citizens and voters of the State of Massachusetts, protesting against national prohibition; to the Committee on the Judiciary.

Also, petition of 106 citizens of Natick, Mass., and 300 citizens of Waltham, Mass., protesting against national prohibition; to the Committee on the Judiciary.

Also, petition of 476 citizens of Marlboro, Mass., and 92 citizens of Framingham, Mass., protesting against national prohibition; to the Committee on the Judiciary.

By Mr. NELSON: Petition of sundry citizens of Dodgeville, Wis., favoring national prohibition; to the Committee on the Judiciary.

By Mr. J. I. NOLAN: Protest of the associate membership of the Knights of the Royal Arch, of San Francisco, Cal., representing the wholesale liquor, brewing, wine, and allied industries, against the Hobson nation-wide prohibition resolution; to the Committee on the Judiciary.

Also, protest of Max I. Koshland and 46 other members of the Grain Trades' Association of California, against the passage of the Hobson nation-wide prohibition resolution; to the Committee on the Judiciary.

Also, protest of the executive committee, representing 52 importers and wholesale liquor merchants of San Francisco, Cal., against the passage of the Hobson nation-wide prohibition resolution; to the Committee on the Judiciary.

Also, protest of the German-American League of California, representing 30,000 voters, against the Hobson nation-wide prohibition resolution; to the Committee on the Judiciary.

By Mr. O'BRIEN: Petitions of sundry citizens of the ninth congressional district of New York, against national prohibition; to the Committee on the Judiciary.

By Mr. O'LEARY: Petition of various voters of the second congressional district of New York, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. O'SHAUNESSY: Petitions of 650 citizens of Rhode Island, against national prohibition; to the Committee on the Judiciary.

Also, petitions of sundry citizens of Rhode Island, against national prohibition; to the Committee on the Judiciary.

Also, petition of sundry citizens of Providence, R. I., favoring national prohibition; to the Committee on the Judiciary.

By Mr. PAIGE of Massachusetts: Petitions of various business men of Palmer, Winchendon, South Ashburnham, Gardner, Baldwinsville, Athol, Orange, Southbridge, and Gilbertville, all in the State of Massachusetts, favoring passage of House bill 5308, relative to taxing mail-order houses; to the Committee on Ways and Means.

By Mr. REED: Petitions of Alfred F. Howard and 998 others, of Portsmouth; W. L. Gibson, of Rye; E. S. Johnson, of Greenland; O. B. Marvin, of New Castle; W. Downing, of Greenland; W. W. Day and J. Reglan, of Exeter; W. I. Haywood, of New Castle; T. M. Weeks, of Greenland; T. W. Weeks, of Greenland; Louis P. Ladd, of Epping; S. L. Reed, of New Castle; John D. Martson, of Rye; W. C. Hansom, of Dover; H. W. Sheppee, of Manchester; Everett Stark, Edward O. Rouke, and George Mansfield, of Newington; R. Grimes, of Dover; Wallace S. Goss, of Rye; W. R. Weeks, of Greenland; J. W. Ernest, of New Castle; E. E. Sterling, of Rye; Fred W. Ray, jr., of Rye; Charles W Neal, of New Castle; K. J. Grimes, of Greenland; E. H. Drake, of Rye; Fred L. Morang, of Dover; O. O. Butterfield and John S. Kimball, of Dover; George Meloon, of New Castle; Fred Hudson, of Gonic; D. E. Sullivan, of Dover; F. M. Pickering, C. P. Yeaton, of Dover; C. C. Johnson, J. N. Libbey, J. Manscom, and G. W. Brackett, of Rye; D. Spinney, of Epping; J. N. Tarlton, of Rye; James Blinn, of New Castle; F. P. Towle and William Brewitt, of Hampton; J. Traversy, E. E. Sterling, F. L. Smart, and W. O. Jennis, of Rye; E. E. Chick, of Rye; Winthrop P. Hoyt and 16 others, of Greenland; all in the State of New Hampshire; also George E. Frany, W. C. Chick, and A. Whitham, of Kittery, Me.; Arthur R. Cason, of Sanford, Me.; and D. F. Fanagan, of Lawrence, Mass.; opposing national prohibition of liquor traffic; to the Committee on the Judiciary.

By Mr. SCULLY: Petitions of 107 citizens of the third congressional district of New Jersey, against national prohibition; to the Committee on the Judiciary.

Also, petition of sundry voters of the third congressional district of New Jersey, protesting against national prohibition; to the Committee on the Judiciary.

Also, petitions of 252 citizens of Matawan, 35 citizens of Dunellen, 30 citizens of Freehold, 500 citizens of Highlands, and the Methodist Episcopal Church of Lakehurst, all in the State of New Jersey, favoring national prohibition; to the Committee on the Judiciary.

Also, petition of the Newark (N. J.) Photo-Engravers' Union favoring the passage of the Bartlett-Bacon bill (H. R. 1873); to the Committee on the Judiciary.

By Mr. SHREVE: Petition of 4,100 voters of the twenty-fifth congressional district of Pennsylvania, against national prohibition; to the Committee on the Judiciary.

By Mr. SMITH of Idaho: Petitions of the Congregational Church and the Woman's Christian Temperance Union, of New Plymouth, Idaho, favoring national prohibition; to the Committee on the Judiciary.
